**OR&IE 636 Integer Programming**

Spring. 3 credits. Prerequisite: OR&IE 630.

Discrete optimization. Linear programming in which the variables must assume integral values. Theory, algorithms, and applications. Cutting-plane and enumerative methods, with additional topics drawn from recent research in this area.

**[OR&IE 637 Semidefinite Programming]**

Spring; weeks 8–14. 2 credits. Pre- or corequisite: OR&IE 635. Not offered 2000–2001.

Linear optimization over the cone of positive semidefinite symmetric matrices; applications to control theory, eigenvalue optimization, and strong relaxations of combinatorial optimization problems; duality; computational methods, particularly interior-point algorithms.]

**[OR&IE 639 Polyhedral Convexity]**

Spring. 3 credits. Prerequisite: basic knowledge of linear algebra. Not offered 2000–2001.

A comprehensive introduction to the geometry and combinatorics of polyhedral convex sets. Also, linear inequalities, supporting and separating hyperplanes; polarity; convex hulls, facets, and vertices; face lattices; convex cones and polytopes; Minkowski sums; Gale transforms; simplicial and polyhedral subdivision; applications to linear programming, combinatorial optimization, and computational geometry.]

**[OR&IE 650 Applied Stochastic Processes]**

Fall. 4 credits. Prerequisite: a 1-semester calculus-based probability course.

An introduction to stochastic processes that presents the basic theory together with a variety of applications. Topics include Markov processes, renewal theory, random walks, branching processes, Brownian motion, stationary processes, martingales, and point processes.

**[OR&IE 651 Probability]**

Spring. 4 credits. Prerequisite: real analysis at the level of MATH 413 and a previous 1-semester course in calculus-based probability.

Sample spaces, events, sigma fields, probability measures, set induction, independence, random variables, expectation, review of important distributions and transformation techniques, convergence concepts, laws of large numbers and asymptotic normality, conditioning.

**[OR&IE 662 Advanced Stochastic Processes]**

Fall. 3 credits. Prerequisite: OR&IE 651 or equivalent.

Brownian motion, martingales, Markov processes, and topics selected from: diffusions, stationary processes, point processes, weak convergence for stochastic processes and applications to diffusion approximations, Lévy processes, regenerative phenomena, random walks, and stochastic integrals.

**[OR&IE 670 Statistical Principles]**

Fall. 4 credits. Corequisite: OR&IE 650 or equivalent.

Review of distribution theory of special interest in statistics: normal, chi-square, binomial, Poisson,  $t$ , and  $F$ ; introduction to statistical decision theory; sufficient statistics; theory of minimum variance unbiased point estimation; maximum likelihood and Bayes estimation; basic principles of hypothesis testing, including Neyman-Pearson Lemma and likelihood ratio principle; confidence interval construction; introduction to linear models.

**[OR&IE 671 Intermediate Applied Statistics]**

Spring. 3 credits. Prerequisite: OR&IE 670 or equivalent. Not offered 2000–2001.

Statistical inference based on the general linear model; least-squares estimators and their optimality properties; likelihood ratio tests and corresponding confidence regions; simultaneous inference. Applications in regression analysis and ANOVA models. Variance components and mixed models. Use of the computer as a tool for statistics is stressed.]

**[OR&IE 677 Sequential Methods in Statistics]**

Spring. 3 credits. S-U grades only.

The statistical theory of sequential design and analysis of experiments has many applications; including monitoring data from clinical trials in medical studies and quality control in manufacturing operations. Topics in this course include classical sequential hypothesis tests, Wald's SPRT, stopping rules, Kiefer-Weiss test, optimality, group sequential methods, estimation, repeated confidence intervals, stochastic curtailment, adaptive designs, and Bayesian and decision theoretic approaches.

**[OR&IE 680 Simulation]**

Fall. 4 credits. Prerequisite: permission of instructor.

An advanced version of OR&IE 581 and 582, intended for Ph.D.-level students.

**[OR&IE 728–729 Selected Topics in Applied Operations Research]**

Fall, spring. Credit TBA.

Current research topics dealing with applications of operations research.

**[OR&IE 738–739 Selected Topics in Mathematical Programming]**

Fall, spring. Credit TBA.

Current research topics in mathematical programming.

**[OR&IE 768–769 Selected Topics in Applied Probability]**

Fall, spring. Credit TBA.

Topics are chosen from current literature and research areas of the staff.

**[OR&IE 778–779 Selected Topics in Applied Statistics]**

Fall, spring. Credits TBA.

Topics chosen from current literature and research of the staff.

**[OR&IE 790 Special Investigations]**

Fall, spring. Credit TBA.

For individuals or small groups. Study of special topics or problems.

**[OR&IE 799 Thesis Research]**

Fall, spring. Credit TBA.

For individuals doing thesis research for master's or doctoral degrees.

**[OR&IE 891 Operations Research Graduate Colloquium]**

Fall, spring. 1 credit.

A weekly 1-1/2 hour meeting devoted to presentations by distinguished visitors, by faculty members, and by advanced graduate students on topics of current research in the field of operations research.

**[OR&IE 893–894 Applied OR&IE Colloquium (also M&AE 594)]**

893, fall; 894, spring. 1 credit each term.

A weekly meeting for Master of Engineering students. Discussion of various topics on manufacturing with faculty members and outside speakers.

## THEORETICAL AND APPLIED MECHANICS

## Basics in Engineering Mathematics and Mechanics

**T&AM 118 Design Integration: A Portable CD Player (also ENGRI 118 and MS&E 118)**

Spring. 3 credits.

This is a course in the Introduction to Engineering series. For description, see ENGRI 118.

**T&AM 202 Mechanics of Solids (also ENGRD 202)**

Fall, spring. 3 credits. Prerequisite: PHYS 112, coregistration in MATH 293 or permission of instructor.

For description, see ENGRD 202.

**T&AM 203 Dynamics (also ENGRD 203)**

Fall, spring. 3 credits. Prerequisite: T&AM 202, coregistration in MATH 294, or permission of instructor.

For description, see ENGRD 203.

## Engineering Mathematics

**T&AM 191 Calculus for Engineers (also MATH 191)**

Fall. 4 credits. Prerequisite: 3 years of high school mathematics, including trigonometry.

For description, see MATH 191.

**T&AM 192 Calculus for Engineers (also MATH 192)**

Fall, spring, or summer. 4 credits. Prerequisite: MATH/T&AM 191.

For description, see MATH 192.

**T&AM 293 Engineering Mathematics (also MATH 293)**

Fall, spring. 4 credits. Prerequisite: MATH/T&AM 192 plus a knowledge of computer programming equivalent to that taught in COM S 100.

For description, see MATH 293.

**T&AM 294 Engineering Mathematics (also MATH 294)**

Fall, spring. 4 credits. Prerequisite: MATH/T&AM 293.

For description, see MATH 294.

**T&AM 310 Advanced Engineering Analysis I**

Fall, spring. 3 credits. Prerequisite: MATH/T&AM 294 or equivalent.

Initial value, boundary value, and eigenvalue problems in linear ordinary differential equations. Special functions, linear partial differential equations. Introduction to probability and statistics. Use of computers to solve problems.

**T&AM 311 Advanced Engineering Analysis II**

Spring. 3 credits. Prerequisite: MATH/T&AM 294 or equivalent (T&AM 311 can be taken without T&AM 310).

Mathematical modeling of physical and biological systems. Examples range from molecular diffusion, crystal growth, physiological flows, to bird flight. The mathematics necessary to understand these phenomena will be discussed in depth. They include probability theory, PDEs, stability analysis, complex variable analysis, and numerical analysis.

**T&AM 610 Methods of Applied Mathematics I**

Fall. 3 credits. Intended for beginning graduate students in engineering and science. An intensive course, requiring more time than is normally available to undergraduates (see T&AM 310-311) but open to exceptional undergraduates with permission of instructor.

Emphasis is on applications. Linear algebra, calculus of several variables, vector analysis, series, ordinary differential equations, complex variables.

**T&AM 611 Methods of Applied Mathematics II**

Spring. 3 credits. Prerequisite: T&AM 610 or equivalent.

Emphasis on applications. Partial differential equations, transform techniques; tensor analysis, calculus of variations.

**T&AM 612 Methods of Applied Mathematics III**

Fall. 3 credits. Prerequisite: T&AM 610 and 611 or equivalent.

Integral transform, methods, Wiener-Hopf technique, solutions of integral equations and partial differential equations. Problems drawn from electromagnetics, elasticity, fluid mechanics, heat transfer, and acoustics.

**T&AM 613 Methods of Applied Mathematics IV**

Spring. 3 credits. Prerequisite: T&AM 610 and 611 or equivalent.

Topics include asymptotic behavior of solutions of linear and nonlinear ODE (e.g., the WKB boundary layer and multiple-scale methods), asymptotic expansion of integrals (method of steepest descent, stationary phase and Laplace methods). Regular and singular perturbation methods for PDE (e.g., method of composite expansions). Other topics (depending on instructor) may include normal forms, center manifolds, Liapunov-Schmidt reducers, Stokes phenomenon. The course may also include computer exercises at the option of the instructor.

**Continuum Mechanics****T&AM 455 Introduction to Composite Materials (also CEE 475, M&AE 455 and MS&E 555)**

Spring. 4 credits.

Introduction to composite materials; varieties and properties of fiber reinforcements and matrix materials; micromechanics of stiffness and stress transfer in discontinuous fiber/matrix arrays; orthotropic elasticity as applied to parallel fibers in a matrix and lamina; theory of stiffness (tension, bending, torsion) and failure of laminates and composite plates including computer software for design; manufacturing methods and applications for composites. There is a group component design and manufacturing paper required, and a group laboratory on laminated component fabrication.

**T&AM 591 Master of Engineering Design Project I**

Fall. 3-6 credits.

M. Eng. (Mechanics) project related to the mechanics of advanced composites and structures.

**T&AM 592 Master of Engineering Design Project II**

Spring. 5-15 credits.

M. Eng. (Mechanics) project related to the mechanics of advanced composites and structures.

**T&AM 655 Composite Materials (also M&AE 655 and MS&E 655)**

Spring. 4 credits.

Taught jointly with T&AM 455 using same lecture material, but also includes more advanced material and homeworks through additional lectures. Additional material includes: shear-lag models of stress transfer around arrays of fiber breaks including viscoelastic effects, statistical theories of composite strength and failure; stress distributions around holes and cuts in composite laminates; compressive strength of composites. Laboratory on effects of holes and notches in composites.

**T&AM 663 Solid Mechanics I**

Fall. 4 credits.

Rigorous introduction to solid mechanics emphasizing linear elasticity: tensors; deformations, rotations and strains; balance principles; stress; small-strain theory; linear elasticity, anisotropic and isotropic; basic theorems of elastostatics; boundary-value problems, e.g. plates, St. Venant's solutions.

**T&AM 664 Solid Mechanics II**

Spring. 4 credits. Prerequisites: MATH 610 and T&AM 663, or equivalent.

Preparation for advanced courses in solid mechanics. Singular solutions in linear elasticity; plane stress, plane strain, anti-plane shear, airy stress functions; linear viscoelasticity; cracks and dislocations; classical plasticity; thermoelasticity; three-dimensional elasticity.

**T&AM 666 Finite Element Analysis (also M&AE 680 and CEE 772)**

Spring. 3 credits. Prerequisites: T&AM 663 or equivalent. P. Dawson.

For description, see M&AE 680.

**T&AM 751 Continuum Mechanics and Thermodynamics**

Fall. 3 credits. Prerequisites: T&AM 610 and 611; and 663 and 664 or equivalents.

Kinematics; conservation laws; the entropy inequality; constitutive relations: frame indifference, material symmetry; finite elasticity, rate-dependent materials, and materials with internal state variables.

**T&AM 752 Nonlinear Elasticity**

Spring. 3 credits. Prerequisites: T&AM 610, 611, and 751 or equivalents. Offered alternate years.

Review of governing equations. Linearization and stability; constitutive inequalities; exact solution of special problems; nonlinear string and rod theories; phase transformations and crystal defects.

**T&AM 753 Fracture**

Fall. 3 credits. Prerequisites: T&AM 610 or 611; and 663 and 664 or equivalents.

Offered alternate years.

Fundamentals of linear elastic fracture mechanics: K, small-scale yielding, solutions of elastic crack problems, energy concepts, J-integral. Nonlinear, rate-independent, small-deformation, fracture mechanics: plastic fracture, J-integral, small-scale yielding, fields for stationary and growing cracks. Failure mechanisms of polymers, ceramics, composites, and metals: void growth, load transfer between fibers, crazing. Fracture testing. Fatigue fracture. Computation of stress intensity factors. Plate theory and fracture.

**T&AM 757 Inelasticity**

Spring. 3 credits. Prerequisites: T&AM 610 and 611; and 663 and 664 or equivalents.

Offered alternate years.

Plasticity: dislocation slip systems; early experimental observations; general principles; limit analysis; solution of boundary-value problems, plastic waves, one- and three-dimensional. Visco-elasticity: general principles, solution of boundary-value problems.

**T&AM 759 Boundary Element Methods**

Fall. 4 credits. Prerequisites: T&AM 610 and 611; and 633 and 644 or equivalents.

Offered alternate years.

Introduction to boundary element methods. Solutions for potential theory, linear elasticity, diffusion, material and/or geometric nonlinearities. Modern developments: hypersingular integrals, the boundary contour methods, sensitivity analysis.

**Dynamics and Space Mechanics****T&AM 570 Intermediate Dynamics**

Fall. 3 credits.

Newtonian mechanics; motion in rotating coordinate systems. Introduction to analytical mechanics; virtual work, Lagrangian mechanics. Hamilton's principle. Small vibration and stability theory. Newtonian-Eulerian mechanics of rigid bodies. Gyroscopes.

**T&AM 578 Nonlinear Dynamics and Chaos**

Fall. 3 credits. Prerequisite: Mathematics/T&AM 293 or equivalent.

Introduction to nonlinear dynamics, with applications to physics, engineering, biology, and chemistry. Emphasizes analytical methods, concrete examples, and geometric thinking. Topics: one-dimensional systems. Bifurcations. Phase plane. Nonlinear oscillators. Lorenz equations, chaos, strange attractors, fractals, iterated mappings, period doubling, renormalization.

**[T&AM 671 Hamiltonian Dynamics**

Spring. 3 credits. Prerequisite: T&AM 570 or equivalent. Offered alternate years; not offered 2000-2001.

Review of Lagrangian mechanics, Kane's equations; Hamilton's principle, the principle of least action, and related topics from the calculus of variations; Hamilton's canonical equations; approximate methods for two-degrees-of-freedom systems (Lie transforms); canonical transformations and Hamilton-Jacobi theory; KAM theory; Melnikov's method.]

**T&AM 672 Celestial Mechanics (also ASTRO 579)**

Fall. 3 credits. Offered alternate years.

Description of orbits; 2-body, 3-body, and n-body problems; Hill curves, libration points and their stability; capture problems. Osculating orbital elements, perturbation equations; effects of gravitational potentials, atmospheric drag, and solar radiation forces on satellite orbits; secular perturbations, resonances, mechanics of planetary rings.

**[T&AM 673 Mechanics of the Solar System (also ASTRO 571)**

Spring. 3 credits. Prerequisite: an advanced undergraduate course in dynamics. Offered alternate years; not offered 2000-2001.

Gravitational potentials, planetary gravity fields. Free and forced rotations. Chandler

wobble, polar wander, damping of nutation. Equilibrium tidal theory, tidal heating. Orbital evolution of natural satellites, resonances, spin-orbit coupling, Cassini states. Long-term variations in planetary orbits. Dust dynamics. Dynamics of ring systems. Physics of interiors, seismic waves, free oscillations. Illustrative examples are drawn from contemporary research.]

#### **T&AM 675 Nonlinear Vibrations**

Fall. 3 credits. Prerequisite: T&AM 578 or equivalent. Offered alternate years.

Quantitative analysis of weakly nonlinear systems in free and forced vibrations, perturbation methods, averaging method. Applications to problems in mechanics, physics, and biology. Additional topics may include Hopf bifurcation, Invariant manifolds, coupled oscillators, vibrations in continuous media, normal forms, and exploitation of symmetry.

#### **[T&AM 678 Complex Systems**

Spring. 3 credits. Prerequisites: T&AM 578 or equivalent. Offered alternate years; not offered 2000–2001.

Complex systems in physics, biology, engineering, economics, and the Internet. Topics: power laws, percolation, phase transitions, scaling, and renormalization. Self-organized criticality; neural, cardiac, genetic, power grid; and financial networks. Stochastic spatial models. Evolution on rugged landscapes.]

#### **T&AM 776 Applied Dynamical Systems (also MATH 717)**

For description, see MATH 717.

### **Special Courses, Projects, and Thesis Research**

#### **T&AM 491–492 Project in Engineering Science**

Fall, 491; spring, 492. 1–4 credits, as arranged.

Projects for undergraduates under the guidance of a faculty member.

#### **T&AM 796–800 Topics in Theoretical and Applied Mechanics**

Fall, spring. 1–3 credits, as arranged.

Special lectures or seminars on subjects of current interest. Topics are announced when the course is offered.

#### **T&AM 890 Master's Degree Research in Theoretical and Applied Mechanics**

Fall, spring. 1–15 credits, as arranged. S-U grades optional.

Thesis or independent research at the M.S. level on a subject of theoretical and applied mechanics. Research is under the guidance of a faculty member.

#### **T&AM 990 Doctoral Research in Theoretical and Applied Mechanics**

Fall, spring. 1–15 credits, as arranged. S-U grades optional.

Thesis or independent research at the Ph.D. level on a subject of theoretical and applied mechanics. Research is under the guidance of a faculty member.

### **FACULTY ROSTER**

Abel, John F., Ph.D., U. of California at Berkeley. Prof., Civil and Environmental Engineering

Ahner, Beth A., Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Agricultural and Biological Engineering

Albright, Louis D., Ph.D., Cornell U. Prof., Agricultural and Biological Engineering  
Allmendinger, Richard, Ph.D., Stanford U. Prof., Earth and Atmospheric Sciences  
Aneshansley, Daniel J., Ph.D., Cornell U. Assoc. Prof., Agricultural and Biological Engineering

Anton, A. Brad, Ph.D., California Inst. of Technology. Assoc. Prof., Chemical Engineering

Arms, William, Ph.D., U. of Sussex. Prof., Computer Science

Ast, Dieter G., Ph.D., Cornell U. Prof., Materials Science and Engineering

Athreya, Krishna B., Ph.D., Stanford U. Prof., Operations Research and Industrial Engineering

Avedisian, C. Thomas, Ph.D., Princeton U. Prof., Mechanical and Aerospace Engineering

Avramidis, Athanassios, Ph.D., Purdue U. Asst. Prof., Operations Research and Industrial Engineering

Baeumner, Antje J., Ph.D., Universitat Stuttgart. Asst. Prof., Agricultural and Biological Engineering

Baker, Shefford P., Ph.D., Stanford U. Asst. Prof., Materials Science and Engineering

Ballantyne, Joseph M., Ph.D., Massachusetts Inst. of Technology. Prof., Electrical and Computer Engineering

Barazangi, Muawia, Ph.D., Columbia U. Prof., Earth and Atmospheric Sciences

Bartel, Donald L., Ph.D., U. of Iowa. Prof., Mechanical and Aerospace Engineering

Bartsch, James A., Ph.D., Purdue U. Assoc. Prof., Agricultural and Biological Engineering

Batterman, Boris W., Ph.D., Massachusetts Inst. of Technology. Walter S. Carpenter, Jr. Professorship in Engineering, Applied and Engineering Physics

Berger, Toby, Ph.D., Harvard U. Irwin and Joan Jacobs Professor of Engineering, Electrical and Computer Engineering

Billera, Louis, Ph.D., City U. of New York. Prof., Operations Research and Industrial Engineering

Billington, Sarah, Ph.D., U. Texas at Austin. Asst. Prof., Civil and Environmental Engineering

Bird, John M., Ph.D., Rensselaer Polytechnic Inst. Prof., Earth and Atmospheric Sciences

Birman, Kenneth P., Ph.D., U. of California at Berkeley. Prof., Computer Science

Bisogni, James J., Ph.D., Cornell U. Assoc. Prof., Civil and Environmental Engineering

Blakely, John M., Ph.D., Glasgow U. (Scotland). Herbert Fisk Johnson Professor of Engineering, Materials Science and Engineering

Bland, Robert G., Ph.D., Cornell U. Prof., Operations Research and Industrial Engineering

Bojanczyk, Adam W., Ph.D., U. of Warsaw (Poland). Assoc. Prof., Electrical and Computer Engineering

Booker, John F., Ph.D., Cornell U. Prof., Mechanical and Aerospace Engineering

Brock, Joel D. Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Applied and Engineering Physics

Brown, Larry D., Ph.D., Cornell U. Prof., Earth and Atmospheric Sciences

Brutsaert, Wilfried H., Ph.D., U. of California at Davis. Prof., Civil and Environmental Engineering

Buhrman, Robert A., Ph.D., Cornell U. John Edson Sweet Professor of Engineering, Applied and Engineering Physics  
Burns, Joseph A., Ph.D., Cornell U. Irving Porter Church Professor in Engineering, Astronomy and Theoretical and Applied Mechanics

Burtscher, Martin, Ph.D., U. of Colorado at Boulder. Asst. Prof., Electrical and Computer Engineering

Cady, K. Bingham, Ph.D., Massachusetts Inst. of Technology. Prof., Theoretical and Applied Mechanics

Callister, John R., Ph.D., Cornell U. Kinzelberg Director of Entrepreneurship in Engineering

Cardie, Claire T., Ph.D. U. of Massachusetts at Amherst. Asst. Prof., Computer Sciences

Castillo-Chavez, Carlos, Ph.D., U. of Wisconsin at Madison. Prof., Theoretical and Applied Mechanics, Biometry, Applied Mathematics, Ecology and Evolutionary Biology, Statistics, Epidemiology, Latin American Studies

Cathles, Lawrence M. III, Ph.D., Princeton U. Prof., Earth and Atmospheric Sciences

Caughey, David A., Ph.D., Princeton U. Prof., Mechanical and Aerospace Engineering

## GRADUATE SCHOOL

Walter Cohen, dean

Alison G. Power, associate dean (on leave 2000)

Shelley Feldman, acting associate dean (2000)

Terry D. Plater, associate dean

Hilary Ford, assistant dean

Graduate study at Cornell is pursued through the Graduate School, which administers the many graduate fields of study, or through the various graduate professional schools and colleges.

### GRADUATE SCHOOL

The graduate program at Cornell permits an unusual degree of accommodation to the needs and interests of the individual student. Degree requirements are kept to a minimum. There are no specific course or credit requirements for the advanced general degrees of Master of Arts, Master of Science, and Doctor of Philosophy, but only such general requirements that best accomplish the aim of graduate study: a period of study in residence, the mastery of one subject, adequate knowledge of allied subjects, oral examinations to establish competency for presentation of a dissertation or thesis, and a satisfactory dissertation or thesis. Certain advanced professional degree programs have specific course or credit requirements that are determined by the faculty of the professional school or college in which the degrees are offered.

A close working relationship between the student and faculty members is essential to the graduate program at Cornell. Under the Special Committee system the student is guided by, and works with, at least two or three faculty members chosen by the student to represent his or her major and minor subjects. The major subject representative is the chair of the Special Committee and usually has the primary responsibility for directing the student's thesis or dissertation research.

### REQUIREMENTS FOR ADMISSION

To be admitted to the Graduate School, an applicant should:

- 1) hold a baccalaureate degree or its equivalent, granted by a faculty or university of recognized standing;
- 2) have adequate preparation for graduate study in the chosen field of instruction;
- 3) have fluent command of the English language;
- 4) present evidence of promise in advanced study and research; and
- 5) take the Graduate Record Examinations General Test, or other specific examinations, for those fields that require these examinations.

Before admission can be final, all applicants whose native language is not English must provide proof of competency in the English language. Acceptable proof could be

- 1) a minimum Test of English as a Foreign Language (TOEFL) score of 550 on the paper-based test or 213 on the computer-based test (higher for some fields);
- 2) evidence of two or more years study in, or a degree from, a college or university in a country where both the language of instruction and the native language is English.

Information on times and places for the TOEFL examination and Graduate Record Examinations and application forms may be obtained from the Educational Testing Service, Princeton, NJ 08541, U.S.A.

Applications for fall admission to the Graduate School should be received by the deadline of the field to which one applies. The earliest deadline is December 15. Many fields, however, have different deadlines. Applicants should consult the Graduate School's application booklet for the specific closing date for each field.

Inquiries regarding admission should be addressed to the specific graduate field office or to the Graduate School Admissions Office, Cornell University, Caldwell Hall, Ithaca, NY 14853-2602.

Inquiries regarding facilities for advanced study and research in a given field, special requirements for such study and research, and opportunities for fellowships and teaching and research assistantships should be addressed to the particular graduate field of interest.

More detailed information is contained in the application for admission to the Graduate School and in the *Graduate School Catalog*. Both may be viewed on the web at [www.gradschool.cornell.edu/](http://www.gradschool.cornell.edu/). An interactive application is available at this site and application forms may be downloaded and printed directly from the web. Both the application and the *Catalog* may be received through the mail by contacting either the individual graduate field office or the Graduate School, Caldwell Hall, Cornell University, Ithaca, NY 14853-2602. (The application is mailed world-wide; the *Catalog* is mailed to addresses with the U.S.)

*Note:* Programs leading to the degrees of Doctor of Law (J.D.), Master of Laws (LL.M.), Doctor of Medicine (M.D.), Doctor of Veterinary Medicine (D.V.M.), and Master of Business Administration (M.B.A.) are not administered by the Graduate School. Information on those programs can be obtained from the Law School, the Weill Medical College of Cornell University (New York City), the College of Veterinary Medicine, and the Johnson Graduate School of Management respectively.

## SCHOOL OF HOTEL ADMINISTRATION

### ADMINISTRATION

David W. Butler, dean

Judi Brownell, associate dean for academic affairs

Daphne A. Jameson, Richard J. and Monene P. Bradley director for graduate studies

Timothy Hinkin, director of undergraduate studies

Donald C. Bishop, associate dean of students and enrollment management

Robert N. D'Entremont, director of external relations

Margaret Haley Ferguson, director of financial services

James E. Hisle, managing director of the Statler Hotel and J. Willard Marriott Executive Education Center

Cheryl S. Farrell, director of admissions and student services

Neoma Mullens, director of minority programs

Katherine S. Margolis, director of library

Shari Avery, director of information technologies

Philippus Miller III, director of alumni affairs

Timothy J. Durnford, director of instructional support

Millie Reed, director of career services

Glenn Withiam, director of publications

Fred Conner, senior editor of the *Cornell Hotel and Restaurant Administration Quarterly*

Mark Adams, director of communications

### DEGREE PROGRAMS

Hotel and Restaurant Administration

*Degree*

B.S.  
M.M.H.  
M.S.  
Ph.D.

### FACILITIES

**Statler Hall.** Statler Hall is a unique building designed expressly to meet the needs of the faculty and students of the School of Hotel Administration. The building serves both practical and theoretical instruction, houses classrooms, lecture rooms, laboratories, a library, a computer center, a beverage-management center, an auditorium, and the Statler Hotel and J. Willard Marriott Executive Education Center. Statler Hall and the Statler Hotel were designed expressly for the school's academic and executive-education programs, providing students with training and work experience in facilities similar to those in which they will work after graduation.

### The School of Hotel Administration's

**Nestlé Library** has the largest single collection of hospitality-related materials in the United States. The collection contains approximately 23,000 books, 1,000 videotapes, numerous ephemera and memorabilia (such as photographs, menus, and rare books), and more than 800 journal, magazine, newsletter, and newspaper subscriptions. Materials on lodging, foodservice, travel and tourism, and general business topics comprise the core of the library's collections. Among the library's special features are numerous computerized information resources, including *NEXIS*, *Dow Jones*, *ABI/INFORM*, and *The International Hospitality and Tourism Database*, an extensive and unique index to hospitality articles. Information resources and services for the hospitality industry are available for a fee through the library's HOSTLINE service. In addition to offering an excellent collection of materials and a dignified and refined study space, the Hotel School library extends quality service to every student. Please visit us and benefit from our collections and services.

### Statler Hotel and J. Willard Marriott

**Executive Education Center.** The Statler Hotel comprises 150 guest rooms, an executive education center, restaurants, a lounge, and the university's faculty and staff club. It demonstrates the very finest in hospitality and hospitality-education practices. The Statler is an independent, self-sustaining teaching hotel that provides quality food, beverage, meeting, and lodging services to the local community and campus visitors, including parents and those who visit Cornell as part of the application process. In addition, the hotel is a practice-management facility for certain classes, internships, and independent-study projects. It offers part-time jobs to approximately 300 students each semester with preference given to students in the hotel school.

### UNDERGRADUATE CURRICULUM

The School of Hotel Administration offers education in the numerous disciplines required for modern management in the global hospitality industry. Included in the core curriculum are courses in management, human resources, financial management, food and beverage operations, marketing, tourism, property asset management, communications, and law. Students also are encouraged to pursue a broad range of elective courses, including those in the humanities, social sciences, and natural sciences, as preparation for assuming leadership positions in the business and local community. For more complete information about undergraduate program requirements, see the school's student handbook or course supplement (available in room 174 Statler Hall).

### Requirements for Graduation

Regularly enrolled undergraduate students in the School of Hotel Administration are

candidates for the degree of Bachelor of Science. The requirements for that degree are:

- 1) completion of eight terms in residence for those who entered as freshmen; terms of residence for transfer students are determined by the amount of transfer credit awarded;
- 2) completion, with a minimum cumulative grade-point average of 2.0 (including a grade-point average of 2.0 in a full-time schedule of courses on campus in the final semester), of 120 required and elective credits, as set forth in the table on the following page;
- 3) qualification in one language other than English. This requirement may be met by any one of the following: (1) three years of high school study of one foreign language; (2) score of 560 on Cornell Placement Test; (3) pass language 121 and 122 (eight credits) or the equivalent, and attain a minimum grade of at least C- or "Satisfactory" in each (C or above for transfer credit from other institutions); or (4) pass 123 or the equivalent;
- 4) completion of two units of practice credit prior to the last two terms of residence, as defined on the following page;
- 5) completion of the university requirement in physical education.

Suggested course programs appear on the following pages. The core courses account for 72 of the 120 credits needed for graduation, the hotel electives account for 12 credits, and 18 credits are allotted for distributive electives. The remaining 18 credits may be earned in courses chosen from the offerings of any college of the university, provided that the customary requirements for admission to such courses are met.

Students in the School of Hotel Administration who plan to attend summer school at Cornell or any other four-year college or university, with the expectation that the credit earned will be counted toward the Cornell degree in hotel administration, must obtain the approval of the school in advance. Without advance approval, such credit may not count toward the degree.

Credit earned in military science, aerospace studies, or naval-science courses may be counted in the 18-credit group of free electives. No credit toward the degree is allowed for "0"-level courses, such as Educ 005.

### Transfer Credit Policy

Transfer students are required to complete all degree requirements with at least 75 credits at Cornell University, of which a minimum of 60 must be in courses offered by the Hotel School, and nine must be in distributive electives taken outside the Hotel School. Thus, a maximum of 45 hours in transfer credit may be allowed from other accredited colleges or universities as follows:

Core	18
Hotel Electives	0
Distributive Electives	9
Free Electives	18
	45

In the core, transfer credit may be allowed against basic courses only (for example, HA 121, HA 136, Economics). Others generally are waived, and an upper-level course in the area substituted. For instance, if HA 243 were waived, another marketing course would be required in its place. The communication courses (HA 165 and HA 365) are tailored specifically to the School of Hotel Administration, and, thus, communication courses taken elsewhere generally are not accepted against core courses.

Hotel elective courses may not transfer.

Distributive electives ensure that Hotel students are exposed to other courses at Cornell, and, thus, only nine credits may transfer. The remaining nine must be taken at Cornell but may be distributed in any combination of humanities, social sciences, or natural sciences provided at least three credits are taken (at Cornell or transferred from elsewhere) in each area. A maximum of six credits, but no more than four per semester, of distributive electives may be taken on an S-U basis. For more information on the distribution requirement, see the handout available in the student services office, room 178 Statler Hall.

Eighteen credits in free electives may transfer.

### Concentration

While completing the hotel elective courses, undergraduates in the school may select a concentration.

When students select a field of concentration, they should consult the coordinator of instruction in that area during the sophomore year to plan the sequence of courses that will best fit their program.

Upon completion, the concentration will be noted on the transcript, provided a cumulative GPA of 3.0 in the concentration was attained.

### Foreign Languages

Mastery of a foreign language is particularly desirable for students who are planning careers in the hospitality industry and, hence, the second language requirement for graduation. Further information on foreign language courses at Cornell, and placement in language courses, may be found in this book in the College of Arts and Sciences program description under the Modern Languages, Literature, and Linguistics section and also under the section Advanced Placement for Freshmen.

### Independent Study

Students may conduct independent study projects in any academic area of the school under the direction of a resident faculty member. Credit is arranged on an individual basis. To enroll in an independent study project, students must obtain written permission from the school before the add deadline. See H ADM 499 or 699 for more details.

### Practice-Credit Requirement

As part of degree requirements, undergraduates enrolled in the School of Hotel Administration must fulfill the practice-credit requirement and submit verification thereof prior to registering for the last two semesters. Further details are set forth in the *Practice Credit Handbook for Undergraduates in the School of Hotel Administration*, available in the school's Career Services Office, room 255 Statler Hall.

### Management-Intern Program

Hotel School juniors and seniors have a unique opportunity to gain invaluable knowledge and experience in the hospitality industry through the management intern program. Students receive 12 free elective credits and 1 practice credit. While on the internship, tuition is reduced and students receive a salary from the sponsoring organization. Positions are available in the United States and internationally. Sponsors include, but are not limited to, hotels, restaurants, casinos, corporate offices, consulting firms, and clubs. Application should be made one semester in advance. Information meetings are held at the beginning of each semester and are open to all students. See H ADM 493 and 494 for more details. More information about the management intern program also is available in the Career Services Office, 255 Statler Hall.

### Study Abroad

All students planning to study abroad apply through Cornell Abroad; please see the Cornell Abroad program description in the introductory section of *Courses of Study*.

Programs providing an opportunity to study in a foreign country and develop an awareness of the international component of the hospitality industry can contribute to each student's total educational experience. Students in recent years have studied in Italy, Spain, France, England, Australia, and many other countries. Information on the study-abroad programs operating during the summer and academic year is available at the Cornell Abroad Office (in Uris Hall).

Students should discuss their plans with the school's director of student services so that all petition and credit-evaluation procedures are followed.

### Part-Time Study

Generally, part-time study is not allowed. Exceptions may be made for employee degree candidates, students who have medical reasons for a reduced schedule, or other extenuating circumstances. In no event shall a student be allowed to enroll on a part-time basis during the last term of study. Further details on part-time study may be found in the school's student handbook (available in room 174 Statler Hall).

### Grading System

Letter grades ranging from A+ to F are given to indicate academic performance in each course. These letter grades are assigned a numerical value for each term average as follows: A is equivalent to 4.0; B to 3.0; C to 2.0; D to 1.0; F to 0. For good standing, the student must maintain a minimum average of 2.0. A maximum of four credits each term may be taken on a "satisfactory-unsatisfactory"

(S-U) basis. Students should be aware that a satisfactory grade equals "C-" or above and an unsatisfactory grade equals "D+" or lower.

Students whose term averages are at least 3.3 and who took at least 12 credits of letter grades with no unsatisfactory or incomplete grades are honored by being placed on the Dean's List.

### Course Requirements for Graduation

<i>Required courses</i>	<i>Credits</i>
Management Operation: Hotel Administration 105, 401	6
Human-Resources Management: Hotel Administration 115, 211	6
Financial Management: Hotel Administration 121, 221, 222, 321	12
Food and Beverage Management: Hotel Administration 136, 236, 335	12
Marketing and Tourism: Hotel Administration 243, elective	6
Property Asset Management: Hotel Administration 255, 355	6
Communication: Hotel Administration 165, 365	6
Operations Management and Information Technology: Hotel Administration 174, 371, 475	9
Law: Hotel Administration 387	3
Economics: Micro and Macro	6
<i>Specifically required credits</i>	72
<i>Hotel Electives</i>	12
<i>Distributive electives</i>	18
<i>Free electives</i>	18
<b>Total credits required for graduation</b>	<b>120</b>

### Typical Course Sequences

The following arrangements of courses tend to be more fixed in the freshman and sophomore years, with a greater degree of flexibility characterizing the upperclass years.

#### Freshman Year

Typically, a freshman schedule will consist of 15 to 16 credits each term, to include the following:

<i>Required courses</i>	<i>Credits</i>
H ADM 105, Introduction to Lodging	3
H ADM 115, Organizational Behavior and Interpersonal Skills	3
H ADM 121, Financial Accounting	3
H ADM 136, Introduction to Food Service Operations	4
H ADM 165, Managerial Communication I	3
H ADM 174, Microcomputing	3
H ADM 191, Microeconomics for the Service Industries	3
Macroeconomics	3
Electives	6
	31

**Sophomore Year**

<i>Required courses</i>	<i>Credits</i>
H ADM 211, Human Resources Management	3
H ADM 221, Managerial Accounting	3
H ADM 222, Finance	3
H ADM 236, Culinary Theory and Practice	4
H ADM 243, Principles of Marketing	3
H ADM 255, Hotel Development and Planning	3
Electives	12
	<hr/> 31

**Junior Year**

<i>Required courses</i>	<i>Credits</i>
H ADM 321, Hospitality Financial Management	3
H ADM 335, Restaurant Management	4
H ADM 355, Hospitality Facilities Operations	3
H ADM 365, Managerial Communication II	3
H ADM 371, Hospitality Quantitative Analysis	3
H ADM 387, Business and Hospitality Law	3
Electives	12
	<hr/> 31

**Senior Year**

<i>Required courses</i>	<i>Credits</i>
H ADM 401, Strategic Management	3
H ADM 475, Information Technology in the Hospitality Industry	3
Marketing Elective	3
Electives	18
	<hr/> 27

**GRADUATE CURRICULUM**

The school's programs for advanced degrees include those of Master of Management in Hospitality, Master of Science, and Doctor of Philosophy. For further information on graduate programs, consult the school's graduate catalog (available in room 172 Statler Hall); contact the school's graduate services office at 255-7245, or see the university's *Announcement* from the Graduate School.

**Required Program for Professional Master's Students**

<i>Required courses</i>	<i>Credit</i>
H ADM 701, Competitive Strategies for the Hospitality Industry	3
H ADM 702, Human Behavior in Organizations	3
H ADM 711, Human Resources Management	3
H ADM 721, Financial Economics	3
H ADM 722, Hospitality Financial Management	3
H ADM 731, Food and Beverage Management	3

H ADM 741, Marketing Management	3
H ADM 751, Properties Development and Planning	3
H ADM 761, Communication Modules	0
H ADM 771, Quantitative Methods	3
H ADM 772, Information Technology for Hospitality Managers	3
H ADM 791, Creating and Managing for Service Excellence	3
H ADM 793, Industry Mentorship Program	0
H ADM 794, Management Development Component I and II	0

*Balance of courses are electives.*

**Total credits required for the Master of Management in Hospitality program** 64

**Course Schedule Information**

For up-to-date information about course scheduling, and to obtain a course supplement, contact the hotel school student services office in room 178 Statler Hall, telephone 255-3076.

**MANAGEMENT OPERATION COURSES****H ADM 100 Principles of Management**

Fall and spring. 3 credits. Limited to non-hotel students. Elective. K. Namasivayam. An introductory survey course in management with orientation to the hospitality industry. The course is organized around the traditional management functions of planning, organizing, commanding, coordinating, and controlling.

**H ADM 102 Distinguished Management Lectures**

Fall. 1 credit. Elective. Faculty. A series of lectures given by nonresident speakers prominent in the hotel and restaurant industries or allied fields. Topics include career ladders, company profiles, and business-policy formulation.

**H ADM 104 Elements of Business for Non-Business Majors**

Spring. 1 credit. Limited to non-hotel students. P. Rainsford. Provides hands-on skills and knowledge about how to start or run a small business for students whose professional careers may require them to operate their own business. The course will be especially appropriate for students interested in professional careers such as architecture, design, writing, art, engineering, law, and other service businesses. Utilizes a computer-based management simulation game and will require students to work in management teams of six to start and operate a hotel. Each management team's hotel will be in competition with other hotels in the stimulation. The course is introductory level and no previous business experience or computer knowledge is required. Students will be required to attend all sessions and complete a paper that will be due a week after the conclusion of the course. Hotel and DEA students may not enroll.

**H ADM 105 Introduction to Lodging**

Fall and spring. 3 credits. Limited to hotel and sponsored internal transfer division students. Required. R. McCarthy. Designed to provide students with a comprehensive, fundamental understanding of how hotels are managed from the rooms perspective. Through practical hands-on experiences, students will be exposed to operational line-level positions in the rooms division including housekeeping, reservations, front desk, PBX, and bellstand. Lectures will begin with an overview of the lodging industry and will focus on the managerial aspects of the rooms division. Topics include revenue management, forecasting, budgeting, measuring performance, transient versus group displacement, pricing and inventory management, service quality, ethics, and technology. Students will apply what they have learned in class while operating their own virtual 250-room hotel using a CHES computer simulation. Guest lecturers will provide students with insight on various career opportunities in the operations or rooms-related areas.

**H ADM 303 Club Management**

Fall and spring. Fall, second 7 weeks only; spring, first 7 weeks only. 2 credits. Fall, limited to 35 hotel school juniors and seniors; spring, open enrollment. Prerequisite for hotel students: H ADM 105, or equivalent. Elective. R. James.

The study of private membership clubs and club administration. The application of current management principles in a not-for-profit environment is discussed and club management is compared to other areas of the hospitality industry. Topical coverage includes: tournament, facility, and recreation management; legal, financial, and legislative issues; human relations and resource consideration; marketing, pricing policies, and quality standards. The deadline to drop is the mid-point of the course.

**[H ADM 304 Room-Division Strategic Management**

Fall. 2 credits. Second seven weeks of the semester. Limited to juniors, seniors, and graduate students. Elective. Not offered fall 2000. Faculty.

Designed for students to study and explore the strategies used by hotel companies competing in multiple market areas. The course will build on the student's awareness of operations, marketing, law, and finance. The course content parallels presentations made to many hotel companies and their senior management staffs. Assignments will involve readings about service marketing strategies. Participation, analysis, and communication in the Cornell Hotel Administration Strategic Exercise will compose a term project. Ownership meetings and emphasis on renewal or extension of management contracts with the strategic exercise will be a focus of the course. The deadline to drop is the mid-point of the course.]

**H ADM 306 Franchising in the Hospitality Industry**

Fall. 3 credits. Not open to freshmen. Elective. M. Noden. This course looks at relationships between franchisor and franchisee, advantages and disadvantages of franchising, and structure and services offered by franchisors. Case studies of leading lodging and restaurant companies currently offering franchises will be discussed. Guest speakers from the franchising industry.

**H ADM 401 Strategic Management**

Fall and spring. 3 credits. Prerequisites: H ADM 105, 115, 211, and 321, or equivalents. Required: T. Cullen, C.ENZ. This is a top management, "big picture" course. It is not limited to a single functional area such as marketing, human resources, finance, food and beverage, design, or so forth. The problems and issues of strategy require a total enterprise perspective and the skill of judging how all the relevant factors affect the business organization. Introduces a number of models, methods, and techniques that can be used to identify strategic issues, generate future-oriented action plans to address those issues, and implement change. An important goal is to emphasize the need to review a firm's strengths and weaknesses as the basis for formulating the firm's strategy for exploiting environmental opportunities and coping with environmental threats. Because of the group nature of the course, the absolute drop deadlines are September 1 in the fall and January 26 in the spring.

**H ADM 402 Hospitality Management Seminar**

Fall. 1 credit. Limited to 30 seniors and graduate students by permission. Students will be expected to register for H ADM 102. Elective. Faculty. A weekly meeting with the H ADM 102 speaker of the week. The subject matter varies from week to week, depending on the speaker's area of expertise. The class is relatively unstructured, and students are expected to participate in discussions.

**H ADM 403 Resort and Condominium Management**

Fall. Students may enroll in first seven weeks, second seven weeks, or both. 2 credits. Limited to seniors and graduate students, others by permission of instructor. Mandatory attendance in all class periods. Elective. M. Noden.

**First Seven Weeks:** Resort Management: A lecture course in the development, operations, and management of the resort property. Resorts of various types, seasons, and economic levels are considered. Emphasis is on the financing and environmental considerations of the resort development cycle. Regulatory issues are examined, and relationships with host communities and governmental bodies are explored. Special consideration is given to the promotion of business, the provision of facilities, services and guest entertainment. Contract and noncontract relationships with the travel industry are reviewed.

**Second Seven Weeks:** Resort Condominium Management: A lecture course in the development, financing, and management of secondary-residential hotel condominiums. Contemporary state statutory requirements, S.E.C. regulations and prospectus rules are reviewed for application in the managerial portfolio. Federal land use controls are examined and explained. Individual financing of units, and management contracts are fully reviewed, and students will be exposed to typical management contract requirements and protocols. Rental pooling and its effects upon management and owners will be fully explored. Applications of the condominium concept, including such by-products as time sharing, will be examined from a managerial perspective.

**H ADM 404 Entrepreneurship**

Fall and spring. 3 credits. Limited to 40 juniors, seniors, and graduate students. Prerequisite: H ADM 321 or equivalent. Elective. Faculty. Emphasizes starting a new business, not franchising or buying an existing business. Topics will cover how to conceptualize an idea, how to evaluate and articulate the plan, and how to sell the plan to investors, customers, partners, and employees. Students work in teams to develop and present a business plan to a panel of judges at the end of the course. Case studies, guest lecturers. **Because of the group project nature of the course, the absolute drop deadline for all students is the last day of the first week of classes.**

**H ADM 405 Quality Planning in the Hospitality Industry**

Spring. 3 credits. Limited to 25 seniors and graduate students. Prerequisites: all required hotel undergraduate courses at the 100, 200, and 300 levels. Elective. T. Hinkin.

Focuses on the analysis of work processes and examines organizations from three perspectives: the customer, the employee, and management. Provides students with a systematic approach to identifying, prioritizing, and improving key job functions and work processes utilizing the tools of quality management. Readings, case analysis.

**H ADM 407 Seminar in Hotel Operations**

Spring. 3 credits. Limited to 25 juniors and seniors. Estimated cost of field trip, \$200. Elective. R. McCarthy.

Seminar course applies management theory to actual hotel operations via semester-long interactions and visits with the department heads and general manager of a medium- to large-size hotel. Field trip includes attendance at executive committee meeting, presentations by various department heads, and half-day "shadow assignments."

**H ADM 408 Seminar in Casino Operations**

Fall. 2 credits. Limited to hotel juniors and seniors. Estimated cost of field trip, \$200. Elective. R. McCarthy.

Introduction to the multi-billion dollar gaming industry, including a historical overview of gaming and examination of legal, social, and economic issues within the industry. Reviews various games played in casinos, current trends, and the most popular casino destinations in the world. Special attention is devoted to the growth of casinos in cruise ships, Indian reservations, and on river boats in the United States.

**H ADM 409 Airline Management**

Spring. 3 credits. Elective. Offered alternate years. M. Noden.

Focuses on domestic and international airline industries and explores both pre- and post-regulatory climates. Emphasis is on dynamic organizational change in response to fluctuating economic and legal conditions. Topics include airline organization, comparative corporate strategies, marketing and distribution networks, operations and service management, union relations, finance, government regulation, and air transport. Case studies and guest lecturers will be used. Also, using the computer-driven simulation exercise called AIRLINE, student teams will operate a small regional carrier.

**H ADM 603 Managing Across Cultural Boundaries**

Fall and spring. 3 credits. Limited to seniors with H ADM 121, 165, 321, 401, or graduate student status. Elective. T. Cullen. Contributes to the development of knowledge and skills needed to manage effectively in other cultures. Objectives are to develop awareness of the pervasive and hidden influence of culture on behavior, particularly with respect to management and management practices; to develop familiarity with the types of situations and issues that often confront managers working in foreign countries; and to develop an appreciation of the impact on personal behavior of living and working in another culture. Readings, case studies.

**H ADM 701 Competitive Strategies for the Hospitality Industry**

Fall. 3 credits. Professional master's requirement. T. Cullen.

An integration and application of management concepts, theories, and practices to business situations. Students analyze current problems, formulate strategies, and implement policies.

**H ADM 702 Human Behavior In Organizations**

Fall. 3 credits. Professional master's requirement. T. Hinkin.

Focuses on manager and member behavior in organizations. Ideas and models about persons, interpersonal relationships, small groups, and organizations will provide the basis for understanding the dynamics of effective organizational behavior. Learning will occur primarily through readings, case discussions, and self-reflective teamwork.

**H ADM 801 Seminar In Hospitality and Service Inquiry**

Fall. 3 credits. Elective. Offered alternate years. C. Lundberg.

This seminar introduces academic graduate students to the major alternative ways of conceptualizing and designing research, and acquiring, interpreting, and disseminating findings. The implications and consequences of one's choices and tradeoffs among the alternative philosophical, ideological, and pragmatic perspectives and approaches to inquiry will be emphasized.

**HUMAN RESOURCES MANAGEMENT****H ADM 115 Organizational Behavior and Interpersonal Skills**

Fall and spring. 3 credits. Required. F. Berger.

Focuses on managing people in the workplace. Students develop theoretic lenses for understanding people and organizations and practical tools for accomplishing personal and organizational goals. Topics include individual differences, conflict management, problem solving, power and influence, motivation, leadership, coaching and counseling, and group process. Self-assessments, experiential exercises, reading, discussions, papers, and group activities.

**H ADM 210 The Management of Human Resources**

Fall and spring. 3 credits. Limited to 40 non-hotel students, no freshmen. Elective. Faculty.

Examines the role of human resources management, starting with an introduction to

the personnel function and an analysis of the social, legal, international, and competitive factors. Examines recruitment, selection, training, motivation, development, compensation, performance appraisal, and labor relations. Class discussion and case analysis are emphasized.

#### **H ADM 211 Human Resources Management**

Fall and spring. 3 credits. Limited to 60 hotel students per lecture, no freshmen or graduate students. Prerequisites: H ADM 105 and 115 (co-registration in 115 allowed). Required. B. Tracey.

Provides students with an overview of the human resources management (HRM) field and shows them the link between specific HRM activities and substantive issues/situations they will face as future hospitality managers. Integrates information and knowledge acquired in previous courses. Students will understand the relationship between compensation and benefit activities and job design, motivation, and reward structures. Upon completion, students will (1) understand the interrelationship of HRM activities, as well as the relationship between HRM and other functional areas within hospitality organizations; and (2) understand how to effectively attract, retain, and motivate hospitality employees.

#### **H ADM 411 Negotiations in the Hospitality Industry**

Spring. 3 credits. Limited to 30 undergraduate students. Prerequisites: H ADM 115, or equivalent. Elective. T. Simons.

Negotiation skills are crucial to business success. This course provides hands-on experience in negotiation in the hospitality field. Writing, role-playing exercises, and discussions are used to develop students' negotiation skills. Students will improve their comfort level with negotiating as well as develop their own personal style. Students will also learn how to adjust their negotiating style to respond appropriately to different personalities and negotiation tactics.

#### **H ADM 412 Managing Organizational Change**

Spring. 3 credits. Prerequisite: H ADM 211 or equivalent. Elective. C. Lundberg.

Facilitating and managing change in organizations. Topics include change processes, organizational diagnosis, action planning, and consultancy. Individual and team projects.

#### **H ADM 415 Managerial Leadership in the 21st Century**

Spring. 1 credit. Weekend course. Dates TBA. Elective. Required notebook \$25. K. Blanchard.

Students become participant observers in their own lives by studying the field of applied behavioral science. Students will be able to use what they learn about human beings and how they function best in groups and organizations on a day-to-day basis to develop quality relationships between themselves and the people they support and depend upon (boss, staff, internal peers/associates, and customers). **Because of the popularity of this class, priority will be given in the following order: seniors, juniors, non-employee extramural students, sophomores, freshmen, and Cornell employees. The absolute deadline for adding or dropping the course is 12:00 noon on the first day of class.**

#### **H ADM 416 Special Studies in the Management of Human Resources: Service Cultures**

Spring. 2 credits. Limited to juniors, seniors, and graduate students. Prerequisite: H ADM 211 or equivalent. Elective. C. Lundberg.

**First Seven Weeks—Service Cultures.** This course will assist students in understanding the creation and maintenance of effective service-driven operations. Emphasis will be placed on the diagnosis and design of human resource initiatives aimed at creating effective service cultures and improving organizational performance. Topics covered include the management of emotions, monitoring and measuring the corporate culture for service, and the linkage of human resource practices to service vision, organizational design, and strategic objectives. Students will develop and conduct a culture audit in a business. The seminar format is intended to encourage class discussion, case analysis, and field experience.

**Second Seven Weeks—Service Organization Design.** Since the earliest organizations, questions of how to best organize activities and resources have challenged managers. Traditional structures, e.g., those organized by functions, products, territories, seem to work less effectively as time goes on. The contemporary management challenge is to design and use more responsive, and flexible organizations—especially in the service sector. It is important to understand the effects of different organizational designs and systems on behavior and efficiency. This course will therefore carefully explore the components, processes, and issues associated with known and probable design options. We will operate as a seminar with several application classes.

#### **H ADM 418 Innovation and Dynamic Management (also ARME 328)**

Spring. 3 credits. Limited to juniors and seniors. Elective. C. Enz.

A university-wide course that investigates the innovation process and how to develop good management practice. Innovative firms are studied via case analyses, and a framework for effective change management is devised by the end of the semester. Emphasis is placed on examining how businesses and managers can build profitable organizations through a process of rethinking, re-evaluating, and discarding existing practices. The class will operate as a seminar with several hands-on experiences in innovation.

#### **H ADM 611 Negotiations in the Hospitality Industry**

Spring. 3 credits. Limited to 30 graduate students. Prerequisite: H ADM 702 or equivalent. Elective. T. Simons.

Negotiation skills are crucial to business success. This course provides hands-on experience in negotiation in the hospitality field. Writing, role-playing exercises, and discussions are used to develop students' negotiation skills. Students will improve their comfort level with negotiating as well as develop their own personal style. Students will also learn how to adjust their negotiating style to respond appropriately to different personalities and negotiation tactics.

#### **H ADM 614 Leadership and Small Group Processes**

Fall. 3 credits. Limited to 30 hotel seniors and graduate students. Elective. C. Lundberg.

Theoretical and practical applications of organizational behavior will be explored through lectures, case studies, and management games and exercises. Students will participate in experiential labs aimed at enhancing their effectiveness as members or leaders of groups. Topics include leadership, decision making, motivation, power, and organizational change.

#### **H ADM 711 Human Resources Management**

Spring. 3 credits. Professional master's requirement. B. Tracey.

Addresses the policies and procedures that are required to attract, develop, and retain quality employees. Attention will be given to both strategies and tactics that influence HR decisions, as well as individual and organizational performance. A variety of learning methodologies will be used and students will have the opportunity to apply knowledge and skills in a semester-long project.

## FINANCIAL MANAGEMENT

#### **H ADM 120 Personal Financial Planning**

Spring. 2 credits. Limited to non-hotel students. Elective. Faculty.

An overview of personal financial planning including money management, tax planning, use of credit, insurance, investing, retirement, and estate planning.

#### **H ADM 121 Financial Accounting**

Fall and spring. 3 credits. Limited to hotel students. Required. D. Ferguson.

The basic principles of accounting, involving transaction analysis, flow of accounting data to the financial statements, and careful consideration of accounting for revenues, expenses, assets, liabilities, and owner's equity.

#### **H ADM 123 Financial Accounting Principles**

Fall and spring. 3 credits. Limited to non-hotel students. Elective. L. Hensley.

An in-depth introduction to the principles of financial accounting, involving transaction analysis, flow of accounting data to the financial statements, and careful consideration of accounting for revenues, expenses, assets, liabilities, and owner's equity.

#### **H ADM 125 Finance**

Fall and spring. 3 credits. Limited to non-hotel students. Elective. Faculty.

Corporate finance topics include time value of money, financial markets, interest rates, financial statement analysis and planning, working capital policy and management, risk and return, risk management, security valuation models, cost of capital, capital budgeting, capital structure, dividend policy, and creative finance.

#### **H ADM 221 Managerial Accounting**

Fall. 3 credits. Prerequisites: H ADM 121 and 174, or equivalents. Required. Faculty.

Focuses on the use of accounting information for management decision making and control. Topics include product costing, management control systems and performance measurement. There will be one common exam at the end of the semester.

**H ADM 222 Finance**

Spring. 3 credits. Prerequisite: H ADM 121, 221, or equivalents. Required. S. Carvell. Provides students with accounting cash flow information for financial planning, capital structure decisions, capital budgeting evaluation, and short-term and long-term financial decision making. Topics include current asset management, short-term financing, capital budgeting, long-term financing, cost of capital, and problems in international finance.

**H ADM 321 Hospitality Financial Management**

Fall. 3 credits. Prerequisites: H ADM 121, 221, and 222, or permission of instructor. Required. S. Carvell, F. Kwansa. Integrates the areas of financial accounting, managerial accounting, and finance and applies the interpretive and analytical skills of each to hospitality-industry situations. Topics include uniform system of accounts, revenue and expense tracking and internal control, accounting systems, ratio and comparative analysis, cost-volume-profit analysis, pricing, operational budgeting, project capital budgeting, decision making, equity and debt financing structures, and operating agreement forms.

**H ADM 322 Principles of Investment Management**

Fall and spring. Limited to non-hotel students. Hotel students or those with a background in economics, quantitative analysis, and computers are advised to enroll in H ADM 424. Elective. Faculty. An introductory course covering institutional and analytical aspects of security analysis and investment portfolio management including valuation models and practical strategies for stocks, bonds, and mutual fund selection and trading. Computer-assisted analysis, including students' participation in an investment game, is discussed and applied in a realistic manner.

**H ADM 323 Hospitality Real-Estate Finance**

Spring. 3 credits. Limited to juniors and seniors. Prerequisite: H ADM 321 or equivalent. Elective. J. deRoos, D. Quan. Focuses on real estate financing for hospitality-oriented projects. Topics include methods of measuring rates of return; feasibility and appraisal processes; equity and debt financing vehicles to include joint ventures, limited partnerships, construction mortgages, participating, convertible, and seller-financed mortgages; forms of operating agreements to include management contracts, leases, and franchises; and trends in international hotel franchising. Presentations by hospitality industry real estate practitioners.

**H ADM 324 International Financial Management**

Fall and spring. 3 credits. Prerequisites: H ADM 121, 221, 222, or equivalents, and micro and macroeconomics. Elective. D. Ferguson. Focuses on the international aspects of financial management important to the hospitality industry with the intention of providing an understanding of and confidence in dealing with the economic issues faced by the multinational corporation. Areas covered are the international financial management environment, the management of foreign exchange risk, international asset management, and international sources of funds.

**H ADM 326 Corporate Finance**

Fall. 3 credits. Limited to juniors and seniors. Prerequisite: H ADM 321. Elective. S. Carvell. In-depth analysis of corporate financial management, including financing alternatives and capital structure decisions, cash management, capital budgeting decisions, risk analysis, and working capital management. Although applicable to all businesses, special attention is placed on issues important to the hospitality industry. Emphasizes analytical methods through case studies and an in-depth semester project.

**[H ADM 421 Internal Control in Hospitality Operations]**

Spring. 3 credits. Limited to 30 students. Prerequisite: H ADM 321, 722, or equivalents. Elective. Not offered spring 2001. N. Geller. Hotel and restaurant operations are analyzed from the perspective of preventing fraud and embezzlement. The design and distribution of production, accounting, information systems, and supervisory tasks are studied in a manner that will ensure effective internal control and verifiable audit trails. Case studies.]

**H ADM 422 Taxation and Management Decisions**

Fall. 3 credits. Limited to 50 juniors, seniors, and graduate students. Elective. A. Sciarabba. Introduction to tax advantages and disadvantages of various organizational structures, including corporations, partnerships, and subchapter "S" corporations; financial information reporting to tax authorities and shareholders and how they differ; use of depreciation methods to achieve tax reductions; syndication techniques; and the role tax laws play in promoting private investments and development.

**H ADM 423 Financial Management Policy**

Spring. 3 credits. Limited to 30 students; non-hotel students by permission of instructor. Prerequisite: H ADM 326 or 721. Elective. S. Carvell. Covers numerous policy issues in financial management. Each of these issues will affect the potential profitability and survivability of the firm under conditions of uncertainty. The course will concentrate on nine major policy issues including capital structure, dividend policy, lease vs. buy analysis, and working capital financing.

**H ADM 424 Security Analysis and Portfolio Management**

Fall. 3 credits. Limited to juniors, seniors, and graduate students. Prerequisites: macro and micro economics, introductory course in statistics and/or quantitative analysis, and knowledge of computers beyond word processing. Elective. Faculty. An in-depth analysis of financial instruments, investments and portfolio management including fixed income, equity securities, advanced valuation models, risk-return analysis, screening techniques, asset allocation, and active portfolio management and trading. Recent developments in investments research are covered, and large financial databases are used for practical applications of the concepts and techniques presented.

**H ADM 525 Securities and Structured Financial Products**

Fall. 3 credits. Limited to seniors and graduate students. Prerequisites: H ADM 222 or 721 and 424, or by permission. Elective. D. Quan. Deals with the structure and analysis of securitized financial products with an emphasis on residential and commercial mortgage-backed securities (MBS). Intended for those who wish to acquire a working knowledge in the analysis of such securities (such as collateralized securities) and a deep understanding of the securitization process. Necessitates a highly analytic and quantitative approach. Students are required to have a strong background in finance and economics.

**H ADM 621 Hospitality Real Estate Finance**

Spring. 3 credits. Limited to graduate students. Prerequisite: H ADM 722 or equivalent. Elective. J. deRoos. For description, see H ADM 323. This graduate course includes the H ADM 323 lectures plus an hour-long discussion session each week which features guest speakers from industry, faculty from other colleges, and case studies.

**H ADM 622 Capital Investment Analysis**

Spring. 3 credits. Prerequisite(s): a course in principles of corporate finance (for graduate students, HA 721 or its equivalent; for undergraduate students, HA 222 and permission). Elective. S. Carvell. This course is about how financial managers must make capital investment decisions in order to maximize shareholder wealth. This requires an in-depth understanding of both the investing and financing decision-making process. To understand the former, students learn about the capital budgeting process and acquire specific skills enabling them to evaluate capital projects; e.g., net present value, discounted cash flow and risk analysis. For the latter, students learn how equity and debt securities are priced in a dynamic capital market and how the firm's capital cost and structure are linked with shareholder wealth maximization. Cases are used to illustrate theory and industry guest speakers conduct occasional seminars.

**H ADM 624 Reporting and Analysis for Financial Statements**

Spring. 3 credits. Limited to 30 seniors and graduate students. Elective. P. Sinha. Covers the financial accounting issues that are encountered in reporting the operations of corporate enterprises. Emphasis is on the components of financial statements, how and why they are reported, and their impact on the overall financial position of the firm and its acceptance in capital markets. Emphasis is on outsiders' views of the company and their decision making through interpretation of financial statements.

**H ADM 721 Financial Economics**

Fall. 3 credits. Professional master's requirement. L. Canina. Integrates corporate finance with the framework of value maximization and the competitive analysis of product and factor markets in the hospitality industry. Topics include short-term asset management, strategic valuation, capital budgeting analysis, capital structure decisions, leasing, and international financial management.

**H ADM 722 Hospitality Financial Management**

Spring. 3 credits. Professional master's requirement. G. Potter.

Covers both managerial accounting and financial management as they are practiced in the hospitality industry. Topics include hospitality accounting systems and internal control, financial statement analysis and interpretation, operational analysis, cost behavior, budgeting and forecasting, pricing, and feasibility analysis.

**FOOD AND BEVERAGE MANAGEMENT****H ADM 136 Introduction to Food Service Operations**

Fall and spring. 4 credits. Limited to hotel students. Required. G. Norkus, A. Susskind.

An introduction to the principles of food and beverage management, beginning with an overview of the food service industry at large. Attention is focused on major industry segments, business practices, and trends. Detailed consideration is given to the components of the food service system: marketing, menu planning, logistical support, production, service, controls, and quality assurance. Product and systems differentiation in various industry segments is emphasized.

**H ADM 230 Introduction to Culinary Arts**

Fall and spring. 2 credits. Limited to non-hotel students. Priority given to seniors and graduate students. S-U grades only. Attendance at first class is mandatory. Absolute drop deadline for fall is September 10; spring drop deadline is January 30. Elective. There will be a course fee of \$60 which includes the cost of a uniform and uniform cleaning. D. D'Aprix, S. Gould, T. O'Connor, R. White.

Studies of food groups, their respective methods of preparation, cooking, presentation, and holding. Designed for non-hotel students who are interested in learning the professional approach to food preparation and service with hands-on practice. Food product identification, preparation and service methods, and professional language of food and cooking.

**H ADM 236 Culinary Theory and Practice**

Fall and spring. 4 credits. Prerequisite: H ADM 136. Attendance at first class is mandatory. Required. T. O'Connor, R. Spies, R. White.

Designed to introduce the student to food and beverage operations through three major components: fundamental food composition and properties, food products and preparation, and food safety and sanitation. Students will prepare recipes, menus, and production schedules and will develop the ability to recognize properly prepared foods by preparing, tasting, and evaluating foods. They also will develop an awareness of potential production problems and how to troubleshoot them.

**H ADM 331 Creating Distributor Partnerships**

Spring. 3 credits. Limited to 20 juniors, seniors, and graduate students; others by permission of instructor. Elective. E. Merberg.

Beginning with a historical overview, the student gains an appreciation for the role the

food service distributor plays in the movement of food from the farm to the operator. Emphasis on the complexity of the distributors' operations in today's high tech world. Students prepare and negotiate sole source supply agreements with the nation's largest food distributors. Exposure to the various disciplines and employment opportunities in food service distribution. Guest speakers, distributor visits.

**H ADM 332 Reviewing the Restaurant: The Consumer's View of the Dining Experience**

Fall. 3 credits. Field trip \$325. Limited to 20 students with written permission.

Prerequisites: H ADM 165 and 335, or permission of the instructor. Elective.

N. Dahl, G. Pezzotti.

Trains the student to perform a comprehensive analysis of the restaurant dining experience. The role of the restaurant critic/reviewer will be discussed in depth. The student will examine and enhance his or her critical writing skills, as the course will require each student to complete approximately ten restaurant reviews.

**H ADM 333 Current Issues in Food Safety and Sanitation**

Spring. Variable to 3 credits. Three-credit registration limited to 12 students. Elective. Faculty.

A study of current issues in food safety and sanitation procedures and regulations that affect managerial decisions in food service and hospitality operations. Topics include risk assessment and hazard analysis; legal responsibilities related to food, food handlers, equipment and facilities; food-borne illness and other public-health concerns; and certification and training. Preparation for NIFI/NRA certification and the Food Protection (ETS) certification exam (optional) is offered.

**H ADM 334 Wine and Food Pairing Principles and Promotion**

Spring. 2 credits. Limited to 20 juniors, seniors and graduate students. Prerequisite: H ADM 430 or permission of instructor. Elective. G. Pezzotti.

Focuses on the pairing and marketing of wine and food. Students develop an understanding of regional and varietal wine styles; how foods' flavors can change a wine's flavor, and the promotion of wine and food. Topics include wine and food pairing principles, cuisines and their flavor components, food trends in restaurants and in the home, special event planning, and wine list development. Students design and present wine and food tastings to industry guests.

**H ADM 335 Restaurant Management**

Fall and spring. 4 credits. Limited to 30 hotel school students per lab; others by permission of instructor. Prerequisites: H ADM 136 and 236. Approximate cost of utensils and manual, \$85. Once enrolled, students may not drop the course without permission of instructor. Required. D. D'Aprix, Y. Kerr-Donovan, B. Lang, M. McCarthy, J. Ridley.

A restaurant-management course in which each student participates as a manager of a full-service restaurant operation. Topics include operational issues, customer satisfaction, restaurant trends and challenges defining a service philosophy, and management development. The laboratory is based on a hands-on managerial component, including the development of a business plan and post-

analysis of the operation. Students become familiar with all aspects of a restaurant operation.

**H ADM 338 Seminar in Culture and Cuisine**

Fall. 3 credits. Limited to 20 students. Prerequisites: H ADM 165 and 236 (or 230), or permission of instructor. Elective. R. Spies.

Explores various cuisines in terms of history, lifestyle, and foods peculiar to a culture. Through readings, research, and meal preparation, students explore various cuisines in depth. The goal of the course is to develop an awareness of several international cuisines, enabling students to make comparisons among the foodways of different cultures. Students prepare research reports and oral presentations, and design menus and orchestrate their preparation.

**H ADM 339 Wine in Culture and History**

Fall and spring. 2 credits. Limited to 200 students. Fall regions: Germany, Italy, and Champagne. Spring regions: Bordeaux, Burgandy, and California. Elective. A. Nash.

Designed to provide students with a cultural and historical perspective on wine and its place in society. Topics include history, people, culture, production of wine in specific wine-producing regions of the world, wine and health issues, wine and food pairing, cooking with wine, and retail wine buying strategies. Regions covered will change each semester so students may take the course more than once.

**H ADM 430 Introduction to Wines**

Fall and spring. 2 credits. Wine glass kit and course fee, \$25.00. Limited to hotel school juniors, seniors, and graduate students, and seniors and graduate students in all other colleges. **Hotel students encouraged to enroll in the fall.** All students, except those in the hotel school, must be 21 years old by the first day of university classes (August 24, 2000 and January 22, 2001). S-U grades only. Elective. S. Mutkoski, A. Nash.

An introduction to the major wine-producing regions of the world and what the consumer needs to know to purchase wines, spirits, and beers at retail outlets and in a restaurant setting. Topics include flavor components in wine, pairing wine and food, responsible drinking, selecting quality and value wines, and wine etiquette. Samples from a variety of countries, regions, and vineyards are evaluated.

(Preregistered students who do not attend the first class and fail to notify the course secretary in 274 Statler of their absence before the first class are automatically dropped from the course. The student must then follow the normal drop procedure in his or her school. **Because of the high demand for this course and because a product is consumed, the absolute drop deadline for all students is September 8 in the fall and February 2, 2001 in the spring.)**

**H ADM 431 Seminar in Independent Restaurant Operations Management**

Fall and spring. 3 credits. Five field trips, \$325. Limited to 20 students, with written permission of instructor. Elective. G. Pezzotti.

Designed for students who have a strong interest in food and beverage operations and who may be considering a career as an

entrepreneur. Students visit and analyze various independently owned restaurant operations. Analysis covers the restaurant's concept (market), organization, ownership, management, physical structure, staff, front- and back-of-the-house operations, and fiscal integrity. Readings relevant to current topics in the restaurant industry are required. Classes alternate weekly between field trips and seminar/case presentations.

#### **H ADM 432 Contemporary Healthy Foods**

Fall. 3 credits. Field trip, \$50. Limited to 20 seniors and graduate students, or by permission of instructor. Prerequisite: H ADM 335 or equivalent. Elective. M. Tabacchi.

Builds a greater awareness and understanding among nutrition and food service professionals of the origins and manifestations of today's health-conscious and educated food service patron. Topics include the marriage of nutrition and the cuisine demanded by today's consumer, fresh produce, lean meats, and lack of fabricated diet foods. Menu design includes creativity and nutrient density of foods. Major emphasis is on preparation, marketing, merchandising, and selling of healthy menus in Statler's outlets.

#### **H ADM 433 Contract Services Management**

Fall. 3 credits. Field trips, \$25-50. Limited to 25 juniors, seniors, and graduate students. Prerequisites: H ADM 136 and 236. Elective. D. Reynolds.

Operations in business and industry, healthcare, and education, as well as other on-site segments, represent more than one-fourth of total restaurant industry revenues.

Addresses the major differences between on-site food service management and traditional restaurant management with particular focus on organizational structure, competitive challenges, revenue enhancement/cost containment, labor issues, systems design, and branding. Readings, discussions with industry leaders, cases, site visits, and an integrated research project.

#### **H ADM 434 Desserts Merchandising**

Spring. 3 credits. Limited to 25 students. Prerequisite: H ADM 230, 236, or permission of the instructor. Elective. Faculty.

A hands-on course providing exposure to a variety of breads, pastries, cakes, and other desserts. Students develop large-scale production skills, become familiar with bakery utensils, and advertise and sell their products.

#### **H ADM 435 Selection, Procurement, and Supply Management**

Fall. 3 credits. Limited to 20 students. Prerequisites: H ADM 136 and 236, or 731. Elective. R. Spies.

Expands upon the concepts of purchasing and supply management that were developed in H ADM 136 and 731. Designed to expose the student to two specific areas: the management of the procurement system and the major commodity groups that are germane to the operation of a hotel or foodservice operation. Lectures include discussions on the comparison of the purchasing function in the hospitality industry to other industries, distribution systems, legal and ethical implications in buyer-seller relationships, procurement options, buying strategy development, price protection programs, and other contemporary issues. Students work

with the major entree food groups: meats, seafood, and poultry, with emphasis placed on identification, quality and condition, market form, yield tests, and cost analyses.

#### **H ADM 436 Beverage Management**

Fall and spring. 2 credits. Limited to 25 hotel school juniors, seniors, and graduate students. Prerequisite: H ADM 430 (co-registration is not allowed). Elective.

S. Mutkoski, A. Nash.

Designed for students who intend to pursue food and beverage as a career. Deals specifically with the management of beverage operations. Lectures develop skills in and awareness of dram shop liability; staff training and responsible customer service; beverage pricing; food and wine pairings; wine list development; purchasing, storage, and service; wine regions; cost controls and loss prevention; and creative beverage merchandising. Guest lecturers.

#### **H ADM 437 Specialty Food and Beverage Operations: Guest Chefs**

Spring. 3 credits. Limited to 20 juniors, seniors, and graduate students. Prerequisite: H ADM 335 or 731. Elective.

G. Pezzotti.

Designed for students with a strong food and beverage orientation, especially students considering careers in the hotel food and beverage environment, or those who anticipate interacting with current culinary trends. Working in groups, students market, organize, plan, produce, serve, and prepare the financial analysis and accounting relative to four guest chef specialty production nights for the Cornell community, utilizing the Statler Hotel facility. Final project.

#### **H ADM 438 Catering Management**

Spring. 2 credits. Field trip, \$180. Limited to 25 students. Prerequisite: H ADM 236 or permission of instructor. Elective.

R. Spies.

Examines on- and off-premise catering for business and social functions, as well as sports events and office catering. Topics include the organizational structure of catering operations; legal aspects of catering businesses; menu design for special functions and its operational implications; marketing from a caterer's perspective; function planning and management; staff recruitment, training, and supervision; and post-event analysis. Site visits and analyses of actual catering operations.

#### **H ADM 530 Anheuser Busch Seminar in Quality Brewing and Fine Beer**

Fall. 1 credit. First 7 weeks of the semester.

Prerequisite: H ADM 430. Elective.

G. Pezzotti.

Designed for upper-level students who intend to pursue food and beverage careers. Serves to advance one's knowledge about beers in terms of managing such products in a restaurant setting or other food service outlet. Topics include the brewing process, sensory aspects of beer, international beer types and styles, marketing malt products, purchasing and distribution, storage and service, beer and food pairings, staff training and education, cost controls, and third party liability issues. Local field trip, no cost.

#### **H ADM 538 Health and Fitness in the Resort Hotel and Spa Industry**

Fall. 3 credits. Limited to seniors and graduate students. Two field trips, \$75-100. Prerequisite: previous courses in food and beverage management and marketing. Elective. M. Tabacchi.

Emphasizes the management aspects of spas, health clubs, and spa resorts. Topics include feasibility of success and marketing research necessary to establish new spas, design of menus, mental and physical fitness programs, stress management, spa medical treatments, complementary medical treatments, and other spa programs. Other topics include required personnel, safety, legal and ethical issues, and integration of nutritious menu items and their marketing and merchandising. Guest speakers.

#### **H ADM 539 Airline Service Foodservice and In-flight Management**

Spring. 3 credits. Preference given to seniors and graduate students. Field trip, \$75-100. Prerequisites/Corequisites:

H ADM 136, 236, or permission of the instructor. Elective. M. Tabacchi.

Focuses on the challenge of preparing and distributing 20,000-30,000 meals per day to 20-30 different airline carriers and rethermalizing, serving, and clearing those meals at 30,000 feet in confined space and short periods of time. Examines strategies, planning, and forecasting by airline, airline catering, and sales executives, as well as the effect of the economy and the airline's competition upon the type of meals served.

#### **H ADM 631 Case Studies in Multi-unit Restaurant Management**

Spring. 3 credits. Limited to 20 graduate students, seniors by permission. Elective. Faculty.

Case studies of multi-unit restaurant organizations will focus on topics such as: new venture planning, rapid growth and organizational change, market identification, service delivery and design, consumer demand, corporate culture, production planning and operations management, strategic planning and implementation, tactics and market responses, international expansion, breakpoints and breakthrough thinking. Each class period will be spent in student-organized discourse and exchange based upon their assigned written case analysis. Grading will be on individual case presentations, class participation and written case assignments.

#### **H ADM 633 Food Service Operations Management**

Spring. 3 credits. Limited to 20 graduate students, others by permission. Elective.

A. Susskind.

Applies fundamental concepts of marketing, financial analysis, food service production and management, and human resource principles that were addressed in previous courses. Combines theory and practice in all levels of a food service operation: basic knowledge, technical skills, and analytical skills. Manages by planning, implementing, critiquing, and analyzing a food service operation. Designs and implements a training program for an opening staff and employees who will be rotating through different positions. Develops budgets, both projected and actual, for different food service operations. Employs a feasibility model for a particular food service concept and operation.

#### **H ADM 731 Graduate Food and Beverage Management**

Spring. 3 credits. Professional master's requirement. T. Kelly, A. Susskind.

Focuses on the technical, managerial, and human resource skills needed to be successful in food service management. Topics include market analysis, concept development, menu planning, operations management, marketing,

and current and future issues affecting the food service industry.

## MARKETING AND TOURISM

### H ADM 243 Marketing Management for the Hospitality Industry

Fall and spring. 3 credits. Limited to 80 hotel students per lecture, not open to freshmen. Required. J. Siguaw.

Helps students acquire the knowledge and skills necessary to get and keep profitable customers in today's competitive business environment. Topics are product quality, branding, pricing, personal selling, advertising, sales promotions, market segmentation, target marketing, product positioning, and marketing research. Class exercises, assignments, and essay exams.

### H ADM 343 Marketing Research

Fall and spring. 3 credits. Limited to 32 students. Prerequisites: Introductory principles of marketing or marketing management and an introductory course in quantitative methods for management. Elective. J. Austin.

Introduces students to the basic techniques and practices used to collect, analyze, and disseminate data for decision making in hospitality marketing. The goal is to help future managers develop a level of research competency that will enable them to interact intelligently with marketing research providers when requesting information, assessing proposed research projects, as well as evaluating and using information from completed research.

### H ADM 344 Tourism I

Fall and spring. 3 credits. Not open to freshmen. Elective. M. Noden.

An introductory course in the study of tourism. The origins and evolution of contemporary tourism are examined. Students are familiarized with the various supply components of the tourism industrial base and their integration on an international scale. The effects of mass-volume tourist demand on destination development are explored through the use of selected limited case studies. Guest lectures highlight the economic operations and effects of tourism in both the public and private sectors.

### H ADM 345 Hospitality Sales

Spring. 3 credits. Limited to 24 students. Prerequisite: H ADM 243, 741, or equivalent. Elective. J. Siguaw.

An in-depth study of the promotional tool of personal selling, with an emphasis on identifying and meeting the needs of the customer. Course material encourages the use of intuition, judgment, logic, problem-solving methodology, and other tools as part of an overall sales mix. Class sessions involve lectures, role playing, videos, presentations, and guest lectures.

### H ADM 347 Consumer Behavior

Fall and spring. 3 credits. Limited to 45 juniors and seniors. Prerequisite: an introductory principles of marketing or marketing management course. Elective. M. Lynn.

Helps students become better at understanding, predicting, and influencing consumer behavior. Topics are motivation, perception, learning, decision making, persuasion, compliance, geo-demographics, and psycho-

graphics. Applications of the material to hospitality marketing issues such as guest frequency programs, menu design, advertising, personal selling, and promotion strategy will be stressed through class exercises, a term paper, and essay exams.

### H ADM 442 Strategic Marketing

Fall. 3 credits. Limited to seniors. Prerequisite: a previous marketing course. Elective. C. Dev.

Offers theoretical and practical approaches addressing strategic marketing challenges in hospitality and service firms. Strategic marketing concepts and principles will be learned through lectures, discussion, case studies, and development of a strategic marketing report.

### H ADM 444 Tourism II

Spring. 3 credits. Limited to juniors, seniors, and graduate students. Prerequisites: H ADM 243, 244, or equivalents, or written permission of instructor. Elective. M. Noden.

An advanced course in the study of tourism. Emphasis is placed on the development of the tourism industrial base and development and financing of superstructure and infrastructure. Students are expected to engage in a wide range of discussions and analysis of the effects of tourism on various environments in social and economic terms. Case studies, occasional guest lectures.

### H ADM 445 Services Marketing

Fall. 3 credits. Limited to 40 students. Prerequisite: a previous marketing course or permission of instructor. Elective. L. Renaghan.

Students preparing for management positions will develop an understanding of services marketing principles applicable to the hospitality industry. Topics include marketing strategies of service firms, new marketing approaches, and the reformulation of traditional marketing principles from consumers and industrial goods marketing. Case studies, guest speakers.

### H ADM 446 Marketing Planning for Hotels

Spring. 3 credits. Prerequisites: H ADM 243, 741, or equivalent. Elective. L. Renaghan.

Students learn about the key variables in property-level management and their proper application in developing a marketing plan, e.g., marketing intelligence, demand analysis, supply and competitor analysis, segment analysis, resource allocation, sales strategies, and measurement of results. Test material, cases, relevant articles, lectures, and key speakers. Upon completion of the course, the student should be able to design, develop, and implement a comprehensive, targeted, and action-oriented marketing plan for a lodging property.

### H ADM 447 Channels of Distribution in Tourism

Spring. 3 credits. Prerequisite: H ADM 243. Elective. M. Noden.

Examines the major elements of the structure, arrangement, management, and control of the channels of distribution in the tourism industries. Topics include emerging trends in electronic distribution, organizational structures of distributive consortia, and their effectiveness in service distribution. Significant readings, guest lectures.

### H ADM 448 Marketing Communications

Spring. 3 credits. Prerequisite: a previous marketing course. Elective. C. Dev.

Provides students with a managerial understanding of the effective use of a variety of marketing communication media, including advertising, sales promotion, public relations, etc. Hospitality industry emphasized.

### H ADM 449 International Marketing

Fall and spring. 3 credits. Limited to 25 students. Prerequisites: Micro and macroeconomics. Elective. Not offered fall 2000. Faculty.

Develops understanding of international marketing with emphasis on hospitality-industry applications. Focuses on the similarities and differences that exist between domestic and international marketing and the conduct of international marketing in various segments of the world.

### H ADM 641 Marketing Decision Models for Service Firms

Fall. 3 credits. Limited to 20 seniors and graduate students. Prerequisite: a principles of marketing or marketing management course and an introductory course in quantitative methods for management. Elective. J. Austin.

Introduces students to advanced data analysis and modelling methods used for decision making in hospitality marketing.

### H ADM 642 Strategic Marketing

Fall. 3 credits. Limited to graduate students. Prerequisite: a previous marketing course and permission of instructor. Elective. C. Dev.

Offers theoretical and practical approaches to addressing strategic marketing challenges in hospitality and service firms. Strategic marketing concepts and principles will be learned through lectures, discussion, and development of a strategic marketing report.

### H ADM 643 Marketing Research

Spring. 3 credits. Limited to 20 graduate students. Prerequisites: introductory principles of marketing or marketing management and an introductory course in quantitative methods for management. Elective. J. Austin.

Introduces students to the basic techniques and practices used to collect and analyze data for decision making in hospitality marketing. The goal is to help future managers develop a level of research competency that will enable them to interact intelligently with marketing research providers when requesting information, assessing proposed research projects, as well as evaluating and using information from completed research.

### H ADM 644 Food and Beverage Marketing Strategy

Spring. 3 credits. Limited to graduate students, seniors by permission. Prerequisite: prior 3-credit marketing course. Elective. T. Kelly.

Focuses on how to apply marketing, sales, and merchandising techniques to the commercial food and beverage industry. Addresses developing a market segmentation based on understanding the needs and wants of potential target markets, translating needs and wants into a viable food service concept positioning strategy, and marketing strategies used to maintain and increase sales and market share. Recitation and analysis involves substantial use of the Consumer Report on Eating Share Trends (CREST) database.

**H ADM 645 Services Marketing**

Spring. 3 credits. Limited to graduate students. Prerequisite: previous marketing course, or permission of instructor. Elective. L. Renaghan.

Helps students preparing for ownership or management positions develop an understanding of services marketing principles applicable across the entire service sector. Marketing strategies of service firms from various service industries will be evaluated. New marketing approaches uniquely applicable to services are considered as well as the reformulation of traditional marketing principles from consumers and industrial goods marketing. Case studies, guest speakers.

**[H ADM 646 Marketing Planning for Hotels**

Fall. 3 credits. Limited to graduate students. Prerequisite: H ADM 243, 741, or equivalent. Elective. Not offered fall 2000. Faculty.

For description, see 446. This course includes the H ADM 446 lectures plus a theoretical paper.]

**H ADM 647 Consumer Behavior**

Fall and spring. 3 credits. Limited to 25 graduate students. Prerequisite: introductory marketing principles or marketing management course. Elective. M. Lynn.

For description, see H ADM 347.

**H ADM 741 Marketing Management**

Spring. 3 credits. Professional master's requirement. C. Dev.

Deals with the management of the marketing function in hospitality enterprises. Primary objectives are to introduce students to the basic concepts and principles underlying marketing decision making and to provide the skills needed to analyze and understand complex marketing situations in order to plan and implement marketing programs.

## PROPERTY ASSET MANAGEMENT

**H ADM 255 Hotel Development and Planning**

Spring. 3 credits. Limited to 20 sophomores, juniors, and seniors per section. Required. R. Penner, S. Robson.

An introduction and management overview of the problems and opportunities inherent in the development and planning of hospitality facilities. Topics include the project development sequence; conceptual and space planning; architectural design criteria, construction management; and the interpretation of architectural design and consultant drawings. Emphasis is on setting appropriate facilities requirements, understanding industry practice, and implementing properties decisions within a balanced design, operations, and financial framework.

**H ADM 350 Real Estate Management**

Fall. 2 credits. First 7 weeks of the semester. Elective. J. deRoos.

Introductory course designed for students interested in learning the principles of property management for residential and commercial real estate. Lectures will provide an overview of the different aspects of property management such as leases and management contracts (including landlord/tenant issues), accounting and finance, staffing, and building operations. Case studies.

**H ADM 351 Hospitality Facilities Design**

Fall. 4 credits. Prerequisite: H ADM 255 or 751 or permission of instructor. Elective. R. Penner, S. Robson.

A lecture-studio course dealing with property development, planning, and design by focusing on the interpretation and analysis of hotel plans. Students learn basic graphic techniques and apply them to planning problems for hospitality facilities. Final project.

**H ADM 352 Hotel Planning and Interior Design**

Spring. 3 credits. Field trip, \$250; drawing supplies, \$100. Limited to 18 students. Prerequisite: H ADM 351 or permission of instructor. Elective. R. Penner.

A project course in which student teams develop operational criteria and a complete interior design presentation for a new hotel or major renovation. The early semester includes a number of short design exercises. A field trip to a northeastern city introduces students to the particular hotel and its requirements. During the rest of the term, the teams will re-plan the hotel public areas and guestrooms, develop conceptual designs, establish preliminary budgets, and assemble presentation boards to describe the design.

**H ADM 353 Food Service Facilities Design**

Spring. 3 credits. Limited to 24 students. Prerequisites: H ADM 335 and 351 (co-registration is allowed) or food service experience or permission of instructor. Elective. S. Robson.

An introduction to the basic concepts of food service facilities design and planning. Students will determine space allocations for kitchens and their support areas; develop basic production work flow in the preparation and service areas; and select equipment utilizing standards for production capability, quality of construction, and ease of maintenance. Students will use studio time for planning, designing, and writing specifications for a medium-size restaurant kitchen.

**H ADM 354 Computer-Aided Design**

Fall and spring. 2 credits. Limited to 18 students per lecture. Prerequisite: H ADM 351 or equivalent studio experience. Attendance at first class is mandatory. Elective. S. Curtis.

The operation of microcomputer-based computer-aided design (CAD) systems. Using AutoCAD on the IBM PC, the course presents an organized and logical sequence of commands, mode settings, drawing aids, and other characteristics of CAD. Students will learn the program in the school's computer center and will develop a complete graphic presentation. Emphasis is on the use and operation of CAD systems in a commercial document production environment.

**H ADM 355 Hospitality Facilities Operations**

Fall. 3 credits. Limited to 20 students per section. Prerequisite: H ADM 255. Required. M. Redlin.

An overview of the operation of hospitality facilities, including operating costs for various types of facilities, types and characteristics of major building systems, and the responsibilities of the engineering-maintenance departments. The renovation needs of hospitality facilities are examined and key managerial aspects of renovations considered.

**H ADM 356 Hospitality Risk Management**

Spring. 3 credits. Limited to sophomores, juniors, seniors, and graduate students. Elective. D. Stipanuk.

A comprehensive look at risk management within the hospitality industry. Addresses issues of loss control for hospitality firms. Using a risk management conceptual framework, issues in fire protection, customer and workplace safety, OSHA, and customer and corporate security are analyzed.

**H ADM 357 Insurance and Risk Management**

Fall and spring. 3 credits. Prerequisite: an introductory accounting or business course. Elective. G. Shankar.

A comprehensive look at risk management within a general business or institutional environment. Reviews insurance and non-insurance solutions to controlling loss, the general legal environment within which risk management processes work, and the integration of crisis management into the overall corporate risk management plan.

**H ADM 450 Principles of Real Estate**

Fall. 3 credits. Limited to juniors and seniors. Elective. Faculty.

Approaches real estate from four perspectives: legal, economic, financial, and business. Understanding these perspectives will enable students to make better investment and financing decisions, to use real estate resources wisely, to understand public-policy issues, and to be prepared for additional courses in real estate investment, finance, and development.

**H ADM 452 Sustainable Development and the Global Hospitality Industry**

Fall. 3 credits. Limited to juniors, seniors, and graduate students. Elective. D. Stipanuk.

A multidimensional course integrating the global sustainability and environmental movements, their impact on the hospitality industry, and responses to and opportunities associated with the sustainability movement. The course draws upon work in a number of disciplines for the ideas and concepts discussed. Readings will be drawn from the environmental, sustainability, and hospitality literature. Students should be prepared to encounter conflicting views in the readings and in classroom discussions. The course attempts to portray a variety of viewpoints regarding issues of contemporary interest to society and the business community. Discussion of these issues is a key component of the course.

**H ADM 454 Advanced Computer Aided Design**

Spring. 3 credits. Limited to 18 students. Prerequisite: H ADM 354 or equivalent introductory AutoCAD course. Elective. S. Curtis.

Computer aided design has grown beyond its traditional use as a tool to draw contract documents. This course will give students an understanding of the more advanced capabilities of AutoCAD, including raster image support, OLE, 3-D surface and solid modeling, and photorealistic rendering. The availability and capabilities of "third party" plug-ins to AutoCAD will also be explored. There will be weekly projects as well as a final project.

**H ADM 456 Hospitality Facilities Management**

Spring. 3 credits. Prerequisite: H ADM 355, 751, or permission of the instructor. Elective. D. Stipanuk.

A managerial approach to hospitality facilities addressing issues of owning and operating, cost management, facilities services and delivery systems management, governmental regulatory compliance, and emerging issues. Emphasis on environmental issues such as indoor air quality, waste management, and energy conservation. Extensive use of the web.

**H ADM 457 Advanced Development and Construction**

Fall. 3 credits. Overnight field trip, \$175. Limited to juniors with permission, seniors and graduate students. Elective. D. Stipanuk.

Focuses on the management structure and systems, laws, regulations, and industry practices that most influence the successful development of commercial and residential real estate, including lodging and eating facilities. Topics include scheduling, budgeting, managing other professionals, and analysis of alternative materials and methods. Guest speakers, case studies, and group project.

**H ADM 458 Hospitality Real Estate**

Spring. 3 credits. Limited to 40 seniors or graduate students. Prerequisites: H ADM 323, 450, or permission of instructor. Elective. Faculty.

Expands the student's understanding of the role of real estate in individual hospitality businesses and corporations. Designed for those who plan careers in the hospitality industry. Specific objectives are to develop an appreciation of real estate as a factor in the production of income for hospitality businesses; to develop an appreciation of real estate as an asset that can be managed, sold, and otherwise used to increase the wealth of hospitality corporation shareholders; and to understand the importance of valuing real estate, and the approaches to valuation and contemporary hospitality valuation issues.

**H ADM 459 International Hospitality Development**

Spring. 3 credits. Limited to 30 seniors and graduate students. Elective. J. Clark.

A seminar course covering the strategic development of international hospitality projects. Topics will include corporate expansion strategies; the international development process; viewpoints of public and private stakeholders; and such development challenges as technology, infrastructure, environmental concerns, and public policy issues. Senior corporate guest lecturers will present and discuss new projects in such locations as Hawaii, Mexico, western and eastern Europe, Southeast Asia, and Latin America and contrast these opportunities with development in the United States.

**H ADM 550 Principles of Timeshare Development and Operations**

Fall. 2 credits. Second 7 weeks of the semester. Elective. J. deRoos.

Provides an intense introduction to the rapidly growing timeshare and vacation ownership industry. Students will learn who the four major business disciplines of financial management, real estate development, marketing and sales, and resort operations are specifically applied to the industry. Guest speakers, course project, and case studies.

**H ADM 651 Principles of Real Estate**

Fall. 3 credits. Limited to graduate students. Elective. Faculty.

This survey course approaches real estate from four perspectives: investment, market, mortgage finance, and legal. Understanding these perspectives will enable students to make better investment and financing decisions, to use real estate resources wisely, to understand public policy issues, and to be prepared for additional courses in real estate investment, finance, and development. This course includes much of the material in H ADM 450 plus special topic sessions that feature guest speakers from the industry, faculty from other colleges, and case studies.

**H ADM 658 Advanced Real Estate**

Spring. 3 credits. Limited to 40 graduate students. Prerequisites: H ADM 323, 450, 621 or 651. Elective. D. Quan.

Promotes sound real estate investment and finance decision making through the use of advanced theory and techniques in financial economics. Real estate investment decisions are made through applications of the after-tax discounted cash flow model which incorporates prevailing domestic and international economic conditions in real estate markets, tax rules, and government regulations. Financing decisions are made using the techniques of modern financial analysis. A wide array of financing options is considered including convertible, participating, and accrual mortgages. All types of residential and nonresidential real estate are analyzed, including hospitality properties.

**H ADM 751 Properties Development and Planning**

Spring. 3 credits. Professional master's requirement. J. deRoos, M. Redlin.

Provides an overview of project development, hotel planning, and the construction process, including the role of the development team, feasibility, functional planning and design, interpretation of architectural drawings, architectural and engineering criteria, construction management, contracts, and scheduling. Student teams will prepare the program documentation for a new hotel or one undergoing major rehabilitation in conjunction with other professional master's core courses.

COMMUNICATION COURSES

**H ADM 165 Managerial Communication I**

Fall and spring. 3 credits. Each lecture limited to 16 students. Note: Students required to take this course generally may not delay it. If extenuating circumstances exist, student must petition to drop the course by the end of the first week of classes. This course must be taken within the first two semesters, including any ITD semesters. Add/drop and section changes must be approved by the chairperson. Required. D. Jameson, S. Jones, Y. Kim, C. Snow, R. Steinacher.

An introduction to the role and importance of effective communication in managerial work, especially in the hospitality industry. Development of abilities in analytical thinking and clear written expression. The process of planning, preparing, and executing professional communications with an emphasis on written documents. Students write a series of business documents and give several oral presentations.

**H ADM 266 Intermediate French: Le Francais de l'Hotellerie et du Tourisme**

Spring. 3 credits. Limited to 15 students. Prerequisite: French 123 or permission of instructor. Elective. A. Grandjean-Levy.

Offers continuing study of the French language with specific emphasis on the hospitality industry. Material presented considers cultural, geographic, economic, historical, political, and social contexts within which the business functions. The course is conducted in French, emphasizing a conversational approach. Specialized situations and vocabulary are used in building general competence in practical usage. Students with special interest in the hospitality industry will be given priority for admission.

**H ADM 364 Advanced Business Writing**

Fall and spring. 3 credits. Limited to juniors, seniors, or graduate students, or written permission of instructor. Prerequisite for undergraduates: H ADM 165 (for hotel school students) or completion of student's freshman writing requirement. Elective. S. Bryson, Y. Kim, R. Steinacher.

Focuses on communicating challenging messages in business contexts. Writing assignments will emphasize delivering persuasive messages, working with tone and style, and developing different types of documents in professional contexts. Assignments include business letters and memos written for various contexts, procedures and policy statements, promotional materials, negative messages, and analytical reports requiring research.

**H ADM 365 Managerial Communication II**

Fall and spring. 3 credits. Limited to 22 juniors and seniors per lecture. Note: Students required to take this course generally may not drop it; however, students may be allowed to drop before the first class meets if the area has a wait list and the vacancy can be filled. Students may drop between the first and second class if they (1) check first with the course chair, and (2) can find a replacement for their place in the course. Students may not drop after the second class unless they petition and present a case of extenuating circumstances. It is expected these cases would be rare. Prerequisites: Hotel undergraduates must have completed H ADM 165 and H ADM 115. Required. N. Dahl, Y. Kim, E. Roberts, C. Snow, B. Stevens.

A broad study of communication in a management context. Emphasizes the significant role of communication in developing work relationships that enable managers to achieve their goals. It presents the theories and principles of communication that underlie effective performance. Students increase their individual communication abilities by applying these concepts in a variety of managerial contexts, including interacting one-to-one, working in groups, and formally developing and presenting ideas to larger audiences.

**H ADM 462 Communication and the Multicultural Organization**

Fall and spring. 3 credits. Elective. E. Roberts.

Influence of culture, perception, and gender on communication in multicultural organizations, including international and domestic businesses with diverse work forces. Focus is

on human interaction at work. Special emphasis on the hospitality industry. Topics include values and beliefs, how race and gender affect language use, cultural differences in nonverbal communication, ethnocentrism and stereotyping, intercultural sensitivity and adjustment, cultural variables, persuasion, and ethics of communication in international business.

#### **H ADM 463 Persuasive Communication in Organizations**

Spring. 3 credits. Limited to 18 students.

Prerequisites: H ADM 165 and 365 for hotel undergraduates, or permission of instructor. Elective. Faculty.

Prepares students to communicate effectively in a variety of persuasive speaking contexts. Principles of persuasion will be thoroughly examined as they apply to managerial communication tasks. Emphasis on persuasive speaking; also relationship between written and oral communication. Studies the principles of persuasion, analyzes case studies in the hospitality industry, and applies persuasive strategies in simulated workplace settings.

#### **H ADM 661 Organizational Communication for Managers**

Spring. 3 credits. Elective. Faculty.

Provides an in-depth understanding of the theory and practice of organizational communication. Structured around the communication tasks managers must accomplish in order to be effective on the job: communicating to diverse audiences, resolving conflicts, making presentations, and influencing colleagues. Students read and discuss a series of articles to increase knowledge of organizational communication issues and expand their understanding of the political, sociological, and ethical dimensions of problems in organizational communication. Oral and written assignments, service project with a nonprofit organization in Tompkins County.

#### **H ADM 761 Communication Modules**

Fall and spring. Variable credits. Limited to MMH students. Elective. N. Dahl, D. Jameson, C. Snow.

Instruction in communication and leadership skills helps MMH students reach their individual professional development goals, enrich their education, perform well on course assignments, and meet the program benchmarks in managerial writing, presentational speaking, and group process and leadership.

## **OPERATIONS MANAGEMENT, INFORMATION TECHNOLOGY COURSES**

#### **H ADM 170 Keyboarding for Windows**

Spring. 2 credits. Limited to 30 students. Elective. B. David.

An introduction to the computer and a beginning course in alphabetic and numeric keyboarding. Students learn word-processing skills during the second half of the course.

#### **H ADM 174 Microcomputing**

Fall and spring. 3 credits. Limited to hotel school freshmen and transfers. Limited to 30 students per section. Required.

R. Alvarez, P. Clark, R. Moore.

This course is designed to aid students in building functional computer literacy. Students

will develop their skills in five generic areas: text, graphics, spreadsheet, presentation, and listing processing. This portion of the class is taught in the Binenkorb computer lab, where students work with Microsoft Office and the Internet. In addition, students learn introductory statistical concepts, including descriptive statistics, correlation, and regression analysis. Course material is presented through a combination of lectures and labs.

#### **H ADM 274 Microcomputing**

Spring. 3 credits. Limited to 30 non-hotel students per lecture. R. Moore.

An introduction to microcomputing to develop functional computer fluency. Students will develop their skills in five generic areas: text, graphics, spreadsheet, presentation, and file processing. The course is entirely lab-oriented and students work in Windows. Software used is Word, Excel, Powerpoint, and Filemaker.

#### **H ADM 371 Hospitality Quantitative Analysis**

Fall and spring. 3 credits. Required. G. Thompson.

Introduces statistical and operations research methods appropriate for the hospitality industry. The overriding goal is to provide students with the skills and understanding necessary for decision making using quantitative data. Students will use computer spreadsheet software extensively. A key element is an ability to communicate the results of the analyses in a clear manner. Topics include probability, decision analysis, modeling, forecasting, quality management, process design, waiting lines, project management, and revenue management.

#### **H ADM 474 Corporate Information Systems Management**

Spring. 3 credits. Limited to juniors, seniors, and graduate students. Elective. R. Alvarez.

Explores 10 key issues in information technology management through use of case studies of companies who have relevant experience with the issues. A basic understanding of information technology, organizational behavior, and general management is advised.

#### **H ADM 475 Information Technology for Hospitality Managers**

Fall and spring. 3 credits. Prerequisite: H ADM 174. Required. R. Alvarez, M. McCarthy, R. Moore, M. Talbert.

Composed of three blocks: (1) Lecture—the goal of this block is to provide the students with a broad-base knowledge of Information Technology (IT) management issues. (2) Lab—the goal of this block is to provide the students with advanced Excel model-building skills and concepts. (3) Section—the goal of this block is to provide students with the opportunity to focus on a special topic in IT relevant to their career direction. Block 1: Meets for the entire semester. Students must register for this lecture. Block 2: Meets for the first nine weeks of the semester. Students must register for one of these two labs. Block 3: Meets for the last three weeks of the semester. Students must register for at least one of these sections. Students who wish to register for more than one section may do so and receive one additional credit of independent study for each.

#### **H ADM 476 Visual Basic for Applications: End-User Programming**

Fall and spring. 3 credits. Limited to 25 students. Elective. M. Talbert.

Introductory programming course for end-users (e.g., business managers, consultants, etc.). Students will develop fluency in the popular Visual Basic for Applications (VBA) language. Using VBA, students will learn how to customize and extend the Microsoft Office Suite, with an emphasis on Excel. They also will develop custom information systems using Microsoft Office applications as programmable building blocks. Secondary objectives will be to cover fundamental design and programming principles. Entirely lab-based.

#### **H ADM 574 Strategies for Internet Business**

Fall. 3 credits. Limited to 30 hotel seniors and graduate students. Prerequisite: H ADM 174. Elective. G. Piccoli.

Information technologies, and particularly Internet technologies, are revolutionizing business organizations, commerce, and society. This course will explore how such technologies can be leveraged to create shareholder value and can be used to service customers. The fundamental technologies, the economic premises of the new competitive landscape, business strategy in this environment, and the risks these strategies engender will be analyzed. The course will have a managerial orientation but a basic understanding of information technology and a minimum level of proficiency are required. Cases and examples drawn from the hospitality industry will be used, but the topic is more general and a number of applications to other industries will be contemplated as well.

#### **H ADM 674 Service Operations Management**

Fall and spring. 3 credits. Limited to 25 graduate students. Prerequisite: H ADM 775 or equivalent. Elective. Not offered fall 2000. G. Thompson.

The objective of this course is to improve the understanding of the operations function of service organizations. Focuses on the role and nature of service operations, the relationship of operations to other business functions, and develops skills and provides techniques for the effective management of service operations. Topics include service design, bottleneck and layout analysis, capacity management, work force management, and quality management. Intended for graduate students interested in services management.

#### **H ADM 675 Yield Management**

Fall and spring. 3 credits. Limited to 40 students. Prerequisites: H ADM 371, 771, or equivalent. Elective. S. Kimes.

Students learn how to effectively apply the principles of yield management. Focuses on the integration of yield management techniques with information technology, internal management issues, and external marketing concerns. Topics include yield management techniques, forecasting, overbooking, group decisions, and management and marketing issues.

#### **H ADM 676 Restaurant Revenue Management**

Spring. 2 credits. First 7 weeks. Limited to 30 graduate students, or undergrads with H ADM 335 and 371 by permission of the instructor. Prerequisites: H ADM 731 and 771. Elective. S. Kimes.

Revenue management is a method for profitably managing capacity. The objective of this course is to help students learn how to apply the principles of revenue management to restaurants. The course focuses on methods of managing duration and price with the intent of maximizing revenue per available seat-hour. Topics to be covered include forecasting, overbooking, reservations systems, information technology, process design, pricing, and management and marketing issues.

#### **H ADM 771 Graduate Quantitative Methods**

Fall. 3 credits. Professional master's requirement. S. Kimes.

Covers statistical and operations research techniques which can be applied to the hospitality industry. Topics include descriptive statistics, probability, sampling, correlation and regression, forecasting and yield management. The emphasis is on hands-on application to hospitality problems.

#### **H ADM 772 Information Technology for Hospitality Managers**

Fall. 3 credits. Professional master's requirement. R. Moore.

Familiarizes students with issues surrounding the implementation of information technology in supporting hospitality operations from a guest services perspective and decision making from the viewpoint of management.

## LAW COURSES

#### **H ADM 385 Business Law I**

Fall and spring. 3 credits. Limited to juniors, seniors, and graduate students outside the hotel school, and hotel students by permission of the instructor. Recommended for hotel students, H ADM 387 preferred. Elective. P. Wagner.

Provides students with a presentation of three substantive areas of business law: contracts, intellectual property, and business organizations. Students will read judicial opinions, learn to identify issues, and analyze the issues by applying legal principles.

#### **H ADM 387 Business and Hospitality Law**

Fall and spring. 3 credits. Limited to juniors, seniors, and graduate students. Required. D. Sherwyn.

An integrated presentation of employment discrimination, tort and contract concepts as they apply to the legal aspects of hospitality management. Relevant federal and state cases and statutes are examined. The overall objective is to recognize, analyze, and evaluate legal issues for the purpose of making and articulating appropriate decisions.

#### **H ADM 485 Employment Discrimination Law and Union Management Relations**

Spring. 3 credits. Limited to juniors, seniors, and graduate students. Prerequisite: H ADM 387 or permission of instructor. Elective. D. Sherwyn.

Anti-discrimination statutes and union management relations are two of the most pervasive legal issues affecting the hospitality industry. Managers must take these issues into account whenever they make a personnel decision. This course will provide students with: (1) an understanding of the discrimination law; (2) a framework for complying with

law; (3) a method for using the law to maintain positive employment relations; and (4) an understanding of how to negotiate and administer a union contract.

#### **H ADM 487 Real Estate Law**

Fall and spring. 3 credits. Limited to non-hotel students, and hotel juniors, seniors, and graduate students. Recommended: completion of H ADM 387 preferred. Elective. A. Klausner.

Provides students with an understanding of the legal issues surrounding the ownership, transfer, and use and development of real estate. Students will learn to recognize and evaluate legal issues in order to inform the decision-making process with respect to real estate, whether as a business executive, an entrepreneur, or in personal life.

## OTHER COURSES

#### **H ADM 191 Microeconomics for the Service Industry**

Fall and spring. 3 credits. Limited to 60 hotel students per lecture, others by permission of instructor. Required. M. Conlin, J. Wissink.

Introduces the basic principles of microeconomics and teaches students how they apply to managers of enterprises associated with the hospitality industry. Emphasis on methods of market segmentation in the service industries, analyzing economic incentives involved in franchise arrangements, and the nature of competition in various segments of the hospitality industry.

#### **H ADM 490 Housing and Feeding the Homeless**

Spring. Variable to 4 credits. Limited to juniors and seniors. Elective. T. O'Connor.

Explores the public and private sector partnership in addressing the issue of hunger and homelessness. Through lectures, class discussions, research, community service work, and a field placement practicum, students will explore the economic, social, and political issues of our country's concern with housing and feeding disenfranchised and homeless people. Students will study the history of homelessness and the strategies to prevent and alleviate the problem. Explores public and private sector approaches to addressing the issue of hunger and homelessness. Through lectures, class discussions, research, community service work, and a field placement practicum, students will explore the economic, social, and political issues of our country's concern with housing and feeding disenfranchised and homeless people. Students will study the history of homelessness and the strategies to prevent or alleviate the problem through public policy, housing programs, food assistance programs, and job training initiatives. This is a service learning course centered around community work experience. There are three options for involvement in this course. Students must choose one of the following options: (1) Four-credit option whereby students work in pairs or small groups with a local area agency that provides services for homeless or disadvantaged people. They will analyze the agency's mission and goals, identify managerial challenges, and formulate an approach in the form of product or service that is useful to the agency. This field practicum will comprise

approximately 60 hours of work during this semester, half of which will be in direct contact with the agency and its clients. (2) Four-credit option whereby students will participate in an ALTERNATIVE SPRING BREAK in an agency(ies) in Washington, DC. Students will work five full days in an agency that serves homeless, hungry, or disenfranchised people such as homeless shelters, community kitchens, or battered women's housing units. Housing and transportation are arranged. On the return trip, students will participate in a reflection and focus exercise in a relaxing setting. This option may cost students up to \$280. Students interested in this option MUST see the instructor at preregistration time. (3) Three-credit option whereby students do community work in the Ithaca area with an agency that serves homeless, hungry, incarcerated, or disenfranchised people. Students will work on a regular weekly basis for a minimum of 25 hours during this semester.

#### **H ADM 491 Hotel Ezra Cornell**

Fall and spring. Variable to 4 credits. Prerequisite: written permission. Elective. Y. Kerr-Donovan.

Elected board members of Hotel Ezra Cornell receive credit for academic coursework, and the development, organization, and management of the April "Hotel-for-a-Weekend." Students who are considering a board position may pre-enroll for the course and should speak with the instructor for additional information about board positions and required coursework. Elections will take place in April after Hotel Ezra Cornell Weekend, at which time the HA 491 course enrollment will be finalized. **Students must be in good academic standing and have a GPA of at least 2.0 in the preceding term.** Further information is available in the Student Services Office, 178B Statler Hall.

#### **H ADM 493 Management Intern Program I—Operations**

Fall and spring. 6 credits. Limited to hotel juniors and seniors with approval of the MIP faculty committee. Prerequisites: students are expected to have completed H ADM 105, 115, 211, 121, 221, 222, 136, 236, 243, 255, 165, and 174. In addition, completion of the following courses is strongly recommended: H ADM 321, 335, 355, and 365. Additional course work might be required for applicants considering specialized internships. A detailed plan for the completion of all remaining academic requirements must be approved prior to acceptance into the course. Must be taken in conjunction with H ADM 494. S-U grades only, based on six performance evaluations. **Students must be in good academic standing and have a GPA of at least 2.0 in the preceding term.** Elective. R. Chase.

#### **H ADM 494 Management Intern Program II—Academic**

Fall and spring. 6 credits. Must be taken in conjunction with H ADM 493. Letter grades only, based on submission of goals and objective statement, four management reports, journals, debriefing, and oral presentation. **Students must be in good academic standing and have a GPA of at least 2.0 in the preceding term.** Elective. R. Chase.

**H ADM 495 Development and Management of Wellness in Business Organizations**

Spring. 3 credits. Limited to juniors, seniors, and graduate students. Elective. M. Tabacchi.

Designed to encourage future managers to evaluate the work environment and to enhance opportunities for diverse worker productivity which should increase the corporation's competitive edge. Emerging fields of complementary and alternative medicines are explored as preventive and cost effective methods of improving workers' health.

**H ADM 499 Undergraduate Independent Study**

Fall and spring. Variable, to 4 credits. Elective. Faculty.

Students are afforded an opportunity to pursue independent study projects under the direction of a resident faculty member. Permission in writing is required prior to course enrollment. Obtain permission form from the Hotel School Student Services Office. Independent study work must be performed in the term for which it is approved, and the usual add/drop policy applies. Retroactive credit for work commenced after an academic term has ended is not allowed.

**H ADM 690 Honors Monograph**

Year-long course. 4 credits. Limited to professional master's students who: (1) either have a minimum GPA of 3.7 or are in the top 10 percent of the students in the year group in their first-year professional master's courses; (2) have given evidence of being a good writer by meeting all components of the written communication benchmark; and (3) obtained the approval of a brief topic proposal from the potential adviser. Elective. Faculty.

A special integrative course for students who write well and desire to explore in depth a topic of mutual interest to them and a faculty adviser of their choice. The approval of a second reader is required for completion of the course. Special recognition of students who complete the course will be made at graduation. Applications available in the Graduate Office, Room 172 Statler.

**H ADM 692 Industry Challenges and Trends**

Spring. 3 credits. Limited to 15 seniors and graduate students. Elective. J. Clark.

A seminar approach will be used to discuss readings and case studies selected to illustrate current challenges and future trends such as globalization, consolidation, etc., in the hospitality industry. The view will be futuristic and primarily from that of a multi-unit/corporate perspective. An in-depth analysis of a few specific companies will be included using case studies and guest lecturers when appropriate. Student teams will research new topics and make presentations and final reports.

**H ADM 698-699 Graduate Independent Research**

Fall and spring. Credit to be arranged. Elective. Faculty.

Student must have in mind a project and obtain agreement from an individual faculty member to oversee and direct the study. Permission in writing is required prior to course enrollment. Obtain permission form from the Hotel School Graduate Office, Room 172, Statler.

**H ADM 791 Creating and Managing for Service Excellence**

Fall. 3 credits. Professional master's requirement. L. Renaghan.

Covers the complex management practices and concepts necessary to deliver consistent value in the hospitality industry (determining customer expectations; integrating marketing into operations; managing customer satisfaction; and measuring and controlling costs). Cases, lectures, discussion, and industry experts will be used, with emphasis on translating the strategic understanding of value into management practice.

**H ADM 793 Industry Mentorship Program**

Spring. No credits. S-U grades only. Professional master's requirement. M. Redlin.

Interaction with a senior hospitality industry executive. Objectives are to give the student an overview of the operating dynamics of a segment of the industry, to provide a realistic awareness of day-to-day life working as an executive in the industry, and to develop an awareness of the skills, level of integration, and other factors required for success.

**H ADM 794 Management Development**

Year-long course. No credits. S-U grades only. Professional master's requirement. J. Brownell, N. Dahl.

Students must register for the first three semesters, and they will get a grade at the end of each semester. Second semester students must keep the times open for team project meetings. All students in the Master of Management in Hospitality Program must enroll for HA 794. This requirement includes participation in the MMH Assessment Center, program benchmarking, team project, and other activities related to students' professional development.

**H ADM 890 M.S. Thesis Research**

Fall and spring. Credit to be arranged.

**H ADM 990 Ph.D. Thesis Research**

Fall and spring. Credit to be arranged.

**FACULTY ROSTER**

Alvarez, Roy, M.Ed., Auburn U. Lecturer  
Arbel, Avner, Ph.D., New York U. Prof.  
Austin, Jon R., Ph.D., U. of Wisconsin-Madison. Asst. Prof.  
Berger, Florence, Ph.D., Cornell U. Prof.  
Brownell, Judith, Ph.D., Syracuse U. Prof., and Assoc. Dean for Academic Affairs  
Bryson, Susan, M.A., U. of Chicago. Lecturer  
Butler, David W., Ph.D., U. of Wisconsin-Madison. Dean and E. M. Statler Professor.  
Canina, Linda, Ph.D., New York U. Asst. Prof.  
Carvell, Steven A., Ph.D., SUNY Binghamton. Assoc. Prof.  
Chase, Robert M., M.B.A., Cornell U. Prof.

## COLLEGE OF HUMAN ECOLOGY

### ADMINISTRATION

Patsy M. Brannon, dean

D. Merrill Ewert, director of Cornell Cooperative Extension

Jennifer Gerner, associate dean

Charles McClintock, associate dean

S. Kay Obendorf, associate dean

Brenda Bricker, director, undergraduate affairs

Darryl Scott, director, admissions

Duncan Bell, college registrar

### COLLEGE FOCUS

The College of Human Ecology anticipates and responds to human needs in the areas of nutrition and health, economic and social well-being, environmental design and technology; as well as human development through education, basic and applied research, and the extension of knowledge. The college is distinctively characterized by the quality of its research in the natural and social sciences and the design arts, a global perspective in academic programs, a preventive approach to contemporary societal problems, multidisciplinary departments and programs, development of leadership in students and citizens, and a commitment to diverse populations. Faculty and students examine individuals in relation to their family, neighborhood, workplace, and community, seeking a balance between theory and practice that will improve the quality of everyday life.

### FACILITIES

The college is housed in Martha Van Rensselaer Hall. The Division of Nutritional Sciences, an intercollege division supported jointly by the College of Human Ecology and the College of Agriculture and Life Sciences, has space in Savage, Kinzelberg, and Martha Van Rensselaer Halls. The buildings include administrative and faculty offices, classrooms, auditoriums, galleries, and lecture halls; wet chemistry and biochemistry laboratories for nutrition, food science, and textile science; experimental food laboratories; design studios and computer-aided design laboratories; woodworking shops; experimental observation rooms with one-way vision screens and sound-recording equipment; human factors and infant research facilities; educational television studios; and an audio/visual classroom for distance learning. Also included are learning resource centers for career planning, field and international study, a historical costume collection, a human metabolic research unit, an animal research facility, cold rooms, a constant temperature and humidity laboratory, and an early childhood research and care program.

Specialized equipment for teaching and research includes biochemical and chemical instruments for spectroscopy, chromatography, radioisotope analysis, electrophoresis, microscopy, and ultracentrifugation; physical testing equipment; and cameras, videotape, and sound recording equipment.

### DEGREE PROGRAMS

Cornell programs in Human Ecology lead to the degrees of Bachelor of Science (B.S.), Master of Arts (M.A.), Master of Science (M.S.), Master of Professional Studies in Human Ecology (M.P.S.), Master of Health Services Administration (M.H.A.), and Doctor of Philosophy (Ph.D.).

General academic information concerning the Bachelor of Science degree is given here under the heading "Undergraduate Study." Curricula for major studies are described under the various academic areas.

Programs leading to master and doctoral degrees are administered by the Graduate School. They are described in the *Announcement of the Graduate School* and in announcements published by the individual field offices (Design and Environmental Analysis, Human Development, Nutrition, Policy Analysis and Management, and Textiles and Apparel). For information regarding The Sloan Program in Health Services Administration, contact the Department of Policy Analysis and Management.

### UNDERGRADUATE DEGREES

Bachelor of Science (B.S.) degrees are offered in the following areas:

- Biology and Society
- Design and Environmental Analysis
- Human Development
- Human Biology, Health, and Society
- Nutritional Sciences
- Policy Analysis and Management
- Textiles and Apparel
- Individual Curriculum

### UNDERGRADUATE AFFAIRS

Persons interested in undergraduate study in human ecology should contact the admissions office, 170 Martha Van Rensselaer Hall (255-5471). Those interested in graduate study should contact the graduate field representative identified among the faculty of each department. Department faculty are listed at the beginning of the course descriptions for each department.

Counselors in the Office of Admission, Student, and Career Services (172 MVR) can help perspective students understand college programs and requirements, as well as college and university resources and services. They provide a broad range of career services and personal support for all matriculated undergraduates. The college registrar (145 MVR) assists undergraduates with questions on academic credit and graduation requirements.

### The Student Body

The College of Human Ecology undergraduate enrollment is 1,435. Roughly 350 students graduate each year; last year 268 freshmen and 188 transfer students matriculated. Ninety-five faculty members serve as advisers to undergraduates.

The college's undergraduate admissions committee selects applicants who are academically well prepared and appear most likely to profit from the college's various curricula. Admission is highly selective. Approximately 69 percent of the student body comes from New York State, with the remainder coming from other parts of the United States and abroad. In 1999, 29 percent were identified as members of minority groups. Approximately 220 graduate students have members of the college's faculty chairing their special committees. The college awarded 59 master's degrees and 29 doctorates last year.

### Mature Students

The college recognizes that students who interrupted their formal education and are returning to school have needs different from those of younger undergraduates. To facilitate the education of mature students, defined as those 24 years old or older at first matriculation, the college has adopted certain procedures specifically for that group. Counselors in the Office of Admission, Student, and Career Services (172 MVR) can provide information of interest to mature students. Mature students are permitted to enroll for as few as six credits without petitioning for permission and also are permitted to extend their residency beyond the normal eight terms. To qualify for prorated tuition, mature students must see the registrar about plans before registration each semester.

### Special Students

Students eligible for special status are those visiting from other institutions and interested in particular programs in the college; those with a bachelor's degree who are preparing for graduate study or jobs and careers in human ecology-related fields; or those who have interrupted their education and are considering completing degree programs. Students accepted in the nondegree status of special student may enroll for a maximum of two semesters. During the second semester of attendance, a special student must either apply for admission as a transfer student or plan to terminate studies in the college at the end of the semester. Special students are

expected to take a minimum of 12 credits each semester and to take one-half to two-thirds of their work in the statutory divisions of the university. Courses taken while a person is classified as a special student may be counted toward the requirements of the bachelor's degree. Those interested in becoming special students should make appointments to discuss admission procedures in the Office of Admission (170 MVR, 255-5471).

### Empire State Students

Occasionally a student who is completing requirements for a degree through the Empire State College Program is interested in taking a human ecology course. This can be done by registering through the Division of Summer Session, Extramural Study, and Related Programs (B20 Day Hall, 255-4987). All rules of the extramural division apply, and registrations will be accepted only on a space-available basis and with the written approval of the course instructor. At the time of registration, Empire State College students must provide the extramural division with a completed copy of Empire State College's notification of cross-registration (form number, SA-22, F-031) to verify enrollment in Empire State College. Such students will be charged 25 percent of the standard extramural tuition per credit.

### Transfer students

Students who enter the College of Human Ecology after the first semester of their freshman year are considered transfer students. An internal transfer student is one who transfers to Human Ecology from one of the other colleges at Cornell University. An external transfer student is one who transfers to Human Ecology from an institution outside of Cornell University. Internal transfer students should take special care to learn the policies of Human Ecology because each college at Cornell operates under a different set of rules. Staff in the Office of the College Registrar (145 MVR, 255-2235) and in the Office of Admission, Student, and Career Services (172 MVR, 255-5471) are available to answer students' questions. External transfer students may transfer a maximum of 60 credits to the college. Both internal and external transfer students should contact the Office of the College Registrar to discuss how the transfer credits will apply to the various degree programs.

## MAJORS

The college requires students to fulfill requirements for one or more majors in order to graduate. Students must declare a major by the end of the sophomore year, and may elect to complete more than one College of Human Ecology major. It is common for students to change interests during their undergraduate careers. Counselors in the office of Admission, Student, and Career Services (172 MVR) and directors of undergraduate study in each of the academic departments can help students to consider their options and engage in academic planning. All changes of major require submission of the Change of Major form, and are processed through the College Registrar's office, 145 MVR. Change of major will trigger re-evaluation of credit and assignment of a new faculty adviser.

## DESIGN AND ENVIRONMENTAL ANALYSIS

The Department of Design and Environmental Analysis (DEA) is concerned with planning, designing, and managing interior environments to satisfy human needs. Most people spend over 90 percent of their lives inside buildings. Those settings have substantial and far-reaching effects on the quality of our lives. The processes for creating and maintaining the built environment face enormous challenges, including frequent social and organizational changes, technological advances, new building methods, and finite resources. The program in DEA is dedicated to preparing professionals who can meet these challenges.

Diverse faculty backgrounds and teaching approaches help students to develop multidisciplinary problem-solving and creative abilities, aesthetic judgment, and analytical thinking. Excellent laboratory, shop, studio, and computer facilities permit exploration of innovative concepts for the design and management of interior environments. The relationship between people and their physical surroundings is explored through a combination of academic courses, field experience, and applied research. Examples of student class projects and faculty work are frequently on display in the MVR gallery. The DEA Resource Center includes books, journals, newsletters, and material samples for student use.

### Options

The department offers undergraduate education in three professional areas: interior design, facility planning and management, and human factors and ergonomics. The interior design option is accredited by the Foundation for Interior Design Education Research (FIDER). The Facility Planning and Management Program at Cornell is an "IFMA Recognized Program." This means that it meets the standards for recognition of programs established by the International Facility Management Association.

To take full advantage of the course sequences and electives, it is important to select an option as early as possible. This is particularly true in the interior design option. Transfer students in the interior design option may need one or two extra semesters to complete the program.

#### Option I: Interior Design

The interior design option prepares students for professional careers in the planning and design of interior spaces and associated products. The program emphasizes a problem-solving approach based on knowledge of buildings and their associated systems, furnishings and interior products, human-environment relations, and design principles. Some students combine this program with another option.

Careers are available in interior design and space planning, interior architecture, facility planning, interior product design, and housing. This program also serves as an excellent preparation for graduate study in interior design, facility management, architecture, and product design.

#### Option II: Facility Planning and Management

This option is designed to prepare students for professional careers in facility management. The program focuses on the planning, design, and management of facilities for large, complex organizations such as corporations, health-care institutions, research and development laboratories, and universities. Facility planning and management is a basic management function that coordinates and integrates information and expertise from areas such as planning and design, real estate, and business administration with human factors, ergonomics, environmental psychology, telecommunications, and building operations for the purpose of developing and managing facilities that support individual and organizational effectiveness.

Excellent career opportunities exist in the facility management divisions of private companies, institutions, the health-care industry, and with private consulting firms offering facility management services. The program is also a good preparation for graduate study in business, planning, or one of the design disciplines and for advanced study in facility planning and management.

#### Option III: Human Factors and Ergonomics

Human factors and ergonomics focuses on the interaction between people and their physical surroundings. This option seeks to expand understanding of how the environment affects human perception, cognition, motivation, performance, health, safety, and social behavior. This knowledge is then used to help architects, planners, interior and product designers, and facility managers to plan, design, and manage safe and effective environments. The effect of human capabilities or characteristics such as family structure, life-style, social class, and stage-in-life cycle on environmental needs and requirements is also a focus of the program. Career opportunities are available in design firms and in urban planning and other public agencies as well as in the facility management and product design division of private companies. Human factors and ergonomics is good preparation for graduate study leading to a Ph.D. degree in the social sciences and a career in academic or other research-oriented settings in either the public or private sector. It can also serve as the basis for graduate study in an environmental planning or design discipline such as architecture, facility planning and management, interior design, landscape architecture, or city and regional planning. Electives in the social sciences and in research methods and statistics are encouraged.

### Academic Advising

All DEA majors are matched with a faculty adviser during their first semester by the director of undergraduate studies, William Sims, in E214 Martha Van Rensselaer Hall.

Consultation with faculty advisers about future goals, departmental requirements, sequences of courses, and electives inside or outside the college helps students develop their programs. Students majoring in interior design, especially, must begin early to plan and collect materials for a portfolio of their work, which is necessary for many positions and for application to graduate schools. Faculty advisers can make recommendations on what to include. Students are free to change advisers. Although advisers must sign the

schedule card during course enrollment each term, it is the student's responsibility to keep track of his or her courses and to make sure that they meet graduation requirements for their major and college.

### Ownership and Exhibition of Student Work

All design work done in studios as part of an academic program is the property of the department until it has been released by the instructor. The department is not responsible for loss or theft of student work.

## HUMAN BIOLOGY, HEALTH, AND SOCIETY

The Human Biology, Health, and Society (HBHS) Program permits you to combine your interests in the biological sciences while exploring human health issues from the perspectives of both the biological and behavioral sciences. HBHS majors select the issues they want to explore in depth from Human Ecology courses that address health and the broad range of factors that influence human well-being. Examples of issues you can explore include: biology and behavior; metabolism, genetics, and health; biology, growth, and development; and food and health policy and health promotion. Most students in this program will proceed to programs of advanced study to pursue careers related to health. This new major is offered by faculty in the Division of Nutritional Sciences. More information about this program can be found in a separate section of the catalog that describes the division's programs.

## HUMAN DEVELOPMENT

Human Development majors explore the psychological, social, cultural, and biological development of people from conception to old age, focusing on the processes and mechanisms of growth and change over the life course. A wide range of issues are included in the study of human development, including biological, cognitive, and emotional development; the role of family, neighborhood, workplace, and culture in development; and the influence that developing humans have on their environment. The Human Development major provides an excellent foundation for many careers, such as medicine (particularly family medicine, pediatrics, and psychiatry), clinical psychology and other mental health professions, law, business (especially human resources), child and family advocacy, and education (from preschool to high school teaching to school administration). The major prepares students for academic careers as professors in human development, psychology, or sociology departments. Learning about human development also helps students understand more clearly their own development and the development of those around them.

The faculty of the Department of Human Development comes from several disciplines, including developmental and clinical psychology, sociology, and history. The diversity of faculty expertise results in a wide-ranging view of human development. The research of the department's faculty is

extensive. It includes basic research on issues such as the neurobiology of personality, the role of childhood attachments in the development of adult romantic relationships, the acquisition of language in infants, and the effects of environmental toxins on children's cognitive development. It also includes applied research useful for the creation of public policy, such as studies of the causes and consequences of child maltreatment and studies of the effectiveness of reading programs for Headstart preschoolers, apprenticeship programs for high school students, and support programs for older adults moving into retirement communities.

### Curriculum

Human Development is the most flexible major in the College of Human Ecology. While all students learn the fundamentals of human development, each student can focus on one or more areas of particular interest. The flexibility of the major also allows students ample opportunity to meet the requirements for admission to many professional schools, including medical, dental, law, and business schools.

Requirements specified by the College of Human Ecology make up part of each student's curriculum, and include classes in the social and natural sciences, humanities, writing, and communication. In addition, there are requirements for the Human Development major. Students in this major can choose up to 14 elective courses from the broad range of offerings across the Cornell campus.

### Special Opportunities

Beyond formal coursework, students have many other opportunities that involve ongoing individual work with Cornell faculty or other professionals. Academic credit can be earned through all of them. These opportunities include

**Field Placements.** Human Development majors can arrange internships with Urban Semester in New York City, Cornell-in-Washington, and Cornell Abroad programs and in local agencies. These have included hospitals, psychiatric hospitals, juvenile detention centers, retirement homes, and the department's on-campus Early Childhood Program. Students have also participated in projects with the Tompkins County Office of Aging, the Tompkins County Youth Bureau, and the Law Guardian's Office of Tompkins County.

**Faculty Research.** Many students work as research assistants on faculty projects. Students use research techniques ranging from laboratory procedures to family observations to large surveys. They assist in study design, data collection, and data analysis. Participation in faculty research provides the type of experience that many graduate and professional schools expect from their top applicants. Recent projects have included the study of parent-infant interactions, the transition of high school students to the world of work, and the study of recent trends in the composition of American families.

**Independent Research.** Under faculty supervision, some advanced students complete an honors thesis in an area of personal interest by designing a study and collecting and analyzing data. Recent thesis topics have included marital quality in Asian and interracial couples, development in

families that adopt school-age children, and connections between speed of visual processing in infants and later scores on intelligence tests.

### Undergraduate Teaching Assistant.

Advanced students can serve as undergraduate teaching assistants. This requires close work with the professor teaching the course as well as with students taking the course.

**Teaching Certification.** A cooperative education program exists between Human Development and Wells College. This program requires careful planning and course scheduling. It enables students to graduate with a Cornell Bachelor's Degree and New York State Certification to teach nursery school through sixth grade. This certification is honored by most other states.

The program requires Cornell HD students to take four courses at Wells College and student teach their last semester at Cornell. Although there is van transportation between Cornell and Wells College, it is important for students to have access to a car, especially while student teaching. Students will be registered at Cornell during the entire undergraduate program and usually maintain Ithaca housing. Wells College courses count as Cornell courses and are used as electives, but do not get included in a student's GPA. The one-semester student teaching experience is typically based in the Ithaca area, though not necessarily within the City of Ithaca.

This program is open to HD majors only. You must have at least a 3.0 Cornell cumulative GPA upon application, and must maintain a 3.0 GPA to qualify for student teaching and to complete the program. For more information, contact Judith Ross-Bernstein in G56 MVR at 255-0826.

## NUTRITIONAL SCIENCES

A major of Nutritional Sciences (NS) focuses on the complex interrelationships of food patterns, nutritional status, and health. This field draws upon chemistry, biology, and the social sciences to understand questions such as: How are nutrients used by the body? What factors influence human food choice? What nutrients and dietary patterns are recommended to promote growth, maintain health, or reduce the risk of chronic disease? Students in this program may also fulfill the courses required for professional membership in the American Dietetic Association, which will enable them to be employed as nutrition counselors, clinical nutritionists, sports nutritionists, or administrators of food and nutrition services. Students also may prepare for medical school and other types of advanced degree programs through this major. The requirements for this program are outlined in the section of this catalog that describes the division's programs.

### Special Opportunities

#### Dietetics and Clinical Nutrition

Interested students should complete the academic requirements for the American Dietetic Association (ADA). Courses in foods, nutrition and disease, microbiology, management, statistics, and economics are added to the core curriculum (specific requirements). Evaluation of academic credentials for active membership and registration in ADA should

be completed before graduation. Seniors should initiate this academic evaluation process in March if they will graduate in January or in September if they will graduate in May. All students who will complete the academic requirements by graduation should participate in the evaluation process while at Cornell. Students who meet most but not all of the academic requirements are encouraged to have their academic work evaluated while they are at Cornell so that deficiencies can be identified and documented.

Advisers in the dietetics program can also help students plan to meet the experience or supervised practice component required for active membership and/or eligibility to take the Registration Examination to be certified as a registered dietitian (R.D.). For additional information about meeting ADA requirements, contact Marie Kamp (373 MVR, 255-2638).

#### Exercise Science Minor

Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in fitness measurements, exercise physiology, and biomechanics of human movement. Nutrition courses of special interest relate to growth and development, regulation of body weight, and community nutrition and health. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office (309 MVR, 255-4410).

## POLICY ANALYSIS AND MANAGEMENT

The Policy Analysis and Management (PAM) major produces graduates skilled in policy analysis, program planning, and evaluation and possessing management skills applicable in the public, nonprofit, and private sectors. In addition, the Policy Analysis and Management graduate will have concentrated knowledge in one of three areas: family/social welfare, health, and consumer policy. Graduates are well-qualified for a wide variety of public, nonprofit, and private sector employment emphasizing either program analysis and evaluation or management. The major also attracts large numbers of pre-law students, pre-MBA students, and students intending to pursue graduate education in public affairs and policy analysis programs. The potential exists to pursue a five-year program resulting in a BS and a Master of Health Administration.

The PAM major combines theoretical underpinnings from economics, sociology, psychology, and government to critique and analyze our society's values, laws, policies, and programs. It also gives students the knowledge to build management skills for use in public, nonprofit, and for-profit settings. Ideas of social justice, equity, and efficiency will be studied concurrently with strategic planning, human resources, supervision, and organizational development. Research methods, statistics, and planning and evaluation concepts will be learned and used to direct and aid in program planning, policy analysis, program evaluation, and management.

In addition to learning basic policy analysis and management skills, the student will be expected to apply these skills to a particular concentration—social welfare/family, health, or consumer policy. Social welfare/family

policy and management includes a panoply of governmental and private sector income maintenance, social, and human service delivery programs and policies that range from child adoption and child neglect and abuse policies and antipoverty programs to policies and programs that impinge on or regulate marriage, divorce, and fertility. Health programs and policies include such politically sensitive programs and issues as health care access, Medicare, Medicaid, long-term care, health maintenance organizations, public health issues, and substance abuse policies. Consumer programs and policies include the regulation and laws governing advertising, product safety, food and drug safety, nutrition policies, the regulation of credit, insurance, telecommunications, mortgage, housing issues, and public utility markets and also deal with issues such as the invasion of privacy, internet security, and children's TV. A specific focus in the consumer concentration is the role of marketing and its relationship to consumer well-being and consumer behavior.

In addition to college requirements, all PAM majors are expected to take core courses: Introduction to Management, Introduction to Policy Analysis, Research Methods, Multivariate Statistics, Intermediate Microeconomics, and Public Finance. Students will also be expected to develop a concentration of three courses in either social welfare/family, health, or consumer policy. These concentrations may emphasize either policy analysis or management skills. Finally, PAM majors will have the opportunity to participate in departmentally approved experiential learning. Please check with the undergraduate advising coordinator, Professor Alan Mathios, for further details.

## TEXTILES AND APPAREL

The Department of Textiles and Apparel (TXA) focuses on the use of textiles and fibrous materials for apparel, durable and nondurable household goods, composites, geotechnical, and biomedical applications. Programs in the department, in keeping with the overall mission of the college, emphasize the use of materials to meet human needs. The curriculum includes the application of design principles, physical and materials science, economics and marketing, government policy/regulation, management of products and their delivery, and technological developments.

Practical problem-solving skills are developed in the department's laboratories and studios. Academic course work is further enhanced by field and international experiences. Gallery space provides the setting to display design work. In addition, the Cornell University Costume Collection, housed in the department, provides a valuable resource; items from the collection are made available to students for classroom and special-study use.

### Academic Advising

All TXA majors are matched with a faculty adviser by the director of undergraduate studies, Anita Racine (316 MVR). Students are strongly urged to discuss their goals, course selection and sequence, electives, and career plans with their faculty adviser. Students in apparel design must begin working with their advisers early to develop a professional portfolio of their work. Students are free to

change advisers; changes must be recorded with the advising coordinator. Although advisers must sign the schedule card during course enrollment each term, it is the student's responsibility to keep track of his or her courses and to make sure that the program meets graduation requirements for their major and college.

### Ownership and Exhibition of Student Work

All apparel design work done as part of the academic program is the property of the department until it has been released by the instructor. Certain exceptional work may be retained by the department to exhibit for academic purposes. The department is not responsible for the loss or theft of student work.

### Course Fees

No grade will be given in a course unless the course fee has been paid by the last week of classes.

### Options

Students may select options in apparel design, apparel/textile management, or fiber science. The curriculum is based on manipulation of form, color, and the physical characteristics and structures of fabric to solve functional and aesthetic apparel problems; the application of economic and marketing principles to consumer and industry problems in the textile-apparel sector; and the study of chemical, physical, and engineering properties of fibrous structures and polymers. Depending on previous course work, transfer students may need one or two extra semesters to fulfill the requirements of the major.

#### Option I: Apparel Design

The study of apparel design includes both aesthetic and functional considerations in the design of body coverings. The program emphasizes a problem-solving approach that enables the student to bring a background in apparel, textiles, and human factors to the design process.

#### Option II: Apparel/Textile Management

Apparel and textile management combines the fields of apparel and textiles with those of economics, business management, and organizational policy. Students combine theory with case studies to find solutions to everyday problems. Course work is drawn from many interrelated disciplines, including textiles, apparel, economics, business management, and communication, as well as practical field experiences. This provides students with the experience of working with professionals from a wide variety of disciplines. Students often combine this option with either Option I (Apparel Design) or III (Fiber Science).

#### Option III: Fiber Science

Applications for textile structures include advanced engineering composites, protective clothing for industrial and military environments, and biomedical materials, as well as the more traditional applications found in apparel and home furnishings. The fiber science option provides a strong base in mathematics and the physical sciences combined with supporting courses in

engineering, consumer economics, and the social sciences.

### Career Opportunities

Graduates of programs in the Department of Textiles and Apparel have found challenging employment within the textile and apparel sector, in independent and government-sponsored research, and in community organizations. Recent graduates are working in the fields of design, management, new product development, engineering, communications, and marketing. In addition, the program prepares students for graduate or professional study in fiber and polymer science, textile marketing, apparel design, textiles, or business and management.

### INTERDEPARTMENTAL MAJOR IN BIOLOGY AND SOCIETY

Biology and society is a multidisciplinary program for students with special interests in such problems as genetic engineering, environmental quality, food and population, the right to medical care, and the relation between biology, society, and ethics and/or public policy, as well as for students who plan postgraduate study in management, health, medicine, law, or other related fields.

Because the biology and society major is multidisciplinary, students must attain a basic understanding of each of the several disciplines it comprises, by including courses in the fields of mathematics, biology, humanities, and social sciences. In addition, majors are required to take core courses in biology and society, a set of electives, and a special senior seminar.

Course work in the College of Human Ecology may be selected from concentrations in: human development and the environment, health, or social policy and human services. The other basic requirements of the college must also be met. Programs incorporating those required courses are designed in consultation with a faculty adviser to accommodate each student's individual goals and interests. For further information on the major, including courses of related interest, specific course requirements, and application procedures, see the advising coordinator in MVR 205. Academic advising is coordinated by the Director of Undergraduate Studies.

### INDIVIDUAL CURRICULUM

A student who has educational and professional objectives that cannot be met satisfactorily within the framework of existing majors in the College of Human Ecology may petition to develop an individual curriculum. To be approved, the curriculum must be within the focus of the college and be interdisciplinary in design, include at least 40 credits in human ecology courses, and not exceed the normal number of credits allowed in the endowed divisions. A student develops an individual curriculum in consultation with faculty advisers from at least two subject-matter fields and the program coordinator, Patti Papapietro, Office of Admission, Student and Career Services (172 MVR).

Such a program of study should encompass a substantial part of the student's undergraduate

education and must include at least three semesters. For this reason, a request to follow an individual curriculum should be made after the freshman year and must be made before the second semester of the junior year.

If an individual curriculum seems advisable, the individual curriculum coordinator will provide direction in formally developing a program of study. Although the coordinator must approve the course enrollment schedule during course enrollment each term, it is a student's responsibility to follow the curriculum as planned or to have any necessary revision approved in writing by his or her adviser and the program coordinator before the program change.

### SPECIAL OPPORTUNITIES

Several programs allow students to receive academic credit for fieldwork and internship experience, study abroad, study in absentia, college-wide certificate programs, and joint programs with other schools and colleges at Cornell. Students may petition the college registrar to have concentrations that are formally recognized elsewhere within the university noted on their transcripts, when accompanied by appropriate documentation from the program.

#### Study Abroad

Each year nearly 100 Human Ecology students spend a semester or more off campus in such remote points of the globe as Australia and Zaire. There they supplement their Cornell studies with a wide range of cross-cultural and academic experiences. Study abroad opportunities are available through Cornell Abroad, U.S. college-sponsored programs abroad, and individual applications at foreign universities.

All study abroad students must meet college study abroad requirements and remain registered at Cornell during the overseas study. Credits earned count towards the 60 Cornell credits required for graduation. Study abroad credits do not count toward the maximum number of endowed credits that Human Ecology students are permitted to earn. Typically, students considering study abroad begin their planning at least by September or October of their sophomore year.

To start:

- Carefully consider what it is you hope to get out of a study abroad experience (academically and culturally). The Cornell Abroad Center (474 Uris Hall) houses the largest on-campus collection of materials on programs around the world. The Human Ecology Career Development Center (159 MVR) has additional materials.
- Pick up an application from the Office of the Registrar (145 MVR).
- Meet with the college's study abroad adviser (172 MVR). The adviser, with the college registrar, will help you complete the application, plan for your semester off campus, and secure the necessary signatures.
- Submit your application to the Office of the Registrar. Deadlines are early February for study abroad the following fall term, and early October for study abroad the

following spring term. Please note that some programs fill up quickly and applications to these most popular programs should be submitted several months before these deadlines.

### Independent Research

Research opportunities for undergraduates are extensive and valued as an important part of the learning experience. The opportunity to engage in substantive research with some of the leading scientists in their fields is so compelling that at least a third of the college's undergraduates conduct research projects. Students may become involved in research with the guidance of faculty members by conducting research assigned in a class, joining a faculty member's research group, completing an independent study research project, or carrying out an honors program project.

For further information, contact individual faculty members or the director of undergraduate studies (DUS) in your department.

### Honors Programs

Students interested in college honors programs that lead to the degree "bachelor of science with honors" usually apply to the appropriate honors committee no later than the end of their sophomore year. Generally, a minimum grade point average of 3.3 and demonstrated potential for honors-level research is required. Students take approved courses in research methodology and evaluation, attend honors seminars, complete a written thesis, and defend it in an oral examination.

In addition to the college honors program, special programs are offered by the Department of Human Development and the Division of Nutritional Sciences.

If you are interested in the honors program, it is important to contact the director of undergraduate studies (DUS) in your department or division for information and guidelines.

### Field Study and Internships

Field study and internships provide experiential learning opportunities in real-life circumstances where classroom knowledge is tested and applied. Students are able to master new skills, develop and implement plans of action, solve problems, interact in multicultural situations, and build networks for future job opportunities. By applying techniques of research methods, critical thinking, and self-directed learning, students learn to think conceptually while becoming agents of change.

Check with the Director of Undergraduate Studies for major specific information. The Career Development Center (159 MVR) can also provide resources and assistance in finding internships and other experiential opportunities.

### Concentration/Certificate in Gerontology

For students interested in pursuing study related to aging, the College of Human Ecology, under the auspices of the Bronfenbrenner Life Course Center, offers the option of completing an undergraduate concentration in gerontology. This program is

designed to develop an understanding of and competence in dealing with the processes and issues of aging. Study in gerontology enriches the practical experience of students and prepares them for professional work in this area. The program draws on the resources of several departments and colleges at Cornell and Ithaca College to shape a curriculum suited to each student's professional goals and interests.

The concentration is available in combination with any major offered by the university. Twelve credit hours of course work must be completed with nine of these taken in the College of Human Ecology. The courses explore aging through biology, psychology, sociology, economics, and design.

Experiential learning opportunities are strongly recommended as a complement to classroom work. With faculty sponsorship, students can participate in experiences in the Ithaca area, the Urban Semester in New York City, Cornell-in-Washington, the Capitol Semester, or in a placement arranged more individually.

Both Cornell and Ithaca College offer courses that incorporate a service-learning component into their curriculum. Cornell's course, "Housing for the Elderly," (PAM 375) has placements in a variety of local agencies (e.g., Office of Aging, Housing Authority, Ithacare) where students gain valuable experience with the different ways communities make it possible for adults to remain independent. This course and others at Ithaca College are sponsored by the Ithaca Partnership for Service Learning in Elder Care. They offer a variety of options for combining volunteer service with classroom experiences. Opportunities for undergraduates to become involved in research projects, such as the Pathways to Life Quality Study, a new Cornell University/Ithaca College longitudinal study of residential changes and adjustments in the later years are also available. In addition, senior students can apply to work as a teaching assistant for a gerontology course.

Departments and programs have designated academic advisers for the gerontology concentration who will help students plan the sequences of courses and electives needed to complete both a major and the gerontology concentration. Because many gerontology courses have prerequisites, early and careful planning is essential.

Specific program requirements may be obtained in the Office of the College Registrar (145 MVR, 255-2235) or from Donna Dempster-McClain, Bronfenbrenner Life Course Center (G20 MVR, 255-5557).

### General Concentration

Students may develop a concentration in additional fields taught at Cornell by taking 12 credits in approved area. Computer science, Africana Studies, Women's Studies, communications, or business are just a few examples of concentrations that are possible.

## THE URBAN SEMESTER PROGRAM IN NEW YORK CITY

### Multicultural Issues in Urban Affairs

Sam Beck, Ph.D., director

The Urban Semester Program is a set of courses spanning the entire year. During fall and spring semesters, students enroll in three classes focusing on the opportunities and barriers that a multicultural society presents and their relationship with professional, community, or public policy settings and concerns (15-credit residential program). Students intern three days each week in placements of their choosing. One day each week, students carry out community service in an inner city school (pre-K to high school). One day each week, students participate in site visits. Seminars are incorporated into these activities. All students reside in the Olin Hall dormitory of the Weill Medical College of Cornell University.

The two-week winter intersession course (two credits) enables students to carry out community service through a reflective practice and problem-solving curriculum. In the eight-week summer semester (one to two credits), students carry out internships in placements of their choosing. Students work with the program staff to locate internship placements. For information, contact the Urban Semester Program staff (159 MVR, (607) 255-1846) or the Urban Semester Program in New York City at (212) 746-2273.

New York City offers a wide variety of internship settings. Many bilingual and bicultural internship settings are available in Chinese, Spanish, Creole, Russian, Yiddish, and other languages. Examples of internships follow:

**Health and Medicine**—New York—Presbyterian Hospital/New York Weill Cornell Center, Queens Medical Center for Women and Children, South Bronx Health Center for Children and Families, Memorial Sloan Kettering Hospital, Hospital for Special Surgery, Montefiore Hospital, Columbia Presbyterian Hospital, Gracie Square Hospital, Our Lady of Mercy Hospital

**Private and Public Law**—NOW Legal Defense and Education Fund; Agenda for Children Tomorrow; Skadden Arps; Slate, Meagher, & Flom; Lawyers for Children; DA's Office; Legal Aid Society; AALDEF; Committee Against Anti-Asian Violence; Center for Immigrant Rights; NAACP/LEDF; Dorsey & Whitney

**Government and Community Agencies**—Cornell University Cooperative Extension, Senator Charles Schumer's office, NYC Housing Authority, Department of Aging, Women's Action Alliance, NYC Commission on the Status of Women, NYC Department of Consumer Affairs, The Center for Puerto Rican Studies, Manhattan Borough President's Office, Central Park Wildlife Center, Attorney General's office

**Wall Street Firms and Other Private Businesses**—Bloomingdales, Prudential Securities, Merrill Lynch, Price Waterhouse, Cairns & Associates, Burson Marsteller, Cushman & Wakefield, AIG-AI Underwriters, Smith Barney, Jane Clark Chermayeff Associates, DDB Needham, KCSA, William M. Mercer Consulting Co., MGM, Madison Square

Garden, Gensler Architecture, Niedeffhoffer—Henkel Century Group

**Private Not-for-Profit Organizations**—City Lights Youth, Council on Economic Priorities, Planned Parenthood, Talbot Perkins, FECS, National Resources Defense Council, Urban Youth Alliance Inc., Phipps Housing, The Door, Covenant House, Global Policy and International Law, UN International Association of Religious Freedom, Mothers and Others for a Livable Planet, UN Child Care Center, WHEDCO

**Private and Public Schools**—Beginning with Children, Banana Kelly H.S., East Harlem School at Exodus House, The Hetrick Martin Institute, Nuestros Niños, Theodore Roosevelt HS, The Choir Academy of Harlem, El Puente, Genesis RFK Center, River East School, MS 118

**Design and Arts Organizations**—Harlem Textiles Works, TADA!, NY Theater Workshop, Cynthia Rowley, Inc., Perry Ellis International, Museum of African Art, SOHO20 Gallery, Lower East/side Tenement Museum

**Communications and Media**—Nickelodeon, *Do Something Magazine*, NBC "Dateline", CNN, CBS News—"48 Hours", NBC News, ABC "One Life to Live", MSNBC "The News with Brian Williams," *The Village Voice*, *Good Housekeeping*, *The New Yorker*, *Essence*, Children's Television Workshop, Good Morning America, MTV, HarperCollins Publishing

## Other Off-Campus Programs

### Capital Semester

Combine a full semester of Cornell credit with a three-day-a-week paid internship of \$3,000. Students intern directly for New York State legislators in Albany to explore their interests in greater depth, doing research projects, meeting with lobbyists and constituents, writing reports for legislation and publication, and working on legislative hearings. This is great experience for law school, graduate school, and employment. It is available for the spring semester only with preference given to juniors. Visit the Career Development Center (159 MVR) for more information and applications. Applicants must meet with Professor Charles McClintock before completing an application (N117a MVR, 255-2514, ccm1@cornell.edu).

### Cornell-in-Washington

Students take courses from Cornell faculty, conduct individual research projects, and work as externs while taking advantage of the rich resources of the nation's capital. For more information, visit the program office (471 Hollister Hall) or refer to the web site at [www.info.cornell.edu/ciw/ciw.html](http://www.info.cornell.edu/ciw/ciw.html).

### Courses at Ithaca College and Wells College

Full-time undergraduate students at Cornell may petition to enroll in courses at Ithaca or Wells College. Students pay regular full tuition to Cornell and only special fees to either Ithaca or Wells where applicable. Students are allowed to register for one course per term and a maximum of 12 credits in four years. Exceptions will be granted to Cornell students enrolled in methods and practice teaching courses at Ithaca and Wells, and those students pursuing a concentration in exercise

science through a specially arranged program with Ithaca College.

Cornell students are eligible to register only for Ithaca and Wells College courses that are relevant to their program and that do not duplicate Cornell courses. Ithaca and Wells College credit counts as Cornell credit, but not as Human Ecology credit. Students are accepted on a space-available basis. Participation in this program is not guaranteed, and both Ithaca and Wells have the right to accept or reject students for any reason deemed appropriate. The program is available only during the fall and spring semesters. For further information, contact the college registrar (145 MVR, 255-2235).

## Double-Registration Programs

### Five-Year BS/MPS in Health Care Administration

Undergraduates from HBHS and PAM are eligible to apply to the Sloan Program in their junior year for a five-year B.S./M.P.S. degree. During their senior year, students will take first-year Sloan courses which will be counted twice to satisfy both undergraduate as well as graduate requirements. Also during this year, students will complete a graduate school application and take the GRE or GMAT test. At the end of their senior year, students will graduate with a B.S. degree. If the students' grades and test scores are competitive, they will be notified during the spring semester of their senior year that they have been formally accepted into the Sloan Program.

Those students accepted will participate in a health care administration residency during the summer after earning their BS. The following year they will complete the second year of required Sloan courses and earn a Masters in Professional Studies with Cornell certifying completion of requirements in a degree in health administration.

### Double-Registration Program for Law

A small number of highly qualified applicants may be admitted to the Cornell Law School after only three years of undergraduate education. The requirements for admission under these circumstances are more stringent than for acceptance after four years of undergraduate study. Applicants must present outstanding qualifications and strong professional motivation. The junior year application follows the ordinary application procedures for Cornell Law School admission.

Interested students should contact the Law School director of admissions (Myron Taylor Hall, 255-5141) to discuss the admissions criteria. Because students accepted to this program will be spending their senior year away from Human Ecology, they need to plan ahead to ensure that distribution requirements for the BS degree will be met. Successful applicants need the approval of the college registrar in Human Ecology.

change by working with the director of undergraduate studies (DUS).

Faculty advisers are available to discuss course requirements and sequences, useful electives inside or outside the college, as well as future goals and career opportunities. Although advisers must provide the adviser key number (PIN) during course enrollment each term, it is the student's responsibility to make sure that his or her program meets graduation requirements for the major and the college. Directors of undergraduate studies in each department are available to answer questions about the advising system and the undergraduate major. Students who are exploring alternative majors should work closely with college counselors.

## Office of Admission, Student, and Career Services

The Office of Admission, Student, and Career Services (ASCS) (172 MVR) is a center for student orientation activities; academic, personal, and career advising; study abroad; and minority student programs.

Personal counseling, including exploration of problems or concerns of a personal nature, is available to all students. These ASCS counselors, however, are not psychiatrists or therapists; they are available to help you understand and navigate the Cornell system, and to offer support, assistance, and referral. Discussions are completely confidential. Appointments may be made through the receptionist in ASCS or by calling 255-2532.

In addition, ASCS provides support for several student organizations, including Human Ecology Ambassadors, the Mature Students Association, the Association for Students of Color, the Pre-professional Association towards Careers in Health, the Pre-law Undergraduate Society, the Orientation Committee, and Human Ecology Voices. ASCS also provides leadership to groups such as the Human Ecology Council. Primary responsibilities of the office are listed below:

**Academic advisement.** This service is provided to all students as an adjunct to faculty advising. Counselors can assist in course scheduling, academic planning, selection of a major, graduation requirements, and related issues.

**Undeclared majors.** Students who have not yet declared a major are urged to work closely with student services staff to plan their program of study. For the period a student is undeclared, counselors will provide assistance during course enrollment.

**Career counseling.** Career counseling is designed to help students clarify the relationship between personal skills, abilities, and career goals. Services are offered on an individual or group basis. Counselors assist in identifying career outcomes of the majors, discuss employment trends in various fields, and suggest course work appropriate to various career goals.

**Post graduate advisement.** Material pertaining to graduate and professional schools, graduate entrance examinations, courses of study, and career outcomes is readily available.

**Students with disabilities.** The college is committed to assisting students with disabilities. Students who have special needs are urged to see a counselor in ASCS when they arrive on campus.

**Financial aid.** Students who encounter financial difficulty or anticipate running short of funds may discuss their needs with a counselor. Complete information is available from the Office of Financial Aid, 203 Day Hall.

**The Human Ecology Alumni Association Cash Award Fund.** This fund provides small emergency grants to students in the college who have unexpected financial problems. Applications may be made through ASCS.

## Office of the Registrar

The Office of the University Registrar (222 Day Hall) maintains the official academic records for the university and provides students with their official university transcripts. Additional information is available on the university registrar's web site: [www.sws.cornell.edu/our/](http://www.sws.cornell.edu/our/). The college registrar (145 MVR) maintains students' official academic records, including the audit of progress toward the degree. The college registrar also provides services such as adding and dropping classes, correcting student records, issuing letters verifying that a student is registered, and approving the transfer of credit from other institutions.

## Minority Programming

The College of Human Ecology at Cornell University believes that a diverse community enriches the educational process for all members of the college community. Consequently, the college focuses particular efforts on a broad range of services for students of color. This includes not only recruitment but also services for students already on campus. Additionally, the college cooperates with university and New York State programs to assure Human Ecology students access to the vast array of services available here.

The professional staff of Human Ecology's Office of Admission, Student, and Career Services includes a director of multicultural programs who assists in the recruitment, admission, and enrollment of the most qualified and appropriate EOP (a program for New York State residents), African American, Native American, Hispanic American, and Asian American students to the college. All EOP students are invited to a special university-wide pre-freshman summer program that introduces accepted students to the Cornell campus and its classrooms. Services for current students include EOP/COSEP; academic, career, and personal counseling; recommendation letters for employment or graduate schools; and advising and support for student activities and programs.

The Human Ecology Partnership Program provides mentorship through a network of faculty and upper-class students to all incoming students of color, particularly during their first year. In addition, this office serves as a liaison to the Office of Minority Educational Affairs (COSEP), State Programs (EOP), and the Learning Strategies Center. Students are also encouraged to visit the college's Career Development Center to enhance personal career exploration and decision making.

Selected programs include the following:

**BBMTA** (Black Biomedical and Technical Association). A university organization that provides enrichment activities for minority students interested in pursuing medical careers. For more information, contact Janice Turner (55 Goldwin Smith, 255-5004).

## ACADEMIC ADVISING AND STUDENT SERVICES

### Faculty Advisers

Students who choose to major in a particular department are assigned an adviser whose special interests match their need. Students may change advisers as their own interests

**ASC** (Association for Students of Color). With the motto "Yesterday's vision, today's reality, and tomorrow's hope," the ASC was created to bring together Human Ecology students to provide a supportive foundation for enrollment, retention, graduation, and career placement of students of color.

The goals of the ASC are to increase communication between students of color, administration, and faculty; assist in increasing enrollment of students of color in Human Ecology; and assist in increasing the retention of students of color in Human Ecology and in their selected majors.

ASC's four committees are recruitment, student relations, career development, and peer advising. For more information contact Verdene Lee (172 MVR, 255-2532).

**Human Ecology Peer Partnership Program** was created in 1996 to help incoming students of color transition to the college and university. Small groups of freshmen, usually about six to eight students, are paired with faculty and upperclassmen. They meet weekly for discussions, guidance, and explorations of the Cornell campus and the Ithaca community. For more information, contact Verdene Lee (172 MVR, 255-2532); Gary Evans in the Department of Environmental Analysis (E306 MVR, 255-4775); or Lorraine Maxwell in the Department of Design and Environmental Analysis (E310 MVR, 255-1958).

**CSTEP.** The Collegiate Science and Technology Entry Program is the New York State program of enrichment for pre-med and pre-law New York State residents. Services are targeted at populations who are historically underrepresented in scientific, technical, health-related, or licensed professions or who are economically disadvantaged and who demonstrate interest in, and potential for, a CSTEP-targeted profession. For more information, contact Verdene Lee (172 MVR, 255-2532).

### Multicultural Education

Multicultural education broadens understanding of the world's many different societies as well as the various cultures of this country. Students take courses in the Cornell programs listed below that may be used to meet degree requirements. The college encourages students to incorporate courses from these cultural programs and from study abroad experiences in their degree programs. See information on study abroad opportunities.

Africana Studies and Research Center

American Indian Program

Asian American Studies Program

East Asia Program

Gender and Global Change

Institute for European Studies

Languages and Linguistics

Latin American Studies Program

Latino Studies Program

Peace Studies Program

Program in Jewish Studies

Program for Contemporary Near Eastern Studies

Religious Studies

South Asia Program

Southeast Asia Program

Women's Studies Program

### International Students

The International Students and Scholars Office (ISSO, B50 Caldwell Hall, 255-5243) provides a broad range of services to international students. All international students should maintain contact with the ISSO. Counselors in ASCS are also available for assistance.

International students in the College of Human Ecology are encouraged to meet with the college registrar to discuss any questions or concerns that they have about their academic record.

### Career Planning, Graduate and Professional School, and Job Search Services

**Counseling.** The Office of Admission, Student, and Career Services (ASCS, 172 MVR, 255-2532) provides career counselors and resources in the Career Development Center to help students assess possible career outcomes and access educational and extracurricular programs and resources to prepare for those careers. Assistance is available through one-on-one advising or group programming. The office works with the Cornell Career Services (103 Barnes Hall, 255-5221) to facilitate access to larger, university-wide programs.

**The Career Development Center** (CDC, 159 MVR, 255-2532) is a starting point for students looking for career information. Selected resources about career planning and job search techniques, general directories to begin job or graduate school searches, and information for alumni networking are housed here. Also available are Cornell Career Services handouts and registration forms, graduate and professional school testing booklets and registration packets, study abroad, and urban semester materials. Computer terminals provide access to web-based information regarding internship and employment opportunities, as well as graduate/professional schools.

The CDC is open most days from 9:00 A.M.-5:00 P.M. throughout the week, closing at 4:00 P.M. on Friday. Student career assistants are available during these hours to provide résumé and cover letter critiques, conduct mock interviews on video, and help navigate the library resources. Final critiques can be provided by a career counselor once the student review has been completed.

The CDC also provides information on the Urban Semester Program. Former participants comprise a portion of the CDC student staff and are available daily to answer questions about the program and its application process.

Selected services are listed below. They will help you investigate your interests, skills, and values as they relate to career options; provide you with useful information and tips for a successful summer or full-time job search; and provide access to employment opportunities. In addition, please refer to the college's career services web site: [www.career.cornell.edu/ccs/college\\_pages/human\\_ecology/](http://www.career.cornell.edu/ccs/college_pages/human_ecology/).

**Prelaw or Premed.** Students who consider themselves prelaw or premed are encouraged to join a student group affiliated with ASCS. Those interested in a law career can join PLUS (PreLaw Undergraduate Society) where

information on applying to law school, preparing for the LSAT, and examining career opportunities in law is provided. Students interested in pursuing a health-related career are welcome to join PATCH (Pre-professional Association Towards Careers in Health) which serves as a link to the university health careers network and provides guidance as students prepare for the MCAT, apply to medical school, and explore the various specialties of medicine.

**Extern Program.** Spend one day to one week over winter break shadowing an alum in a career field of your choice. Observe day-to-day activities, discuss specific jobs and careers, and sometimes obtain limited hands-on experience. This service is available to sophomores, juniors, and seniors.

**Student Jobs and Internships.** This is an electronic listing of information about internships and career-related summer and academic year employment that is exclusive to Cornellians.

**Alumni Career Presentations.** Alumni from the college come back to campus throughout the year to discuss their postgraduate or professional experiences. These meetings are ideal for exploring career outcomes of specific majors.

**AlumNet.** Students have access to Human Ecology alumni who can provide information on their careers and offer suggestions on a job search in their particular field or location. Students can query alumni on a host of variables and review selected alumni résumés to learn more about specific careers.

**Job Search Workshops.** These workshops are designed to help students market themselves for either summer or full-time job opportunities. Students learn how to conduct an effective job search, write a résumé and cover letter, and interview successfully.

**Jobtrak.** Jobtrak provides a listing of job opportunities available exclusively for Cornell students. Most are full-time jobs, although some summer opportunities are listed. Search by career field, geographic location, or both.

**On-campus Recruiting.** This service provides access to on-campus interviews with employers interested specifically in Human Ecology students as well as employers looking for Cornell graduates in general. Interviews occur primarily in banking and financial services, retail sales and management, and consulting, along with a few nonprofit organizations. All activity regarding on-campus recruiting is handled through Interactive, our web-based listing of employers.

**New York Recruiting Consortium.** Available exclusively to Human Ecology and Arts and Sciences students, the New York Recruiting Consortium offers interviews for full-time employment with employers involved in banking and financial services, retail sales/management, advertising, law, and consulting in New York City over winter break.

**NFP in New York City and NFP in Washington, D.C.** Speak with representatives from dozens of New York City or Washington, D.C. not-for-profit/public service agencies about work or internship opportunities in health, education, advocacy, government, and more (occurs only during the spring semester).

**Communications Consortium.** Interview with organizations in advertising, public relations, film, and radio and print media. National organizations come to Syracuse, New York to meet with you for individual appointments. During the spring semester, a job fair occurs the evening before.

## GRADUATION REQUIREMENTS AND POLICIES

It is important for students to track their graduation progress by comparing their current transcript with an appropriate curriculum sheet. Unofficial transcripts and curriculum sheets are available in the Human Ecology Registrar's Office (145 MVR Hall). The office also keeps a graduation progress record for each student and distributes a copy prior to the start of the fall term. Students should compare this record against their own worksheet for any errors or omissions.

### Cornell Credit Requirements

- To graduate, a student must earn a minimum of 120 academic credits. An unlimited number of credits that may be taken in Cornell's statutory colleges.
- Of the 120 credits required to graduate, at least 60 credits must be earned at Cornell University.

### Human Ecology Credit Requirements

- The college divides the 120 required academic credits into four general categories. (*Refer to curriculum sheets in your major for specific details on course selections. These sheets are available in the Office of the Registrar (145 MVR) and in the Office of Admission, Student, and Career Services (172 MVR) as well as on the college web site at [www.human.cornell.edu](http://www.human.cornell.edu).*)
  - Category I—College distribution requirements
    - Natural sciences
    - Social sciences
    - Freshman writing seminars
    - Humanities
    - Quantitative and analytical courses (math and statistics)
  - Category II—Requirements for a major
  - Category III—Electives (see definition below)
  - Category IV—Physical education
- Students must complete a minimum of 40 Human Ecology credits in Category II.
- Within Category II, students must earn nine credits in Human Ecology departments outside the major.
- These Human Ecology courses outside the major may not include HE 100, HE 101, or any 403 course. A maximum of three credits of special studies outside the major (400, 401, and 402), or any internship credit may be applied to this requirement. A maximum of five credits of HE 470, HE 480, HE 490, or PAM 392 may be used.

- Human Ecology courses used to satisfy distribution requirements in Category I:
  - WILL NOT count towards the 40-credit minimum in Category II.
  - Will satisfy the nine-credit requirement for course work outside the major.
 (*Exception:* B&S majors must refer to the "NOTE" on B&S curriculum sheets at the end of Category II requirements for appropriate guidelines.)

### Elective Credits

- Students have individual objectives in choosing courses beyond the minimum requirements of the major. The university is diverse; the departments, centers, and special programs numerous; the fields of study almost unlimited. Counselors and faculty advisers are available to discuss which courses may interest students and best round out their education.

Students should consult the index in this book to learn where different subjects are taught in the university. Some subjects are taught in more than one division.

Elective credits can be earned in the endowed and statutory divisions of Cornell.

### Endowed Colleges

Africana Studies and Research Center  
College of Architecture, Art, and Planning  
College of Arts and Sciences  
College of Engineering  
School of Hotel Administration  
Johnson Graduate School of Management

### Statutory Colleges

College of Agriculture and Life Sciences  
College of Human Ecology  
School of Industrial Relations  
College of Veterinary Medicine

- Students are allowed 21 credits of endowed electives; they may take more than 21, but will then be billed at the endowed rate of tuition for the extra credits.
- To the extent possible, courses taken in the endowed colleges will be counted to meet distribution requirements in Category I. More than 40 endowed credits taken in Category I, however, will count against the 21 allowed endowed elective credits.
- Endowed credits earned in Category II (even if the endowed courses are required for the major) and Category III will be counted against the 21.
- Required credits listed in the requirements charts for Categories I and II are the minimums; credits taken in excess of those minimums count toward the additional credits required in Category III to make a total of 120 credits (exclusive of physical education). **An unlimited number of credits that may be taken in the statutory colleges of Cornell.** Students may choose to take additional statutory credits and graduate with more than 120 credits.
- Elective credits in Category III earned in Cornell's endowed divisions during

summer session, study abroad credits, in absentia credits, and transfer credits do not count against the 21 credits allowed in the endowed divisions.

### Minimum Semester Requirements

- Freshmen and sophomore students are required to enroll in at least one Human Ecology course per semester (Economics 101 and 102 may be used to fulfill this requirement).
- Students must carry 12 credits each semester, excluding physical education, to be matriculated as full-time students (*Exception:* mature students).

### Requirements for Majors

- Students must fulfill the requirements specified for a major that are in effect at the time of their matriculation or thereafter.

### Grade Point Average

- Students must earn a minimum cumulative grade point average of 1.7 (C-) or better to graduate.
- To be eligible for the Dean's List, students must have a semester GPA of 3.7 with no F or U grades. At least 12 credits of letter grades are required.

### S-U Grade Options

- The S-U grading option may NOT be used for courses in Category I or required courses in Category II unless it is the only grade option offered for those courses. S-Us MAY be used for the nine credits of Human Ecology coursework outside of one's major and for electives in Category III.
- Students may apply no more than 12 credits of S-U towards graduation. If a required course is only offered S-U, it will not count towards this limit. Also, Honors Research 499 taken S-U does not count. Students may take more S-Us if they choose, but the additional credit cannot be applied towards graduation.

### Special Studies

- Students may use only 12 credits of 400, 401, 402, or 403 courses toward graduation.
- Additional credits of 400, 401, 402, or 403 courses can be taken but will not be applied towards graduation.

### "00" Courses

- "00" courses do not count towards graduation requirements but do count towards full-time semester status.

### Wells, Ithaca College, and Study Abroad Credits

Any credits earned with the Wells or Ithaca College exchange program are considered Cornell credits for the purpose of fulfilling the 60 Cornell credit graduation requirement. They can not be used for Human Ecology credit. Study Abroad courses may also count as Cornell credit.

### Physical Education

- Students must earn two credits of physical education within their first two semesters.

These two credits do not count as part of the 60 Cornell credits, or as part of the 120 total credits required for a degree, or towards full-time status. Students who matriculate at Cornell with 12 or more credits must complete only one credit of physical education. Students who transfer more than 25 credits (excluding AP credits) are not required to take physical education at Cornell, regardless of whether they took physical education at their previous college.

- Students must pass the university's swim test. Students who transfer more than 25 credits (excluding AP credits) are exempt. Refer to page 13 of this book for specifics.

### Advanced Placement Credit

Students can earn advanced placement credit from one of the following:

1. The requisite score on a departmental examination at Cornell (usually given during orientation week) or on a College Entrance Examination Board (CEEB) achievement test. The requisite scores for the CEEB exams are determined by the relevant department at Cornell, vary by subject, and are listed in the beginning of this book (page 7).
2. A regular course taught at an accredited college to college students and approved by the relevant department at Cornell. Some departments have delegated the review of courses to college staff according to guidelines they have formulated. Some departments review each request individually. Some departments accept credit from virtually all accredited colleges; some do not.
3. Credit from the international baccalaureates is evaluated individually.

**Note:** Cornell does not accept credit for courses sponsored by colleges but taught in high schools to high school students. This is true even if the college provides a transcript of such work. Students who have taken such courses may, however, take the appropriate CEEB test to qualify for credit as in paragraph 1 above. For information and limitations on Advanced Placement credit, see page 7 of this book.

### Foreign Language Study and Placement

Students who studied a foreign language before coming to Cornell and who want to continue must take either the CEEB test in that language or a departmental language placement test. The latter is given during orientation week in September and again in December, January, and May. Human Ecology students who plan to work with non-English-speaking people in this country or abroad often find it necessary to be proficient in another language. Many study abroad programs in non-English-speaking countries require the equivalent of two years of college-level language study. For more detailed information, see Advanced Placement Credits.

### Extramural Credit

Extramural credit is administered by the Office of Continuing Education and Summer Sessions (B20 Day Hall, 255-4987). Extramural credit is charged by the credit hour at the endowed tuition rate. Students may count only 15

credits of extramural credit toward their degree requirements. A student may enroll for extramural credit during the fall or spring semester only if he or she is not registered in the College of Human Ecology. For example, some students enroll for extramural credit before matriculating at Cornell.

An exception to this rule is credit earned in the Ithaca College or Wells College exchange. Students enrolled in these programs simultaneously maintain their status as students registered in the College of Human Ecology.

### Humanities

Only certain classes will count for Category I.D, Humanities. To determine eligibility the college uses the following definition: "The humanities include the study of literature, history (including art and design history), philosophy, religion, and archaeology. Critical, historical, and theoretical studies of the arts and design are considered humanities. Languages and creative or performing arts such as the writing of fiction or poetry, painting, sculpting, designing, composing or performing music, acting, directing, and dance are not considered humanities." Additionally, social science courses such as sociology, government, anthropology, and psychology are not considered humanities.

## PROCEDURES

### Registration and Course Enrollment

#### Registration Requirements

University registration is the official recognition of a student's relationship with the university and is the basic authorization for a student's access to services and education. Completion of registration is essential to enable the university to plan for and provide services and education, guided by the highest standards for efficiency and safety. Unauthorized, unregistered persons who use university services and attend classes have the potential to use university resources inappropriately and to displace properly registered students. In addition, the university assumes certain legal responsibilities for persons who participate as students in the university environment. For example, policy states that New York State health requirements must be satisfied. Because these requirements are intended to safeguard the public health of students, the university has a responsibility to enforce the state regulations through registration procedures.

The policy on university registration is intended to describe clearly the meaning of and the procedures for registration so that students can complete the process efficiently and be assured of official recognition as registered students. With the clear communication of the steps for registration, it is hoped that compliance will occur with a minimum of difficulty.

To become a registered student at Cornell University, a person must complete course enrollment according to individual college requirements; settle all financial accounts including current semester tuition; satisfy New York State health requirements; and have no holds from the college, the office of the Judicial Administrator, Gannett Clinic, or the Bursar.

Individuals must become registered students by the end of the third week of the semester. Cornell University does not allow persons who are not registered with the university in a timely manner to attend classes. The university reserves the right to require unauthorized, unregistered persons who attend classes or in other ways seek to exercise student privileges to leave the university premises.

#### Verification of Registration

Many insurance companies or scholarship funds require verification of full-time registration at Cornell. Should students need such verification, request an official letter from the Office of the University Registrar (B-7 Day Hall). Students who need letters of good standing should contact the Human Ecology Registrar's Office (145 MVR).

#### Bursar Bill

A bursar bill is sent to each student over the summer and summarizes what is owed to the university. The bursar bill can also be viewed through Just the Facts. Any questions regarding the bursar bill can be directed to the Bursar's Office (260 Day Hall, 255-2336). Initial New York State residency eligibility is determined during the admissions process, but the Bursar's Office will handle any request for a status change after matriculation.

#### Late University Registration

A student clearing his or her financial obligations after the deadline date on the bursar's bill is considered late. **Late registrants are assessed a finance charge on the bursar's bill starting from the date the bill is due.** According to university policy, all students must be registered before the end of the third week of classes. If for any reason a student registers after that time, the Bursar's Office will charge a late fee. **Students who fail to register by the third week of the term may be withdrawn from the university. Should withdrawn students wish to return, they must reapply through the admissions committee.**

#### Proration of Tuition

Except for mature students, it is seldom possible to have tuition prorated if a student carries fewer than 12 credits during a semester. (See the college registrar or counselors for more information.) Students of mature status may carry 6 to 11 credits without petitioning, but must request that their tuition be prorated. All requests should be made to the college registrar by the first week of classes and no later than the third week of the term.

### Course Enrollment

#### Initiating the process

Students are expected to make course requests for the subsequent semester during a specified time in the current semester. Those dates are advertised publicly and available on the University Registrar's web site ([www.sws.cornell.edu](http://www.sws.cornell.edu)). CourseEnroll takes place electronically, using software available through Just the Facts. During this time, each student must meet with his or her faculty adviser to discuss academic plans and to obtain the advising PIN code required for finalizing course requests. A student may enter and hold courses prior to entering their PIN.

Once the PIN number is entered, however, the schedule is locked and it is not possible to change until the add/drop period of the next term. Information on courses is readily available in this book and in the *Course and Time Roster* for each semester. Both of these publications can be accessed on the web through CUINFO.

Incoming students will receive tentative schedules upon their arrival to campus, and will meet with faculty advisers during the orientation period.

### Course Loads

The normal course load in the college ranges from 12 to 18 credits, although there is no limit to the number of statutory credits a student may take each semester. Nonetheless, students should avoid planning excessive workloads; the time required to keep abreast of courses tends to increase as the semester progresses. Classes cannot be dropped after the seventh week of classes without petitioning and by substantiating extenuating circumstances. Permission to drop late is rarely granted. Students should avoid the need to drop courses by taking on a reasonable workload and using the drop period to make changes in their program.

**Except for those with mature student status, students must carry at least 12 credits (exclusive of physical education) to maintain full-time status.** In special cases, a student may petition to carry between 8 and 12 credits. Forms for petitioning and advice on how to proceed are available from the Office of Admission, Student, and Career Services (172 MVR).

### Late Course Enrollment

Students who do not complete course enrollment during the CoursEnroll period usually must wait until the beginning of the next semester's add/drop period to enroll. Extensions are rarely granted and usually only for documented illness.

Students who do not meet the deadline for any reason should see the college registrar in 145 MVR as soon as possible. The college registrar can explain available options and course enrollment procedures under such circumstances.

**Note:** Students can review their course schedule via computer using Just the Facts. Students are responsible for checking their course schedule for accuracy of course numbers, credit hours, grade options, and other data. Errors must be corrected immediately. Procedures for correcting enrollment errors as well as for making any other changes as described below under Course Enrollment Changes.

### Course Enrollment Changes

It is to the student's advantage to make any necessary course enrollment changes as early in the term as possible. Adding new classes early makes it easier for the student to keep up with class work. Dropping a class early makes room in the class for other students who may need it for their academic programs.

Ideally, students evaluate their class workload carefully at the beginning of the term. If, in the first week or two, the instructors do not discuss the amount of material to be covered and the extent of student assignments, students need to ask about course requirements.

Some procedures required for course enrollment are also required for course enrollment changes. For example, students must obtain the instructor's permission for a course requiring it, and must complete the same forms for special studies courses. Aside from the procedures listed below for course enrollment changes, all drop/add forms for nutritional science majors must be signed by a faculty adviser.

### Deadlines for Add/Drop and Grade Option Changes

- During the first three weeks of the term, courses may be added, dropped, or the grade option changed.
- From the fourth through the seventh week of the term, courses may be dropped. **Grade option changes cannot be made at this point regardless of instructor's permission.**
- From the fourth week of the term, instructors have the right to consider students' requests for course changes on an individual basis or to announce at the beginning of the term a specific date between the fourth and seventh weeks beyond which they will no longer approve course changes.
- **After the eighth week of the term, no course changes may be made. Exceptions are considered only in extenuating circumstances.**
- After the seventh week of the term, any student granted permission to drop a course after petitioning will automatically receive a grade of W (Withdrawn), and the course will remain on the official transcript.

### Deadlines for Half-Term Courses

Students may drop half-term courses within the first three-and-one-half weeks of the course. Students may add a course after the first week of classes only with the permission of the instructor. After the first three-and-one-half weeks, students must petition to drop the course.

### Procedures for Add/Drop and Grade Option Changes

To make course changes during the add/drop period, a student must take the following five steps:

1. Obtain a drop/add form from the Human Ecology Registrar's Office (145 MVR).
2. Complete the form and take it to the appropriate office for a signature: for Human Ecology courses, the forms should be taken to the Human Ecology Registrar's Office; for courses outside the college, the forms should be taken to the appropriate departmental office of the college. **(Students in the Division of Nutritional Sciences must have their adviser's signature on all drop/add forms).**
3. Make sure their name is added to the list of enrolled students for a course being added, or removed from the class list for a course being dropped. Ask the person recording the change to sign the form.
4. Submit all signed forms to the Human Ecology Registrar's Office, including the forms for out-of-college courses. Changes are not completed until the signed forms

are filed in that office. Students who do not drop a course they no longer attend are in danger of receiving an F in the course.

5. Receive carbon copies of each course change form at the time it is submitted. **It is important for students to keep these copies to verify any changes.**

**To make course changes after the seventh week of the term, a student must file a general petition form.** (See the section, *Petition Process*.) Students are expected to attend classes and to do assigned work until the petition has been formally approved or denied.

### Time and Place for Drop/Add and Grade Option Changes

All students may adjust their schedules and grading options during the first three weeks of each semester. The university also holds a course exchange the day before fall classes begin where students have the opportunity to change their class enrollment in centralized locations. The Human Ecology Course Exchange is located in the MVR auditorium. For course exchange location for other colleges check the registration flyer each semester.

### Permission of Instructor

Certain courses may be taken only with the permission of the instructor as indicated in this book. Undergraduates must obtain permission of the instructor to take any graduate course. Students must request the instructor's permission during the CoursEnroll period by placing their name on a list maintained by the departmental advising assistant.

Students interested in taking a course in the Department of Art in the College of Architecture, Art, and Planning are required to register with the departmental secretary (100 Olive Tjadan Hall) before enrolling in the course. Seniors who want to take an elective course in the Johnson Graduate School of Management are required to obtain permission of the instructor on a course authorization form that the student then files with that school's registrar in Sage Hall.

### Course Enrollment while Studying Abroad

Students who plan to study abroad have several options available to enroll for their returning semester at Cornell. Students can consult with their faculty adviser before departure to consider the schedule of classes that they will take upon their return to campus. Once abroad, the student can use the web to access the Cornell University *Courses of Study* and the *Course and Time Roster* for the coming term. The roster is available on the web approximately the first week of October and the first week of March. Using these resources, the student can e-mail the course requests to the student's faculty adviser for approval; the faculty adviser can then e-mail them to the college registrar. A student who does not have access to the Internet while abroad can wait for the *Course and Time Roster* to arrive via airmail from the Cornell Abroad Office. The student can then e-mail, fax, or mail the course requests to their faculty adviser and ask the faculty adviser to submit the course requests to the college registrar. *The Course and Time Roster* becomes available only the day that pre-enrollment begins; thus,

students who depend on receiving the mailed copy will experience some delay in submitting their course requests.

### Oversubscribed Courses

Enrollment in many human ecology courses is limited. When a course is over enrolled, students are generally assigned on the basis of seniority or by criteria defined for each course as listed in this book. Students' professional goals may be considered. Those students not admitted to a course may be placed on a waiting list.

### Course Wait List

The Human Ecology Registrar's Office maintains waiting lists for selected courses to accommodate students who want to enroll in courses that have been filled. Waiting lists are maintained on a first-come, first-served basis without regard to seniority or other factors. To keep their names active on a waiting list, students must check in person every 48 hours with the Human Ecology Registrar's Office. Names of students who do not check in are automatically dropped from the list. Waiting lists are maintained only for the first three weeks of each semester.

### Limited Enrollment Classes

Students who do not attend the first two class sessions of courses with limited enrollment may be dropped from the course list. Students can avoid being dropped from a class by notifying the instructor that unavoidable circumstances have prevented their attendance.

### Special Studies Courses

Each department in the College of Human Ecology (DEA, HD, DNS, PAM, and TXA) offers special studies courses that provide opportunities for students to do independent work not available in regular courses. One of those courses, designated 300, Special Studies for Undergraduates, is intended primarily for students who have transferred from another institution and need to make up certain course work.

The other special studies courses are 400, Directed Readings; 401, Empirical Research; and 402, Supervised Fieldwork. Upper-class students normally take those courses, and a faculty member in the department in which the course is offered supervises work on an individual basis. It is important for students to use the appropriate course number (300, 400, 401, or 402) for a special project.

To register for a special studies course, a student obtains a special studies form from the departmental office where they plan to take the course. The student discusses the proposed course with the faculty member under whose supervision the study would be done and then prepares a plan of work. If the faculty member agrees to supervise the study, the student completes a special studies form and obtains signatures from the instructor, department chair, and faculty adviser before submitting the form to the Office of the College Registrar (145 MVR). The student must also submit a course registration form (add/drop form) to the Office of the College Registrar. Special studies forms are available in 145 MVR or in departmental offices. Add/drop forms are only available in 145 MVR.

Semester credits for special studies courses are determined by the number of contact hours the student has with the supervising faculty member (or a person designated by the faculty member). To earn one credit, a student must have the equivalent of three hours of contact time per week for 15 weeks (a total of 45 contact hours). For additional credit, multiply the number of credits to be earned by 45 to determine the number of contact hours needed for the course. **A student can only use 12 credits of 400, 401, 402, or 403 courses towards graduation and only three 400-, 401-, or 402-credits can be used to satisfy the nine-credit-outside-the-major requirement.** To register in a special studies course taught in a department outside the college, follow the procedures established by that department.

### Changes in status

#### General Petition Process

The petition process permits students to request exceptions to existing regulations. Petitions are considered individually, weighing the unique situation of the petitioning student with the intent of college and university regulations. In most cases, extenuating circumstances are needed for a petition to be approved if it requests waiving a deadline. These are situations beyond a student's control, such as a documented medical emergency.

Students can avoid the necessity to petition by carefully observing the deadlines that affect their academic program. See the **Course Enrollment Changes** section above for some of the important deadlines. If unsure about a deadline, check with a counselor in the Office of Admission, Student, and Career Services (172 MVR) or with the Office of Registrar's staff (145 MVR).

A general petition may be needed to carry fewer than 12 credits, drop a class after the seventh week deadline, add a course after the third week deadline, change a grade option after the third week deadline, be exempt from one or more of the college's graduation requirements, substitute a required course in one's major with another course, or stay an additional semester to complete the graduation requirements.

Although many kinds of requests can be petitioned in the college, options other than petitioning may be preferable in some cases. To explore whether a petition is appropriate, the student may discuss the situation with a college counselor or the college registrar.

If a student decides to submit a general petition, the form is available in the Office of the Registrar (145 MVR) and in the Office of Admission, Student, and Career Services (172 MVR). After completing the form and obtaining the required signatures, the student must turn the form in to the Office of the Registrar. Once a decision is made, a letter is placed in the student's mail folder indicating approval or denial of the petition.

Students may appeal the college registrar's decision to the Committee on Academic Status. Students who elect to appeal have the option of appearing in person before the committee to state their case. A member of the counseling staff can guide a student through this process.

### In Absentia Study

Under certain conditions, credit toward a Cornell degree may be given for in absentia study, that is, study done at an accredited institution away from Cornell after the student matriculates in the College of Human Ecology. In absentia study can be done during any term; fall, winter, spring, or summer.

To be eligible for in absentia study, a student must be in good academic standing and must receive permission in advance from the college registrar. Students not in good standing may study in absentia but will not receive transcript credit until the Committee on Academic Status has returned them to good standing. In some cases, students may petition for in absentia credit after the work has been completed, but there is no guarantee that such credit will be awarded without advance approval.

In absentia petition forms are available in the Human Ecology Registrar's Office (145 MVR). The student completes the form, attaches catalog descriptions for the courses that will be taken, then submits the form to the Human Ecology Registrar's Office (145 MVR). In absentia study during the fall or spring term carries a nominal administrative fee. (Contact the Bursar's Office, 260 Day Hall, for the current amount).

Students will receive a letter in their mail folder from the college registrar notifying them of the petition decision.

A student may take up to 15 credits in absentia as long as the courses do not duplicate courses already taken and the in absentia courses are applicable to the requirements of the college. Students who study abroad during the summer or winter term are limited to a maximum of nine in absentia credits. Study abroad during the fall or spring semester must be done through the Study Abroad Office and is not considered in absentia study.

On rare occasions a student's petition for more than 15 credits in absentia may be allowed: (1) the work taken represents a special educational opportunity not available at Cornell, (2) it relates to the student's particular professional goals, and (3) those goals are consistent with the focus of the college. The in absentia petition form is used to request more than 15 credits in absentia. Wells and Ithaca College credit are not considered in absentia credit and are not included in the 15 credit limit.

The college registrar requests approval from the appropriate department if a student wants to apply in absentia credit to requirements in his or her major. If in absentia credit is sought for a modern foreign language in which the student has done work, approval by the Department of Modern Languages and Linguistics (College of Arts and Sciences) must be obtained. The department will recommend the number of credits the student should receive and may require the student to take a placement test after returning to Cornell.

The student is responsible for having the registrar of the institution where in absentia study is taken send transcripts of grades to the Human Ecology Registrar's Office at 145 MVR Hall. Only then will credit be officially assessed and applied to the Cornell degree. Credit for in absentia study will be granted **only** for those courses with grades of C- or better. Only credits (not course names and

grades) for in absentia study appear on the Cornell University transcript.

A student who holds a Regents' or Children of Deceased or Disabled Veterans Scholarship may claim that scholarship for study in absentia if the study is done in a college in New York State and if it is for a maximum of 15 credits acceptable to the College of Human Ecology.

The rules regarding study in absentia apply to transfer students with the additional stipulation that at least 60 credits must be taken at Cornell. At least 40 of the 60 credits must be in the College of Human Ecology at Cornell unless the student has transferred equivalent human ecology credit. (No more than 20 credits of equivalent credit may be applied to the 40 credits required in human ecology course work.)

### Leaves of Absence

A student may request a leave of absence before the beginning of the semester or during the first seven weeks of the semester for which a leave is sought. A leave may be extended for a second semester by making a written request to the Office of Admission, Student, and Career Services. Note that in absentia study status and leave of absence status are mutually exclusive. Students on leave must notify the college registrar in MVR 145, in writing, of their intention to return to campus prior to the beginning of the semester. Those whose leave period has expired will be withdrawn from the college after the seventh week of the semester they were due back.

Students considering a leave of absence should discuss their plans with a counselor in the Office of Admission, Student, and Career Services. The counselor can supply the necessary forms for the student to complete and file with the Human Ecology Registrar's Office (145 MVR). Leaves initiated after instruction begins will be charged a percentage of the semester tuition. (Refer to Bursar Information in this book for a billing schedule.)

Requests for a leave of absence received after the first seven weeks of the semester, or requests for a leave of absence from students who have already had two semesters' leave of absence, will be referred for action to the Committee on Academic Status. The committee may grant or deny such requests, attaching conditions as it deems necessary. Leaves of absence after the first seven weeks are generally granted only when there are compelling reasons why a student is unable to complete the semester, such as extended illness.

A student who requests a leave of absence after the first seven weeks is advised to attend classes until action is taken on the petition. A student whose petition for a leave of absence is denied may choose to withdraw or to complete the semester. If the petition for leave is approved the student's courses will remain on the transcript with "W"s.

The academic records of all students who are granted a leave of absence are subject to review, and the Committee on Academic Status may request grades and other information from faculty members to determine whether the student should return under warning or severe warning or in good academic standing.

Under certain documented medical circumstances a student may be granted a **medical leave of absence**. Medical leaves are initiated by the student with Gannett Health Center. If Gannett Health Center recommends a medical leave for the student, the college registrar may grant the leave. A medical leave is for an indeterminate period of time not to exceed five years. Students who are granted a medical leave of absence are encouraged to maintain contact with a counselor in the Office of Admissions, Student, and Career Services (255-2532) to arrange their return to campus. The counselor will advise the student on procedures to obtain a recommendation from Gannett Health Center to the college registrar for the student's return. The student should plan sufficiently in advance to assure time for Gannett Health Center and the college registrar to consider their request.

### Withdrawal

A withdrawal is a termination of student status at the university. Students may voluntarily withdraw at any time by notifying a counselor in the Office of Admission, Student, and Career Services and filing a written notice of withdrawal in the Human Ecology Registrar's Office. A student considering such an action is urged to discuss plans with a counselor in the Office of Admission, Student, and Career Services (172 MVR).

In some instances a student may be given a withdrawal by the college registrar. Students who leave the college without an approved leave of absence, or do not return after the leave has expired will be given a withdrawal after the seventh week of the term in which they fail to register.

A student who has withdrawn from the college or who has been given a withdrawal by the college registrar and who wishes to return at a later date must reapply through the Office of Admissions for consideration along with all other applicants for admission. If the student was in academic difficulty at the time of the withdrawal, the request for readmission will be referred to the Committee on Academic Status for consideration, and that committee may stipulate criteria under which the student may be readmitted to the college.

## GRADES AND EXAMINATIONS

### Grade Definitions and Equivalents

The official university grading system uses a system of letter grades ranging from A+ to D- with F denoting failure. An INC grade is given for incomplete work and R is given at the end of the first semester of a two-semester class. If a student is given permission to withdraw from a class after the seventh week of the term a W is automatically assigned. Students can view their grades on Just the Facts after the semester has ended. Final spring semester grades are mailed to student's homes during the summer. See the "Grading Guidelines" section in this book for more information on the official university grading policies.

To compute a semester grade point average, first add up the products (credits hours X grade quality points) and divide by the total credit hours taken. Grades of INC, R, S, SX, U, UX, and W should not be included in any GPA calculations. A grade of F has no quality points, but the credits are counted thereby

lowering the average. A cumulative GPA is just the sum of all semester products divided by all credits taken. For further help on calculating a grade point average ask at the Office of the College Registrar (145 MVR).

These are the quality point equivalents:

A+ = 4.3	C+ = 2.3
A = 4.0	C = 2.0
A- = 3.7	C- = 1.7
B+ = 3.3	D+ = 1.3
B = 3.0	D = 1.0
B- = 2.7	D- = 0.7
	F = 0.0

### S-U Grades

Some courses in the college and in other academic units at Cornell are offered on an S-U basis; that fact is indicated in this book. Courses listed as SX-UX are only available on an S-U basis and may not be taken for a letter grade. University regulations concerning the S-U system require that a grade of S be given for work equivalent to a C- or better; for work below that level, a U must be given. **No grade point assignment is given to S, and S or U grades are not included in the computation of semester or cumulative averages.** A course in which a student receives an S is, however, counted for credit. No credit is received for a U. Both the S and U grades appear on a student's record. A student who is attempting to qualify for the Dean's List must take at least 12 credits of A-F grades. See the section, *Awards and Honors* for more details about the Dean's List.

**No more than 12 S-U credits will count towards a student's 120-credit graduation requirement.** However, a student may take more than one S-U course in any one semester. **S-U courses may be taken only as electives or in the nine credits required in the college outside the major** unless the requirements for a specific major indicate otherwise. Freshmen enrolled in English 137 and 138 (offered for S-U grades only) are permitted to apply those courses to the freshman writing seminar requirement. If a **required** course is only offered S-U, it will not count toward the 12-credit or four-course limit. To take a course for an S-U grade, a student must check the course description to make sure that the course is offered on the S-U basis; then either sign up for S-U credit during course enrollment, or file an add/drop form in the Human Ecology Registrar's Office before the end of the third week of the term. Forms are available in the Human Ecology Registrar's Office. After the third week of the term, students cannot change grade options.

**Note: students considering medical school or law school** should discuss selecting any S-U option with the college's pre-med/pre-law adviser, Paula Jacobs (172 MVR).

### Grades of Incomplete

A grade of incomplete is given when a student does not complete the work for a course on time but when, in the instructor's judgment, there was a valid reason. A student with such a reason should discuss the matter with the instructor and request a grade of incomplete.

**A grade of incomplete may remain on a student's official transcript for a maximum of two semesters and one summer after the grade is given, or until the**

awarding of a degree, whichever is the shorter period of time. The instructor has the option of setting a shorter time limit for completing the course work.

If the work is completed within the designated time period, the grade of incomplete will be changed to a regular grade on the student's official transcript. **If the work is not completed within the designated time period, the grade of incomplete automatically will be converted to an F.**

When a student wants to receive a grade of incomplete, the student should arrange a conference with the instructor (preferably before classes end and the study period begins) to work out the agreement. A form, called explanation for reporting a final grade of F or incomplete, which must be signed by both the instructor and the student, needs to be submitted by the instructor to the Human Ecology Registrar's Office. This form is submitted with the final grade sheets whenever a grade of incomplete is given. This form is for the student's protection, particularly in the event that a faculty member with whom a course is being completed leaves campus without leaving a record of the work completed in the course. If circumstances prevent a student from being present to consult the instructor, the instructor may, if requested by the student, initiate the process by filling out and signing part of the form and turning it in to the Human Ecology Registrar's Office with the grade sheet. Before a student will be allowed to register for succeeding semesters, he or she must go to the Human Ecology Registrar's Office to fill out and sign the remainder of the form.

If the work is satisfactorily completed within the required time, the course appears on the student's official transcript with an asterisk and the final grade received for the semester in which the student was registered for the course. A student who completes the work in the required time and expects to receive a grade must take the responsibility for checking with the Human Ecology Registrar's Office (about two weeks after the work has been handed in) to make sure that the grade has been received. Any questions should be discussed with the course instructor.

### Grade Disputes

Students who find themselves in disagreement with instructor over grades have several options:

1. Meet with the instructor and try to resolve the dispute.
2. Meet with the chair of the department in which the instructor has their appointment.
3. Meet the associate dean for undergraduate studies of the college in which the course was taught.
4. Meet with the university ombudsman (118 Simson Hall, 255-4321).

A student may also seek advice from their faculty adviser or with a counselor in the Office of Admission, Student, and Career Services (172 MVR).

### Repeating Courses

Students are allowed to register a second time for a course they have already passed or have received an "F." If a student has previously passed a course they are taking a second time,

the second registration will not count towards their degree requirements and the grade received will not be included in their cumulative GPA.

If a student enrolls in a course in which they previously received an F, the credits from the second registration will count towards their graduation requirements and the grade will be included in their cumulative GPA. The F will also remain on the record and will be included in the GPA.

### Examinations

Both the preliminary and final examination schedules are printed every semester in the *Course and Time Roster*. The current exam information is also available on the university web page at [www.cornell.edu/Academic/Academic.html#Class](http://www.cornell.edu/Academic/Academic.html#Class).

### Final Examinations

The following is quoted from the Cornell University Faculty Handbook, 1990, pages 66-67:

"The University Faculty long ago established, and has never reversed, the policy that each course should require a final examination or some equivalent exercise (for example, a term paper, project report, final critique, oral presentation, or conference) to be conducted or due during the period set aside for final examinations.

"Although not specifically prohibited, it is University policy to discourage more than two examinations for a student in one twenty-four hour time period and especially on any one day. It is urged that members of the faculty consider student requests for a make-up examination, particularly if their course is the largest of the three involved and thus has the strongest likelihood of offering a makeup for other valid reasons, i.e. illness, death in the family, etc.

Legislation of the University Faculty governing study period and examinations is as follows:

1. No final examinations can be given at a time other than the time appearing on the official examination schedule promulgated by the Registrar's Office without prior written permission of the Dean of the Faculty.
2. No permission will be given, for any reason, to schedule final examinations during the last week of classes or the designated study period preceding final examinations.
3. Permission will be given by the Dean of the Faculty to reschedule examinations during the examination period itself if requested in writing by the faculty member, but only on condition that a comparable examination also be given for those students who wish to take it at the time that the examination was originally scheduled. The faculty member requesting such a change will be responsible for making appropriate arrangements for rooms or other facilities in which to give the examination. This should be done through the Registrar's Office.
4. No tests are allowed during the last week of scheduled classes unless such tests are part of the regular week-by-week course program and are followed by an

examination (or the equivalent) in the final examination period.

5. Papers may be required of students during the study period if announced sufficiently far in advance that the student did not have to spend a significant segment of the study period completing them.
6. Faculty can require students to submit papers during the week preceding the study period.
7. Take home examinations should be given to classes well before the end of the regular term and should not be required to be submitted during study period but rather well into the examination period.

Students have a right to examine their corrected exams, papers, and the like, in order to be able to question their grading. They do not, however, have an absolute right to the return thereof. Exams, papers, etc., as well as grading records, should be retained for a reasonable time after the end of the semester preferably until the end of the following term, to afford students such right of review."

### Preliminary Examinations

The following is quoted from the Cornell University Faculty Handbook (1990), pages 65-66:

"Preliminary examinations are those given at intermediate times during a course. It is common to have three of these in a term to encourage review and integration of major segments of the course, to provide students with feedback on how well or poorly they are progressing, and to contribute to the overall basis for a subsequent final grade.

The most convenient times and places for "prelims" are the normal class times and classrooms. But many courses, particularly large ones with multiple sections, choose to examine all the sections together at one time and to design an examination that takes more than one class period to complete. In such cases the only alternative is to hold the prelim in the evening. This practice creates conflicts with other student activities, with evening classes and laboratories, and among the various courses that might choose the same nights.

To eliminate direct conflicts, departments offering large multisection courses with evening prelims send representatives annually to meet with the dean of the University Faculty to lay out the evening prelim schedule a year in advance. Instructors of smaller courses work out their own evening prelim schedules, consulting their students to find a time when all can attend. Room assignments are obtained by the faculty member through the contact person in his or her college or the Central Reservations Coordinator.

The policy governing evening examinations is as follows:

1. Evening examinations may be scheduled only on Tuesday and Thursday evenings and only after 7:30 P.M. without prior permission from the Office of the University Faculty.
  - a. Such prior permission is not, however, required for examinations or makeup examinations involving small numbers of students (generally 30 or fewer) provided that the scheduled time is

acceptable to the students involved and that an alternate examination time is provided for those students who have academic, athletic, or employment conflicts at the time scheduled.

2. Permission from the Office of the University Faculty to schedule on evenings other than Tuesdays and Thursdays or at a time prior to 7:30 P.M. will be granted only on the following conditions:
  - a. Conditions such as the nature of the examination, room availability, large number of conflicts, etc., justify such scheduling.
  - b. An alternate time to take the exam must be provided for those students who have academic, athletic, or employment conflicts at the time scheduled.
3. If there is a conflict between an examination listed on the schedule developed at the annual evening prelim scheduling meeting and an examination not on the schedule, the examination on the schedule shall have a priority, and the course not on the schedule must provide an alternate time to take the examination for those students faced with the conflict.
4. If there is a conflict between examinations, both of which are on the schedule developed at the annual evening prelim scheduling meeting or both of which are not on the schedule, the instructors of the courses involved must consult and agree on how to resolve the conflict. Both instructors must approach this resolution process with a willingness to provide an alternative or earlier examination.
5. Note that courses using evening examinations are strongly urged to indicate this in the course description listed in Courses and must notify students of the dates of such examinations as early as possible in the semester, preferably when the course outline is distributed."

## ACADEMIC STANDING

### Criteria for Good Standing

The College of Human Ecology has established a set of minimum academic standards which all students must meet or exceed each semester. These standards are as follows:

1. A student must maintain a semester and cumulative grade point average of 1.7 or higher.
2. A student must successfully complete at least 12 credits per semester, excluding physical education courses.
3. Freshmen and sophomore students must complete at least one human ecology course each semester. (ECON 101 and ECON 102 are considered Human Ecology courses).
4. A student must be making "satisfactory progress" toward a bachelor's degree.

Upon the completion of each semester the Committee on Academic Status (CAS) reviews each student's academic record to ensure the above academic standards are upheld. The committee then takes appropriate action for students whose academic achievement is

considered unsatisfactory as defined by the above criteria. The five voting faculty members, along with several nonvoting student services staff, consider each case individually before deciding on a course of action. The committee may take any of the following actions depending on the seriousness of the student's academic difficulties:

1. Take no action.
2. Return the student to **Good Standing**.
3. Place the student on a **Review List**, which means the case will be monitored throughout the semester.
4. Place the student on a **Warning** status.
5. Place the student on a **Severe Warning** status.
6. Place the student on a **Severe Warning with Danger of Being Dropped** status, implying that if the student does not show considerable improvement during the semester the committee will likely drop the student at the end.
7. **Suspend** the student for one or more terms during which the student may not register at Cornell (except in extramural status with CAS approval).
8. Permanently **withdraw** the student from the college and Cornell University.

Students who have been suspended or withdrawn have the right to appeal the decision in front of the committee during the appeals meeting. Students who have been placed on warning due to incomplete or missing grades may request their status be updated to good standing once they have cleaned up their records. These requests should be made with a general petition and submitted to the Office of the Registrar.

All students with a status will automatically be reviewed at the end of the subsequent semester. In most cases, students put on a warning, severe warning, or severe warning with danger of being dropped status will be informed of conditions that they are expected to fulfill in order to return to good standing. In general these conditions are that a student must earn a minimum GPA of 2.0, complete 12 credits, and not have any incomplete, missing, "F", or "U" grades on their semester record.

If a student who has been previously suspended wishes to return to the college he/she must submit a plan of study to the committee before being rejoined.

Students who have been withdrawn by CAS may request reconsideration and ask to be readmitted by the committee. Such students have three years from the date they were withdrawn to make this request. After three years, a former student must apply for admission through the Office of Admission. A student should discuss their situation with a counselor in the Office of Admission, Student, and Career Services (172 MVR). They should also talk with others who may be able to help them—faculty advisers, instructors, or a member of the medical staff. A student may also write directly to the committee (via the committee chair, whose name can be obtained from the college registrar) and present new or previously unknown information. Any information given to the committee is held in the strictest confidence.

### Academic Integrity

Academic integrity is a critical issue for all students and professors in the academic community. The University Code of Academic Integrity states that (1) a student assumes responsibility for the content and integrity of the academic work he or she submits, such as papers, examinations, or reports and (2) a student shall be guilty of violating the code and subject to proceedings under it if he or she:

- a. Knowingly represents the work of others as his or her own.
- b. Uses or obtains unauthorized assistance in any academic work.
- c. Gives fraudulent assistance to another student.
- d. Fabricates data in support of laboratory or fieldwork.
- e. Forges a signature to certify completion of approval of a course assignment.
- f. Uses an assignment for more than one course without the permission of the instructor involved.
- g. Uses computer hardware and/or software to abuse privacy, ownership, or user rights of others.
- h. In any manner violates the principle of absolute integrity.

The Academic Integrity Hearing Board, which consists of a chairperson, three faculty members, and three students, hears appeals from students who have breached the code. It also deals with cases brought directly to it by members of the faculty.

### Academic Records

Students may obtain their Cornell academic record in several ways. The **Cornell transcript**, which is the official record of the courses, credits, and grades that a student has earned can be ordered with no charge at the Office of the University Registrar (B7 Day Hall). For more information call (607) 255-4232. Students who merely want an unofficial working copy of their transcript can request a copy of their **record card** from the Office of the College Registrar (145 MVR). Students may also access their grades and course schedules electronically using **Just the Facts**. **Student should be in the habit of checking Just the Facts by the second week of every semester to confirm that their schedule and grade options are correct.**

The college also maintains a **graduation progress worksheet** for each student showing progress towards the degree. At the beginning of fall term continuing students receive a copy of their worksheet. It is important to check this document and bring any errors to the attention of the staff in the Office of the College Registrar (145 MVR).

### Access to Records

The Family Educational Rights and Privacy Act of 1974 assures students of privacy of their records. The law also assures students' access to their records. Information concerning a student's relationship with the university is considered restricted and may be released only at the student's specific written request. Restricted information includes the courses elected; grades earned; class rank; academic and disciplinary actions by appropriate faculty, student, or administrative committees;

and financial arrangements between the student and the university. Letters of recommendation are restricted information unless the student has specifically waived right of access.

Students who want additional information on access to their records may contact the Office of the College Registrar (145 MVR) or the Office of the University Registrar (B7 Day Hall). An inventory of those student records maintained by Cornell University offices in Ithaca, their location, and cognizant officer are available in the Office of the Dean of Students (401 Willard Straight Hall).

For specific information, refer to the university's policy, "Access to Student Information," at the following web address: [www.univco.cornell.edu/policy/ASI.html](http://www.univco.cornell.edu/policy/ASI.html), or talk with the college registrar in the Office of the College Registrar (145 MVR).

## ACADEMIC HONORS AND AWARDS

The college encourages high academic achievement and recognizes outstanding students in several ways.

### Honors

**Dean's List.** Excellence in academic achievement is recognized each semester by placing on the Dean's List the names of students who have completed satisfactorily at least 12 credits of letter grades and who have a semester grade point average of 3.7 or above. No student who has received an F or U in an academic course will be eligible.

**Kappa Omicron Nu** seeks to promote graduate study and research and to stimulate scholarship and leadership toward the well-being of individuals and families. As a chapter of a national honor society in the New York State College of Human Ecology, it stimulates and encourages scholarly inquiry and action on significant problems of living—at home, in the community, and throughout the world.

Students are eligible for membership if they have attained junior status and have a cumulative average of not less than B. Transfer students are eligible after completing one year in this institution with a B average.

Current members of Kappa Omicron Nu elect new members. Not more than 10 percent of the junior class may be elected to membership and not more than 20 percent of the senior class may be elected. Graduate students nominated by faculty members may be elected. The president of Kappa Omicron Nu has the honor of serving as First Degree Marshall for the college during May commencement.

**Bachelor of Science with Honors** recognizes outstanding scholastic achievement in an academic field. Programs leading to a degree with honors are offered to selected students by the Department of Human Development and the Division of Nutritional Sciences. Information about admission to the programs and their requirements may be obtained from the appropriate department or division. Students in other departments who wish to qualify for honors should contact Janet Brown-Aist (N118A MVR) during their sophomore year or the first semester of their junior year. Most honors candidates have a minimum grade point average of 3.3 and have demonstrated potential for honors-level

research. To graduate with honors a student must take approved courses in research methodology and evaluation, attend honors seminars, complete a written thesis, and successfully defend it in front of a committee.

**Bachelor of Science with Distinction** recognizes outstanding scholastic achievement. Distinction is awarded to students in the top 10 percent of the graduating class based on the last 60 credits earned at Cornell. The graduating class includes students who will complete requirements for Bachelor of Science degrees in January or May of the same academic year or the prior August. Names of seniors who meet these requirements are presented to the faculty of the college for approval.

The primary objectives of the honor society, **Phi Kappa Phi**, are to promote the pursuit of excellence in higher education and to recognize outstanding achievement by students, faculty, and others through election to membership. Phi Kappa Phi is unique in that it recognizes scholarship in all academic disciplines. To be eligible for membership students must rank in the top 10 percent of the senior class, or in the top 5 percent of the junior class. Provisions also exist for the election of faculty members and graduate students whose work merits recognition.

**Gamma Sigma Delta** is an honor society of the faculty in the colleges of Human Ecology, Agriculture and Life Sciences, and Veterinary Medicine. The common bond is promotion of excellence in work related to the quality of our environment and life based on "agriculture and the related sciences." The Cornell chapter recognizes the academic achievements of students, faculty, and alumni of those colleges with nominations for membership and with special awards. To be eligible, seniors must be in the upper 15 percent of their major. Five juniors with the highest grade point average in their college are also nominated.

**Class Rank** for the junior and senior classes is computed at the end of each semester. The college registrar processes class rank after final grades are issued and will not be adjusted if a student's academic record changes for any reason.

### Awards

**The Elsie Van Buren Rice Award in Oral Communication** is awarded for original oral communication projects related to the college's mission by undergraduate students in the College of Human Ecology. The contest is held each year in February and awards prizes totaling \$1,500.

**The Flora Rose Prize** is given biennially to a Cornell junior or senior whom, in the words of the donor, "shall demonstrate the greatest promise for contributing to the growth and self-fulfillment of future generations." The recipient will receive a cash prize of \$500.

**The Florence Halpern Award** is named for the noted psychologist, Dr. Florence Halpern, in recognition of her lifelong interest in "innovative human service, which betters the quality of life." In that spirit the award is presented to a undergraduate in the College of Human Ecology who has demonstrated, through supervised field work or community service, creativity in the search for solutions to human problems. The award carries a \$500 cash prize.

## COLLEGE COMMITTEES AND ORGANIZATIONS

### Student Groups and Organizations

Following are brief descriptions of some of the organizations that offer valuable experiences to human ecology students. Information about many other student activities on campus may be obtained from the Office of the Dean of Students (401 Willard Straight Hall).

**The American Council on Consumer Interests (ACCI)** offers a student membership for those interested in consumer economics. Contact the department of Consumer Economics and Housing for further information.

The **Cornell Design League** was formed to give students interested in apparel a chance to express their creativity outside of the classroom by producing a fashion show every spring. It has become concerned with all aspects of a professional presentation. Consequently, it also provides a creative outlet for those interested in graphics, photography, illustration, or theater production. Although many of its designers are part of the Department of Textiles and Apparel, the Design League welcomes people of all majors and schools.

Students have opportunities to work throughout the community in a variety of service capacities. They volunteer in day care centers, youth programs, health-related agencies, services for elderly people and people with disabilities, as well as nutrition programs, arts organizations, and Ithaca schools. For further information, contact the **Public Service Center** (200 Barnes Hall). Call 255-1148 for information about volunteer work or 255-1107 for information about work-study arrangements.

**Gamma Sigma Delta** is an honor society of the faculty in the colleges of Human Ecology, Agriculture and Life Sciences, and Veterinary Medicine. The common bond is promotion of excellence in work related to the quality of our environment and life based on agriculture and the related sciences. The Cornell chapter recognizes the academic achievements of students, faculty, and alumni of those colleges with nominations for membership and with special awards. To be eligible, seniors must be in the upper 15 percent of their major. Five juniors and sophomores with the highest grade average in their college are also nominated.

**Human Ecology Ambassadors** is a group of undergraduates who assist the Office of Admission, Student, and Career Services by participating in group conferences with prospective students to provide information from a student's perspective, assisting with recruitment and yield activities for potential students, conducting high school visitations, assisting with on-campus open-house programs for high school students and potential transfer students, helping with prospective students and alumni phonathons.

In addition, ambassadors attend regular meetings and serve as coordinators for activities in the Office of Admission, Student, and Career Services.

For information, contact the Office of Admission, Student, and Career Services (172 MVR, 255-5471).

The mission of the **Human Ecology Voices** is to build unity among students, faculty, and staff in the College of Human Ecology. Membership consists of all representatives of all other Human Ecology student organizations and other interested students. Patti Papapietro serves as Voices adviser from the Office of Admission, Student, and Career Services (172 MVR, 255-2532).

The **Human Ecology Mature Students Association** is an organization of students who are 24 years of age or older at the time of matriculation. Many mature students need to balance family, work, and other concerns with their academic efforts. The Mature Students Association strives to help by providing a forum for resource exchange and referral, support, socializing, and special projects depending upon expressed interest. These goals are pursued through seminars and informational meetings, the mature students listserv, supplementary orientation activities, liaison with other university offices, and the encouragement of informal networking. Contact Patti Papapietro in the Office of Admission, Student, and Career Services (172 MVR) for more information.

Students interested in the relationship between the physical environment and human behavior may join the **Human-Environment Relations Students Association (HERSA)**. For more information, contact the Department of Design and Environmental Analysis.

The **International Facility Managers Association (IFMA)** also has a student chapter. Membership information is available from the Department of Design and Environmental Analysis.

The **Association for Students of Color (ASC)** unites human ecology minority students to provide a supportive foundation for their enrollment, retention, graduation, and career placement. ASC members work toward these goals by:

- participating in admissions hosting programs and conducting high school visitations
- sponsoring presentations on career and graduate school outcomes of a human ecology education
- providing volunteer services to the Cornell and Ithaca communities,
- attending regular meetings and hosting annual fall and spring forums.

Contact Verdene Lee in the Office of Admission, Student, and Career Services (172 MVR, 255-2532) for more information.

The **Orientation Committee** consists of students and advisers interested in planning and implementing programs to acquaint new students with the College of Human Ecology. The committee is particularly active at the beginning of each semester and is always eager for new members. For information, contact Patti Papapietro in the Office of Admission, Student, and Career Services (172 MVR, 255-2532).

Membership in the **Sloan Student Association** is open to students interested in health care and related fields. Contact the president of the association (N222 MVR, 255-8013) for more information.

The **Students for Gerontology (SFG)** is composed of students from a wide variety of majors who are interested in career and

internship opportunities that contribute to the well-being of our aging population. Programs sponsored by this organization focus on developing linkages with community organizations and other student gerontology groups. SFG meets monthly. Contact Donna Dempster-McClain, faculty adviser, Bronfenbrenner Life Course Center, (259 MVR Hall, 255-5557), for further information.

The **Undergraduate Nutrition Organization (UNO)** promotes nutritional well-being through education, communication, and research. Members of the student chapter organize programs such as Food and Nutrition Day in March, host on-campus speakers in nutrition and health-related fields, and publish NutriNews, a campus-wide nutrition newsletter. The student chapter is open to all students interested in nutrition education. For further information contact Gail Canterbury (302 MVR, 255-5473).

### Committees and Councils

Several official organizations exist within the college to deal with matters of policy and to provide leadership in college planning. Most include elected student and faculty representatives; the actions of these various groups affect all students directly or indirectly.

The **Educational Policies Committee (EPC)** has two student members, one graduate and one undergraduate, who vote along with the faculty members on all matters relating to college academic policy. Recommendations are submitted to this committee regarding revisions in degree requirements, new curriculum changes, and new course approval.

Students also have the opportunity to serve on the **Admissions Policy Subcommittee**, and the **Academic Integrity Hearing Board**.

The **Selection Committee for the Chancellor's Award for Excellence in Teaching or Professional Service** handles the nomination and selection process for this prestigious yearly award. The committee consists of three teaching faculty members, one professional staff member, and three undergraduate members.

The **Human Ecology Alumni Association Board of Directors** includes two student board members—one junior and one senior. One student is selected each spring to begin a two-year term as student representative. The two students co-chair the board's Student Activities Committee, which works to increase the visibility of the Alumni Association among the student body by funding a variety of activities. The student members also bring an important perspective to board deliberations about programming and annual goals.

The **Committee on Academic Status** does not include student representatives, but has a faculty representative from each department. This committee is responsible for upholding the academic standards of the college and takes action when appropriate. The committee also hears appeals regarding student petitions and requests to be readmitted.

Courses with names and descriptions enclosed in brackets—[ ]—are not offered fall 2000 and spring 2001.

## INTERDEPARTMENTAL COURSES

### HE 100 Critical Reading and Thinking

Fall, spring, or summer. 2 credits. Enrollment limited. Priority is given to freshmen and sophomores; juniors and seniors are admitted with permission of the instructor. Letter or S-U grades.

The objective of this course is to enable students to increase critical reading and thinking abilities. Theory and research associated with a wide range of reading, thinking, and learning skills are examined. Emphasis is placed on developing and applying analytical and evaluative skills. Laboratory instruction is individualized and provides the opportunity to focus intensively on increasing comprehension, reading rate, and vocabulary.

### HE 101 College Achievement Seminar

6-week summer session. 2 credits. Enrollment limited to and required of Prefreshman Summer Program students. Letter or S-U grades.

The objective of this course is to improve the study and learning skills of incoming freshmen. Emphasis is placed on acquisition of skills necessary to achieve academic success. Topics include time management, note-taking, mapping, textbook comprehension, exam preparation, and exam strategies. The application of theory to the demands of Cornell course work is stressed. In addition, students are introduced to library and computing resources through hands-on projects.

## THE URBAN SEMESTER PROGRAM IN MULTICULTURAL DYNAMICS IN URBAN AFFAIRS

**Cornell in New York City** provides students with many study options that focus on multicultural dynamics in urban affairs. Experiential learning practices inform all courses of study. The options available include internships, individual and group community service projects, research, independent study, collaborative learning, and mentorships. Students must enroll concurrently in the three courses, HE 470, HE 480, and HE 490. Students learn through reflection and action. Program options are possible throughout the academic year, during winter break, and in the summer.

Courses of study enable students to seek out the relationship between theory and practice, apply theory to practice, identify and acquire professional practice skills, and learn about the impact of diversity on New York City. By applying ethnographic research techniques and methods, students learn to think conceptually, reflect on their actions, and be agents of change.

Several majors in the college require internships or encourage field study. Check with the director of undergraduate study of each major for more information. The Career Development Center in 159 MVR and counselors in the Office of Admission, Student, and Career Services in 172 MVR can help you find internships and provide more information on department opportunities and enrolling in Cornell in New York City.

### Multicultural Practice

Fall and spring semesters: HE 470

Students immerse themselves in internship activities three days each week. During small group seminars, students reflect on their internship experiences, focusing on multicultural issues, professional practice, and organizational culture.

### Multicultural Issues in Urban Affairs

Fall and spring semesters: HE 480

This course is a study of multicultural issues in urban affairs. It occurs as students enhance their academic foundations and their career development. Using a historic perspective, students examine issues of diversity (e.g., race, ethnicity, religion, class, gender, sexual orientation) in relationship to (1) professional life in different sectors of the economy; (2) the development of neighborhoods and communities; and (3) the basis of a just and democratic society. Readings focus on inner-city children and youth under a variety of multicultural-influenced conditions and contexts. Costs include travel to and from sites by public transportation at about \$3.00-6.00 each week.

### Communities in Multicultural Practice

Fall and spring semesters: HE 490

This course provides students with an understanding of community building processes and enables them to interact with children, youth, and their families in school settings. For a full day once each week, students work in inner city schools with teachers, staff, and children, providing community service. Student learning is focused on how to increase children's learning capacities and expand their horizons by teaching them to envision success. Students focus on the assets that inner city children bring to their school environment and learn how to mentor them. They help teach skills, knowledge, values, behaviors, and perspectives that school children must develop in order to enter the working world. Costs include public transportation costs to and from the various sites, about \$3.00-6.00 each week.

### The Winter Intersession in Community Service and Mutual Learning: The South Bronx-Banana Kelly/Cornell University Project in Community Building

Winter intersession: HE 402

Over the course of two intensive weeks, students participate in an ongoing community service project in the South Bronx with children of the Banana Kelly community. In carrying out community service, students participate with the director of the Cornell in New York City Program. Since the 1995 intersession, students have mentored children in an after-school program through projects that have documented the community with photographs, models, and stories. Each intersession, seven students mentor 15 ninth graders from Banana Kelly High School.

A photography exhibit was produced and circulated. In 1998, Cornell students and children produced three-dimensional models of their imagined community in future years and a book of essays and photographs.

### Fieldwork in Diversity and Professional Practice

Summer session: HE 406

Over the course of an eight-week summer session, students will participate in a literacy project in internships of their choosing and a weekly reflection seminar with the director of the Urban Semester Program in New York City.

### DESIGN AND ENVIRONMENTAL ANALYSIS

F. Becker, chair; W. Sims, director of undergraduate studies; P. Eshelman, director of graduate studies; A. Basinger, S. Danko, J. Elliott, G. Evans, K. Gibson, R. Gilmore, A. Hedge, J. Jennings, J. Laquatra, L. Maxwell

*Note: A minimal charge for photocopied course handouts may be required.*

**NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.**

#### DEA 101 Design Studio I

Fall. 3 credits. Each section limited to 18 students. Permission of instructor required for non-DEA majors. Priority given to interior design majors. Option I majors must take DEA 101 in fall of their first year. Approximate cost of materials, \$60. M W F 1:25-4:25; or T R 10:10-1:10. J. Elliott.

A studio course introducing the fundamental vocabulary and principles of two- and three-dimensional design. Students experiment with the development of form through problem-solving approaches.

#### DEA 102 Design Studio II

Spring. 3 credits. Limited to Option I DEA majors only. B- or higher in DEA 101 required to register for this course. Option I majors must take DEA 102 and 115 concurrently. Approximate cost of materials, \$200; shop fee, \$10. T R 1:25-4:25. P. Eshelman.

A studio course in three-dimensional design with an interior design emphasis. Problems in spatial organization are explored through drawings and models.

#### DEA 111 Making a Difference: By Design

Fall. 3 credits. Limit 285. Lab Fee: \$25.

M W F 11:15-12:05. S. Danko.

Students in any academic area examine how design affects their daily life and future profession. Course focuses on issues of leadership, creative problem-solving, and risk-taking through case study examination of leaders in business, education, medicine, human development, science, etc., who have made a difference using design as a tool for positive social change. Utilizing a micro to macro framework, students explore the impact of design from the person to the planet. Additional topics: nurturing innovation, visual literacy, design criticism, design and culture, semiotics, proactive/reflective decision making, and ecological issues.

#### DEA 115 Design Graphics

Spring. 3 credits. Option I DEA majors only. Prerequisite: DEA 101; must take DEA 102 and DEA 115 concurrently. Minimum cost of materials, \$100; technology fee \$10. M W F 9:05-11:00. K. Gibson.

A studio drawing course for interior designers. Discussion groups on drawing techniques are held to develop a visual understanding and vocabulary. Students are introduced to the functions of line, shape, and value. Perspective, spatial, and conceptual drawing are emphasized.

#### DEA 150 Introduction to Human-Environment Relations

Spring. 3 credits. M W F 12:20-1:10.

G. Evans.

This course analyzes environment and human behavior. We examine the interface of social and environmental sciences with application for the design and management of built and natural habitats. Topics include environmental effects on health, well-being, moods, aesthetics, performance, interpersonal relationships, and organizational effectiveness as well as the ecological consequences of human attitudes and behaviors. Visit our web site at [instruct1.cit.cornell.edu/courses/dea150](http://instruct1.cit.cornell.edu/courses/dea150).

#### DEA 201 Design Studio III

Fall. 4 credits. Limited to Option I DEA students. Prerequisites: DEA 101, 102, and 115 (minimum grades of B-) Recommended: DEA 111 and 150. Coregistration in DEA 203 is required. Minimum cost of materials, \$150; lab fee, \$40; optional field trip, approximately \$100. M W F 1:25-4:25. J. Jennings.

Beginning interior design studio. Focus is on development of basic proficiency in interior design skills. The course is structured around a series of elementary interior and interior-product design problems of three to five weeks in length.

#### DEA 202 Design Studio IV

Spring. 4 credits. Each section limited to Option I DEA students. Prerequisites: DEA 201 and 203. Prerequisites or corequisites: DEA 204. Minimum cost of materials, \$120; diazo machine fee, \$8; field trip fee. T R 12:20-4:25. R. Gilmore.

Second interior design studio. Emphasis of the course is on continued development of basic proficiency in design skills through exposure to a selected set of interior design problems of limited complexity. Each problem of three to five weeks duration is structured to emphasize different aspects of the design process.

#### DEA 203 Digital Communications

Fall. 2 credits. Priority given to DEA majors. Lab fee \$10. Sec 01 M 7:30-9:55 P.M., sec 02 W 7:30-9:55 P.M. J. Elliott.

Communication techniques for architectural and interior designers. Students study the various forms of communication used throughout the design process, from programming and conceptualization through construction documentation, and the most effective utilization of those forms. Both verbal and visual presentation methods are stressed.

#### DEA 204 Introduction to Building Technology

Spring. 2 credits. M 2:30-4:25. W. Sims.

Introduction to building technology for interior designers and facility managers. Emphasis is placed on developing basic understanding of buildings and building systems and their implications for interior design and facility management. Covers basic building types; structural systems; construction materials and methods; HVAC systems; plumbing, electrical, lighting, fire, and security systems; and telephone, computer, and other communication systems.

**DEA 243 Inside Out: The American Everyday Interior (also WOMNS 243, AM ST 243)**

Spring (odd-numbered years). 3 credits.  
Limited to 65. S-U option. T R 10:10–11:15.  
J. Jennings.

A study of late nineteenth- and twentieth-century everyday interiors in socio-cultural contexts, with an emphasis on design dissemination, consumer patterns, and gender issues. Topics include women's walls, power in the parlor, photographs as a mirror, and the love of the colonial.

**DEA 250 The Environment and Social Behavior**

Fall. 3 credits. Limited to 16. Priority order: DEA seniors, juniors, sophomores, freshmen. Prerequisite: DEA 150 or permission of instructor. Field trip fee \$65. T R 2:55–4:10. G. Evans.

A combination seminar-and-lecture course for students interested in the social sciences, design, or facility management. Through projects and readings the influence of environmental form on social behaviors such as aggression, cooperation, communication, community, and crime is explored. Also covered are the influences of stage in life cycle, family structure, and social class on environmental needs and purposes. Implications for the planning, design, and management of complex environments such as offices, hospitals, schools, and housing are emphasized.

**DEA 251 History and Theory of the Interior**

Fall. 3 credits. Limited to 65. Priority given to DEA majors. M W F 9:05–9:55.  
J. Jennings.

An historic study of interior architecture and design with an emphasis on the concepts of design theory. Overarching themes encompass several time periods from the classical to the twentieth century and isolate cultural patterns, spatial ideas, dialectics, design elements, and theorists. Reading, discussion, analytical exercises, essays, examinations. Field trip.

**DEA 300 Special Studies for Undergraduates**

Fall or spring. Credit to be arranged.  
Department faculty.

Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the head of the department, is filed at course registration or during the change-of-registration period.

**DEA 301 Design Studio V**

Fall. 4 credits. Prerequisites: DEA 111, 150, 201, 202, 203, and 204. Corequisite: DEA 303 and 459. Minimum cost of materials, \$150; shop fee, \$10; optional field trip, approximately \$100; diazo machine fee, \$8. T R 12:20–4:25. P. Eshelman.

Intermediate-level interior design studio. The course is organized around a series of interior and interior-product design problems of intermediate-level complexity, three to five weeks in duration. Focus is on development of design skills and on understanding of a selected set of generic problem types.

**DEA 302 Design Studio VI**

Spring. 5 credits. Prerequisites: DEA 301 and 303 or permission of instructor. Corequisite: DEA 305. Minimum cost of materials, \$150; shop fee, \$10; diazo machine fee, \$8. M W F 1:25–4:25.  
K. Gibson.

Intermediate-level interior design studio with an introduction to computer applications. Emphasis on using the microcomputer as a design tool in the process of creating and planning interior spaces. Continued development of design skills and problem solving in relation to a selection of problem types.

**DEA 303 Introduction to Furnishings, Materials, and Finishes**

Fall. 2 credits. W 2:30–4:25. R. Gilmore. Basic understanding of furniture types and systems; interior products and equipment such as work-stations; window, wall, and floor coverings; ceiling and lighting systems; and materials and finishes. Emphasis is placed on criteria for selection of furnishings, materials, and finishes for typical interior design and facility management problems.

**DEA 304 Introduction to Professional Practice of Interior Design**

Spring. 1 credit. W 2:30–4:25. A. Basinger. Introduction to organizational and management principles for delivery of interior design and facility management services. Covers basic organizational structures and basic management functions within interior design and facility management organizations, work flow and scheduling, business practices, legal and ethical responsibilities and concerns, contracts, basic contract documents such as working drawings and specifications, supervision of construction and installation, and cost estimation.

**DEA 305 Construction Documents and Detailing**

Spring. 2 credits. Prerequisites: DEA 301 and DEA 303. Corequisite: DEA 302. Minimum cost of materials \$50. Field trips, \$50. W 10:10–12:05. R. Gilmore. Comprehensive study of drafting, detailing, schedules, and specifications. Emphasis on drawing conventions, symbols, dimensioning, detailing of interior elements, terminology, construction methods, and materials.

**DEA 325 Human Factors: Ergonomics-Anthropometrics**

Fall. 3 credits. Recommended: DEA 150. T R 8:40–9:55. A. Hedge. Implications of human physical and physiological characteristics and limitations on the design of settings, products, and tasks. An introduction to engineering anthropometry, biomechanics, control/display design, work physiology, and motor performance. Course includes practical exercises and field project work.

**[DEA 350 Human Factors: The Ambient Environment**

Spring. 3 credits. Recommended: DEA 150. T R 8:40–9:55. Not offered spring 2001; next offered spring 2002. A. Hedge. An introduction to human-factor considerations in lighting, acoustics, noise control, indoor air quality and ventilation, and the thermal environment. The ambient environment is viewed as a support system that should promote human efficiency, productivity, health, and safety. Emphasis is placed on the implications for planning, design, and management of settings and facilities. Course includes a field project.]

**DEA 374 Elements of Business for Non-Business Majors (also H ADM 104)**

Spring. 1 credit. Limited to 36. Weekend course. P. Rainsford.

Focus will be to provide hands-on skills and knowledge about how to start or run a small business. Especially appropriate for students interested in professional careers such as architecture, design, writing, art, engineering, law, and other service businesses. Course structure will use a computer-based management simulation game and will require students to work in management teams of six to start and operate a hotel. Introductory-level course. No previous business experience or computer knowledge required. Students are required to attend all sessions and complete a paper, which will be due a week after conclusion of the course.

**DEA 400–401–402–403 Special Studies for Undergraduates**

Fall or spring. Credits to be arranged. S-U grades optional. Department faculty. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of DEA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department head and filed at course registration or within the change-of-registration period after registration in 145 MVR, College Registrar's Office, along with an add/drop slip. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department head is necessary. Students, in consultation with their advisers and the instructor should register for one of the following subdivisions of independent study.

**DEA 400 Directed Readings**

For study that predominantly involves library research and independent reading.

**DEA 401 Empirical Research**

For study that predominantly involves data collection and analysis or laboratory or studio projects.

**DEA 402 Supervised Fieldwork**

For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**DEA 403 Teaching Apprenticeship**

For study that includes teaching methods in the field and assisting faculty with instruction. Students must have demonstrated a high level of performance in the subject to be taught and in the overall academic program.

**DEA 407 Design Studio VII**

Fall. 5 credits. Prerequisites: DEA 302, DEA 303, DEA 304, and DEA 305. Minimum cost of materials, \$150. Diazo machine fee \$8. Field trip \$50. T R 12:20–4:25.  
R. Gilmore.

Advanced interior design studio organized around a series of interior design problems, three to five weeks in duration. Focus is on development of design skills and on competence in solving a selected set of generic interior design problem types.

**DEA 408 Design Studio VIII**

Spring. 5 credits. Prerequisites: DEA 301, 302, 303, and 304. Minimum cost of materials, \$150; diazo machine fee, \$8 per semester. T R 12:20-4:25. S. Danko.

Design-problem-solving experiences involving completion of advanced interior design problems. Problems are broken into five phases: programming; schematic design and evaluation; design development, including material and finish selection; design detailing; and in-process documentation and the preparation of a professional-quality design presentation.

**DEA 422 Ecological Literacy and Design**

Spring. 3 credits. Letter grade only. Field trips approximately \$25. T R 10:10-11:40. J. Elliott.

Design oriented lecture/seminar course for students becoming design professionals that will discuss their effect on a biophysical world. Objectives are to develop knowledge of environmental issues, construct conceptual frameworks for analysis, and demonstrate how ecological knowledge can be applied to the practice of design. Seminars, readings, field trips, and group projects.

**DEA 430 Furniture as a Social Art**

Spring. 3 credits. Limited to 15. Permission of instructor. Cost of building materials: \$150. Students must also sign up for 2 hours of DEA shop time each week for model building. M W 10:10-12:05. P. Eshelman.

This course examines furniture as a design process that emphasizes support of human behavior. Information about specific social issues including health care, aging, child care, and education is the starting point for assignments. Students analyze products currently available and design new furniture. Also covered are furniture materials, fabrication processes, and manufacturing techniques.

**DEA 443 Cultural Construction: The Nineteenth- and Twentieth-Century American Interior**

Spring (even-numbered years). 3 credits. Enrollment limited to 15 students. S-U option. Field trips \$50. T R 10:10-11:30. Next offered spring 2002. J. Jennings.

A topical study of nineteenth- and twentieth-century American vernacular interiors, exploring the relationship between interior design theory and social and cultural values. Sources include historic interiors, literature and art, and architectural and material culture studies. Reading, discussion, comparative analysis, and critical writing.

**DEA 451 Seminar on Facility Planning and Management**

Fall. 1 credit. Letter grades only. M 3:35-4:25. F. Becker, W. Sims.

Series of seminars led by Cornell faculty and other facility management professionals. Topics include strategic space planning, space standards, office automation, project management, energy conservation, environmental protection, and regulatory issues.

**DEA 453 Planning and Managing the Workplace**

Spring. 3 credits. Prerequisite: limited to juniors and seniors. Purchase of course packet required. F 10:10-1:10. F. Becker.

Intended for students interested in the planning, design, and management of facilities for complex organizations. The purpose of the course is to explore how characteristics of the

workplace, including building, design, furniture and equipment, and policies governing their use and allocation, affect individual and organizational effectiveness. Special topics, such as the human implications of new information technologies and work at home, are also covered.

**DEA 454 Facility Planning and Management Studio**

Spring. 4 credits. Prerequisite: DEA 459 or permission of instructor. Letter grades only. Minimum cost of materials, \$100. T R 1:25-4:25. W. Sims.

For advanced undergraduates interested in facility planning and management. Purpose is to provide basic tools, techniques, and concepts useful in planning, designing, and managing facilities for large, complex organizations. Covers strategic and tactical planning for facilities, organizing to deliver facility management services, project management, space forecasting, space allocation policies, programming, relocation analysis, site selection, building assessment, space planning and design, furniture specifications, and moves. Sociopsychological, organizational, financial, architectural, and legal factors are considered.

**DEA 455 Research Methods in Human-Environment Relations**

Fall. 3 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25-2:15. G. Evans.

The course develops the student's understanding and competence in the use of research and analytical tools to study the relationship between the physical environment and human behavior. Emphasis is placed on selection of appropriate methods for specific problems and the policy implications derived from research. Topics include research design, unobtrusive and obtrusive data-collecting tools, the processing of qualitative and quantitative data, and effective communication of empirical research findings.

**DEA 459 Programming Methods in Design**

Fall. 3 credits. T R 10:10-11:25. W. Sims. Introduction to environmental programming. Emphasis on formulation of building requirements from user characteristics and limitations. Diverse methods for determining characteristics that will enable a particular environmental setting to support desired behaviors of users and operators. Methods include systems analysis, soft system, behavior circuit, behavior setting, and user characteristic approaches. Selection of appropriate methods to suit problems and creation of new methods or techniques are emphasized.

**DEA 470 Applied Ergonomic Methods**

Spring. 3 credits. Prerequisite: DEA 325. T R 2:55-4:10. A. Hedge.

This course covers ergonomics methods and techniques and their application to the design of modern work environments. Emphasis is placed on understanding key concepts. Coverage includes conceptual frameworks for ergonomic analysis, systems methods and processes, a repertoire of ergonomics methods and techniques for the analysis of work activities and work systems. This course is the undergraduate section of DEA 670, which will share the same lectures but will meet for an additional hour. DEA 670 will have additional readings and projects.

**DEA 499 Senior Honors Thesis**

Fall or spring. Variable credit. Prerequisite: permission of thesis advisor and DEA director of undergraduate studies. Letter grades only.

This is an opportunity for DEA majors to undertake original research and scholarly work leading to the preparation of a thesis. Students work closely with their thesis adviser on a topic of interest.

**DEA 600-603 Special Problems for Graduate Students**

Fall or spring. Credit to be arranged. S-U grades optional. Department faculty. Independent advanced work by graduate students recommended by their special committee chair and approved by the head of the department and instructor.

**600: Special Problems.** For study of special problems in the areas of interior design, human environment relations, or facilities planning and management.

**601: Directed Readings.** For study that predominantly involves library research and independent study.

**602: Graduate Empirical Research.** For study that predominantly involves collection and analysis of research data.

**603: Graduate Practicum.** For study that predominantly involves field experiences in community settings.

**DEA 643 Cultural Construction: The Nineteenth- and Twentieth-Century American Interior**

Spring (even-numbered years). 4 credits. Enrollment limited to 15 students. S-U option. Field trips \$50. T R 10:10-11:30. Next offered spring 2002. J. Jennings.

A course intended for graduate students who want a more thorough grounding in the history of vernacular interiors than is provided by DEA 443. Each student is required to attend DEA 443 lectures, meet with the instructor and other graduate students for an additional class hour each week, and do additional readings and projects.

**DEA 645 Dancing Mind/Thinking Heart: Creative Problem-Solving Theory and Practice**

Spring. 3 credits. Limited to 15 graduate and advanced undergraduate students. Prerequisite for undergraduates: permission of instructor. T 4:30-7:30. S. Danko.

Focuses on thinking processes and techniques that support creative problem solving. Theories of creative behavior and critical thinking are examined. Course is highly participatory and experiential by design. Weekly discussions include hands-on applications of theories on short problems tailored to the backgrounds of the students. Primary goal is to demonstrate perceptual, emotional, intellectual, cultural, and environmental blocks to creative thinking and expand the student's repertoire of creative problem solving strategies for use in day-to-day professional practice. Case studies of creative individuals and organizations from a variety of fields are presented.

**DEA 648 Advanced Applications in Computer Graphics**

Fall. 3 credits. Limited to 18 graduate and advanced undergraduate students. Prerequisites for undergraduates: DEA 302 or permission of instructor. Minimum cost of materials \$150. Lab fee \$35. T R 9:05–12:05. K. Gibson.

Advanced use of computer technology to create and analyze interior environments. Emphasis will be on the use of 3-D modeling, animation, photorealistic rendering, and emerging technologies to investigate dynamic design issues.

**DEA 650 Programming Methods in Design**

Fall. 4 credits. T R 10:10–11:25. L. Maxwell. A course intended for graduate students who want a more thorough introduction to environmental programming methods than is provided by DEA 459. Each student is required to attend DEA 459 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 459 for more detail.

**DEA 651 Human Factors: Ergonomics-Anthropometrics**

Fall. 4 credits. Recommended: DEA 150 and a 3-credit statistics course. T R 8:40–9:55. A. Hedge.

A course intended for graduate students who want a more thorough grounding in human factors than is provided by DEA 325. Each student is required to attend DEA 325 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 325 for more detail.

**[DEA 652 Human Factors: The Ambient Environment**

Spring. 4 credits. Recommended: DEA 150. T R 8:40–9:55. Not offered spring 2001; next offered spring 2002. A. Hedge.

A course intended for graduate students who want a more thorough grounding in human factors considerations than is provided by DEA 350. Each student is required to attend DEA 350 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. For detailed description, see DEA 350.]

**DEA 653 Planning and Managing the Workplace**

Spring. 4 credits. Letter grades only. Purchase of course packet required. F 10:10–1:10. F. Becker.

Intended for graduate students who want a more thorough grounding in the planning, design, and management of facilities for complex organizations than is provided by DEA 453. Each student is required to attend DEA 453 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 453 for more detail.

**DEA 654 Facility Planning and Management Studio**

Spring. 4 credits. Prerequisite: DEA 459/650 or permission of instructor. Letter grades only. Minimum cost of materials, \$100. For graduate students in facility planning and management. T R 1:25–4:25. W. Sims.

For description, see DEA 454.

**DEA 656 Research Methods in Human-Environment Relations**

Fall. 4 credits. Prerequisites: DEA majors only or permission of instructor, and a statistics course. M W F 1:25–2:15. G. Evans.

Intended for graduate students who want a more thorough understanding of the use of research to study the relationship between physical environment and human behavior than is provided by DEA 455. Each student is required to attend DEA 455 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 455 for more detail.

**DEA 659 Seminar on Facility Planning and Management**

Fall. 1 credit. For graduate students interested in careers in facility planning and management. Letter grades only. M 3:35–4:25. F. Becker, W. Sims.

Series of seminars led by Cornell faculty members and other professionals directly involved in facility planning and management. Topics include strategic and tactical facility planning, space standards, project management, computer and facility management, facility maintenance and operations, energy conservation, and building systems.

**DEA 660 The Environment and Social Behavior**

Fall. 4 credits. Prerequisite: DEA 150 or permission of instructor. Field trip fee \$65. T R 2:55–4:10. G. Evans.

Intended for graduate students who want a more thorough understanding of the influence of environmental form on social behavior than is provided by DEA 250. Each student is required to attend DEA 250 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 250 for more detail.

**DEA 668 Design Theory Seminar**

Spring. 3 credits. Enrollment limited to 25 students. T R 10:10–11:25. J. Jennings.

Directed toward advanced undergraduate and graduate students with interest in the theory of design. The purpose is to provide an understanding of major theoretical ideas underlying design movements of the twentieth century. Explores these ideas through readings, lectures by faculty and visitors, student presentations of research papers, and seminar discussions.

**DEA 670 Applied Ergonomics Methods**

Spring. 4 credits. Enrollment limited to 20. Prerequisite: DEA 651. T R 2:55–4:10. A. Hedge.

Intended for graduate students who want a more thorough understanding of applied ergonomics methods than is provided by DEA 470. Each student is required to attend DEA 470 lectures, meet with the instructor and other graduate students for an additional class each week, and do additional readings and projects. See DEA 470 for more detail.

**DEA 899 Master's Thesis and Research**

Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Department graduate faculty.

## HUMAN DEVELOPMENT

J. Eckenrode, chair; R. Savin-Williams, director of graduate studies; J. Haugaard, director of undergraduate studies; C. Anderson, U. Bronfenbrenner, J. Brumberg, R. Canfield, S. Ceci, M. Cochran, S. Cornelius, D. Dempster-McClain, R. Depue, J. Doris, J. Garbarino, K. Greene, S. Hamilton, C. Hazan, B. Koslowski, L. C. Lee, B. Lust, P. Moen, K. Pillemer, C. Raver, H. Ricciuti, S. Robertson, J. Ross-Bernstein, E. Wethington, W. Williams

**NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.**

**HD 115 Human Development**

Fall or summer. 3 credits. S-U grades optional. M W F 1:25–2:15. J. Garbarino.

Provides a broad overview of theories, research methods, and current knowledge of human development from conception into adulthood. Course material covers infancy, childhood, and adolescence. Topics include biological, intellectual, linguistic, social, and emotional development as well as the cultural, social, and interpersonal contexts that affect developmental processes and outcomes of these domains.

**HD 116 Exploring Human Development**

Fall. 1 credit. Letter grades only. Limited to Human Development freshmen. TBA. HD faculty.

This course is a series of small group discussions with HD freshmen and a HD faculty member. Each faculty member will set the topics and style of discussion. Discussion groups will meet one hour a week, each week of the fall semester. No exams will be given. Grading will be done on attendance, participation, and short written assignments.

**HD 216 Human Development: Adolescence and Youth**

Spring. 3 credits. Prerequisite: HD 115 or Psychology 101 or permission of instructor. S-U grades optional. T R 11:40–12:55. C. Schelhas-Miller.

Provides a broad overview of theories, research, and issues in the study of human development from early to late adolescence (youth). Attention is focused on the major biological, cognitive, and social changes during adolescence; the psychosocial issues of adolescence, including identity, autonomy, intimacy, sexuality, achievement, and problems; and the contexts in which adolescent development occurs, particularly families, peer groups, schools, work, and popular culture. Empirical research, theories, case studies of the lives of real adolescents, and, to a lesser degree, public policies are discussed.

**HD 218 Human Development: Adulthood and Aging**

Spring. 3 credits. Prerequisite: HD 115. S-U grades optional. T R 11:40–12:55. S. Cornelius.

Provides a general introduction to theories and research in adult development and aging. Psychological, social, and biological changes from youth through late adulthood are discussed. Both individual development within generations and differences among generations are emphasized.

**HD 230 Cognitive Development**

Spring. 3 credits. S-U grades optional.

Prerequisites: HD 115 or Psychology 101.

T R 11:40-12:55. Staff.

This course surveys theories and research in perceptual and cognitive development from infancy through adolescence. Extensive coverage of infant perception, cognition, and learning during the first two years of life forms the foundation of the course. Significant linkages between brain development and behavioral development are covered when possible. Language, memory, concepts, and problem solving are covered in the second half of the semester. The course is intended to serve as a foundation for more advanced study in cognitive development, but also as an overview for students whose primary interests lie in other areas.

**[HD 233 Children and the Law**

Fall. 3 credits. Prerequisites: HD 115 and an introductory statistics course. W 2:30-5:00. S. Ceci.

This course examines psychological data and theories that shed light on the practical issues that arise when children enter the legal arena. It attempts to integrate theories, research, and methodology from several areas of psychology including, developmental, cognitive, social, and clinical. This course also attempts to examine the degree to which basic research can (and should) be used to solve applied issues. The topic of children and the law provides an opportunity to meet all these requirements. Rapid changes involving child witnesses in our legal system have forced social scientists to bring their work into the courtroom. At the same time, bringing this fray into the legal system has changed the course of research and thinking about certain aspects of child development and cognition: it has encouraged researchers to tackle new issues and to develop innovative experimental paradigms. Selected topics to be covered include: memory development, suggestibility, theory of mind, childhood amnesia, expectancy formation, symbolic representational ability, and repression. Several actual cases involving child witnesses will be presented to illustrate the application of scientific data to the courtroom. Because of the heavy use of case materials; video and textual coverage of actual trials, it is expected that students will devote more than the usual number of hours to this course.]

**HD 241 History of Childhood in the United States (also HIST 271, AM ST 241)**

Spring. Recommended for sophomores and juniors. 3 credits. M W 8:40-9:55. J. Brumberg.

An examination of childhood and adolescence in various historical contexts: Puritan New England, slave plantations, evangelical revivals, the Western frontier, Victorian families, reform schools, early high schools and colleges, the sexual revolution of the 1920s, immigrant communities, the Depression and World War II, the 1950s, and more recent social and cultural changes affecting families. Students will evaluate continuities and changes in the lives of American children as well as changing scientific ideas about children. Students have an opportunity to reflect on and write about their own childhood and adolescence. This course is designed to give students a humanities perspective on approaches to childhood.

**HD 242 Participation with Groups of Young Children**

Fall or spring. 4 credits. Limited to 20 students (limit depends on availability of placements and of supervision). Prerequisites: HD 115 and permission of instructor. S-U grades optional. W 1:25-3:30. J. Ross-Bernstein.

This course is designed to integrate developmental theories with supervised experience in child care centers, with the intention of enhancing the student's abilities to understand and to relate effectively with young children. This class involves participation, observation, reflection, reading, writing, and sharing of viewpoints. Placements are in local nursery schools, day care centers, Head Start programs, and kindergartens.

**HD 250 Families and the Life Course (also SOC 251)**

Spring. 3 credits. S-U grades optional. M W 2:55-4:10. E. Wethington.

This course provides an introduction to social scientific research on family roles and functions in American society. Topics include the history of the family, family change over the life course, and the influence of cultural and economic forces on families.

**HD 251 Social Gerontology: Aging and the Life Course**

Spring. 3 credits. Limited to 60 students. Strongly recommended: HD 250 or equivalent to be determined by instructor. S-U grades optional. T R 8:40-9:55. D. Dempster-McClain.

This course analyzes the social aspects of aging in contemporary American society from a life course perspective. Topics to be covered include: (1) an introduction to the field of gerontology, its history, theories, and research methods, (2) a brief overview of the physiological and psychological changes that accompany aging, (3) an analysis of the contexts (such as family, friends, social support, employment, volunteer work) in which individual aging occurs, including differences of gender, ethnicity, and social class. (4) The influences of society on the aging individual. Guest speakers will provide an introduction to various careers in the field of gerontology.

**HD 253 Gender and the Life Course**

Fall. 3 credits. S-U grades optional. M 7:30-10:00 P.M. T. Mitrano.

We will examine the complex interplay between gender and age as well as the social construction of the life course. Students explore the relationship between social change and individual lives, observing the significance of two key institutions—work and family—in shaping basic life choices and their consequences throughout the life course. Implications of key life trajectories and transitions for individual lives and for social policy will also be discussed.

**[HD 258 History of Women in the Professions, 1800 to the Present (also WOMNS 238 and HIST 238, AM ST 258)]**

Fall. 3 credits. S-U grades optional. Human ecology students must register for HD 258. J. Brumberg.

The historical evolution of the female professions in America (midwifery, nursing, teaching, librarianship, home economics, and social work) as well as women's struggles to gain access to medicine, law, and the sciences. Lectures, reading, and discussion aim

to identify the cultural patterns that fostered the conception of gender-specific work, and the particular historical circumstances that created these different work opportunities. The evolution of "professionalism" and the consequences of professionalism for women, family structures, and American society are also discussed.]

**HD 260 Introduction to Personality (also PSYCH 275)**

Spring. 3 credits. Recommended: introductory course in psychology or human development. T R 1:25-2:40. C. Hazan.

This course is designed as an introduction to theory and research in the area of personality psychology, with special emphasis on personality development. It covers the major influences—including genetic, environmental, and gene-environment interactions—and involves in-depth study of the major theories. The assumptions and models of human behavior that form the basis of each theoretical orientation will be examined and compared, and the relevant empirical evidence reviewed and evaluated. In addition, basic psychometric concepts and the methods for measuring and assessing personality will be covered, as will the major related debates and controversies.

**[HD 261 The Development of Social Behavior**

Spring. 3 credits. Strongly recommended: HD 115 or Psychology 128. Offered alternate years. T R 1:25-2:40. C. Raver.

Issues in the development of social behavior are viewed from the perspective of theory and research. Likely topics include bases of social behavior in infancy and early childhood, the role of parents, siblings, and peers, the development of prosocial and aggressive behavior, the development and functioning of attitude and value systems, and the function and limits of experimental research in the study of social development.]

**HD 266 Emotional Functions of the Brain**

Fall. 3 credits. Prerequisite: a biology course. Letter grades only. M 10:10-12:35. R. Depue.

Much of our social behavior, and what we refer to as personality, is related to phylogenetically-old emotional systems, systems that help us to adapt to critical stimuli in the environment. These systems are structured and organized within the brain, but they are also capable of being modified by our everyday experiences. After an overview of the gross anatomy of the primate brain is presented, the focus of the course concerns networks of brain regions that are organized around the integration of processes related to emotion and motivation. First, general features of the brain in relation to emotional evaluation and expression processes are discussed, and then the brain organization related to several specific types of emotional systems are explored. Neurobiological modulation of emotional processes by neurotransmitters of wide distribution in the brain are detailed as well. The latter helps to lay the groundwork for understanding the nature of individual differences in much of our social and emotional behavior.

**HD 281 Foundations of Clinical Practice (also PSYCH 281)**

Fall. 3 credits. Enrollment limited to 60 students. Letter grades only. W 1:30-4:30. C. Maxwell Miller.

This course provides an introduction to the theoretical and practical aspects of some of the basic elements of counseling. Students will develop an understanding of the most current research on important aspects of counseling and will be introduced to the basic theoretical foundations underlying different approaches. Students will be expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and class demonstrations, students will learn such skills as attending and active listening; they will also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between intra-psychic and interpersonal processes. Other topics include issues of transference and counter-transference, the multi-axial dimensions of the DSM IV, defensive strategies as they appear in the DSM IV, and ethical considerations and practices. While this course gives an introduction to the applied aspects of psychology, it does not prepare students to provide treatment of any sort.

#### **HD 282 Community Outreach (also PSYCH 282)**

Fall and spring. 2 credits. Letter grades only. Prerequisites: HD 115 or Psychology 101. Students may not concurrently register with HD 327 or HD 328 or Psych 327 or Psych 328. T 10:10–11:25. H. Segal.

This course provides students with information and perspectives essential to do volunteer fieldwork with human and social service programs in the community. To gain a practical understanding of what mental health professionals do in the workplace, students will examine problems that emerge in fieldwork settings, which raise ethical, methodological, theoretical, and practical issues in the observation or treatment of clients or patients. They will also be introduced more generally to the Field of Community Psychology, its history, theory, and applications. Although students are not required to volunteer at a local agency, the instructor will assist students in finding sites that may provide appropriate learning opportunities. A paper, relating current research to issues relevant to community mental health, is due at the end of the course.

#### **[HD 284 Introduction to Sexual Minorities (also WOMNS 285)]**

Fall. 3 credits. Prerequisite: one social science course. S-U grades optional. M 6:30–9:00 P.M. R. Savin-Williams.

This course introduces students to theories, empirical scholarship, public policies, and current controversies with lesbian, gay, bisexual, transgender, sexual questioning, and other sexual minority populations. The major focus is on gay, lesbian, and bisexual development, lifestyles, and communities with additional emphasis on ethnic, racial, gender, and class issues. Videos supplement the readings and lectures.]

#### **HD 300 Special Studies for Undergraduates**

Fall or spring. Credit to be arranged. Permission required.

Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor

directing the study and the coordinator of undergraduate education, is filed at course registration or during the change-of registration period.

#### **HD 313 Problematic Behavior in Adolescence**

Fall. 3 credits. Prerequisite: HD 115 or Psychology 101; HD 216 recommended. M W 2:55–4:10. J. Haugaard.

This course will explore several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors will be presented. Appropriate research will be reviewed; treatment and prevention strategies will be explored. An optional discussion section will be available to students who would like an opportunity to discuss readings and lectures in greater depth.

#### **HD 327 Field Practicum I (also PSYCH 327)**

Fall. 3 credits. Enrollment limited to 30 students. Students must commit to taking HD 328 in the spring semester. Prerequisites: HD 370 or Psychology 325 and permission of instructor. Letter grades only. M W 8:40–9:55. H. Segal.

This course provides three components, which form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided for host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class. There are no fees, but students pay for transportation to their weekly field placement, most of which are located in and around Ithaca.

#### **HD 328 Field Practicum II (also PSYCH 328)**

Spring. 3 credits. Enrollment is limited to 30 students. Prerequisites: HD 327 or Psychology 327 taken the previous term, Psychology 325 or HD 370 and permission of instructor. Letter grades only. M W 8:40–9:55. H. Segal.

This course provides three components which form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class. There are no fees, but students pay for transportation to their weekly field placement, most of which are located in and around Ithaca.

#### **[HD 334 The Growth of the Mind]**

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 635, a supplemental graduate seminar. Prerequisites: a course in human experimental psychology, statistics, or HD 115 or equivalent; or permission of the instructor. S-U grades optional. B. Lust.

In this course the fundamental issues of cognition are introduced. What is the nature of human intelligence? Of logical and scientific reasoning? How are knowledge and understanding acquired and represented in the human mind? What is the nature of mental representation? What are the cognitive characteristics of the mind at birth? What is the relation of the acquisition of knowledge and understanding to their final representation? What are the relations between language and thought? In the study of those issues, how can epistemology and experimental psychology be related through the experimental method?

Basic debates within the study of cognition are introduced and discussed throughout: for example, the roles of innateness and learning, the distinction between competence and performance, and the relation between induction and deduction in the acquisition of knowledge. Those psychological issues are set in a context of basic epistemological issues involving the tension between rationalism and empiricism. The course will analyze Piaget's comprehensive theory of cognitive development and experimental results. Current research in cognitive development will be contrasted.]

#### **HD 344 Infant Behavior and Development**

Fall. 3 credits. Prerequisites: HD 115, a biology course, and a statistics course. Not open to freshmen. M W F 1:25–2:15. S. Robertson.

Behavior and development from conception through the first two years after birth will be examined in traditional areas (e.g., perception, cognition, socioemotional, language, motor). The fundamental interconnectedness of these aspects of development will be strongly emphasized, as well as their relation to the biology of fetal and infant development. Topics with implications for general theories of development will be emphasized (e.g., the functional significance of early behavior, the nature of continuity and change, the role of the environment in development). Conditions which put infants at risk for poor development (e.g., premature birth, exposure to environmental toxins, maternal depression) and topics with current social, ethical, or political implications (e.g., infant day care, fetal rights) will also be considered. An emphasis on research methodology in the study of early behavior and development will be maintained throughout the course.

#### **HD 346 The Role and Meaning of Play**

Fall. 2 credits. Limited to 30 juniors and seniors. Prerequisite: HD 115. M 7:30–9:25 P.M. J. Ross-Bernstein.

The aim of this course is to examine the play of children ages three through seven. Through seminar discussions, workshops, films, and individualized research the student will explore the meaning and validity of play in the lives of young children, the different ways that children play and the value of each, and the effect of the environment in enhancing and supporting play.

**HD 347 Human Growth and Development: Biological and Behavioral Interactions (also B&SOC 347 and NS 347)**

Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent, and HD 115 or Psychology 101. Limited to 150 students. M W F 1:25. Offered alternate years. S. Robertson and J. Haas.

This course is concerned with the interrelationships of physical and psychological growth and development in humans during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variations for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

**HD 348 Advanced Participation with Children**

Spring. 4-8 credits. Limited to 20 students (limit depends on availability of placements and supervision). Prerequisites: HD 115 and HD 242; and permission of instructor. Recommended: HD 346. S-U grades optional. T 12:20-2:15. J. Ross-Bernstein.

An advanced, supervised field-based course, designed to help students deepen and consolidate their understanding of children. Students are expected to define their own goals and assess progress with supervising teachers and instructor; to keep a journal; and to plan, carry out, and evaluate weekly activities for children within their placement. Conference groups and readings focus on contexts of development and on ways to support children's personal and interpersonal learning. Each student is expected to do a presentation and paper on a self-selected topic within the scope of the class. Participation is in settings that serve typical and/or special needs children from three to eight years of age and provide education, care, or special-purpose interventions for them.

**[HD 353 Risk and Opportunity Factors in Childhood and Adolescence]**

Spring. 3 credits. Enrollment limited to 100 students. Prerequisites: HD 115 and HD 250. S-U grades optional. T R 1:25-2:40. J. Garbarino.

This course explores the meaning of risk and opportunity in the lives of children and youth. It begins from an understanding of risk accumulation and resilience as they relate to social policy, professional practice, and community development. The concept of "social toxicity" is a central theme of the course. Assignments include writing research-based editorials and participating in a simulated public policy debate.]

**[HD 359 American Families in Historical Perspective (also WOMNS 357, HIST 359, AM ST 359)]**

Spring. 3 credits. Prerequisite: HD 250 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HD 359. J. Brumberg.

This course provides an introduction to and overview of problems and issues in the historical literature on American families and the family life cycle. Reading and lectures demonstrate the pattern of American family

experience in the past, focusing on class, ethnicity, sex, and region as important variables. Analysis of the private world of the family deals with changing cultural conceptions of sexuality, sex roles, generational relationships, stages of life, and life events. Students are required to do a major research paper on the history of their family, covering at least two generations, and demonstrating their ability to integrate life-course development theory, data drawn from the social sciences, and historical circumstances.]

**HD 362 Human Bonding**

Fall. 3 credits. Recommended: introductory course in psychology or human development. S-U grades optional. T R 1:25-2:40. C. Hazan.

The science of interpersonal relationships. Examines the basic nature of human affectional bonds, including their functions and dynamics. Covers such topics as interpersonal attraction and mate selection, intimacy and commitment, love and sex, jealousy and loneliness, the neurobiology of affiliation and attachment, and the role of relationships in physical and psychological health.

**[HD 363 The Psychological Development of Women]**

Fall. 3 credits. Limited to 60 students. Strongly recommended: HD 115, 250, and a 200-level course. Letter grades only. T R 11:40-12:55. C. Raver.

Historically, psychologists have effectively charted the pathways of boys' normative development yet sometimes neglected to pursue a full understanding of girls' development. To address this gap, this seminar will pursue a number of theoretical perspectives that focus on the social development of girls and women. Theory and research on girls' gender identity, peer relationships, romantic relationships, and parenting will be covered, with an eye toward understanding their meaning within different historical and sociocultural frameworks. Relations between psyche, body, and culture will be considered, using the works of such authors as Freud, Horney, Miller, Chodorow, and Gilligan. Students will rigorously evaluate these theoretical perspectives in light of recent empirical research on women's psychological development.]

**HD 366 Psychobiology of Temperament and Personality**

Spring. 3 credits. Letter grades only. Prerequisite: HD 266. T R 10:10-11:25. R. Depue.

This course is for students who have an interest in the neurobiology of behavior, in general, and in temperament and personality, in particular. The course material is presented within an evolutionary biology perspective, where the development of neurobehavioral systems as a means of adapting to critical stimuli is explored as the basis of emotional traits in humans. The nature of temperament, social affiliation, and personality is explored from psychometric, social, genetic, and biological points of view. There is a focus on the general role played by the biogenic amines (dopamine, norepinephrine, and serotonin) and opiates in determining individual differences in temperament and personality. Implications for several forms of personality disorders and psychopathology are also discussed. Finally, the manner in which

environmental influences across the life span may be coded in the brain and influence the development of personality is explored.

**HD 368 Children's Development in Different Cultures**

Spring. 3 credits. Letter grades only. Prerequisites: HD 115 or Psych 101 and one college-level statistics course. M W 2:55-4:10. K. Greene.

This course will examine the influence of ecological, cultural, and ethnic factors on the social and cognitive development of children in different cultures. Particular attention will be given to research methodologies that guide us in making comparisons about parent-child development across cultures. Topics will include family origin and universality, parental roles, child-family interaction, patterns of kinship, and economic and health issues.

**HD 370 Psychopathology (also PSYCH 325)**

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: HD 115 or Psychology 101. Letter grades only. M W F 11:15-12:05. S. Bem.

A research-based survey of the cognitive, emotional, and biological aspects of psychopathology across the life span. The major mental illnesses will be covered, including schizophrenia, anxiety disorders, affective disorders, and personality disorders as well as psychopathological disorders of childhood. Emphasis will be placed on the development of psychopathology, current theories and models of etiology, and intervention strategies. This course is intended to be a rigorous introduction to the scientific study of psychopathology and psychopathological development; minimal attention to psychopathology.

**[HD 397 Experimental Child Psychology]**

Fall. 4 credits. Prerequisites: HD 115 or Psychology 101 and one course in statistics. Intended primarily for students interested in entering graduate programs involving further research training. Limited to 16 students. M W 10:10-12:00. L. Lee.

A study of experimental methodology in research with children. Includes lectures, discussions, and practicum experiences covering general experimental design, statistics, and styles and strategies of working with children.]

**HD 400-401-402-403 Special Studies for Undergraduates**

Fall or spring. Credits to be arranged. Enrollment limited to juniors and seniors with a minimum 3.0 G.P.A. Permission required. Prerequisites: either HD 115, 250, and two intermediate level HD courses, or four courses in psychology or sociology. S-U grades optional.

For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of HD not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake, on a form available from the department office in NG14. This form must be signed by the instructor directing the study and the student's faculty adviser and submitted to NG14 MVR, the Office of Undergraduate Education. After clearance that all prerequisites are met, the student picks up the form in NG14 to file at course registration

or within the change-of-registration period after registration in the College Registrar's Office, 145 MVR along with an add/drop slip. To ensure review before the close of the periods, early submission of the special studies form to the Office of Undergraduate Education is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study (guidelines for each are available in NG14 MVR).

**400: Directed Readings.** Prerequisites: in addition to the general prerequisite courses, a statistics or methods course and at least one course directly linked to the area of study. Permission required. For study that predominantly involves library research and independent study.

**401: Empirical Research.** Prerequisites: in addition to the general prerequisite courses, a statistics or methods course and at least one course directly linked to the area of study. Permission required. For study that predominantly involves data collection and analysis, or laboratory or studio projects.

**402: Supervised Fieldwork.** Prerequisites: in addition to the general prerequisite courses, an observation or participation course. Permission required. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**403: Teaching Apprenticeship.** Prerequisites: in addition to the general prerequisite courses, students must have taken the course or equivalent and received a grade of B+ or higher. Permission required. For study that includes assisting faculty with instruction.

**HD 417 Female Adolescence in Historical Perspective (also WOMNS 438, HIST 458, AM ST 417)**

Spring. 3 credits. Limited to 25 students. Prerequisites: HD 216 and at least one 300-level history or women's studies or American studies course. Permission of instructor required. Juniors and seniors only. T 1:55–4:25. J. Brumberg.

A reading, writing, and discussion course that will attempt to answer a basic historical question that has consequences for both contemporary developmental theory and social policy: how has female adolescence in the United States changed in the past 200 years? The focus will be on the ways in which gender, class, ethnicity, and popular culture shape adolescent experience. Although the required readings are primarily historical in nature, students are encouraged to think about the interaction of biology, psychology, and culture. Students are required to do a primary source research paper.

**HD 436 Language Development (also COGST 436, PSYCH 436 and LING 436)**

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD/LING 700, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, neurobiology, biology, or linguistics. S-U grades optional. A supplemental lab course is available (HD 437). T R 2:55–4:10. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of universal grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child.

**HD 437 Lab Course: Language Development (also COGST 450, LING 450 and PSYCH 437)**

Spring. 2 credits. In conjunction with HD, COGST, LING, and PSYCH 436. TBA. B. Lust.

This lab course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs. This course is partially funded by a new National Science Foundation grant to Cornell's Cognitive Studies program, "Interdisciplinary Approaches to the Scientific Study of Language Knowledge and Acquisition." This project is intended to involve undergraduates in active research and to coordinate related subfields of several disciplines in a unified, laboratory-supported curriculum.

The course will include several structured modules dealing with topics covered in the survey course, 436 Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods to test hypotheses.

The lab course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on assigned modules, and independent research, throughout the week and throughout the term.

**HD 438 Thinking and Reasoning**

Fall. 3 credits. Prerequisite: HD 115 or Psychology 101. T R 1:25–2:40. B. Koslowski.

The course will examine problem solving and transfer, pre-causal thinking, logical thinking, practical syllogisms, causal reasoning, scientific reasoning, theories of evidence, expert vs. novice differences, and nonrational reasoning. Two general issues will run through the course: the extent to which children and adults approximate the sorts of reasoning that are described by various types of models, and the extent to which various models accurately describe the kind of thinking that is required by the types of problems and issues that arise and must be dealt with in the real world.

**HD 439 Cognitive Development: Infancy through Adolescence**

Spring. 3 credits. Prerequisites: HD 115 or Psychology 101. Letter grades only. T R 1:25–2:40. B. Koslowski.

The course will be an overview of current and classic issues and research in cognitive development. Central topics of both "hard cognition" (e.g., information processing and

neuropsychological functioning) and "soft cognition" (e.g., problem solving, concepts, and categories) will be covered. Selected topics will be linked to methodological issues and to important social issues such as cross-cultural cognitive development and putative racial and social class differences.

**HD 440 Internship in Educational Settings for Children**

Fall or spring. 8–12 credits. Prerequisites: HD 115, 242, or 243 and 348. Recommended: HD 346. Permission of instructor required. S-U grades optional.

J. Ross-Bernstein.

Opportunity to integrate theory with practice at an advanced level and to further develop understanding of children ages 2 to 10 and their families. Interns will function as participants in varied settings and participate in curriculum planning, evaluation, staff meetings, home visits, parent conferences, and parent meetings. Supervision by head teacher and instructor. Students are expected to define their own goals and to assess their progress, to do assigned and self-directed readings, and to keep a critical incident journal.

**[HD 451 Nontraditional Families and Troubled Families]**

Spring. 3 credits. Limited to 30 students. Prerequisites: HD 115 and 250. Letter grades only. T R 8:40–9:55. Offered alternate years; next offered 2001–2002.

J. Haugaard.

This is an advanced course designed to explore the functioning of families. The first part of the course examines family system theory and how it relates to our understanding of all families. Four types of families are then examined: two nontraditional families (e.g., adoptive families) and two troubled families (e.g., families with a chronically ill child).

**HD 456 Families and Social Policy**

Spring. 3 credits. Prerequisite: one course in the area of the family or in sociology. S-U grades optional. M 7:30–10:00 P.M. T. Mitrano.

An examination of the intended and unintended family consequences of governmental policies, using case studies in areas such as social welfare, day care, and employment. The policy implications of changes in the structure and composition of families are also considered.

**[HD 457 Health and Social Behavior (also SOC 457)]**

Fall. 3 credits. Prerequisites: a course in statistics and one of the following: HD 250, Sociology 101, Sociology 251, or Rural Sociology 101. Letter grades only. T R 10:10–11:25. Offered alternate years. E. Wethington.

This course critically examines theories and empirical research on the relationships among social group membership, social status, and physical and mental health. The lectures focus on social stress, social support, and socioeconomic status, all of which are associated with variations in physical health, mental health, and health maintenance behaviors. Students are expected to read widely from current literature in medical sociology, health psychology, public health, and epidemiology.]

**HD 458 Parent-Child Development in African-American Families**

Fall. 3 credits. Letter grades only. Enrollment limited to 25 seniors and juniors. Prerequisites: HD 115, HD 250,

and a college level statistics course. T R 10:10–11:25. K. Greene.

This course will examine parent-child relationships in African-American families. Topics include historical influences on contemporary parenting behaviors, the impact of societal forces on African American families' socialization practices, and the influence of parental child rearing beliefs, strategies, and practices on African American children's development. Particular attention will be given to the relevance of mainstream theoretical formulations of African American's parental and family functioning.

**[HD 459 Disease in American Culture and Society (also AM ST 430)]**

Fall. 4 credits. Limited to 15 students. Prerequisites: HD 241, or HD 258, or HD 359, or HD 417. Permission of instructor required. Times TBA. J. Brumberg.

How a society defines, explains, treats, and tries to prevent disease reveals a great deal about its basic ideas, values, and institutions. Diseases are not simple biological "facts," but the product of a complex amalgam of biological and social forces. This course uses the history of specific diseases to examine: (1) the ways in which the social and cultural environment shape the experience of illness, (2) the ideas that Americans have held about why people get sick and others do not, (3) how those ideas reflect larger cultural as well as scientific trends, (4) the ways in which power relationships are involved in defining and responding to the threat of disease and (5) the impact that disease has had on American society. A short response paper must be written for each session. An additional historiographical essay or research paper will be prearranged with the instructor.]

**HD 464 Sexual Minorities and Human Development (also WOMNS 467)**

Spring. 3 credits. Limited to 25 students. Priority given to seniors and juniors. T R 10:10–11:25. R. Savin-Williams.

This course covers topics selected by students regarding theoretical, research, and applied issues on sexual minorities. In the second half of the course, students lead a class that focuses on a research topic of their choosing. The success of the course depends on students feeling personally engaged and committed to the course content. Students are expected to participate fully in the class discussions. Because of the multidisciplinary nature of the course, students from a variety of backgrounds in academic disciplines, gender, sexual orientation, ethnicity, race, class, and religious affiliation will be in the course.

**[HD 467 Psycho-social Issues in Asian American Identity (also AAS 467)]**

Spring. 3 credits. Prerequisites: HD 115 or Psychology 101 preferred. Letter grades only. M 6:30–9:00 P.M. L. Lee.

The course will review theories of identity and self and their usefulness in understanding identity formation for various ethnic groups within the Asian American population. It will examine the impact of various societal forces, e.g., racism, stereotypes, etc. as well as life experiences, e.g., immigration, family values, etc. in shaping or contributing to the formation of identity or identities of Asian Americans.]

**[HD 468 Stress in Childhood and Adolescence]**

Fall. 3 credits. Recommended: HD 115, HD 250 and a statistics course. Letter grades only. TBA. J. Eckenrode.

This is an advanced seminar that will review research related to the nature and consequences of stressful experiences in childhood and adolescence, particularly those arising in the family. Topics covered represent common stressors in the lives of children (e.g. divorce of parents), which have potentially damaging consequences for development (e.g. child abuse). Topics in which faculty at Cornell have conducted significant research (e.g. children's memory for stressful events) are also covered. In addition to considering the negative affect of stress on development, we will also consider issues of individual differences in stress reactivity, including the concepts of coping and resilience. These topics lead naturally into discussions of practice and policy.]

**HD 471 Child Development and Psychopathology**

Fall. 3 credits. Limited to 60 advanced-level students. Prerequisites: HD 115 or Psychology 101. Strongly recommended: a basic course in psychopathology. Letter grades only. M W 8:40–9:55. J. Haugaard.

This class will explore the development and process of mental, emotional, and behavioral disorders in children such as mental retardation, autism, and attention deficit disorders. Topics will include (1) the classification of mental disorders; (2) biological, psychological, and sociological theories regarding the development and maintenance of mental disorders; (3) prevalence and etiology of childhood mental disorders, and (4) therapeutic and preventive interventions. If there is sufficient enrollment, an optional discussion section will be available to those students who would like an opportunity to discuss readings and lecture material in greater depth.

**[HD 482 Child Development and Social Policy]**

Fall. 3 credits. Enrollment limited to 25 juniors and seniors or by permission of instructor. Prerequisites: HD 115, HD 250, and a course in statistics. HD 260 OR 261 strongly recommended. Letter grades only. Offered alternate years; next offered 2001–2002. T R 12:20–1:45. C. Raver.

Course work and seminar discussion emphasize the integration of basic research in young children's social and emotional development with intervention- and prevention-oriented research. The course also examines theoretical models of the relations between risk and resilience in child development, family functioning, community, and culture. Policies in the domains of parenting, early childhood education, family and community violence, poverty, and child care are analyzed. Broad questions regarding the identification of social problems and the design of solutions are considered within cultural and historical contexts.]

**HD 483 Early Child Care and Education in Global Perspective**

Fall. 3 credits. Enrollment limited to 25 juniors and seniors. Prerequisites: HD 115 and HD 250. S-U grades optional. T R 2:55–4:10. M. Cochran.

In this course we examine American child care policies and programs, broadly defined, in the context of policies and programs in Africa, Asia, Europe, and Latin America.

Comparison and analysis are guided by several complementary conceptual frameworks. Particular attention is given to relativism and universalism as applied to developmental and educational principles and concepts. Students specialize in the child care policies and programs of another country, work in teams to analyze a contemporary policy issue, and apply course content to an issue of their choice in a final paper.

**HD 498 Senior Honors Seminar**

Fall and spring. 1 credit. Required for, and limited to, seniors in the HD honors program. S-U grades only. TBA. S. Cornelius.

This seminar is devoted to discussion and presentation of honors theses being completed by the senior students.

**HD 499 Senior Honors Thesis**

Fall or spring. Credit to be arranged. Prerequisite: permission of thesis adviser and coordinator of honors program. S-U grades optional. Department faculty.

**HD 106, 206, 306, 406 Topics in Human Development**

2–4 credits. S-U grades optional.

These topics vary each time the course is offered and are taught by advanced graduate students in the field of human development. Descriptions are available at the time of course registration. These courses do not fulfill any requirements for the major; they must be taken as electives.

**Topics Courses**

Fall or spring. 2–4 credits. Prerequisites and enrollment limits vary with topic being considered in any particular term.

Permission of instructor may be required.

This series of courses provides an opportunity for undergraduates to explore an issue, a theme, or research in the areas of departmental concentration. Topics vary each time the course is offered. Descriptions are available at the time of course registration. Although the courses are usually taught as seminars, a subject may occasionally lend itself to lecture, practicum, or other format.

**HD 215, 315, 415 Topics in Adolescent and Adult Development**

**HD 235, 335, 435 Topics in Cognitive Development**

**HD 245, 345, 445 Topics in Early-Childhood Development and Education**

**HD 255, 355, 455 Topics in Family Studies and the Life Course**

**HD 265, 365, 465 Topics in Social and Personality Development**

**HD 275, 375, 475 Topics in Developmental Psychopathology**

**HD 285, 385, 485 Topics in the Ecology of Human Development**

**The Graduate Program**

HD graduate courses are only open to undergraduates with instructor's permission.

## General Courses

### HD 610 Processes in Human Development: Theoretical Models and Research Designs

Spring. 3 credits. Open to graduate students and juniors and seniors in HD and related fields with instructor's permission. Prerequisite: a minimum of one course in statistics. Letter grades only. W 2:00-4:25. U. Bronfenbrenner.

The purpose of the seminar is to acquaint students with selected scientific paradigms being employed at the frontiers of developmental science for investigating the conditions and processes that shape human development over the life course. Particular attention will be given to research models that draw on disciplines (such as evolutionary biology, human genetics, developmental psychology, sociology, anthropology, history, economics). The principal seminar activities consist of faculty and student development of research questions, critical analysis of these questions in the light of diverse theoretical perspectives, and their corresponding research designs. In this process, the human being is treated as an integrated organism.

### [HD 617 Adolescence

Spring. 3 credits. Staff.

Critical examination of seminal theoretical and empirical writings on adolescent development. Empirical research on specific questions chosen by students is considered in the light of these approaches.]

### [HD 631 Cognitive Development

Fall. 3 credits. Letter grades only. Staff.

Faculty members involved in the course will present their area of specialization in cognitive development. These areas will include perception, attention, memory, language, thinking and reasoning, learning, creativity, and intelligence.]

### HD 640 Infancy

Fall. 3 credits. TBA. S. Robertson.

Development in infancy will be examined through a critical review of key research and theory in selected aspects of neurobehavior, perception, cognition, language, emotion, and social relationships. Theoretical issues to be considered include the role of experiences in early development, sensitive periods, continuity and discontinuity in development, and the functional significance of early behavior. Some of the conditions that put infants at risk for poor development will also be considered, such as premature birth, perinatal medical complications, and exposure to environmental toxins. The course will combine perspectives from developmental psychology and psychobiology.

### [HD 650 Contemporary Family Theory and Research

Fall. 3 credits. E. Wethington.

Sociological and social psychological theories and research on the family are examined with reference to the relationship between the family and society. Topics change from year to year, but focus on the processes of socialization and social control, the reproduction of gender and social class across generations, changes in family "values" across time, the rise of divorce and single motherhood, family diversity, and the genesis of deviance and psychological disorder.]

### [HD 660 Social Development

Spring. 3 credits. S-U grades optional.

C. Raver.

This course is designed to provide both broad and in-depth training in the areas of social and emotional development during infancy and childhood. It will cover most of the major topic areas and theoretical orientations. Consideration will be given to basic influences on socioemotional development—biological, social, and cultural. Coverage will include normative development as well as the origins and nature of individual differences. We will explore such fundamental issues and questions as: What are emotions? What role do they play in the development and organization of personality? What are the effects of early social relationships on emotional regulation? When and how does the self-system emerge? Emphasis will be on the processes—both internal and external—that help determine the course and outcome of development.]

### [HD 670 Experimental Psychopathology

Spring. 3 credits. Prerequisite: an undergraduate course in abnormal psychology or psychopathology; a course in multivariate statistics; and substantive course work in neurobiology or related biological science. TBA. Staff.

Overview of current theories and empirical research on functional and organically based psychological disorders. Topic areas to be covered include autism, schizophrenia, anxiety disorders, affective disorders, and personality disorders. Focus is on the developmental and etiology of psychopathology.]

## Topical Seminars

Seminars offered irregularly, with changing topics and instructors. Content, hours, credit, and instructors to be announced. Seminars offer concentrated study of specific theoretical and research issues.

### HD 618 Seminar in Adolescence and Adult Development

Topics include peer relations, parent-teen relationships, self-esteem, youth and history, work, and moral development.

### HD 633 Seminar on Language Development

Topics include acquisition of meaning in infancy, precursors of language in early infancy, and atypical language development.

### HD 635 Seminar in Cognitive Development

Topics include early attention, perception, memory, and communication. Assessment and intervention in relation to these processes will be considered when possible.

### HD 645 Seminar on Infancy

Focuses on selected topics in the developmental psychology and psychobiology of infancy (including fetal development). Special topics vary and depend in part on student interests.

### HD 646 Seminar in Early-Childhood Development and Education

Topics include analysis of models and settings, design of assessment techniques, program evaluation, and early childhood in a cross-cultural context.

### HD 655 Seminar in Family Studies and the Life Course

Topics include the sociology of marital status, the single-parent family, work-family linkages, women and work, and families and social change.

### HD 665 Seminar in Personality and Social Development

Focuses on selected issues related to personality and social development. The issues selected vary each year according to current importance in the field and student interests.

### HD 675 Seminar in Developmental Psychopathology

Topics include learning disabilities, therapeutic interventions in atypical development, child abuse and maltreatment, family factors in the etiology of functional disorders, and cognitive characteristics of atypical groups.

### HD 685 Seminar in Human Development and Family Studies

Topics include development of self-concept, sex-role identity, observational methods, and interviews in developmental research.

### HD 690 Seminar on Ecology of Human Development

Topics include the institutional setting as a determinant of behavior, the poor family, and the identification and measurement of ecological variables.

## Individualized Special Instruction

### HD 700-806 Special Studies for Graduate Students

Fall or spring. Credits and hours to be arranged. Credits 1-15 (3 hours work per week per credit). S-U grades at discretion of instructor.

Independent advanced work by graduate students recommended by their Special Committee chair with permission of the instructor.

### HD 700 Directed Readings

For study that predominantly involves library research and independent study.

### HD 701 Empirical Research

For study that predominantly involves collection and analysis of research data.

### HD 702 Practicum

For study that predominantly involves field experience in community settings.

### HD 703 Teaching Assistantship

For students assisting faculty with instruction. Does not apply to work for which students receive financial compensation.

### HD 704 Research Assistantship

For students assisting faculty with research. Does not apply to work for which students receive financial compensation.

### HD 705 Extension Assistantship

For students assisting faculty with extension activities. Does not apply to work for which students receive financial compensation.

### HD 706 Supervised Teaching

4 credits.

For advanced students who assume major responsibility for teaching a course. Supervision by a faculty member is required.

**HD 806 Teaching Practicum**

4 credits. For advanced graduate students to independently develop and teach an undergraduate topics course under the supervision of a faculty member.

**HD 899 Master's Thesis and Research**

Fall or spring. Credit to be arranged. Credits 1-15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

**HD 999 Doctoral Thesis and Research**

Fall or spring. Credit to be arranged. Credits 1-15 (3 hours work per week per credit). S-U grades only. Prerequisite: permission of thesis adviser.

## POLICY ANALYSIS AND MANAGEMENT

R. Burkhauser, chair; W. Trochim, Policy Analysis and Management, director of graduate studies; A. Mathios, director of undergraduate studies; D. Kenkel, interim director of Sloan Program; J. Allen, R. J. Avery, D. Barr, R. Battistella, B. J. Bristow, R. Brooks, R. Burkhauser, J. S. Butler, P. Chi, J. Ford, J. Gerner, R. Heck, K. Joyner, A. Kabacennell, D. Kenkel, J. Kuder, A. Mathios, C. McClintock, L. O'Neill, A. Parrot, E. Peters, P. Pollak, T. Reeves, E. Rodriguez, W. Rosen, J. Schultz, S. Tennyson, J. Tiffany, D. Tobias, W. Trochim; R. Babcock, Emeritus; H. Biesdorf, Emeritus; W. K. Bryant, Emeritus; G. Bymers, Emerita; F. M. Firebaugh, Emerita; A. Hahn, Emeritus; E. S. Maynes, Emeritus; J. Mueller, Emerita; L. Noble, Emerita; J. Robinson, Emerita; C. Shapiro, Emerita; L. Street, Emeritus; K. Walker, Emerita; B. L. Yerka, Emerita; J. Ziegler, Emeritus

**NOTE:** Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

**[PAM 180 Human Services in Contemporary Society]**

Fall. 3 credits. Recommended for freshmen and first-year transfer students. Staff. A lecture and discussion course designed as an introduction to the community base of services. Current and historical human services are examined. Emphasis is placed on social services, education, health, and criminal justice. Barriers to service delivery are discussed, such as racism, sexism, classism, sexual preference, physical disability, and age. Contemporary issues that impact on service delivery will also be discussed with attention to the relationship between direct service and public policy.]

**PAM 200 Intermediate Microeconomics**

Fall or spring. 4 credits. Prerequisite: Econ 101 or equivalent. Fall: preference to sophomores and juniors. Spring: preference to juniors and seniors. Staff. A section is mandatory. Theory of demand and consumer behavior including classical and indifference curve analyses; theories of production and cost; models for the following markets—competitive, monopoly, monopolistic competition, oligopoly, and inputs; general equilibrium; welfare economics; public goods; risk.

**PAM 204 Applied Public Finance**

Fall or spring. 3 credits. Prerequisites: PAM 200. S-U grades optional. E. Peters, D. Kenkel.

The public sector now spends nearly \$2 out of every \$5 generated as income in the U.S. economy. A thorough knowledge and understanding of this important sector is an essential part of training in policy analysis and management. This course will provide an overview of the public sector of the U.S. economy, the major categories of public expenditures, and the main methods used to finance these expenditures. The principles of tax analysis and cost-benefit analysis will be presented with a focus on the role of public policy in improving economic efficiency, promoting the goals of equity and social justice, and improving equity by altering the distribution of wealth and income.

**PAM 205 Research Methods**

Fall or spring. 3 credits. Sections TBA. Staff.

Students will learn the logic and methods of social science research, as well as how to create researchable questions out of their issues of interest. Readings, written assignments, and in-class exercises focus on stating hypotheses, designing studies and samples to test hypotheses, measuring variables, and simple statistical analysis. PAM majors should take this course no later than their junior year.

**PAM 220 Introduction to Management: Principles and Differences Among Sectors**

Fall or spring. 3 credits. D. Tobias, R. Heck.

This course is a basic introduction to major management and related concepts of planning, organizing, controlling, leadership, and special topics within five major management contexts including individual/personal, groups/families, firms, not-for-profit organizations, and governments/communities.

**PAM 223 Consumer Markets I**

Fall. 4 credits. Offered alternate years. R. J. Avery.

A study of the structure and functions of consumer retail markets with emphasis on the role and activities of the major players in these markets—firms, consumers, and governments. The nature and consequences of various types of market failures are studied from each of these perspectives. Case studies and outside lecturers are used.

**PAM 230 Introduction to Policy Analysis**

Fall or spring. 3 credits. R. Avery, J. Gerner.

Policy analysis is an interdisciplinary field that uses theories, concepts, and methods from disciplines such as economics, sociology, and political science to address substantive issues in the public policy arena. Students will be introduced to the functions of and interactions between the major institutions (public and private) at the national, state, and local level involved in the policy making process. The course will focus on public policy analysis in the consumer, health, and family/social welfare areas and will also include an introduction to the technical skills required to undertake policy analysis.

**PAM 240 Critical Perspectives**

Fall or spring. 3 credits. C. McClintock, staff.

This course examines the implications and importance of perspective when examining of

public policy. It considers the sources of differing perspectives, including demographic characteristics, historical experience, and intellectual tradition. We also consider how these differing perspectives affect what is considered to be empirical evidence, what assumptions are made, and what outcomes are considered to be important. We will explore these ideas using several specific public policy proposals.

**PAM 270 Housing and Society**

Spring. 3 credits. S-U grades optional. P. Chi.

A survey of contemporary American housing issues as they relate to the individual, the family, and the community. The course focuses on the current problems of the individual housing consumer, the resulting implications for housing the American population, and governmental actions to alleviate housing problems.

**PAM 280 Race, Power, and Privilege in the United States**

Fall. 3 credits. J. Turner, D. Barr. For description, see AS&RC 280.

**PAM 300 Special Studies for Undergraduates**

Fall or spring. Credit to be arranged. Special arrangement for course work to establish equivalency for training in a previous major or institution. Students prepare a multicourse description of the study they want to undertake on a form available from the College Registrar's Office. This form, signed by both the instructor directing the study and the head of the department, should be filed at course registration during the change-of-registration period.

**PAM 303 Ecology and Epidemiology of Health**

Fall. 3 credits. S-U grades optional. Limited to 50 students. E. Rodriguez.

Ecological and epidemiological approaches to the problems which restrict human health within the physical, social, and mental environment. The course introduces epidemiological methods to the students and surveys the epidemiology of specific diseases such as AIDS, hepatitis, Legionnaires' disease, plague, cancer, herpes, and chlamydia. Application of epidemiology to health care will be discussed.

**PAM 305 Introduction to Multivariate Analysis**

Fall or spring. 4 credits. Prerequisites: ARME 210 or ILRST 210 or equivalent. W. Rosen, J. S. Butler.

The course introduces students to basic econometric principles and the use of statistical procedures in empirical studies of economic models. Assumptions, properties, and problems encountered in the use of multiple regression procedures are discussed. Students are required to specify, estimate, and report the results of an empirical model. Factor analysis and analysis of variance will be covered as well. Section meets once a week.

**[PAM 310 Evaluation of Public Policies]**

Fall. 3 credits. Prerequisites: PAM 200, 330, or permission of instructor. Staff.

This is an advanced course in economic policy analysis that builds on the material covered in PAM 330, Intermediate to Policy Analysis. The course will use a series of policy examples to demonstrate the economic approach. Special topics in cost-benefit

analysis and policy evaluation techniques will be developed when necessary for the example under study. Examples of topics that may be addressed include excise taxation, economic evaluations of health care innovations, environmental policies, traffic regulations, consumer policies, and welfare reform.]

**[PAM 323 Consumer Markets II]**

Fall. 4 credits. Offered alternate years; next offered 2001–2002. R. J. Avery.

This course focuses on external and internal forces that drive consumer demand. Material in this course will cover the processes whereby consumers interpret market-provided information and the social forces affecting consumer purchase decisions. Particular emphasis will be placed on communication institutions in the market (advertising, the news, and other mass media) and the control of these institutions through government regulation. A select group of consumer policy issues will be covered, such as consumer evaluation of product safety and quality, food additives, consumer privacy, and socially responsible advertising.]

**PAM 326 Personal Financial Management**

Spring. 3 credits. Preference given to human ecology students; limit 50; not open to freshmen. S-U grades optional. R. Heck.

The study of personal financial management at various income levels and during different stages of the family life span. Course topics include financial management frameworks and decision-making processes, basic economic and financial principles, returns to human resources, income and wealth analysis, the role of consumer and mortgage credit, financial insolvency and counseling, expenditure and purchase analyses, the use of budgets and record keeping in achieving family economic goals, economic risks and available protection, retirement and estate planning, and alternative forms of savings and investments.

**PAM 330 Intermediate Policy Analysis**

Fall or spring. 3 credits. Prerequisite: PAM 200. Staff.

Introduction to the tools and techniques of policy analysis. Topics covered include microeconomic concepts such as consumer and producer surplus; deadweight loss; rationale for public policy; benefit-cost analysis; impact assessments; experimental, quasi-experimental, and nonexperimental designs; and the social ecology of policy analysis.

**PAM 340 The Economics of Consumer Policy**

Spring. 4 credits. Prerequisites: PAM 200 or permission of instructor. S. Tennyson.

This course is designed to familiarize students with the basic approaches to consumer policy and the economic analysis of consumer policy issues. The course is structured around the major forms of government intervention in consumer markets, and examines a wide variety of economic and social regulations from the economic perspective. Students are required to write a term paper analyzing a consumer policy issue of their choosing.

**PAM 341 Economics of Consumer Law and Protection**

Fall. 3 credits. Prerequisite: Econ 101 or equivalent. S-U grades optional. A. Mathios.

Economic analysis of the roles played both by the courts and by federal and state regulatory legislation in altering consumer markets, consumer behavior, and consumer welfare. Topics include economic analyses of contract law, products liability, accident law and antitrust law, as well as the activities of such agencies as the Federal Trade Commission, the Food and Drug Administration, and the Consumer Product Safety Commission.

**PAM 346 Economics of Social Security (also ECON 447)**

Spring. 3 credits. Prerequisite: PAM 200. S-U grades optional. R. Burkhauser.

This course provides students with an economic perspective on social security policies. The readings illustrate the use of economic analysis to predict the behavioral effects and income distributional consequences of policy. The course primarily focuses on the Old-Age, Survivors, and Disability Insurance Program. But other programs such as, the Supplemental Security Income, Food Stamps, etc., will be discussed as will policies that attempt to end discrimination against the elderly or those with disabilities.

**PAM 350 Contemporary Issues in Women's Health**

Fall. 3–4 credits. A. Parrot.

This course will deal with the history of women in medicine and historical and cultural treatment of women's health problems. Health care research and the exclusion of women from research trials and protocols will also be addressed. Reproductive issues, alternative approaches to treatment, medical problems, ethical issues, cancers, factors that contribute to post-traumatic stress disorders, health promotion behaviors, political issues, and routine medical recommendations will also be discussed in depth. Students may take the course for a fourth credit, which will require attending a discussion section every other week and observations of seven facilities that provide a variety of women's health care (i.e., birthing center, mammogram, and ultrasound center, wellness center, hospital labor and delivery unit, LaMaze class, women's self defense class, etc.) on the alternate weeks.

**[PAM 370 Wealth and Income]**

Fall. 3 credits. Open to sophomores, juniors, and seniors; graduate students may elect to audit and write a research paper for 1 to 2 credits under PAM 600.

Prerequisites: Econ 101–102 or equivalent. S-U grades optional. Staff.

The wealth and income positions of American households are defined and described. Various statistics are employed to present conflicting pictures of the distribution of income using the same underlying data. Several models of economic determinants of income are presented and redistributive policies are discussed in the context of the economics of the political and philosophical positions for and against such policies.]

**[PAM 371 Economics of Family Policy—Adults]**

Fall. 4 credits. Limited to 40 students.

Junior or senior standing; non-PAM majors by permission of instructor. Staff.

This course examines the economics of family policy issues that have a particular impact on adult family members. Emphasis in this course is on the economic behavior surrounding the policy and the incentives set up by the policy. Policies considered include marriage and

divorce, family leave policy, policies assisting single parents, and policies affecting caregiving.]

**[PAM 372 Economics of Family Policy—Children]**

Spring. 4 credits. Limited to 40 students.

Junior or senior standing; non-PAM majors by permission of instructor. Staff.

This course examines the economics of family policy issues that particularly affect children. This course focuses on (1) the economic behavior that generates the policies and (2) the economic incentives and behavior that result from the policies. Topics include child welfare, education, day care provision, child support, and adoption.]

**[PAM 373 The Economics of Welfare Policy]**

Fall. 4 credits. Prerequisite: Econ 101 or equivalent. S-U grades optional. Staff.

Using the tools of economics, this course examines welfare policy. Included is an examination of the populations affected, the behavior various policies are likely to engender, and how much income redistribution occurs as a result of these welfare policies. Various proposals for welfare reform are also evaluated.]

**[PAM 374 Urban Economics and Policy]**

Spring. 4 credits. Prerequisite: PAM 200 or equivalent. S-U grades optional. Staff.

This course explores the economics of cities and urban problems and studies the growth of cities, location choices of firms and households, and the factors which determine land rents. The urban policy issues explored include—housing, urban poverty, zoning, and urban congestion.]

**[PAM 376 Housing, Neighborhood and Community]**

Spring. 3 credits. Prerequisite: PAM 270 or permission of instructor. S-U grades optional. P. Chi.

The course examines the interrelationships of housing conditions, neighborhood transitions, and community development. Both theoretical and empirical perspectives on residential patterns, neighborhood change, and community power will be examined. Special attention is given to government policies that deal with fair housing, residential segregation, neighborhood revitalization, and community development.]

**PAM 380 Human Sexuality**

Spring. 3 credits. Limited to 500 students.

Prerequisite: an introductory course in human development and family studies, psychology, or sociology (or equivalent social science course). Recommended: one course in biology. A. Parrot.

The aim of this course is to provide students with an understanding of the interactions and interrelationships of human behavior that influence sexual development and behavior. The course will focus on the evolution of sexual norms, cross-cultural customs, legislation within changing sociopolitical systems, and delivery of services related to sexual issues, needs, and/or problems. Future trends in sexuality will be addressed. Biological and developmental components of human sexuality will also be addressed. An underlying issue is the influence of our social and cultural system on the development of sexual needs, standards, and values. Research and theory of human sexuality will be explored through human and organizational behavior, biology, history, communication

arts, education, research theory, law, sociology, and psychology.

**[PAM 381 Health-care Services and the Consumer]**

Fall. 3 credits. Prerequisite: an introductory course in human services or health or biology. S-U grades optional. Offered alternate years. A. Parrot.

This course is an introduction to health care services and will present developments in the health field that affect the availability and kinds of health services. Emphasis is placed on the interrelationships of practitioners, institutions, and agencies. The part each can play in prevention, diagnosis, and treatment of disease and disability is also explored. Topics will include historical and current trends, quality health care, consumer issues, cultural concerns, ethical issues, politics and policies, and the contemporary problems of health care.]

**[PAM 383 Social Welfare as a Social Institution]**

Fall. 3 credits. J. Allen.

A philosophical and historical introduction to social welfare services. The course reviews the historical, social, and political contexts within which social welfare programs and the profession of social work have evolved. It discusses the political and ideological processes through which public policy is formed and the way policies are translated into social welfare programs. Basic issues in welfare are discussed through present program designs, public concerns, and the interrelationships and support of services in the community.]

**PAM 392 New York State Government Affairs**

Spring semester only. 12 credits. Letter grade only. Instructor permission only. Preference given to juniors and seniors. Sophomores considered. PAM 220 or a course in political science strongly recommended. C. McClintock.

Students participate in the New York State Assembly Intern Program which includes coursework on legislative, intergovernmental and political party dynamics, that has been approved as upper division baccalaureate credit by the New York State Regents National Program on Noncollegiate Sponsored Instruction. Students also participate in a three-day-a-week, supervised New York State Assembly internship requiring research on proposed legislation, committee and public hearings and constituent issues that link policy analysis and implementation. Course and internship performance recommendations are reviewed and finalized by the faculty coordinator of the PAM Experiential Learning Honors Program and recorded as Cornell credit.

**PAM 400-401-402 Special Studies for Undergraduates**

Fall and spring. Credits to be arranged. S-U grades optional. Staff.

For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of CEH, HSS, or PAM not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department field office. This form must be signed by the instructor directing the study and the department chair

and filed at course registration or within the change-of-registration period after registration with an add/drop slip in 145 MVR, College Registrar's Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special studies form to the department chair is necessary. Students, in consultation with their faculty supervisor, should register for one of the following subdivisions of independent study.

**PAM 400: Directed Readings.** For study that predominantly involves library research and independent reading.

**PAM 401: Empirical Research.** For study that predominantly involves data collection and analysis.

**PAM 402: Supervised Fieldwork.** For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**PAM 403 Teaching Apprenticeship**

Prerequisite: students must have taken the course (or equivalent) in which they will be assisting and have demonstrated a high level of performance. For study that includes assisting faculty with instruction.

**[PAM 404 Senior Seminar: Self-Evaluation of Professional Practice]**

Spring. 3 credits. Prerequisite: limited to students with field experience or ongoing field experience. Staff.

The process of change at the individual, family, and community level is a major theme of the senior seminar. The second theme, which is integrated throughout the course, concerns ethical principles and values that should inform professional practice. We will also discuss value dilemmas attendant on interventions to promote change at both the micro and macro levels of practice.]

**PAM 420 Management Information Systems for the Public Sector.**

Spring. 3 credits. L. O'Neill.

This course focuses on managing information systems in the public and nonprofit sector. Its purpose is to present an overview of the management of technology and to develop the computer literacy that is required of today's managers. It will consist of three modules: technology, planning and management, and public/nonprofit applications such as those related to family and social welfare, health care, and consumer policy.

**PAM 423 Risk Management and Policy**

Fall. 3 credits. Prerequisite: Econ 101 and a course in statistics. Enrollment limited to 80. S. Tennyson.

The objective of this course is to provide students with a broad understanding of risk management problems and solutions, a greater appreciation of the importance of risk and risk regulation in our society, and increased comprehension of the complexities of making decisions about risk. Topics covered include alternative ways to define and measure risk, the importance of risk-tradeoffs, and models of decision making under risk. With this background, alternative approaches to risk management are discussed, including insurance, noninsurance financing alternatives, and loss control. The impact on risk management of the legal liability system and government programs, laws and policies are also considered.

**PAM 424 Families in Business**

Fall. 3 credits. Prerequisites: introductory statistics or permission of instructor. S-U grades optional. R. Heck.

Offers students the opportunity to explore family business topics such as business formation, growth and expansion, strategic management, professionalization, succession, locational choices, and family dynamics, conflicts, and relationships relative to the business. An overview of families who own businesses and the profiles of their businesses will be presented along with the examination of the course topics relative to the various stages of business activity including feasibility, start-up, ongoing maintenance, expansion or redirection, and exit or transfer. Case studies from the Harvard Business School series will be utilized to examine the course topics listed above. The course also provides an introduction to research on family businesses by surveying the conceptual issues and methodological approaches related to the study of family businesses.

**[PAM 425 Empirical Research on Family Businesses]**

Fall. 3 credits. Prerequisites: introductory statistics or permission of instructor. S-U grades optional. R. Heck.

Allows students to develop research skills by providing opportunities for hands-on survey and fieldwork. Topics and activities include research design, sampling, questionnaire development, and statistical analyses related to family-owned businesses; critical review of current research approaches and extant databases used to research business ownership; and implementation and completion of an actual survey of fieldwork project of selected family business owners, or the use of extant databases for descriptive analyses of family-owned businesses.]

**PAM 426 Policy and Management Issues on Foreign Investment in China**

Spring. 3 credits. P. Chi.

This course will help students understand the general investment environment in China and learn how social, cultural, political, and economic factors affect decisions on market entry strategies, marketing mix strategies, and other management strategies for foreign-invested enterprises (FIEs) in China. This course will not only examine the growth of FIEs since the 1980s, but also discuss the policy initiatives and institutional barriers for direct foreign investment in China. Both multiplier and linkage effects of foreign investment on China's economy will also be evaluated. Further, the management issues on formation, performance, profitability, and dissolution of FIEs will be systematically examined.

**PAM 427 Complementary Alternative Medicine**

Fall. 3 credits. Prerequisites: a health course and intro biology or permission of instructor. A. Parrot.

This course will help pre-medical students, health administration students, as well as health economics students understand the relationship between alternative medicine and western allopathic medicine. The course will educate students about health and wellness, treatments for specific health conditions, differing philosophies of health care, financing health services, and cross-cultural approaches to health and wellness.

**PAM 435 The U.S. Health Care System**

Fall. 3 credits. R. Battistella.

This course provides an introduction to the health care delivery systems in the United States, and covers the inter-relatedness of health services, the financing of health care, and the key stakeholders in health care delivery including regulators, providers, health plans, employers, and consumers. The course describes the history and organization of health care, behavioral models of utilization, issues of health care reform, and current trends. The course provides an overview of the key elements of the field including ambulatory care services, mental health services, hospitals and clinicians, insurers, the role of public health organizations, and the politics of health care in the United States.

**[PAM 450 Economics of Health Behavior and Policy]**

Spring. 3 credits. S-U grades optional.

Prerequisites: PAM 200 or equivalent or permission of instructor. D. Kenkel.

This course uses the tools of economics to provide a better understanding of health behavior and policy. One focus is on policies that promote public health, including education programs and cigarette and alcohol taxation. Policies that influence consumer choices about health care and health insurance are also considered. A common theme is that to understand the effects of health policy it is necessary to analyze the incentives faced by consumers and the incentives of their employers, insurers, and health care providers. Analyses of specific health policies help develop this theme.]

**PAM 454 Contemporary Issues in Human Sexuality and Research**

Spring. 4 credits. Permission of instructor required. A. Parrot.

An in-depth seminar in theoretical and applied methodology for the study of human sexuality. Topics covered include current and contemporary issues, educational strategies, policy formation, legal jurisdiction, cultural mores, social attitudes, and individual sexual behavior.

**PAM 471 The Politics of Power and Empowerment in Community Development**

Fall. 3 credits. Limited to 20 students. D. Barr.

The course will take a theoretical world view of power and the historically colonial relationship between the American ruling class and other people. The three dimensions of power will be used as the framework for analysis. The relationships between social class, race, sex, and power will be studied. In addition, the class will explore the nature of empowerment and new theories of power and empowerment.

**[PAM 473 Social Policy]**

Spring. 3 credits. Prerequisite: PAM 383 or Government 111 or Sociology 141. S-U grades optional. J. Allen.

An examination of the policy-making process and the significance of national policies as they affect the distribution of social services. Frameworks for analyzing social policy are used to evaluate existing social programs and service-delivery systems. Implications for change in policies at the national, state, and local levels are discussed.]

**PAM 480 Professional Internship in Human Services**

Fall or spring. 4-7 credits. Limited to juniors and seniors majoring in human service studies. Prerequisite: PAM 100.

Precourse enrollment required. D. Tobias. Students intern for a minimum of 10 hours a week in a human service organization and attend a weekly seminar or office hours with a focus on integrating classroom and field-based learning. The course is structured as an opportunity for students to learn experientially and, at the same time, provide meaningful services to human service organizations. Interns are expected to take active roles in structuring, monitoring, and assessing their learning under the guidance of a faculty instructor.

**[PAM 486 Child Welfare I]**

Fall. 3 credits. Staff.

This course is an introduction to the field of child welfare with its many contemporary, traditional, and sometimes controversial issues. Included is an overview of current child welfare practice and policy as it affects such problem areas as drugs and alcohol, children and homelessness, and children and violence. This seminar will present a broad perspective on these subjects along with a systems theory orientation.]

**[PAM 487 Child Welfare II]**

Spring. 3 credits. Staff.

This course is a sequel of Child Welfare I, which exposes students to the numerous problems plaguing children of the child welfare system. Students will have the opportunity to take a closer look at how the system works, how it is not working to improve the lives of children, and what might be done about it. The purpose of the course is to prepare students to be change agents regarding the child welfare system and to not accept the status quo. The course will also focus on the major policy issues that are emerging for the future of children contending with the system.]

**PAM 499 Honors Program**

Fall or spring.

The honors program provides students with the opportunity to undertake basic or applied research which will be preparation of a thesis representing original work of publishable quality. The program is intended for students who desire the opportunity to extend their interests and efforts beyond the current course offerings in the department. Furthermore, the program is designed to offer the student the opportunity to work closely with a professor on a topic of interest. PAM majors doing an honors program may take PAM 499 for up to 15 credits. See Professor Alan Mathios for more details.

**[PAM 575 Housing and Long-term Care for the Elderly]**

Fall. 3 credits. S-U grades optional. P. Chi.

This course focuses on the housing of the elderly, their current housing conditions, and options for alternative housing. "Housing" is viewed as a resource of long-term care for the elderly, integrating housing with related health and social services. Attention is also given to government housing and long-term care programs for the elderly, analyzing how the residential environment influences the ability of elders to function independently and affects their need for long-term care services. Finally, the senior living and long-term care industries are examined.]

**PAM 600 Special Problems for Graduate Students**

Fall and spring. Credits to be arranged. S-U grades optional. Staff.

Independent advanced work by graduate students recommended by their chair and approved by the department chair and the instructor.

**PAM 601 Introduction to Policy Analysis and Management**

Fall. 3 credits. C. McClintock.

This course provides the conceptual framework for research and practice in policy analysis and management. Key topics will include (1) the rational model of the policy cycle; (2) alternative models of policy decision making and implementation; (3) approaches to policy analysis and program management; and (4) the role of social science in policy analysis and management.

**PAM 602 Measurement and Validity in Policy Analysis and Management**

Spring. 3 credits. E. Rodriguez.

This course provides an introduction to the theoretical foundations of validity in applied social research, basic probabilistic and nonprobabilistic sampling methods, survey research methods (including questionnaires, interviews, and scaling), and other practical inquiry methods required for valid inferences.

**[PAM 603 Experimental, Quasi-Experimental, and Economic Evaluation Methods]**

Spring. 3 credits. Staff.

This course focuses on the logic of randomized experimentation, the role of structural experiments, quasi-experimental evaluation methods, nonexperimental regression techniques, issues of sample selection, and cost-benefit analysis.]

**[PAM 604 Qualitative and Mixed-Method Approaches to Policy Analysis and Management]**

Spring. 3 credits. Staff.

This course introduces qualitative traditions of social inquiry and their roles in policy analysis and management. The course will also address visions of and strategies for mixing different inquiry traditions and approaches in applied policy analysis and management.]

**[PAM 605 Economics of Household Behavior]**

Spring. 3 credits. Prerequisite: PAM 604 or Economics 609-610 or consent of instructor. S-U grades optional. E. Peters.

This course examines household decision making in both single agent and multiple agent (e.g., game theoretic or bargaining) frameworks. The first half of the course focuses on (1) fertility, (2) household production, and (3) time allocation models of behavior—decisions that are usually modeled in a single-agent framework. The second half of the course looks at (1) marriage markets, (2) family formation and dissolution, (3) bargaining models of resource allocation within the household, and (4) intergenerational transfers across households. These kinds of behaviors are more fruitfully studied using multiple agent models such as contract theory, game theory, and household bargaining. Empirical applications of the theoretical models are presented for both developed and developing countries. Implications for family policies such as child care subsidies, divorce laws, family planning, government subsidies to education, and social security are also discussed. Much of the

material covered by this course could also be found in economic demography and economics of the family courses.]

#### **PAM 606 Demographic Techniques**

Fall. 3 credits. S-U grades optional. Staff. This course provides an introduction to the methods, measures, and data used in the analysis of human populations. Topics include demographic rates, life-table analysis, cohort vs. period analysis, sources and quality of demographic data, population estimation and projection, and stable population models.

#### **PAM 608 Economics of Consumer Demand (also ARME 670)**

Fall. 3 credits. Prerequisite: PAM 200, Economics 313, or concurrent enrollment in one of the 2, and 2 semesters of calculus. S-U grades optional. C. Ranney. A graduate level introduction to theory and empirical research on household demand, consumption, and saving. Emphasis is on the use of the theory in empirical research. Topics include neo-classical theory of demand, duality, complete demand systems, conditional demand, demographic scaling and translating, consumption, and savings. Becker and Lancaster models of demand will be introduced.

#### **[PAM 614-615 Program Evaluation in Theory and Practice**

614, fall; 615, spring. 4 credits each semester. Prerequisites for PAM 614: 612 and 613 or 617, or permission of instructor. Prerequisite for PAM 615: 614. Students must register for both semesters. Staff.

This course is a practicum in which the class designs and conducts an evaluation of a human service program. Students are involved in all phases of the evaluation from design to the production and dissemination of a final report. Emphasis is on research methods in the social sciences. Application of knowledge developed in prerequisite courses is stressed (for example, planning and managing an evaluation, ethics, methods of data collection, data processing, and strategies for analysis and feedback of results.)

#### **PAM 616 Strategies for Policy and Program Evaluation**

Fall. 3 credits. Prerequisites: PAM 612 and 613 or 617 or equivalent. W. Trochim. This course examines a wide range of approaches to the evaluation of policies and programs in the human services. The approaches are examined with respect to their purposes, key audiences, and methodologies, as well as their philosophical, political, and value frameworks. Analysis of commonalities and differences across evaluation approaches are used to judge the appropriateness of a given strategy for a particular context.

#### **[PAM 623 Consumer Decision Making**

Spring. 3 credits. R. J. Avery. Individual and family decision making with respect to their market purchases will be investigated from a multidisciplinary perspective. Topics to be covered in the course include cognitive theories of information processing; theories of group interaction in decision making; and the effect of advertising, imperfect information, and uncertainty on consumer product evaluation and purchase behavior. Special attention will be given to consumer decision making in various market segments, e.g., low-income consumers, children, and the elderly. Specific attention will be paid to how consumers in these

segments process marketer-provided information and their related consumption decisions.]

#### **[PAM 630 Seminar in Program Planning and Development**

Fall. Variable credit. Staff. Topics include microlevel program planning, third-sector organizations, and intergovernmental influences on program planning, policy formation, program implementation, and mainstreaming. Two or more human services are examined.]

#### **[PAM 631 Ethics, Public Policy, and American Society**

Fall. 3 credits. J. Ziegler. This course will explore current issues of ethics and public policy against a background of theories of ethical behavior. Questions of how public officials and managers of public and nonprofit agencies and private enterprises act will be examined. How do standards of ethical behavior in these professions get established? How are public policy issues with ethical implications resolved? Readings will draw from political philosophy, contemporary social science, and imaginative writing. This class is a seminar and class participation is essential. Open to seniors and graduate students.]

#### **PAM 632 The Intergovernmental System: Analysis of Current Policy Issues**

Fall. 3 credits. Open to seniors who have had a course in American government and to graduate students. J. Ziegler.

This course offers advanced policy analysis of current political/social/economic issues in the context of the intergovernmental system. Particular attention is paid to how certain policy and human service issues are played out at the federal, state, and local levels of government, and to the formulation of federal and state budget policy. General public administration theory is considered. Students work in teams on a policy/administrative research project and report to the class.

#### **[PAM 640 Information and Regulation**

Spring. 3 credits. Prerequisite: PAM 608 or PAM 200 and two semesters of calculus. Class packets on sale at Campus Store. A. Mathios.

A survey of the problems and policies accompanying informational failures and other market failures with regard to consumer well-being. Governmental regulation of products, producers, consumers, and prices are examined. Antitrust activity, disclosure requirements, advertising restrictions, and regulatory agencies are examined in terms of their ability to serve the public and special interests. Economic analysis, rather than institutional structure, is emphasized.]

#### **PAM 647 Microeconomics for Management and Policy**

Fall. 4 credits. S-U grades optional. S. Tennyson. This course introduces microeconomic theory and its application to decision making in the management and policy arenas. Special emphasis will be placed on the economic environment of health care organizations and the problems faced by managers in this environment.

#### **PAM 650 Applications in Health Management Practice, Entrepreneurship and Consulting**

Spring. 3 credits. J. Kuder. Seminars and practica, offered periodically and reflecting faculty and student interest, with changing topics and instructors. Content, time, credits, and instructors to be announced. Seminars and practica offer concentrated study in a specific human service area or in the education, planning, or evaluation processes within human services.

#### **PAM 652 Health Care Services: Consumer and Ethical Perspectives**

Fall. 3-4 credits. Limited to 30 students; undergraduates with permission of instructor. 4-credit option, may be used as Biology and Society Senior Seminar option. A. Parrot.

The course will focus on consumer and ethical issues faced by the health care field today. Broad topics to be discussed include ethical standards and guidelines, health care costs and accessibility of services, government role in health care delivery, health care as a right or privilege, private industry role in health care, services for the medically indigent and elderly, practitioner burnout and training, ethics of transplant surgery and funding, reproductive technology, AIDS research and funding, animals in medical research, right to die, and baby and granny Doe cases.

#### **[PAM 653 Health Economics and Policy**

Spring. 3 credits. Prerequisites PAM 604. Econ 609 or permission of instructor. S-U grades optional. D. Kenkel.

This course provides an overview of research in health economics and its relevance for health policy. Models of health capital, household production, and insurance are developed and used to address public health policies and health insurance programs and reforms. Major issues in the economics of the health care sector are discussed, including the markets for physician services, hospital care and long-term care. Much of the course focuses on the United States, but it will also review research on other countries, especially developing countries that face a very different set of health policy issues.]

#### **[PAM 654 Legal Aspects of Health Care**

Spring. 3 credits. Prerequisites: PAM 657 or permission of instructor. Taught in alternate years. H. Allen.

This course introduces principles of the law that are specifically applicable to health-service delivery. Topics considered include the liability of hospitals and their staff and personnel for injuries to patients; medical records and disclosure of information; consent to medical and surgical procedures; responsibility for patients' personal property; collection of bills; medical staff privileges; and confidential communications.]

#### **[PAM 655 Comparative Health-Care Systems**

Spring. 3 credits. Open to graduate students and a limited number of seniors with permission of instructor. P. J. Ford. An overview of health services is given within the larger context of the social and economic development policies of several industrialized democracies and developing countries. Sociocultural, economic, and epidemiologic factors are stressed as keys to the formulation of realistic strategies. Resource allocations for health services are assessed against the backdrop of changing rates of economic growth.]

**PAM 656 Managed Health Delivery Systems: Primary-Ambulatory Care**

Spring. 3 credits. Prerequisite: PAM 657.  
J. Kuder.

The concept of primary care is used to enhance understanding of the direction and purpose of ongoing changes in health services organization and financing. Pressures on traditional indemnity insurance and solo fee-for-service medicine are examined in the context of the transition from unmanaged to managed delivery systems. The course is divided into two parts: Part 1 examines the development of health maintenance organizations and related forms of managed care against the backdrop of larger public policy concerns. Part 2 centers on administrative-financial topics associated with the design, marketing, and operation of managed delivery systems in highly competitive markets. Considerable attention is given to the relationship between physicians and management with respect to such subjects as medical practice styles, productivity, quality assurance, and outcome measurement. The consumer health care behavior literature is reviewed in the light of marketing strategies and utilization control objectives. Many of the managerial topics are highlighted with field trips and visiting speakers.

**PAM 657 Health Care Organization**

Fall. 3 credits. Limited to 30 students.

Priority given to Sloan students or permission of the instructor. R. Battistella. The course will provide an introduction at the graduate level to the organization of health providers in the United States, the interrelationships of health services and the major sources and methods of paying for care. The course will describe how health services are structured in the United States and how these different services interrelate along the continuum of care. The course will describe and analyze organization, delivery, and financing issues from a variety of perspectives using specific performance criteria (e.g., equity, quality, efficiency). Innovations by the public and private sectors in the delivery and reimbursement of health care will also be presented.

**PAM 658 Field Studies in Health Administration and Planning**

Fall or spring. 1-4 credits. Staff.

Students interested in developing administrative and program-planning research skills are given an opportunity to evaluate an ongoing phase of health care agency activity in the light of sound administrative practice and principles of good medical care. In planning and carrying out the research, students work closely with a skilled practicing administrator and with members of the faculty.

**PAM 659 Epidemiology, Clinical Medicine, and Management Interface Issues**

Spring. 3 credits. E. Rodriguez.

From an empirical and analytical framework this course explores the relationships between epidemiology, clinical medicine, and management. The course will review the epidemiology, policy issues, and treatment of selected diagnoses accounting for a significant percentage of utilization and cost of health care services. In addition, students will have an opportunity to explore issues of resource allocation and continuous quality improvement. The format for the class is lecture, discussion, and case analysis.

**[PAM 660 Quality in Health Care Organizations]**

Fall. 3 credits. Staff.

The quality of health services—the extent to which the appropriate and most effective care is properly administered in the least costly manner—is a topic of paramount importance to patients. It is also a central concern of the providers and managers of health services and those who pay for care. It is a cornerstone of health care reform. Through readings, lecture, discussion, and group work, this course will acquaint the student with the basic elements of managing quality in health care organizations including: defining quality from many perspectives; measuring performance and detecting poor quality care; traditional and progressive approaches to managing quality including Continuous Quality Improvement; and the politics of quality, both within and outside the organization.]

**PAM 661 Economics of Health and Medical Care**

Spring. 3 credits. D. Kenkel.

The course is designed for graduate students who seek an understanding of the tools, vocabulary, and way of thinking of economics as it applies to decision making in health services delivery, administration, and policy. The philosophy of the course approach is based on the often-quoted credo of John M. Keynes: "The theory of economics does not furnish a body of settled conclusions immediately applicable to policy. It is a method rather than a doctrine, apparatus of the mind, a technique of thinking which helps its possessor to draw correct conclusions." The basic methods of micro-economics will be emphasized as tools to help individuals and organizations make better decisions about health services delivery, administration, financing, and policy issues.

**PAM 662 Health Care Financial Management I**

Spring. 3 credits. T. Reeves.

The course is designed to give graduate students an intensive introduction to the issues and techniques in the financial management of health service organizations. Class lectures, readings, guest speakers, problems, case studies, and research for term paper/projects will all be used to demonstrate important points, which will be reinforced by examples and applications. The course emphasizes the internal financial management knowledge and skill necessary for financial success in complex health organizations.

**PAM 663 Health Care Financial Management II: Payment Systems**

Fall. 3 credits. Prerequisite: PAM 662.

J. Kuder.

The purpose of this course is to develop an understanding of the theories on which health care payment and reimbursement systems are based and the techniques by which they operate.

**PAM 664 Information Resources Management in Health Organizations**

Spring. 3 credits. Recommended: strong basic computer skills. S-U grades optional.  
L. O'Neill.

Students are expected to have basic computer skills upon entry into the course. This course is a graduate course in Health Services Administration. Students will be exposed to the opportunities and challenges inherent in the use of health management information systems (HMISs) in clinical and nonclinical

applications. The course focuses on the manager's role in the application of HMISs to solve problems and address concerns in today's health care service industry. Students will learn how an HMIS can enhance the ability to appraise multiclinical and nonclinical services of care.

**[PAM 665 Managing Health and Human Service Organizations I]**

Fall. 3 credits. Staff.

This is the first segment of a six-credit sequence addressing the management and leadership of health and human services organizations. Different perspectives are examined, from that of the first-line supervision to the CEO level. This course begins with a study of basics of management—communications, motivation, change management, leadership, human resources, organizational design issues, and labor relations. It then looks at the development of technical skills in the areas of problem solving, decision making, productivity measurement, resource allocation and performance measurement. The course is taught with an applied focus and utilizes a case study approach.]

**PAM 666 Strategic Management and Organizational Design of Health Care Systems**

Fall. 3 credits. Prerequisite: PAM 665.

T. Reeves.

This is the second segment of a six-credit sequence in the management and leadership of health and human services organizations. This course concentrates on strategy issues, marketing, organizational culture issues, development of mission, the management of professionals, and studies the importance of roles, structure, and inter- and intra-institutional relationships within these organizations. The course is taught via a case study approach.

**[PAM 667 Health and Welfare Policy]**

Fall. 3 credits. Staff.

Health and welfare issues are seen as reflecting alternate solutions to the broader institutional problems of allocation (economics), control (politics), and normative behavior (morality). A basic tenet is that health and welfare policy is deeply rooted in social values and the availability of economic resources. Health policy is interpreted from a multidisciplinary perspective in which change emanates from structural dynamics accompanying socioeconomic development such as the evaluation of the economy from the entrepreneurial to the managerial to the post-industrial stages, together with shifts in social and political ideology—libertarianism, welfare statism, and secular humanism.]

**[PAM 668 Long-Term Care and the Aged: Alternative Health and Social Service Delivery Systems]**

Spring. 3 credits. Prerequisite: PAM 657.

R. Battistella.

Alternatives for the organization and delivery of long-term care services are examined within the context of public-financing constraints. Progressive long-term care is viewed as a continuum encompassing medical and social services positioned to optimize independent living. Relevant experience from other highly developed countries is presented. Visiting speakers from the public and private sectors are featured. Field trips provide additional insights into the many challenges and opportunities of long-term care policy and management.]

**PAM 669 Regression Analysis and Managerial Forecasting**

Fall. 3 credits. Prerequisite: at least one statistics course. L. O'Neill.

This course teaches various statistical methods for managerial decision making, with a particular emphasis on regression and forecasting. Other topics include: ANOVA, correlation, confounding, interaction, and statistical process control. Applications to health care organizations are emphasized.

**[PAM 674 Housing Economics**

Spring. 3 credits. Prerequisite: Economics 311 or 313. Instructor's permission required. Staff.

A survey of economic theory and empirical research related to housing markets. The course studies the demand and supply sides of the housing market as applications of microeconomic theory. Topics related to housing demand include tenure choice (decision to own or rent), household formation, mobility, and discrete choice models of housing demand. Topics on the supply side include housing starts, maintenance, and rehabilitation. Housing policy issues such as tax policy, housing for the elderly, fair housing, rent control, and zoning also will be addressed.]

**PAM 704-705 Internship in Human Service Studies**

Fall, spring, or summer. 1-15 credits. S-U grades optional.

Internship placement in human services is determined by availability and students' academic and professional goals. Opportunities are available in public and private human service organizations at the national, state, and local levels in positions consistent with students' needs and desires. The duration of an internship is negotiated between the student and the agency, while course credit and residence units are arranged between the student and the Special Committee.

**[PAM 718 Advanced Seminar in Program Evaluation**

Fall, spring. 1-3 credits. S-U grades optional. Prerequisite: permission of instructor. Staff.

This advanced course is intended for students with at least three courses in evaluation (PAM 612 series or equivalent) and statistics through multiple regression. The seminar focuses on analysis and appraisal of current literature on program evaluation and evaluative research. The seminar is topical, addressing current issues of importance in the field.]

**PAM 760 Challenges and Trends in the Health Services Industry**

Fall and spring. 1 credit. S-U grades only. Staff.

The goal of the course is to provide students with information and exposure to current and emerging issues in the health services industry. Topics may include such matters as: financial management of health care facilities, human resource management, information systems, cost effective clinical decision making, quality measurement and outcomes, public health, and entrepreneurship in the health services industry.

**PAM 799 MPS Problem Solving Project**

Fall or spring. Credits to be arranged. For students recommended by their chair and approved by the instructor in charge of independent advanced work. S-U grades optional.

**PAM 899 Master's Thesis and Research**

Fall and spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional.

**PAM 999 Doctoral Thesis and Research**

Fall and spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional.

**TEXTILES AND APPAREL**

A. Lemley, chair; A. Netravali, director of graduate studies; A. Racine, director of undergraduate studies; S. Ashdown, C. C. Chu, C. Coffman, C. Jirousek, S. Loker, S. K. Obendorf, A. Racine, P. Schwartz

**NOTE: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.**

**TXA 114 Introduction to Computer-Aided Design**

Fall and summer. 3 credits. It is important for students on wait lists to attend the first class. Limit 20 per lab section. Priority given to all TXA and other freshmen and sophomore students. Not open to those who have taken or are currently enrolled in DEA 115 and 203. S-U grades optional. Fall, T or R 1:25-4:25. A. Racine.

A studio course that explores the creative potential of microcomputers. The AutoCAD software program is used as a design tool for generating a wide variety of visual images. Basic Photoshop software commands are introduced to enhance AutoCAD drawings. Daily hands-on demonstrations and studio work. Students develop two-dimensional designs based on historical, cultural, and museum sources for portfolios and display. Supplies cost about \$60.00; lab fee \$15.00.

**TXA 117 Drawing the Clothed Figure**

Spring. 3 credits. Enrollment limited to 18 students. Prerequisite: a basic drawing course. Priority given to apparel design students. Letter grades only. Minimum cost of supplies \$125.00. Lab fee: \$30. T R 10:10-1:10. Staff.

The goal of this course is to improve a student's capacity to communicate apparel design ideas visually by drawing clothing on the human body. Emphasis will be on development of techniques used to express the human body, materials, and clothing designs quickly and clearly in working sketches and to present clothing designs in finished renderings.

**TXA 125 Art, Design, and Visual Thinking**

Fall. 3 credits. S-U grades optional. Lects M W F 12:20-1:10. C. Jirousek.

An introduction to the visual arts and design that explores aesthetic and cross-cultural dimensions of visual experience. Augmented by slide presentations, artifacts, video, and an internet-based electronic textbook, lectures emphasize the varieties of visual expression seen in works of art and design. Social, cultural, and historic interpretations of visual expression are discussed.

**TXA 135 Fibers, Fabrics, and Finishes**

Spring. 3 credits. S-U grades optional. Lects M W F 12:20-1:10. P. Schwartz.

An introduction to fibers, fibrous materials, and dyes and finishes. Special emphasis is given to the use of fibrous materials in apparel, residential and contract interiors, and industrial applications. Topics covered include fiber properties, fabric structure, coloration of fibrous materials, dimensional stability, flammability, product specifications, and performance standards.

**TXA 145 Introduction to Apparel Design**

Spring. 4 credits. Limited to 30 students with 15 students per lab section; priority given to all TXA, other freshmen and sophomore students, and students transferring into TXA; not open to seniors outside of TXA. Letter grades only. Apparel design majors should take course during the first year. Minimum cost of materials, \$140. Lec T 1:25-4:25 and lab F 10:10-12:05 or lec R 1:25-4:25 and lab F 1:25-3:20. A. Racine.

Intensive study of principles and processes of flat-pattern design with emphasis on creative expression in children's apparel. Students develop an understanding of the techniques needed to produce apparel from sketches, including patternmaking and garment assembly.

**TXA 225 Color and Surface Design of Textiles**

Fall. 4 credits. Recommended: TXA 114 and TXA 135. Minimum cost of other materials, \$100; lab fee, \$75. Priority given to apparel design students. Limited to 20 students. T R 1:25-4:25. C. Jirousek.

Studio experience in the surface design of textiles combined with exercises in color theory. Textile projects will use techniques such as block printing, shibori, batik, silk painting, silk screen, and stitchery to produce a portfolio of textile designs. Studio work will be augmented by lectures on pattern and color theory illustrated by slides and textile examples.

**TXA 237 Structural Fabric Design**

Fall. 3 credits. S-U grades optional. Prerequisite: TXA 135. Recommended: college algebra. Lects M W F 12:20-1:10. P. Schwartz.

This course covers the elements of technical fabric design with an emphasis on woven and knitted fabrics. Topics include structure of woven and knitted fabrics, openness, manufacturability, equivalence, and color effects.

**TXA 264 Draping**

Fall. 4 credits. Limited to 22 students. Prerequisite: TXA 125 and TXA 145; one drawing course recommended. Minimum cost of materials, \$125; lab fee, \$10. M W 1:25-4:25. S. Ashdown.

This studio course examines the process of creating a three-dimensional garment from the two-dimensional fabric. Through exercises, the principles and processes of draping, advanced flat pattern making, and fitting are studied. Drawing exercises focus on the communication of three-dimensional garments in two-dimensional sketches. Assigned problems require the students to make judgments regarding the design process, the nature of materials, body structure, function, and fashion.

**TXA 269 Style, Fashion, and the Apparel Industry**

Spring (first 7 weeks of semester). 2 credits. Limited to 45 students. Recommended: TXA 125 and TXA 135. Not open to freshmen. S-U grades optional. Lec M W 2:30-4:30. A. Racine.

Illustrated lectures will focus on changes in the U.S. apparel industry and fashion from the nineteenth century to the present day due to social forces, technological developments, and shifting demographics. The Cornell Costume Collection will be used for discussion. Students will write a term paper on issues relating to the fashion industry.

**TXA 275 Photoshop for Portfolio Presentations in Textiles and Apparel**

Spring (first 7 weeks of semester). 2 credits. Limited to 20 students. Prerequisite: TXA 114, TXA 217, or TXA 225. Course fee covering CAD lab color printing, \$15.00. T R 10:10-12:05. C. Jirousek.

This course will explore the use of Adobe Photoshop as a tool for portfolio development in textile and apparel design. Building on studio work produced in other courses, students will learn the basics of Photoshop and create a design line for a formal portfolio that will involve textile design applied to either apparel or home furnishings use.

**TXA 300 Special Studies for Undergraduates**

Fall or spring. Credit to be arranged. Staff. Special arrangement for course work to establish equivalency for courses not transferred from a previous major or institution. Students prepare a multicopy description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the department chair, is filed at course registration or during the change-of-registration period.

**[TXA 331 Apparel Production and Management**

Fall. 3 credits. Prerequisites: Economics 101 and 102 and an upper-division course in either apparel or textiles. T R 10:10-11:25. S. Loker.

Introduction to the global textile and apparel industry, particularly the technical and economic aspects of apparel production. Analysis of specific apparel manufacturing and management issues such as international sourcing, Quick Response, mass customization, production and information technology, labor, and logistics.]

**TXA 335 Fiber Science**

Spring. 3 credits. Limited to 20 students. Prerequisites: college chemistry and physics. Lecs M W 1:25-2:15. Lab M 2:30-4:25. A. Netravali.

This course covers fibers commonly used in various engineering, medical, and apparel applications. Topics include nature of polymer molecules, chemical structure of organic fibers, inorganic fibers, micro-macro structure of fibers, fiber dimensions, environmental effects, mechanical, optical, thermal, and frictional properties of fibers. Fiber uses such as composites in aerospace and other structural components, circuit boards, bulletproof vests, sutures, artificial arteries, geotextiles, sporting goods, etc. will be discussed.

**[TXA 336 Fundamentals of Color and Dyeing**

Fall. 3-4 credits. 3 credits for lecture only; 4 credits for lecture and lab. Prerequisite: college Natural Science Requirements. Fiber science students are required to take the lab. Lab fee, \$15. Lecs M W F 10:10-11:00; lab M 1:25-4:25. C. C. Chu.

Color is an extremely important and useful factor in daily life. This course will emphasize theories and scientific principles of color, providing a framework for the use of color in design, marketing, or research. How colorants are used to dye fabrics will be addressed. Although fabrics are chiefly used to illustrate color in the class, much of the information and knowledge will be useful to nontextile majors. Guest lecturers from the industry will address the practical aspects of color in business.]

**TXA 346 Apparel Design Process and Pattern Development**

Spring. 4 credits. Prerequisite: TXA 135 and TXA 145. Letter grades only. Minimum cost of materials, \$125; lab fee, \$10. M W 1:25-4:25. Staff.

This studio course applies the principles and processes of advanced pattern making and the theory of functional clothing to the development of sportswear, actionwear, and clothing for active leisure activities. Assigned problems will require students to use the design process to apply information about body structure, user needs (thermal protection and comfort, mobility, and visibility), and the nature of materials to the production of functional, fashionable apparel. Drawing techniques will be taught that emphasize the communication of technical information about the design.

**TXA 368 Computer-Aided Apparel Design**

Fall. 2 credits. Prerequisite: TXA 114, TXA 145. Pre or co-requisite: TXA 264. Minimum cost of materials, \$60. M W 10:10-12:05. A. Racine.

A team-based studio course in which a finished line of apparel is completed with patterns, sketches, flat drawings, and cost sheets created on the computer. An appropriate product development course for management students who have taken TXA 114 and TXA 145.

**TXA 400-401-402-403 Special Independent Studies for Undergraduates**

Fall, summer, or spring. Credits to be arranged. S-U grades optional. Staff. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of TXA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multicopy description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department chair and filed at course registration or within the change-of-registration period after registration along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special-studies form to the department chair is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

**TXA 400: Directed Readings.** For study that predominantly involves library research and independent reading.

**TXA 401: Empirical Research.** For study that predominantly involves data collection and analysis, or laboratory or studio projects.

**TXA 402: Supervised Fieldwork.** S-U only. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**TXA 403: Teaching Apprenticeships.** Fall or spring. 2-4 credits. Prerequisites: student must have upperclass standing, have demonstrated a high level of performance in the subject to be taught and in the overall academic program, and have permission of the instructor and the department chair. S-U grades optional. Staff. Apprenticeship includes both a study of teaching methods in the field and assisting the faculty with instruction.

**TXA 432 Product Quality Assessment**

Fall. 3 credits. Prerequisites: TXA 135 and Statistics. Lab fee, \$15. Lecs M W 1:25-2:15; lab M or W 2:30-4:25. Staff.

This course covers evaluation of fibers, yarns, fabrics, and garments, with emphases on the meaning of standards, testing philosophy, quality control, and statistical analysis. Day-to-day tests done in textile and apparel industry will be discussed. Laboratory sections will introduce students to various test methods, data generation for analysis, and evaluation.

**[TXA 436 Fiber Chemistry**

Spring. 3 credits. S-U grade optional. Senior and first-year graduate students. Lecs M W F 10:10-11:00. Offered alternate years. C. C. Chu.

The chemical and physical structure of several commercially important fibers, such as cotton, wool, silk, polyesters, nylons, acrylics, polyolefins and spandex, and their polymerization process are discussed. The general chemical and physical properties of each will be given. Degradation reactions for certain fibers such as polyolefins and acrylics will be discussed.]

**TXA 439 Biomedical Materials and Devices for Human Body Repair**

Spring. 2-3 credits. 2 credits meets T only; 3 credits meets T and R. S-U grades only for 2 credits, letter grades only for 3 credits. Juniors and seniors only. Prerequisites: college Natural Science requirement. (Chem. or Biol.). T 1:25-2:40, R 1:25-2:40. C. C. Chu.

Survey of materials and devices for repair of injured, diseased, or aged human tissues/organs. It includes properties of synthetic and biological materials, wound healing processes, medical devices for repair of wounds, blood vessels, hearts, joints, bones, nerves, male impotence, vision/hearing/voice, and drug control/release.

**TXA 444 Apparel/Textile Retailing and Distribution**

Spring. 3 credits. S-U grades optional. Juniors and seniors only. Prerequisite: TXA 135, TXA 331, and ARME 240 or equivalent. Lec T R 2:55-4:10. Staff.

This course provides an overview of the business of design, production, distribution, marketing, and merchandising of apparel and related products from a management perspective. The organization and structure of

both domestic and international retailers is included along with pricing strategies, merchandise planning, inventory management, and sales promotion. New uses of computer systems and information technologies will be emphasized throughout.

#### **TXA 465 Apparel Design: Product Development and Presentation**

Fall. 4 credits. Prerequisites: minimum of 3 drawing or art courses, TXA 264, TXA 368, and TXA 225 or permission of instructor. Recommended: TXA 114. Minimum cost of materials, \$250; lab fee, \$10. M W 10:10-1:10. S. Ashdown.

Through studio problems in apparel design, students examine the influence of manufacturing technology and cost on apparel products. Garments are developed to various stages from sketches to finished samples. Sketching exercises explore the relationship between technical drawing and illustration. Some portfolio development included.

#### **TXA 499 Honors Thesis Research**

Fall and spring. 1-6 credits (maximum 6 credits for graduation). S-U grades optional. Prerequisite: TXA students who have been admitted to college honors program. Staff.

Independent research leading to the honors thesis. College honors program guidelines are to be followed.

#### **TXA 600 Special Problems for Graduate Students**

Fall or spring. Credit to be arranged. S-U grades optional. Staff.

Independent advanced work by graduate students recommended by their chair and approved by the department chair and instructor.

#### **TXA 620 Physical Properties of Fiber-Forming Polymers and Fibers**

Fall. 3 credits. Prerequisite: permission of instructor. Offered alternate years. A. Netravali.

Formation and properties of fiber-forming polymers, rubbery, glassy, and crystalline states and their interconnection. Fiber structure, relationship between chemical structure and physical properties of manufactured and natural fibers. Mechanical, thermal, and viscoelastic properties of fibers and testing methods will be discussed.

#### **TXA 626 The Chemistry of Textile Finishes and Dyeing**

Spring. 3 credits. S-U optional. Prerequisites: TXA 336 or equivalent and organic chemistry, or permission of instructor. Offered alternate years. C. C. Chu.

Chemical aspects of textiles with emphasis on finishes and dyeing are discussed. Industrially important textile chemicals used for dyeing and enhancing fiber and fabric properties, such as durable press, anti-soiling, water repellency will be studied. The emphasis is on the correlation of the observed effect with chemical structure, end-use influences, interaction with fabric and fibers, sources, and synthetic routes. The environmental effect of these textile chemicals and current federal regulation will be briefly discussed.

#### **TXA 637 Research Seminars in Apparel Design**

Fall and spring. 1 credit; S-U only; repeat of course each semester is encouraged for all apparel design graduate students. Available to advanced undergraduate students with permission of individual instructor. Apparel Design faculty.

#### **[TXA 639 Mechanics of Fibrous Assemblies]**

Fall. 3 credits. Prerequisite: solid mechanics or permission of instructor. Offered alternate years. M W F 11:15-12:05. P. Schwartz.

A study of the mechanics of fiber assemblies: idealized yarn and fabric models; statistical bundle theories; deformation of yarns and fabrics in tensile, shear, and compressive stress; bending and buckling; and the mechanical behavior of nonwoven textile materials.]

#### **[TXA 664 Human Factors: Anthropometrics and Apparel]**

Spring (even-numbered years). 3 credits. S-U grades optional. Prerequisites: course in statistics and permission of instructor. Open to advanced undergraduates. Offered alternate years. S. Ashdown.

Seminar course focusing on the human form and its relationship to clothing. Includes discussion of quantification of body sizes and human variation; historical, cultural, and aesthetic concepts of fit; apparel sizing techniques; national and international sizing systems and standards; impact of sizing systems on various populations (elderly, handicapped, etc.).]

#### **TXA 666 Formation of Manufactured Fibers**

Spring. 3 credits. Prerequisites: Organic chemistry, college physics, TXA 436, TXA 620, or permission of the instructor. S-U grades optional. Offered alternate years beginning 2001. M W F 2:30-3:25. P. Schwartz.

This course covers the practical and theoretical analysis of the chemical and physical principles of the methods of converting bulk polymer to fiber; rheology; melt, dry, and wet polymer spinning; fiber drawing; heat setting; and general theory applied to unit processes.

#### **TXA 675 Aesthetics and Meaning in World Dress**

Spring. 3 credits; S-U grades optional. Prerequisites: TXA 125 or course in history of art, costume history, or other history. Offered alternate years. C. Jirousek.

An examination of the aesthetic and social psychological relationship between body and clothing in the context of various cultures. Students will develop a research topic to be presented orally and in a term paper and will participate in the development of an exhibition.

#### **TXA 899 Master's Thesis and Research**

Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

#### **TXA 999 Doctoral Thesis and Research**

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Staff.

Beck, Sam N., Ph.D., U. of Massachusetts. Sr. Lecturer, Urban Semester

Dempster-McClain, Donna I., Ph.D., Cornell U. Sr. Lecturer, Human Development

Dyer, Margaret, M.S.W., Smith College. Lecturer, Policy Analysis and Management

Gilmore, Rhonda, M.A., Cornell U. Lecturer, Design and Environmental Analysis

Heath-Crump, Ossie, Ph.D., Cornell U. Lecturer, Policy Analysis and Management

Racine, Anita, Ph.D., Cornell U. Sr. Lecturer, Textiles and Apparel

Rosen, William, Ph.D., U. of California. Sr. Lecturer, Policy Analysis and Management

Ross-Bernstein, Judith, M.Ed., Northwestern U. Lecturer, Human Development

Schelhas-Miller, Christine, Ed.D., Harvard U. Lecturer, Human Development

## SCHOOL OF INDUSTRIAL AND LABOR RELATIONS

### ADMINISTRATION

Edward J. Lawler, dean  
 Robert Smith, associate dean, academic affairs  
 Ann Martin, associate dean, extension and public affairs  
 James E. McPherson, assistant dean, Office of Student Services  
 Gordon Law, librarian  
 Allan Lentini, director, administrative services  
 Francine Blau, director, research  
 Christopher Haley, director, external relations  
 Robert Stern, graduate faculty representative  
 Tove Hammer, editor, *Industrial and Labor Relations Review*

### DEGREE PROGRAMS

	Degree
Industrial and Labor Relations	B.S.
	M.I.L.R.
	M.P.S.
	M.S.
	Ph.D.

### THE SCHOOL

The School of Industrial and Labor Relations at Cornell (ILR) is a small school within a large university. It tries to maintain the small-college atmosphere expected of an institution that has about 750 undergraduates and approximately 150 graduate students, even as ILR students participate fully in the activities of the larger Cornell community.

ILR students study in modern, technologically advanced lecture halls, seminar rooms, and libraries.

Almost half of the school's typical freshman class comes from the greater New York City area. Another 30 percent live in other parts of New York State. Students from other states and a few from foreign countries make up the rest of the class. Women constitute about 50 percent of recent entering classes, and minority students comprise about 25 percent of new freshmen and transfer students.

Students enrolled in the School of Industrial and Labor Relations at Cornell may take a substantial number of courses in the other six undergraduate colleges and schools of the university, including the College of Arts and Sciences. Cornell students have access to all of the libraries and other services of the university.

The school operates in four areas: (1) resident instruction, (2) extension and public service, (3) research, and (4) publications. It provides instruction to undergraduates and graduate students who are preparing for careers in

industrial and labor relations, as well as to men and women already engaged in industrial relations activities and the general public through its Extension and Public Service Division.

The school's Conference Center, part of the extension division, initiates and hosts conferences covering the full scope of industrial and labor relations. The center provides continuing education and information to practitioners and scholars.

The Research Division develops materials for resident and extension teaching and originates studies in industrial and labor relations. The Publications Division publishes and distributes the research results.

### GRADUATE DEGREES

More than 150 students on the Cornell campus are enrolled in graduate study in industrial and labor relations, one of the largest graduate fields in the university. Students may work toward the degrees of Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy. For further information on graduate programs, contact the Graduate Office, School of Industrial and Labor Relations, Cornell University, 216 Ives Hall, Ithaca, NY 14853-3901.

### DEPARTMENTS OF INSTRUCTION

Courses in the school are organized into six departments:

#### Collective Bargaining, Labor Law, and Labor History

In the study of workers, employers, and the government policies affecting them, members of this faculty concentrate on subjects of industrial and labor relations best understood by reliance on the fields of administration, economics, history, and law. Courses explore subjects within the framework of American society, stress fundamental forces of change, and analyze texts and empirical data with methods drawn from the social sciences, the humanities, and the legal professions.

#### Human Resource Studies

This department offers specialization in human resource studies. Human Resources focuses on employer-employee relationships and deals with such topics as human-resource planning, staffing, computer applications to personnel, personnel information systems, training, management development, performance appraisal, compensation administration, organization development, and the sociological environment of human resource management. The study of human resource policy focuses on government efforts to enhance the population's ability to be employed. Although primarily concerned with governmental measures that influence the

supply of labor (for example, training, education, health, mobility, and immigration), the subject area also includes policies in private industry that relate to the demands for labor.

#### International and Comparative Labor Relations

International and Comparative Labor Relations is concerned with industrial and labor relations systems and labor markets in other parts of the world. Countries include those in Western Europe, as well as in Asia, Latin America, and South America.

#### Labor Economics

Labor Economics deals with labor markets: that is, the institutional arrangements, terms, and conditions under which workers supply their labor and under which firms demand their labor. Faculty members are especially concerned with understanding the workings of labor markets and the effects of various public policies. The topics dealt with in courses and research include the following: analysis of the labor force, employment and unemployment, wages and related terms of employment, income distribution, income security programs, health and safety in industry, retirement, pensions and social security, economic aspects of collective bargaining, and economic demography.

#### Organizational Behavior

By studying individuals, groups, single organizations, and associations or organizations, persons in the field of organizational behavior understand human behavior within organizations as well as the actions of the organizations themselves. At the individual level of analysis, courses consider motivation, leadership, attitudes, personality, group processes, organizational change, and worker participation. At the organizational level, courses examine occupations, deviance in the work place, conflict, power, organizational design, public policy regarding organizations, and industrial conflict. The department also offers courses on research methods in organizational research and general survey courses in both psychological and sociological research.

#### Social Statistics

Economic and social statistics includes the principles of statistical reasoning, statistical methods, and the application of statistical tools of analysis.

A full list of required and elective courses is available from the Office of Student Services, 101 Ives Hall.

### RESIDENT INSTRUCTION

This division conducts the on-campus programs leading to the degrees of Bachelor of Science, Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy from Cornell.

## Office of Student Services

Staff members from the Office of Student Services, 101 Ives Hall, work closely with faculty and faculty committees to administer degree programs for the school and many of the school's support services. The office's responsibilities include the admitting and orienting of new students, maintaining students' personal and academic records, and counseling students on personal and academic problems. The office also works closely with seniors who are planning graduate study.

## Counseling and Advising

New students will be provided advising on orientation, academic procedures, and course registration by counselors in the Office of Student Services.

Each of the school's academic departments names faculty members to serve as advisers for students who wish to consult with them regarding career possibilities in the field, postgraduate programs, or similar matters. Questions or issues related to graduation requirements, course registration, and related academic procedures should be raised with counselors in the Office of Student Services.

## Minority Programs

Cornell University administers a variety of special opportunity programs designed to provide financial assistance and other forms of assistance to (1) minority students and (2) low-income students meeting program guidelines. The purpose of these programs is to provide access to a Cornell education for capable students who otherwise might not secure the admissions consideration, financial assistance, or supportive services necessary for their success at the university. The associate director for minority education in the Office of Student Services provides academic and personal counseling to all ILR minority students. ILR offers a variety of support services to enhance academic achievement.

## STUDY OPTIONS

Several study options are open to ILR undergraduates, making it possible to tailor a program to fit special circumstances.

One such option is the five-year ILR master's degree. With early planning, some students may earn the M.S. degree in the fifth year. Using another option, some ILR students arrange for dual registration in the Johnson Graduate School of Management, earning their bachelor's degree in ILR and a master's degree in the Johnson Graduate School of Management after five years of study.

Some students elect to spend a semester in New York City, Albany, or Washington, D.C., with a chance to observe actual labor problem solving as interns in congressional offices, labor organizations, personnel offices, and state and federal agencies. For more information, see "Special Academic Programs," below.

Study abroad options are also available at a number of foreign universities. Qualified students may spend a semester or a full year studying abroad.

A number of ILR courses deal directly with today's problems and involve fieldwork in the Ithaca area and elsewhere in New York State.

The ILR program allows juniors and seniors who want to conduct their own research to receive course credit for individually directed studies if the program is supervised by a faculty member.

## Study in Absentia

Registration in absentia enables a student to seek admission in another American institution for a semester or a year and transfer credit toward completion of the Cornell degree. This study option requires the development of a plan of study, a statement of appropriate reasons for study away from the university (e.g., availability of courses not offered at Cornell), good academic standing, approval of the plan by the director of student services, and payment of a special in absentia registration fee. Course work taken in absentia is usually not evaluated for transfer credit until the work has been completed and the student has returned to the school. Students then submit a course syllabus and other evidence of content to the chairman of the department that might have offered the respective course, or to a counselor in the Office of Student Services if the course is more appropriate as a general elective.

## Leave of Absence or Withdrawal

If a student desires to withdraw or to take a leave of absence from the university, an interview should be scheduled with a counselor in the Office of Student Services. Counselors will assist students in petitioning for approval of a leave of absence and in contacting the appropriate offices or departments of the university.

## REQUIREMENTS FOR GRADUATION

To earn the Cornell Bachelor of Science degree in industrial and labor relations, the student needs to successfully complete 120 credits. This requires eight terms for an average of 30 credits a year although some students accelerate their studies. (Currently being revised.)

### Freshman Year

#### Fall Semester

Freshman Writing Seminar	3
Introductory Microeconomics (ECON 101)	3
History of American Labor: Nineteenth Century (ILRCB 100)	3
Social and Psychological Foundations of Organizational Behavior I (ILROB 170)	3
ILR Colloquium (ILRID 150)	1
Elective	3
	16

#### Spring Semester

Freshman Writing Seminar	3
Introductory Macroeconomics 102	3
History of American Labor: Twentieth Century (ILRCB 101)	3
Social and Psychological Foundations of Organizational Behavior II (ILROB 171)	3
Elective	3
	15

Physical Education, Fall and Spring

### Sophomore Year

#### Fall Semester

Statistics I (ILRST 210)	3
Development of Economic Institutions (ILRLE 140)	3
Labor and Employment Law (ILRCB 201)	3
Human Resource Management (ILRHR 260) Fall	3
Elective	3
	15

#### Spring Semester

Statistics II (ILRST 211)	3
Economics of Wages and Employment (ILRLE 240)	3
Distribution: Cultural Perspectives	3
Distribution: Western Intellectual Tradition	3
Elective	3
	15

### Junior and Senior Years

Economic Security (ILRLE 340)	3
Collective Bargaining (ILRCB 300)	3
Distribution: International and Comparative ILR	3
Distribution: Upper Division Writing	3
Distribution: Science and Technology	3
ILR and General Electives	

ILR Advanced Electives—30 credit hours in no fewer than 10 courses

General Electives—34 credit hours of which up to 22 hours may be freely elected in the university's endowed divisions

## Required Courses

(55 credits)

The curriculum prescribes the courses and subjects listed in the table above; some are illustrative. In the senior year, all courses will be electives.

## Elective Courses

(65 credits)

From the courses offered by the school, students must select a minimum of 10 courses and 30 credits of ILR elective courses. No more than nine of these credits may be satisfied by ILR 499, Directed Studies, or ILR 497–498, Internships, ILR 495, Honors Program, or one semester of Study Abroad.

Undergraduates are required to select one intensive writing course (for a minimum of three credits) from a list of designated courses.

The remaining 34 credits may be selected from the courses of any other college at Cornell, but a student who takes more than 34 credits in the endowed colleges (the College of Architecture, Art, and Planning; the College of Arts and Sciences; the Johnson Graduate School of Management; the College of Engineering; and the School of Hotel Administration) must pay for each credit taken in excess of 34, *whether or not the courses are passed*. For the precise fee per credit, students should call the Office of the Bursar.

The number of credits that may be taken in the endowed colleges at no additional cost to

the student may be changed at any time by official action of the school.

### ILR Math Requirement

If you took AP calculus in high school and scored a 3 or better on the AB exam or a 2 or better on the BC exam, you have fulfilled the ILR math requirement. If you did not take AP calculus, or if you did not achieve the scores noted above, you will be expected to take and pass the ILR Math Assessment before you may register for required courses in Statistics and Labor Economics. The Math Assessment is based on materials covered in New York State Regents Exams for Courses 2 and 3. (Calculus is not covered in those courses.)

The ILR Math Assessment will be scheduled in August, January, and May. Those who do not pass in the first attempt will be expected to register in an appropriate math course and pass the assessment *before the beginning of their third semester* in the school. Anyone who cannot meet the requirement by the beginning of the third semester may be enrolled for a terminal term and will be expected to leave the school thereafter.

Transfer students will be expected to meet the same standards in math: either present the score required by Cornell University for AP calculus (AB or BC) credit, or pass the ILR Math Assessment before being permitted to register in ILRST 210 or ILRLE 240 with a terminal semester possible after failing the assessment given at the beginning of a third semester as an ILR student.

## SCHEDULING AND ATTENDANCE

### Schedule Changes

Occasionally it may be necessary for a student to request changes in his or her course schedule either before a term begins or during the semester. Such requests must be directed to the Office of Student Services to avoid possible loss of academic credit.

### Class Attendance

It is each student's responsibility to attend all scheduled classes unless excuses have been approved by the faculty. In some courses an instructor may permit a maximum number of class absences without a grade penalty or dismissal from the course. An explanation for absence from class may occasionally be secured from the Office of Student Services in advance of the expected absence. An approved absence may be warranted by:

- 1) participation in authorized university activities such as athletic events, dramatic productions, or debates;
- 2) medical problems supported by a record of clinic or infirmary treatment;
- 3) serious illness or death in the immediate family;
- 4) other circumstances beyond the student's control.

A request for explanation of an absence should, when possible, be made to the Office of Student Services before the date of expected absence. A reported and explained absence does not relieve a student from fulfillment of academic requirements during the period of absence. The course instructor has the authority to determine what work

must be completed. The office can only confirm the explanation for absence. Students should inform the Office of Student Services of any problems they have meeting course requirements.

## ACADEMIC STANDING AND GRADES

### Academic Integrity

In 1987 the faculty of the School of Industrial and Labor Relations approved a revised code of academic integrity. This code, while based on the Cornell University code, varies somewhat.

Absolute integrity is expected of all Cornell students in all academic undertakings. They must in no way misrepresent their work, fraudulently or unfairly advance their academic status, or be a party to another student's failure to maintain academic integrity. The code specifically prohibits:

- 1) knowingly representing the work of others as one's own;
- 2) using or obtaining unauthorized assistance in any academic work;
- 3) fabricating data in laboratory or field work;
- 4) giving fraudulent assistance to others;
- 5) fabricating data in support of laboratory or field work.

Full details on the applications of those prohibitions to course work, term papers, examinations, and other situations are listed in the code. Copies are available from the Office of Student Services, 101 Ives Hall.

### Dean's List

A Dean's List is compiled for each of the four undergraduate classes each term on the seventh day following receipt of final grades from the registrar. Eligibility for the Dean's List is determined by applying all of the following criteria:

- 1) achievement of a term average for freshmen of 3.3 or better; for sophomores of 3.4 or better; and for juniors and seniors of 3.6 or better;
- 2) a minimum course load for the term of 12 letter-graded credits;
- 3) completion of all courses registered for at the beginning of the term;
- 4) satisfaction of all good-standing requirements.

### Academic Standing

Good standing requires that all of the following criteria be met at the end of each term:

- 1) an average of C- (1.7) for the semester's work, including a minimum of eight completed and letter-graded credits;
- 2) no failing grades in any course, including physical education;
- 3) a cumulative average of C- (1.7) for all completed terms.

If at the end of any term a student fails to maintain good standing or if overall academic performance is so marginal as to endanger the possibility of meeting school and university degree requirements, his or her record is

reviewed by the Committee on Academic Standards and Scholarships. The committee may issue a written warning to the student at that time. If a student does not improve after the written warning, he or she may be denied permission to register for the next term.

### Involuntary Separation from the School for Academic Reasons

A student may be denied permission to reregister at the end of any term when he or she has failed:

- 1) to establish good standing after a semester on warning;
- 2) to maintain an average of 1.7 in any term after a previous record of warning;
- 3) to achieve good standing after being on warning any two previous semesters;
- 4) two or more failures in one term or has a term average of 1.0 or below.

The Academic Standards and Scholarship Committee may decide to permit a student to remain on warning more than one semester if there has been significant improvement even though the cumulative average is still below 1.7.

### S-U Grading Policy

An undergraduate may register to receive a final grade of S (Satisfactory) or U (Unsatisfactory) in courses that offer this option—either in the school or in other divisions of the university—subject to the following conditions:

- 1) the S-U option may be used in ILR and in out-of-college course electives only, not in directed studies;
- 2) students are limited to registering in *two* S-U courses a term;
- 3) S-U registration is limited to four credits for each course;
- 4) students registering for S-U grades must be in good standing;
- 5) students must fulfill the graduation requirement of 105 letter-graded credits.

ILR faculty members assign a grade of U for any grade below C- and a grade of S for any grade of C- or better. A grade of U is considered equal to an F in determining a student's academic standing, although it is not included in the cumulative average.

No change of grading (from letter to S-U or from S-U to letter) may be made after the first three weeks of class. There are no exceptions to this restriction, and appeals will not be accepted.

### Grades of Incomplete

A grade of incomplete is assigned when the course has not been completed for reasons that are acceptable to the instructor. It is understood that the work will be completed later and credit given. Instructors may grant a grade of incomplete for a limited number of clearly valid reasons, but only to students with substantial equity in a course. A firm and definite agreement on the conditions under which it may be made up must be made with the instructor. The school's policy allows a maximum of two full terms of residence for removal of a grade of incomplete. If it is not made up within this time, the grade automatically becomes an F.

## SPECIAL ACADEMIC PROGRAMS

To meet the special academic objectives of some students, the school's faculty has established several special academic programs. For additional information, students should contact a counselor in the Office of Student Services. Counselors will explore the program with students to help them decide if it suits their interests.

### Dual Registration in the Johnson Graduate School of Management

Dual informal registration in the Johnson Graduate School of Management leads to a Bachelor of Science degree in industrial and labor relations and a master's degree in management after five years of study and is open to students who meet the requirements of the Johnson Graduate School of Management.

Early planning by each student, preferably in the sophomore year, is desirable to ensure that the expectations of the Johnson Graduate School of Management and ILR curriculum requirements are fulfilled. Students interested in the very limited and selective program of the Johnson Graduate School of Management should contact the Admissions Office, 319 Malott Hall, and a counselor at the Office of Student Services.

### Five-Year Master of Science Degree Program

With early planning it is possible to earn the M.S. degree in a fifth year of study. This program is designed specifically for those who wish concentrated study in an area of specialization in the school for a Master of Science degree. Students considering this program should consult a counselor in the Office of Student Services after their freshman year.

### Internships

The Credit Internship Program has provided students with a vivid understanding of problems in labor and industrial relations through observation and participation in "real-life" labor problem solving. A number of selected students spend a term of the junior year in Albany, New York City, or Washington, D.C., in close contact with practitioners. Their activities include independent research under direction of ILR faculty members and seminars drawing on fieldwork experience with employers, labor organizations, and government agencies. More information about this program is available from the Office of Student Services.

### Honors Program

Undergraduates who are ranked in the top 20 percent of their class at the end of the junior year may propose a two-semester research project, an honors thesis, for review by the Committee on Academic Standards and Scholarships. When approved, the candidate for graduation with honors works for two semesters (for three credits in each term) to research, write, and then defend the thesis.

### Study Abroad

Cornell students with strong academic records and the necessary preparation in required and elective courses are encouraged to consider study abroad. The university currently has

contact with universities in more than 40 countries that permit undergraduates to register for courses while maintaining Cornell registration and financial aid for a semester or a year. Information about those opportunities may be requested from Cornell Abroad, 474 Uris Hall.

Some study abroad programs require the development of language proficiency and preparation in appropriate courses at Cornell. Students should consult the Office of Student Services and Cornell Abroad in the freshman and sophomore years to be sure that they comply with the academic and procedural requirements for study abroad.

## COLLECTIVE BARGAINING, LABOR LAW, AND LABOR HISTORY

H. Katz, chair; M. Cook, C. Daniel, I. DeVault, M. Gold, L. Gray, J. Gross, S. Kuruvilla, R. Lieberwitz, D. Lipsky, N. Salvatore, K. Stone, L. Turner

### ILRCB 100 Introduction to U.S. Labor History: Nineteenth Century

Fall. 3 credits. C. Daniel, I. DeVault, N. Salvatore.

This first semester of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States through the end of the nineteenth century.

### ILRCB 101 Introduction to U.S. Labor History: The Twentieth Century

Spring. 3 credits. Prerequisite: ILRCB 100. C. Daniel, I. DeVault, N. Salvatore.

This second semester of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States from the end of the nineteenth century up to the present.

### ILRCB 201 Labor and Employment Law

Fall. 3 credits. M. Gold, R. Lieberwitz, K. Stone.

A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework in which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

### ILRCB 300 Collective Bargaining (200)

Fall and spring. 3 credits. M. Cook, H. Katz, S. Kuruvilla, L. Turner.

A comprehensive introduction to industrial relations and collective bargaining in the United States; the negotiation, scope, and day-to-day administration of contracts; the major substantive issues in bargaining, including their implication for public policy; industrial conflict; the major challenges facing unions and employers today; U.S. industrial relations in international and comparative perspective.

### ILRCB 301 Labor Union Administration

Fall. 3 credits. Staff.

Study and analysis of the structure and operations of American unions, including the complicated internal life of the organizations; the varied environments in which unions develop and grow or decline; the relationship of national unions, local unions, and members in the many different sections of internal union government; the ways in which unions are set up to handle organizing, collective bargaining, contract administration, and political activity; and the widespread movement toward merger and consolidation of unions that began in the sixties and continues today. All of these will involve a study of union constitutions and other primary documents, in addition to secondary readings. Attention will be given to relevant legislation, current problems of unions, and the eternal problems of attaining union democracy.

### ILRCB 302 Strangers and Citizens: Immigration and Labor in U.S. History

Fall or spring. 3 credits. I. DeVault.

Will explore immigrant workers' experiences in the nineteenth and twentieth centuries from different perspectives. We will examine what it meant to the immigrants themselves to arrive as strangers in the United States while also examining the ways in which pre-existing American groups defined these immigrants as "strangers." Similarly, we will look at U.S. citizens in their roles as greeters of immigrants, detractors of immigrants, and as models for the aspirations of immigrants. Throughout the course our main examples will come from the industrial and union realms.

### ILRCB 304 Seminar in American Labor and Social History

Fall or spring. 4 credits. Permission of instructor. C. Daniel, I. DeVault, N. Salvatore.

An undergraduate seminar whose topic changes depending on semester and instructor.

### ILRCB 305 Introduction to Labor Arbitration and Alternative Dispute Resolution

Fall. 3 credits. J. Gross.

An introductory survey that focuses in part on the U.S. labor arbitration process in the private and public sectors (legal issues, discipline and discharge, contract language interpretation, remedies, and procedures) and in part on alternative dispute resolution systems in the United States and other countries. Student participation in class discussion is expected and assignments will include an original research paper.

### ILRCB 384 Women and Unions (also WOMNS 384)

Fall or spring. 4 credits. I. DeVault.

Will explore women's participation in the United States labor movement in the nineteenth and twentieth centuries. Issues covered will include women workers' relations with male-dominated union movements, the role of cross-class alliances of women in organizing women workers, interactions with radical parties and organizations, problems faced by women union leaders and activities, and others.

**ILRCB 385 The African-American Workers, 1865-1910: The Rural and Urban Experience**

Spring. 3 credits. Prerequisites: junior or senior or permission of instructor.  
N. Salvatore.

Examines the history of blacks in America from Emancipation through the experience of the first generation born after slavery, with a focus on the work experience. Topics will include the restructuring of work during Reconstruction; the relationship between work and black organizational developments; between black and white workers; and the nature of work in the agricultural south and in cities throughout the nation.

**ILRCB 386 The African-American Workers, 1910-the Present: Race, Work, and the City**

Fall. 3 credits. Prerequisites: junior or senior. N. Salvatore.

Examines the history of blacks in America from the start of the Great Migration through the 1970s, with a focus on the work experience. Topics will include the effect of migration and urbanization on black workers; the nature of the relationship between black and white workers as influenced by depression and two world wars; and an examination of the effect of the Civil Rights movement on the economic circumstances of black workers.

**ILRCB 400 Union Organizing**

Spring. 3 credits. Prerequisites: undergraduates, ILRCB 201 and 300; graduate students, ILRCB 500 and 501.

K. Bronfenbrenner.

Explores various aspects of unions' attempts to organize workers: why some workers join unions and others do not; strategy and tactics implemented by unions and management during organizing campaigns; present status of labor law as it affects organizing; creative approaches to union organizing; the organizing model of unionism.

**ILRCB 401 My Brother's Keeper: Volunteerism and Philanthropy**

Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.

The philosophy, practice, economics, and law of volunteering labor and donating money. Topics include altruism versus self interest; why individuals volunteer labor and raise and donate money; the structure and practices of charitable organizations; the economic effects of voluntary labor and philanthropic gifts; and the law of raising and distributing money.

**ILRCB 404 Contract Administration**

Fall. 3 credits. Prerequisites: ILRCB 300 and 201 or ILRCB 500 and 501.

K. Bronfenbrenner.

This course will focus on the practice, nature, and challenges of union representation under collective bargaining agreements. Working with union contracts, constitutions, and by-laws from a diversity of national and local public and private sector agreements, the course examines how U.S. unions represent their members in different industries and different collective bargaining environments. Issues to be addressed include union representative/steward rights and responsibilities, contract enforcement structures and practice, access to information, new work systems, hours of work and scheduling, contingent staffing arrangements, workplace discrimination, health and safety, promotional opportunities, down-sizing, leadership development, membership involvement and

commitment, internal organizing, community coalition building, and decertification campaigns. Students will practice hands-on work in interpreting contract language and preparing and presenting grievances and unfair labor practices.

**ILRCB 405 Negotiation & Dispute Resolution**

Spring. 3 credits. Prerequisites: background in economics and social sciences.

Permission of instructor. D. Lipsky.

Distance Learning. Deals with four related topics: (1) nature of conflict particularly between organizations; (2) negotiation and bargaining, with a focus on process, practice, and procedures; (3) third party dispute resolution, with a focus on mediation and arbitration; and (4) alternative dispute resolution (ADR), with a focus on its current use in the corporate sector and the implications for our system of justice. It will be a generic dispute resolution course, i.e. it will not focus on labor relations or any particular types of disputes, but will deal with many different kinds of conflicts. Will use examples and cases to illustrate general principles. Few if any of these cases and examples will be drawn from labor relations, rather, illustrative material in the course will be based on exercises in areas such as product liability, environmental regulation, commercial relations, and personal injury disputes.

**ILRCB 407 Contemporary Trade Union Movement**

Spring. 3 credits. Prerequisites: undergraduates, ILRCB 100, 101, graduate students ILRCB 502. R. Seeber, R. Hurd.

An examination of contemporary trade union issues, including union power, political action, collective bargaining approaches, and organizing efforts. The course will cover structural, functional, and strategic aspects of contemporary unions. Speakers from the union movement will address the class.

**ILRCB 482 Ethics at Work**

Fall or spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.

Major theories of ethics are examined, then applied to issues in the employment relationship such as genetic screening of job applicants, random drug testing of employees, affirmative action, discipline for off-duty conduct, whistle-blowing, worker safety and cost/benefit analysis, comparable worth, strikes by employees providing crucial services, and crossing a picket line.

**ILRCB 488 Liberty and Justice for All**

Fall or spring. 3 credits. Prerequisite: junior or senior or permission of instructor. M. Gold.

Major theories of ethics are examined, then applied to contemporary issues such as affirmative action and reverse discrimination, the right to life (from abortion to capital punishment), comparable worth, and constitutional rights such as freedom of speech.

**ILRCB 495 Honors Program**

Fall and spring (yearlong course). 3 credits each term. Admission to the ILR senior honors program may be obtained under the following circumstances: (a) students must be in the upper 20 percent of their class at the end of their junior year; (b) an honors project, entailing research leading to completion of a thesis, must be proposed to an ILR faculty member who agrees to act as thesis supervisor; and (c) the project, endorsed by the proposed faculty sponsor, is submitted to the Committee on Academic Standards and Scholarships.

Accepted students embark on a two-semester sequence. The first semester consists of determining a research design, familiarization with germane scholarly literature, and preliminary data collection. The second semester involves completion of the data collection and preparation of the honors thesis. At the end of the second semester, the candidate is examined orally on the completed thesis by a committee consisting of the thesis supervisor, a second faculty member designated by the appropriate department chair, and a representative of the Academic Standards and Scholarship Committee.

**ILRCB 497-498 Internship**

Fall and spring. 497, 3 credits; 498, 6 credits. Staff.

All requests for permission to register for an internship must be approved by the faculty member who will supervise the project and the chairman of the faculty member's academic department before submission for approval by the director of Off-Campus Credit Programs. Upon approval of the internship, the Office of Student Services will register each student for 497, for 3 credits graded A+ to F for individual research, and for 498, for 6 credits graded S-U, for completion of a professionally appropriate learning experience, which is graded by the faculty sponsor.

**ILRCB 499 Directed Studies**

Fall and spring. 3 credits.

For individual or group research projects conducted under the direction of a member of the ILR faculty, in a special area of labor relations not covered by regular course offerings. Sophomores, juniors and seniors with a preceding semester of 3.0 term average, are eligible to submit projects for approval by the Academic Standards Committee. Students should consult with a counselor in the Office of Student Services at the time of CourseEnroll in order to arrange for formal submission of their Directed Study.

**ILRCB 500 Collective Bargaining**

Fall. 3 credits. Open only to graduate students. Recommended: ILRCB 501 taken previously or concurrently. M. Cook, R. Hebdon, H. Katz, S. Kuruvilla, L. Turner. A comprehensive introduction to the industrial relations system of the United States. The negotiation, scope, and day-to-day administration of contracts; union and employer bargaining structures; implications of industrial relations issues for U.S. competitiveness and public policy; industrial conflict; and U.S. industrial relations in international and comparative perspective.

**ILRCB 501 Labor and Employment Law**

Fall. 3 credits. Open only to graduate students. M. Gold, R. Lieberwitz, K. Stone. A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework in which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

**ILRCB 502 History of Industrial Relations in the United States since 1865**

Spring. 3 credits. Open only to graduate students. C. Daniel, I. DeVault, N. Salvatore.

This introductory survey course emphasizes historical developments in the twentieth century. Special studies include labor union struggles over organizational alternatives and such other topics as industrial conflicts, working-class life styles, radicalism, welfare capitalism, union democracy, and the expanding authority of the federal government.

**ILRCB 504 The U.S. Industrial Relations System**

4 credits. Offered only in New York City for the M.P.S. Program. Staff. Examines the development, operation, and outcomes of the U.S. industrial relations system in a comparative context. Specifically, the course contrasts the American experience with industrial relations institutions and outcomes with the experience of several other countries in Europe and Asia. We will look at the process of union formation, the practice of collective bargaining at different levels, the methods of dispute resolution, and the legal regime germane to industrial relations.

We will also focus on both processes and outcomes of different country systems, focusing on the degree of collaboration or conflict, wage levels and wage inequality, and practices in different industries and firms. Finally we will attempt to address the role played by industrial relations and human resource policy in economic and social development in these nations.

**ILRCB 602 Arbitration**

Fall and spring. 4 credits. Limited to 21 students. Prerequisites: undergraduates, ILRCB 201, 300; graduate students, ILRCB 500 and 501; permission of instructor. J. Gross, R. Lieberwitz.

A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of a mock arbitration hearing, and the preparation of arbitration opinions and post-hearing briefs.

**ILRCB 603 The Economics of Collective Bargaining in Sports**

Fall or spring. 3 credits. L. Kahn. Surveys economic and industrial issues in the sports industry. Topics include (1) salary determination, including free agency, salary caps, salary arbitration; (2) competitive balance and financial health of sports leagues;

(3) anti-trust issues in sports; (4) labor disputes, union history, and contract administration issues in sports leagues; (5) discrimination in sports; and (6) performance incentives.

**ILRCB 604 Theories of Equality and Their Application in the Workplace**

Spring. 3 credits. R. Lieberwitz. An examination of the various aspects of equality in the workplace, focusing on issues of race, gender, and national origin, and the ways in which societal discrimination on these bases are institutionalized in the workplace. Theories attempting to define "equality" and specific workplace issues are studied, including the means for achieving equality at the workplace. The course entails a high level of student participation in class discussions, and assignments include a research paper.

**ILRCB 605 Readings in the History of Industrial Relations in the United States**

Fall. 3 credits. Limited to seniors and graduate students. C. Daniel, N. Salvatore. A seminar covering, intensively, original printed sources and scholarly accounts for different periods in American history.

**ILRCB 606 Theories of Industrial Relations Systems**

Fall or spring. 3 credits. Limited to seniors and graduate students. Prerequisites: seniors, ILRCB 100, 101, 300; graduate students, ILRCB 500. H. Katz.

Will trace the evolution of theory and research on industrial relations. Topics include: theories of the labor movement, institutional models and evidence regarding what unions do, the origins of internal labor markets and their relationship with unionization, models of strikes, empirical assessments of arbitration, research on union decline, and empirical evidence of the impacts of new technology.

**ILRCB 607 Values in Law, Economics, and Industrial Relations**

Fall and spring. 3 credits. Limited to 21. Prerequisites: ILRCB 201, 300, 500, 501. J. Gross. An examination of the often hidden values and assumptions that underlie the contemporary U.S. systems of employment law, work and business, and industrial relations. Classroom discussions and student research projects will use novels and short stories (as well as the literature of industrial and labor relations) to focus on issues such as: discrimination; law, economics, and the state; work and business; power, conflict, and protest; and rights and justice.

**ILRCB 608 Special Topics in Collective Bargaining, Labor, Law, and Legislation**

Fall. 3 credits. Lec 08 open to juniors and seniors. S. Kuruvilla. This course introduces ILR undergraduates to the research process and to research methods used in the area of industrial relations. The course is organized in two parts. The first part will deal with the nature of the research process, paradigms of inquiry, developing research questions, the role of theory in research, and the development of research proposals. Part 2 will focus on acquainting students with the research methods used in the field of industrial relations (broadly defined). Each week students will read selected research articles in several fields (e.g., labor economics, collective bargaining, human resource management, and organizational

behavior), understand and critique the methodology, and discuss alternate approaches that could have been used. Where possible, the faculty member who has written articles will be present to defend the methods used. Students will turn in a completed research proposal or completed research as the final product for the course.

**ILRCB 609 Special Topics: Labor Law Policy Seminar**

Spring. 3 credits. K. Stone. The United States collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time the decline in the labor movement has undermined its political support. This seminar will look at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Some of the topics to be discussed: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative concepts of labor markets and their policy ramifications; the emerging of the global economy and its ramifications for domestic labor regulation. There will also be discussion of alternative systems of labor regulation, such as found in West Germany, Sweden, and Japan.

**ILRCB 650 Service Work and Workers in Historical Perspective**

Fall or spring. 3 credits. I. DeVault. Takes a historical perspective on the development of a service economy in the United States. Readings will include general and theoretical works, but the main focus will be recent historical scholarship on specific occupations and situations in the "nonproductive" workforce. Students will explore primary sources for research on the subject and write research papers.

**ILRCB 651 Industrial Relations in Transition**

Spring. 3 credits. Limited to seniors and graduate students. H. Katz. Considers whether recent developments such as concession bargaining, worker participation programs, and the growth of nonunion firms represent a fundamental transformation in industrial relations practice. Will review recent research and new theories arguing that such a transformation is occurring, including the work of Piore and Sabel, Bluestone and Harrison, and Kochan, McKersie, and Katz. Will also review the counterarguments and evidence put forth by those who believe no such transformation is under way. Course material will focus on industrial relations practice in the private sector in the United States, although some attention will be paid to developments in Western Europe, the United Kingdom, and Japan.

**ILRCB 655 Employment Law**

Spring. 3 credits. Prerequisites: ILRCB 201/501. M. Gold. Examines a number of major federal and state laws designed to protect workers in their employment relationships. The material covered will be selected from the following: the Fair Labor Standards Act, unemployment insurance, workers' compensation, the Occupational Safety and Health Act, the Employee Retirement Income Security Act, the doctrine of employment at will, Social Security, workers' right-to-know, plant closings, and protection of workers' privacy.

**ILRCB 682 Seminar in Labor Relations Law and Legislation**

Fall or spring. 3 credits. Limited enrollment. Prerequisite: permission of instructor. R. Lieberwitz.

Legal problems in public employment and other areas of labor relations affecting the public interest.

**ILRCB 683 Research Seminar in the History of Industrial Relations**

Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 100 and 101; graduate students, ILRCB 502. C. Daniel, I. DeVault, N. Salvatore.

The areas of study are determined each semester by the instructor offering the seminar.

**ILRCB 684 Employment Discrimination and the Law**

Fall. 3 credits. Prerequisite: ILRCB 201/501 or equivalent. M. Gold.

An examination of the laws against employment discrimination based on race, color, religion, sex, national origin, age, and disability.

**ILRCB 685 Research Seminar on Trade Unions**

Fall or spring. 3 credits. Prerequisite: ILRCB 300 or 500; permission of instructor. S. Kuruvilla.

Designed to provide an analytical survey of research on trade unions in the United States. Major topics include unions in politics, unions as complex organizations, public opinion and attitudes toward unions, determinants of union growth and decline, economic and noneconomic effects of unions, internal union government, and commitment and participation in trade union activity. This is a research-oriented course.

**ILRCB 686 Collective Bargaining in the Public Sector**

Fall or spring. 3 credits. Prerequisites: undergraduates, ILRCB 300 and 201; graduate students, ILRCB 500 and 501. Staff.

An examination of the development, practice, and extent of collective bargaining between federal, state, and local governments and their employees. The variety of legislative approaches to such matters as representation rights, unfair practices, scope of bargaining, impasse procedures, and the strike against government are considered along with implications of collective bargaining for public policy and its formulation.

**ILRCB 689 Constitutional Aspects of Labor Law**

Spring. 3 credits. R. Lieberwitz.

In-depth analysis of the Supreme Court decisions that interpret the United States Constitution as it applies in the workplace. This study will focus on the First Amendment, Fifth Amendment, Fourteenth Amendment, and Commerce Clause, with issues including freedom of speech and association, equal protection, due process, and other issues in the area of political and civil rights. The course entails a high level of student participation in class discussion, and assignments include a research paper.

**ILRCB 703 Theory and Research in Collective Bargaining**

Spring. 3 credits. Open to graduate students who have had ILRCB 500 and ILROB 723 or their equivalents. Recommended: a statistics course beyond the level of ILRST 510. Staff.

This is a second-level course in collective bargaining that builds on the institutional research covered in ILRCB 500. The existing literature in the area of collective bargaining is appraised for its theoretical and empirical content. Efforts are made to explore the appropriate role for theory and empirical analysis in moving research in collective bargaining toward a more analytical perspective and to identify and appraise the underlying paradigms used to study collective bargaining-related issues.

**ILRCB 705 The Economics of Collective Bargaining**

Spring. 3 credits. Prerequisites: ILRCB 500; ILRLE 540 (or their equivalents) and an understanding of multiple regression analysis; or permission of instructor. Staff.

Focuses on both the economic analysis of unions and collective bargaining in our economy and on the economic forces that affect collective bargaining. The method is to identify and conceptualize the structural determinants of relative bargaining power. On this basis, the course examines both the economic outcomes of collective bargaining and current bargaining trends in a variety of industries. Tentative theoretical analyses of unionism (neoclassical, institutionalist) are compared. The statistical techniques and empirical results of research on the union effect on economic outcomes (wages, prices, inflation, profits, productivity, earnings inequality) are also evaluated. The effect of technology, corporate structures, and public policy on union bargaining power is outlined, and a number of case studies of collective bargaining in the private sector are reviewed. A term paper is required.

**ILRCB 783 Seminar in American Labor History**

Spring. 3 credits. Permission of instructor. N. Salvatore.

A reading and research seminar for graduate students that focuses on selected topics in nineteenth- and twentieth-century labor history. The topic changes each semester.

**ILRCB 790 ILR M.P.S. Program**

Fall and spring. 1-9 credits. Staff.

Supervised research only for those enrolled in the ILR M.P.S. program.

**ILRCB 798 Internship**

Fall and spring. 1-3 credits.

Designed to grant credit for individual research under direction of a faculty member by graduate students who have been selected for an internship. All requests for permission to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

**ILRCB 799 Directed Studies**

Fall and spring. Credit TBA.

For individual research conducted under the direction of a member of the faculty.

**ILRCB 980 Workshop in Collective Bargaining, Labor Law, and Labor History**

Fall and spring. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only. Staff.

Designed to provide a forum for the presentation of current research being undertaken by faculty members and graduate students in the Department of Collective Bargaining, Labor Law, and Labor History, and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

**HUMAN RESOURCE STUDIES**

P. Wright, chair; R. Batt, J. Bishop, J. Boudreau, V. Briggs, R. Broderick, M. Cavanaugh, C. Collins, L. Dyer, G. Milkovich, Q. Roberson, W. Wasmuth, T. Welbourne

**ILRHR 260 Human Resource Management**

Fall. 3 credits. Open only to ILR students; others by permission. R. Batt and staff.

An introductory overview of the management of human resources in organizations. Topics include human resource decisions dealing with staffing, employee development, work-system rewards, and employee relations. Emphasis is on (a) problem-solving and decision-making approaches; (b) operational methods, technologies, and practices; (c) application of relevant behavioral science theory and research; and (d) legislation and other environmental constraints having an important bearing on the effective use of human resources by an enterprise.

**ILRHR 266 Personal Computer Basics**

Fall, spring, and summer. 2 credits. Limited. Staff.

Provides basic skills in the use of IBM personal computers (PCs) using the Windows environment. Course covers basic fundamentals of Lexis Nexis, Windows 95, Microsoft Excel, Access, and Powerpoint. Emphasis is placed on hands-on experience using examples demonstrating human resource issues and PC-based solutions. This course is a prerequisite to several advanced Human Resource Management electives.

**ILRHR 360 Human Resource Economics and Public Policy**

Fall, spring. 3 credits. Open to sophomores, juniors, and seniors. J. Bishop, V. Briggs.

A review of labor-market trends, data collection systems, and theories pertaining to public efforts to develop the employment potential of the nation's human resources and to combat unemployment. The major segments of the nation's educational training enterprise—public education, higher education, employer-provided training, apprenticeship, and special training programs for the disadvantaged—are examined. Special policy and programmatic issues pertaining to youth, rural workers, welfare reform, direct job creation, worker relocation, economic development, targeted tax credits, industrial policy, and "enterprise zone" proposals are examined. Comparisons are made with other industrialized nations.

**ILRHR 362 Career Development: Theory and Practice**

Fall, spring. 2 credits. 7 weeks. Limited to 30. S-U only. J. McPherson.

The components of career management: individual factors and organizational realities in the development of both careers and organized programs for career management. Two complementary learning tasks required: information-gathering for career decision making based on self-assessment activities, and comprehension of organizational circumstances and practices encountered as careers develop. Grade based on short writing assignments and research paper.

**ILRHR 363 Leadership Seminar for Fraternities and Sororities**

Spring. 2 credits. S-U only. Permission of instructor. Staff.

Provide students with an opportunity to develop their leadership and management skills. The philosophy of the class is that fraternity and sorority houses are small businesses and the leadership must be capable of effective managing and leading in order for them to succeed. The learning method will be "hands on" with participants working on weekly assignments that involve their application of lessons learned to their current job duties. Students will participate in role plays, class discussions, meetings with guest speakers and debriefing sessions where they report the results of using the material obtained from class in their current situations.

**ILRHR 366 Women at Work**

Spring. 3 or 4 credits. J. Farley.

Various aspects of female occupational roles in twentieth-century United States. Historical, social, and legal factors that influence women's choice of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

**ILRHR 456 International Human Resource Management**

Spring. 3 credits. Staff.

Will provide an examination of international human resource management issues in multinational enterprises. The course has two major objectives: to enhance understanding of key strategic and functional issues related to IHRM, and to develop analysis of practical IHRM issues in multinational enterprises. Will include topics such as strategic issues for IHRM, cross-cultural management issues, coordination issues, and expatriate management.

**ILRHR 460 Human Resource Strategies for Entrepreneurial Firms**

Fall. 4 credits. Open to juniors and seniors. ILR 260 or permission of instructor. Staff.

This class uses a semester-long case study that focuses on human resource issues and strategies for growing, entrepreneurial firms. Students solve weekly dilemmas by integrating their knowledge of the functional areas of human resource management with general management, human resource strategy, entrepreneurship, accounting/finance, marketing, public relations, and small business management. Creative solutions to problems are communicated to the class via role plays, formal presentations, impromptu meetings, and class discussions. In addition to the semester-long case study, students work in teams to develop their own case of an existing company. The emphasis is on integration of

concepts, application to real-life business situations, and acquisition of general management skills and knowledge.

**ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives**

Fall or spring. 3 credits. Prerequisite: ILR 260 or equivalent and consent of instructor. Limited to juniors and seniors. R. Batt.

Seminar designed to explore the state of knowledge and current research concerning the design and development of alternative work systems. The focus is on understanding alternative approaches to work restructuring and their differential effects on firm competitiveness and employee welfare. The first half of the course considers classic texts on mass production, flexible specialization, sociotechnical systems, diversified quality production, and lean production. It compares these workplace models in their original national contexts and in subsequent transplants. Relevant research from economics, engineering, organizational behavior, human resources, and industrial relations is examined. The second half of the course considers these alternative approaches to restructuring in the context of specific manufacturing and service industries and occupational groups. Students are required to hand in weekly memos covering the readings, actively participate in seminar discussions, and write two research papers on topics relevant to the course.

**ILRHR 462 Staffing, Training, and Development**

Spring. 3 credits. Prerequisites: ILRHR 260 or by permission of the instructor. C. Collins.

Provide overviews of the staffing, training, and development functions in organizations. The first half of the semester will focus on the process by which organizations fill positions. Topics will include legal issues, job/competency analysis and planning, external selection practices, and internal staffing decisions. The second half of the semester will focus on the process by which organizations train and develop employees. Topics will include training needs assessment, program design, training evaluation, and management development practices. Throughout the semester we will examine the relationship between the staffing and training/development functions.

**ILRHR 463 Employee Relations and Diversity**

Fall. 3 credits. Q. Roberson.

Explores the policies, programs, and practices used by employers to promote the fair treatment of employees, especially managerial, professional, and other employees not covered by collective bargaining contracts. Includes such policies as the protection of employee rights and the nature of processes used to allocate organizational opportunities and rewards; such programs as employee assistance plans and due process procedures; and elements of such practices as employee communication and supervision. Also examines individual and organizational climate factors that are important to the management of diversity in business organizations. Considers variations in employee relations and diversity management strategies, the motives of employers in establishing such strategies, and the effects of these strategies on relevant individual and organizational outcomes.

**ILRHR 464 Business Strategy**

Fall. 3 credits. C. Collins.

Intended to be an integrative course focusing on strategic management. The main purpose of the course is to provide an opportunity for students to study and analyze issues associated with strategic thinking in complex business situations, top management decision making, and the functions of corporations as a whole. Will allow students to bring together all of the functional skills they have learned in other business or related classes (e.g., marketing, accounting, finance, human resources, etc.) and to apply this knowledge to business problems faced by top management in existing organizations. Class will be comprised of both a lecture and case study format.

**ILRHR 466 Comparative Human Resource Management**

Fall. 3 credits. Staff.

Provides a survey of human resource management practices in two key regions: Europe and the Asia-Pacific region. Focus of this course is on HRM issues such as selection and staffing, training and development, and appraisal and reward systems. Special attention is given to HRM trends and developments. Issues of transferability of HRM practices, and implications for multinational enterprises operating in those regions, will also be discussed.

**ILRHR 468 Human Resources Management Simulation**

Spring. 2 credits. Limited to 30 juniors and seniors. Prerequisite: ILRHR 260 or equivalent. 7 weeks. W. Wasmuth.

Uses a simulation model and an open-systems approach as means to enhance students' skills in strategic planning and managerial decision making. Attention will be given to the implications and efforts of strategic human resource managerial and supervisory decisions as measured by 10 organizational performance indicators, including quality of work life, employee productivity, customer satisfaction, employee retention, internal control, and the bottom line. Each student will be assigned to a group (team) of five members and must be committed to the work of that group. An individual research paper is also required. Regular attendance is required.

**ILRHR 469 Immigration and the American Labor Force**

Fall and spring. 3 credits. V. Briggs.

Assesses the role that immigration policy plays as an instrument of human resource development in the United States. Immigration policy will be placed in an evolutionary context but primary attention will be given to the post-1965 revival of mass immigration. In addition to legal immigration, policies pertaining to border commuters, illegal immigration, "maquiladoras," refugees, asylees, and nonimmigrant workers are also examined. Comparisons are also made with immigration systems of other nations.

**ILRHR 495 Honors Program**

Fall and spring (yearlong course). 3 credits each term.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRHR 497-498 Internship**

Fall and spring. 3 and 6 credits.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRHR 499 Directed Studies**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRHR 560 Human Resource Management**

Fall and spring. 3 credits. Open only to graduate students. Q. Roberson.

A survey course covering the major areas of the management of human behavior in work organizations. Consideration is given to such aspects of strategic and human resource planning, design and management of workteams, staffing, training, and management development, organization development, compensation, and employee and labor relations. Emphasis is on the application of theory and research to the solution of personnel problems.

**ILRHR 564 Human Resources Management in Effective Organizations**

Fall or spring. 4 credits. Offered only in New York City for the M.P.S. Program. Staff.

This course offers the opportunity to become better prepared to make effective decisions about human resources. Successful organizations depend on people; their human resources. The first module examines strategic human resource management and the effects of HR decisions on organization success and fair treatment of people. Another module focuses on alternative systems used to staff and develop people. The third module focuses on compensating and rewarding people. And the final module includes employee relations and alternative work systems. Case and field studies are used throughout the course.

**ILRHR 653 Research on Education Reform and Human Resource Policy**

Spring. 3 credits. J. Bishop.

State and local efforts to improve K-12 education are employing a variety of (sometimes contradictory) reform strategies. A research seminar that will critically examine the case that is made for (and against) each of the major reform proposals and review studies that provide objective evidence on their effectiveness. The education reform strategies that will be examined include: vouchers, charter schools, site-based decision making by teachers and parents, smaller classes, direct instruction versus discovery learning, extending the school day and year, better preparation and selection of new teachers, better professional development, ending tenure, merit pay, state standards and school accountability, ending social promotion, and externally set end-of-course examinations.

**ILRHR 656 International Human Resource Management (also NBA 588)**

Fall. 3 credits. Prerequisite: ILRHR 260/560. Limited. Seniors or graduate students only or permission of the instructor. Staff.

The focus of the course is on international human resource strategies in multinational firms. It has two major objectives: to enhance the understanding of key functional and strategic issues related to HRM activities in international firms, and to review practical applications of concepts learned from the course in leading U.S. corporations. In the first part of the course, the emphasis is on the theory of international HRM; the second part is focused on field analysis. During the semester, students will conduct TEAM

research on state-of-the-art IHRM practices in leading U.S. multinationals. In addition, each student will prepare a review paper on one specific area of IHRM of his or her choice.

**ILRHR 661 Applied Personal and Organization Development**

Spring. 3 credits. Staff.

An experiential course that deals with OD and its role in the organizational change process. Combines the opportunity for hands-on practice in a workshop setting. Students will have responsibility for researching and writing a paper that examines a specific method, technique, or critical issue; an in-class demonstration/presentation illustrating applications of a chosen subject; and a final project requiring a comprehensive proposal that describes an appropriate and logically supported intervention strategy.

**ILRHR 662 People in Agile Organizations**

Fall. 4 credits. Prerequisites: ILRHR 260, 560, or equivalent, plus two functional courses in HR management. Enrollment limit, 25. L. Dyer.

Organizational agility is defined as the capacity to be infinitely adaptable without having to change. It is a core competence for organizations operating in rapidly moving marketplaces. Accordingly, an increasing number of organizations are striving to become more agile by inventing new ways of managing all aspects of organizational capability. Course explores the opportunities and challenges posed by organizational agility, with particular emphasis on crafting human resource strategies that support this evolving paradigm. Every effort is made to run the course as an agile organization rather than using a traditional classroom format.

**ILRHR 664 HR Online Research and Reporting Skills**

Fall. 3 credits. J. Boudreau, S. Basefsky.

Designed to teach students skill-based techniques in HR research methodology. The students will be taught to act as their own consultants in both a classroom and workforce setting as they access data and find statistical information to support their research topics. The first five weeks of the semester will consist of weekly meetings with the reference librarians at the Martin P. Catherwood Library. These meetings will cover a different research technique each week, and students will be given readings and a hands-on assignment to gain practical experience on these techniques.

**ILRHR 665 Business Strategy and Human Resources**

Fall. 4 credits. Limited. Prerequisite: ILRHR 260/560 plus 2 other courses in human resource studies and permission of instructor. P. Wright.

As the capstone course in HR studies, students will integrate the theories and practices learned in other courses, to explore the linkages between business strategy and HRM. Extensive fieldwork is involved. The field projects are designed to require students to explore and understand business strategy and to draw upon and integrate their course work in HR planning, staffing, development, compensation and regard, and new work systems.

**ILRHR 666 Human Resource Metrics**

Fall. 4 credits. Prerequisites: ILRHR 260/560 or equivalent, 1 course in statistics, 1 elective in human resource studies. J. Boudreau.

Explores how to account for the contribution of human resource management programs and decisions to achieving organizational goals. It emphasizes a systematic decision-making system that organizes the discipline of human resource management and can assist in planning and evaluating programs. Topics include the role of financial-accounting statements in managing human resources, cost-benefit analysis for programs, managing human resources as a profit center, and identifying human resource management constituents to address their goals.

**ILRHR 667 Employee Relations and Diversity**

Spring. 4 credits. Prerequisites: ILRHR 260/560 or equivalent and permission of instructor. Q. Roberson.

Explores the policies, programs, and practices used by employers to promote the fair treatment of employees, especially managerial, professional, and other employees not covered by collective bargaining contracts. Includes such policies as the protection of employee rights and the nature of processes used to allocate organizational opportunities and rewards; such programs as employee assistance plans and due process procedures; and elements of such practices as employee communication and supervision. Also examines individual and organizational climate factors that are important to the management of diversity in business organizations. Considers variations in employee relations and diversity management strategies, the motives of employers in establishing such strategies, and the effects of these strategies on relevant individual and organizational outcomes.

**ILRHR 668 Staffing Organizations**

Spring. 4 credits. Limited to 25 students.

Prerequisites: ILRHR 260/560 or equivalent, 1 course in statistics. M. Cavanaugh.

This seminar provides an overview of the process by which organizations staff positions from pools of external and internal applicants. Will focus on theories, research, policies, and practices concerning attraction and selection for the most effective use of human resources. Topics covered in the course include staffing strategy and context, measurement of staffing effectiveness, job/competency analysis and human resource planning, recruitment and job choice, initial and substantive external selection practices, and internal staffing decisions. Throughout the course, considerable emphasis will be placed on relevant legislation and court decisions, and practical application of relevant theory and past research.

**ILRHR 669 Managing Compensation**

Fall and spring. 4 credits. Limited to 30 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 266 and basic statistics or permission of instructor. R. Broderick, G. Milkovich.

Focuses on managing employee compensation in contemporary organizations. The major objectives are: to examine the current state of compensation decision making, to examine how recent theoretical and research developments inform compensation decisions, and to offer an opportunity to develop competencies in making compensation decisions.

**ILRHR 670 Seminar in Manufacturing**

Spring. 15 credits. Staff.

Semester in Manufacturing ("SiM") is designed to give students a basic understanding of the fundamentals of manufacturing, as well as a broad overview of current issues and trends. The 15-credit immersion format allows development of the linkage of manufacturing to other functions in the enterprise (research and development, marketing, corporate strategy, human resources, etc.) A highlight of SiM is that each student will visit more than 20 manufacturing facilities during the semester, representing diverse sets of products, processes, and manufacturing strategies. These visits include extended discussion sessions with management, and often union representatives, as well as a factory tour. These visits bring the "real-world" perspective to the course. SiM is built around five basic themes. The 15-credit immersion format allows each theme to be discussed in depth, and the interrelationships between themes to be developed over the semester, giving students a broad understanding of how an enterprise functions.

**[ILRHR 690 Comparative Human Resource Management**

3 credits. Prerequisites: ILRHR 260/560, or permission of instructor. Not offered 2000–2001. Staff.

Surveys human resource practices in two key regions of the world: Western Europe and the Pacific Rim. The focus is on HR issues related to management of professional and managerial work force, such as selection and staffing, development, and appraisal and reward systems. Special attention is given to current changes and trends in the human resource management area (e.g., unification of Europe, transformation of Japanese firms). Implications for multinationals operating in these countries will also be discussed.]

**[ILRHR 691 Human Resource Planning and Strategy**

2 credits. Limited. Prerequisites: ILRHR 560 or equivalent, one course in statistics, and permission of instructor. 7 weeks. Not offered 2000–2001. L. Dyer.

Covers the content of human resource strategies and the process of human resource planning. The emphasis is on developing human resource strategies that are integrated with firm business strategies. Covered are methods and techniques used to forecast and plan for organization structures and processes, work force population, employee contribution, and employee morale. Much of the course is organized around cases and simulations in which students make policy and program decisions for fictional organizations. Decisions are evaluated on the basis of their contributions to the organizations' human resource and business objectives.]

**[ILRHR 692 Training the Displaced and Disadvantaged**

3 credits. Prerequisite: permission of instructor. Not offered 2000–2001. J. Bishop.

Examines public and private efforts to lower unemployment and underemployment of displaced and disadvantaged workers. The seminar examines the scope of the problem, its causes, and why specific programs have worked and others have not. Topics covered will include training for displaced workers, rehabilitation of the disabled, job-search training, tax credits for hiring, vocational training, literacy instruction, EEO, public

service employment, assisting new business, and industrial policy. The seminar also investigates how the structure of the economy influences the ability of targeted training and job creation to achieve sustained reductions in unemployment and draws lessons from the experience of other societies.]

**ILRHR 693 Training and Development in Organizations**

Spring. 3 credits. Prerequisites: ILRHR 260/560 or equivalent, 1 course in statistics or permission of instructor. M. Cavanaugh.

The purpose of this course is to acquaint students with aspects of learning in organizations. We will begin by discussing organizational learning, and then focus more narrowly on specific ways in which learning is achieved through the training and development functions. Topics throughout the semester include: how learning is linked to organizational strategy, how to determine that training is needed, issues regarding the design of training programs, current training techniques, evaluation strategies, and management development practices.

**[ILRHR 694 Human Resource Information System Applications**

4 credits. Limited to 22 students. Prerequisites: ILRHR 260/560 or equivalent; ILRHR 266; at least 1 upper-level HRS elective; basic statistics; and permission of instructor. Not offered 2000–2001. J. Boudreau.

Explores the development, implementation, and management of computerized personnel information systems and their use in human resource management. Theories and concepts relevant to the design and implementation of such systems are presented and used as the framework for hands-on experience with personal and mainframe computer systems. Students create and use applications of current popular human resource software to design their own applications and present them to the class. Where possible, student applications are based on field work in actual organizations.]

**ILRHR 695 Education, Technology, and Productivity**

Fall. 3 credits. J. Bishop.

The seminar investigates the nexus between the education and training in schools and at the workplace and the technological progressiveness, productivity, and competitiveness of firms, individuals, and nations. We will investigate (1) how technological progress is changing the nature of work and what this implies for reform of education and training, (2) why United States productivity has increased so little in the past two decades, (3) how education and training contribute to growth and competitiveness, (4) why educational achievement has declined, and (5) how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

**ILRHR 697 Special Topics in Resource Studies**

Fall or spring. 3 credits. Staff. The areas of study are determined each semester by the instructor offering the seminar.

**ILRHR 698 International Human Resource Policies and Institutions**

Fall. 3 credits. J. Bishop.

A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education) and of the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeship, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand how human resource policies and institutions have contributed to the rapid growth and low levels of inequality in Europe, Japan, and the Pacific Rim nations. Another focus of the course is understanding the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

**ILRHR 760 Seminar in Human Resource Studies**

Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669 and permission of instructor. P. Wright.

A "floating" seminar designed to give faculty and students an opportunity to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

**ILRHR 765 International Compensation**

4 credits. G. Milkovich.

Seminar focuses on international developments in employee compensation. Will study recent research, theoretical developments, and specific organizations' practices in a wide variety of countries. Local national practices will be our principal focus along with expatriates and others. Almost everyone believes they are experts in pay, so we will be drawing upon research and theories from sociology, economics, psychology, etc. Four operative terms are seminar, comparative, compensation, and organization. This is a seminar, so come to each session prepared to be an active player in discussions. Our focus is comparative, including research, theory, and practices of specific enterprises in different countries. Compensation includes all forms of pay including cash, benefits, allowances, and so on. Primary focus is at the organization level of analysis.

**ILRHR 767 Human Resource Strategies for Entrepreneurial Firms**

Fall or spring. 4 credits. Open to graduate students only. ILRHR 560, equivalent, or permission of instructor. Staff.

For course description, see ILRHR 460.

**ILRHR 769 Topics in International Compensation Theory and Research**

Spring. 4 credits. Prerequisite: ILRHR 669. G. Milkovich.

Examines recent developments in theory, research, and practice related to compensation. Discussion emphasizes the relevance of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.

**ILRHR 790 ILR M.P.S. Program**

Fall and spring. 1-9 credits.  
Supervised research only for those enrolled in the ILR M.P.S. program.

**ILRHR 798 Internship**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRHR 799 Directed Studies**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRHR 960 Workshop in Human Resource Studies**

Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. S-U grades only. Staff.

The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guests in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are urged to enroll; candidates in other departments are cordially invited. Each participant will have an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

**[ILRHR 961 Doctoral Research Seminar in Human Resource Management]**

Fall. 3 credits. Ph.D. candidates only. Not offered 2000-2001. P. Wright.

This seminar is aimed at reading, understanding, and conducting research in HRM. Students should obtain thorough understanding of the current research in traditional areas of HRM such as validation, job analysis, EEO, selection, performance appraisal, compensation, and training, and should develop the skills necessary to evaluate, criticize, and contribute to the literature on HRM.]

**ILRHR 962 Doctoral Research Seminar in Strategic Human Resource Management**

Spring. 3 credits. Ph.D. candidates only. P. Wright.

Seminar is aimed at reading, understanding, and conducting research in SHRM. The course should enable students to obtain a thorough understanding of the current research in Strategic HRM, and to develop the skills necessary to evaluate, criticize, and contribute to the literature on SHRM.

**[ILRHR 963 Research Methods in HRM/Strategic Human Resource Management]**

Spring. 3 credits. Ph.D. candidates only. Not offered 2000-2001. P. Wright.

Designed to build social science research skills, particularly in the area of human resource studies (HRS). Topics include measurement reliability, construct validity, design of studies, external validity, meta-analysis, critiquing/reviewing HRS research, publishing HRS research, and applications of statistical models of HRS issues.]

**INTERNATIONAL AND COMPARATIVE LABOR**

G. Fields, chair; J. Abowd, R. Batt, J. Bishop, F. Blau, G. Boyer, V. Briggs, M. Cook, I. DeVault, L. Kahn, H. Katz, S. Kuruvilla, L. Turner

**ILRIC 333 Europe, United States, and Japan in a Global Economy**

Fall. 3 credits (1 additional credit may be arranged). L. Turner.

Offers an introduction to the contrasting political economies of Germany, Britain, the European Union, Japan, and the United States in today's changing global economy. Emphasis is on (a) national differences and comparisons; and (b) the different strategies pursued by labor, business, and government in society in the face of growing world trade competition, political conflicts, production reorganization, and labor movement revitalization efforts.

**ILRIC 337 Special Topics:**

Fall. 3 or 4 credits. Staff.

Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

**[ILRIC 339 The Political Economy of Mexico]**

Spring. 3 credits. Not offered 2000-2001. M. Cook.

Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratization to immigration to NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic in greater depth.]

**ILRIC 499 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILRIC 533 Europe, the United States, and Japan in a Global Economy**

Fall. 4 credits. Graduate students. L. Turner.

See description for ILRIC 333. Graduate students attend class, take the midterm, and submit an analytical research paper at the end of the semester.

**ILRIC 537 Special Topics**

Fall or spring. 3 or 4 credits. Staff.

Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

**ILRIC 630 Building a "Social Europe": Regional Integration in the Global Economy**

Spring. 4 credits. Seminar designed for graduate students and seniors with permission. L. Turner.

Central questions addressed include: what have the European Union and its member nations done to develop and reform the social dimension in the 1990s and beyond? How are the major actors—labor, government, and business—positioned to influence social policy and industrial relations reform, and what strategies are they pursuing? How do EMU and enlargement affect the effort of European societies to defend and develop the social dimension of their market economies? What are the prospects for the "Social Europe"

in an increasingly deregulated global economy?

**ILRIC 631 Comparative Labor Movements in Latin America**

Spring. 3 credits. M. Cook.

Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and redemocratization on contemporary labor organizations in the region. Countries examined will include, but are not limited to, Mexico, Brazil, Argentina, Chile, Peru, and Venezuela.

**ILRIC 632 Revitalizing the Labor Movement: A Comparative Perspective**

Fall. 4 credits. Graduate seminar open to seniors with permission of instructor only. L. Turner.

Examines contemporary efforts in advanced industrial democracies to reform industrial relations. The first half of the course will examine contemporary industrial relations' reform efforts in the United States, including innovative organizing strategies; new calls for union militance; business strategies for a "union-free" environment; efforts at labor-management cooperation; and the report of the Dunlop Commission. The second half will cover Britain—the Thatcher reforms of the 1980s and the current labor-backed works council movement; France—the Auroux Laws of the 1980s and their effects; and Germany—the transformation of industrial relations in eastern Germany since 1989.

**ILRIC 633 Labor, Industry, and Politics in Germany**

Fall. 4 credits. Open to seniors with permission and graduate students. L. Turner.

Is the successful postwar "social partnership" model of organized capitalism in the Federal Republic of Germany viable in the 1990s? To answer this question, we will study the works councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and the single European market.

**[ILRIC 635 Labor Markets and Income Distribution in Developing Countries]**

Spring. 4 credits. Prerequisite: ILRLE 240 or Economics 313 or permission of instructor. Not offered 2000-2001. G. Fields.

A course analyzing who benefits and how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.]

**ILRIC 636 Comparative History of Women and Work (also WOMNS 636)**

Fall. 4 credits. Permission of instructor. I. DeVault.

Will explore the similarities and differences between different cultures' assumptions about the work of women as well as women's experiences in varying work circumstances

throughout history. Beginning with theoretical pieces and overviews of the history of women and work, most of the course will consist of in-depth examinations of specific work situations or occupations across time and geography. Comparative examples will be taken from the United States, Europe, and the Third World.

**ILRIC 637 Labor Relations in Asia**

Spring. 3 credits. Permission of instructor required. Not offered 2000–2001.  
S. Kuruvilla.

A comparative survey of the industrial relations systems of selected Asian nations such as Japan, S. Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries will be examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.]

**ILRIC 638 Labor, Free Trade, and Economic Integration in the Americas**

Spring. 3 credits. Limited. Open to seniors and graduate students; juniors by permission. Not offered 2000–2001.  
M. Cook.

Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor's role in this process. Examines the origins and implications of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean, and at hemisphere-wide initiatives. A research paper is required.]

**ILRIC 730 Research Seminar on Labor Markets and Economic Development**

Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D., students only. G. Fields. Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Will address research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Numerous presentations and written papers will be required.

**ILRIC 739 The Political Economy of Mexico**

Spring. 3 credits. Not offered 2000–2001.  
M. Cook.

For course description, see ILRIC 339.]

**ILRIC 790 ILR M.P.S. Program**

Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. Program.

**ILRIC 799 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**Other courses approved to fulfill ILRIC distribution**

**ILRCB 304 Latin American Labor History**

Fall. J. Cowie.  
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILRHR 456 International Human Resource Management**

Spring. Staff.  
For description, see the section, Human Resource Studies.

**ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives**

Fall or spring. R. Batt.  
For description, see the section, Human Resource Studies.

**ILRHR 466 Comparative Human Resource Management**

Fall. Staff.  
For description, see the section, Human Resource Studies.

**ILRHR 469 Immigration and the American Labor Force**

Fall and spring. V. Briggs.  
For description, see the section, Human Resource Studies.

**ILRHR 656 International Human Resource Management**

Spring. V. Pucik.  
For description, see the section, Human Resource Studies.

**ILRHR 690 Comparative Human Resource Management**

Fall. Staff.  
For description, see the section, Human Resource Studies.

**ILRHR 698 International Human Resource Policies and Institutions**

Spring. J. Bishop.  
For description, see the section, Human Resource Studies.

**ILRLE 444 The Evolution of Social Policy in Britain and America**

Spring. G. Boyer.  
For description, see the section, Labor Economics.

**ILRLE 448 Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy**

Fall. G. Boyer.  
For description, see the section, Labor Economics.

**ILRLE 640 Economic History of British Labor 1750–1940**

Fall. G. Boyer.  
For description, see the section, Labor Economics.

**ILROB 628 Cross-Cultural Studies in Organizational Behavior**

Spring. Staff.

## INTERDEPARTMENTAL COURSES

**ILRID 150 Freshman Colloquium**

Fall. 1 credit. Open only to ILR freshman. S-U only. Staff.  
This course is offered to (a) acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations and (b) establish acquaintanceship among members of the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

**ILRID 355 Documentary Research Methodology**

Fall. 3 credits. P. Sione.  
Critical evaluation of evidence is a fundamental skill for every professional engaged in the processing of information. Lawyers, arbitrators, and human resources managers are asked to find, assess, and use the appropriate sources to build their case, for a legal decision or the formulation of a particular policy. Will help develop the ability to analyze a broad range of retrospective evidence, critically evaluate it as to pertinence and accuracy, and place it in a well thought-out and coherent context. Designed to provide research methodology training specifically for professionals in the labor field. Topics will be selected from relevant studies in Industrial and Labor Relations.

**ILRID 451 Science, Technology, and the American Economy**

Spring. 4 credits. V. Briggs.  
The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention will be given to the evolutionary confluence of science, technology, mathematics, religion, and capitalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention will be given to the post-World War II economic developments. The vantage point will be the linkage with employment, unemployment, income, and productivity considerations. Public policy issues (such as the employment impact of the computer, research and development policy, national defense influences, the "agricultural revolution," savings and investment rates, labor force preparedness) will be explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism will also be examined.

**ILRID 452 Writing in Industrial and Labor Relations**

Fall or spring. 3 credits. J. Farley.  
Will require close reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students will also have an opportunity to practice writing about the world of work for different audiences.

**ILRID 790 ILR M.P.S. Program**

Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

## LABOR ECONOMICS

L. Kahn, chair; J. Abowd, F. Blau, G. Boyer, R. Ehrenberg, G. Fields, R. Hutchens, G. Jakubson, R. Smith

**ILRLE 140 Development of Economic Institutions**

Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor.  
G. Boyer.  
Provides students with an understanding of the historical roots of the economic system currently dominant in Western Europe and the United States. The course will focus on (a) the process of European economic growth prior to 1914, (b) the effect of industrialization on labor in Great Britain, and (c) the historical evolution of economic thought from Adam Smith to J. M. Keynes.

**ILRLE 240 Economics of Wages and Employment (also ECON 341)**

Fall and spring. 3 credits. Prerequisites: Economics 101-102, Economics 313, or permission of instructor.

Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. Considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

**ILRLE 340 Economic Security (also ECON 451)**

Spring. 3 credits. Prerequisites: ILRLE 240 or equivalent.

Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

**ILRLE 348 The Economics of Unemployment (also ECON 453)**

Fall. 4 credits. Prerequisite: ILRLE 240/540 or permission of instructor.

This course introduces students to several issues fundamental to an understanding of unemployment: the social costs; definitional questions and measurement problems; the patterns of unemployment; and the various types of unemployment, their causes, and the policies that can or have been pursued to alleviate unemployment. The course is designed for undergraduate and graduate students who have taken a survey course in labor economics or its equivalent.

**ILRLE 440 Special Topics in Labor Economics**

Fall or spring. 4 credits.

An undergraduate seminar whose topic changes depending on semester and instructor.

**ILRLE 441 Income Distribution (also ECON 455)**

Fall. 4 credits. Prerequisite: ILRLE 240 or Economics 341. R. Hutchens.

Explores income distribution in the United States and the world. Topics to be covered include functional and size distributions of income, wage structure, income-generating functions and theories, discrimination, poverty, public policy and income distribution, and changing income distribution and growth. Students who have taken CEH 355 may not receive credit for 441.

**ILRLE 442 The Economics of Employee Benefits (also ECON 456)**

Fall. 4 credits. Prerequisites: ILR 240 or equivalent. F. Blau.

An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compen-

sation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

**ILRLE 444 The Evolution of Social Policy in Britain and America**

Spring. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.

Surveys the history of social policy in Great Britain and the United States from 1800 to the adoption of the British welfare state after World War II. Topics covered include: the role of poor relief in the early nineteenth century; the changing relationship between public relief and private charity; the adoption of social insurance programs and protective labor legislation for children and women; government intervention in the Great Depression; and the beginnings of the welfare state.

**ILRLE 445 Women in the Economy (also ECON 457 also WOMNS 446)**

Fall. 4 credits. Prerequisite: ILRLE 240 or equivalent.

Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation; gender differences in occupations and earnings; and the consequences of women's employment for the family.

**ILRLE 446 Economic History of British Labor 1750-1940 (also ECON 459)**

Fall or spring. 4 credits. G. Boyer.

Will examine various aspects of British labor history from the beginning of the Industrial Revolution until World War II. Specific topics will include: (1) monetary and nonmonetary changes in workers' living standards; (2) internal migration and emigration; (3) the London labor market; (4) the extent of poverty and the evolution of the welfare state; (5) Luddism and Chartism; and (6) the development of trade unions.

**ILRLE 448 Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy (also ECON 458)**

Spring. 4 credits. Prerequisites: ILRLE 240 or Economics 314. G. Boyer.

Topics covered include: the causes of the Great Depression in the United States; the economics of the New Deal; the causes of high unemployment in interwar Great Britain; the rise of Keynesian economics and the development of demand management policies in Great Britain and the United States after 1945.

**ILRLE 495 Honors Program**

Fall and spring (yearlong course). 3 credits each term.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 497-498 Internship**

Fall and spring. 3 and 6 credits.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 499 Directed Studies**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 540 Labor Economics**

Fall. 3 credits. Prerequisites: Economics 101-102 or Economics 103 or equivalent. Required of graduate students majoring or minoring in labor economics and M.I.L.R. candidates.

Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. The course considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination and the effects of unions.

**ILRLE 541 Social Security and Protective Labor Legislation**

Spring. 3 credits. Prerequisite: ILRLE 540 or equivalent. Required of graduate students majoring in labor economics and M.I.L.R. candidates.

Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

**ILRLE 544 Labor Market and Personnel Economics**

4 credits. Offered only in New York City for the M.P.S. Program. Staff.

A four-module course, in which the first module covers the basic elements of supply and demand in the labor market, the second and third modules cover the "new personnel economics" (emphasizing economic issues in a firm that relate to selecting, training, assigning, motivating, and compensating workers), and the final module covers key institutions and economic security issues (including unemployment, pensions, disability, discrimination, and unions). The goals of this course are to have students learn to analyze both business and public policy problems, taking into account both basic principles of economic theory and the relevant institutional environments.

**ILRLE 642 Economic Analysis of the Welfare State (also ECON 460)**

Spring. 4 credits. R. Hutchens.

Includes economic rationales for government intervention and analysis of the effects of programs on economic welfare. Discusses taxes, in-kind, and cash programs. Includes some discussion of welfare states in other countries.

**ILRLE 644 The Economics of Occupational Safety and Health (also ECON 461)**

Spring. 3 credits.

Analyzes the problem of occupational injuries and illnesses in the United States. The first section concentrates on legal requirements, judicial interpretations, and legal implications of the Occupational Safety and Health Act, then shifts to such questions as the need for, and appropriate goals of, the act; the

stringency of safety standards considered in a benefit-cost framework; the difficulties in enforcing the act; and estimates of the impact of the act.

**ILRLE 647 Evaluation of Social Programs**  
Fall. 4 credits.

An introduction to the methodologies used by economists to evaluate the impacts of social-action programs and legislation. General evaluation methodology, cost-benefit analysis, and econometrics are discussed. Case studies are considered to illustrate the uses of these techniques, to acquaint the student with major current government programs and legislation, and to estimate these programs' economic impacts. Throughout, the primary analytic framework used by the instructor is microeconomics.

**ILRLE 648 Economic Analysis of the University (also ECON 342)**

Spring. 4 credits.

Seeks to illustrate the complexity of decision making in a nonprofit organization and to show how microeconomic analysis in general, and labor market analysis in particular, can be usefully applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparable worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings will be supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

**ILRLE 744 Seminar in Labor Economics I (also ECON 641)**

Spring. 3 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics.

Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

**ILRLE 745 Seminar in Labor Economics II (also ECON 642)**

Fall. 3 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics.

Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

**ILRLE 746 Seminar in Labor Economics III (also ECON 643)**

Spring. 4 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics.

Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

**ILRLE 747 Economics of Education**

Spring. 4 credits. R Ehrenbeg.

A survey of the research on a wide variety of issues at the elementary, secondary, and higher education levels. Examples of the issues addressed at the elementary and secondary level are the labor markets for teachers and administrators, educational

production functions, class size experiments, financing and voter behavior, special education, and school choice. At the higher education level, issues addressed include public and private funding, financial aid and tuition policies, faculty labor markets and Ph.D. production. While the emphasis is on the American educational system, research from other countries may also be discussed. Interested students other than economics and labor economics Ph.D. students should speak to the instructor before enrolling for the course.

**ILRLE 748 Economics of Employee Benefits**

Fall. 4 credits.

Students in this course attend the lectures in ILRLE 442 (see description for 442) but have additional course requirements. If enrollment warrants, they will also meet separately at a time TBA for discussion of topics in 442 and additional topics.

**ILRLE 749 Economics of Development (also ECON 672)**

Fall. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.

Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

**ILRLE 790 ILR M.P.S. Program**

Fall and spring. 1-9 credits.

Supervised research only for those enrolled in the ILR M.P.S. program.

**ILRLE 798 Internship**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 799 Directed Studies**

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 940 Workshop in Labor Economics**

Fall and spring. 3 credits. Intended for Ph.D. students who have started to write their dissertations.

Presentations of completed papers and work in progress by faculty members, advanced graduate students, and speakers from other universities. Focus is on the formulation, design, and execution of dissertations.

## ORGANIZATIONAL BEHAVIOR

P. Tolbert, chair; S. Bacharach, L. Gruenfeld, T. Hammer, E. Lawler, M. Lounsbury, W. Sonnenstuhl, B. Smith, R. Stern, L. Williams

**ILROB 170 Introduction to Micro Organizational Behavior and Analysis: The Social Psychology of the Workplace**

Spring. 3 credits. Staff.

This introductory (survey) course considers the basic individual and group processes in the workplace. At the individual level, we will study personality, motivation, perception, attitude formation, and decision making. On the group level, we will emphasize group dynamics, leadership, power and influence, and culture.

**ILROB 171 Introduction to Macro Organizational Behavior and Analysis**

Fall. 3 credits. Staff.

The relationship between industry and the economy as a whole and its implications for other social institutions in American society (including stratification, politics, and American values) is discussed. The course moves from classical sociological theory to the analysis of complex organizations. The central focus of the course is the study of industrial organizations and of complex organizations in general, emphasizing authority relations, goals, the division of labor, bureaucracy, and organizational design.

**ILROB 320 The Psychology of Industrial Engineering**

Fall. 4 credits. T. Hammer.

A study of the human factors in the industrial engineering of work, workplaces, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system; individual difference in skills, abilities, motives, and needs; group dynamics; intrinsic motivation; job satisfaction; conflict.

**ILROB 321 Group Solidarity (also SOC 311)**

4 credits. M. Macy.

What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select readers? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

**ILROB 322 Work and Organization (also SOC 323)**

Fall. 4 credits. M. Lounsbury.

This course will theoretically examine the concept of work and track how the nature of work and the operations of organizations are changing, highlighting the complex linkages between economic activity, social change, and individual experience. Includes a service-learning requirement that is designed to involve students in projects at local governmental or community organizations. This field based activity will also enable students to complement theoretical perspectives learned in class with a more grounded, experiential understanding of the relationship between work and organization.

**ILROB 324 Gender and Work (also SOC 314/514 and WOMNS 314/514)**

Spring. 4 credits. M. Brinton.

The purpose of this course is to familiarize students with the field of gender stratification. The first part of the course will examine long-term changes in women's labor force participation and the division of labor between the sexes as societies industrialize. We consider theoretical work as well as empirical case studies of a number of countries ranging from Taiwan to Ireland. The second part of the course focuses on gender and work in highly industrialized societies,

and includes empirical studies of the gendered division of labor in households and the labor market of the United States in particular. The structure of the course is lecture one day per week and detailed discussion and critique of selected readings on the second day. Students take a mid-term exam and prepare a research proposal on some aspect of gender and work. During the last two weeks of the course, students present synopses of their research proposals and we discuss and constructively critique them.

**ILROB 328 Cooperation, Competition, and Conflict Resolution**

Spring. 4 credits. Prerequisite: one course in social psychology or equivalent. Staff.

An examination of theory and empirical evidence relating to the resolution of interpersonal, intergroup, and international conflict. Specific attention is devoted to studying factors that contribute to the development of cooperative or competitive bonds between parties to a conflict. The following topics are studied: the availability and use of threat; the credibility, intensity, and costs of threat; fractioning and escalating conflict. Personality and situational factors that regulate conflict intensification are stressed.

**ILROB 329 Organizational Cultures**

Fall or spring. 3 credits. Prerequisite: 1 or more courses in sociology. Staff.

Reviews the concept of culture as it has evolved in sociology and anthropology, applying it to formal organizations in workplaces such as corporations and unions. The course first examines the nature of ideologies as sense-making definitions of behavior, concentrating on the cultural forms that carry these cultural messages, rituals, symbols, myths, sagas, legends, and organizational stories. Considerable attention will be given to rites and ceremonials as a cultural form in organizational life that consolidates many of these expressive forms into one. The course will examine types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language gestures, physical settings, and artifacts in ceremonial behavior. The presence of subcultures and countercultures in organizational behavior will also receive attention, especially the part played by occupational subcultures in formal organizations.

**ILROB 370 The Study of Work Motivation**

Fall. 4 credits. Open to juniors and seniors. T. Hammer.

Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results as these apply to the performance of individuals and groups in formal organizations. Readings are predominantly from the field of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student will design, execute, and analyze a research study of his or her own.

**ILROB 371 Individual Differences and Organizational Behavior**

Fall or summer. 4 credits. Recommended: some acquaintance with the substance and methods of behavioral or social science. L. Gruenfeld.

Examines personality from a comparative psychodynamic point of view. Social behavior, authority relationships, and work motivation are used to illustrate how various theories could be applied to understand behavior and experience in organizations.

**ILROB 373 Organizational Behavior Simulations**

Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.

Basic principles of organizational behavior are studied through readings and participation in simulation games. Simulations model traditional organizations and cooperatives. Games model executive decision making, running a company, assembly work, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizations permits the study of the assumptions underlying organization structure and process.

**ILROB 420 Contemporary Organizational Behavior Applications**

Fall or spring. 3 credits. Prerequisites: ILROB 170 and 171. L. Gasser.

An exploration of current practical applications of OB theory in organizations. Using a range of contemporary resources, students will sift through practitioner articles and research; manage discussions; meet with managers, consultants, and employees; and explore organizational issues and problems from micro and macro perspectives in a political and legal context. Students will also develop a toolbox of knowledge and skills to effectively carry out several organizational interventions or development initiatives. Choice of topics may differ to focus on contemporary issues such as: emotional intelligence, influencing organizational climate and morale, engaging strategic planning processes, managing large-scale participative techniques, using job or workplace design concepts, applying SWOT analysis, developing effective teamwork, managing diversity, applying quality management tools, etc.

**ILROB 421 Regulating the Corporation**

Spring. 4 credits. R. Stern.

Will examine public and private power from an organizational perspective. The resource-dependence approach to organization-environment relations provides a framework for interpreting government attempts at the regulation of corporate behavior. Topics cover the structure and functioning of government regulatory agencies and corporate responses to regulation, including corporate strategy, change, and political influence. Business ethics and corporate social responsibility are considered along with the role of interest groups such as consumer or citizen organizations. Research and case materials focus on the implementation of environmental protection, occupational health and safety, equal opportunity, antitrust, securities, and consumer regulations.

**ILROB 422 Organizations and Deviance**

Fall. 3 credits. Enrollment limited to 60. W. Sonnestuhl.

Focuses upon the deviant actions of organizations, including such behaviors as price fixing, environmental pollution, illegal campaign contributions, and discrimination in hiring and promotion. Examines the origins of such behaviors in organizations, the processes by

which they became institutionalized, and the processes by which they become defined as deviant organizational actions. Within this context, the course will examine such contemporary cases as Exxon's Valdez oil spill, Iran-Contra, drug testing, and the federal savings and loan scandal. These events raise troubling questions about what it means to live and work in an organizational society, and they cannot be dismissed as instances of a few individuals gone bad.

**ILROB 425 Sociology of Industrial Conflict**

Spring. 4 credits. R. Stern.

The course focuses on the social, economic, and political causes of industrial conflict. The nature of work and the employment relationship provide the foundation for understanding both individual and collective expressions of conflict in work settings. Worker background, psychological contracts and authority relations set the stage for studying conflict expressions including strikes, labor turnover, absenteeism, sabotage, accidents, grievance filing, violence, and other forms of conflict at work.

**ILROB 427 The Professions: Organization and Control**

Fall. 3 credits. Prerequisite: permission of the instructor. P. Tolbert.

Focuses on the sources of power and control exercised by professional groups in contemporary society. A number of issues will be examined in this context including: the role of professions in society, processes through which an occupational group becomes defined as a profession, sources of control that professional associations have over their members, relations between professionals and nonprofessionals in organizations, and the relationship between unionization and professionalization of occupations.

**ILROB 428 Organizational Change and Intervention**

Fall. 3 credits. Limited to 25. Juniors and seniors with permission of instructor. L. Williams.

Seminar will focus on planned and unplanned change in organizations. Topics will include mergers and acquisitions, team building, self management and the role of change agents. Participants will be required to develop and present topics in addition to keeping a weekly journal and participating in exercises.

**ILROB 429 Organizational Politics and Institutional Change**

Spring. 2 credits. 7 weeks. Limited to juniors and seniors with permission of the instructor. Please see instructor before the first class. S. Bacharach.

Will examine the market, cultural, political, and structural forces that change the organizational "rules of the game," how those changes affect individuals and organizations, and the distortions that occur as individuals and organizations attempt to adjust to a new unstable order. Issues to be examined include power, corruption, dealmaking, rationality, uncertainty, and competition. Course requirements include completing a major research paper and leading a class discussion.

**ILROB 470 Group Processes**

Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Permission of instructor. E. Lawler.

A review of theoretical approaches and selected research on group phenomena, including the formation of groups, the

structure of group relations, and group performance. Specific topics include conformity and obedience, status and power relations, tactics of influence, solidarity and commitment, the management of emotion, the emergence and change of microcultures, and the role of groups in networks and organizations.

**ILROB 472 Applied Organizational Behavior**

Fall. 3 credits. Prerequisites: ILROB 170 and 171. S. Bacharach.

Introduces students to intermediate theory of organizational behavior. It will specifically concentrate on teaching students to use organizational theories for analytical and applied purposes. Among the issues to be addressed are organizational structure, work processes, organizational politics, organizational design, job design, incentive systems, and quality-of-work-life programs.

**ILROB 474 Personality and Organizational Behavior Only**

3 credits. Prerequisite: ILROB 170 or permission of instructor. B. Smith.

Will provide an overview of theoretically grounded perspectives on personality assessment. While this is not a class in personality theory, various theories will be discussed. Will cover the historical rise, fall, and rebirth of personality theory. In addition, the course will examine the use of personality theory to understand both the behavior of people in organizations and the "behavior of organizations." Students will be offered the opportunity to participate in a series of personality assessments designed for individual development. These assessments will be used throughout the course as an aid to understanding the relationship between personality and behavior in the world of work.

**ILROB 495 Honors Program**

Fall and spring (yearlong course). 3 credits each term.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILROB 497-498 Internship**

Fall and spring. 3 and 6 credits.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILROB 499 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILROB 520 Organizational Behavior and Analysis**

Fall or spring. 3 credits. Staff.

Survey of concepts, theories, and research from the fields of organizational and social psychology as these relate to the behavior of individuals and groups in organizations. Job attitudes, motivation, performance, leadership and power, group formation, perception, and organizational climate. A preliminary course for advanced work in organizational behavior.

**ILROB 621 Organizational Diagnosis Intervention and Development**

Spring. 4 credits. Prerequisites: undergraduates, ILROB 170 and 171; graduate students, ILROB 520 and 521 or equivalent; and permission of instructor. L. Gruenfeld.

This applied course considers theories and techniques for the identification and improvement of organizational problems at the behavioral (micro) level. Methods for the implementing of change are evaluated in the

light of several normative and descriptive theories of individual and group development and effectiveness. The course emphasizes both quantitative and qualitative data processing procedures.

**ILROB 622 Sociology of Markets (also SOC 622)**

3 credits. M. Lounsbury.

Since World War II, the diffusion of "markets" in Asia, Eastern Europe, and Latin America as well as changes in the structure of Western economies has reinvigorated questions about how markets are socially structured. Drawing on the literature in economic sociology, this course explores the social, cultural, economic, and political factors that shape the emergence and dynamics of markets. Among the issues to be addressed are: the social organization of markets, market discrimination, the cooperative aspects of market formation and functioning, the role of government and other institutional arrangements, the relationship of economic change to broader social forces such as social movements, and the shift towards globally market-oriented economies.

**ILROB 623 Micropolitics in Organizations**

Spring. 3 credits. Prerequisites: ILROB 170 and 171. Limited, permission of instructor. S. Bacharach.

Examines micro-political processes in organizations. Neo-Macchiavellian, Marxian, and Weberian approaches to organizational politics will be specifically analyzed. An attempt will be made to understand how the micro-political rules of organizational games are institutionalized in change. Among the ideas to be discussed are the institutionalization of ideology and specification of the relationships among power, tactics, and strategy. Interest groups and coalition politics will be examined in terms of conflict and bargaining. Other issues to be discussed include corruption, dealmaking, and competition. Examples will be drawn from both the private and public sectors. Seminar requirements will include an in-class presentation and a major paper and/or take-home final exam.

**ILROB 624 Groups in Work Organizations**

Fall. 4 credits. Enrollment limited. Permission of instructor required. L. Gruenfeld.

This is an experiential learning course designed primarily for advanced students who have a comprehensive background in the theory and methods of the behavioral sciences. Work group members study their roles and relationships to each other, the task, other work groups, and especially authorities. Students write a number of self-reflective papers in which they conceptualize their experiences and relate them to theory and method in organizational behavior and experience.

**ILROB 625 Conflict, Power, and Negotiation**

Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. E. Lawler.

Theoretical seminar adopts a power perspective on bargaining and conflict resolution. Examines how power relations and power processes affect tactics in bargaining and also when power relations inhibit or promote conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives

overview of several theoretical approaches to conflict and bargaining (e.g., rational choice, cognitive, social exchange) and places the power perspective in this context.

**ILROB 626 Organizations and Social Inequality**

Spring. 3 credits. P. Tolbert.

Examines the central role that organizations in industrial societies play in allocating income, status, and other resources to individuals. A variety of theoretical explanations of social inequality will be examined, and the social policy implications of each will be considered.

**ILROB 627 Leadership in Organizations**

Spring. 3 credits. Prerequisites: 2 organizational behavior courses at the 300 level or advanced courses in sociology or psychology. L. Gruenfeld.

An examination of theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal perception as well as the motivation to both lead and follow will be discussed. The implications for leadership training, organization development, and action research are explored.

**ILROB 628 Cross-Cultural Studies in Organizational Behavior**

Spring. 3 credits. Limited. Permission of instructor before registering in course. L. Gruenfeld.

Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualism-collectivism, universalism-particularism and attitudes toward authority as well as work motivation will be examined. Upon completion of the readings and discussion of conceptual materials and consideration of several major international comparison studies, each student will prepare and present a paper on a topic of his/her own choice usually related to his/her country of origin (China, Japan, German, United States, etc.).

**ILROB 629 Personality in Organization**

Fall. 4 credits. Open to undergraduates with permission of instructor. L. Gruenfeld.

This advanced course considers psychodynamic theories of organizational diagnosis at the individual and group levels. Topics include leadership, power, authority, work motivation, intervention, and change. The topics are discussed and applied in small study groups. The professor's role is as a consultant and resource person. Class members study and research their own behavior and present their qualitative and quantitative findings to the class. Students are expected to have background and interest in both research methods and theory.

**ILROB 670 Semester in Manufacturing**

Spring. 15 credits. Open to master's and Ph.D. students in Industrial and Labor Relations with permission of instructor.

Intended for students who want to work as professionals or who have a strong interest in the manufacturing industries. It is taught by an interdisciplinary faculty team from the College of Engineering, the Johnson School of Management, and the School of Industrial and Labor Relations. Course material will be based on plant visits and project work with local industry. Student participation will be in

interdisciplinary teams with members representing the three colleges. Course content will concentrate on four major issues thought to make a competitive difference in today's economic environment: (1) the changing environment for product design; (2) rapid-response production systems; (3) organization, management, and compensation of the manufacturing team; and (4) performance measurement.

**ILROB 671 Organizations as Social Networks**

Spring. 3 credits. Prerequisites: 1 or more courses in organizational behavior, sociology, psychology, anthropology, or political science. A course in statistics or research methods would be helpful. Increasing attention has been devoted to the idea that social structures can be fruitfully investigated as social networks. In particular, organizational and inter-organizational structures may be analyzed as patterned relationships among individuals, groups, and even other organizations. Such networks appear to be strong predictors of a variety of social dynamics including attitude similarity, the diffusion of innovation, turnover, and the allocation of organizational resources. A variety of methods for collecting and analyzing network data including: graph theory, sociometry, clique detection, centrality analysis, blockmodeling, and the quadratic assignment procedures will be used. In addition to reading recent published research, this course will involve work with actual data sets and relevant computer programs.

**ILROB 674 The Social Psychology of Behavior and Experience in Organizations**

Fall. 3 credits. Prerequisite: ILROB 170 and 171 or ILROB 520. L. Gruenfeld. Considers theories that seek to explain behavior at the individual, group, and organizational level. Work motivation, leadership, and the member composition and dynamics of groups will be discussed. Harmony, conflict, and other aspects of the relationships among groups in the organization will be evaluated.

**ILROB 675 Cooperative Strategies for Improving Organizational Performance**

Spring. 4 credits. Will concentrate on presentation and analysis of a series of case studies involving projects using cooperative strategies to improve organizational performance. Emphasis will be given to cases in which union and management have been working together to enhance productivity and the quality of working life. Cases will be examined against a background of research literature on improving organizational performance. Students will be responsible for a term paper.

**ILROB 676 Systems of Labor Participation in Management**

Fall. 4 credits. Prerequisites: senior standing and permission of instructor. Examines the theory and practice of worker participation in systems ranging from informal shop-level participation to self-management. Special emphasis is placed on socio-technical systems of job design and work restructuring that give workers control over the labor process. Attention is also given to legislated programs of participation (codetermination) and to participation in employee-owned firms.

**ILROB 679 Methods of Observation and Analysis of Behavior Attitudes and Values in Work Groups and Organizations**

Fall or spring. 4 credits. Permission of instructor required. Considers qualitative and psychometrically precise and systematic research methods for the study of behavior in groups and organizations. Includes a workshop that is designed to improve teamwork with the use of on-line data generated by group members. Personality, leadership culture, and group dynamics are the major focus. Students will observe, record, and videotape group and individual behavior, which will be analyzed with the help of microcomputer programs, especially SYMLOG (a system for the multiple-level observation of groups) developed by Bales (1970, 1979). In addition to lectures and discussion of research papers, this course will also include a research project designed and executed by the students.

**ILROB 720 Issues of Measurement in Research on Organizations (Instrumentation)**

Fall. 4 credits. Concerns the study of tests and measures used to assess central variables in organizational behavior and related fields. Students will learn where to find measures suitable for their research purposes and will examine the theories that define the constructs being measured; the empirical information available about different measures—construction, reliability, and validity; and the ways in which the instruments have been used in research and practice.

**ILROB 721 Advanced Micro Organizational Behavior**

Spring. 3 credits. Examines the historical development of psychological theories of organizational behavior and contemporary issues in micro organizational research. The course will emphasize reading and analysis of primary source material.

**ILROB 722 Advanced Macro Organizational Behavior**

Fall. 3 credits. Prerequisites: ILROB 520. Examines the historical development of sociological theories of organizations and contemporary issues in macro organizational research. The course will emphasize reading and analysis of primary source material.

**ILROB 723 Behavioral Research Theory, Strategy, and Methods I**

Fall. 4 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll.

Materials studied in ILROB 723 and 724 include (1) theoretical, conceptual, and ethical questions; (2) survey research and attitude-scaling procedures; (3) laboratory research methods; (4) participant observation and interview methods; (5) use of documents and qualitative data analysis. Provides students with important philosophical background for doing research and exposes them to a well-balanced, interdisciplinary set of quantitative and qualitative research tools.

**ILROB 724 Behavioral Research Theory, Strategy, and Methods II**

Spring. 3 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll.

Course will cover (a) analysis and interpretation of quantitative data, (b) traditional problems encountered in the assessment of human and organizational characteristics, (c) the use of different methods of data analysis, and (d) an examination of the limitations imposed on data analysis and interpretation by traditional measures. Examples of topics covered in the course: the use of Chi-square, t-tests, ANOVA, simple and multiple correlation and regression, reliability and validity analyses, causal models, factor analysis, scale construction.

**ILROB 725 Analysis of Published Research in Organizational Behavior (also SOC 725)**

Fall. 3 credits. Prerequisites: ILROB 520 and 1 year of statistics. An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and method as well as theory.

**ILROB 726 Selected Topics in Organizational Behavior**

Fall. 3 credits. Prerequisites: ILROB 520 and permission of instructor. An advanced proseminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves will change from year to year depending on participants' interests. Course is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more arenas of organizational theory. Emphasis will be placed on exploring the relevance of tradition in related disciplines (anthropology, linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

**ILROB 727 Work and Industrial Conflict**

Spring, weeks 7-14. 2 credits. A concentrated examination of the sociology of industrial conflict. The seminar focuses on classic formulations of conflict theory in sociology, then the social, political, economic causes of industrial conflict. Both individual and collective forms of conflict expression are examined. Some discussion of the implications of various types of worker management of firms for industrial conflict will be included.

**ILROB 728 Theories of Motivation and Leadership**

Spring. 4 credits. Prerequisite: ILROB 520. (1) **Theories of Work Motivation.** 7 weeks. Course will provide an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students will examine the empirical research that tests the validity of the theories and shows how and under what conditions different motivation models can be used for practice in work organizations.

(2) **Theories of Leadership and Power.** 7 weeks. Several current microtheories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

**ILROB 729 Organizational Change and Intervention**

Fall. 3 credits. Graduate students only; no exceptions.

This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention will be paid to the role of internal and external change agents. Class members will be encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants will submit weekly work force journals.

**ILROB 770 The Cultures of Work Organizations**

Fall. 3 credits. Open only to graduate students.

Considers both administrative and occupational cultures in the workplace. It takes an anthropology perspective, focusing on ideologies as the main ingredient of cultures but emphasizing the role of cultural forms, e.g., myths, stories, sagas, language, rites and ceremonials, and physical settings of meaning. It pays special attention to the place of subcultures and countercultures in the makeup of administrative culture and to occupations as a major source of subcultures. The role of the environment in which organizations are embedded, and its influence on workplace cultures, is also included. Forms of cultural leadership and approaches to reading and changing cultures are also considered.

**ILROB 771 Social Science and Social Scientists**

3 credits. Grad only. Letter grade only. L. Williams.

This seven-week course offers a philosophy of science look at social science methods. Discussions will include a comparison of conventional and radical views of theory construction, and the strengths and weaknesses of approaches such as interviewing, surveys, policy capture, laboratory experiments, secondary data analysis, action research and ethnomethodology. Readings will include: *Mismeasurement of Man* (Gould); *Conduct of Inquiry* (Kaplan); *Against Method* (Feuerband); *Servants of Power* (Baritz); and *Encounter with an Interviewer* (Twain).

**ILROB 772 The Social Construction of Economic Life**

3 credits. M. Lounsbury.

Drawing on the literature in economic sociology, this course emphasizes how "economic" activities are constituted and shaped by the social, cultural, and historical contexts in which they are situated. This course will focus on surveying various empirical and theoretical approaches used to study the genesis and influence of broader scale organizational and institutional arrangements and provide students with an opportunity to formulate and refine their own research questions and perspectives.

**ILROB 773 Advanced Seminar in Cross-Cultural Studies of Organizational Behavior**

Fall. 3 credits. Permission of the instructor. Considers theory and method for the study of cross-cultural and cognitive style variables. Members participate in the conceptualization and conduct of a comparative research project.

**ILROB 776 Organizational Implications of World Class Manufacturing**

Fall. 4 credits.

Aimed at helping students develop an understanding of organizations as complex social systems, and of the behavioral implications of new manufacturing initiatives. Live case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, total quality management, and just-in-time material flow. Analyses emphasize the impact of such innovations on individuals' role definitions and relationships, organizations' communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering/Manufacturing Option degree program.

**ILROB 777 Personality in Work Groups and Organizations**

Spring. 3 credits. Prerequisite: statistical methods and/or a course in research methods. Each student will administer, score, and statistically test theory-driven hypothesis. Staff.

Discusses several theories of personality and related research findings. The relationship of personality to work motivation and leadership and interpersonal behavior in groups (teams) is also considered. Methods of research including observational, peer report, and self report, as well as performance tests are studied.

**[ILROB 778 Solidarity in Groups**

Fall. 3 credits. Not offered 2000–2001. Staff. Examines sociological and social psychological theories about how social solidarity or a "sense of community" comes about and is maintained in groups and organizations. Distinguishes emotional, normative, and instrumental bases for social solidarity and shows how these promote or inhibit subgroup formation in organizations, commitment of individuals to organizations, and organizational citizenship behavior.]

**ILROB 790 ILR M.P.S. Program**

Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

**ILROB 798 Internship**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILROB 799 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILROB 920 Organizational Behavior Workshop**

Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only.

This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

## SOCIAL STATISTICS

T. DiCiccio, chair; J. Angellotti, J. Bunge, A. Hadi, P. Velleman, M. Wells

**ILRST 210 Statistical Reasoning I**

Fall, spring, and summer 2000–2001. 3 credits. Attendance at weekly discussion section is required. J. Angellotti, P. Velleman.

An introduction to the basic concepts of statistics and data analysis. Descriptive methods, normal theory models, and inference procedures for univariate and bivariate data. Basic statistical designs, an introduction to probability and applications of the Binomial and Normal distributions. Estimation, confidence intervals, and tests of significance for a single population mean and proportion, the difference in two population means and proportions, simple linear regression, correlation, and two-way contingency tables. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

**ILRST 211 Statistical Reasoning II**

Fall, spring, and summer 2000–2001. 3 credits. Prerequisite: ILRST 210 or suitable introductory statistics course. A. Hadi, P. Velleman.

A second course in statistics. Applications of statistical data analysis techniques, particularly to the social sciences. Topics include: statistical inference; simple linear regression; multiple linear regression; logistic regression; and analysis of variance. Computer packages are used throughout the course.

**ILRST 310 Statistical Sampling**

Spring. 3 credits. Prerequisite: 2 terms of statistics. J. Bunge.

Theory and application of statistical sampling, especially in regard to sample design, cost, estimation of population quantities, and error estimation. Assessment of nonsampling errors. Discussion of applications to social and biological sciences and to business problems. Course includes an applied project.

**ILRST 311 Practical Matrix Algebra**

Fall. 3 credits. J. Bunge, A. Hadi.

Matrix algebra is a necessary tool for statistics courses such as regression and multivariate analysis and for other "research methods" courses in various other disciplines. One goal of this course is to provide students in various fields of knowledge with a basic understanding of matrix algebra in a language they can easily understand. Topics include special types of matrices; matrix calculations; linear dependence and independence; vector geometry; matrix reduction (trace, determinant, norms); matrix inversion; linear transformation; eigenvalues; matrix decompositions; ellipsoids and distances; some applications of matrices.

**ILRST 312 Applied Regression Methods**

Fall. 3 credits. Prerequisite: ILRST 211 or equivalent courses. T. DiCiccio, P. Velleman.

Matrix algebra necessary to analyze regression models is reviewed. Multiple linear regression, analysis of variance, nonlinear regression, and linear logistic regression models are covered. For these models, least squares and maximum likelihood estimation, hypothesis testing, model selection, and diagnostic procedures are considered. Illustrative examples are taken from the social sciences. Computer packages are used.

**ILRST 313 Design and Analysis of Experiments**

Spring. 3 credits. Prerequisite: ILRST 211 or equivalent. J. Angellotti.

The statistical design and analysis of comparative experiments including completely randomized, factorials, randomized block, latin squares, and split-unit designs including crossover and repeated measures. Application of statistical design to research problems. Analyses to compare treatment groups including ANOVA, ANCOVA, contrasts, and multiple comparison procedures. Computer packages are used.

**ILRST 314 Graphical Methods for Data Analysis**

Spring. 3 credits. Prerequisite: ILRST 211 or equivalent. P. Velleman.

Classical and recently developed graphical methods for analysis and display. Characteristics of effective and honest graphs with comparison of alternative methods for understanding data. Includes study of current computer programs and methods expected to be practical in the near future: graphing of univariate data, bivariate plots, multivariate data, graphical methods of data analysis; the specification, modification, and control of graphs; study of interaction between choice of display and underlying patterns.

**[ILRST 410 Techniques of Multivariate Analysis]**

Spring. 3 credits. Prerequisite: ILRST 312 or equivalent. Not offered 2000-2001.

Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. We emphasize application, but theory will not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix notation. Topics include: multivariate normal distribution; sample geometry and multivariate distances; inference about a mean vector; comparison of several multivariate means, variances, and covariances; detection of multivariate outliers; principal component analysis; factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.]

**ILRST 411 Statistical Analysis of Qualitative Data**

Fall. 3 credits. Prerequisite: 2 statistics courses or permission of instructor.

T. DiCiccio, M. Wells.

An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variates, contingency tables; log-linear models; binary ordinal, and multinomial regression models; limit dependent variables.

**ILRST 499 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILRST 510 Statistical Methods for the Social Sciences I**

Fall, spring, and summer. 3 credits.

J. Angellotti, J. Bunge, T. DiCiccio, P. Velleman.

A first course in statistics for graduate students in the social sciences. Descriptive statistics, probability and sampling distributions, estimation, hypothesis testing, simple linear regression and correlation. Students are instructed on the use of a statistics computer

package at the beginning of the term and use it for weekly assignments.

**ILRST 511 Statistical Methods for the Social Sciences II**

Fall, spring, and summer. 3 credits.

Prerequisite: ILRST 510 or equivalent introductory statistics course. J. Bunge,

T. DiCiccio, A. Hadi, P. Velleman.

A second course in statistics that emphasizes applications to the social sciences. Topics include: simple linear regression; multiple linear regression (theory, model building, and model diagnostics); and the analysis of variance. Computer packages are used extensively.

**[ILRST 610 Seminar in Modern Data Analysis]**

Fall. 3 credits. Prerequisite: 2 statistics courses or permission of instructor. Not offered 2000-2001. P. Velleman.

An advanced survey of modern data analysis methods. Topics include exploratory data analysis, data re-expression, philosophy of data analysis, robust methods, statistical graphics, regression methods, and diagnostics. Extensive outside readings cover recent and historical work. Participants should have some knowledge of multiple regression, including the use of matrices, and some experience using a computer.]

**[ILRST 611 Statistical Computing]**

3 credits. Prerequisites: linear algebra, knowledge of a programming language, and statistics at least through multiple regression. Not offered 2000-2001.

A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computation, or computing environments. Designed for graduate students in the statistical sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.]

**ILRST 612 Data Mining**

Spring. 3 credits. Prerequisite: 3 courses in statistics including multiple regression, computer experience (preferably cross platform), and matrix algebra (may be taken concurrently). J. Bunge.

Data mining is the fastest-growing business application of statistics. The term typically refers to a suite of methods used to estimate or predict a response (e.g., probability that a customer will buy a new product), based on a large set of predictors (5,000 independent variables is not large). Methods include logistic regression, decision trees (CART, CHAID), neural nets, and discriminant analysis; diagnostics and outlier detection are also important. We will use the new SAS software package Enterprise Miner, which gives a point-and-click interface for data cleaning, exploration, and analysis via several methods, and we will also use the IBM competitor Intelligent Miner. I will draw on my consulting experience in industry and will hopefully obtain real (sanitized) datasets for us to work on. For more information e-mail John Bunge at [jab18@cornell.edu](mailto:jab18@cornell.edu); see also [www.cornell.edu/Academic/RSF9/RSF9ILRST.html](http://www.cornell.edu/Academic/RSF9/RSF9ILRST.html).

**[ILRST 613 Bayesian and Conditional Inference]**

3 credits. Prerequisites: graduate level courses equivalent to OR&IE 670 and OR&IE 651 or permission of instructor. Not offered 2000-2001. M. Wells.

Covers the following topics: loss functions and utility theory, prior information and subjective probability, coherency, basic Bayesian inference, empirical Bayesian inference, robust Bayesian inference, Bayesian computations, ancillarity, conditional properties of statistical procedures, and Bamdorff-Nielsen's exact likelihood theory.]

**ILRST 614 Structural Equations with Latent Variables**

Spring. 3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511, or equivalent. M. Wells.

Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model. Rather than treating path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, we will treat them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.

**[ILRST 615 Expert Systems and Probabilistic Network Models]**

3 credits. S-U only. Prerequisite: OR&IE 560 or an equivalent course in probability and statistics. Not offered 2000-2001.

This is an interdisciplinary course for students in applied mathematics, computer science, statistics, and other related fields of applications such as medical, engineering, and social sciences. Topics include: components of expert systems, rule-based expert systems, probability-based expert systems, uncertainty measures, dependency models, Bayesian and Markov networks, propagation of uncertainties, learning structure from data, and examples of applications. Students will use computer software to gain experience.]

**[ILRST 711 Robust Regression Diagnostics]**

3 credits. S-U or letter grade. Prerequisite: ILRST 312 or equivalent or permission of instructor. Not offered 2000-2001.

Regression models are simplifications of reality; we rarely expect the model to be exactly true. In many applications of regression, however, small changes in a model, a model assumption, or a data point can have very large effects on the results. Regression analysis is viewed in this course as a cyclical process, which takes inputs and produces outputs in an interactive or cyclical way; a way in which the outputs can be used to diagnose, validate, criticize, and possibly alter the inputs. This is an attempt to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the input. Students are expected to be able to perform through analyses of real-life data using computer packages. Topics to be discussed include: role of variables in a regression equation, regression outliers and influential observations, robust regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-in-variables models, and generalized linear models.]

**[ILRST 712 Theory of Sampling]**

Fall. 3 credits. Prerequisite: calculus and at least 1 semester of mathematical statistics. Not offered 2000–2001. J. Bunge.

Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or “design” approach; the second part on the more recent “model-based” approach. Attention is paid to recent progress in the field.]

**[ILRST 713 Counting Processes with Statistical Applications]**

Spring. 3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. M. Wells.

The statistical analysis of life history data is playing an increasing role in the social, natural, and physical sciences. We will formulate and solve various practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. We will examine the martingale dynamics for point processes relevant to life history data. Both parametric and nonparametric inference for multiplicative intensity models will be considered. The large sample properties of the proposed procedures will be discussed in detail using recent extensions of functional central limit theorems for martingales.

**[ILRST 714 Topics in Modern Statistical Distribution Theory]**

3 credits. Prerequisites: courses equivalent to OR&IE 651 or Math 571, and STATS 409 or OR&IE 670. Not offered 2000–2001.

Recent research has revealed vast territories of distribution theory that are unfamiliar to most statisticians. Provides an introduction to three topics underlining this “modern” theory: infinite divisibility, decomposability, and stability; characterization of distributions; extensions of univariate distributions to multivariate distributions.]

**[ILRST 715 Likelihood Inference]**

3 credits. Prerequisites: graduate courses equivalent to OR&IE 670 and OR&IE 670. Not offered 2000–2001.

In most statistical models, exact distribution theory for testing hypotheses or constructing confidence intervals is either unavailable or computationally cumbersome. Inferences are routinely performed by using large-sample approximations to the distributions of test statistics. This course provides a survey of some recent higher-order asymptotic approximations for likelihood-based methods of inference.]

**[ILRST 716 Statistical Consulting]**

2 credits. Prerequisite: limited to graduate students. S-U only. Not offered 2000–2001.

A course in practical consulting on “real-world” statistical problems. Under the supervision of the instructor(s), students will hear problems presented by clients (usually faculty and graduate students from other fields) and will collaborate in proposing a statistical model, analyzing data, and interpreting results. Statistical computing will be used as needed.]

**[ILRST 717 The Analysis of Discrete Data]**

Spring. 3 credits. Prerequisites: graduate courses equivalent to OR&IE 670 or permission of instructor. Not offered 2000–2001. T. DiCiccio.

This course concerns statistical models and methods for analyzing categorical data. The

key models to be covered are log-linear models for contingency tables and logistic regression models for binary-response and multinomial data. Asymptotic distribution theory necessary for inference in these models will be emphasized. Other topics include conditional inference and connections with generalized linear models. Computer packages will be used for analyses in practical examples.]

**[ILRST 799 Directed Studies]**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILR EXTENSION****Statewide**

The following courses are open to participants in the Extension Division's statewide credit programs in labor studies and management studies. Extension offices are based in Buffalo, Albany, Rochester, Ithaca, New York City, and Long Island. These courses are not open to undergraduate or graduate students matriculated in the Ithaca ILR programs. Courses and course credits earned in Extension Division certificate programs are not automatically accepted as transfer credits or as a basis of admission to the resident ILR undergraduate and graduate programs in Ithaca. Student applications for course transfer are evaluated by the ILR school on an individual basis.

**204 Managing Conflict**

Fall or spring. 3 credits.

The purpose of this course is to provide students with opportunities to apply conflict resolution theory to specific situations, based on real-life problems that require resolution. Students will examine situations, analyze the facts and perceptions driving the actors, and engage in applying communication, negotiation, and mediation techniques to reduce or eliminate the conflict.

**205 Oral Skills for Conflict Management**

Fall or spring. 3 credits.

This course emphasizes developing the oral communications skills required to successfully manage conflict both as a party to a dispute, and as a third party who is charged with helping to resolve a dispute. The course presents simulations to help the participants practice their skills.

**206 The Nature of Conflict**

Fall or spring. 3 credits.

The purpose of the course is to provide students with the conceptual foundation to engage in further study of conflict management and conflict resolution. Having taken the course, the students will (1) be able to identify and describe types of conflict; (2) be able to identify the various sources of conflict; (3) be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; (4) be able to describe conflict situations in terms of social psychological aspects using a “person perception” or “attribution” theoretical orientation; and (5) be able to identify their personal response styles to conflict.

**208 Workplace Negotiations**

Fall or spring. 3 credits.

Will cover the theory and practice of negotiation as it applies to workplace and business situations. Students will be exposed

to theoretical models of negotiation and will participate in negotiation exercises. Students will be participating in two negotiation exercises and will be asked to write a paper on their negotiating position in each exercise. More weight will be given in grading to the student's ability to present a well-thought-out rationale for positions and tactics than to the outcome of the negotiation itself.

**241 Arbitration**

3 credits.

A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

**242 Public Sector Collective Bargaining**

Fall or spring. 3 credits.

This course is designed as an introduction to collective bargaining in the public sector. The course examines the historical development of bargaining in public employment, the evolution of state and federal bargaining theory and practices, as well as impasse resolutions techniques frequently found in this sector. Special emphasis will be given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

**243 Growth of American Business and Management History**

Fall or spring. 3 credits.

The growth and cycles of American business enterprise produced significant changes in education, government, work, the family, the ethnic composition of the population, and the landscape. As business and industry expanded, new methods evolved for managing these enterprises. This course will examine the development of managerial practices, the relationship of management to the work force, and the social ramifications of capitalist expansion.

**245 Public Sector Labor Law**

3 credits.

A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course will examine the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly how it has been interpreted by the courts of New York State in its application. Major emphasis will be employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board.

**247 Labor and the American Economy**

3 credits.

Will help the student understand how economic theories relate to the economic problems confronting the American citizen in general and the American union member in particular. Emphasis will be placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

**248 Employment Practices Law**

3 credits.

Considers laws and regulations that directly affect managers and employers. Students will examine issues and laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws and other topics. Students will focus on the practical application of laws and their impact on the workplace.

**250 New York Workers' Compensation Law for Trade Unionists and Injured Workers**

Fall or spring. 3 credits.

There is a collective perception that the Worker's Compensation system in New York compounds an injured personal predicament with Byzantine responses that lead to despair. Unions and injured workers' organizations believe that, if properly empowered, they can be just as effective as lawyers in looking after their injured colleagues' claims. This course is structured to meet both of these realities. We will delve into every nook and cranny of New York Worker's Compensation law. The course will be entirely practical. Skills teaching, how to present a case, decorum, ethics, and persuasiveness, are built into the course. Experts on how the system really works will also be used.

**251 Principles and Practices of Management**

Fall or spring. 3 credits.

Presents the theory and processes of management with an emphasis on supervision. Management functions of planning, organizing, staffing, and evaluating are included. Concepts and theories are presented, and case studies are analyzed. Motivating people, exercising leadership, and effectively developing employees are emphasized.

**252 Contract Bargaining**

Fall or spring. 3 credits.

Examines the principles of contract bargaining, including bargaining environments and structures as well as standards used in bargaining. Students will learn to prepare bargaining demands, cost economic items, draft noneconomic contract language, negotiate economic and noneconomic issues, and resolve a contract bargaining impasse. The course will consider the impact of contract bargaining outcomes on workers, unions, employers, and the public.

**253 Contract Administration**

Fall or spring. 3 credits.

Focuses on the role of the steward in administering the union contract in the workplace. Students will evaluate grievance and arbitration contract clauses, the grievance procedure in practice, the role of the union steward, the role of local and international unions, negotiation of grievances, and preparation for arbitration. Students will analyze the impact of grievance and arbitration procedures on workers, unions, and employers.

**254 Labor Law**

Fall or spring. 3 credits.

Examines the principles of labor law by looking at social philosophy and the historical context of federal labor legislation from the 1930s. Students will concentrate on major provisions of the National Labor Relations Act,

examining how the National Labor Relations Board and the federal courts have interpreted the national labor laws. Discussion will include new directions in labor legislation and interpretation with consideration given to the impact of labor law on workers, unions, and employers.

**255 Labor History**

Fall or spring. 3 credits.

Reviews American labor history from the perspective of workers' social dimensions of the development of the working class, reform and revolutionary movements, and the emergence of craft, industrial, and public employee unions. Included will be a discussion of the development of trade union institutions and leaders and the evolution of union political activities and collective bargaining. Special attention will be paid to the involvement of women and minority workers with unions.

**256 Dispute Resolution**

Fall or spring. 3 credits.

Examines third-party participation in dispute resolution in private and public sector collective bargaining. Development of dispute resolution methods in American labor relations; issues and practices in neutral, binding arbitration of grievances and mediation; conciliation; and fact finding procedures will be discussed. We will also look at exclusive labor-management mechanisms to settle industry disputes.

**257 Human Resource Administration**

Fall or spring. 3 credits.

Designed to provide an overview of personnel practices in the modern organization. It will focus on manpower planning, employment, training and development, motivation and compensation, and performance appraisal and communication for students who are currently supervisors or personnel practitioners or for those aspiring to those positions.

**258 Organizational Behavior**

Fall or spring. 3 credits.

Designed to illustrate how behavioral science theory leads to research and how theory and research provide a basis for practical application in business, industry, education, and government.

**259 Union Administration**

Fall or spring. 3 credits.

Focus is on the principles and practices of effective union administration. Students will study the dynamics of democratic organizations and the development of organizational leadership. The course explores alternative methods of decision making and lines of responsibility. The legal obligations of unions and union officials will be discussed and analyzed. The course also examines the structure and evolution of relationships inside the labor movement.

**262 Project Management**

Fall or spring. 3 credits.

Through the process of restructuring, many companies are "flattening out" the hierarchy of management levels. This means that more responsibilities are shifting downward to employees who may not have the status (authority) of supervisor or manager, but who have the enormous responsibility of completing complex, critical projects within well-defined business constraints. In response to the shift in responsibility downward and with much more to be accomplished with limited

resources, the demands for employees with effective project management skills are increasing. Employees who can successfully manage projects are and will continue to be the most marketable individuals in the work force because their skills are transferable to all disciplines, organizations, and situations.

**264 Contemporary Labor Problems**

Fall or spring. 3 credits.

A survey of the major challenges that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by the experts.

**266 Professional Writing: The Power of the Written Word in Business**

3 credits.

Focuses on the importance of developing effective writing skills and strategies required to be successful in business communities. Students will sharpen existing writing skills, correct bad writing habits, and develop new writing habits through "real life" exercises taken from case studies and their own experiences. In addition, they will learn the importance of using rhetorical strategies such as defining situations requiring written responses, writing to a specific audience, attending to a specific purpose, choosing the appropriate language, and varying tone and style as the situation demands. Students, upon completing this course, will have the confidence and the writing skills to successfully address most situations requiring written communication. Genres include memos, proposal letters, and reports.

**267 Speaking and Listening for Business and the Professions**

3 credits.

The overall objective is to equip participants with the skills and knowledge they need to speak and listen effectively. By the end of the course, students will be able to accurately listen to, and interpret oral communication; identify major causes of listening misunderstandings such as biases, distractions, emotions, etc.; describe and employ techniques for overcoming those listening barriers; speak effectively in front of an audience; describe ways to build rapport with an audience; persuade an audience; use visual aids effectively; introduce speakers, make presentations, and speak extemporaneously.

**269 The Evolution of Work in America**

Fall or spring. 3 credits.

Explores the evolution of contemporary business operations. Discussion will focus on historical and present-day theories of work organization, changes in the workplace and workforce, and future trends. The relationships between businesses and the societies in which they exist, in both local and global economies, will also be examined.

**343 Health in the Workplace**

Fall or spring. 3 credits.

Examines the state and federal laws that affect job safety, and health, and the way workers and their unions can use legislation to promote safe and healthy working conditions. Topics include safety and health standards; the enforcement of laws and standards; the responsibilities of management; the rights of employees and their unions, including the rights to information; collective bargaining for safety and health; racial- and gender-based discrimination regarding hazardous work; and drug testing.

### 344 Union Strategies for Safety and Health

Fall or spring. 3 credits.

Even with OSHA, the most effective tool for change in the unionized work environment remains the collective bargaining process and collective action. This course explores specific strategies for making the workplace safer through collective bargaining, workers education, safety and health committees, joint labor-management committees, working with COSH groups, union-sponsored medical exams at occupational health clinics, and the OSHA complaint process. Case studies will consider integration of occupational health initiative into broader union strategies such as organizing drives and industrial development planning.

### 345 Health Hazards Identification and Evaluation in the Workplace

Fall or spring. 3 credits.

Students will learn about the many work site health hazards including toxic chemicals, biological agents, radiation, and electromagnetic fields. Routes of exposure, acute and chronic health effects, and the bases of regulatory exposure limits such as TLV's and OSHA PEL's will be discussed. Basic hazard evaluation and information gathering techniques will familiarize students with available resources for evaluating work site conditions.

### 346 Introduction to Industrial Hygiene: Hazard Evaluation and Control

Fall or spring. 3 credits.

This course builds on the knowledge acquired in both the safety hazard and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. (Students are encouraged to complete the health hazard and safety hazard courses before taking industrial hygiene.) It will provide practical, hands-on training in evaluating potential worksite hazards. Students will learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment. They will also learn to interpret and evaluate monitoring data provided by professional testers.

### 347 Safety Hazards Identification and Evaluation in the Workplace

Fall or spring. 3 credits.

Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature; health effects include burns, electrical shock, broken bones, and the loss of limbs, eyesight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students will become familiar with site inspection and hazard identification methods and will learn about control techniques appropriate for a variety of work settings.

### 364 Labor, Government, and Politics

3 credits.

A survey of the ways the American political system affects labor and how organized labor affects the system through voting, political parties, and interest groups.

### 367 Safety and Health in the Workplace

Fall or spring. 3 credits.

To provide basic education and training in workplace safety and health. The course will focus on applicable federal and state laws,

standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience will be provided through workplace walk-through safety and health inspections and in use of industrial hygiene equipment that measure noise, temperature, humidity, airflow, and airborne toxics.

## FACULTY ROSTER

Abowd, John M., Ph.D., U. of Chicago. Prof., Labor Economics  
 Angelotti, Jon E., M.S. candidate, Cornell U. Social Statistics  
 Bacharach, Samuel, Ph.D., U. of Wisconsin. Jean McKelvey-Alice Grant Prof. of Labor Management Relations, Organizational Behavior  
 Batt, Rosemary, Ph.D., Mass. Inst. of Technology. Asst. Prof., Human Resource Studies  
 Bishop, John H., Ph.D., U. of Michigan. Assoc. Prof., Human Resource Studies  
 Blau, Francine D., Ph.D., Harvard U. Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics

## LAW SCHOOL

### ADMINISTRATION

Lee E. Teitelbaum, dean of the law faculty and professor of law

John A. Siliciano, vice dean and professor of law

Gary J. Simson, associate dean for academic affairs and professor of law

Anne Lukingbeal, associate dean and dean of students

Richard D. Geiger, associate dean and dean of admissions, financial aid, and information technologies

Harry B. Ash, associate dean for external relations

Karen V. Comstock, assistant dean for career services

Charles D. Cramton, assistant dean for alumni and international affairs

Gihan S. Fernando, assistant dean for student services

Richard F. Robinson, assistant dean for administration and finance

Nan A. Colvin, registrar

### LAW SCHOOL

The primary function of the Law School is to prepare attorneys for both public and private practice who will render the highest quality of ethical and professional service to their clients and who will further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories.

Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law "with specialization in international legal affairs." The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an LL.M. degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, the Université de Paris I (Pantheon-Sorbonne), and Humboldt University, as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of students, generally all from abroad. The LL.M.

degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

### FIRST-YEAR COURSES

#### LAW 500 Civil Procedure

Fall and spring. 6 credits. K. M. Clermont, B. J. Holden-Smith, F. F. Rossi.

An introduction to civil litigation, from commencement of action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law; jurisdiction, process, and venue; and former adjudication.

#### LAW 502 Constitutional Law

Fall. 4 credits. K. A. Abrams, S. H. Shiffrin, G. J. Simson, I. P. Stotzky.

A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

#### LAW 504 Contracts

Fall and spring. 6 credits. R. A. Hillman, R. S. Summers, W. F. Taylor.

An introduction to the nature, functions, and processes of exchange, contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

#### LAW 506 Criminal Law

Spring. 4 credits. S. D. Clymer, S. P. Garvey.

An introductory study of the criminal law, including theories of punishment, analysis of the elements of criminal liability and available defenses, and consideration of specific crimes as defined by statute and the common law.

#### LAW 508 Legal Methods

Fall and spring. 4 credits. P. Anderson, J. Atlas, C. Bond, D. French, C. Grumbach.

Legal Methods is a full-year course designed to introduce first-year students to lawyering skills, with primary emphasis on legal writing, analysis, and research. In the context of a law office, students create some of the essential legal writings that lawyers produce. For example, students prepare predictive memoranda for their boss, pointing out the strengths and weaknesses of their client's case and attempting to develop winning arguments. Students may also write a "client letter," using plain English to explain to their client the law, the merits of the case, and, possibly, advise the client on the best course of conduct. Finally, students develop their oral

and written advocacy skills and start thinking about litigation strategy by researching and writing persuasive memoranda or legal briefs for a trial or appellate court and then, at the end of the year, orally arguing their case. Instruction occurs in small sections of approximately 37 students and in individual conferences. Each student receives extensive editorial and evaluative feedback on each written assignment.

#### LAW 512 Property

Spring. 4 credits. G. S. Alexander, A. D. Davis.

An investigation of the law's protection of ownership, including the beginnings of property, legal and equitable estates, concurrent ownership, and public and private regulation of land use.

#### LAW 515 Torts

Fall. 4 credits. J. A. Henderson, Jr., J. J. Rachlinski, S. J. Schwab, J. A. Siliciano.

An introduction to the principles of civil liability in the tort field: intentional wrongs, negligence, and strict liability. Attention is also given to the processes by which tort disputes are handled in our legal system.

### UPPERCLASS COURSES

#### LAW 602 Administrative Law: The Law of the Regulatory State

Fall or spring. 3 credits. Limited enrollment. Prerequisite: Constitutional Law strongly advised. Students without such background should consult the instructor. C. R. Farina, J. J. Rachlinski.

An introduction to the constitutional and other legal issues posed by the modern administrative state. Topics include: procedural due process, separation of powers, procedural modes of administrative policymaking; judicial review of agency action; the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger inquiry into the role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

#### [LAW] Alternative Dispute Resolution: Mediation as a Nontraditional Approach to Litigation

2 credits. Limited enrollment. Not offered 2000–2001.

This seminar will emphasize mediation as a nontraditional, modern alternative to the traditional litigation process. The seminar will introduce students to the spectrum of ADR processes, but will emphasize mediation as both a concept and a set of skills. The process of mediation will be explored through readings, videotapes, simulations, and role-playing exercises.]

#### LAW 608 American Indian Law

Spring. 2 credits. Recommended prerequisite: Administrative Law and Public International Law. J. Tahsuda.

An examination of the primary themes and materials of the federal law concerning Native American tribes and individuals. The course devotes considerable attention to the historical development of law and policy in that area and to the present division of authority over Indian country among federal, state, and tribal governments.

#### **LAW 610 Antitrust Law**

Fall. 2 or 3 credits. Students who have taken an antitrust course in the Paris Program may take this course for 2 credits. G. A. Hay.

A consideration of the basic antitrust rules enacted by Congress and amplified by the courts to protect competitive markets and limit the exercise of monopoly power. Price fixing, boycotts, and market allocation agreements among competitors; agreements between suppliers and customers; joint ventures; attempts to monopolize and monopolization; price discrimination; and mergers.

#### **LAW 611 Arbitration**

Fall. 3 credits. Limited enrollment. R. K. Hull.

Arbitration is the principal method of resolving disputes between unions and employers, between securities brokers and their clients, and under international business agreements, and is gaining favor in many other areas. This course familiarizes students with arbitration practice in a variety of fields through the use of simulation exercises, role-playing, and discussion of readings and videotapes. Class exercises focus on practical skills, including case preparation, preliminary hearings, all phases of case presentation, and post-hearing briefs. The practical distinctions between arbitration and traditional litigation are noted throughout.

#### **[LAW Banking Law and Regulation]**

3 credits. Not offered 2000–2001.

The course begins by defining the roles that banks and other financial intermediaries play in the economy. It considers the claim that a specialized set of regulations governing the activities of financial intermediaries is justified by the special role banks occupy in society. In that context a variety of theoretical arguments about banking regulation are considered. The course then examines each of the major laws that govern banking activities against the background of the various regulatory theories discussed. Topics addressed include entry restrictions, growth and expansion of bank activities, regulation of the business of banking, expansion through the bank holding-company structure, branch banking, interstate banking, and regulation of failing or failed banks.]

#### **LAW 613 Bankruptcy**

Spring. 3 credits. Prerequisite: Students who have taken Debtor-Creditor Law are ineligible for this course. T. Eisenberg.

Selected topics in the law of bankruptcy. An overview of the various bankruptcy chapters and a detailed study of the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9-secured creditor and the bankruptcy trustee's power to avoid liens. Related topics in the enforcement of money judgments and the law of fraudulent conveyance.

#### **LAW 614 The Business Acquisitions Process**

Spring. 3 credits. Prerequisite: Corporations. Limited enrollment. V. F. Garrity, Jr.

The focus of this course is developing the lawyering skills required by an attorney advising a client who is selling or purchasing a business. Individual drafting exercises, as well as client interview/strategy discussions and negotiations by student teams acting as counsel to the buyer or seller, will be interspersed with period lectures on the business acquisition process and analysis of selected publicly available documentation of actual acquisition transactions. The typical chronology of an acquisition: analysis of the financial statement of the target company; negotiation by the buyer and the seller of the basic terms of the deal including selection of structure (sale of stock or assets; merger); drafting and negotiation of a term sheet or letter of intent; due diligence investigation; drafting and negotiation of the definitive acquisition agreement; handling of problems encountered between the execution of that agreement and the closing of the acquisition; and the closing.

#### **LAW 615 Children, Parents, and the State**

Spring. 2 credits. L. Teitelbaum.

This course explores legal and social understandings of the rights of children, parents, and the state with respect to issues such as access to and control over the content of education, authority regarding health care, claims to speech and expression, and procreative decisions. The course also examines the operation of rights in connection with juvenile court jurisdiction over neglect and abuse, delinquency, and status offenses.

#### **[LAW Civil Rights Legislation]**

3 credits. Not offered 2000–2001.

Explores in depth the history and current status of federal civil rights legislation. The course focuses on 42 U.S.C. §1983, the dominant vehicle for vindication of constitutional rights in civil cases, and on Title VII of the Civil Rights Act of 1964, the principal federal statute covering employment discrimination.]

#### **LAW 616 Commercial Law**

Spring. 3 credits. W. F. Taylor.

Examines a variety of commercial dealings and focuses on Articles 2 and 3 of the Uniform Commercial Code, with some coverage of other Articles and the Convention on Contracts for the International Sale of Goods. The course is designed to give students an understanding of commercial statutes and to inform them about many of the underlying commercial transactions to which the law relates.

#### **LAW 617 Comparative Law**

Spring. 2 credits. Prerequisite: basic common law. F. Werro.

The course tackles first the sources, structures, and assumptions common to the legal systems of continental Europe, Latin America, and some countries of the Far East, and then examines the enduring divisions of their private law. Particular examples are then studied and may be grouped under a topic (e.g., the liability of the post office or the problem of the injured rescuer) or by country (e.g., French contract law, European private law, and German tort law). The course aims to demonstrate the utility of the comparative method by encouraging students to rethink their own law in the light of other approaches. This enables students to see how problems may sometimes be solved by breaking the categories in which they are embedded in a

given system, and thus to gain a better understanding of the reasons for the rules.

#### **LAW 618 Comparative Law: Asian Legal Systems**

Spring. 3 credits. A. Riles.

This course has two related goals. First, we will consider some elements and motifs of legal systems of the Asia Pacific region. Second, we will consider some elements and motifs of the discipline of comparative law—its aims, tradition, methods, and achievements—and use materials and problems from the Asia Pacific region to reflect critically and programmatically on a disciplinary project that traditionally defines itself in predominantly Euro-American terms. One question for the course will be how to bring to fruition the practical implications and theoretical richness of the materials we will study, from the points of view of both academics and practitioners. The course also aims to provide students with a prism for thinking about legal questions in their own society through the comparison of other cultures and conceptions of law.

#### **LAW 619 Conflict of Laws**

Spring. 3 credits. G. J. Simson.

A study of the methods used by courts to decide the applicable law in cases that, in their parties or events, involve more than one state or country. Attention to the due-process limitations on jurisdiction, a state's obligation under the full-faith-and-credit clause to respect sister-state judgments, and conflicts between federal and state law.

#### **LAW 620 Constitutional Law II: The First Amendment**

Spring. 3 credits. S. H. Shiffrin.

A comprehensive discussion of freedom of speech, press, and association. The free-exercise-of-religion clause and the establishment clause of the First Amendment are treated less extensively.

#### **[LAW Constitutional Remedies]**

2 credits. Not available to students who have taken Civil Rights Legislation. Not offered 2000–2001.

Explores in depth the history and current status of 42 U.S.C. §1983, the major statutory vehicle for vindication of constitutional rights in civil cases.]

#### **LAW 621 Copyright**

Fall. 3 credits. P. W. Martin.

Copyright law has become increasingly important as the American economy has shifted from a predominantly manufacturing economy to an information economy. This course provides students with a comprehensive overview of the U.S. copyright law. It begins with coverage of the substantive and procedural requirements for qualifying for copyright protection, then provides an in-depth study of the rights granted to authors under this law, the standards for judging copyright infringement, public policy limitations on the scope of copyright interest (such as the fair use defense), and remedies available to successful litigants. Issues raised by new information technologies and recent amendments addressing them receive special attention. Partly as an aid for understanding United States law better and partly because copyright law is of increasing international importance, the course also provides some comparative and international copyright law components. In addition, it touches on issues of trademark and right of publicity law as they overlap or complement copyright.

**LAW 622 Corporate Finance and Emerging Markets**

Spring. 3 credits. A. B. Kingston.

The course examines legal aspects of various types of corporate finance transactions in emerging markets and the role of commercial lawyers in these transactions. The course focuses on corporate finance transactions occurring in the midst of the transformation of former Soviet bloc states from command to market economic systems. Transactions in emerging markets pose different political, economic, social, and legal challenges from those arising from transactions in other, more predictable, legal systems. At the same time, the globalization of the world economy and the profound shortage of capital in many emerging markets make this one of the fastest growing fields of commercial law.

**LAW 624 Corporate Governance**

Fall. 2 credits. Prerequisite: Corporations. P. Puri.

This course focuses, at an advanced level, on the principal legal and economic governance questions facing major corporations today. Among the subjects considered are: (1) a reevaluation of the consequences of the divorce of corporate control from ownership; (2) the status and practicability of "shareholder democracy"; (3) proper corporate goals; (4) the corporation and its constituencies (shareholders, labor, consumers, etc.); (5) the duties and responsibilities of corporate directors, officers, and insiders; (6) the role of the corporate lawyer; (7) the role—and new activism—of institutional investors; (8) the respective roles of state corporation law and federal securities law; and (9) comparative corporate governance and the problems of systemic convergence and transitions.

**LAW 625 Corporations**

Fall or spring. 4 credits. J. R. Macey, P. Puri.

An introduction to the business corporation laws affecting the rights and roles of corporate boards of directors, senior executive officers and shareholders, with an emphasis on large, publicly traded firms. Shareholders' economic interests are examined from the perspective of limited liability and dividend standards, expectations of liquidity or transferability of shares and the use of debt capital as a mode of financing corporate activity. Shareholders' limited participation rights in corporate decision making are examined from the perspective of state and federal rules governing shareholder voting and the disclosure of corporate information and the notion of managerial expertise (e.g., as evidenced by judicial application of the "business judgment rule"). The latter part of the course focuses on directors' and officers' fiduciary obligations to shareholders, examining the operation of these duties in a variety of settings and transactions. Issues relating to the roles and functions assumed by corporate attorneys (with respect to their clients) and the role of business corporations within society are also addressed. No previous business knowledge is assumed.

**LAW 627 Criminal Procedure**

Spring. 3 credits. S. D. Clymer.

This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of interrogations and confessions, the admissibil-

ity of evidence, and on the right to counsel throughout all stages of the criminal process.

**[LAW Current Topics at the Crossroads of Law and Finance (also NBA 551)]**

3 credits. Not offered 2000-2001.

Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, or pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course will look at the way that these financial institutions are treated from both a legal and an economic perspective. Emphasis will be placed on the intersections between modern financial theory and legal analysis. Topics to be covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.]

**LAW 629 Death Penalty in America: A Survey**

Fall. 2 credits. J. H. Blume.

The course will survey the law relating to the administration of the death penalty.

**LAW 630 Directed Reading**

Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Registrar.

An examination of a topic through readings selected by arrangement between the instructor and an individual student or group of students (not exceeding eight).

**LAW 633 Employment Law**

Spring. 3 credits. S. J. Schwab.

Survey of major statutory schemes and common law doctrines that regulate the employer-employee relationship in the private sector, other than laws regulating union formation and collective bargaining which are covered in Labor Law. Topics covered include unjust dismissal, drug testing, free speech, privacy, and antidiscrimination laws. In addition, the course will provide an overview of major statutory schemes affecting the terms and conditions of employment, such as unemployment insurance, employee benefits regulation, workers' compensation, the Fair Labor Standards Act, and the Occupational Safety and Health Act.

**[LAW Entertainment Law**

2 credits. Not offered 2000-2001.

This course explores several areas within the broad field of entertainment law. Topics include contract law, labor, antitrust, the role of agents, personal and privacy rights, literary and music publishing, sound recordings, films, and television.]

**LAW 636 Environmental Law**

Spring. 3 credits. J. J. Rachlinski.

The course surveys the major environmental law with a primary focus on federal statutes (CERCLA, RCRA, NEPA, the Clean Water Act, the Clean Air Act, and the Endangered Species Act). The course lays out the various governmental tools used to address the problems of environmental degradation and discusses the value of these tools. Special attention is paid to the economic, social, and political obstacles to efficient regulation of the environment.

**[LAW Estate and Gift Taxation**

3 credits. Prerequisite: Federal Income Taxation. Not offered 2000-2001.

This course surveys the three federal taxes imposed on wealth transfers: the estate tax, the gift tax, and the generation-skipping tax.

The course uses a problem-oriented approach, with emphasis on the Internal Revenue Code, regulations, and other tax materials.]

**LAW 640 Evidence**

Fall or spring. 3 credits. S. D. Clymer, F. F. Rossi.

The rules of evidence in civil and criminal cases with emphasis on relevance, authentication, witnesses, experts, and hearsay. The course focuses on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

**LAW 641 Family Law**

Spring. 3 credits. M. A. Fineman.

Broadly understood, family law is the study of state imposed rules regulating intimacy and intimate relationships in society. Consideration of the legal regulation of intimate relations collapses traditional law school distinctions such as those drawn between "civil" and "criminal" or "public" and "private" mechanisms for control of behavior. The laws that effect family formation and dissolution are many and varied. They reach deep into our lives, influencing as well as being influenced by our assumptions and beliefs about what is "natural" and "normal." In this course we will use scientific and social scientific information to explicitly evaluate some of those assumptions and beliefs, and to call into question the appropriateness of a number of current state laws regulating families. We will examine the evolution of our society's understanding of and expectations for marriage, as well as shifts over the past several decades in the nature of and justification for state regulation of that institution. Substantial attention also will be paid to the social and legal consequences of marriage dissolution, including an examination of the imposition of a gender neutrality-gender equality model in the divorce context. The imposition of this model has resulted in a transformation of the legal rules governing distribution of property and allocation of custody and control over children with some problematic consequences. Topics to be considered include: definitions, policy and trends in American family law, the regulation of marriage, the legal significance of marriage: rights and obligations, private ordering within the marital context, nonmarital relationships—rights and obligations, divorce and divorce substitutes, spousal and child support obligations, marital property and theories of marital equality, rights to children.

**LAW 643 Federal Courts**

Spring. 4 credits. Prerequisite: Constitutional Law and second semester of Civil Procedure. Students without such background should consult with instructor. B. J. Holden-Smith.

An intensive examination of the federal courts and their constitutional and statutory role in the federal system. The relationship of the federal courts with the other branches of the federal government and with the states, and the relationship between state and federal law. Case-or-controversy problems, the allocation of jurisdiction between state and federal courts, federal question and diversity jurisdiction of the district courts, and limitations thereon. The course is strongly recommended for anyone planning a judicial clerkship.

**LAW 644 Federal Income Taxation**

Fall or spring. Fall, 4 credits; spring, 3 credits. Limited enrollment. T. Eisenberg, R. A. Green.

A basic course designed to develop understanding of tax concepts and ability to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

#### **LAW 646 Feminist Jurisprudence**

Spring. 3 credits. Limited enrollment.

K. A. Abrams.

This course examines the role of law, and, more generally, the role of the state, in perpetuating and remedying inequities against women. We will study several paradigmatic feminist legal theories, including equality, difference, dominance, and various antiessentialist theories (e.g. intersectional, poststructuralist). Among the questions considered will be: How does the law help to construct gender? In what ways does it interact with cultural images and assumption regarding women to perpetuate women's disadvantaged status in society? To what extent can a set of institutions implicated in women's marginalization be used to remedy it? Can a legal system predicated on the liberal assumption of a unitary, prepolitical, autonomous self accommodate feminist accounts of social construction, constrained "choice," or decentered subjects? What methods have feminists used to argue in and about the law, and do these methods themselves have the potential to transform legal thinking?

#### **LAW 647 Health Law**

Fall. 3 credits. L. I. Palmer.

This course examines the role of law and policy in the health care industry. Students will be invited to take a "systems approach" to the study of the role of law in arriving at coherent policy solutions for a host of dilemmas facing a rapidly evolving industry. Students will be asked to consider if a particular statute, regulation, or judicially crafted legal doctrine is consistent with new developments or any public policy towards health care. Topics covered include: access to health care; purchasing health care; commercialism vs. professionalism; the antitrust challenge to professional dominance; changing institutional providers; and public and industry-sponsored quality control.

#### **[LAW Injunctions]**

3 credits. Prerequisite: 2 semesters of Civil Procedure. Students without such background should consult with instructor. Limited enrollment. Satisfies the first or second writing requirement. Not offered 2000–2001.

The course integrates theory and practice in focusing on the availability and use of the injunction, an increasingly important remedial tool in both public-interest and private-section litigation. Coverage includes the substantive and procedural prerequisites for obtaining interlocutory and permanent injunctions, permissible scope and timing, the types and incidents of contempt, and the duties of those enjoined. Special consideration is given to the use of the injunction as a remedial tool for federal courts in public law litigation. The substantial writing component involves several drafting exercises based on real case studies of recent injunction requests.]

#### **LAW 649 Initial Public Offerings and Acquisitions**

Spring. 3 credits. Prerequisite: Corporations. Z. J. Shulman.

An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings,

the course covers: the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX), and the transaction closing. Regarding mergers and acquisitions, the course explores: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues (i.e., antitakeover matters and fiduciary duty concerns), and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees, and noncompetition agreements.

#### **[LAW Insurance]**

3 credits. Not offered 2000–2001.

This course provides a working knowledge of basic insurance law governing insurance regulation; risk classification; property, commercial, and liability insurance; and claims processes. The emphasis throughout the course is on the link between traditional insurance law doctrine and modern ideas about the function of private law.]

#### **[LAW Intellectual Property]**

3 credits. Not offered 2000–2001.

An introduction to the domestic and international context of intellectual property law with a review of state and federal law relating to intellectual property, principally copyright, patent, and trademark law. Intellectual property issues raised by new information technologies are emphasized throughout the course.]

#### **LAW 652 International Business Transactions**

Spring. 3 credits. J. J. Barceló III.

An examination of the unique legal features of business transactions across national boundaries. The first half of the course deals with the private law of international transactions. The topics covered include: choice of law in the United States and Europe concerning international sales; the U.N. Convention on the International Sale of Goods; financing international transactions through letters of credit; and international dispute settlement (litigation and arbitration). The second half of the course deals with public regulatory law, including an overview of the World Trade Organization (WTO/GATT) with some attention to the trade-environment conflict; fair and unfair trade rules (escape clause, subsidies and countervailing duties, and antidumping); the trade consequences of intellectual property rights; and international antitrust.

#### **LAW 653 International Commercial Arbitration**

Fall. 3 credits. J. J. Barceló III.

A study of arbitration as a dispute resolution process for international trade and business disputes. The course analyzes ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreement to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitral awards. The course gives special attention to the international convention on the recognition

and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It will focus on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.

#### **LAW 655 International Human Rights**

Spring. 3 credits. D. Wippman.

This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights, and their philosophic basis; the mechanisms for the protection of human rights, such as the United Nations, specialized agencies, international human rights commissions, and domestic courts; and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts, illustrated where possible through case studies of current situations.

#### **LAW 656 International Mergers and Acquisitions**

Spring. 1 credit. J. J. Hanks.

This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation, and other important topics from both the buy and sell side. The course will use both lecture and case formats. Students will be evaluated on the basis of group and individual written assignments.

#### **LAW 657 International Organizations and Human Rights**

Fall. 2 credits. M. Ndulo.

The course provides a comprehensive legal analysis of problems concerning membership, the structure of the United Nations organs, and a variety of other international organizations. It considers their functions and acts taking into account the United Nations Charter and texts establishing these organizations. The course further considers the structure, jurisdiction, and functions of the International Court of Justice and the International Criminal Court. It also examines the international machinery for the protection of human rights in the world community including the United Nations Human Rights Committee, the European Court of Human Rights and the Inter-American Court of Human Rights. Relevant decisions of these courts and of municipal courts are studied as well as basic documents.

#### **LAW 658 International Protection of Intellectual Property**

Fall. 2 credits. Recommended prerequisite: Intellectual Property. J. R. Thomas.

This course studies intellectual property rights in the international legal system. A general introduction reviews the international protection of patents, trademarks, industrial design, and copyright. The starting and focal point is the Agreement on Trade Related Aspects of Intellectual Property (TRIPS) adopted in the framework of the World Trade Organization (WTO). The international protection of intellectual property is studied through consideration of the TRIPS agreement and the several international conventions the observation of which is made mandatory for WTO Members by TRIPS. Also examined are issues of international court jurisdiction and applicable law in the area of intellectual property.

**[LAW International Taxation]**

3 credits. Prerequisite: Federal Income Taxation. Not offered 2000-2001.

This course examines the U.S. income tax treatment of foreign investment and business operations in the United States, as well as the treatment of U.S. investment and business operations abroad. The course focuses on international tax jurisdiction and on the methods by which the United States relieves international double taxation, both by statute and through income tax treaties.]

**LAW 660 Labor Law**

Fall. 3 credits. S. J. Schwab.

A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, the application of antitrust law to union activity, and the relationship between federal labor law and local laws regulating the employment contract.

**[LAW Law and Medicine]**

3 credits. Not offered 2000-2001.

This course considers legal issues related to medical care and biomedical science. Topics include constraints on access to health care, organization and financing of health services, promoting quality of care in hospitals and outpatient sites, fraud and abuse in clinical practice and biomedical research, dilemmas engendered by therapeutic applications of new technologies, and pathways to reform of the U.S. health care system. Teaching materials will comprise a law and medicine casebook, and scientific literature.]

**LAW 668 Lawyers and Clients**

Fall. 3 credits. Satisfies the professional responsibility requirement. D. A. Kysar, A. Sarat.

This courses uses the lawyer-client relationship as a lens through which to consider the nature and function of the law governing lawyering and its complex relations to ethics, politics, culture, and identity. Among the questions we will address are: To whom do lawyers owe duties? And what are the duties that are owed? What role does the law governing lawyering play in the constitution of competing ideologies of professionalism? From the viewpoint of ethics, how satisfactory is the law governing lawyering? In addressing these questions we will analyze the varying settings in which lawyers practice and inquire about the social and cultural conditions which encourage or discourage conformity to the law governing lawyering. Do we need more and/or better rules to regulate the profession? Or, should attention also be focused on the character of the profession itself and the domains and conditions under which law is practiced? What kinds of allegiances should lawyers develop to their firms, to third parties, to political causes? We will examine representations of lawyers in popular culture and the significance of those representations in the lives of lawyers. In addition, the course we will discuss the intersections of personal and group identity with the practice of law. For example, is it appropriate for African-American lawyers to represent leaders of the KKK, for Jewish lawyers to advocate on behalf of the free speech rights of Nazis, for gay and lesbian lawyers to defend those accused of harassing gays and lesbians? Throughout, we will consider what effective assistance of counsel entails and whether the law of lawyering contributes to, or impedes, the

attainment of a meaningful and personally fulfilling career in law.

**LAW 669 Legal Aspects of Foreign Investment in Developing Countries**

Fall. 3 credits. M. B. Ndulo.

This course will study legal aspects of foreign investments in developing countries. It will seek to identify legal problems that are likely to affect a commercial investment in a developing country. Inter alia, it will deal with the public international law principles and rules governing the establishment by foreign businesses of various factors of production (persons and capital) on the territory of other states and the protection of such investments. Thus, the course includes a discussion of the following topics: economic development and foreign capital; obstacles to the flow of investments to developing countries; guarantees to investors and investment codes; bilateral treaties; nationalization; joint ventures; transfer of technology; arbitration; investment insurance; unification of trade law; and the settlement of investment disputes.

**LAW 670 Legislation**

Fall. 3 credits. L. I. Palmer.

This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. The course examines theories and doctrines of statutory interpretation as a means of determining the degree to which legislation can be used to reform law or to remedy particular social problems.

**LAW 671 Mergers and Acquisitions**

Fall. 2 credits. R. F. Balotti.

This course examines the principal business and legal issues in the purchase and sale of publicly held businesses. Emphasis is placed on the duties of directors in the acquisitions of publicly held companies (including hostile takeovers).

**LAW 672 Negotiations**

Fall or spring. Enrollment limited. 3 credits.

The purpose of this course is to provide opportunities for class participants to develop their negotiating abilities for use in organizational and other settings. The course is premised on the assumption that negotiating concepts are best learned through practice which is grounded in rigorous analysis and reflection. While theoretical principles and concepts from various reference disciplines (such as social psychology, sociology, and economics) will be presented through lectures and readings, this course will focus primarily on improving practical skills. Class participants will not only learn to enhance their individual abilities in dyadic and group situations, but also to analyze contexts for the most effective application of these skills.

**LAW 675 Patent Law**

Fall. 3 credits. J. R. Thomas.

The patent law is a regime of private regulation, initiated by individual inventors and resulting in proprietary interests in an increasingly ambitious range of human endeavor. This course provides a thorough review of the requisites of patentability, including eligible subject matter, utility, novelty, nonobviousness, and disclosure. It then turns to patent enforcement issues such as claim interpretation, the doctrine of equivalents, and remedies. Most inventors seek to obtain proprietary interests in multiple

jurisdictions, so the course includes considerable coverage of comparative and international patent law. Because the system of patents is a capacious one, allowing individuals to appropriate such inventions as sports methods, techniques from the social sciences, and methods of doing business, a traditional technological background is neither required nor recommended as a prerequisite to enroll in this course.

**LAW 676 Private Justice: Arbitration and Other Forms of Alternative Dispute Resolution**

Spring. 4 credits. Limited enrollment.

K. V. W. Stone.

Arbitration has become a major aspect of legal practice in such fields as labor law, commercial law, securities law, family law, and other areas. This course will examine the developing law of arbitration and the relationship between private arbitration and the judicial system. It will examine issues such as the enforceability of arbitration agreements, arbitral due process, judicial review of arbitration awards, and the effect of arbitration on statutory rights. It also examines other forms of alternative dispute resolution, including mediation, small claims courts, and the new mandatory arbitration requirements of some federal and state judicial systems. The course focuses on the law of alternative dispute mechanisms and includes six simulation and problem-solving sessions.

**LAW 678 Products Liability**

Fall. 3 credits. J. A. Henderson, Jr.

Applications of products-liability doctrine and theory to a variety of problems drawn from or closely approximating actual litigation. An overview of the relevant case law, statutes, and administrative regulations, including the new *Restatement, Third, of Torts: Products Liability*.

**LAW 680 Public International Law**

Fall. 3 credits. D. Wippman.

An introduction to the legal rules governing the conduct of states vis-à-vis other states, individuals, and international organizations, with reference to major current events and issues. Topics include the nature, sources, and effectiveness of international law; the establishment and recognition of states; principles concerning state sovereignty, territory, and jurisdiction; the law of treaties; state responsibility; international environmental law; and human rights. Special attention will be given to the law governing the use of force.

**[LAW Remedies]**

Fall. 3 credits. Not offered 2000-2001.

This is an overview of legal remedies and their origins, including equitable remedies, restitution, and damages. The emphasis is on private rather than public law. A considerable amount of the course is spent on the nature and history of equity.]

**[LAW Securities Regulation]**

2 credits. Not offered 2000-2001.

This course examines the federal system of regulation of the offering, sale, and distribution of securities, including the Securities Act of 1933 and the Securities Exchange Act of 1934. Emphasis is placed on the structure, negotiation, and consummation of securities transactions as part of the capital-raising process. The responsibilities of securities professionals are also reviewed.]

**LAW 683 Securities Regulation and the Regulation of Financial Intermediaries**

Fall. 2 credits. J. R. Macey.  
This course covers the federal rules relating to the public offering of securities, secondary market trading of securities, and the regulation of commercial banking, investment banking, and investment companies (mutual funds). Emphasis is placed on the relationship between the various forms of financial intermediation and capital formation, and on the role of these activities in corporate governance. The increasing internationalization of the capital markets, and the public policy issues related to globalization, also will be discussed.

**[LAW Social and Cognitive Psychology for Lawyers]**

3 credits. Not offered 2000–2001.  
In their short history, cognitive and social psychology have produced a rich understanding of how human beings think and how they interact with each other. It should therefore come as no surprise that these two fields have a number of applications to law. This course will explore those applications. Examples include: what effect common errors in judgment have on tort and contract law; how the perception of risk affects societal demand for regulation in environmental law; how organizational and group decision-making processes affect corporate governance; how social norms about fairness impede or facilitate negotiation and dispute resolution; how biases in judgment influence litigation strategies; and what studies of conformity mean for the development of international human rights law. The goal of this course is to introduce students with interests in different areas of law to some general principles of human thought and social interaction that will be valuable to them in their future practice.]

**LAW 684 Sports Law**

Spring. 2 credits. Recommended prerequisite: Antitrust Law and Labor Law.  
W. B. Briggs.  
The course traces the development of sports law in the United States. Particular attention is given to the relationship of sports with antitrust and labor law. Contemporary issues involving arbitration, collective bargaining, amateur athletics, agents, torts, criminal law, and constitutional law are addressed.

**LAW 687 Supervised Teaching**

Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Registrar.

**LAW 688 Supervised Writing**

Fall or spring. 1, 2, or 3 credits. Arrange directly with instructor. See Law School Registrar.

**LAW 689 Taxation of Corporations and Shareholders**

Spring. 3 credits. Prerequisite: Federal Income Taxation. R. Green.  
This course examines the federal income taxation of corporate structure and transactions involving alterations in structure, including the rules governing incorporation, dividends, redemptions, liquidations, divisions, and reorganizations.

**LAW 690 Trademark and Related Doctrines**

Spring. 3 credits. D. Bordewick.  
This course examines trademark, trade dress, trade secret, and trade libel law, and related

doctrines such as unfair competition, false advertising, and the right of publicity. We will examine the various kinds of marks, names, slogans, symbols, product configurations, and packaging for which federal trademark and trade dress protection can be obtained; the need to establish secondary meaning; what constitutes likelihood of confusion; trademark infringement on the Internet; remedies for trademark infringement, counterfeiting, and dilution, and for trade secret misappropriation, and defenses to infringement, dilution, and misappropriation claims. This course may not be taken by students who previously took Patent and Trademark Law.

**LAW 692 Trial Advocacy**

Spring. 4 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath.  
This course is devoted to the study of the trial. Fundamental skills are taught in the context of challenging procedural and substantive law problems. Each stage of the trial is examined: jury selection, opening, objections, direct examination, cross-examination, impeachment, expert witnesses, child witnesses, summation, and pretrial. In addition to exercises every week on a particular segment of a trial, the student also does a full-day jury trial at the completion of the course. Video equipment is used to teach and critique student performances. There are a few written assignments.

**LAW 694 Trusts and Estates**

Spring. 3 credits. E. Sherwin.  
The course surveys the basic law of succession to property, including wills and intestate succession, and the law of trusts. Among the recurring themes of the course are strict and lenient enforcement of formal requirements and methods of interpretation. This is not a course on estate taxation. Grades will be based primarily on a closed book exam with essay and objective questions.

**PROBLEM COURSES AND SEMINARS**

All problem courses and seminars satisfy the writing requirement. Limited enrollment.

**LAW 700 Advanced Civil Procedure**

Fall. 3 credits. B. J. Holden-Smith.  
A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention.

**[LAW Advanced Criminal Procedure Seminar: Post-Conviction Remedies]**

Fall. 3 credits. Not offered 2000–2001.  
This seminar will explore various post-conviction remedies available to state and federal prisoners, including motions for new trial, state post-conviction proceedings, federal habeas corpus, and other extraordinary writs.]

**[LAW Advanced Criminal Procedure Seminar: Pre-Conviction]**

3 credits. Recommended prerequisite: Criminal Procedure. Not offered 2000–2001.  
This seminar starts where the course, criminal procedure, ends. Topics may include double jeopardy, restraints on the decision to prosecute, pretrial detention and release, preindictment and pretrial delay, discovery and the obligation to disclose exculpatory evidence, the right to an impartial jury, jury

selection, the right to confront witnesses and to present a defense, and sentencing.]

**[LAW African Americans and the Supreme Court]**

3 credits. Not offered 2000–2001.  
Beginning with its first decisions related to the slavery question, the Supreme Court has at times aided and at other times hindered efforts to afford African Americans full citizenship. This seminar explores the relationship between blacks and the Supreme Court by examining the major Court decisions affecting African Americans and attempting to understand those decisions in their historical contexts. The course begins with a review of the background and meaning of the constitutional provisions pertaining to the status of blacks in the new nation and ends with an intensive look at *Brown v. Board of Education*.]

**LAW 703 Advanced Legal Research**

Spring. 3 credits. C. M. Germain and staff.  
Teaches cutting-edge research techniques to prepare students for practice in the law office of the future. Focuses on desktop electronic legal research, and covers U.S., international, and foreign law, as well as multidisciplinary research. The course is designed to teach students, whose careers will begin in a period of information transition, how to handle traditional and electronic sources and formats and make efficient choices.

**LAW 707 American Legal Theory**

Fall. 3 credits. R. S. Summers.  
The fall 2000 topic for this seminar is the appropriate form of basic types of legal phenomena such as criteria of valid law (for both publicly and privately made law), statutory rules, accepted methods of statutory interpretation, the principle of stare decisis and common law rules, adjudicative processes, limitations on judicial power to modify rules, and the formal characteristics of the legal system viewed as a whole. American law lacks appropriate form in many important ways and a heavy price is paid for this. However, appropriate legal form and its distinctive underlying rationales (general legal values) profoundly affect the overall content of law and its practice by lawyers in the American as well as other legal systems. Such form and its rationales have as much or more of a claim to primacy as the essence of law than do problem-specific policies that also inform the laws content. In this seminar, there is equal emphasis on practical skills and theory.

**LAW 709 Biblical Law**

Spring. 3 credits. C. M. Carmichael.  
Analysis of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the nature of the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives (e.g., law of adultery and women's rights), law and morality (e.g., Ten Commandments), law and religion (e.g., institutions guaranteed by the law but condemned by religious authority), the transformation of extralegal relations into legal ones (e.g., with the introduction of money), legal interpretation in antiquity (e.g., Sermon on the Mount), social factors in legal development (e.g., shame and guilt), and aspects of criminal, family, and private law (e.g., eye for an eye, incest rules, and unjust enrichment).

**LAW 710 Civil Rights in Housing: Theory and Practice**

Fall. 3 credits. M. B. Grant.

Students will explore federal fair housing laws, history, and policies, while learning practical litigation skills. The seminar includes reading materials, class discussion, legal writing, and litigation exercises. The seminar materials include cases and statutes, as well as literature about policies underlying fair housing rights in the United States. The policy literature will be selected from a broad political spectrum and will be designed to provoke thought and encourage classroom debate. The legal writing assignments and the litigation exercises simulate work assignments common in a civil litigation practice. Students will draft two briefs on different issues at various procedural postures (injunction, summary judgment, and appeal). Additionally, students will complete seven short litigation exercises, including developing a proof schema and discovery plan, designing a fair housing test, drafting an affidavit and correspondence in support of a motion, writing jury instructions and a special verdict, and planning a trial notebook.

**LAW 711 The Common Law and African Legal Systems**

Spring. 3 credits. M. Ndulo.

This seminar will study legal systems in post colonial Africa. It will concentrate on the former British colonies. During the colonial period, the common law was imported into British Africa. As a result, these countries are now common law jurisdictions. The description is supported by the history of the countries as well as by current statutory guidelines. African countries, however, also retained African customary law as part of the legal system. The two systems of law operated alongside one another and interacted at various points. During the colonial period, the common law was considered superior to African customary law and became the dominant system of law. In today's Africa, the two systems continue to operate side by side in very much the same way they did in colonial times. Conflicts between them have generated considerable interest among legal scholars. This seminar will consider the following issues: the introduction of the common law in Africa; nature of the customary judicial process; the nature of the plural system; areas of conflict between customary law and the common law in such areas as succession, land tenure, marriage laws, and gender. It will also examine issues relating to constitutional law and governance. Contemporary Africa is engaged in efforts aimed at building democratic political systems that are responsive to the needs of African communities. In this regard, we will examine such issues as constitutional arrangements in post-independence Africa, and conditionality, good governance, and development aid.

**LAW 713 Constitutional Law and Political Theory**

Spring. 3 credits. S. H. Shiffrin.

The purpose of the seminar is to explore theories of freedom of speech and theories of equality. How are the ideas of freedom, equality, association, and community linked in doctrine, and how should they be linked? Neoconservative, liberal, radical, feminist, and Marxist writings are considered.

**LAW 715 Corporate and White Collar Crime**

Fall. 3 credits. P. Puri.

This seminar focuses on contemporary issues in the prosecution of white collar crime, with special attention to crimes committed within corporations and other large organizations. The initial focus will be on the substantive law and the primary federal statutes: mail and wire fraud, the Hobbs Acts, the federal securities laws, RICO, money laundering statutes, the False Statements Act, and the Foreign Corrupt Practices Act. A second focus will be on corporate criminal responsibility, including the rationale therefor and the problems of optimal corporate sanctions. Some attention will be given to the current proposals before the United States Sentencing Commission. A final focus will be on representing defendants, both corporate and individual, in a white collar prosecution.

**LAW 716 Corruption Control**

Spring. 3 credits. R. C. Goldstock.

This seminar examines the factors that facilitate and inhibit public or private corruption and analyzes the wide variety of criminal, civil, and nontraditional approaches designed to control corruption and to promote governmental and commercial integrity.

**[LAW Emerging Problems of Health Law**

Spring. 3 credits. Not offered 2000-2001.

The delivery of health care presents problems on the frontiers of both law and medicine. These include whether legislatures should authorize physicians to assist the death of dying patients, prohibit the cloning of humans beings, or modify the regulations concerning the administration of pain medication. In addition, new knowledge about reducing risks has emerged in policy discussions about how to improve the "quality" of health care during an era of managed care. There are now new questions about whether law inhibits the health care system's ability to make the system "safe" for patients. Students will study selected problems on the frontiers of law and medicine and prepare a seminar paper on a topic related to one of the emerging issues in health law or bioethics.]

**[LAW Empirical Studies of the Legal System**

Fall. 3 credits. Not offered 2000-2001.

This seminar guides students in their own empirical studies of the legal process. Students derive research topics from a variety of empirical sources and design and run their own computer programs. Sample topics may include evaluating patterns of punitive damages awards, studying jurors' perceptions in death penalty cases, evaluating the success rates and burden of Title VII cases, and studying products liability cases.]

**[LAW Employment Discrimination**

Spring. 3 credits. Not offered 2000-2001.

This seminar explores contemporary problems in equal-employment law. It focuses on legal issues involving Title VII, comparable worth, wrongful discharge, disability discrimination, age discrimination, and equal pay. Students are required to submit a paper as partial fulfillment of the requirements of the course.]

**LAW 718 Environmental Litigation**

Fall. 3 credits. D. Bordewieck.

This seminar examines claims, defenses, and issues frequently asserted and arising in environmental litigation—in particular, private litigation under the federal Comprehensive

Environmental Response, Compensation, and Liability Act ("CERCLA"), the federal Resource Conservation and Recovery Act ("RCRA"), and the California Environmental Quality Act ("CEQA"). Issues arising in litigation under several other federal statutes will briefly be considered. Previous study of environmental law is helpful but not required. Each student will be expected to present three seminar papers.

**[LAW Ethnic Conflict and International Law**

3 credits. Recommended prerequisite:

International Human Rights or Public

International Law. Not offered 2000-2001.

This seminar examines the status and rights of ethnic, racial, religious, and national groups under international law, and considers the role of international law in developing an adequate response to intercommunal conflicts in Europe, Asia, and Africa. Topics include the sources of nationalism and ethnic conflict, pertinent individual and group rights, principles of humanitarian law and humanitarian intervention, the relationship between group identity and democracy, the role of international organizations in responding to ethnic conflict, and possible solutions to ethnic conflict, including secession, autonomy, and federalism.]

**LAW 720 European Union Law**

Spring. 3 credits. J. J. Barceló III.

The course studies the EU and EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states, the development of the four freedoms (goods, services, persons, and capital) fundamental rights doctrine, protection of the environment, and the EU antitrust law.

**[LAW Family Law Seminar**

3 credits. Not offered 2000-2001.

This course is designed to familiarize the student with the practical problems facing the practitioner in family law cases. Students participate in negotiating separation agreements, presenting oral arguments of motions, preparing a memorandum of law, and developing interviewing skills and client relationships. The philosophy of the family law practitioner and methods of dealing with clients involved in divorce, custody, and the like are covered. The emphasis is on method rather than substantive law.]

**[LAW Federal Litigation Seminar**

3 credits. Not offered 2000-2001.

This seminar is designed for students genuinely interested in being litigators. It explores the "real world" of civil litigation in federal court, from commencement of a lawsuit through termination by some means other than trial. Particular attention is given to local rules; complaints; answers; document requests; removal issues; venue motions; preliminary injunction motions; summary judgment motions; nonparty discovery; sanctions; FRCP 26 disclosures and requirements; attorney-client privilege issues; and case-management procedures and orders. Throughout the course, the seminar endeavors to determine how one rationally litigates before frequently disinterested judges pursuing their own agendas and against counsel evidencing little regard for the rules or the law. This seminar entails a very substantial quantity of written work.]

**[LAW Health Care Reform]**

3 credits. Not offered 2000–2001.

This seminar addresses the role of law in structuring efforts to resolve problems of access, quality, and costs in health care. The focus is on the U.S. health care system but approaches of some other nations to comparable problems are briefly explored. Materials will include a health law casebook and selected readings from medical and health policy sources. During the later sessions of the semester students present their seminar papers to the class.]

**LAW 731 Immigration and Refugee Law**

Fall. 3 credits. Prerequisite: Constitutional Law. S. W. Yale-Loehr.

This seminar explores the evolving relationship between U.S. immigration policy and our national purposes. Immigration plays a central role in contemporary American life, significantly affecting our foreign relations, human rights posture, ethnic group relations, labor market conditions, welfare programs, public services, and domestic politics. It also raises in acute form some of the most basic problems that our legal system must address, including the rights of insular minorities, the concepts of nationhood and sovereignty, fair treatment of competing claimants for scarce resources, the imperatives of mass administrative justice, and pervasive discrimination. In approaching these questions, the course draws on diverse historical, judicial, administrative, and policy materials.

**LAW 733 International Criminal Law**

Spring. 3 credits. D. Wippman.

This seminar will examine the evolution of modern international criminal law, from Nuremberg to the new International Criminal Court. Topics will include the nature and sources of international criminal law, jurisdiction, individual and state responsibility, penalties and deterrence, and alternatives to criminal trials, such as truth commissions and amnesties. The seminar will emphasize recent developments, such as the Pinochet extradition proceedings and efforts to try senior Khmer Rouge leaders.

**LAW 734 Introduction to French Law**

Spring. 3 credits. Prerequisite: Not available to students with significant knowledge of civil law system.

C. M. Germain.

Introduction to the French legal system from a comparative law perspective, with a focus on civil law methodology and French legal institutions. Topics studied include French law sources and authorities, such as legislation, court decisions, and scholarly writings; the relationship between French law and the European Union; the French court structure in civil, criminal, and administrative law matters and its major procedural features; and the organization of the legal profession.

**LAW 735 Introduction to Islamic Law**

Spring. 3 credits.

This course is designed to introduce students to the terminology, principles, and concepts of Islamic law. In part one, devoted to the classical period, we will examine the historical formation of Islamic law, jurisprudence, judicial procedure, penal law, personal status, and property law. In part two, devoted to the modern period, we will examine the modern transformation of Islamic law through a series of case studies focusing on Egypt, Saudi Arabia, The United Arab Emirates, Morocco, and Iran. Seminar discussions will be based

on primary sources (court cases, judicial opinions, statutes, etc.) in English translation.

**[LAW Issues in Tort Law]**

Spring. 2 credits. Not offered 2000–2001.

The course explores some of the major theoretical and practical questions surrounding the tort system. The central inquiry focuses on the purported goals of tort law, their compatibility with each other, and the degree to which they are realized in practice. The course also examines a variety of substantive areas and considers various proposals to restructure tort law.]

**LAW 736 Juvenile Advocacy**

Spring. 4 credits. C. Grumbach.

In this simulation-based lawyering course, students learn about litigation involving juveniles charged with either criminal acts or status offenses. Using accusatory instruments from juvenile delinquency and Persons in Need of Supervision proceedings as a framework for discussion, students examine the substantive juvenile and criminal laws that underlie such proceedings, explore the sometimes controversial roles that lawyers play when representing juveniles, and practice defending juveniles in such cases. Either through simulated cases or cases from the Tompkins County law guardian office, Citizens Concerned for Children, students will have an opportunity to examine and potentially work on different aspects of a case. Possible areas include: interviewing the client, attempting to negotiate a settlement, developing a trial strategy and theory of the case, preparing discovery requests and pre-trial memoranda, and developing a dispositional plan. Students may also have a chance to research and write a portion of an appellate brief for the New York City Legal Aid Society, Juvenile Rights Division.

**[LAW Labor Law Theory and Policy Seminar (also ILR 608)]**

3 credits. Prerequisite: Labor Law. Not offered 2000–2001.

The U.S. collective bargaining system, which had its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time, the decline in the labor movement has undermined its political support. This seminar will look at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Some of the topics to be discussed are: the theory of regulation embodied in the National Labor Relations Act and its critique; alternative conceptions of labor markets and their policy ramifications; and the emerging global economy and its ramifications for domestic labor regulation. There will also be discussion of alternative systems of labor regulation, such as found in West Germany, Sweden, and Japan.]

**LAW 739 Law and American Literature**

Spring. 3 credits. A. Davis.

This course emphasizes mainly American literature to probe key legal themes such as slavery and the questions of nationhood, the distinction between public and private spheres of action, punishment and discipline, and the social significance and meaning of crime. In all of the texts, the course explores competing vision of "justice," with special attention to race, class, and gender. Literary analysis includes contrasting modes of interpretation,

assessing the similarities and differences between literary and legal texts, and considering the role and effects of narration.

**LAW 740 Law and Economics**

Spring. 3 hours. Prerequisite: No prior acquaintance with economics is assumed. S. J. Schwab.

The seminar provides an introduction to the main concepts of "law and economics" and an opportunity to apply those concepts to a particular legal issue in an individual research project. Topics to be covered include alternative notions of efficiency, rational choice and public choice theory, the Coase theorem, transaction and administrative costs, the impact of public and private regulation on individual behavioral choice, and the application of these concepts to various aspects of the legal system, including: the choices between statutory and common law, rules and standards, property and liability rules, and strict liability and negligence; the determination of damages for breach of contract; and the rules of legal procedure. Some attention will also be paid to the moral, ethical, and philosophical criticisms often made of the economic approach to law.

**LAW 741 Law and Higher Education**

Spring. 3 credits. Prerequisite: Constitutional Law or Administrative Law. J. J. Mingle.

Higher education is a complex, idiosyncratic institution. Universities and colleges have a unique mission—teaching, research, and public service—and a uniquely challenging task of accommodating the various constituencies and organizations both internal (governing boards, faculty, students) and external (alumni, legislatures, courts, government agencies), that influence how they are managed and how policies are shaped. This seminar will explore the dynamic tensions, high expectations, and complex legal policy issues universities face in fulfilling their mission.

**LAW 743 Law and Mental Health Seminar**

Fall. 3 credits. H. R. Beresford.

The seminar explores issues at the interface of law and psychiatry. After an introduction to clinical and scientific aspects of mental illness, the seminar will address issues of autonomy, liberty, competency, coercion, and criminal responsibility as they relate to persons with disorders of behavior, cognition, or mood. Students write and present seminar papers on self-selected topics.

**LAW 744 Law, Science, and Technology**

Fall. 3 credits. Y. M. Cripps.

An examination of the interaction between legal principles and procedures and scientific research and development. Topics include the role of the law in regulating cloning, recombinant DNA research, surrogacy, and in vitro fertilization; plant breeders' rights and the patentability of organic matter; judicial assessment of expert scientific evidence; and compensation for damage caused by scientific experiments and new technologies.

**LAW 745 Law through Literature**

Fall. 3 credits. N. L. Cook.

In this seminar, students use literature, supplemented by law texts, as a basis for understanding operations of law and the impact of legal process on people's lives. An explicit goal of the course is the acquisition of literary skills that can be cross-utilized in law

practice. Students thus not only analyze legal principles in the context of stories, but also learn how to apply such literary concepts as metaphor, imagery, plot and character development, perspective, and point of view in their legal work.

**LAW 746 Lawyering Skills: Practical Ethical Challenges in Firm Litigation**

Fall. 3 credits. D. French.  
This course is dedicated to a "real world" look at typical ethical challenges faced by associates and partners in the law firm litigation context. Rather than focusing on abstract discussions of sometimes vague ethical guidelines, the course will focus on common, concrete problems. From inadequately researched complaints, to partners who blatantly abuse the discovery rules, to the suspected lying client, the course problems will reflect a full range of realistic challenges that students will face in practice. Students will be asked to discuss and debate these problems and make affirmative, realistic decisions—decisions that reflect the political and social realities of law firm life.

**LAW 756 Legal Aspects of Commercial Real Estate Development**

Spring. 3 credits. J. E. Blyth.  
Through the use of several written memoranda and one oral presentation, this seminar addresses considerations basic to commercial real estate development. It focuses on purchase agreements, options, rights of refusal, memoranda thereof, representations, and warranties; disclosure required of brokers and sellers, attorneys as brokers, notarial misconduct; conveyancing and surveys; commercial leases; conventional financing; conflicts between commercial tenants and institutional lenders; alternatives to conventional financing; title insurance; attorney opinion letters; and choice of real estate entity. About one-half of the course is devoted to commercial leases; conventional financing, and alternative to conventional financing (such as tax exempt financing and synthetic leases).

**LAW 760 Organized-Crime Control**

Fall. 3 credits. Prerequisite: Criminal Procedure. R. C. Goldstock.  
This seminar discusses selected aspects of criminal procedure and civil remedies that are used to control sophisticated illegal syndicated activity. Constitutional, statutory, and practical concerns in the use of electronic surveillance and RICO are a particular focus.

**LAW 766 Origins of English and American Law**

Spring. 3 credits. E. Sherwin.  
This course provides an overview of Anglo-American legal history, including Roman law origins, early English law, early American law, and modern social and intellectual legal debates. Approximately one half the course will be spent on foundational reading; the second half will consist of presentation of student papers.

**LAW 770 Reproductive Issues Seminar**

Fall. 3 credits. M. A. Fineman.  
This seminar will consider various reproductive dilemmas, paradoxes, and policies in modern American society. Birth control and abortion will be addressed, but the emphasis will be on placing the reproductive process within a broad sociolegal context. To this end, we explore issues such as eugenics, the use and regulation of medical technology, lesbian

mothering, the relationship between reproduction and poverty programs, and a variety of other contemporary issues.

**LAW 772 Selected Business Transactions Seminar**

Fall. 3 credits. Recommended prerequisites: Corporations. Z. J. Shulman.  
An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings, the course will cover: the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the transaction closing. Regarding mergers and acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues i.e., antitakeover matters and fiduciary concerns, fiduciary duties, and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees, and noncompetition agreements.

**LAW 773 Selected Topics of Tax Policy**

Spring. 3 credits. Prerequisite: Federal Income Taxation. R. Green.  
This seminar will focus on one or more topics of current importance in tax policy. Examples might include the taxation of electronic commerce, the taxation of new financial products, the problem of corporate tax shelters, or international tax competition.

**LAW 774 Separation of Powers**

Spring. 3 credits. Prerequisite: Constitutional Law and Administrative Law strongly advised. Students without such background should consult instructor. C. R. Farina.  
The last 20 years have witnessed more debate about the nature and consequences of "separation of powers" than we have seen since the Founding Era. This seminar examines the ways this concept is understood and used by modern judges, legislators, executive officials, and scholars to justify, or to attempt to modify, the distribution of power within contemporary American government.

**LAW 775 Social Security Law**

Spring. 3 credits. P. W. Martin.  
The course focuses especially on how Social Security's benefit rules relate to employment, families, and household composition and how its procedures address the challenge of adjudicating the massive numbers of benefit claims that arise each year. It introduces the general features of the Social Security Act's entitlement, benefit formulae, and procedural rules; highlights those that pose the greatest difficulty to administrators and advocates; and surveys current proposals for change.

**[LAW The Supreme Court and the Death Penalty**

3 credits. Not offered 2000–2001.  
This seminar examines the role of the Supreme Court in modern capital punishment jurisprudence focusing on how, and to what extent, the Court's view of death penalty cases has changed in the last 30 years. Students will

have the option of writing a paper or assisting in the research for and drafting of a petition for writ of certiorari or brief filed in the Supreme Court.]

**[LAW Theories of Property**

3 credits. Prerequisite: Property. Not offered 2000–2001.  
This seminar explores the various ways that people have conceived of, or understood, property. The materials studied are eclectic and interdisciplinary. They include readings on slavery and property, women and property, community interests in property, as well as classical theories (libertarian, utilitarian, Marxian.)

**LAW 776 Topics in Criminal Law**

Spring. 3 credits. Prerequisite: Criminal Law. S. P. Garvey.  
This seminar examines a range of topics in the substantive criminal law, including recent accounts of why and when punishment is justified; the extent to which political commitments and principles impose limits on the state's authority to punish wrongdoers; the meaning and legitimacy of "abuse" excuses; recent proposals to reform the law of rape; the role of character, virtue, and multiculturalism in the criminal law; and the relationship between emotion and reason in the assessment of criminal liability.

**LAW 777 Topics in the Anthropology of Law**

Spring. 3 credits. A. Riles.  
What makes law distinctive as a set of knowledge practices? What does an understanding of late modern law contribute to current debates in anthropology and critical theory? In order to answer these questions, this seminar considers some cases of legal thought and practice, drawn from diverse legal settings, in tandem with current work in critical theory and the anthropology of knowledge. After a brief discussion of the most significant debates in twentieth-century legal anthropology, the seminar will focus in particular on the "aesthetics" of legal knowledge, that is, on lawyers' understanding of, and commitment to form, and its relationship to other kinds of twentieth-century formalisms from mathematics to architecture to anthropology. Seminar participants will write one 20-page paper. Weekly participation in the discussion will count for a substantial portion of the final grade.

**LAW 778 Transition to Democracy**

Fall. 3 credits. I. Stotzky.  
The closing decades of the twentieth century can rightly be characterized as the era of democracy. During the 1970s, several southern European nations abandoned longstanding dictatorships and adopted democratic regimes. During the early 1980s, most Latin American nations repudiated their aged military dictatorships and instituted democracies. In the 1990s another wave of democratization swept Eastern Europe and the Soviet Union, destroying the "Communist Empire." In nations undergoing this transition, economic, political and social stability has not yet been fully achieved. The corporatist political and social structures have not yet been transformed to allow the vast, underprivileged majority access to the basic necessities that ensure a dignified life. Institutional structures of public life, such as a representative legislative branch, a competent judiciary, and an executive branch that adheres to its constitutionally imposed

boundaries must be developed and stabilized. The rule of law—and thus the fundamental guarantees of due process—have to become an accepted, basic requirement of public life and private social interaction. In this seminar, we will examine the very complicated issues involved in the transition process. For example, we will look at the relationship between constitutionalism, democracy, human rights, and law. We will also discuss the role in the democratization process of cultural norms, human rights trials, economic development, and the international community. A paper is required.

#### **[LAW United Nations, Elections, and Human Rights]**

Fall. 3 credits. Not offered 2000–2001.

The seminar provides a wide range examination of the current status of the international protection of human rights with special emphasis on civil and political rights relating to elections and governance. Taking part in the conduct of public affairs is a basic human right increasingly prized by people throughout the world. Universally, the right to take part in government is proclaimed and guaranteed by the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights and is recognized in many other international treaties and declarations. At times free and fair elections necessitate international assistance to countries to aid them in fulfilling international human rights standards, and cooperation in establishing and strengthening the legal, technical, and physical infrastructure necessary to carry out elections. The seminar will further examine: self determination, truth commissions, and the role of non-governmental organizations with regard to standard setting and monitoring of human rights.]

## CLINICAL COURSES AND EXTERNSHIPS

All clinic courses have limited enrollment.

#### **LAW 781 Capital Punishment Clinic: Post-Conviction Litigation**

Spring. 4 credits. Prerequisite: permission of instructor. J. Blume, S. L. Johnson.

This course is taught as a clinic. Two or three cases from the South Carolina Center for Capital Litigation will be worked on by students. These cases may be state postconviction or federal habeas corpus cases, depending on the vagaries of litigation and the needs of the South Carolina Center for Capital Litigation. Students will read the record, may assist in drafting the initial pleading (an application for postconviction relief or a federal habeas petition), and/or may then assist in the preparation of briefs. Students are included in discussion regarding the necessary investigation and the thought process about the case, and in some instances will be involved in investigation.

#### **LAW 782 Capital Trial Clinic**

Spring. 4 credits. Prerequisite: permission of instructor. J. Blume, S. Johnson.

This course addresses the issues that are unique to a capital trial, with a focus on a specific capital trial and the issues it presents. Students will be involved in the preparation of the defense for one or two capital trials. They will also learn about the Colorado voir dire method and the use of focus groups. Both investigation and writing will be required.

#### **LAW 784 Government Benefits Clinic**

Spring. 6 credits. Course has two classroom components: Government Benefits Clinic class and Clinical Skills 1 or Clinical Skills 3 (formerly Legal Aid 1 and 3 class). B. Strom.

The course has a substantive component, in which a broad conceptual understanding of a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which those concepts can be applied in solving actual client problems. The substantive component provides an introduction to government benefits law by examining various social insurance and need-based benefit programs including Social Security, Unemployment Insurance, Temporary Assistance to Needy Families (TANF), Supplemental Security Income (SSI), Medicaid, and Food Stamps. Case handling involves the representation of clients in government benefits cases involving the Tompkins County Department of Social Services, the N.Y.S. Department of Labor and the Social Security Administration. The course also includes Clinical Skills 1 or Clinical Skills 3. Clinical Skills 1 class will address interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 3 builds on the skills taught in Clinical Skills 1 and addresses such topics as alternative dispute resolution, formal discovery, and motion argument.

#### **LAW 785 Government Benefits Clinic/ Neighborhood Legal Services Externship**

Spring. 6 credits. B. Strom.

This course is a combination of Government Benefits and the Neighborhood Legal Services Externship and either Clinical Skills 1 or Clinical Skills 3 (formerly Legal Aid 1 or 3). The course is the same as Government Benefits except that the case handling component involves handling cases for the Ithaca office of Neighborhood Legal Services. See the descriptions for the Government Benefits Clinic and the Neighborhood Legal Services Externship for additional details.

#### **LAW 786 Judicial Externship**

Fall or spring. 4 credits. G. G. Galbreath.

Students work with a trial court judge. Work involves courtroom observation, conferences with the judge, research and writing memoranda, and drafting decisions. The emphasis is on learning about judges, the judicial decision-making process, and trials. There are weekly class meetings with readings and discussions of topics related to the externship experience. While the primary focus is the student's work at the placement, each student will also do class presentations, a final project, and will meet individually with the faculty member.

#### **LAW 790 Law Guardian Externship**

Fall or spring. 4 credits. J. M. Miner.

Students will learn about the representation of children in abuse and neglect cases, juvenile delinquency proceedings, and PINS (Person in Need of Supervision) cases through their placement at the Tompkins County Law Guardian office. Duties may include interviewing, investigation, drafting memoranda and motions, and assisting in trial preparation. The classroom component is provided by Clinical Skills 1, 2 (fall), or 3 (spring), depending on whether the student has previously been enrolled in a course in which Clinical Skills 1 (formerly Legal Aid 1) was a component. Clinical Skills 1 class will address interviewing,

counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 2 builds on the skills taught in Clinical Skills 1 and addresses such topics as fact investigation and analysis, informal discovery, and drafting of pleadings. Clinical Skills 3 builds on the skills taught in Clinical Skills 1 and 2 and addresses such topics as alternative dispute resolution, formal discovery, and motion argument.

#### **LAW 791 Legislative Externship**

Fall or spring. 3 credits. B. Strom.

The students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about legislative process, drafting of legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal meetings with the faculty supervisor during the semester with readings and group discussions related to the externship experience.

#### **LAW 792 Neighborhood Legal Services Externship**

Fall or spring. 4 credits. B. Strom.

Classroom component is provided by Clinical Skills 1, 2 (fall), or 3 (spring), depending on whether the student has previously been enrolled in a course in which Clinical Skills 1 (formerly Legal Aid 1) was a component. Cases involve the representation of clients of a legal services office, the Ithaca office of Neighborhood Legal Services (NLS). Along with case handling, this externship includes a classroom component, provided by Clinical Skills 1, 2, or 3. The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. In addition, each student will meet periodically with the faculty supervisor for review of the placement experience.

#### **LAW 793 Public Interest Clinic 1**

Fall or spring. 4 credits. NOTE: During the second or third week there may be an additional class session. Classes are mandatory. N. Cook, G. Galbreath, J. Miner, B. Strom.

Students handle civil cases for low-income clients of the Public Interest Clinic under the supervision of the clinic faculty. Students interview and counsel; investigate and analyze facts; interrelate substantive and procedural law with facts in the context of actual representation; develop a strategy to handle clients' problems; identify and resolve professional responsibility issues; do legal writing; negotiate and settle cases; and represent clients at administrative hearings. Classroom component is provided by the Clinical Skills 1 class, in which students will develop interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises.

#### **LAW 794 Public Interest Clinic 2**

Fall. 4 credits. Prerequisite: Public Interest Clinic 1 or a clinic course that included the Clinical Skills 1 (formerly Legal Aid 1) classroom component. N. Cook, J. Miner, G. Galbreath, B. Strom.

Students handle Public Interest Clinic cases, participate in a classroom component, Clinical

Skills 2, and help supervise participants in Public Interest Clinic 1. Cases are handled as described in the course description for Public Interest Clinic 1. The classroom component, Clinical Skills 2, builds on the skills taught in Clinical Skills 1 and addresses such topics as fact investigation and analysis, informal discovery and drafting of pleadings. Students represent the clinic's clients in both federal and state courts.

#### **LAW 795 Public Interest Clinic 3**

Spring. 4 credits. Prerequisite: Public Interest Clinic 1 or a clinic course that included the Clinical Skills 1 (formerly Legal Aid 1) classroom component. N. Cook, G. Galbreath, J. M. Miner, B. Strom.

Students handle Public Interest Clinic cases, participate in a classroom component, Clinical Skills 3, and help supervise participants in Public Interest Clinic 1. Cases are handled as described in the course description for Public Interest Clinic 1. The classroom component, Clinical Skills 3, builds on the skills taught in Clinical Skills 1 and 2, and addresses such topics as alternative dispute resolution, formal discovery and motion argument. Students represent the clinic's clients in both federal and state courts.

#### **[LAW Public International Law Clinic**

3 credits. Prerequisites: Public International Law or International Human Rights. Not offered 2000-2001.

Students will prepare legal memoranda and policy proposals for foreign governments and international organizations. The memoranda will be prepared in coordination with the Public International Law and Policy Group, a nonprofit organization that provides *pro bono* advice on issues of public international law to governments, NGOs, and international organizations. Possible subject areas include minority rights, border treaties, citizenship and nationality disputes, state succession issues, and war crimes.]

#### **[LAW Religious Liberties Clinic**

4 credits. Year-long offering. Not offered 2000-2001.

Students work in teams on cases provided by organizations that handle Establishment and Free Exercise Clause cases. All students do substantial research and memorandum writing, and some may draft portions of briefs. To help ensure that students have the opportunity to take a case to completion (or at least to the next stage of litigation), this is a full-year course, with students required to register for both semesters for a total of four credit hours and a grade at the end. Given the nature of litigation, demands on student time may be sporadic, and students should be prepared to do some work over intercession if court deadlines so require.]

#### **LAW 796 Small Business Clinic**

Fall or spring. 5 credits. W. Kell.

Students will learn and apply a broad range of knowledge in business-related law, through participating in interdisciplinary teams of students assisting small business entrepreneurs with legal and business needs, particularly child care programs, nonprofit programs, and teen start-up businesses. Faculty from the Law School, the Johnson School of Management, and College of Human Ecology will supervise teams of students from each of the above colleges and provide classroom teaching. Under such supervision, student teams will work autonomously to consult with and

provide technical assistance to the small business entrepreneur. There will be weekly classroom sessions focused on substantive areas of knowledge, the development of client relationships, and ethical issues. Skills in building effective working relationships with clients will also be developed through simulation and actual client representation. Readings are drawn from areas of contract, tort, property, employment, and administrative law, as well as areas of business planning, entrepreneurship, and consumer issues. Bi-weekly team meetings are also required for supervision.

#### **LAW 797 Women and the Law Clinic**

Fall. 6 credits. Course has two classroom components: Women and the Law Clinic class and Clinical Skills 1 or Clinical Skills 2 (formerly Legal Aid 1 and 2) class. J. M. Miner.

Students will represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). The Women and the Law Clinic class will focus on such issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law. Students will also participate in the lawyering skills classroom component, Clinical Skills 1 or Clinical Skills 2 (formerly Legal Aid 1 or 2). Clinical Skills 1 will address interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 2 builds on the skills taught in Clinical Skills 1 and addresses such topics as fact investigation and analysis, informal discovery, and drafting of pleadings.

#### **LAW 798 Youth Law Clinic**

Fall or spring. 6 credits. Course has two classroom components: Youth Law Clinic class and Clinical Skills 1, 2 (fall), or 3 (spring) (formerly Legal Aid 1, 2, and 3) class. N. Cook.

Students will work with groups of youth and service providers in a multifaceted approach to identifying and resolving problems of a legal nature. Under the supervision of faculty and community experts, clinic students will both handle individual representation cases and participate in nonlitigation project work such as community education, legislative advocacy, and mediation training. The emphasis of the course is on planning, communication, policy development and nonadversarial problem solving. Students will also participate in the lawyering skills classroom component, Clinical Skills 1, 2, or 3 (formerly Legal Aid 1, 2, and 3). Clinical Skills 1 class will address interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises. Clinical Skills 2 builds on the skills taught in Clinical Skills 1 and addresses such topics as fact investigation and analysis, informal discovery and drafting of pleadings. Clinical Skills 3 builds on the skills taught in Clinical Skills 1 and 2, and addresses such topics as alternative dispute resolution, formal discovery, and motion argument.

## NONPROFESSIONAL COURSE

### **GOVERNMENT 313 The Nature, Functions, and Limits of Law**

Spring. 4 credits. Undergraduates only. J. A. Siliciano.

A general-education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of techniques for resolving conflicts and dealing with social problems. The course analyzes the roles of courts, legislatures, and administrative agencies in the legal process, considering also constitutional limits on their power and practical limits on their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process.

## JOHNSON GRADUATE SCHOOL OF MANAGEMENT

### ADMINISTRATION

Robert J. Swieringa, dean

John A. Elliott, associate dean for academic affairs

Michael J. Hostetler, associate dean for executive education

Cathy S. Dove, associate dean for MBA Program and operations

Richard A. Shafer, associate dean for corporate relations

Steven J. Sharratt, executive director of development

Natalie M. Grinblatt, director of admissions

John D. Nozell, director of career services

Harriet Peters, director of advising and student activities

Debra Gulini, assistant to the dean

Ann W. Richards, financial aid director and associate director of admissions

Janet S. Gray, registrar and associate director for MBA Program

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers course work in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or its equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background of undergraduate studies in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the school during their senior year, thereby earning a master's degree in less than the usual time.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Room 111 Sage Hall.

Students in other graduate programs and undergraduate students registered with the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space available basis.

### UNDERGRADUATE ONLY

#### NBA 300 Entrepreneurship and Enterprise

Fall, spring. 3 credits. D. BenDaniel.

The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures. For non-Johnson School students only. Johnson School students see NBA 564.

#### NBA 401 Entrepreneurship for Scientists and Engineers

Fall, spring. 3 credits. J. Nesheim.

This course is intended to introduce students to the new business startup process. Small teams will be formed to come up with an idea for a startup and create a business plan that can attract venture capital or other funding for the new enterprise. Guest lecturers are from successful high-technology companies. The course is led by instructors from Silicon Valley and Ithaca who created high-technology businesses.

### COURSES FOR NON-JOHNSON SCHOOL STUDENTS

#### NCC 550 Financial Accounting

Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.

An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure. This course is similar in content to the MBA core course: NCC 500.

#### NCC 553 Marketing Management

Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.

The course addresses controllable and uncontrollable marketing variables that managers in multi-product firms face in today's business environment. Topics include customer behavior, product planning, distribution, advertising and promotion, pricing, and competitive strategy. This course is similar in content to the MBA core course NCC 503.

#### NCC 554 Management and Organizations

Fall. 3 credits. Course intended for non-Johnson School students only. Staff.

This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities, (2) the role of human resources and organizational behavior in formulating and implementing strategy, and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities, what the best practices are for managing people, what effects best practices have on attitudes and behaviors, why putting the customer first is not necessarily best practice from a resource-based perspective, why organizational culture is central to organizational effectiveness, why the formal organizational chart and structure of an organization are important, how organizations innovate, how organizations change through re-architecture and re-engineering, what firms gain and lose through pursuing core competencies, and what firms gain through strategic alliances and networks. The course makes extensive use of case materials. This course is similar in content to the MBA core course: NCC 504.

#### NCC 556 Managerial Finance

Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.

An introduction to business finance through theory and case studies. Topics include stock and bond valuation, the capital-budgeting decision, portfolio theory, the asset-pricing models, raising capital, capital structure, mergers and acquisitions, costs of capital, option pricing, and risk management. International applications are considered within each topic area. Letter grade only, based on exam, group case reports, homework and class participation. This course is similar in content to the MBA core course: NCC 506.

#### NCC 558 Production and Operations Management

Spring. 3 credits. Course intended for non-Johnson School students only. Prerequisites: NCC 501 or permission of the instructor. Staff.

Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance in almost every organization. Production scheduling is a significant problem for manufacturing firms; smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments; and proper task sequencing is a major problem in the construction industry. The course deals with these problems and others from a managerial viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification. This course is similar in content to the MBA core course NCC 508.

**NBA 553 Accounting and Finance for Engineers**

Spring, 3 credits. Course intended for non-Johnson School students only. R. Hilton. This course focuses on basic financial and managerial accounting and the economic and financial concepts that have a bearing on managerial decisions. The goals of the course are: (1) to give students a working knowledge of the accounting process and the value and limitations of the data that comes out of the accounting information system, (2) to familiarize students with key concepts in managerial accounting and the application of cost information to pricing and operating decisions, (3) and to promote an understanding of the use of economic theory in the evaluation of capital investment projects. The teaching methods consist of lectures and cases. Students are evaluated on the basis of exams.

**IMMERSIONS**

Only at the Johnson School will you find learning immersion courses in manufacturing, managerial finance, investment banking, brand management, and e-business. Immersions offer a semester of continuous focus, real-world problem solving, and site visits to dozens of companies.

**MFI—Managerial Finance Immersion**

This is a unique immersion course specifically designed for students planning to pursue finance careers. Some students interested in non-finance careers (including consulting) may wish to consider this course, but they should recognize that it is not specifically designed for this purpose. A major objective of this course is to help students make more informed choices about how to launch their finance careers.

**NBA 502 Managerial Cost Accounting**  
3.0 credits.**NBA 549 Managerial Finance—Practicum**  
2.5 credits.**NBA 506 Financial Statement Analysis**  
1.5 credits.**NBA 511 Financial Modeling**  
1.5 credits.**NCC 508 Managing Operations**  
2.5 credits.**NCC 509 Strategy**  
2.5 credits.**NBA 656 Valuation Principles**  
1.5 credits.**IBI—Investment Banking Immersion**

This course is specifically designed for those students planning to pursue careers in investment banking. The course is inappropriate for students interested in following a finance career in non-financial industry or non-finance careers (including consulting).

This course is designed to meld the practical and the theoretical aspects of the field. We will be expecting a great deal of interaction and discussion between students, the participating faculty, and visiting practitioners.

While the course is designed to make its students more attractive as candidates for employment in the investment banking profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students. Prerequisite: NCC 506.

**NBA 500 Intermediate Accounting**  
3.0 credits.**NBA 556 Investment Banking—Practicum**  
3.0 credits.**NBA 506 Financial Statement Analysis**  
1.5 credits.**NBA 511 Financial Modeling**  
1.5 credits.**NCC 508 Managing Operations**  
2.5 credits.**NCC 509 Strategy**  
2.5 credits.**NBA 656 Valuation Principles**  
1.5 credits.**SBM—Semester in Brand Management**

This is a full-time program for the semester; students will not be able to take other courses concurrently. The course objective is to begin developing students to think and act like brand managers, some of the best trained and most upwardly mobile professionals in industry. It will provide students with a unique opportunity to begin internalizing the concepts, principles, and tools necessary to achieve success in brand management. While the course will focus on managing traditional consumer brands, high tech products, services, and global branding will also be addressed. In-class methods will consist of: (1) academic and industry lectures; (2) on-site visits with marketing and manufacturing professionals; (3) case and project discussions and presentations; and (4) a brand management simulation. Course requirements will consist of: (1) discussion of readings; (2) individual case write-ups and presentations; (3) group projects and presentations (including a capstone simulation); and (4) in-class exams. There will be considerable off-campus travel for field study. Prerequisites: NCC 500, 501, 502, 503, and 506. Restricted enrollment—permission of the instructor required.

**NBA 624 Brand Management—Practicum**  
7.5 credits.**NBA 502 Managerial Cost Accounting**  
3.0 credits.**NCC 508 Managing Operations**  
2.5 credits.**NCC 509 Strategy**  
2.5 credits.**SIM—Semester in Manufacturing**

This is a full-time program for the semester; students will not be able to take other courses concurrently. The course is concerned with the integration of technological, human-resource, logistical, and financial considerations to produce a manufacturing enterprise

that can respond quickly and effectively to market requirements. It will be taught by a team of faculty and industrial practitioners, and much of the student work will be team-oriented. There will be off-campus travel for field study of a variety of manufacturing plants. Johnson School students should complete NCC 501 and NCC 506 before taking this course. Enrollment limited; permission of instructor required.

**NCC 508 Managing Operations**  
2.5 credits.**NCC 509 Strategy**  
2.5 credits.**NBA 650 Semester in Manufacturing Practicum**  
10 credits.**EBI—Electronic Business Intensive**

This intensive will take a comprehensive look at all emerging areas of this new way of doing business. The E-Business Intensive is designed to offer instruction in different, fundamental areas of e-business. For spring 2000, there will not be one leading professor who champions the experience, as there is in the immersions. However, the participating professors will support a one-credit, team-based project that will stand alone or extend work required in the component courses. This intensive may lead to a full-fledged immersion for the spring of 2001. Therefore, in the future, as with the other immersions, it will most likely be a curriculum solely for first-year students.

The total of 12 credits for first years will allow students to bid for an additional three-credit elective. As this intensive is a response to student and recruiter interest and has been created quickly, it is likely that it will evolve. This dynamic situation offers some obvious advantages and disadvantages. Students in the initial year of the intensive will be a part of shaping the future of this new course of study. They will introduce many people outside the Johnson School to the existence of the intensive in interviews and through other avenues of corporate interaction. They will also encounter the frustrations common to early adopters and innovators. Students choosing the intensive should be prepared to provide constructive feedback and positive energy.

**NCC 508 Managing Operations**  
2.5 credits.**NCC 509 Strategy**  
2.5 credits.**NBA 601 Electronic Commerce**  
3.0 credits.**NBA 613 E-Business Project**  
1.0 credit.**NBA 619 Workshop: Internet Startups**  
1.5 credits.**NBA 633 Internet Marketing**  
1.5 credits.

## NCC COMMON CORE COURSES

### NCC 500 Financial Accounting

Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. D'Souza, R. Libby.

An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure.

### NCC 501 Statistics for Management

Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. McClain, J. Thomas.

An introduction to decision making under conditions of uncertainty. Topics include descriptive statistics, probability theory, classical statistics, statistical decision theory, and simple and multiple regression analysis. Applications in finance, marketing, and operations management are discussed.

### NCC 502 Microeconomics for Management

Fall. 2.5 credits. Johnson School core course. Enrollment limited. M. Waldman.

Microeconomic theory is introduced and applied to problems faced by managers. Specific topics covered include supply and demand, consumer behavior, pricing when a firm has market power, and the role of contracts. The class employs a lecture format and emphasizes problem solving. Grading is based on a midterm and a final exam.

### NCC 503 Marketing Management

Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Stayman.

The course is designed to convey the key concepts of marketing and how they fit into the larger context of management strategy and decisions. Both the practical "how" and the fundamental "why" of marketing activities are presented in the light of contributions from behavioral science, economics, and statistics. The goals are to provide sufficient understanding for those who will need only to interact with the marketing function, as well as communication concepts and developing processes that can provide the foundation for further course work and future experience in marketing. The course makes extensive use of case materials.

### NCC 504 Management and Organizations

Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Sally.

If you think about it, stories are central to how we know and remember events, people, and facts, and to how we communicate knowledge and history. Most of the jobs you aspire to involve a particular form of story-telling—the CEO's vision, the analyst's report, the planner's strategy, the salesperson's pitch, the consultant's analysis, and the manager's brand. What distinguishes these as business stories is that they are often analytical (based on a set of objective facts and statistics) and reflect a deep understanding of the complex interactions of individuals and organizations. This course has two goals: (1) to make you appreciate the complexity of the issues that often arise in organizations, and (2) to develop and refine your analytical story-telling abilities. To achieve these goals, the course will be taught by the case-study method. Cases are an efficient way to expand your

experience base with respect to such issues as motivation, power, leadership, ethics, structure, design, and change. We hope to teach you how to make good inferences about what will and won't work in particular situations, and how to learn from your own experiences and those of others.

### NCC 506 Managerial Finance

Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Michael.

The course objective is to introduce students to the basic concepts of finance. In particular, we address the issue of what type of investments should firms and individuals take on, and how these investments should be financed. Understanding these concepts are essential to financial managers and professional investors, and have important applications to many aspects of financial decisions all of us have to make on a daily basis (e.g., is getting an MBA a good investment?). These issues involve capital budgeting decisions, stock and bond valuation, how to assess and account for risk through the capital asset pricing model (CAPM), option pricing, capital structure and cost of capital, and market efficiency. Letter grade only, based on examinations, quizzes, group case reports, homework, and class participation.

### NCC 508 Managing Operations

Spring. 2.5 credits. Johnson School core course. Enrollment limited. Prerequisite: NCC 501 or permission of instructor. M. Lojo, L. Robinson.

This course focuses on managing processes: actions that convert inputs into outputs. Almost any business function can be modeled as a network of processes. The first part of the course examines processes, both individually and as part of a larger system; we see that good process design reflects both the volume and the variety of the product. A common course theme is the deleterious effect of variability (in demand, supply, quality, or capacity) in complex systems. Queuing theory and simulation are particularly helpful for analyzing process capabilities. The second part of the course analyzes how goods and services are produced. After describing the strategic role of operations, we examine forecasting systems, inventory management and just-in-time, and logistic management. Constrained optimization models provide information about managing with finite resources. The final part of the course examines process improvement through quality and productivity management and corporate learning.

### NCC 509 Strategy

Spring. 2.5 credits. Johnson School core course. Enrollment limited. V. Kadiyali.

Among the critical tasks facing any senior manager are the creation, implementation, and evaluation of a business unit's strategy. This course seeks to provide the management student with the tools and frameworks essential to carrying out these tasks. Many of these tools and frameworks will be based on recent advances in game theory, industrial organization, and organization theory, although the course will also draw from the older business policy tradition as well. Students who successfully complete this course will be able to analyze industries, identify areas of strategy advantage and disadvantage, and to devise strategies that exploit advantages and remedy disadvantages.

## NBA MANAGEMENT ELECTIVE COURSES

### Accounting

#### NBA 500 Intermediate Accounting

Fall, spring. 3 credits. Prerequisite: NCC 500 or the equivalent. T. Dyckman.

The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

#### NBA 501 Accounting for Mergers and Consolidations

Spring, first half of semester. 1.5 credits. Prerequisite: NBA 500 or permission of the instructor. R. Libby.

The course focuses on accounting problems related to equity financing, including leveraged restructuring, intercorporate investments, leveraged buyouts, consolidated reports, proforma statements for a merger prospectus, and other related financial reporting problems. The method of instruction is lecture mixed with cases. Grading is based on two closed book exams. Course continues in NBA 508, Advanced Accounting, offered second half of semester.

#### NBA 502 Managerial Cost Accounting

Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Hilton.

The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the analysis of cost variances, cost estimation and prediction, cost-price-volume decisions, performance measurement, nonmanufacturing cost analysis, cost allocation, and transfer pricing. Instruction will be a mixture of lecture and case discussion. Student evaluation will be based on a midterm exam, a final exam, a project, and class participation.

#### NBA 503 Strategic Cost Management

1.5 credits. R. Hilton.

This course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activity-based costing, activity-based management, value chain analysis, the lean enterprise, confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of nonvalue-added activities and costs, target costing, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.

#### NBA 504 Taxation Affecting Business and Personal Decision Making

Spring, first half of semester. 1.5 credits. Prerequisite: NCC 500 or permission of the instructor. R. Bloomfield.

This course introduces students to the fundamental concepts and techniques of tax planning for individuals and businesses. Planning opportunities considered include changing the timing and nature of income, investments, and expenses; choosing an

organizational form; constructing transactions that allow two or more parties to engage in tax arbitrage. The course also introduces tax research techniques and issues regarding tax compliance. Course continues with NBA 507.

#### **NBA 505 Auditing**

Spring, 3 credits. Prerequisite: NCC 500 or permission of the instructor. M. Nelson. The course examines the process by which financial-accounting systems are audited. Topics include ethics, the meaning of audit reports, the legal liability of auditors, the study and evaluation of internal control systems, and various approaches for testing account balances. Problems, cases, and video simulations are used to illustrate concepts.

#### **NBA 506 Financial Statement Analysis**

Spring, first half of semester. 1.5 credits. Prerequisite: NCC 506, NBA 500 (or concurrent enrollment) or permission of the instructor. S. Tasker. This course develops a set of core skills essential to financial statement analysis. We will cover strategic ratio analysis, cash flow analysis, pro forma financial statements, financial modeling, credit analysis, bond rating and bankruptcy predictions, and firm valuation using discounted cash flow techniques. Emphasis is on practical applications. The course format is a combination of case studies and lectures. The lectures communicate subtler aspects of the material while the cases provide hands-on experience. There will be an exam.

Note: Students who have completed the three-credit version of NBA 506 cannot enroll in this course.

#### **NBA 507 Tax Implication of Mergers and Acquisitions and Other Special Topics**

Spring, second half of semester. 1.5 credits. Prerequisite: NBA 504 or permission of instructor. R. Bloomfield. This course examines special topics in tax planning for businesses, with particular emphasis on capital structure choices and reorganizations (mergers and acquisitions), and intra-entity transactions (transfer pricing issues). Readings include many current research papers examining how large corporations exploit their tax planning opportunities.

#### **NBA 508 Advanced and International Accounting**

Spring, second half of semester. 1.5 credits. Prerequisites: NBA 501 or permission of the instructor. J. D'Souza. The course examines advanced topics in accounting for international transactions and international subsidiaries, including foreign currency translation, price level adjustments and international variation in accounting principles. The method of instruction is lectures mixed with cases. Grading will be based on two exams and some written cases. Continuation of NBA 501, Accounting for Mergers & Consol (offered first half of semester).

#### **NBA 509 Advanced Financial Analysis**

Fall, second half of semester. 1.5 credits. Prerequisites: NBA 506, a finance immersion course, or permission of the instructor. C. Lee. This course builds on the core financial analysis skills developed in NBA 506. Topics covered include equity valuation, residual income models, quality of earnings assess-

ments, earnings manipulation detection, market efficiency issues, fairness opinions in MBO's, and large sample stock screening strategies. The overall focus is on using accounting-based information to make investment decisions. Emphasis is on practical applications and special attention is given to cultivating analytical and communication skills. The course features both lectures and cases. There will be a group term project, but no final exam.

Note: Students who have completed the three-credit version of NBA 506 cannot enroll in this course.

#### **NBA 510 Cornell Equity Research**

Fall, spring, 1.5 credits. S-U grading only. Prerequisites: NCC 500 and NCC 506 or equivalent, and be taking (or have completed) NBA 506 or have permission of the instructor. R. Bloomfield. Students write and revise equity research reports on companies that are neglected by analysts and preferably undervalued. Class work includes lectures and cases on equity research and valuation, presentations by guest visitors, and presentations by students who must persuade the class to approve their stock recommendations.

#### **NBA 511 Financial Modeling**

Fall, spring, second half of the semester. 1.5 credits. Prerequisites: NBA 506 or permission of the instructor, and mastery of basic EXCEL skills. S. Tasker.

Financial modeling is the art and science of constructing spreadsheet models of firms' future financial statements. In this class, we build on the brief introduction to financial modeling in NBA 506 by modeling the effect on the income statement, balance sheet, and statement of cash flows of more complicated financial transactions such as leveraged buyouts, mergers & acquisitions, and corporate reorganizations. The class meets in the state-of-the-art Parker Center computer lab, and active student participation is emphasized.

#### **NBA 512 Applied Portfolio Management**

Fall, spring, 3 credits. Restricted. C. Lee. An accounting/finance elective course that focuses on the management of an investment fund (see Charles Lee for a full course description). Students enrolled in this course must commit to taking the course for fall and spring semesters. They will receive three credit hours for each semester's work. Strong preference is given to second year MBA students who have successfully completed either NBA 506 or one of the finance immersions. Students need to apply formally. If the number of applicants exceeds 12, admission will be competitive and merit-based.

### **Economics**

#### **NBA 523 Business and Economic Forecasting**

Spring, second half of the semester. 1.5 credits. S-U grading only. Prerequisite: NCC 501 or the equivalent. R. Highfield. This course will focus on statistical and econometric approaches to forecasting business and economic data series that have a time dimension (time series). The course provides students with a toolbox of time series forecasting methods and teaches them how to choose the appropriate one. Topics will

include the relationship of forecasting to decision making, univariate methods such as ARIMA modeling, and some multivariate methods such as transfer function, regression, vector autoregression, and neural networks. Applications will usually involve the forecasting of business and economic data. Although statistical theory will be covered as necessary with lecture and supplemental class notes, the emphasis will be on applications and learning by doing. Passing the course requires participation in class discussions and satisfactory performance on both individual and group projects. There are no exams. There is no text for the course but students will be required to use the student version of a sophisticated econometric software package.

#### **NBA 524 Macroeconomics and International Trade**

Fall, 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. R. Lind.

The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how those problems interact with international trade and finance. Students learn to be informed observers of national and international economic policies and discerning users of economic analyses and forecasts. A lecture/discussion format is used as the method of instruction.

#### **NBA 527 Applied Economic Analysis (also ECON 616)**

Spring, 4 credits. Letter/S-U optional grading. R. Frank. This course will emphasize how economics analysis can help firms and individuals make the most of their opportunities. Of special interest to managers and consultants will be the course's focus on examples that illustrate how faulty economic reasoning leads to inefficient outcomes. The course will also emphasize strategic thinking, and will instruct students in the art of "economic naturalism"—the use of economic reasoning to understand and explain patterns of individual and firm behavior.

#### **NBA 529 Economics of Imperfect Information (also ECON 757)**

4 credits. Prerequisites: ECON 609-610 and 619. The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signaling theory, sequential choice theory, and search theory will be discussed.

### **Finance**

#### **NBA 540 Advanced Corporate Finance (Theory and Practice)**

Fall, spring, 3 credits. Prerequisite: NCC 506 or the equivalent. Students who took NBA 540 and/or NBA 548, 1.5 credit version, can not enroll in this course. H. Bierman.

This course is relevant for both investment banking and the treasurer's activities of an operating corporation. Most class sessions are lecture-discussion, but there are several corporate finance cases. The topics include common stock, preferred stock, debt securities (duration, convexity, inverse floaters, bond

refunding, term structure, swaps), hybrids, security design, weighted average cost of capital, basic capital structure issues, cash distribution policy, and the buy versus lease decision. The use of debt to add value, mergers and acquisitions, corporate restructuring, LBO's and MBO's, and Merchant Banking are also covered.

**NBA 541 Economic Evaluation of Capital Investment Projects**

Spring. 3 credits. Prerequisite: NCC 506 or permission of the instructor.  
B. Swaminathan.

This course deals with the evaluation of capital investment projects under uncertainty. The first part of the course focuses on traditional capital budgeting techniques using the discounted cash flow approach. This involves the estimation of cash flows, the treatment of risk and discount rates, the role of inflation and taxes, and the use of single factor and multi-factor asset pricing models in determining discount rates. The second part of the course focuses on the valuation of future investment opportunities of a firm using option pricing techniques. This includes issues such as flexibility options, options on real assets, evaluation of natural resource investments, and evaluation of new product investments. The methods of instruction are lectures, case discussion, spreadsheet exercises, statistical exercises, and seminars by practitioners. Students are evaluated on the basis of mid-term and final examinations, cases, and homework assignments.

**NBA 542 Investments and Portfolio Analysis**

Fall, spring. 3 credits. Prerequisites: NCC 501, 502, and 506, comfort with quantitative methods. H. Li.

This course deals with several important issues pertaining to investments in securities markets. First, it deals with portfolio diversification theory, asset allocation, asset pricing models such as CAPM, APT, etc., and empirical anomalies such as size effect, January effect, etc. Second, the course deals with the issue of evaluating portfolio performance, mutual fund performance, etc. Third, it deals with investment strategies based on patterns in historical security returns. This may be loosely considered as similar to technical analysis. In addition, the course deals with investment strategies based on publicly available information related to accounting and other market statistics, the use of earnings forecasts, etc. This may be considered as falling under fundamental analysis. Finally, the course deals with frictions to trading imposed by the institutional structure of securities markets. The goal of this course is to train the students in the latest tools and techniques in portfolio theory and familiarize them with the latest developments in securities market research and applications. This is a highly quantitative course involving extensive analysis of security market data using regression analysis and other statistical tools. Grades in this course will be based on mid-term and final exams, cases, a project, and a trading game.

**NBA 543 Financial Markets and Institutions**

Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance core). M. O'Hara, W. Bailey.

This course applies principles of finance in order to understand modern financial markets. Central themes are the structure of financial

markets, their pricing function, the interaction between financial markets and macroeconomic conditions, and the processes of innovation and regulation in these markets. We look at the workings of a variety of markets and develop an understanding of the different problems which different types of markets address. We study the question of market efficiency and the interaction between government policies and financial markets. We analyze issues in innovation and regulation with basic principles of financial economics. Throughout the course, we consider the relevance of these issues for the practical corporate, portfolio, or public sector decision maker. The course includes ideas and evidence from academic research along with historical, institutional, and international perspectives. Recent events are used to illustrate concepts and develop analytic skills. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

**NBA 544 Bank Management**

3 credits. Prerequisite: NBA 543.  
M. O'Hara.

The course provides an in-depth treatment of management issues in commercial banking. Topics include risk management, credit decisions and pricing, information problems, bank performance evaluation, international lending, and strategic planning. Students learn concepts through case studies and participate in a bank-simulation exercise.

**NBA 545 Corporate Finance**

Fall, first half of semester. Spring, second half of semester. 1.5 credits. Prerequisite: NCC 506. J. Zender.

This half-semester course will cover some of the more advanced topics in the area of corporate finance, including executive compensation, corporate governance, and bankruptcy law. The course will include lecture/discussion sessions in which the main ideas and the existing evidence (i.e., the theory and the empirics) will be presented and discussed. Cases will be used to illustrate the importance and applicability of these ideas and to provide "hands on" understanding of the material.

**NBA 546 Introduction to Derivative Securities**

Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance Core) or permission of the instructor. C. Gukhal, H. Li.

The course introduces students to the pricing and hedging of derivative securities. The course briefly covers forward contracts, futures contracts, and swaps. The primary emphasis is on option contracts. Underlying assets include stocks, currencies, and commodities. Fixed income derivatives are covered in NBA 555. The method of instruction is primarily lectures, supplemented by guest speakers. A midterm and a final exam comprise roughly half the grade, with the remaining half determined by assignments and class participation. The course is a prerequisite for NBA 550, Advanced Topics in Derivative Securities.

**NBA 547 Applied Financial Engineering (also OR&IE 565)**

Spring. 4 credits. Prerequisites: NCC 506, NBA 546, NBA 555, NBA 542, OR&IE 523, OR&IE 523, COMS 211, permission of instructor. F. Diz.

This course is designed to integrate the students' course work in engineering (computing, stochastic modeling) and finance (options/futures and investment theory) through the completion of a project. The course project will be undertaken via student groups. It will involve the implementation of a financial model to a real world problem. Problems will come from the real issues facing the financial industry. The implementation will include model formulation, computer programming, data collection, and data analysis. The course format will be a mixture of lectures by faculty, industry professionals and students (project presentations).

**NBA 550 Risk Management with Derivatives**

Spring. 3 credits. Prerequisites: NBA 546 and NBA 555 (NBA 555 can be taken concurrently). R. Gukhal.

This course studies advanced topics in derivatives and risk management. The first part of the course covers topics in derivatives and develops the tools necessary for analysis and the second part is their application to risk management. This course is intensive and demanding—about 50 percent more demanding than the Fall NBA 546 course.

**NBA 551 Current Topics at the Crossroads of Law and Finance**

Spring. 3 credits. M. O'Hara.

This course explores a series of selected topics that involve important issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are known as insurance companies, banks, investments banks, or pension funds, invest money and advise clients in a wide variety of settings. This agency relationship introduces a number of important dimensions to the intermediary-client relationship and this course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

**NBA 552 Cases in Corporate Finance**

Spring. 3 credits. Prerequisites: NCC 506 or the equivalent. Recommended: NBA 540. Course is limited to second-year MBA's and Twelve-Month Option Students. Students who took NBA 535 and/or NBA 536, 1.5 credit version, can not enroll in this course. H. Bierman.

This course consists of discussions of corporate finance cases dealing with corporate financing. Students will form groups and formally present one case and critique a second. This is in addition to the normal class sessions. The cases in this course deal with mergers, acquisitions, valuation, corporate restructuring, LBO's, MBO's, Merchant Banking, and the financing of corporations. The material applies equally to careers in investment banking and managerial finance. The course does not deal with sales trading or the details of managing an investment banking firm. Several executives working in corporate finance will present cases.

**NBA 554 International Finance**

Spring. 3 credits. Prerequisite: NCC 506 (Finance core) or permission of instructor. W. Bailey.

This course applies principles of finance to the international setting. International finance is different in two basic respects. First, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors

cross international borders, both problems and opportunities arise. We focus on these issues and highlight how finance theory can be extended to address them. Starting with basic principles of international finance, we then apply those principles to a variety of problems. The course helps students to understand the ideas and research results of international finance and to adapt what they learn to the practical problems of the increasingly globalized business world beyond the classroom. The first part of the class outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value of international diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

**NBA 555 Fixed Income Securities and Interest Rate Derivatives**

Fall, spring. 3 credits. Prerequisites: NCC 506 (Finance core), NCC 501 (Quantitative Methods core). R. Jarow.

This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations being an integral part of the class content.

**NBA 557 Case Studies in Venture Investment and Management**

Fall. 2 credits. Prerequisites: NCC 500 and NCC 506 or concurrent enrollment. W. Thomas.

A series of cases that focus on the venture capital investment process and on the subsequent management of such ventures. The primary perspective is that of the venture capitalist in assembling and evaluating information, preparing forecasts, assessing risks, developing and negotiating investment structure and terms, and deciding whether to invest. Cases also focus on management and financial problems, policy issues, and the relationship between venture capitalists and entrepreneurs. The secondary perspective is that of the entrepreneur and the techniques and skills employed in managing growing enterprises. Presentations by venture capitalists and entrepreneurs will supplement student discussion and analysis of cases. Grades will be based on written reports, quality of classroom participation, and a final exam.

**NBA 558 Corporate Financial Policy**

Fall, second half of semester. Spring, first half of semester. 1.5 credits. Prerequisite: NCC 506 (Finance core). J. Zender.

The course will deal with frontier topics in corporate finance and investment strategy. The financial world is changing at an increasing pace. New financial products are coming to the markets, and the financial structure of many corporations is becoming more and more complicated. Corporate financial officers and investors (such as money

managers) need to know the driving forces behind the financial products (debt, equity, and more complicated products) to understand the products themselves. Understanding these issues will enable us to estimate firm values more precisely. The course objective is to enable you to better analyze financial situations you may encounter in the future, as well as firms' valuation techniques.

**Entrepreneurship**

**NBA 530 Entrepreneurship Lab**

Fall, spring. 3 credits. Prerequisites: NBA 564 Entrepreneurship, or concurrent enrollment, or permission of the instructor. MBA students only. Letter/S-U optional grading. P. Sears.

Students will team up with entrepreneurs in the greater Ithaca area on defined projects, which will be integral to the companies' operations, such as production planning, new product launches, or assessing organizational structure. The goal of the course is for students to gain first-hand exposure to the application of functional knowledge in a start-up setting, while bringing real value to the host company.

**NBA 531 Startup Forum: Cornell Technologies with New Venture Potential**

Fall, spring. 1 credit. S-U grading only. R. Holsten.

The course will focus on research at Cornell, which may be a basis for new business ventures. It will address the fundamental ways in which university-based research differs from industrial research. Students will explore and critique the business potential of each concept.

**NBA 532 Venture Partnerships—The Corporate Business Development Role, Big Company vs. Emerging Company**

Spring. 1.5 credits. Letter/S-U optional grading. P. Sears.

In an era when large corporations are 'downsizing' and 'outsourcing' in order to save on fixed costs, and emerging companies are dependent upon strategic partnerships with large companies as part of their financing strategies, the business development executive can be found at the vortex of this activity. Priorities for the business development executive are distinctly different depending upon the size and history of the enterprise. This course, taught by a venture capitalist who has also served as a Corporate Development Vice President for a Fortune 100 Company, examines the multitude of roles played by managers in business development jobs. A significant amount of attention will be paid to planning and managing the merger and acquisition process, as well as key elements in negotiation of the strategic partnership. There will be several guest speakers, each an acknowledged expert in the field. Students will be assigned deal-making tasks in the context of a case study that will be the centerpiece of the course. Class dates will be announced. Students will be expected to have read the Big Pharm case study prior to the first class.

**NBA 559 The Venture Capital Industry and Private Equity Market**

Spring. 0.5 credit. S-U grading only. D. BenDaniel, J. Reyes.

This course focuses on the industry from the practitioners' perspective. Topics include (1) an introduction to the private equity market focusing on the transactions that define the industry, its structure, participants, history and trends, (2) institutional private equity investing—now an increasingly important and dynamic part of the asset allocation mix, and (3) issues in private equity investing such as concentration in fewer, larger funds and the critical role of a new class of gatekeeper/consultants for limited partners. The course will involve four lectures and a final paper. The course is given jointly by Professor David BenDaniel and Jesse Reyes, director of Research of Venture Economics Information Services.

**NBA 563 Initial Public Offerings and Acquisitions**

Spring. 3 credits. Letter/S-U optional grading. J. Shulman.

An in-depth look at initial public offerings (IPOs) and acquisitions from a practitioner's point of view. With respect to IPOs the course will cover: the applicable statutory framework, pre-offering corporate preparation (such as implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, pricing, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the consequences of going public. Regarding acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale) and crucial aspects of acquisitions, such as letters of intent, continuity of employees, anti-takeover strategies, and non-competition agreements. Mr. Shulman is an attorney with experience in IPOs and acquisitions, and an adjunct professor at the Cornell Law School where he teaches a seminar course on this topic.

**NBA 564 Entrepreneurship and Enterprise**

Fall, spring. 3 credits. D. BenDaniel.

The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and work-outs, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures.

**General Management**

**NBA 560 Business Law I (also ARME 320)**

Fall. 3 credits. Limited to juniors, seniors, and graduate students. D. Grossman.

The course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlord-tenant concerns. Text readings and case

studies are used. All students intending to be professional accountants are required to take the course, and it is strongly recommended for finance students.

**NBA 561 Business Law II (also ARME 321)**

Spring. 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman. The first portion of this course examines legal issues in the formation and operation of business enterprises, particularly partnerships, corporations, and limited liability companies. The second portion of the course will review selected topics in business law, such as employment discrimination, secured transactions, product liability, unfair competition, and international business law.

**NBA 562 Estate Planning (also ARME 422)**

Fall. 1 credit. S-U grading only. Limited to juniors, seniors, and graduate students. D. Grossman. Fourteen sessions on the various aspects of estate planning. The law and use of trusts, the law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

**NBA 567 Management Writing**

Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, M. Hittleman, C. Rosen. Students learn to write clearly and effectively by focusing on the writing process as well as the finished product. Course topics include audience perspective, style, organization, strategy, and persuasion. There is a writing assignment every week. Students receive instructor and peer feedback. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

**NBA 568 Oral Communication**

Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, C. Rosen. This course focuses on improving the presentation skills of management students. The course covers the areas of speaking formats (impromptu, extemporaneous, manuscript), delivery, organization, visual aids, and question/answer. Student speeches constitute the bulk of class time, with each student presenting seven or eight speeches in the seven-week session. The small class size allows for significant individual attention. Students receive feedback from classmates and the instructor, and have the opportunity to review in tutorials the videotapes of most of their presentations. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

**NBA 569 Management Consulting**

Fall, spring. 3 credits. A. McAdams. The course is case-study oriented and focuses on strategic consulting. It has multiple objectives. First, it provides students with the opportunity to understand the role of the consultant and to gain indirect experience in that role through dealing with a broad range of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it provides students with information that they are unlikely to gain in other courses, as well as experience in making group presentations

and evaluating them. In addition, students are required to write a comprehensive analytic term paper.

**NBA 570 Leadership in Management**

Spring (meets during winter break). 1.5 credits. MBA students only. S-U grades only. R. Peterson, RPW Executive Development, and other Johnson School faculty.

This course is a partnership with RPW Executive Development to provide MBA students with the self-awareness and interpersonal skills required to be effective leaders (the general principles of leadership course is NBA 668). RPW has partnered extensively with the Johnson School Executive Education Department in the past. The course consists of five full-day training sessions. Staff from RPW and Johnson School faculty will provide training. The first two days will focus on self-awareness and employ several experiential exercises and self-assessment instruments including, the Campbell Leadership Index (CLI), Meyers-Briggs Type Indicator (MBTI), the Fundamental Interpersonal Relations Orientation-Behavior (FIRO-B), the Kirtan Adaptation/Innovation inventory (KAI), and the Ambiguity Preference Scale (APS). Class members will also be trained in giving and receiving feedback from team members and faculty. Mid-week activities will include various leadership and team challenges, including a business simulation. Attendance is required each day of the course to receive credit. NOTE: most of the self-assessment instruments listed above will need to be completed prior to the first day of class to allow for scoring and analysis.

**NBA 571 Cornell Management Simulation**

Fall, spring. 1.5 credits. Restricted to second-year MBA students. J. Hass, S. Smidt.

This computer-based simulation is played by self-selected teams of four students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, the teams make periodic decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper and, before the results of the last decision have been determined, each team presents an in-depth analysis of its performance and its strategy for the future in a "Board of Directors" meeting. Letter grading only, based on the value created for the company's shareholders (relative to other firms in the same industry), the team's Strategic Intent paper and the instructor's evaluation of team's performance at the BOD meeting. Students who have completed NBA 549 cannot take this course. Open to MBA IIs only. Meetings will be periodic throughout the semester.

**NBA 572 Environment, Economics, and Management Policy**

Fall. 3 credits. Enrollment preference to Johnson School and other graduate students, others by permission. D. Chapman. Environmental protection and pollution controls are of major importance in the United States and OECD countries, and are growing in importance in developing countries. This

course analyzes the economic rationale affecting business and public decision making. It investigates the success achieved in the United States, and the important role that business has played in that success. Case studies review government-business cooperation, methods of analysis, and management strategy. The course concludes with business leaders presenting their past experiences and current challenges for analysis by the class. The general goal of the course is to introduce future managers to the realistic process of successful environmental decision making.

**NBA 573 Seminar in Sustainable Development (also ABEN 673)**

Spring, first half of semester. S-U grading only. 1-3 variable credits. A. McAdams. This seminar-style course will involve readings and discussion of issues in environmental management, and will also feature four significant outside speakers on the subject of environmental management. (Students interested in doing consulting projects in environmental management will be accommodated in NBA 575, Advanced Consulting.)

**NBA 575 Field Projects**

Fall. 3 variable credits. J. Russo. The course teaches how to frame unstructured business problems through a hands-on team project. Teams must identify what the central issues are, and then determine the most appropriate tools and concepts to provide insight into these issues. Students also learn to approach business problems from a cross-functional perspective. Specific conceptual content includes: project management; power, politics, and personalities in work groups; managing in for-profit versus not-for-profit organizations; and organizational change. Field Projects is not classroom-based. Although there will be a few class sessions early in the semester, the course structure will revolve around (a) periodic reviews and (b) coaching sessions as needed. The instructor team will contain one regular member of the Johnson School's faculty, an experienced executive, and an administrator.

**NBA 577 The Political, Legal, and Regulatory Environment of Business**

Spring. 3 credits. Letter/S-U optional grading. R. Schuler. The political climate, laws, regulations, and government arrangements for infrastructure have a profound effect on the nature, operation, and profitability of business. Many of the most important decisions that top management makes are driven by political, legal, and regulatory considerations (e.g., the responses of Exxon to the Exxon Valdez oil spill and Union Carbide to the Bhopal, India, gas leak and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the U.S. government). Environmental and waste-management concerns are leading to new laws and regulations that will affect many aspects of business well into the next century, creating opportunities as well as posing problems. The course begins with a discussion of the political and economic foundations of business regulation. Students examine different areas of application, including economic regulation, environmental regulation, antitrust, and product liability. Guest speakers include leading scholars from throughout the university and business and government leaders.

**NBA 578 Business Ethics**

Fall. 3 credits.

Students examine actual situations in business, both in the United States and abroad, that involve ethical issues affecting individuals and organizations. They are challenged to decide on appropriate ethical positions.

**NBA 579 Business Strategy**

Fall, first half of semester. 1.5 credits.

Enrollment limited to second-year MBA students only. J. Suwinski.

A well-defined strategy is essential for business success—describing where the business is going, how it's going to get there, and then providing a framework for making decisions along the way. Strategy is the responsibility of top executives of a company/business, and the ability to formulate effective strategy is one of the key skills that distinguishes General Managers from functional managers. This course will focus on the process of effective strategy formulation from the perspective of the general manager of a business unit. This perspective also applies to consultants working for clients on business unit strategy. Corporate strategy and its interaction with business unit strategies will be discussed, as well as tools useful for industry and company analysis. Situational analysis will also be covered. This course will complement the core strategy course, with emphasis on understanding and practicing frameworks that are useful in case-based interviews. The course will draw heavily on the instructor's experience developing strategy for numerous businesses at Corning Incorporated. Guest speakers from industry and strategy consulting firms and also from industry will present their approaches to strategy, and the analytical tools they find most effective in working on business strategy. Students will gain experience, via assigned cases, in analyzing business problems/opportunities, using the strategic process to formulate effective business strategies, and in presenting their recommendations in written form and orally in class. A major case write-up and presentation in a mock board environment at the end of the course gives students an opportunity to play the role of strategy consultants working on a real case.

**NBA 653 Strategic Alliances: Lessons from Experience**

Spring. 1 credit. S-U grading only.

J. Suwinski.

A wide variety of strategic alliances are being used today as companies try to leverage their resources for competitive advantage. This course will overview the spectrum of alliances, examining the strategic rationale and pros and cons of each major type of alliance. The primary focus of the course will be on joint ventures as a specific form of strategic alliance, where the success rate is less than 50 percent. The course will develop a set of principles that have contributed to success for Corning Incorporated. The course will be taught from the perspective of the general manager of a major business unit.

**NBA 665 Managing Technology and Innovation**

Spring. 3 credits.

This course is designed for students who see themselves in settings where they have to develop new products or processes and for students who must implement change in existing products or processes. We discuss major issues involved in managing the introduction of new technology, including

competitiveness, technology assessment, R&D strategy, and positioning. We examine how industries are transformed by new technologies and how innovations diffuse among firms. We also consider internal management issues, including such topics as the structure of innovative organizations, the design of incentive and reward systems that foster risk taking, the way innovation champions manage the new-product development through cross-functional teams, and the role of executive leadership. The course uses a combination of readings, lectures, discussions, case analyses, and guest lectures.

**International Management****NBA 576 The World Geopolitical Environment of Business**

Fall. 3 credits. Letter/S-U optional grading.

R. Lind.

The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The unification of Germany, the fall of communism, the institution of sweeping economic restructuring in the former Soviet Union, the move toward democracy with market economies in eastern Europe, the movement of Europe toward a unified economy, and the flirtations with reform and its implications in China are just a few of the many examples of the changing world environment of business. The course provides students with a view of those fast-paced worldwide changes. Topics covered include developments in western and eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America and the Middle East and the role and fate of developing countries in the world economy. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

**NBA 580 Strategies for Global Competitiveness**

Spring. 3 credits. A. McAdams.

Initially, students explore the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—for lessons the United States might learn and use. They investigate the impact in each of those countries of government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela and Malaysia and newly emergent countries such as Singapore. Classes are run in a discussion format. This course can be used to fulfill the strategy requirement.

**NBA 581 Special Topics—Contemporary Development of Southeast Asian Economies**

Spring. 3 credits. I. Aziz.

This course will analyze the patterns and processes of Southeast Asian economic development during the last three decades. The five plus two countries in the region that will be the focus of the course include Thailand, Indonesia, Malaysia, Singapore, the Philippines, Brunei, and Vietnam. The topics will be divided into the following categories: Southeast Asian economic development,

regional economic cooperation in Southeast Asia, and the financial crisis of the 1990's. The course will assess important factors and consequences of the region's development patterns and use international comparative analysis to explicate the relative position and uniqueness of the region's performance. Evaluation will be based equally on the student's participation in class discussions and debates and on a term paper.

**NBA 584 International Competitive Strategy**

Fall and spring, first half of semester. 1.5

credits. Letter/S-U optional grading. This course can be used to fulfill the strategy requirement. J. Katz.

Focuses on the development of competitive strategies in the global environment—including the identification of internationally relevant strengths and weaknesses, the movement and use of resources to gain competitive advantage, and strategies to confront competitors, both domestic and multinational.

**NBA 585 Cross-National Management**

Fall, second half of semester. 1.5 credits.

Letter/S-U optional grading. J. Katz.

Focuses on the differences in managerial style across countries and develops skills to deal with these differences. Most of the material will be applicable to all countries, though two specific countries will be highlighted each semester.

**NBA 586 Global Management Structures**

Spring, second half of semester. 1.5 credits.

Prerequisites: the new version of NBA 584.

Letter/S-U optional grading. J. Katz.

Focuses on the control, communication, and coordination systems within multinational corporations. Design and development of appropriate systems, to ensure enactment of corporate strategy will be addressed.

**NBA 587 International Mergers & Acquisitions**

Spring. 1.5 credits. J. Hanks.

This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation, and other important topics from both the buy and sell side. The course will use both lecture and case formats. Students will be evaluated on the basis of group and individual written assignments. The instructor for the course, Arthur Rosenbloom, is special partner and former chairman of the board of Patricof & Co. Capital Corp, a New York City-based firm specializing in mergers and acquisitions, private placements, and valuations of going concern businesses for tax and corporate purposes. Patricof has offices in New York and Palo Alto, affiliates in London, Paris, Zurich, Madrid, and Munich and is part of Apax Partners, which includes Patricof & Co. Ventures, Inc., one of the world's largest international venture capital firms. He holds a bachelor's degree from Bucknell University, a master's degree from Columbia University, and a law degree from Cornell. He has taught a similar course at Columbia.

Beginning with the third meeting of the course, Mr. Rosenbloom will conduct the course via a video-teleconferencing link from New York City.

**NBA 590 Managing in Developing Countries**

Fall, first half of semester. 1.5 credits.

Letter/S-U optional grading. J. Katz.

This class centers on the unique features of industrialized and newly industrializing countries as hosts for multinational business operations. It is a case-based course; each class is spent discussing one or two cases. Topics include environmental variation and how to deal with it and concentrated national power structures and their management. We cover a large number of countries spread throughout the world. Students are responsible for providing in-class updates on the countries discussed. Grading is based on the country update presentation, a final case write-up, and class participation.

**NBA 592 Experience in International Management**

Spring. 1.5 credits. S-U grades only. J. Katz.

The objective of this course is to combine classroom sessions and international experience to increase awareness of business environments outside the United States. NOTE: participation in a faculty approved study trip is required to complete this course (fee charged). On trips, students will visit local businesses, subsidiaries of foreign multinationals, government officials, local business school students, and others. Students must also attend two pre-trip meetings (1 1/4 hours each) and two Saturday meetings during spring semester (2 1/2 hours each). Those meetings will be used to present information on international business conditions, industrial structures, management styles, and also, to develop cross-cultural skills. A final paper, integrating the material learned in the classroom with their experiences, will be required.

**Management Information Systems****NBA 600 Database Management**

3 credits. L. Orman.

Database technology is the principal tool of bookkeeping, reporting, and auditing. It is also the primary infrastructure technology for all information systems. Not only is it critical to managing the information flow in modern organizations, but also in building systems to support managerial decisions. The course introduces the basic principles of management, design, and use of databases in organizations. Topics include: data storage and organization, efficiency and optimization, retrieval and end-user languages, reporting and auditing, and the impact on the organization. Students design, create and use databases using various database management systems.

**NBA 601 Electronic Commerce**

Spring. 3 credits. Letter/S-U optional grading. L. Orman.

Electronic commerce is the use of information technology in conducting economic transactions and managing businesses over computer networks. It is a phenomenon that has captured the public attention because of its wide-ranging implications for businesses, markets, public institutions, and the general public. Electronic commerce involves a wide variety of cooperating technologies such as communications, networks, databases, expert systems, and multimedia. It also affects a wide variety of managerial issues. Electronic commerce created a new emphasis on information technologies and systems in

management. It led to the development of new technologies and new combinations of existing technologies to support management. On occasion, it radically altered business practices and the role of management.

The students in this course will learn to conduct economic transactions and manage businesses on the Internet. All major technical and managerial issues will be covered through computer exercises on the Internet, and case studies and examples of businesses on the Internet.

**NBA 612 Imaging and the Electronic Age**

Fall. 3 credits. D. Greenberg.

The advances of computer graphics, computer processing power, network bandwidths, and video compression technologies are forcing the merger of the telephone, television, and computer industries. The influence of these technologies has created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the next century. We are just beginning to fathom how these changes will influence our modus operandi and greatly modify our traditional patterns of behavior, both personal and organizational. Clearly, business and industry management will have to understand the implications of the advanced technology. This course will start by presenting historical technological advances that created major paradigm shifts for communications. Advances in computer technology emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course will cover the effect of these scientific advances on many discipline-specific areas including photography, the film industry, the entertainment and animation industry, television broadcasting, publishing, as well as the computer industry itself. Sessions will be devoted to the social and legal issues rising from the rapid advances in electronic communication. In attempting to predict the disruptive changes of the future, it is best to understand the technologies themselves. Thus, students with technology or science backgrounds are preferred. Although no computer programming will be required, a working knowledge of computers is necessary. The course will be especially tailored to a business school and industrial concerns and will have interactive live demonstrations at the state-of-the-art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.

**NBA 614 Managing in the Information Age**

Fall, first half of semester. 1.5 credits. A. McAdams.

In this course we explore a topic that is just beginning to emerge: the implications of the explosion of the Internet and interactive multimedia communications for the way managers think and manage. We examine the origins of the Internet and some of the forces that have led to its rapid development, noting along the way, why and how it has "blindsided us" as Andy Grove of Intel and Bill Gates of Microsoft candidly stated. We then look at how information is being used today in pioneering applications in organizations of various kinds based, in part, on original case studies and on guest lecturers. Throughout the semester the student will be asked to identify new and innovative use of modern informa-

tion technologies. The course itself will evolve—even in real time—with the developments in the field.

**NBA 615 Information Technology to Manage Business**

Fall. 1.5 credits (variable). S-U grades only. A. McAdams.

This course will rely on visiting speakers from several technology-based firms. The speakers will address how to manage the information technology function as a business and how to use IT to deal with business problems. Speakers will come from hardware companies, software companies, and other organizations dealing with large issues of managing the information resource. There will be assignments, with student groups interacting with speakers, and a short paper at the end of the course. The course will meet approximately 10 times during the semester for up to two hours. H-P, Intel, and other firms have indicated an interest in being involved.

**Marketing****NBA 520 Pricing and Strategy**

Spring, second half of semester. 3 credits. Prerequisite: NCC 502. V. Rao.

This course extends material introduced in the core microeconomics course, where the focus is on pricing decisions. The course is taught very much like the core microeconomics course; i.e., the course consists mostly of lectures and problem sets that use the ideas contained in the lectures. One difference is that some understanding of calculus is required. The grading for the course is based on a midterm exam, a final exam, and a paper. Specific topics covered include price discrimination, peak-load pricing, product line pricing, and pricing when information is asymmetric.

**NBA 620 Marketing Research**

Fall. 3 credits. Prerequisites: NCC 501 and NCC 503, or the equivalent. V. Rao.

This course deals with marketing research as a critical support function in corporations. The broad objective is to provide a fundamental understanding of marketing research methods employed by better managed firms or proposed by leading academicians. The course is aimed at the manager, the ultimate user of marketing information, who is responsible for the scope and direction of research activities involved in obtaining, analyzing, and interpreting results of research. The course will cover the use of secondary sources of marketing information as well as designing studies for collecting primary data. Students will be exposed to up-to-date methods in research design, qualitative research, measurement, data collection, and analysis. The emphasis will be on evaluating research methods and on interpretation and use of results rather than on mathematical derivations. Students will also be exposed to the practical side of marketing research through case studies, problem sets, and projects.

**NBA 621 Marketing Communications**

Fall. 1.5 credits. Prerequisite: NCC 503 (Marketing core). D. Stayman.

The course is designed to give students an understanding of the advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an

appreciation of the issues involved in advertising planning and decision making. They also learn how recent social-science findings and theory can facilitate advertising management.

#### **NBA 622 Marketing Strategy**

Fall. 3 credits. Prerequisite: NCC 503 (Marketing core). V. Rao.

The course balances theoretical and practical approaches to the development and evaluation of marketing strategies for multiproduct firms. It considers various environmental opportunities and constraints in developing and evaluating integrated marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and lead-user analyses. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computer-assisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

#### **NBA 623 Customer-Based New Product Development**

Fall, spring, first half of semester. 1.5 credits. Prerequisites: NCC 501 and NCC 503.

The successful introduction of new products requires careful planning and systematic screening and testing. This course covers models and methods that are useful to managers in the development (e.g., specification of products and services) and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of a measurement instrument, data collection (from at least 30 respondents) and data analysis, for a self-chosen product category. The method of instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.

#### **NBA 625 International Marketing**

Spring, second half of semester. 1.5 credits. Letter/S-U optional grading. Recommended: NCC 503. J. Katz.

Designed to train students to take a domestic product and expand it into international markets successfully. Market selection, international market research issues, and international marketing strategies are all discussed. The term project (actually submitted in three parts throughout the term) requires that students choose some product and develop a plan for taking it abroad. Each class includes cases, therefore, class preparation is essential. Grading is based on the term project, the final, and class participation. Core marketing provides a useful background, but is not a prerequisite.

#### **NBA 626 Consumer Behavior**

Spring. 3 credits. A. Isen.

Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

#### **NBA 627 Affect, Brand Equity, and Internet Marketing**

Spring. 3 credits. A. Isen.

The course will focus on concepts central to brand equity, including brand association, brand perceptions, brand loyalty, relationship marketing, and brand extensions and revitalization, with a special focus on the role of affect (feelings) in decision-making and thought processes that are fundamental to these and other concepts central to brand equity establishment, maintenance, and management. Additionally we'll cover the emerging area of internet marketing from the consumer perspective relative to brand equity, including consumer response to the internet as a medium and marketing channel.

#### **NBA 630 Policies for Marketing Channels**

Spring. 3 credits. Prerequisite: NCC 503. V. Kadiyali.

Marketing channels are analyzed as a chain of interdependent and interlocking organizations that produce and deliver goods and services to various types of consumers. We will look at various aspects of these relationships, such as efficiency, conflict, incentives, and government intervention. Instruction consists of lectures, cases, and guest speakers. Evaluation is based on cases and a final project (presentation and write up) and on class participation.

#### **NBA 631 MARKSTRAT Simulation**

Fall, second half of semester. 1.5 credits. Prerequisite: NCC 503. V. Rao.

MARKSTRAT Simulation offers an opportunity for students to make various marketing strategy decisions in a realistic, dynamic, simulated, competitive environment. Students, working in teams, will manage a portfolio of a firm's products for several years (periods). They will learn how to make long term decisions (introduction of new products) and will deal with various cross-functional issues related to marketing management (e.g., research and development, product design, and budgeting). A major portion of the course will be devoted to an understanding of the basic concepts (e.g., competitive positioning, resource allocation, market segmentation and product design) on which the game is based and to a discussion of suitable methods of analysis of data generated in the game. Students will develop an initial strategy statement and strategic marketing plan for their firm. This game has become quite popular in various schools of management that are perceived to be competitive to the Johnson School. Students will develop an initial strategy statement and strategic marketing plan for their firm.

#### **NBA 633 Internet Marketing**

Spring, first half of semester. 1.5 credits. S-U grades only. V. Rao, D. Stayman, V. Kadiyali.

This class explores the effect of the Internet on marketing. The topics include an overview of the on-line industry, business models for the Internet, advertising and promotions on the Internet, marketing research on the Internet, loyalty programs for Internet marketing, and disintermediation or channel conflict resulting from Internet distribution. The course will comprise industry speakers from Cendant, CSC, Netcentives, H-P, 1st USA, Catalina marketing, and Bausch and Lomb and others. Course requirements include write-ups on a subset of speakers, and a final report and presentation on an Internet marketing issue of your choice. NBA 638 is restricted to MBA II's

because the same information is available for MBA I's in the strategy core.

#### **NBA 635 Marketing Models**

Fall. 3 credits. Prerequisite: NCC 503. V. Kadiyali.

Students learn how to use mathematical models to solve marketing problems. The objective is to develop students' skills in evaluating marketing models and implementing them in management practice.

#### **NBA 637 Direct Marketing**

1.5 credits. Prerequisite: NCC 503 Marketing Management, or equivalent. V. Rao, D. Stayman.

The objective of this short course is to expose MBA students to selected contemporary issues in the area of direct marketing. In addition to providing an overview of the direct marketing industry and trends in database technology, the course will address major strategic and tactical issues in the management of direct marketing. The discussion will mainly consider the perspective of a marketer interested in employing the opportunities in direct marketing as an integral element of the marketing mix for a product/service. It will also address appropriate ethical concerns with direct marketing. To acquire a flavor of various practices in the industry, students will visit one or two direct marketing firms in New York City or its vicinity toward the end of the course.

#### **NBA 638 Analysis of Competitive Decision Making**

Spring. 3 credits. Prerequisite: NCC 502 (Microeconomics core course). V. Kadiyali.

This course brings methods of microeconomics analysis to competitive decision making. Specifically, we will address issues relating to optimal competitive decisions for a firm interacting with current and potential rivals. We discuss how firms can, by their choice of appropriate decisions, best signal to rivals their intentions and their degree of commitment to them. We also look at sustainability, flexibility, and correction of decision choices. Game theoretic perspectives are used to understand these concepts. The dimensions of competitive strategy that we look at include product proliferation, R&D and patent policies, choice of compatibility with existing products, bundling of products, investing in capacity, vertical integration, choice of channels of distribution partners, pricing, and promotions. We also discuss problems caused in the optimal choice and implementation of firm strategies when information is imperfect. Specifically, we look at issues of moral hazard and adverse selection, and how these issues affect firm choices of strategies (e.g., pricing, choice of channel partners, etc.). Instruction includes lectures and cases. Student evaluation is based on cases, class participation, and a final project. This course can be used to fulfill the strategy requirement.

#### **NBA 639 Data-Driven Marketing**

Fall. 3 credits.

Data-Driven Marketing will introduce the future brand manager or marketing consultant to the use of market data to evaluate and construct pricing and promotional strategies. The course will introduce new sources of data available on product purchases and consumers' reactions to the marketing environment. The course focuses on the practical use of popular data sources. Approximately 70 percent of the course will cover panel data on

high-volume consumer packaged goods, and 30 percent will be devoted to direct or "database" marketing. The goal of this course is to introduce these new data sources and provide a solid foundation for the development of analytic tools. Examples are drawn from the consumer packaged goods industry. This course makes intensive use of EXCEL and the WINDOWS computing environment. The data has been extracted and organized for use in EXCEL; this allows the student to concentrate on learning modeling tools without a large investment in computing or data manipulation methods.

## Operations Management

### NBA 641 Logistics and Manufacturing Strategy

Spring. 3 credits. Letter/S-U optional grading. Prerequisite: NCC 508, OR&IE 410, or permission of the instructor.  
L. J. Thomas.

The course is about supply-chain integration, which involves strategic management of the values chain, from materials to customer. Students discuss operations strategy issues that are important to both manufacturing and service. The course emphasizes written and oral communication skills. About a fourth of the classes are spent on case studies, with small groups presenting their analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

### NBA 644 Quality Management

Fall. 3 credits. Prerequisite: NCC 508 or permission of the instructor. L. Robinson.  
The theme of this course will be the design and improvement of products and processes. The topics to be covered within this survey course include: (1) principles of process improvement (the formal seven-step improvement process, quality tools); (2) process monitoring (statistical process control, process capability, Motorola's '6 sigma' program); (3) product design (the Kano model, customer satisfaction and delight, issues in survey design, quality function deployment (QFD), design and manufacturability); (4) product delivery and support (quality in service and administration, satisfaction guarantees, and customer loyalty); (5) process design and improvement (kaizen vs. business process reengineering, benchmarking, design of experiments); and (6) issues in implementing quality improvements. The structure of the course will emphasize 'hands-on' applications of the principles and learning's from the course. The guest speakers and local plant tour will be supplemented with Harvard cases, several exercises (e.g., assuming the role of a Baldridge Examiner, finding and correcting the root causes of problems in a process), and homework assignments (to allow you to work through quantitative problems without any time pressure). A sizeable component of this course will be a group project, which applies the formal quality improvement process at a local firm.

### NBA 645 Product Development Practicum

Spring. 3 credits. J. Thomas.  
This course centers on developing a major new product for firms. It will involve training in creativity by a consulting firm and readings

in product development. This course will provide the opportunity to learn from many different sources, consultants, faculty, and executives.

### NBA 646 Managing Knowledge-Based Services

Spring. 3 credits. Prerequisite: NCC 508.  
This course is designed for students who plan to manage technical and high-skill service enterprises. We discuss the pros and cons of the "service economy" and examine the unique aspects of producing service products, focusing on high-end, high value-added services. Although some consumer service examples will be included, the primary emphasis is on corporate and industrial services that occur between large firms, including technical, financial, and expert services. We will explore the use of traditional operations management tools in the context of service industries, as well as concepts from other disciplines such as sociology, psychology, and economics. In addition to managing the efficient provision of services, we will address service design, marketing, evaluation, and improvement. The course uses a combination of case analyses, discussion, student projects and presentations, guest lectures, and readings.

### NBA 651 Employment Relations

Spring. 1 credit.  
The course will be offered over two full days and will consist of three parts: (1) an overview of U.S. labor and employment law and its effect on today's management, (2) a case analysis of what can lead a workforce to seek union representation to be able to bargain collectively over wages and conditions of employment, and (3) an examination of union-management productivity partnership.

### NBA 652 Integrating Product Design, Marketing, and Manufacturing

Spring. 1 credit. J. Bradley, J. Thomas.  
The course will make the necessity of integrating product design, marketing, and manufacturing for a firm's success apparent. Managerial tools and useful concepts that facilitate this integration will be introduced. Students will have the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.

## Organizational Behavior

### NBA 663 Managerial Decision Making

Fall. 3 credits. J. Russo.  
This course presents practical concepts from the behavioral sciences that can serve as guides to managerial action. Lectures, cases, and exercises are used to acquaint students with new perspectives on decision making, critical thinking, problem solving, and group processes. Taken together, these perspectives offer a trouble-shooter's guide to the uncertainty, complexity, and conflict in the business world.

### NBA 666 Judgment and Negotiations

Fall, spring. 3 credits. K. O'Connor.  
Judgment is the art and science of transforming perception into thought or opinion. Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiation as it is practiced in a variety of settings. This course is designed to comple-

ment the technical and diagnostic skills learned in other courses at the Johnson School. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills is needed for these solutions to be accepted and implemented. The course will highlight the components of an effective negotiation and teach students to analyze their own behavior in negotiations. The course will be largely experiential, providing students with an opportunity to develop their skills by participating in negotiations and integrating their experiences with the principles presented in the assigned readings and course discussions.

### NBA 667 Managing Intellectual Capital

Fall, first half of the semester. 1.5 credits.  
B. Nelsen.  
As the twentieth century draws to a close, economies long based on manufacturing are giving way to those based on the management of information, the production of knowledge, and the provision of services. Hence, organizational profits will increasingly flow from intellectual rather than material capital. A firm's success will hinge upon the manager's ability to recognize and adapt to the unique challenges presented by managing intellectual capital. This course examines this shift in the business environment and its practical implications for managers. Topics addressed include (1) motivating and managing knowledge workers; (2) employee empowerment and self-managing teams; (3) organizational learning; and (4) leadership for innovation and creativity.

### NBA 668 Leading Teams and Organizations

Fall. 3 credits. R. Peterson.  
This course focuses on general principles for successfully leading teams and organizations (the personal development course is NBA 570). The course draws on the latest research in team decision making and organizational leadership to address questions such as, (1) what is the difference between leadership and management, (2) how does a leader establish trust and commitment to an organization (e.g., David Kearns at Xerox), and (3) how do leaders transform organizations (e.g., Jack Welch at GE)? The course consists primarily of case studies of leaders, but also includes some experiential and group activities. Course grading is based on class participation, group case analyses, and a final individual case analysis. Priority is given to MBAs.

## NMI AND NRE RESEARCH AND ADVANCED STUDIES

### NMI 500-502 Directed Reading and Research

Fall, spring. 1, 2 or 3 credits. S-U grading only.  
Students undertake special-interest research under the supervision of faculty members. Registration is limited to students who have the approval of their advisers and of the faculty members involved in the research.

### NMI 510 Multi-Cultural Work Environments

Spring. 1 credit. S-U grading only.  
Restricted to Johnson School students.  
C. Rosen, B. Mink.

NMI 510 is a independent study course that is open to students whose summer internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students will obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Sage 304) for further details about the academic and immigration requirements for NMI 510.

## DOCTORAL SEMINARS

### **NRE 502 Doctoral Seminar In Marketing** 3 credits. A. Ainslie.

This class is intended to introduce students to empirical research in marketing. There will be a strong focus on the historical development of econometric specifications of consumer choice models (with an emphasis on heterogeneity and issues of dynamic consumption patterns), and Bayesian methods in marketing. However, by the very nature of the class, the content will to some extent be driven by the participants in the course. Teaching will be interactive, and each participant will be expected to present one of the papers studied to the rest of the class. Furthermore, each participant will be expected to replicate the results of one of the papers, requiring the participant to write the necessary code and briefly discuss their findings.

Enrollment is by consent of the instructor. Students are required to have taken a graduate level course in either mathematical statistics or econometrics, although this restriction may be waived in special cases. Students are welcome to sit in on parts of the class; for example, the section on Bayesian Methods will be broad enough that students from other areas may find the presentation useful.

### **NRE 504 Doctoral Seminar in Accounting** 3 credits. Staff.

The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research. This course is for Ph.D. students only.

### **NRE 507 Doctoral Seminar: Affect and Cognition**

Fall. 3 credits. Prerequisites: courses in statistics and experimental design. A. Isen. The course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Applied topics relevant to management concerns (for example, organizational behavior and consumer behavior) as well as other theoretical and applied topics (among them medical decision making, social interaction, self-concept, and cognitive and affective develop-

ment) are considered, depending on student interests.

### **NRE 509 Doctoral Seminar in Research Methods**

3 credits. Staff.

This course concerns the fundamentals of scientific research: theory, research design, methods, and criticism. It is designed for doctoral students who wish to undertake research publishable in scholarly journals. Little or no scientific training is assumed. Statistics will not be emphasized; however, familiarity with elementary statistical concepts and inference will prove useful. The course will cover: (1) the principles of theory building; (2) the pros and cons of various general research designs (laboratory and field experiments, surveys, interviews, participant observation, archival studies, simulations, and formal mathematical models); and (3) the structure of research papers and the review process.

### **NRE 510 Ethnography in Organizations** 3 credits. B. Nelsen.

This course is a comprehensive introduction to the philosophy and practice of fieldwork in an ethnographic tradition, with particular emphasis on conducting fieldwork in organizational settings. The course has four primary objectives: (1) to acquaint students with various philosophies and techniques for doing field research in organizational settings; (2) to provide students with an opportunity to engage in field research; (3) to provide students with an opportunity to develop unique insights into an organizational setting(s) and contribute to the theoretical understanding of social phenomena in their field of study; (4) to provide a climate of social support throughout the student's field experience.

### **NRE 511 Doctoral Seminar in Finance—Corporate Finance** 1.5 credits. Staff.

This course will cover topics in corporate finance and empirical asset pricing.

### **NRE 513 Doctoral Seminar in Finance—Market Microstructure** 3 credits. Staff.

The course examines recent research in market microstructure, particularly as it relates to theoretical issues. Topics covered include asymmetric information in securities markets, market behavior, and market structure.

### **NRE 514 Doctoral Seminar in Finance—Asset Pricing Theory** 1.5 credits. Permission of instructor required. Staff.

This course will cover asset pricing theory as based on either economic equilibrium or the absence of arbitrage. The method of instruction is primarily presentations given by the students on important papers. The presentation and the final exam each comprise about half the grade.

### **NRE 515 Doctoral Seminar in Behavioral Decision Research**

Spring. 3 credits. J. Russo.

This seminar focuses on decision making. The first topic is competing paradigms for research in decision making. A central question of this topic is, "Which paradigms have been most successful or show promise in being most productive in the future?" Other topics will be guided by the interest of participants. They include connectionist approaches, dynamical systems, the interpretation (and distortion) of

information, consistency-based theories, biased allocation of attention, and memory—all as applied to the theories and phenomena of decision and judgment.

### **NRE 517 Doctoral Seminar in Information, Incentives, Games, and Contracts**

3 credits. Staff.

An introduction to game theory and information economics for a broad audience—those who will construct (or just consume) game-theoretic models in applied fields of management (including accounting, finance, marketing, and organizational behavior) and applied fields of economics (including industrial organization, labor economics, macroeconomics, and international economics). The course emphasizes applications at least as much as pure theory; each step in the theory is illustrated by applications from management and economics before the next step in the theory is introduced. The wide variety of applications shows that similar issues arise in different fields and that the same game-theoretic tools can be applied in each setting.

## FACULTY ROSTER

- Babbes, George, Ph.D., U. of California at Berkeley. Asst. Prof., Marketing  
 Bailey, Warren B., Ph.D., U. of California at Los Angeles. Assoc. Prof., Finance  
 BenDaniel, David J., Ph.D., Massachusetts Inst. of Technology. Don and Margi Berens Professor of Entrepreneurship  
 Bierman, Harold, Jr., Ph.D., U. of Michigan. Nicholas H. Noyes Professor of Business Administration  
 Bloomfield, Robert J., Ph.D., U. of Michigan. Assoc. Prof., Accounting  
 Bradley, James R., Ph.D., Stanford U. Asst. Prof., Production and Operations Management  
 Conway, Richard W., Ph.D., Cornell U. Emerson Electric Co. Professor of Manufacturing Management, Prof., Management Information Systems, Director, Semester in Manufacturing  
 D'Souza, Julia, Ph.D., Northwestern U. Asst. Prof., Accounting  
 Dyckman, Thomas R., Ph.D., U. of Michigan. Ann Whitney Olin Professor of Accounting  
 Elliott, John A., Ph.D., Cornell U. Prof., Accounting, Associate Dean for Academic Affairs  
 Frank, Robert, Ph.D., U. of California at Berkeley. Professor of Economics  
 Greenberg, Donald P., Ph.D., Cornell U. Prof., Management Information Systems  
 Gukhal, Reddy, Ph.D., Columbia U. Asst. Prof., Finance  
 Hass, Jerome E., Ph.D., Carnegie-Mellon U. Prof., Finance and Business Strategy  
 Hilton, Ronald W., Ph.D., Ohio State U. Prof., Accounting  
 Isen, Alice M., Ph.D., Stanford U. S. C. Johnson Prof., Marketing  
 Jarrow, Robert A., Ph.D., Massachusetts Inst. of Technology. Ronald P. and Susan E. Lynch Professor of Investment Management, Prof., Finance and Economics  
 Kadiyali, Vrinda, Ph.D., Northwestern U. Asst. Prof., Marketing and Economics  
 Lee, Charles M. C., Ph.D., Cornell U. Prof., Accounting and Finance, Henrietta Johnson Louis Professor of Management, Director, The Park Center for Investment Research

Li, Haitao, Ph.D., Yale U. Asst. Prof., Finance  
 Libby, Robert, Ph.D., U. of Illinois. David A. Thomas Professor of Management, Prof., Accounting and Behavioral Science  
 Lind, Robert C., Ph.D., Stanford U. Prof., Economics, Management, and Public Policy  
 Mannix, Elisabeth, A., Ph.D., U. of Chicago. Assoc. Prof., Organizational Behavior  
 McAdams, Alan K., Ph.D., Stanford U. Assoc. Prof., Managerial Economics  
 McClain, John O., Ph.D., Yale U. Prof., Quantitative Analysis  
 Michaely, Roni, Ph.D., New York U. Assoc. Prof., Finance  
 Nelsen, Bonalyn, Ph.D., Cornell U. Asst. Prof., Organizational Behavior  
 Nelson, Mark W., Ph.D., Ohio State U. Assoc. Prof., Accounting  
 O'Connor, Kathleen, Ph.D., U. of Illinois. Asst. Prof., Organizational Behavior  
 O'Hara, Maureen, Ph.D., Northwestern U. Robert W. Purcell Prof., Management, Prof., Finance  
 Orman, Levent V., Ph.D., Northwestern U. Assoc. Prof., Management Information Systems  
 Peterson, Randall S., Ph.D., U. of California at Berkeley. Asst. Prof., Organizational Behavior  
 Rao, Vithala R., Ph.D., U. of Pennsylvania. Deane W. Malott Professor of Management, Prof., Marketing and Quantitative Methods  
 Robinson, Lawrence W., Ph.D., U. of Chicago. Assoc. Prof., Operations Management

### Lecturers

Katz, Jan, Ph.D., Massachusetts Inst. of Technology. Sr. Lec., International Business and Marketing  
 Mink, Barbara E., M.A., Cornell U. Sr. Lec., Management Communications  
 Pike, Alan S., M.A., Cornell U. Sr. Lec., Management Communications  
 Rosen, Charlotte, Ph.D., Cornell U. Sr. Lec., Coordinator, Management Communications

### Adjunct and Visiting Faculty

Grossman, Dale A., J.D., American U. Sr. Lec., Tax and Business Law  
 Nesheim, John L., MBA, Cornell U. Visiting Lecturer, President, Aladdin Systems, Inc.  
 Perez, Pedro D., Ph.D., Rochester Polytechnic Inst. Visiting Asst. Prof.

Schuler, Richard E., Ph.D., Brown U. Prof. Economics, Prof. Civil & Environmental Engineering  
 Sears, Peter A., J.D., Harvard U. Visiting Lecturer, Vice President, Business Investments, Smith Kline Beecham Corporation  
 Thomas, William, MBA, Harvard. Lec., Management, President, Capital Southwest

## DIVISION OF NUTRITIONAL SCIENCES

### ADMINISTRATION

Jere Haas, director

Carole Bisogni, associate director for academic affairs

Michael Kazarinoff, director of graduate studies, Field of Nutrition

### THE DIVISION

Nutritional Science draws upon the chemical, biological, and social sciences to understand the complex relationships between human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements throughout the life span, role of diet in reducing risk of chronic disease, nutritional quality of foods, and interventions and policies designed to promote the nutritional health of individuals, communities, and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. The undergraduate program in Nutritional Sciences is offered through the College of Human Ecology. An undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. The undergraduate program in Human Biology, Health, and Society is offered through the College of Human Ecology. A program of study in nutrition for biological science majors is offered in collaboration with the undergraduate program in biology. Graduate study in the Field of Nutrition, is administered by faculty members throughout the university.

### FACILITIES

Most of the faculty members of the division work in Savage Hall, Kinzelberg Hall, and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, these buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities. The division's Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. The Learning Resource Center contains computers and printed and audiovisual resources which give students access to specialized software. Savage Hall also has a graduate reading room.

### UNDERGRADUATE PROGRAMS

The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

**Nutritional Sciences (NS)**, College of Human Ecology: this program provides students with a strong foundation in the broad field of nutritional sciences as well as thorough training in chemistry and biology. Students may prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

**Nutrition, Food, and Agriculture (NFA)**, College of Agriculture and Life Sciences: this program is for students who want strong training in human nutrition combined with supportive course work in the agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture Program supplement the nutrition curriculum with courses in areas such as food science, animal science, plant science, advanced biology, business and economics, education, and communication. This program prepares students for a variety of career interests.

**Human Biology, Health, and Society (HBHS)**, College of Human Ecology: established in 1997, this program gives students a strong foundation in biology and then explores human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then, choosing from a wide array of courses offered in the College of Human Ecology, focus their studies on health issues of their choice. Students can explore such topics as gene expression and metabolism related to disease states; biological and social aspects of growth and development; and policies and programs influencing health.

The Division also offers the **Program of Study in Nutrition for biological sciences majors** who may be enrolled in the College of Agriculture and Life Sciences or College of Arts and Sciences. Students interested in this program should consult the description in the Biological Sciences section of the catalog.

### THE CURRICULUM

Undergraduate students in these three programs complete the requirements of their colleges as well as the courses required by the program of their specific interests.

The NS, NFA, and HBHS programs all require a rigorous sequence of courses in chemistry and biology; including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with an additional math and/or statistics requirement for some programs and career paths. Students in the

HBHS major also complete a course in physics and two additional courses in advanced biology.

All students complete the introductory course, Nutrition and Health: Concepts and Controversies (NS 115). The NS and NFA Programs require the completion of four other core courses: Social Science Perspectives on Food and Nutrition (NS 245); Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 331); and Methods in Nutritional Sciences (NS 332). Students in these programs also must select a minimum of nine credits in advanced courses in the nutritional sciences.

The HBHS major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students must also complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these three programs have a faculty adviser with whom they meet at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experience outside the classroom.

In all three undergraduate programs the correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division's Academic Affairs Office, 309/335 MVR. This office offers a wide range of advising materials to help students develop a program of study that matches students' interests and needs.

### CAREER OPTIONS AND COURSE PLANNING

Requirements for the three programs are the minimum set of courses necessary for a bachelor's degree in these fields. Students should supplement their requirements with elective courses and other learning experiences that will prepare them for entry-level jobs or advanced study in their field(s) of interest. A summary of suggested electives for different career interests follows:

#### Medicine and Other Health Careers:

Recommended courses for pre-med students include calculus and two terms of physics. Specific information about medical school admissions requirements can be obtained from the university's Health Careers Office, 203 Barnes Hall. Students interested in other health careers should acquire specific information about those requirements. Courses of interest may include those related to the biological and social determinants of health; human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology; psychology; and ethics.

**Dietetics:** Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods, nutrition and disease, microbiology, management, statistics, and nutritional care are added to the courses required for the nutrition programs. For more information about meeting ADA requirements see Anne Kendall, 3M5 MVR.

**Exercise, Nutrition, and Health Promotion:** Students should complete a course in physiology and a course in anatomy after introductory biology. Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics; a course in statistics; a course in ethics; and three courses in psychology. Students should check the specific requirements of their schools of interest. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 309 MVR.

**Biomedical Research/Nutritional Biochemistry:** Recommended electives include calculus, physics, genetics, advanced biology and chemistry, toxicology, and nutritional sciences courses related to the physiology, biochemistry, and metabolism of different nutrients and disease states.

**Public Health and Community Nutrition:** Suggested electives include courses in communications, education, human development, policy analysis and management, maternal and child nutrition, geriatric nutrition, nutrition and disease, and food economics.

**Nutrition, Food, and Business:** Recommended electives include courses in management, marketing, economics, communications, hotel administration, and food science.

**Nutrition and Agriculture:** Recommended electives include courses in food science, animal science, plant sciences, international agriculture, agricultural economics, biological sciences, and rural sociology.

**International Nutrition:** Recommended electives include courses in language, anthropology, agricultural economics, policy, economics, rural sociology, international agriculture, and nutritional sciences related to maternal and child health and problems of developing nations.

**Biology and Behavior:** Recommended electives include courses in psychology, human development, and neurobiology.

**Food, Nutrition, and Health Policy:** Recommended electives include courses in economics, sociology, government, policy analysis, and management.

## SPECIAL EXPERIENCES

Undergraduates can enhance their experiences by participating in structured field experiences or study abroad. Academic credit can be earned for field experiences in a community agency, health-care facility, or business. The Urban Semester in the College of Human

Ecology provides students with an opportunity to study and gain field experience in New York City. All students intending to spend a term off campus in field experience or study abroad must plan their courses well in advance to be sure that all program requirements can be met.

## INDEPENDENT STUDY ELECTIVES

Independent study courses (NS 400, 401, 402) can be used to obtain credit for more diverse or intensive experience than the classroom can offer, whether this involves laboratory work, library research, or field study. Any student interested in independent study should obtain the sponsorship of a faculty adviser and the approval of the associate director for academic affairs or consider applying to the honors program.

## HONORS PROGRAM

The honors program, leading to a B.S. degree with honors in the College of Human Ecology, or B.S. degree with Distinction in Research in the College of Agriculture and Life Sciences, gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students in the honors program take seminars in designing and evaluating research, complete an original piece of research (at least six credits of NS 499) and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 230 Savage Hall.

## COURSES RECOMMENDED FOR NONMAJORS

Courses in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields.

NS 115, Nutrition and Health: Concepts and Controversies, is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 200, Vegetarian Nutrition: An Introduction; NS 247, Food for Contemporary Living; NS 262, Nutrients and Cells; NS 275, Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 450, Public Health Nutrition; NS 451, Epidemiology and Health of Human Communities. Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 345 Physicochemical and Nutritional Aspects of Foods; NS 431 Mineral Nutrition and Chronic Disease; NS 441, Nutrition and Disease; and NS 475 Molecular Nutrition and Development.

## GRADUATE PROGRAMS

Graduate study is administered by the Field of Nutrition, a group of about 40 faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in molecular and biochemical nutrition, human or animal nutrition, community nutrition, or international nutrition. Research is emphasized in all graduate programs. Field experience may be an important component of concentrations in community, international and public-health nutrition, and nutrition education. Teaching experience and participation in the graduate student seminar (NS 703) are important aspects of graduate training.

The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutrition have exceptional choices and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy. Students in international nutrition are expected to conduct their thesis research abroad.

For more information about the graduate program, please write for the brochure. Graduate Study in Nutrition, available from the Director of Graduate Studies, Field of Nutrition, Cornell University, 309 MVR Hall, Ithaca, NY 14853-4401; telephone (607) 255-4410; web site: [www.nutrition.cornell.edu/grad.html](http://www.nutrition.cornell.edu/grad.html), e-mail: [nutrition\\_gfr@cornell.edu](mailto:nutrition_gfr@cornell.edu)

## COURSES

### NS 115 Nutrition and Health: Concepts and Controversies

Fall. 3 credits. S-U grades optional. M W F 1:25. D. Levitsky.

The course will discuss the facts and fallacies concerning the role that nutrition, exercise, and other health behaviors play in preventing disease, maintaining good health, and maximizing athletic performance. Emphasis is on understanding the biological mechanisms through which good nutrition and regular exercise affect psychological and physical health.

### NS 116 Personalized Concepts and Controversies

Fall. 1 credit. Corequisite: NS 115. S-U only. Limited to freshmen and transfer students, 10 per section. TBA. E. West.

This course provides students enrolled in NS 115 individualized assistance in many skills including using computers to analyze diets, finding and using scientific references, understanding and criticizing scientific articles, and reviewing material presented in lectures.

### NS 120 Nutrition and Health: Issues, Outlooks, and Opportunities

Spring. 1 credit. S-U grades only. Limited to 120 freshmen, sophomores, and juniors, others by permission of instructor. W 12:20. E. West.

A course for students interested in exploring careers in the broad fields of food, nutrition,

and health. Experts representing different areas will discuss their work, focusing on current issues and trends as well as their requisite knowledge and skills. This course describes the many disciplines that are drawn upon in addressing human problems related to food, diet, and health. It also explores the related intellectual and career opportunities. This is not an introductory nutrition course for nonmajors.

#### **NS 200 Vegetarian Nutrition: An Introduction**

Fall. 3 credits. S-U grades optional. Prerequisites: NS 115 advised but not essential. M W F 11:15. T. C. Campbell. This introductory course will survey vegetarianism from a variety of nutrition and health considerations. The material to be presented and discussed will primarily include the empirical scientific evidence presented for easy comprehension for students without nutrition training. The course will also consider the historical and sociocultural roots, both ancient and of more recent times, that have led to the growing interest in, and acceptance of, this type of dietary practice. Particular attention will be given to the role of vegetarianism in the prevention and reversal of chronic degenerative diseases. Special topics on competitive sport, childhood nutrition, food preparation, and dietary transition will be offered. Internationally known guest speakers, will provide six to eight of the lectures.

#### **NS 222 Maternal and Child Nutrition**

Spring. 3 credits. Prerequisites: NS 115 and a college biology course or permission of the instructor. S-U grades optional. Limited to 25 students. Preregistration is required in room 309 MVR Hall. M W F 1:25. C. Garza. Involves the study of nutritional requirements in pregnancy, lactation, infancy, and childhood through adolescence. Topics include the relationship between maternal diet and pregnancy outcome; analysis of different methods of infant feeding; and nutritional status of pregnant women, children, and adolescents in the United States and in developing countries.

#### **NS 245 Social Science Perspectives on Food and Nutrition**

Fall. 3 credits. Prerequisite: NS 115. Letter grade only. T R 10:10–11:25. J. Sobal. Theories, concepts, and methods from the social sciences will be used to examine food, eating, and nutrition. The course will use the food and nutrition system and the food choice process as conceptual models for examining the scope of social aspects of nutrition.

#### **NS 247 Food for Contemporary Living**

Fall and spring. 2 credits. Laboratory sections limited to 32 students. Preregistration during course preregistration required in 309 MVR Hall. Laboratory coat or apron required. Fall T 1:25–4:25; spring T 1:25–4:25 or R 9:05–12:05. A. Kendall. Emphasizes meal planning for healthy individuals using national nutrition standards; the development of food preparation and presentation skills; the application of sensory evaluation techniques; food science principles as they apply to cooking and ethnic and cultural influences on cuisine.

#### **[NS 262 Nutrients and Cells**

Spring. 3 credits. Prerequisites: one semester of biology and chemistry. M W F 9:05. Not offered 2000–2001. N. Noy. The course will focus on the relationships of the cell with the environment. Examples from three general areas will be considered: (1) Mechanisms of uptake of nutrients by bacterial and by mammalian cells. (2) Intra-cellular outcomes of nutritional stimuli: effects on metabolism and gene expression, toxicity. (3) Pathways of neutralization: detoxification, secretion, DNA repair.]

#### **NS 275 Human Biology and Evolution (also Biological Sciences 275 and Anthropology 275)**

Fall. S-U grades optional, with permission of either instructor. Offered alternate years. See BIO SCI 275 for course description.

#### **NS 300 Special Studies for Undergraduates**

Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty. Special arrangements to establish equivalency for courses not transferred from a previous major or institution. Students prepare a description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-of-registration period.

#### **[NS 306 Nutritional Problems of Developing Nations**

Spring. 3 credits. Prerequisites: NS 115. S-U grades optional. T R 10:10. Offered alternate years. Not offered 2000–2001. M. C. Latham. The course is designed for undergraduates interested in the nutritional problems of developing countries. Attention is given to the array of nutrition problems encountered, the causes of hunger and malnutrition, the epidemiology of the major nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.]

#### **[NS 315 Obesity and the Regulation of Body Weight (also Psychology 613)**

Spring. 3 credits. Prerequisites: NS 115, Psych 101. Limited to juniors and seniors. S-U grades optional. Offered alternate years. T R 1:30–3:00. Not offered 2000–2001. D. Levitsky. This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, genetics of obesity, role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.]

#### **NS 320 Introduction to Human Biochemistry**

Fall. 4 credits. Prerequisites: one year college biology; one year college general chemistry; and CHEM 257 or 357–358; or permission of the instructor. S-U grades optional. M W F 10:10, sec T 1:25. W. Arion, P. Stover. The principles of biochemistry are presented within the context of human health and disease. Metabolism of carbohydrates, lipids, proteins, and selected micro-nutrients is taught

from a perspective that emphasizes their role in supporting the structure and physiological functions of the major organs of the body, including blood. The concepts of enzyme catalysis, enzyme regulation, hormone action and bioenergetics are incorporated within this framework. The fundamental concepts of eucaryotic DNA structure, function, and gene expression are covered with reference to their importance in regulating metabolism and the impact of a changing nutrient environment.

#### **NS 331 Physiological and Biochemical Bases of Human Nutrition**

Spring. 4 credits. Prerequisites: Biological Sciences 330, or 331, or NS 320, or equivalent. S-U grades optional. Lec M W F 10:10; disc, W or R. M. Stipanuk, C. McCormick. This course examines the biochemical and physiological bases of human nutritional requirements. The instructors use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutrition are discussed throughout the semester. The discussion sections and problem sets provide an opportunity to examine in greater depth selected topics from lecture.

#### **NS 332 Methods in Nutritional Sciences**

Fall and spring. 3 credits. Each section limited to 18 students. Prerequisites: NS 345, NS 331 preferred or concurrent registration. Laboratory preregistration during course preregistration required in 309 MVR. One evening prelim to be scheduled. Fall. Lec M 12:20; lab M W 1:25–4:25 or T R 10:10–1:10. Spring. Lec M 12:20; labs M W 1:25–4:25 or T R 10:10–1:10. J. T. Brenna, M. N. Kazarinoff. Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient, metabolite, and enzyme analysis in body fluids, and methods for assessing individual food intake and nutritional status.

#### **NS 341 Human Anatomy and Physiology**

Spring. 4 credits. Letter grade only. Prerequisites: college biology; NS 115 recommended. Laboratory preregistration required in 309 MVR during preregistration. Limit 120. Lec M W F 12:20; lab W or R or F, 9:05–11:00 or 2:30–4:25. V. Utermohlen. Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to the nutrition sciences and medicine. All major organ systems will be covered. Laboratories will emphasize location, recognition, and description of anatomical structures. Testing of physiological functions will focus on the tests with nutritional and medical relevance.

#### **NS 345 Nutritional and Physicochemical Aspects of Food**

Spring. 3 credits. Prerequisite: college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25–2:40. B. Lewis, B. Parker. A study of the nutritional, physical, and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/preparation aspects. Issues related to food

safety, regulation, and food composition data bases will also be discussed.

**NS 346 Introduction to Physiochemical Aspects of Foods—Laboratory**

Spring. 1 credit. Each section limited to 18 students. Limited to dietetics students in DNS. Prerequisites: NS 345 or concurrent registration; a college course in organic chemistry and permission of instructor during course registration (permission-of-instructor forms must be obtained from and returned to 309 MVR). Letter grade only. M 12:20–3:20 or T 9:05–12:05.

B. Lewis, B. Parker.

Laboratory exercises designed to illustrate principles related to food quality and ingredient functionality, and to introduce students to the analytical methodology associated with food evaluation.

**NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development 347 and Biology and Society 347)**

Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent; Human Development 115 or Psychology 101 or equivalent. M W F 1:25. Offered alternate years. J. Haas, S. Robertson.

This course is concerned with the interrelationships of physical and psychological growth and development in humans, particularly during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variation for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

**NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)**

Fall. 3 credits. Prerequisites: Biological Sciences 101–102 and Psychology 101, or permission of the instructor. A fundamental knowledge of biology and psychology is essential. S-U grades optional. Limited to juniors and seniors. M W F 9:05. B. Strupp.

A critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences will be integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and abused drugs, biopsychology of learning, memory, intelligence, and related cognitive disorders.

**NS 378 Food, Nutrition, and Service Management**

Fall. 3 credits. Prerequisites: NS 115, NS 247 or permission of instructor. T R 8:40–9:55. M. Kamp.

The course discusses how management principles and theories apply to foodservice operations and nutrition services. The systems concept of organization is utilized. Emphasis is placed on leadership development, decision making/problem solving as it relates to procurement, production, distribution, and quality assurance in food and nutrition services. Menu development projects demonstrate the interrelationships of nutrition, labor, equipment, food costs, and customer satisfaction. Marketing strategies and implementation are discussed. Teamwork and negotiating skills are emphasized.

**NS 380 Integrating Food Systems and Human Nutrition Needs**

Spring. 2 credits. Prerequisites: NS 115 or Food 200 or An Sc 100. Letter grade only. T R 8:40–9:55. G. Combs.

A student-centered course that uses case studies to examine the link between human nutrition and health issues to those involving systems of food production and distribution. Student teams will investigate new and existing technological options within food systems to address domestic or international human nutrition needs.

**NS 398 Honors in Nutritional Sciences**

Fall. 1 credit. Limited to students admitted to the division honors program. S-U grades only. T 12:20. M. Kazarinoff.

Research design. Analysis of research papers on selected topics.

**NS 400–401–402–403 Special Studies for Undergraduates**

Fall or spring. Credits to be arranged. S-U grades optional. Division faculty.

For advanced independent study by an individual or group of students who want to study a field of nutritional sciences not otherwise provided through course work in the division or elsewhere at the university. Students prepare a description of the study they want to undertake on a form to be signed by the instructor directing the study and the associate director for academic affairs. The form, available from the department office, is filed at course registration or within the change-of-registration period along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, students should submit the special-studies form to the associate director for academic affairs as early as possible.

**NS 400 Directed Readings**

For study that predominantly involves library research and independent reading.

**NS 401 Empirical Research**

For study that predominantly involves data collection and analysis or laboratory or studio projects.

**NS 402 Supervised Fieldwork**

For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**NS 403 Teaching Apprenticeship**

For study that includes assisting faculty with instruction.

**[NS 421 Nutrition and Exercise**

Spring. 3 credits. Prerequisites: BIO S 311 or NS 341 and NS 115 or NS 331. S-U grades optional. M W F 11:15. Not offered 2000–2001. Division faculty.

This course will acquaint students with the interaction between nutrition, exercise, and athletic performance. Topics will cover the biological, psychological, and sociological aspects of nutrition as it relates to exercise performance. Students will learn nutritional counseling techniques for educating the recreational and professional athlete, coach, and trainer.]

**NS 425 Nutrition Communications and Counseling**

Spring. 3–4 credits. Prerequisites: NS 115, NS 245. S-U grades optional. Lec T 11:15. Section F 9:05–11:00 or F 1:25–3:20. S. Travis.

Students will understand the theoretical basis of effective health promotion communications and develop effective nutrition communication skills through application in a variety of settings. The course will provide hands-on experiences in counseling, educational program development, and oral and written communications.

**NS 431 Mineral Nutrition and Chronic Disease**

Fall. 2 credits. Prerequisites: NS 331, An Sc 410, or permission of instructor. S-U grades optional. T R 11:15. C. McCormick.

We will evaluate the evidence that diet plays a role in osteoporosis and hypertension and whether iron status affects the development of heart disease and inflammation. A goal of the course is to review the data upon which recommendations for daily nutrient intakes are currently based. Class discussion of key research articles will be conducted and evaluated.

**NS 441 Nutrition and Disease**

Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. M W F 10:10; F 8:00. V. Utermohlen.

Study of the anatomical, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care. Topics covered include: nutritional assessment, nutritional pharmacology, starvation, infection, trauma, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

**NS 442 Implementation of Nutrition Care**

Fall. 3 credits. Prerequisites: NS 247, concurrent registration in NS 441 (or equivalent background in either course). S-U grades optional. Lec M W F 9:05. A. Kendall.

Development of skills necessary to implement nutrition care in clinical settings: nutrition screening, dietary assessment, principles of medical nutrition therapy, menu planning for disease states, the role of other allied health practitioners in assuring nutritional health, and reimbursement and legislation in dietetics practice.

**NS 450 Public Health Nutrition**

Spring. 3 credits. Prerequisites: NS 115, and one course dealing with population-level studies, e.g., NS 245, HDFS 150, PAM 201, PAM 303, RSOC 100, RSOC 200. M W F 11:15. K. Rasmussen, D. Pelletier.

Public health nutrition is the major professional career track for nutritionists outside of dietetics. It deals with efforts to improve the diets and nutritional status of whole populations by working at the community, state, and national level. This course helps prepare students to work in public health nutrition by describing methods used in the assessment of nutrition problems, development of nutrition-related policies, and delivery of health, nutrition, and food assistance programs.

**NS 451 Epidemiology and Health of Human Communities**

Fall. 3 credits. Prerequisite: one semester of statistics (can be taken concurrently).  
M W F 1:25. E. Frongillo.

Examines through a series of case studies, the role of epidemiological investigation in understanding, assessing, and improving the health and nutrition of human communities and populations. Students will read and discuss scientific research and public policy literature on specific topics of current interest. Emphasis is on the conceptualization of epidemiology as an ecological science that studies the interdependence and interaction of humans with their social, cultural, and physical environment. Intended for advanced undergraduates and graduate students with an interest in health, human biology, nutrition, or epidemiology.

**[NS 475 Molecular Nutrition and Development]**

Spring. 2 credits. Prerequisites: Chem 207–208 or equivalent, Chem 357–358 or equivalent, BioBM 330 or equivalent. S-U grades optional. T R 9:05. Offered alternate years. Next offered 2001–2002. P. Stover, D. Noden.

This course explores the role of maternal nutrition, maternal genotype, and placental function in mammalian embryo development. The role of vitamins and nutrients including folic acid, vitamins A and D, iron, and cholesterol in cellular and morphogenic processes during development are discussed at the molecular level. The course is based on the current primary literature and concentrations on the modern experimental approaches used to address these relationships including mutagenic, transgenic, cell and fetal culture models.]

**NS 488 Applied Dietetics in Foodservice Systems**

Spring. 3 credits. Limited to 27 students. Prerequisites: NS 378, Micro 290. Laboratory preregistration during course preregistration is required in 309 MVR. White lab coat is required. Approximately \$25.00 will be needed for special supplies/activities. Lec M W 9:05; labs, M or T or W 1:30–6:00. M. Kamp.

Students will gain experience in facility design; equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; recipe development and volume food production; computer-assisted management; employee training; applied safety and sanitation standards; and will develop other skills required to operate/manage a foodservice program. The application of quality management in food service operations and facility management is stressed. Laboratories will be arranged through Cornell Dining.

**NS 498 Honors in Nutritional Sciences**

Spring. 1 credit. Limited to students admitted to the division honors program. Students may register in NS 499 concurrently. M or F 2:30. M. Kazarinoff and division faculty.

Juniors (Mondays). Discussion of research opportunities in nutrition and orientation to research facilities. Delineation of honors research problems in consultation with faculty mentors. Seniors (Fridays). Workshop sessions on honors thesis and oral presentation preparation.

**NS 499 Honors Problem**

Fall and spring. Credits to be arranged. Open only to students in the division honors program. M. Kazarinoff and division faculty.

An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

**NS 600 Special Problems for Graduate Students**

Fall or spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty.

Emphasis on independent advanced work. Experience in research laboratories in the division may be arranged.

**NS 601 Proteins and Amino Acids (also Animal Science 601)**

Spring. 2 credits. Prerequisites: physiology, biochemistry, and nutrition. Offered alternate years. W F 12:20. R. E. Austic.

The course emphasizes the dynamic aspects of protein digestion and absorption, amino acid transport, and amino acid and nitrogen metabolism and their relationships to the nutritional requirements for amino acids.

**NS 602 Lipids (also Bio Sci 619)**

Fall. 2 credits. T R 11:15. A. Bensadoun. Advanced course on biochemical, metabolic, and physiological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein receptors, lipid transfer factors, lipolytic enzymes, and atherosclerosis.

**NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also An Sc 603)**

Fall. 2 credits. Letter grade only. Prerequisites: biochemistry, physiology, and nutrition. T 2:20–4:25. Offered alternate years. X. G. Lei, G. F. Combs, Jr.

The course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression regulation and mammal health disorders associated with individual elements. Methodology and facility of mineral research is also discussed.

**NS 604 The Vitamins (also An Sc 604)**

Fall. 2 credits. T R 10:10. G. Combs. Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in nutritional and biochemical interrelationships with other nutrients and metabolites.

**NS 605 Nutritional Biochemistry Colloquium**

Fall and spring. 1 credit. S-U grades only. R 12:20. Nutritional Biochemistry faculty. Nutritional biochemistry colloquium is a graduate seminar series that focuses on recent advancements in biochemical nutrition. Weekly presentations are made by faculty, postdocs, and graduate students and are based on the primary literature. The presentations are followed by a discussion involving all participants.

**NS 607 Nutrition as an Integrating Discipline: Concepts and Paradigms**

Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of the instructor. M W F 10:10. M. Kazarinoff, D. Pelletier, and division faculty.

An overview course for beginning graduate students which introduces them to the full breadth of nutritional science disciplines, including quantitative and qualitative sciences. Also suitable for seniors as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. This semester the course uses Vitamin A as the example. Emphasis will be placed on the integration of factual and conceptual knowledge to solve nutrition problems in human societies.

**NS 611 Molecular Toxicology (also Toxicology 611)**

Spring. 3 credits. Prerequisite: Toxicology 610 and a full-year 400-level course in biochemistry or equivalent. S-U grades optional. TBA. S. Bloom, R. Dietert.

A study of the fundamental biochemical mechanisms of absorption, transport, metabolism, and excretion of drugs, carcinogens, and toxicants. Emphasis on oxidative and conjugative pathways of metabolism and of environmental and nutritional factors that influence toxicant metabolism and disposition. Methods of evaluating in vivo and in vitro metabolism are also addressed.

**[NS 612 Methods of Assessing Physical Growth in Children]**

Spring. 3 credits. Limited to graduate students and undergraduate students who have permission of the instructor. A previous course in statistics required. S-U grades optional. Lec T 1:25; lab, R 1:25–4:25; disc T 2:15–3:05. Not offered 2000–2001. J. Haas.

A laboratory course to train students in methods and techniques used to assess the physical growth and development of children. The methods explored are those applicable for field, community, and clinical studies and cover anthropometry, body composition, skeletal age, maturity indicators, physical fitness, and energy expenditure.]

**[NS 614 Topics in Maternal and Child Nutrition]**

Fall. 3 credits. Prerequisites: NS 331, and 222 or 347, Biological Sciences 311, and permission of instructor. T R 8:30–9:55. Not offered 2000–2001. K. Rasmussen.

An advanced course on the role of nutrition during pregnancy and lactation. The feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussions, and a term paper.]

**NS 617 Teaching Seminar**

Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S-U only. C. Bisogni, D. Way.

Individualized instruction focusing on development of teaching skills for guiding classroom learning in lecture, discussion, and laboratory settings. Preparation of content, presentation, and interaction techniques and evaluative methods are emphasized in relation to the student's specific teaching assignment.

Videotaped simulations provide opportunity for practice and analysis of teaching behaviors.

#### **NS 618 Teaching Experience**

Fall or spring. 0 credit. Limited to division graduate students and students who have permission of instructor. S-U only. C. Bisogni.

Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

#### **NS 619 Field of Nutrition Seminar (also Animal Science 619)**

Fall or spring. 0 credit. S-U only. M 4:00. Faculty and guest lecturers.

Lectures on current research in nutrition.

#### **[NS 620 Food Carbohydrates (also Food Science 620)]**

Spring. 2 credits. Prerequisites: Biological Sciences 330 or equivalent. Letter grades only. T R 10:10. Offered alternate years.

Next offered 2001-2002. J. Brady, B. Lewis.

A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.]

#### **NS 626 Special Topics in Food**

Fall. 2 credits. TBA. B. Lewis.

Discussion of current research on specific topics related to functional foods and nutraceuticals/phytochemicals.

#### **NS 630 Anthropometric Assessment**

Spring. 1 credit. Prerequisite: NS 331 or equivalent and permission of the instructor. 5 weeks only. W 1:25-4:25. J. Haas.

Topics covered in this lecture/lab course are: biological basis of anthropometry for nutritional status assessment, quality control of anthropometric data, applications to special groups (infants, children, adolescents, pregnant women, and elderly), statistical analysis and presentation of anthropometric data, references standards and interpretation, measurement techniques of anthropometry, and body composition assessment.

#### **[NS 637 Epidemiology of Nutrition**

Spring. 3 credits. Limited to graduate students. Prerequisites: Biometry 601 and concurrent registration in Biometry 602 or NS 641 or equivalent knowledge. Basic knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. TBA.

Not offered 2000-2001. J-P. Habicht.

This course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Principles of using nutritional information in decision making are presented. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.]

#### **[NS 638 Epidemiology of Nutrition Seminar**

Spring. 3 credits. Reserved for graduate students planning field intervention studies; by permission of instructor.

Prerequisite: NS 637. TBA. Not offered 2000-2001. J-P. Habicht.

Covers the meta-analysis, design, measurement, and analytic issues involved in developing, implementing, and analyzing studies of field interventions with nutritional impact.]

#### **NS 639 Epidemiology Seminar (also Statistics and Biometry 639)**

Spring. 0-1 credit. Limited to graduate students; others by permission of instructor. Contact P. Cassano 255-7551 for permission and credit information. S-U grades only. M 12:20. P. Cassano.

This course will develop skills in the preparation and interpretation of epidemiological data by discussing current research topics and issues.

#### **NS 640 Social Science Theories in Nutrition**

Fall. 3 credits. Limited to 20 graduate students. T R 10:10-12:05. J. Sobal.

Social science theories and paradigms from sociology, psychology, anthropology, economics, political science, geography, and history that contribute to understanding food, eating and nutrition will be discussed to understand how theories apply to nutrition topics, issues, and problems.

#### **NS 644 Community Nutrition Seminar**

Fall and spring. Non-credit. S-U only. Fall M 11:15, spring M 12:20. A. Gillespie and Cornell Community Nutrition faculty.

This seminar, sponsored by the Cornell Community Nutrition Program, focuses on research presentations in nutrition education and other areas of community nutrition. Cornell faculty, graduate students, and invited outside speakers present research proposals, results from ongoing research, theoretical bases for research, program evaluations, and discuss current programs and issues in community nutrition. The format varies but always includes discussion by participants.

#### **NS 646 Seminar in Physicochemical Aspects of Food**

Spring. 1-3 credits. Prerequisite: a college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25-2:40. B. Lewis, B. Parker.

An introduction to physicochemical aspects of food, for graduate students who have had limited or no work in this area. The seminar uses the lectures of NS 345 as a basis for supplementary readings and critical review of research on selected topics.

#### **NS 650 Assessing Food and Nutrition in a Social Context**

Fall. 4 credits. Prerequisite: course in Social Sciences. S-U grades only. T R 1:25-2:40. D. Pelletier, G. Peltó.

Food and nutrition problems in developed and developing countries may manifest themselves in biological or functional terms but their causes and solutions ultimately are rooted in the socio-political world. This course provides multidisciplinary perspectives and some community experiences needed to assess and analyze the social context of nutrition problems. The course is relevant to developed and developing countries and to research and practice related to community nutrition as well as nutrition policy.

#### **NS 651 Food and Nutrition Action in a Social Context.**

Spring. 3 credits. Prerequisites: at least 1 course in social sciences; NS 650 strongly recommended. S-U grades only. T R 1:25-2:40. D. Pelletier, G. Peltó.

This course builds upon the perspectives developed in NS 650. It provides a framework for combining socio-political considerations and analytical criteria in the planning, implementation, and evaluation of nutrition actions at community and policy levels. Case studies from the United States and developing countries are used extensively for examining a wide range of nutrition actions from the perspective of this integrated framework.

#### **NS 660 Special Topics in Nutrition**

Fall or spring. 3 credits maximum each term. Registration by permission of the instructor. Division faculty.

Designed for students who want to become informed in any specific topic related directly or indirectly to nutrition. The course may include individual tutorial study, experience in research laboratories, a lecture series on a special topic selected by a professor or a group of students, and/or selected lectures of another course already offered. Topics may be changed so that the course may be repeated for credit.

#### **NS 680 International Nutrition Problems, Policy, and Programs**

Spring. 3 credits. Prerequisite: permission of instructor. T R 11:15-12:30. M. Latham.

Designed for graduate students who want to learn about the important nutritional problems of developing countries. The major forms of malnutrition related to poverty and their underlying causes are discussed. Emphasis is placed on programs and policies that can assist poor countries and communities to improve their nutritional and health status.

#### **NS 681 Nutritional and Public Health Importance of Human Parasitic Infections**

Fall. 2 credits. Prerequisites: graduate student status or permission of instructor. S-U grades optional. M 2:30-4:15. L. Stephenson.

Reviews the scientific evidence on the relationships between human nutritional status and common human parasitic infections. Concentrates on malnutrition (protein-energy malnutrition, anemia) in developing countries. The parasitic infections emphasized are malaria, hookworm, ascariis, schistosomiasis, and trichuriasis. Format is lecture-discussion.

#### **NS 683 Field Studies in International Nutrition**

Spring. 1 credit. Graduate student status or permission of instructor required. Strongly recommended for graduate students doing field research. S-U grades only. Mainly audio-tutorial format. Available as independent study most semesters. TBA. L. Stephenson.

Reviews practical considerations in conducting field research in developing countries, including (1) seeking fundings, (2) experimental design issues, (3) choice of procedures, and (4) planning for and carrying out data collection. Also includes how to (a) construct a C.V., (b) write an abstract and prepare a clear 10-minute talk with legible slides (FASEB formation), and (c) when, where, and how to publish research results. Extensive handouts. Lecture/demonstration/discussion.

**NS 685 Food and Nutrition Policy (also Agricultural Economics 685)**

Spring. 3 credits. Prerequisites: introductory microeconomics, intermediate statistics (through multiple regression), or instructor's permission. M W 2:55-4:10. D. Sahn.

This course examines the role of government policy in alleviating poverty, food insecurity, and malnutrition in developing countries. Topics covered include methodologies for economic policy analysis of time use and food acquisition behavior, the "production" of nutritional outcomes, and the role of price policy and markets. Course readings draw largely on examples from Africa and Asia.

**[NS 690 Trace Element and Isotopic Analysis (also Chemistry 628)]**

Spring. 3 credits. Primarily for graduate students and advanced undergrads. Prerequisite: Chemistry 288 or 390, 302 or Chemistry 208 and Mathematics 112, or permission of instructor. S-U grades optional. T R 11:15. Offered alternate years. Next offered 2001-2002. J. T. Brenna.

Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications. The first five weeks of CHEM 628/NS 690 focus on IRMS instrumentation and are offered as a separate 1 cr. special topics course (NS660).]

**NS 698 International Nutrition Seminar**

Fall and spring. No credit. No grades given. R 12:20-1:10. J-P. Habicht.

This seminar series consists of presentations by Cornell faculty and graduate students, and by invited outside speakers. Speakers cover a range of topics relating to nutritional problems, policy, and programs in the nonindustrialized countries.

**NS 699 Special Topics in International Nutrition**

Fall and spring. 3 credits maximum each term. Registration by permission of instructor. Faculty in International Nutrition Program.

This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It usually consists of tutorial study on an agreed topic. Because the topics change, the course may be repeated for credit.

**NS 700 Current Topics in Toxicology (also Toxicology 698)**

Fall or spring. 1-3 credits. S-U grades optional. TBA. Staff.

A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students will participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding the topic, instructor, and credit, contact the office of the Graduate Field of Environmental Toxicology.

**NS 702 Seminar in Toxicology (also Toxicology 702)**

Fall or spring. 1 credit. S-U grades only. F 12:20. Staff.

The seminar program covers varied topics in biochemical, genetic, nutritional, veterinary, and regulatory toxicology, ecotoxicology, and environmental chemistry. Included are presentations of basic research studies, fundamental concepts, and research activities involving environmental problems of a toxicological nature. Presentations are given by speakers from Cornell and visitors.

**NS 703 Seminar in Nutritional Sciences**

Fall and spring. 1 credit. S-U grades only. T 12:20 or W 12:20. Division faculty.

Presentations of original articles pertinent to the Nutritional Sciences. Students will learn how to make professional presentations and how to critique the presentations by others. In addition, students will read and learn how to interpret original articles published in a wide variety of journals.

**[NS 707 Nutrition as an Integrating Discipline: Evaluation, Criticism, Application]**

Fall. 3 credits. Prerequisites: advanced graduate standing and permission of the instructor. 2-hour class period per week plus discussion and workshop. M 1:25-3:20. Not offered 2000-2001. M. Kazarinoff, K. Rasmussen.

The goal of this course is to provide an integrative capstone learning experience for advanced graduate students with majors or minors in nutrition. Groups of students will focus on a series of special problems in nutrition drawn from those currently faced by nutrition professionals. Special problems may involve assuming the role of consultants, expert committee members or peer-reviewers who are charged with answering questions or formulating recommendations related to research, programs, or policies.]

**NS 899 Master's Thesis and Research**

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

**NS 999 Doctoral Thesis and Research**

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

## OFFICER EDUCATION

Military instruction began at Cornell University in 1868 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program evolves to keep pace with the latest military changes and emphasizes the development of leadership and managerial skills. Cornell's Officer Education Program has produced many outstanding civilian and military leaders.

The Officer Education Programs prepare students for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

### MILITARY SCIENCE

Lieutenant Colonel John M. Keefe, Engineer, United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC Instructor Group

Major Brian Edholm, Military Intelligence, United States Army

Captain Scott Hillmer, Infantry, United States Army

Captain Reginald Snell, Armor, United States Army

### United States Army ROTC Program

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen's role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential. These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes specific courses in military science, more general academic subjects that assure a well-rounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one six-week summer camp at an Army installation), and the opportunity to participate in a number of extracurricular activities. The combination prepares the student for commissioning and effective performance in the many branches of the Army. The student's academic major, academic performance, leadership ability, personal desires, and the needs of the Army determine the branch of the Army in which the student is commissioned upon graduation.

### Requirements for Enrolling

Applicants must be citizens of the United States and be able to obtain a Secret level security clearance prior to being commissioned as lieutenants. (Noncitizens may enroll in selected portions of the program.) Students must meet Army medical requirements. Overall sound mental and physical condition is essential, and students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the Professor of Military Science. Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors. Contracted students must register for letter-grade military science classes and leadership laboratories for the purpose of commissioning into the United States Army.

### Four-Year Program

The Four-Year Program is open to students in their freshman year or, with the approval of military and university authorities, to sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing, if qualified. Under the Four-Year Program students enroll in the Basic Course (Mil S I and II) during the first two years, and the Advanced Course (Mil S III and IV) during the next two years. A total of 12 credits of military subjects are taken. In addition, academic-enrichment courses are required in such fields as written communications, computer science, and military history. All cadets attend a five-week camp, with pay, between the junior and senior years. All cadets participate in physical fitness training three days per week. Each year selected cadets are sent to the Army's Airborne School, Winter Survival School, and Air Assault Course, depending upon availability and student standings within the ROTC program.

### Basic Course (Mil S I and Mil S II)

Students in the first year of the Basic Course take one classroom course in military science in the fall and spring semesters, for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management.

Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrichment. While they do not receive academic credit for these activities, students may receive physical education credit. Typical freshman participation in Army officer education is 48 1/2 program-related hours.

During the fall of the second year, students take a two-credit course in American military history. The course consists of instruction in three primary areas. The first section develops the concept of the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second section focuses on America at war in the nineteenth century. Section three focuses on warfare in the twentieth century and concludes with the prospects of future actions for the military.

During the spring of the second year, students take a one-credit course in map reading and spend approximately two hours a week in practical leadership training, land navigation, and military skills.

### Advanced Course (Mil S III and Mil S IV)

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of Basic Camp, a six-week summer training camp, or prior military training. Students entering the Advanced Course must have the equivalent of four academic semesters remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past performance and desire of each student is evaluated to determine potential for eventual commissioning.

When students are accepted for the Advanced Course or accept a scholarship, they sign a written contract with the U.S. government. Under terms of the contract, they agree to complete the Advanced Course and to accept a commission if offered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve.

Classroom study in the Advanced Course includes one military science course each semester on such subjects as leadership and management, small-unit tactics, and command and staff organization and functions. The two hours a week of practical leadership training continues, and between the junior and senior years all cadets attend a five-week advanced summer camp conducted at Ft. Lewis, Washington.

### Scholarships

Scholarships are awarded on the basis of merit and may be available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay up to \$16,000 toward tuition and mandatory fees. Scholarship cadets and Advanced Course cadets also receive \$200 a month for up to ten months a year. Scholarship cadets also receive \$450 per year toward the cost of text books.

## Commissioning

All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army upon graduation.

## Service Obligations

ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet. Officers beginning active duty attend the Officer Basic Course (normally 10 to 16 weeks) of their assigned branch. Upon completion, officers are assigned to a unit and location determined by the desires of the individual and the requirements of the Army. Officers selected for reserve duty attend the Officer Basic Course, after which they are released to reserve status.

ROTC graduates generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

## Choice of Branch

Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve. They are notified in December of the branch to which they are assigned. Appointment in a chosen branch depends upon the student's academic and officer education performance, degree area, and the needs of the Army at that time.

## Graduate Study

Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own expense. Requests will be considered on the basis of needs of the service. Admission to graduate school is the student's responsibility.

## Benefits

Each cadet in the Advanced Course (Mil S III and Mil S IV) receives \$200 a month for up to 10 months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately \$700. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately \$700 for summer Basic Camp attendance before entering the Advanced Course.

## Military Science Courses

All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

### Freshman Year (Mil S I)

#### Mil S 101 United States Organization for Defense

Fall. 1 credit. Required. B. Edholm. Students examine the U.S. defense structure in terms of organization, mission, personnel, and relationships among and between military forces and branches and departments of the government. The U.S. Army force structure is

examined at all levels. The complexities and magnitude of operating the defense organization are studied to provide a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

#### Mil S 102 Leadership Theory

Spring. 1 credit. Required. B. Edholm. This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organization effectiveness. The student is introduced to the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy are also presented.

### Sophomore Year (Mil S II)

#### Mil S 222 Small Organizational Operations/Land Navigation

Spring. 1 credit. Required. Prerequisite: Mil S 102 or instructor approval. J. Lopez. Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and role-playing exercises. Leadership theories introduced in Mil S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations. The course will also provide practical knowledge of the various forms of topographic representation. Students will use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation on significant environmental influences of physical, social, and climatic factors. Portions of the course offer experience in land navigation and orienteering.

#### Mil S 321 Armed Conflict in Society

Fall. 2 credits. Required. J. M. Keefe. This course provides practical knowledge in American Military History. It is primarily an overview course designed to provide an understanding of the art and nature of warfare and particularly how warfare has affected the United States. The course consists of three primary areas of instruction with an emphasis on American military history. The first area of instruction addresses the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second phase focuses on America at war in the nineteenth century. It places particular emphasis on the American Civil War and the strategy of annihilation versus the strategy of attrition. The final phase looks at warfare in the twentieth century and finishes with an analysis of the future of warfare for the military of the United States.

### Junior Year (Mil S III)

#### Mil S 331 Theory and Dynamics of the Military Team

Fall. 2 credits. Required. R. Brown. After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to leadership responsibilities of the commander as the team coordinator. This course helps

students develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

#### Mil S 332 Leadership in Small-Unit Operations

Spring. 2 credits. Required. Prerequisite: Mil S 331. R. Brown.

This course provides an understanding of the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader's decisions and the process of planning, coordinating, and directing the operations of military units through operation plans and orders.

### Senior Year (Mil S IV)

#### Mil S 441 Leadership, Management, and Ethics for the Junior Military Officer

Fall. 2 credits. Required. J. M. Keefe. An overview of the functions, responsibilities, and interrelationships among small-unit leaders, the commander, and the staff. Detailed discussions focus on actions of small-unit leaders, communication skills, army operations, the logistical support of the army in the field, and the army training system. The course focuses on the dynamics of leadership in battle through the detailed analysis of a series of case studies. Just war theory, ethics, and professionalism are also addressed in a seminar-type environment.

#### Mil S 442 Contemporary Military Environment

Spring. 2 credits. Required. J. M. Keefe. A continuation of Mil S 441. Conferences and seminars examine the techniques of effective military leadership with special attention given to professionalism and ethical considerations in the armed forces during both peacetime and armed conflict. Army operations and basic doctrine are also discussed. This is a capstone course designed to prepare the student for commissioning.

## Practical Leadership Training

### All Army Officer-Education Students

As with many laboratory periods, no credit is given, and participation is required for successful completion of the AROTC program. Students receive physical education credit for the laboratory. Each semester, cadets register for the appropriate leadership laboratory, consisting of physical fitness training three times per week, two hours of military training each week, and one or two weekend training exercises per semester.

#### Mil S I Leadership Laboratory I

Fall.	Spring.
0 credits. S-U.	0 credits. S-U.
Mil S 151	Mil S 152

Mil S I cadets meet for two hours each week to learn a variety of military skills including rappelling, first aid, drill and ceremonies, weapons familiarization, and physical fitness training.

#### Mil S II Leadership Laboratory II

Fall.	Spring.
0 credits. S-U.	0 credits. S-U.
Mil S 251	Mil S 252

Cadets meet for two hours each week as members of the cadet organization to participate in practical leadership exercises. Types of practical activities include rifle

marksmanship, orienteering, drill and ceremonies, signal communications, physical fitness training, first aid, tactics, and field exercises.

#### **Mil S III Leadership Laboratory III**

Fall. 0 credits. Spring. 0 credits.  
Required. S-U. Required. S-U.  
Mil S 351 Mil S 352

Cadets meet for two hours a week and some weekends to prepare for a five-week summer camp that follows their junior year. Emphasis is on the development of individual practical and leadership technique skills. Cadets rotate through leadership positions to develop an ability to apply decision-making processes to a myriad of situations. Cadets also acquire technical expertise and proficiency in signal communications, physical fitness, drill and ceremonies, rappelling, orienteering, tactics, water survival, and other military skills.

#### **Mil S IV Leadership Laboratory IV**

Fall. 0 credits. Spring. 0 credits.  
S-U. Required. Required. S-U.  
Mil S 451 Mil S 452

Senior cadets plan and operate the leadership laboratory programs for Mil S I-III cadets. The development of planning and supervisory skills is emphasized. Cadets have an opportunity to practice leadership skills developed during previous ROTC training and summer camp experiences. Includes two to three hours a week devoted to physical fitness.

#### **Professional Military Education (PME) Requirements**

In addition to the ROTC classes and leadership laboratories listed above, a number of courses are required as part of the contracted student's academic program. These courses are offered by the university and round out the student's professional education. The PME component of the ROTC program requires at least one college course in each of the following areas: communication skills, military history, and an introduction to computers. These courses must be completed prior to graduation and commissioning. Courses that meet these requirements are approved by the Professor of Military Science.

## **NAVAL SCIENCE**

Captain J. Alley, United States Navy, Professor of Naval Science and Commanding Officer, Naval ROTC Unit

Lieutenant Colonel R. Minor, United States Marine Corps

Lieutenant J. Cleary, United States Navy

Lieutenant J. Lankford, United States Navy

Lieutenant J. Biondi, United States Navy

The objective of the Naval Officer Education Program is to prepare selected students for service as commissioned officers in the United States Navy or United States Marine Corps by supplementing their undergraduate education with instruction in essential concepts of naval science and fostering development of leadership, integrity, and dedication to their country and the naval services. The program is compatible with most undergraduate major fields of study, including five-year baccalaureate degree programs on a case-by-case basis.

The objective is achieved through a broad program, normally covering four years, that

combines specific courses in naval science and specified academic subjects. These courses supplement weekly professional development sessions in which the practical aspects of naval science and leadership procedures are stressed. It also includes at least one summer-at-sea period.

Non-naval officer education students: Though the Navy-Marine Corps Program has been designed to prepare future officers, naval science courses are open to all students at Cornell as space limitations allow.

### **Requirements for Enrollment**

An applicant for the Naval ROTC program at Cornell must be a citizen of the United States. Applicants must have reached their seventeenth birthday by June 30 of the entering year and be less than 27 years of age on June 30 of the calendar year in which they are commissioned. Waivers of the upper age limit may be available for applicants who have prior active duty military service. Applicants must also meet physical and medical requirements. Interested students can visit the Naval ROTC Unit in Barton Hall or contact their local recruiter.

### **Programs**

There are two programs: the Scholarship Program and the College Program. They differ primarily in benefits to the student.

### **Scholarship Program**

The Scholarship Program provides approximately 1,000 scholarships in more than 60 universities nationwide to selected students who want to serve in the Navy or Marine Corps. Financial support is provided to students during college preceding the award of the baccalaureate degree.

#### **Benefits**

The program offers scholarships that provide full tuition and are not need-based. While on scholarship, students also receive money for instructional fees, textbooks, nonconsumable supplies, and a \$200-a-month stipend for a maximum of 40 months.

Successful completion of the Scholarship Program leads to a commission in the Navy or Marine Corps Reserve. At Cornell University, over 90 percent of NROTC students have a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.

### **Entering the Scholarship Program**

There are three ways to enter the Scholarship Program:

First, by applying to the national competition each year. This process entails filling out and submitting an appropriate application; being interviewed; having a physical examination; and applying to, and being accepted by, one of the colleges or universities throughout the country that offers an NROTC program.

Second, by enrolling in the College Program at Cornell and being recommended by the Professor of Naval Science for a scholarship after at least one semester in the program.

Third, by entering through the Two-Year Scholarship Program.

## **College Program**

There are two College Programs available. Both lead to a commission in the Naval or Marine Corps Reserve.

Starting in the junior year, each of these programs provides textbooks for naval science courses, uniforms, and a subsistence allowance of \$200 a month.

The regular College Program is four years long. Academic requirements for students in this program are somewhat less than those for scholarship students, as noted in the curriculum section of this booklet.

The Two-Year College Program begins the summer before the junior year, when students attend a required program with pay at the Naval Science Institute in Newport, R.I.

## **Summer Training**

Each summer, students in the Scholarship Program spend approximately four to six weeks on a Navy ship or with a naval activity anywhere in the world for on-the-job training. College Program students attend one summer training session of the same duration between the junior and senior years.

## **Active Duty Requirements**

Scholarship midshipmen commissioned in the Navy or Marine Corps Reserve serve on active duty for a minimum of four years. College program midshipmen commissioned in the Naval or Marine Corps Reserve serve a minimum of three years. In some cases, following commissioning, specialized training such as aviation or nuclear power will add additional active duty requirements.

### **Choice of Assignment**

Graduates have an opportunity to request the duty they prefer upon graduation. These requests are given careful consideration, and every effort is made to assign newly commissioned officers their duty of choice.

Among the assignments available are duty in naval aviation as either a pilot or naval flight officer, on submarines, and on surface ships. Other specialties, such as special warfare or medical service corps, may be available on a limited basis.

## **Marine Corps Options**

The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. One-sixth of the NROTC scholarship students may be Marine selectees who will be designated Marine-option midshipmen. Upon successful completion of the program they will be appointed second lieutenants in the United States Marine Corps Reserve.

Marine-option midshipmen follow the same program as other NROTC midshipmen for the first two years. Beginning with the junior year, Marine-option midshipmen are taught Marine oriented courses by a Marine Officer Instructor. For first class summer training (after the junior year), Marine-option students travel to Quantico, Virginia, where they undergo six weeks of intensive training known as the USMC Officer Candidate School. Upon commissioning the following year as second lieutenants, they are assigned to the Basic School at Quantico, Virginia. After the Basic School, the Marine officer is assigned duty in a variety of occupational fields. Among the

duties available are infantry, aviation, artillery, tracked vehicles, engineering, communications, electronics, supply, administration, and computer science. The officer may serve on board naval vessels or at shore installations of the Marine Corps or Navy, either in this country or overseas.

The Marine Corps has a postgraduate training system similar in objectives and organization to that of the Navy. Marine officers selected for aviation receive flight training at the Naval Air Station, Pensacola, Florida, along with their Navy counterparts.

## Curriculum

A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is a weekly naval professional development session each semester. The second requirement is a naval science course each semester. The last set of requirements consists of other required courses prescribed by the Navy to meet the growing need for more and better technically educated junior officers.

## Naval Professional Laboratories

### Nav S 141-142, 241-242, 341-342, or 441-442

All students in the program participate in one 90-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoons. This period consists of both drill and professional information briefings. Students gain experience in actual leadership situations and at the same time learn the fundamentals of seamanship, military formations, movements, commands, discipline, courtesies, and honors. During information briefings, special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

## Naval Science Courses

All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navy-option students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

### Freshman Year (Navy and Marines)

#### Nav S 101 Fundamentals of Naval Science

Fall. No credit.

A study of fundamental aspects of naval science, including its contributions to sea power, factors, and different warfare communities involved in the physical development of naval forces, resources that must be managed, and prospects for the future. Naval uniforms, customs, and traditions are also covered.

#### Nav S 102 Sea Power and Maritime Affairs

Spring. 3 credits.

Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues gives a historical perspective throughout the course.

### Nav S 157 Principles of Sailing

Fall and spring. Physical education credit. Instruction in basic sailing skills and safety principles. Students sail small boats on Cayuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

### Sophomore Year (Navy and Marines)

#### Nav S 201 Organizational Behavior and Small Group Processes

Fall. 3 credits.

The theme of the course is the "evolving role of the manager, organizational decision maker, and leader." The course will begin by briefly studying the theoretical principles of management and will progress through practical skills of managers and leaders. Lectures, reading assignments, films, and discussions should provide students with an excellent opportunity to wrestle with complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish assigned responsibilities leading men and women in today's demanding and increasing "hi-tech" naval environment.

#### Nav S 202 Naval Ship Systems I (also Mechanical and Aerospace Engineering 101)

Spring. 3 credits.

An introduction to primary ship-systems and their interrelationship. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems.

### Junior Year (Navy)

#### Nav S 301 Principles of Navigation (also Agricultural Engineering 305)

Fall. 4 credits.

An introduction to the fundamentals of marine navigation emphasizing piloting and celestial navigation procedures. The course covers coordinate systems, chart projections, navigational aids, instruments, compass observations, time, star identification, use of the nautical almanac, tides and currents. Electronic navigation systems are discussed.

#### Nav S 302 Naval Operations

Spring. 3 credits.

The course covers the application of the nautical rules of the road and maneuvering board in order to avoid collisions at sea. Other aspects of naval surface ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

### Senior Year (Navy)

#### Nav S 401 Naval Ships Systems II (Weapons)

Fall. 3 credits.

The principles and theories used in the development of naval weapons systems are examined. Initially, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary systems for computing, stabilizing, tracking, and weapons control and delivery.

#### Nav S 402 Leadership and Ethics

Spring. 3 credits.

A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is tailored for the midshipman to provide an

understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student will learn various aspects of Navy leadership and ethical decision making. Marine-option students may also take this course.

### Junior or Senior Year (Marine Options)

#### Nav S 310 Evolution of War

Spring. 3 credits.

A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities and values; the evolution of warfare, including principles of war, weapons, and associated equipment; and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

#### Nav S 410 History of Amphibious Warfare

Spring. 3 credits.

The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis will be on amphibious operations conducted in the central Pacific during World War II and the future of amphibious operations.

## Other Required Courses

### Navy Option Scholarship Program

To be eligible for a commission in the United States Navy, midshipmen must successfully complete all the requirements for a baccalaureate degree in any field of study offered by Cornell University and complete courses in the following subjects (specified courses to be approved by the Professor of Naval Science):

American military affairs or national security policy (one semester)

English (one year)

calculus (one year)

calculus-based physics (one year)

computer science (one semester)

The calculus requirement must be satisfied by the end of the sophomore year and the physics requirement by the end of the junior year.

Although free choice of academic majors is permitted, students are encouraged to pursue majors in engineering and the physical sciences to meet the technological requirements of the modern Navy.

### Navy Option College Program

Navy-option College Program students must complete one year of college-level study in mathematics, physical science, and English as a prerequisite for commissioning. The mathematics course must be completed by the end of the junior year; the physical science course by the end of the senior year. In addition, one term of computer science is required. College Program students who desire entry into the Navy-option Scholarship Program should fulfill all of the requirements applicable to Navy-option scholarship students if they wish to be eligible and competitive for a scholarship controlled by the Chief of Naval Education and Training.

### Marine Option

Any midshipman, in either the Scholarship Program or the College Program, who completes all of Cornell University's degree requirements in any academic major, is eligible for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marine-option students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option student counterparts. Two semesters of courses (a minimum of 3 hours each) in the subject area of American Military Affairs or National Security Policy are required. One semester of a modern foreign language must be completed.

### Extracurricular Activities

The NROTC midshipman at Cornell is offered a broad range of activities, including sail training and a comprehensive intramural sports program. Midshipmen participate in a myriad of social events, including the annual Navy/Marine Corps Birthday Ball.

## DEPARTMENT OF AEROSPACE STUDIES

Colonel James L. Wilson, Jr., United States Air Force, Professor of Aerospace Studies and Commander, Air Force ROTC Detachment 520

Captain Daniel P. McAlister, United States Air Force

Lieutenant Michael Mowry, United States Air Force

The objective of the Air Force Officer Education Program at Cornell is to prepare men and women for positions as officers in the United States Air Force. The program is designed to teach students about the mission and organization of the Air Force, the historical development of airpower, leadership, and management. Students study national security policy and the role of the military in a democratic society. This program includes specific courses in aerospace studies and practical leadership laboratories.

### Requirements for Enrollment

The Air Force Officer Education Program is open to any qualified undergraduate or graduate student enrolled in any major field of study. An applicant must be a United States citizen to become a commissioned officer. Noncitizens may enroll and will receive certificates acknowledging completion of the course but cannot receive a commission.

All applicants receive physical examinations at no cost and must meet certain physical requirements to be accepted. Students who are interested in qualifying for flying categories (pilot or navigator) must meet more stringent physical requirements. In addition, students enrolled in the commissioning program must meet specified physical fitness requirements.

Though the program is designed to prepare future Air Force officers, the Department of Aerospace Studies' academic courses are open to all students at Cornell.

### Four-Year Program

The Four-Year Program is open to all qualified freshmen. Sophomores may also enter a condensed version of the four-year program after coordination with the AFROTC staff. Students in a five-year program may enroll during their freshman, sophomore, or junior year.

Veterans of the U.S. armed forces and students entering Cornell from military schools may receive advanced standing, subject to approval by the Professor of Aerospace Studies.

The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For scholarship cadets, the first year of the GMC carries no military commitment, and students may withdraw at any time. For nonscholarship cadets, both years of the GMC carry no military commitment, and students may withdraw at any time.

### General Military Course

Students in General Military Courses (GMC) take a one-credit-hour Aerospace Studies course each semester. During the freshman year, the student examines the organization and mission of the United States Air Force and the environment of the Air Force officer. In the sophomore year, the student studies the history and development of American air power. In both years, officership and professionalism within the United States Air Force are emphasized.

Students also spend two hours a week in a leadership laboratory. Leadership laboratory provides cadets with the opportunity to put into practice the skills they learn in their aerospace studies classes. These laboratories focus on the development of officer qualities through such activities as drill and ceremonies, group leadership problems, confidence-building exercises, and guest lecturers. In addition, all students participate in summer field training for four weeks between their sophomore and junior years.

### Professional Officer Course

The Professional Officer Courses (POC) provide a two-year advanced program of instruction. Students who are accepted for the POC must have successfully completed or validated the basic course and must meet academic and physical standards. Each cadet accepted into the POC must sign an agreement to complete the program and accept, if offered, a commission in the United States Air Force upon graduation.

Classroom study in the POC is a three-credit-hour course each semester. In the junior year, cadets study Air Force leadership and management at the junior officer level. During the senior year, cadets study the elements of national security and the military's role in American society. Leadership laboratory requires two hours a week in the junior and senior years. In leadership laboratory, cadets are exposed to advanced leadership experiences and apply principles of leadership learned in the classroom.

### Two-Year Program

The Two-Year Program consists of the last two years (Professional Officer Courses) of the regular Four-Year Program plus a five-week summer training course preceding enrollment.

The Two-Year Program is open to all qualified students with two years of academic study remaining at Cornell (graduate or undergraduate) or at schools supported under a crosstown agreement. Applications are accepted from October through April of the academic year preceding the applicant's planned entry into the program. Selectees are then required to complete a five-week summer training program at government expense.

### Scholarships

The Air Force offers four-year scholarships to high school seniors and two- and three-year scholarships to college students. Four-year scholarships are offered on a competitive basis in specified majors to high school seniors. Scholarship information can be obtained from a high school guidance counselor, from Air Force ROTC officers at Cornell (AFROTC phone number is 607-255-4004), from a local Air Force recruiter, or from AFROTC/RROO, Maxwell AFB, AL 36112-6106, 334-953-2093, extension 2093. The deadline for submitting a four-year scholarship application is December 1 of the year preceding the academic year in which a student wants to enter the program. Students should apply early.

### Scholarships for two and three years.

Applications for these scholarships should be made to the Professor of Aerospace Studies during the freshman or sophomore years of college. All selections are based on the student's major, scores achieved on the Air Force Officer Qualifying Test, the student's overall grade point average, and the recommendation of the Professor of Aerospace Studies. Scholarships include amounts ranging from \$3,000 per year to full tuition, fees and books, and provide a \$200 monthly nontaxable allowance during the school year. Scholarships do not include the cost of room and board.

### Fees

An initial uniform deposit of \$50 is required on entry into AFROTC. Prior to commissioning, cadets may purchase uniforms with their deposit or return uniforms and receive their deposit back.

### Benefits

All cadets in the advanced program (POC)—whether they are on scholarship or not—receive a \$200-a-month, nontaxable subsistence allowance during the academic year. During the four- or five-week summer field training (see below), each cadet receives a pay allowance plus an allowance for travel to and from the field site. Textbooks and supplies required for Department of Aerospace Studies courses are provided.

All cadets are eligible to participate in AFROTC-sponsored field trips made to Air Force bases throughout the country as well as voluntary summer programs for professional development. Scholarship and advanced cadets (POC) are entitled to space-available travel on Air Force aircraft flying within the continental United States.

### Field Training

There are two types of field training: a four-week course for cadets in the Four-Year Program and a five-week course for Two-Year Program applicants. Students in these

programs normally attend field training between their sophomore and junior years.

Field training is designed to stimulate the development of military leadership skills through meaningful experiences. The curriculum consists of aircraft, aircrew, and survival orientation; junior officer training; physical training; small arms training; a social-actions program; and supplemental training. The five-week training program includes sixty hours of Air Force ROTC academic course work that substitutes for the freshman and sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many Advanced Training Programs. These programs include the Professional Development Program, Air Force Academy Free-Fall Parachute Training, the British Royal Air Force (RAF) Exchange Program, Research and Development Experiences, the Academy Soaring Program, and Army Airborne Training.

### Commissioning Obligations

All students who successfully complete the AFROTC advanced program (POC) are awarded a baccalaureate degree, tendered a commission, and enter the Air Force as second lieutenants.

Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for ten years after completing flying training. Navigators serve six years after completing training.

### Air Force Careers

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officers' preferences. Students in the engineering-scientific category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, the biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the nontechnical category can anticipate assignments in manpower management, information management, logistics, law enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields. They will be placed in positions of responsibility and be given the opportunity to further their development in leadership and management skills. Their specific educational expertise may be required.

Any undergraduate major is suitable for those who are qualified and interested in entering the space and missile career fields or becoming pilots, navigators, or air battle managers. After completion of flying training, personnel are assigned to a specific type of aircraft.

### Curriculum

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and senior years. There are no prerequisites for any Aerospace Studies courses.

#### Freshman Year

##### **Air S 161 The Foundations of the United States Air Force I**

Fall. 1 credit.

This is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officership and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

##### **Air S 162 The Foundations of the United States Air Force II**

Spring. 1 credit.

Continuation of Air S 161.

#### Sophomore Year

##### **Air S 211 The Evolution of USAF Air and Space Power I**

Fall. 1 credit.

This course is designed to examine general aspects of air and space power through a historical perspective. Using this perspective, the course covers a time period from the first balloons and dirigibles to the role of air power in Bosnia-Herzegovina. Historical examples are provided to extrapolate the development of Air Force capabilities (competencies) and missions (functions) to demonstrate the evolution of what has become today's USAF air and space power. Furthermore, the course examines several fundamental truths associated with war in the third dimension: e.g., Principles of War and Tenets of Air and Space Power. As a whole, this course provides the students with a knowledge-level understanding of the general element and employment of air and space power from an institutional, doctrinal, and historical perspective. In addition, students will continue to discuss the importance of the Air Force Core Values by examining operational examples and historical Air Force leaders while continuing to develop their communication skills.

##### **Air S 212 The Evolution of USAF Air and Space Power II**

Spring. 1 credit.

Continuation of Air S 211.

#### Junior Year

##### **Air S 331 Air Force Leadership Studies I**

Fall. 3 credits.

This course is a study of leadership, quality management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course.

##### **Air S 332 Air Force Leadership Studies II**

Spring. 3 credits.

Continuation of Air S 331.

#### Senior Year

##### **Air S 401 National Security Affairs/Preparation for Active Duty I**

Fall. 3 credits.

This course examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles of this course.

##### **AS 402 National Security Affairs/Preparation for Active Duty II**

Spring. 3 credits.

Continuation of Air S 401.

#### Leadership Laboratory Courses

All Air Force cadets spend two hours a week throughout the academic year in a leadership laboratory, for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in an evening formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

##### **Air S 141-142 Initial Military Experiences**

Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform. Field trip to a local military installation.

##### **Air S 241-242 Intermediate Military Experiences**

Develops skills in giving commands for drill and ceremonies. Introduction to the Air Force base environment in which the Air Force officer functions. Includes a look at career areas available based on academic majors. Students participate in leadership situations through military drills and ceremonies. Field trip to a local military installation.

##### **Air S 341-342 Junior Officer Leadership**

Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets also gain insight into the general structure and progression patterns common to selected Air Force officer career fields.

##### **Air S 441 Advanced Leadership Experiences**

Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and managerial techniques with individuals and groups and participate in self-analysis of leadership and managerial abilities.

##### **Air S 442 Precommissioning Laboratory**

Factors that facilitate transition from civilian to military life are reviewed. The need for military security, base services and activities, personal finances, travel regulations, and social obligations are introduced.

## DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS

### ADMINISTRATION

Alan E. Gantert, director

### COURSES

The courses and fees described in this catalog are subject to change or cancellation at any time by official action of Cornell University. For current fee information on physical education courses call 255-4286; for outdoor education courses, call 255-6415 (ext. 2).

Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at the physical education course registration or may be found on "Bear Access," a package of software for accessing a variety of network services at Cornell, or on the web ([www.athletics.cornell.edu/PE](http://www.athletics.cornell.edu/PE)). Course fees are billed through the Office of the Bursar.

Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed.

### Aquatic Courses

#### Lifeguard Training

Fall and spring. Fee charged. Prerequisite: swimming test consisting of 500 yards, demonstrating 3 strokes, treading water without the use of hands, and retrieving a brick from 7 feet of water. 3 classes a week.

An American Red Cross certification course. Practice and execution of lifeguarding first aid and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

#### Lifeguard Training Instructor

Spring. Fee charged. Prerequisites: current Red Cross ICT or instructor card, written and skill tests in lifeguarding, first aid, and CPR techniques. Students must not miss first class. 2 classes a week.

American Red Cross lifeguarding instructor and CPR-FPR certifications are awarded upon successful completion.

#### Scuba, Open-Water

Fall, spring, and summer (6 weeks). Fee charged.

Program includes classroom work, skill training in a pool, and open-water training in Cayuga Lake. P.A.D.I. open water certification awarded upon successful completion.

#### Scuba, Advanced Open-Water

Fall and spring. Fee charged.

Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

#### Rescue Diver

Fall and spring. Fee charged.

Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

#### Dive Master

Fall and spring. Fee charged.

Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

#### Specialty Scuba Diving

Fall and spring. Fee charged.

Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

#### Scuba Diving Trips

Spring. Fee charged.

This course is offered during the spring intersession period. Scuba trips to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

#### Swimming, Introduction to (ARC)

Fall, spring, and summer. (6 weeks).

Instruction and practice in skills leading to passing the basic swimming proficiency test.

#### Swimming, Advanced Beginning (ARC)

Spring.

Ideal for all who have taken one term of Beginning Swimming, regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rotary breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student's confidence and competence.

#### Swimming, Intermediate (ARC)

Fall and spring.

Practice of basic skills and five basic strokes: front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

#### Swimming, Advanced (ARC)

Fall and spring.

Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, inverted breaststroke, sidestroke, overarm sidestroke, trudgeon, and butterfly.

#### Swimming Conditioning

Fall and spring. Prerequisite: reasonable swimming ability.

Introduction to, and practice of, different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning and not an instructional course.

#### Water Safety Instructor

Spring. Fee charged. Prerequisite: passing of written and skill water tests which are given on the first day.

American Red Cross water safety instructor certification is awarded upon satisfactory completion of the course. This is not a course for a casual participant. Approximately 45 hours of work is required.

#### Water Safety Instructor Refresher Course

Spring. Fee charged.

Selected sessions of the water safety instructor certification course.

### Bowling Courses

#### Bowling

Fall and spring. Fee charged.

For the beginning and intermediate bowler. Shoe rental is included in the fee.

### Dance Courses

Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic accuracy, clarity of body design, and fullness of feeling. Auditions are required for admission to all advanced courses, since they require the mental and physical ability to perform more-complex phrases in various styles.

#### Ballet I

Fall and spring.

#### Ballet II

Fall and spring.

#### Ballet III

Fall and spring.

#### Ballroom Dancing

Fall, spring and summer. Fee charged. One class a week, Helen Newman Hall.

Students and their partners must sign up at course registration.

Includes instruction in the waltz, swing, cha cha, calypso, tango, and others.

#### Belly Dancing

Fall and spring. Fee charged.

Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms, then put them together in a dance to music of the Middle East.

#### Introduction to Swing Dance

Fall and spring. Fee charged.

No partners are needed. Beginners can expect to develop significant capacity for enjoyment of two forms of swing dance: jitterbug and street boogie. Partners will be rotated throughout the course. Effort will be made at registration to equalize male and female ratios.

#### Latin Dance

Fall and spring. Fee charged.

Partner sign-in required. This is an introductory course that will teach salsa, mambo, Latin and meringue. Emphasis on listening, feeling, and expressing Latin rhythms with precise detail and technique.

#### Modern Dance I (also THETR 124)

Fall and spring.

#### Modern Dance II (also THETR 232)

Fall, spring, and summer (6 weeks).

#### Modern Dance III (also THETR 306)

Fall and spring.

#### Modern Dance IV (also THETR 308)

Spring.

## Equitation Courses

### Basic, Intermediate, Advanced

Fall, spring, and summer (6 weeks). Fee charged.

All riding classes are held at the Cornell Equestrian Center located on Pine Tree Road near East Hill Plaza. Detailed information will be offered by the equitation staff at the registration sign-up table. Basic—never ridden; Intermediate I—completed basic with knowledge of walk/trot/canter; Intermediate II—walk/trot/canter with control over 2' course; Advanced—strong jumping/dressage skills with experience hunting/showing/eventing. Students must fill out a release form to participate in any riding class.

## First Aid/CPR Courses

### Emergency Response

Fall and spring. Fee charged.

This advanced-level first aid course is the most comprehensive available without NYS certification. Sixty hours of training includes CPR for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic EMT class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is valid for three years. This certification would be appropriate for camp medical directors and those who work closely with pre-hospital medical staff.

### NYS Emergency Medical Technician—Basic

Two-semester course. Fee charged.

This intensive 130-hour course is taught throughout both the fall and spring semesters. Course includes training in CPR for the Professional Rescuer, oxygen administration, airway management, fracture management, bleeding control, expanded patient assessment, spinal immobilization, medical anti-shock trousers, and defibrillation. Students will qualify for the NYS EMT Certification Exam upon successful completion of this course. Rigid attendance and participation requirements are strictly enforced.

## Fishing Courses

### Fly Fishing and Basic Flytying Techniques, Level I

Fall and spring. Fee charged.

Learn the art of tying several of your own artificial flies while you learn the art of fly casting. Students must have a valid NYS fishing license and their own wader boots. All other materials provided.

### Salt Water Fly Fishing

Fall. Fee charged.

Learn the special techniques necessary for salt water fly fishing. This course includes four hours of classroom instruction and four days of fishing over fall break.

## Fitness Courses

### Aerobic Dance

Fall, spring, and summer (6 weeks). Fee charged.

A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

### Body Sculpting

Fall and spring. Fee charged.

### Cardio Crazy

Fall and spring. Fee charged.

The course is designed to acquaint the student with the various types of indoor aerobic training equipment, rowing machines, tread mills, stair machines, exercycles, and Nordic Traks, and to teach them to design a personal fitness program incorporating the equipment.

### 8 O'Clock Rock

Fall and spring. Fee charged.

This class combines the best of the principles of weight training and the cardio training in the 8 O'Clock Rock Class.

### Aerobic Instructor Training

Fall and spring. Fee charged.

The course is designed to train the student to teach aerobics and prepare for the A.F.A.A. Primary Aerobic Instructors Certification Test.

### Fitness and Conditioning

Fall and spring.

Physical fitness program that embodies features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

### Jogging

Fall and spring.

This course will cover running and stretching techniques. A conditioning program with the objective to develop the capacity to run three miles after 12 weeks of training.

### Jogging Tours—Distance Running

Fall and spring.

A course designed for the intermediate runner who can run an average of 3 miles in 30 minutes. Most tours will be 3–4 miles long and will go through campus and nearby countryside.

### Triathlon

Fall and spring.

Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

### Wellness and Fitness

Fall and spring. Fee charged.

"Here's to a Healthier You"—a wellness experience for the busy student. This course will assess the student's physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and have access to the Wellness Program fitness room in Helen Newman Hall. Lectures on nutrition and stress management are also presented. This course has been made possible through the generosity of the Bateman family in memory of Ms. Dorothy Bateman, Cornell's first director of women's sports and physical education (1920 to 1962).

## Golf Courses

### Golf, Introduction to

Fall and spring. Fee charged.

A PGA program of instruction is geared to all levels of experience and ability. The objective is to give beginners enough skill to play, and to give more-advanced players direction in their thinking, practice, and play, through a thorough understanding of fundamentals. Equipment is furnished.

### Golf, Recreational

Fall and spring. Limited to students who are experienced golfers. Fee charged.

Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester's membership.

## Gymnastics Courses

### Gymnastics, Introduction to

Fall and spring.

Introduction to gymnastics deals with a majority of the Olympic events. The course will focus upon beginner-level skills and is open to both male and female participants.

## Ice Skating Courses

### Skating, Introduction to

Fall and spring. For beginning to intermediate skaters. Fee charged.

Students provide their own skates or rent them at Lynah Rink. Course will cover forward and backward skating, turns, and stops.

### Figure Skating, Beginning, Intermediate, and Advanced Levels

Fall and spring. Fee charged.

Instruction and practice in basic figure skating techniques: forward, backward, crossovers, turns, and spirals. Students provide their own skates or rent them at Lynah Rink.

## Martial Arts—Self-Defense Courses

### Boxing, Introduction to

Fall and spring. Fee charged.

The course covers the basic skills of footwork, defensive, and offensive techniques. Skipping rope, shadow boxing, and heavy bag work will be taught as methods for individual aerobic conditioning.

### Boxing, Thai

Fall and spring. Fee charged.

A martial art system developed from the unique culture of Thailand is a blend of art, science, and sport.

### Fencing, Introduction to

Fall and spring. Fee charged.

Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

### Fencing, Intermediate

Spring. Fee charged. Prerequisite:

Introduction to Fencing or the equivalent. Interclass competition is stressed. Equipment is furnished.

### Fencing, Classical

Fall and spring. Fee charged.

Classical fencing is a martial art that uses the practice of the sword to cultivate self-mastery.

### Judo, Introduction to

Fall and spring. Fee charged.

Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

### Judo, Intermediate

Fall and spring. Fee charged.

Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

### Karate, Introduction to

Fall and spring. Fee charged.

A beginning course taught by professional black belt instructors. Involves mastery of basic blocks, kicks, and punches.

### Karate, Advanced

Fall and spring. Fee charged.

Open to those who have taken basic Karate or the equivalent.

**Kung Fu**

Fall and spring. Fee charged.  
Exploration of conditioning and fitness procedures used in the major martial arts, such as karate or judo. Covers circular movement for generating strong blocks, kicks, and punches.

**Self-Defense and Empowerment for Women**

Fall and spring. Fee charged.  
Basic methods of physical protection for women.

**Tae Kwon Do, Introduction to**

Fall and spring. Fee charged.  
A Korean martial art distinguished by emphasis on high and powerful kicks. Basic kicking, punching, and blocking emphasized.

**Tae Kwon Do, Intermediate**

Fall and spring. Fee charged.  
A Korean martial art distinguished by its emphasis on high and powerful kicks. Intermediate-level kicking, punching, and blocking are emphasized.

**Tae Kwon Do, Advanced**

Fall and spring. Fee charged.  
A Korean martial art distinguished by its emphasis on high and powerful kicks. Advanced-level kicking, punching, and blocking are emphasized.

**T'ai Chi Chuan, Introduction to, and Intermediate**

Fall and spring. Fee charged.  
Introduction to T'ai Chi, a system of graceful exercises that aim at nurturing relaxation, deep breathing, and improved circulation.

**Outdoor Education Program**

See the brochure for the Cornell University Outdoor Education Program at registration for more information about courses.

**Climbing Courses****Basic Rock-Climbing**

Fall, spring, and summer. Fee charged.  
Seven afternoons climbing inside on the Lindseth climbing wall.

**Basic Rock-Climbing, for Women**

Fall, spring. Fee charged.  
Seven afternoons climbing inside on the Lindseth climbing wall taught by and for women.

**Basic Rock-Climbing, for 24 and Over**

Fall, spring. Fee charged. Non-credit course.  
Four evenings climbing indoors on the Lindseth wall for people age 25 or older.

**High Adventure 101**

Fall, spring, and summer. Fee charged.  
Six afternoons at local parks and wilderness areas, some classes on indoor Lindseth climbing wall.

**Continuing Rock-Climbing**

Fall, spring. Fee charged.  
Seven afternoons of advanced climbing techniques on the Lindseth climbing wall.

**Ice Climbing**

Spring. Fee charged.  
Four outings to local state parks and gorges.

**Outdoor Top Roping**

Fall, spring. Fee charged.  
Two outings (nights) on the Lindseth climbing wall and two outings at local climbing areas.

**Shawangunks Rock-Climbing**

Fall, spring. Fee charged.  
Four-day climbing camp at the Shawangunks.

**Backpacking Courses****Natural History of the Finger Lakes**

Fall, spring. Fee charged.  
Backpacking skills with a strong environmental focus.

**Backpacking in the Finger Lakes**

Fall, spring. Fee charged.  
Classes lead to two full weekends on the trail.

**Southwest Backpacking**

Spring. Fee charged.  
Spring break trip to the SW deserts and canyons.

**Trail Maintenance**

Fall, spring. Fee charged.  
Work with the local trails club to support and maintain trail systems.

**Wilderness Skills**

Fall, spring. Fee charged.  
Break trip focusing on wilderness travel and living skills.

**Wilderness Survival Skills**

Fall, spring. Fee charged.  
Primitive living skills taught in three classes and a weekend backpack trip.

**Biking Courses****Bike and Mike**

Fall, spring. Fee charged.  
Four full days exploring local countryside.

**Bike Repair, Beginning**

Fall, spring. Fee charged. Non-credit.  
Two evenings of hands-on repair work.

**Bike Repair, Intermediate**

Fall, spring. Fee charged. Non-credit.  
One evening of hands-on repair work.

**Mountain Biking**

Fall. Fee charged.  
Four full days exploring local countryside.

**Canoeing Courses****Canoeing, Adirondacks**

Fall. Fee charged.  
Break trip explores the beauty of the Adirondacks via canoe.

**Introduction to Paddling**

Fall, spring. Fee charged.  
A sampler of beginning canoeing and kayaking.

**Canoe/Camping, Flatwater**

Fall, spring. Fee charged.  
Four full days paddling local waterways including an overnight.

**Canoeing, Moving Water**

Fall, spring. Fee charged.  
Includes a full weekend of river paddling.

**Caving Courses****Caving**

Fall, spring. Fee charged.  
Four days in the fall and two weekends in the spring in Pennsylvania caves.

**Hiking Courses****Day Hiking**

Fall, spring. Fee charged.  
Day outings in the Finger Lakes Region.

**Snowshoeing**

Spring. Fee charged.  
Day outings in the Finger Lakes Region.

**Kayaking Courses****Whitewater Kayaking Day Trip**

Spring. Fee charged. Non-credit course.  
Day excursion for paddlers with basic skills.

**Whitewater Kayaking**

Fall, spring. Fee charged.  
Includes a full weekend of whitewater paddling.

**Pool Kayaking**

Fall, spring. Fee charged.  
Seven-session introduction to whitewater kayaking skills.

**Sea Kayaking**

Fall, spring. Fee charged.  
Break trip exploring various coastal areas.

**Outdoor Leadership****Wyoming Expedition**

Summer. Fee charged.  
Twenty-one day leadership and mountaineering expedition to the Wind River Mountains.

**Outdoor Leadership**

Spring. Fee charged.  
Training course for outdoor education instructors.

**Wilderness Emergency Care, Basic**

Fall, spring, summer (6 weeks). Fee charged.  
Full weekend of wilderness first aid and CPR.

**Wilderness Emergency Care, Advanced**

Fall, spring. Fee charged. Non-credit.  
Two evenings of specialized wilderness care.

**Wilderness First Responder**

Offered in January, over winter break. Fee charged.  
Ten days of instruction and practical application of backcountry first aid. Participants earn CPR and First Responder certifications. Taught by SOLO Wilderness Medical Institute.

**Skiing—Cross-Country Courses****Cross-Country Skiing, Basic**

Spring. Fee charged.

**Cross-Country Skiing, Intermediate**

Spring. Fee charged.

**Cross-Country Ski Day Touring**

Spring. Fee charged.  
Four full-day weekend outings. Emphasis on backwoods touring.

**Telemark Skiing**

Spring. Fee charged.  
Four evenings at Song Mountain Ski Area.

**Personal Growth Courses****Body-Mind**

Fall and spring.  
Activities are drawn from ancient Eastern practices as well as modern Western psychology, and are designed to give the student first-hand experience of the interaction between their own bodies and minds.

**Introduction to Meditation**

Fall and spring. Fee charged.  
This course provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation. The methods serve to evoke the deep relaxation from which heightened awareness and creativity arise.

**Living Routines**

Fall and spring.

Provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation.

**Health Issues for Student Athletes**

Fall and spring.

To promote and encourage lifestyle choices on the part of student athletes that will help them establish and maintain high levels of all-around health, and thereby contribute positively to their academic and athletic achievement. NOTE: This is an NCAA requirement open to sophomore athletes only.

**Relaxation and Stress Management**

Fall and spring.

Introduction to basic relaxation techniques for the reduction of everyday stress. Techniques will be taught that can be used in normal everyday living situations.

**Swedish Massage**

Fall, spring, and summer. Fee charged.

Learn to give a relaxing, stress-reducing Swedish massage. You will master the basic strokes of Swedish massage and learn about their application to the different parts of the body. Students will use oils and lotions as a part of their training.

**Therapeutic Massage**

Fall, spring, and summer. Fee charged.

Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

**Shiatsu Massage**

Fall and spring. Fee charged.

Gain an experimental understanding of your body and learn certain shiatsu massage techniques.

**Yoga, Introduction to**

Fall, spring, and summer (6 weeks). Fee charged.

Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

**Racket Sports Courses****Badminton, Introduction to**

Fall and spring. Helen Newman Hall.

Fundamental shots, scoring, and general play.

**Badminton, Intermediate**

Fall and spring. Helen Newman Hall.

Review of fundamental shots, scoring, and general play.

**Racquetball, Introduction to**

Fall, spring, and summer. Fee charged.

Instruction for beginners. Equipment is furnished. Protective eyewear required.

**Squash, Introduction to, Intermediate**

Fall, spring, and summer. Fee charged.

Classes for appropriate level of play. Equipment is furnished. Protective eye wear required.

**Tennis, Introduction to**

Fall, spring, and summer. Fee charged.

Basic skills taught include forehand, backhand, serve, and volley. Scoring methods taught.

**Tennis, Intermediate**

Fall, spring, and summer. Fee charged.

Review basic strokes plus topspin and underspin. Doubles strategy emphasized.

**Tennis, Advanced**

Fall, spring. Fee charged.

Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

**Tennis, Indoor-Recreational**

Fall and spring. Fee charged.

Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience or a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

**Sailing Courses****Board Sailing (Wind Surfing)**

Fall, spring, and summer (6 weeks). Fee charged.

A Mistral Board Sailing Academy certificate is awarded on successful completion.

**Catamaran, Introduction to**

Fall, spring, and summer (6 weeks). Fee charged.

Learn unique skills necessary for sailing multi-hull catamarans.

**Small-Boat Sailing, Introduction to**

Fall, spring, and summer (6 weeks). Fee charged.

Learn basic skills necessary to sail small sailboats and basic keelboats safely.

**Small-Boat Sailing, Competitive**

Fall and spring. Fee charged.

Vanguard 420 sailboat used for the course. USYRA Rules Book used as a text for the course. Fee includes one-year membership in university sailing team program.

**Water Skiing**

Fall only. Fee charged.

Introductory course for beginning water skiers. Classes will be conducted from East Shore Marina.

**Skiing and Snow Boarding****Downhill Skiing and Snowboarding**

Spring. Fee charged.

Transportation, instruction, ski-lift fees, and skiing time are offered in a package deal. Greek Peak and Song Mountain personnel are present at registration to explain the program and accept fees. Bus transportation to Greek Peak is provided six afternoons a week for six weeks.

**Cross-Country Skiing**—See Outdoor Program.

**Target Shooting Courses****Archery, Introduction to**

Fall and spring. Fee charged. Two classes a week.

Instruction in the care of equipment; seven basic steps for shooting; scoring; practice shooting at 20, 30, and 40 yards.

**Pistol, Introduction to**

Fall, spring, and summer (6 weeks). Fee charged.

Instruction in use of pistol in the three modes of 50-foot competitive target shooting—slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

**Riflery**

Fall and spring. Fee charged.

Instruction and practice in the techniques of target riflery from various shooting positions.

**Trap and Skeet**

Fall, spring, and summer (6 weeks). Fee charged.

Includes lectures and shooting at the Tompkins County Rod and Gun Club range. Guns and shells are furnished.

**Team Sports Courses****Basketball**

Fall and spring.

Fundamental drills in passing, shooting, and dribbling. Scrimmages each class session.

**Ice Hockey, Introduction to**

Fall and spring. Prerequisite: basic skating ability. Fee charged.

Stick handling, passing, and shooting are stressed. Some scrimmaging. Students provide their own skates and sticks; all other equipment is furnished.

**Ice Hockey, Intermediate**

Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey.

This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

**Soccer**

Spring.

Introduction to the game. Includes basic individual skills (passing, trapping, shooting) and team play and strategy.

**Volleyball, Introduction to**

Fall and spring.

Fundamentals of ball handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

**Volleyball, Intermediate**

Fall and spring.

Passing and blocking strategy; scrimmages in class.

**Volleyball, Advanced**

Fall and spring.

Offensive and defensive team strategy is emphasized in class scrimmages.

**Weight Training Courses****Trotter Circuit Training**

Fall and spring. Fee charged.

Students will gain a working knowledge of the basic principles of Trotter selectorized weight lifting equipment. Emphasis on principles of weight training, circuit training, intensity training, and program design.

**Principles of Weight Training**

Fall and spring. Fee charged.

Introduces the proper use of olympic weights for improving physical condition and muscular strength. Instruction with focus on the relation between high-rep light weight lifting, low-rep heavy lifting, and the development of bulk, strength, and endurance.

**Independent Study****Independent Study**

Fall and spring.

Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.

## SCHOOL OF CONTINUING EDUCATION AND SUMMER SESSIONS

Summer Sessions provides a wide variety of educational opportunities beyond the degree-granting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs write B20 Day Hall, Ithaca, New York 14853-2801; call 255-4987; e-mail [cusce@cornell.edu](mailto:cusce@cornell.edu); or fax 255-9697; unless indicated otherwise below. You may also visit us on the web at [www.continuingeducation.cornell.edu](http://www.continuingeducation.cornell.edu).

### ADMINISTRATION

Glenn C. Altschuler, dean

Abby H. Eller, director, Cornell University Summer College

Christine Holmes, special programs coordinator

Ralph Janis, director, Cornell's Adult University

Charles W. Jermy, Jr., associate dean, and director, Cornell University Summer Session

Joseph Lindner, manager, computing

Ann L. Morse, media manager

Cathy M. Pace, registrar

Diane E. Sheridan, director, finance and administration

### CORNELL UNIVERSITY SUMMER SESSION

The Cornell University Summer Session provides unique and unusually attractive opportunities for study and recreation at a time when the Cornell campus and the Finger Lakes region of central New York are at their loveliest and the Ithaca weather is at its best. Participants may choose from a wide spectrum of courses scheduled during three-, six-, and eight-week sessions. Although admission is open to persons of all ages, the majority of summer session participants are matriculated Cornell students. Classes meet daily and are usually kept small to foster a close association between students and teachers. For information call 255-4987; e-mail [cusce@cornell.edu](mailto:cusce@cornell.edu); or visit our web site at [www.summer.cornell.edu](http://www.summer.cornell.edu).

### SPECIAL AND PROFESSIONAL PROGRAMS

Intensive learning experiences are presented year-round both for students and for professionals in many fields. Formats include for-credit courses of one to eight weeks and noncredit weekend and weeklong short courses. Programs can also be designed to respond to the needs and interests of corporations, professional societies, and other groups. These programs take place on the Cornell campus, on site, at other locations worldwide, and via distance learning. For

information call 255-7259; e-mail [culp@cornell.edu](mailto:culp@cornell.edu); fax 255-9697; or visit [www.continuingeducation.cornell.edu/SP/](http://www.continuingeducation.cornell.edu/SP/).

### Summer College Programs for High School Students

High school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore career options through specially designed workshops. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information call 255-6203; e-mail [summer\\_college@cornell.edu](mailto:summer_college@cornell.edu); fax 255-6665; or visit [www.summercollege.cornell.edu](http://www.summercollege.cornell.edu).

### Cornell's Adult University

Cornell's Adult University (CAU) offers week-long noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, week-long domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626B Thurston Avenue, Ithaca, New York 14850-2490; call 255-6260; e-mail [cauinfo@cornell.edu](mailto:cauinfo@cornell.edu); fax 254-4482; or visit [www.cau.cornell.edu](http://www.cau.cornell.edu).

### Distance Learning

The School of Continuing Education and Summer Sessions offers courses through distance learning. Instructional materials for these courses may be presented on the web, video tapes, and/or CD-ROMs. Students interact with the instructor and other students by phone or e-mail. Assignments and examinations are completed within a scheduled session, just as in on-campus courses, but students have the option of beginning study prior to the start of the session. For information, visit [www.continuingeducation.cornell.edu/DL/](http://www.continuingeducation.cornell.edu/DL/).

### Extramural Study

Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the **Visitor's Program**, allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are

required to obtain written permission from the instructor. For information, write to Extramural Study, B20 Day Hall, Ithaca, NY 14853-2801; call 255-4987; e-mail [cusce@cornell.edu](mailto:cusce@cornell.edu); fax 255-9697; or visit [www.continuingeducation.edu/EXMU/](http://www.continuingeducation.edu/EXMU/).

### Winter Session

Cornell undergraduate and graduate students, as well as employees and area residents, can earn three to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Winter-session students may enroll in scheduled courses or design individualized study with a faculty member. For information, write to Winter Session, B20 Day Hall, Ithaca, NY 14853-2801; call 255-4987; e-mail [cusce@cornell.edu](mailto:cusce@cornell.edu); fax 255-9697; or visit [www.wintersession.cornell.edu](http://www.wintersession.cornell.edu).

### Continuing Education Information Service

This service provides free information, counseling, and referral to people who have been out of school for several years and want to resume their education. It also provides information about short courses, workshops, professional updates, and executive programs offered by the university to people inside and outside Cornell. For information, write to Continuing Education, B20 Day Hall, Ithaca, NY 14853-2801; call 255-4987; e-mail [cusce@cornell.edu](mailto:cusce@cornell.edu); or fax 255-9697.

### SUMMER COURSE ROSTER

The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session Office. Courses are posted to the web ([www.summer.cornell.edu](http://www.summer.cornell.edu)) in the fall as the roster is developed. A preliminary course roster is available beginning in late November. If a course is also offered through distance learning, the course title will be followed by **DL**.

### ADMINISTRATION

Donald F. Smith, dean

Robert O. Gilbert, associate dean for clinical programs and professional service

Douglas D. McGregor, associate dean for research and graduate education

Hollis N. Erb, secretary of the college

Katherine M. Edmondson, assistant dean for learning and instruction

Bonita S. Voiland, assistant dean for hospital operations

Gene R. Wheeler, assistant dean for administration

Douglas F. Antczak, director, James A. Baker Institute for Animal Health

Gloria R. Crissey, director, office of student records, schedules, and financial planning

Corine Farewell, director of career development

Erla Heyns, head librarian

Mary Beth Jordan, director of human resources

Rodney Page, director, cancer center

Carol S. Peterson, director of financial aid

Joseph A. Piekunka, director of admissions

Kathleen M. Quinlan, director of educational development

TBA, director of continuing education

Jai Sweet, director of student services and multicultural affairs

### DEPARTMENT CHAIRS

Biomedical Sciences: M. Kotlikoff

Clinical Sciences: R. Hackett, acting chair

Microbiology and Immunology: D. Russell

Molecular Medicine: G. Weiland

Population Medicine and Diagnostic Services: D. Lein

### THE COLLEGE

The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease.

Graduates of the college receive the Doctor of Veterinary Medicine (D.V.M.) degree, which is recognized by licensing boards throughout the world. Graduates generally enter private practice, academia, or become engaged in one of the increasing number of other biomedical activities.

Admission requires a minimum of three years of college work, including specific prerequisite courses and experience. Applications must be filed approximately one year before the proposed matriculation date. The competition for admission is keen, since there are many more qualified applicants than can be admitted.

Graduate programs in veterinary research and postdoctoral training in clinical specialties are open to Doctors of Veterinary Medicine and some highly qualified holders of baccalaureate degrees and lead to the degree of Master of Science or Doctor of Philosophy.

More detailed information is contained in the catalog of the College of Veterinary Medicine, which may be obtained by writing to the college.

Note: 500- and 600-level courses are open only to veterinary students except by written permission from the instructor.

The College of Veterinary Medicine has revised its professional curriculum; the new course requirements apply to the class that matriculated in the fall of 1993 and to subsequent classes. Courses in the revised professional curriculum are designated with the prefix "VTMED" and consist of two categories of courses: foundation courses and distribution courses.

### The Professional Curriculum

#### FOUNDATION COURSES

In foundation courses I, II, III, and IV (VTMED 510, 520, 530, 540), students work in small groups under the guidance of a faculty tutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

Tutorial sessions and all other organized learning programs are usually scheduled during the mornings, thereby reserving the afternoons for independent study. By situating learning in a clinical context, students are better able to integrate material from the basic and clinical sciences and are encouraged to develop an understanding of the clinical reasoning process from the beginning of the curriculum. The tutorial-based educational format creates an atmosphere that requires students to be involved actively in their learning and allows them to develop skills in communication, information retrieval, and analysis.

Note: Courses listed in brackets [ ] are approved courses that are not offered during the 2000–2001 academic year.

#### VTMED 510 The Animal Body (Foundation Course I)

Fall. 12 credits. Limited to first-year veterinary students. Letter grades only. J. W. Hermanson and staff.

This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal structural anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures. The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

#### VTMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VIIa)

Fall. 1 credit. Limited to first-year veterinary students. Letter grades only. A fee of approximately \$10 is charged for the course guide. Staff.

This course is the correlate for VETMED 510 The Animal Body. This is a laboratory-based course that teaches physical examination of four species (dog, cat, cow, and horse). The class is divided into small groups and each group meets for two hours each week during the first 11 weeks. The skills of auscultation, percussion, palpation, and observation are taught along with clinically related diagnostic procedures.

#### VTMED 520 Genetics and Development (Foundation Course II)

Fall and spring. 8 credits. Limited to first-year veterinary students. Prerequisite: VETMED 510 The Animal Body. Letter grades only. R. A. Levine and staff.

An appreciation of how gene expression and cell behavior contribute to normal animal development and health is crucial for our understanding of the pathogenesis of disease. Students will gain an understanding of the cellular and molecular mechanisms that regulate development and maintain normal structure and function throughout the life of an animal. Emphasis will be placed on defining and characterizing normal cellular behaviors and on understanding how mutations in specific genes promote disease. Students will become familiar with the common molecular procedures being used to develop new diagnostic and therapeutic tools to maintain health and combat disease. Tutorial sessions are complemented by lectures, laboratories, and class discussions.

#### VTMED 521 Neuroanatomy and Clinical Neurology

Spring. 3 credits. Limited to first-year veterinary students. Letter grades only. A. deLahunta.

Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the

diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Films and videotapes of clinical patients are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.

**VETMED 527 Animals, Veterinarians, and Society: Part B (Foundation Course VIIb)**

This course begins in the last part of fall semester and finishes at the end of winter session. 1 credit. Limited to first-year veterinary students. Prerequisite: VETMED 517 Animals, Veterinarians, and Society: Part A. Letter grades only. A fee of approximately \$7 is charged for the course guide. Staff.

This course is the correlate for VETMED 520 Genetics and Development. It enters into a study of ethical issues related to animal use, animal welfare, animal genetics, clinical application of genetics, genetics counseling, and clinical day-to-day ethics. The course meets for one 2-hour session each week.

**VETMED 530 Function and Dysfunction: Part I (Foundation Course IIIa)**

Spring. 9 credits. Limited to first-year veterinary students. Prerequisite: VETMED 520 Genetics and Development. Letter grades only. D. Robertshaw and staff.

This course is designed to develop students' understanding of how an animal maintains itself as a functional organism; how this is achieved through the integration of different functional organ systems; how tissue structure relates to tissue function; how injury alters structure and leads to dysfunction, manifested as clinical signs; how organ function can be assessed; and how it can be modulated pharmacologically. The course incorporates aspects of physiology, biochemistry, cell biology, histology, pathology and histopathology, clinical pathology, and pharmacology.

**VETMED 531 Function and Dysfunction: Part II (Foundation Course IIIb)**

Fall. 7 credits. Limited to second-year veterinary students. Prerequisite: VETMED 530 Function and Dysfunction: Part I. Letter grades only. D. Robertshaw and staff.

A continuation of VETMED 530 Function and Dysfunction: Part I.

**VETMED 537 Animals, Veterinarians, and Society: Part C1 (Foundation Course VIIc)**

Spring. 1 credit. Limited to first-year veterinary students. Prerequisite: VETMED 527 Animals, Veterinarians, and Society: Part B. Letter grades only. A fee of approximately \$9 is charged for the course guide. Staff.

This course is the correlate for VETMED 530 Function and Dysfunction: Part I. The central goal of this course is to provide students with the interpersonal skills and techniques necessary to communicate effectively with clients. In addition, students will be provided an opportunity to study the human-animal bond, animal death, and grief counseling. This

course also provides opportunities to practice client interviewing skills and to participate in a home or farm visit.

**VETMED 538 Animals, Veterinarians, and Society: Part C2 (Foundation Course VIIc, continued)**

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VETMED 537 Animals, Veterinarians, and Society: Part C1. Letter grades only. A fee of approximately \$6 is charged for the course guide. Staff.

This course is the correlate for VETMED 531 Function and Dysfunction: Part II. This course provides for understanding the importance of the medical record, the diversity of clients, employees, and society in general, and a session on alternative medicine and its various practices. How to critically read and evaluate clinical studies and journal articles is also addressed.

**VETMED 540 Host, Agent, and Defense (Foundation Course IV)**

Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VETMED 531 Function and Dysfunction: Part II. Letter grades only. J. Baines (course leader) and others.

This course is divided into six sections: the host response, intracellular environment, extracellular environment, somatic environment, external environment, and surrounding environment. Using this approach, students develop an understanding of the host response to insult, a familiarity with groups of important pathogens, an understanding of how pathogens manipulate the host and how the host defends itself against attacks, and an understanding of the roles played by the external environment and human intervention in the epidemiology of infectious organisms.

**VETMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course VIId)**

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VETMED 538 Animals, Veterinarians, and Society: Part C2. Letter grades only. A fee of approximately \$12 is charged for the course guide. Staff.

This course is the correlate for VETMED 540 Host, Agent, and Defense. The course will emphasize maintaining health in both individuals and populations of animals and humans. Topics will include animal bites, nosocomial infections, rabies control programs, vaccines and vaccine reactions, zoonotic diseases, and integrated health maintenance programs. The course emphasizes veterinary public health.

**VETMED 550 Animal Health and Disease: Part I (Foundation Course V)**

Spring. 10 credits. Limited to second-year veterinary students. Prerequisite: VETMED 540 Host, Agent, and Defense. Letter grades only. D. M. Ainsworth.

This course integrates the clinical sciences of medicine, surgery, anesthesiology, radiology, and theriogenology, which are themselves integrated subjects, with systems pathology and relevant aspects of applied pharmacology. The course will be presented on a systems basis moving from clinical signs of alteration in function, to pathophysiology of clinical signs, to strategies for diagnosis and treatment. Specific examples will be used to establish a cognitive framework and knowledge of the most important diseases. This course will

provide a sound foundation for clinical rotations in Foundation Course VI. It builds on the strengths developed in earlier courses by an increased exposure to case examples in a more directed way, taking advantage of the diversity of skills and special knowledge of both faculty and students. A variety of educational techniques will be used, including lectures in which interaction is encouraged, laboratories, demonstrations, case discussions, and autotutorials.

**VETMED 551 Animal Health and Disease: Part II (Foundation Course V, continued)**

Fall. 20 credits. Limited to third-year veterinary students. Prerequisite: VETMED 550 Animal Health and Disease: Part I. Letter grades only. D. M. Ainsworth and staff.

A continuation of VETMED 550 Animal Health and Disease: Part I.

**VETMED 557 Animals, Veterinarians and Society: Part E (Foundation Course VIle)**

Spring. 1 credit. Limited to second-year veterinary students rolling over into fall semester for the then third-year veterinary students. Prerequisite: VETMED 547 Animals, Veterinarians, and Society: Part D. Letter grade only. A fee of approximately \$14 is charged for the course guide. Staff.

This course is a correlate with Foundation Course V, Animal Health and Disease. The course will examine governmental regulation of the veterinary profession, including proper drug usage, extra label drug use (FDA), controlled substances (DEA), substance abuse, professional liability and malpractice insurance, professional and unprofessional conduct, hazardous materials in the workplace (OSHA), and environmental issues (EPA). Also included will be sessions relating to controlling and preventing the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

**VETMED 560 Ambulatory and Production Medicine I**

Fall, winter, spring and summer. Credit variable (either one or two credits). Letter grades only. M. E. White and staff.

A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large-animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

**VETMED 561 Community Practice Service—Medicine (enroll in VETMED 561)**

2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. E. Hornbuckle and staff. The Community Practice—Medicine Service is structured to provide supervised clinical

experience in the practice of small companion animal medicine. The course is conducted in the Small Animal Clinic of the Cornell University Hospital for Animals. Students interact directly with clients presenting their pet for primary medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

#### **VETMED 562 Community Practice Service—Surgery and Anesthesiology**

2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. H. J. Harvey and staff.

Basic principles of anesthesiology and surgery are emphasized in the clinical rotation. Under direct staff supervision, students will anesthetize and perform surgical procedures on patients presented to the Small Animal Clinic for neutering and minor elective procedures. Students will be responsible for all aspects of patient care during their hospital stay and will be expected to fully participate in client communications. Ordinarily, this course will precede Anesthesiology Service and Small Animal Surgery Service (soft tissue component).

#### **VETMED 563 Small Animal Medicine**

Fall, spring, winter, and summer. 4 credits. Required course open to second-semester third-year and all fourth-year veterinary students; not open to others. Letter grades only. S. C. Barr, S. A. Center, J. F. Randolph, and K. W. Simpson.

The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Cornell University Hospital for Animals. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plan to the clients and provide follow-up care and management of these patients.

#### **VETMED 564 Small Animal Surgery Service**

Fall, winter, spring, and summer. 4 credits. Required of all third- and fourth-year veterinary students; not open to others. Letter grades only. H. J. Harvey and small animal surgery faculty.

A clinical service rotation, this course exposes the student to the practice of surgery under hospital conditions. Students participate in the diagnostic techniques; planning of therapy; and daily care of dogs, cats, and exotic species under the direction of a faculty veterinarian. Students assist experienced surgeons in the operating room and, with house-officer supervision, are responsible for patients undergoing elective ovariohysterectomy or castration. Client communications and the basics of efficient practice are emphasized.

#### **VETMED 565 Ambulatory and Production Medicine II**

Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. M. E. White and staff.

A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

#### **VETMED 566 Large Animal Medicine Service**

Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. D. Ainsworth, T. Divers, and staff.

Students assigned to this service will assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients. The goal of this course is for students working on this service to acquire knowledge and skills in history taking, physical examination, election and completion of appropriate ancillary tests, diagnosis, treatment, and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

#### **VETMED 567 Large Animal Surgery Service**

Fall, winter, spring, and summer. 4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. A. J. Nixon and staff.

This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and didactic instruction.

#### **VETMED 568 Anesthesiology Service**

Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed, J. W. Ludders, P. F. Moon, and staff.

This course is designed to provide clinical experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in selecting suitable anesthetic techniques for patients in the Cornell University Hospital for Animals and then implement those techniques under the supervision of faculty and residents. The goal is for students to learn the skills and thought processes necessary to perform safe anesthesia in a modern veterinary practice.

#### **VETMED 569 Dermatology Service**

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. H. Miller and D. W. Scott.

During this clinical rotation, students participate in the diagnosis and management of skin disorders in small and large animals. Patients are examined by appointment and through consultation with other hospital services.

#### **VETMED 570 Ophthalmology Service**

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. C. Riis, T. Kern, and N. Irby.

This course combines clinical experience with beginning skills in diagnostic ophthalmology. Students learn how to apply the ophthalmic diagnostic tests. A competent ocular examination is the goal of this rotation. Confidence in using direct and indirect ophthalmoscopes, slit lamps, tonometers, gonioscopes, conjunctival cytology, and surgery comes with the practice provided by this rotation. Students are required to review the introductory orientation videotapes in the Autotutorial Center titled *Ocular Examination I and II* before the start of the rotation. This rotation provides surgical experience and consultations. A high percentage of the consultations are referral cases that usually challenge the service. Adequate routine case material is presented to prepare most students for practice.

#### **VETMED 571 Pathology Service**

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. B. A. Summers and staff.

This course involves the hands-on diagnostic necropsies of most mammalian species that are presented to the pathology necropsy room and of avian species that are admitted to the avian and aquatic animal medicine necropsy room. Students work in groups of three to five for the two-week rotation. Necropsies are performed under the guidance of pathology faculty and residents. Students prepare written reports of necropsies performed, review microscopic hematology and cytology slides, perform urinalyses, and discuss case studies.

#### **VETMED 572 Radiology Service**

Fall, winter, spring, and summer. 2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. N. L. Dykes and staff.

A two-week clinical experience in the Imaging Section of the Cornell University Hospital for Animals. Students will use radiographic, CT, ultrasonographic, and nuclear medicine imaging techniques to evaluate animal patients under treatment in the Cornell University Hospital for Animals. Students obtain and interpret radiographic and ultrasonographic studies with guidance from radiology faculty and technical staff. Two 3-hour laboratory sessions are given to allow hands-on experience in patient positioning and radiographic technique. An autotutorial teaching film file is used to familiarize students with radiographic examples of common diseases of large and small animal species. Small-group discussions are scheduled to present and discuss current cases. The safe use of x-ray-producing equipment and radioisotopes is discussed.

**VETMED 573 Fourth-Year Seminar**

Fall and spring. 1 credit. Required of all fourth-year veterinary students. First-, second-, and third-year students and all staff members are also invited and encouraged to attend. S-U grades only. F. H. Fox, chair of the Senior Seminar Committee.

The aim of this course is to give the student the responsibility and opportunity of selecting and studying disease entity on the basis of a case or series of cases, or to conduct a short-term, clinically oriented research project under the direction of a faculty member. In either case, an oral report will be presented at a weekly seminar. A written report will also be submitted at the time of the seminar. All participants are encouraged to foster an atmosphere in which discussion, exchange of ideas, and the airing of controversial opinions might flourish.

## DISTRIBUTION COURSES

Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course offerings from which to choose. Some will emphasize clinical specialties, whereas others will integrate basic science disciplines with clinical medicine and will be co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: Grading options for distribution courses are either letter or S-U.

**VETMED 601 Anatomy of the Carnivore**

Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. A. J. Bezuidenhout.

Carnivore anatomy is studied by detailed systematic and regional dissection of the cat, with comparison to the dog. Student dissection is supplemented with prosections, radiographs, and exercises focusing on surgical approaches. There are opportunities to dissect other carnivores, such as the ferret and the fox, depending on availability of specimens. The lectures augment the laboratory dissection and introduce the student to functional morphological comparative features in the Order Carnivore. Students do an independent research project on the carnivore species of their choice and give an oral presentation on this to the class.

**VETMED 602 Anatomy of the Horse**

Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. M. S. Hackett.

This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical

practice will be emphasized in the regional approach to dissection. Most lectures will emphasize structural-functional correlations that are unique or important in the horse. Microscopic anatomy will be integrated into the course in selected areas to lay a foundation for the later study of pathology or when it reinforces concepts of structure and function that are difficult to understand by a study of the gross anatomy alone (i.e., hoof). Student dissection cadavers will be supplemented by skeletal materials, radiographs, models, preserved predissected specimens, and fresh specimens when they are available.

**VETMED 603 Anatomy of the Ruminant**

Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. J. Hermanson.

The regional anatomy of several ruminant species will be covered using dissection laboratories, lectures, and large-group discussions. Functional consequences of structural modifications and anatomical features directly relevant to clinical practice will be emphasized. Microscopic anatomy will be correlated with gross anatomy when appropriate to relate structure to function and to provide a foundation for later study in pathology. Student dissection material will be supplemented by skeletal materials, radiographs, models, predissected specimens, and postmortem specimens. Students will be required to complete an independent study project on a relevant subject of their choice. Assessment includes written and practical examination.

**VETMED 605 Comparative Anatomy: Pattern and Function**

Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body. First-, second-, third-, or fourth-year veterinary students; others by permission. Letter grades only. L. A. Mizer.

The goal of this course is to study anatomical variability among amniote (mammals, birds, and reptiles) and anamniote (amphibian and fish) species. This is accomplished by relating the anatomy of major organ systems in each species to a common basic pattern and considering the differences in a functional perspective. Five major systems will be explored (integumentary, locomotory, cardiorespiratory, digestive, and urogenital) in a variety of species as available.

**VETMED 606 Advanced Clinical Neurology**

Spring. 1 credit. Prerequisite: VETMED 521 Neuroanatomy and Clinical Neurology. Third- and fourth-year veterinary students. Letter grades only. A. deLahunta.

The objective of this course is to further the experience and confidence of the student in the diagnosis and understanding of clinical neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Neurological disorders that are not covered in the foundation course will be considered here. The course is entirely based on case examples that are presented on videotapes and slides.

**VETMED 607 The Literature and Subject Matter of Natural History**

Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students; others by permission. S-U grades only. H. E. Evans. This course is an introduction to classic and current natural history literature. Materials relating to the earth sciences and the biology of plants and animals from around the world will be shown and discussed. Students will be required to show and discuss a book that concerns natural history in a country of their choice. A recommended reference text for this course is *The Cambridge Illustrated Dictionary of Natural History* by R. J. Lincoln and G. A. Boxshall, 1990.

**VETMED 609 Anatomy and Histology of Fish**

Spring. 2 credits. Minimum enrollment 4; maximum enrollment 6. First-, second-, third-, and fourth-year veterinary students, others by written permission of instructor. S-U grades optional. P. R. Bowser.

This course provides an overview of the diversity of anatomy and histology of fish. Students will participate in lecture, discussion, and laboratory exercises to review the major organ systems. Extensive use of library resources for assigned readings will be expected. Each student will prepare a term project and make one oral presentation.

**[VETMED 610 Veterinary Aspects of Avian Biology]**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 60. First-, second-, third-, and fourth-year veterinary students; others by permission. Letter grades only. Offered even-numbered years. Next offered spring 2002. N. Abou-Madi.

An introduction to avian biology for veterinary students. The course will include lectures and laboratories involving avian evolution, anatomy, physiology, and ecology. Emphasis will be on the development of a strong foundation in avian biology that will be applied in VETMED 616 Diseases of Birds and VETMED 652 Avian Medicine and Surgery.]

**VETMED 611 Fish Health Management**

Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. Offered odd-numbered years. P. R. Bowser.

This course will present a summary of important diseases of fin fishes. Diseases covered will be those of importance in commercial aquaculture as well as those encountered by the tropical fish hobbyist. The course is designed to provide the students with a knowledge base and hands-on diagnostic experience in diseases of fish. Each student will prepare a term project and make one oral presentation.

**[VETMED 612 Management of Aquarium Systems]**

Spring. 1 credit. Minimum enrollment 8; maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students; others by written permission of instructor. S-U grades optional. Offered even-numbered years. P. R. Bowser.

This is a lecture and laboratory course dealing with procedures and practices involved in management of aquarium systems. Topics include water quality, types of aquarium filtration systems, fish health, fish nutrition, and general fish biology. A portion of the

course will require independent work in aquarium system management. Each student will prepare a term project and make one oral presentation.]

**VETMED 613 Aquavet I: Introduction to Aquatic Veterinary Medicine**

Four weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 4 credits. Maximum enrollment 24 students from Cornell University, the University of Pennsylvania, and other U.S. colleges and schools of veterinary medicine. Available, by a competitive application process, to veterinary and graduate students. S-U grades only. Course fee required. P. R. Bowser.

The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutions at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is designed to introduce veterinary students to aquatic animal medicine. The marine environment is described and visited on field trips in the Woods Hole area. Specific aspects of the comparative anatomy, physiology, nutrition, microbiology, pathology, and medicine of a variety of marine and freshwater species are discussed. Some emphasis is placed on systems of aquaculture. The specific diseases of a few selected species are presented as examples, including the diseases of a crustacean, a shellfish, a finfish, and marine mammals. The course is taught by an invited faculty of 35 individuals who are leaders in their respective fields of aquatic animal medicine. Students present seminars on appropriate topics.

**VETMED 614 Aquavet II: Comparative Pathology of Aquatic Animals**

Two weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 2 credits. Prerequisites: formal course work in diseases of aquatic animals or appropriate experience and permission of instructor. Maximum enrollment 18. S-U grades optional. Course fee required. Available, by a competitive application process, to veterinary and graduate students. P. R. Bowser.

This course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutes at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented will consist of discussions of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of 12 individuals who are leaders in their respective fields of aquatic animal medicine.

**VETMED 615 Veterinary Medicine in Developing Nations**

Spring. 2 credits. Maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. S-U grades only. Offered odd-numbered years. K. A. Schat.

Veterinary medicine has an important role to play in developing nations in (1) developing

and providing economical sources of animal proteins for human consumption and (2) protecting ecological resources. This seminar course will provide interested veterinary students with information on and insight into the multitude of complex issues facing U.S. veterinarians working in developing nations.

**VETMED 616 Diseases of Birds**

Spring. 2 credits. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. Naqi and G. V. Kollias.

This course is designed to introduce second-, third-, and fourth-year veterinary students to a basic and practical knowledge of the most common infectious and noninfectious diseases affecting a variety of avian species. The course will emphasize the latest diagnostic and control approaches. The course format will be a combination of didactic lectures and discussions.

**VETMED 618 Adaptation of Animals to the Environment**

Spring. 1 credit. Minimum enrollment 10. Graduate and first-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Robertshaw.

The course will examine the physiological adaptations of animals to their environment in addition to methods of acclimatization to novel environments. The course will focus on environmental parameters that exist in harsh environments and include heat, cold, altitude, and xeric conditions. Thus the physiological mechanisms of thermoregulation in mammals, birds, and ectotherms will be examined together with their responses to low food and water availability. The knowledge obtained will help in understanding the consequences of translocation of both wild and domestic animals and provide a rational basis for animal housing and the provision of appropriate habitats for zoological gardens. The degree of environmental adaptation will also be examined in terms of animal production from a basic science standpoint.

**[VETMED 619 Pathogenesis of Viral Disease (also VETMI 701)]**

Spring. 2 credits. Minimum enrollment 15; maximum enrollment 45. Strongly recommended prerequisite of immunology. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Offered odd-numbered years. Next offered spring 2003. J. D. Baines.

Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spreading between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory, and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature, the text, Nathanson's *Viral Pathogenesis*, 1997, and Field's *Virology*, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.]

**[VETMED 620 Molecular Biology and Immunology of Host-Parasite Interactions (also VETMI 702)]**

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades only. Offered even-numbered years. E. J. Pearce.

The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures will focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews will be used as the basis from which to explore the issues of host invasion, evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotherapy, drug resistance, vector biology, and molecular diagnosis. Biological processes that are especially well understood through work on parasites, such as RNA editing and GPI-anchor biosynthesis and structure, will be covered in detail.]

**[VETMED 622 Foreign Infectious Diseases of Animals]**

Spring. 1 credit. Minimum enrollment 6. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2000-2001. D. H. Schlafer.

This course describes the etiology, pathogenesis, clinical signs, gross pathology, differential diagnosis, methods of spread, reservoir hosts, and control of foreign animal diseases that present serious economic threats to the United States. The format is student seminar presentations with each student responsible for presenting one seminar. Ordinarily the course will also include presentations by college faculty and research scientists working on foreign infectious diseases.]

**VETMED 624 Feline Infectious Diseases**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. C. Barr.

The course consists of two 50-minute lecture periods a week for eight weeks. The letter grade will be obtained entirely from the result of a written examination (usually multiple choice format) given in the final period. The course will emphasize the clinical aspects of the more common feline infectious diseases common to cats in North America and will complement knowledge acquired in Blocks IV and V. The overall objective is to provide details about specific infectious diseases a future small animal practitioner may need to know to effectively diagnose and treat diseases. Etiology, epidemiology (prevalence and transmission), pathogenesis, clinical findings, diagnosis, pathologic findings, therapy prevention, and public health considerations will be emphasized. Most lectures will be presented from a clinician's point of view and therefore the material will be oriented towards practical skills in managing clinical cases.

**VETMED 625 Osteoarthritis**

Spring. 1 credit. Maximum enrollment 16. Graduate and second-, third-, and fourth-year veterinary students. Letter grades only. G. Lust.

This course provides a basis at the molecular, cellular, and tissue levels for understanding the function of mammalian diarthrodial joints. It includes a description of a diarthrodial joint and the composition and metabolism of articular cartilage, subchondral bone,

ligaments, meniscus, capsule, and synovium. The interrelationships of synovium, synovial fluid, articular cartilage, joint lubrication, biomechanical considerations, and enervation are considered. Canine hip dysplasia is a focus during the early class sessions. The osteoarthritis that is associated with canine hip dysplasia serves as a basis for discussion of the etiopathogenesis of the disease. Canine osteoarthritis will be emphasized, but the disease in animal models such as mice, guinea pigs, rabbits, and sheep will be mentioned. Therapies, such as nonsteroidal anti-inflammatory drugs, glucocorticoids, and others may be discussed.

#### VETMED 626 Epidemiology of Infectious Diseases

Spring. 1 credit. Maximum enrollment 8. Second-, third-, and fourth-year veterinary students. Letter grades only. H. Mohammed and staff.

This course will introduce the epidemiologic methods used in infectious disease investigations. The importance of surveillance systems in detecting modern epidemics and in the development of effective disease prevention and control strategies will also be discussed. An emphasis will be placed on understanding the relationships between the host, the agent, and the environment as they relate to disease causation. The course will explore contemporary epidemiologic methods applicable to old diseases that remain real or potential problems, newly emerging infectious diseases, and nosocomial infections. Selected diseases will be discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. The students will have the opportunity to apply the methods learned to actual disease problems and write an epidemiologic report that might lead to a publication in a peer-reviewed scientific journal.

#### VETMED 627 Diseases of Antiquity

Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. Staff.

This is a study of 36 human and animal diseases that have had profound effects on the course of human history from the beginning of recorded time to the present. This course combines aspects of literature, medicine, and history and explores the interactions between demographics, commerce, imperialism, medical care, the environment, and disease. Prevailing superstitions and religious views are considered in context with each illness and simultaneously occurring world events.

#### VETMED 628 Clinical Pathology

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2000–2001. Staff.

This six-week course addresses a range of issues related to laboratory medicine and interpretation of laboratory results. General topic areas include hematology, clinical chemistry and immunology, and urinalysis. The primary mode of instruction is student-driven small-group (untutored) exploration of case materials followed by faculty-moderated large-group discussions. Selected lectures and laboratory sessions will supplement and expand on issues generated by the case discussions. This course builds on concepts previously addressed in Block 3 and 4 and also provides additional experiences in

practical clinical pathology procedures and microscopy.]

#### VETMED 630 Clinical Biostatistics for Journal Readers

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. Letter grade. H. N. Erb.

The student will become familiar with the statistical methods commonly used in veterinary clinical articles, will be able to recognize obvious misuse of those methods, and will be able to interpret the statistical results.

#### VETMED 631 Clinical Diagnostic Parasitology

Fall and spring. 0.5 credit. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. S-U grades only. TBA with Dr. Frongillo. D. D. Bowman and M. K. Frongillo.

This course will provide a chance to perform diagnostic parasitology methods using samples obtained from ongoing clinic cases. Students will attend eight 1-hour sessions as they rotate through the ambulatory, community practice, and pathology rotations. In the ambulatory service (four sessions with students), diagnostics will concentrate on the laboratory examination of samples from large animal cases that have been observed during the previous week. In the Community Practice Service, one hour will concentrate on the examination of samples from ongoing cases, while a second hour will consist of a discussion of the treatment of common endo- and ectoparasites. The two hours spent as part of the pathology rotation will examine methods of recovering parasites from pathology specimens, including the examination of wet preparations and the digestion of tissues for parasite recovery. The course is considered to be a logical extension to the foundation course Host, Agent, and Defense and is expected to build on the didactic material presented in Large and Small Animal Parasitology.

#### VETMED 632 Senior Seminar

Fall and spring. 1 credit. First-, second-, and third-year veterinary students. S-U grades only. Must be completed in two consecutive terms (either fall to spring or spring to fall). R. O. Gilbert.

Attendance at 14 of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course.

This course does *not* fulfill the 1-credit Set VII minimum.

#### VETMED 633 Introduction to Nontraditional Companion and Laboratory Animals

Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Staff.

This course is both laboratory and lecture based and deals with a wide variety of nontraditional species, other than dogs or cats, that might be brought into a small-animal practice. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas. Instruction in restraint and handling, breeding, husbandry, and general management information is provided for each species. This

is followed, where possible, by laboratory sessions for observation, restraint, and physical examination.

#### VETMED 635 Introduction to the Professional Literature

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. Lee.

This course introduces veterinary students to the professional and biomedical literature, including development of critical reading skills. Students will become familiar with the broad range of professional and biomedical literature and will be encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques, as well as exploring the use of veterinary-related on-line information.

#### VETMED 637 Introduction to Community Practice Service

Fall, winter, spring, and summer. 1 credit. First- and second-year veterinary students by permission of instructor. S-U grades optional. W. E. Hornbuckle.

This course introduces veterinary students to primary care small-animal clinical practice through direct exposure to the Community Practice Service of the Cornell University Hospital for Animals. Students observe and assist with restraint, examination and routine treatment of pets, and communication with clients. Successful completion requires satisfactory participation during 10 half-days of clinical service.

#### VETMED 638 Physiological Nutrition

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 90. Second-, third-, and fourth-year veterinary students; others by permission of instructor. Letter grades only. F. A. Kallfelz.

This course will provide information on the evaluation and formulation of rations for large and small animals. These concepts will be applied in discussion on the nutrition requirements of these animals during maintenance, gestation, lactation, growth, stress, and aging. The course is recommended for all second-year veterinary students who do not have a strong background in ruminant, equine, canine, and feline nutrition. This course, or its equivalent, will be necessary for comprehension of clinical nutrition concepts in Foundation Course V.

#### VETMED 639 Veterinary Dentistry

Spring. 1 credit. Maximum enrollment 96. Second-, third-, and fourth-year students. Letter grades only. Staff.

This is an introductory-level course in small animal dentistry. It is a laboratory course that meets for two hours twice a week for 16 sessions. Basic concepts and practical topics in dental nomenclature, dental anatomy, oral/dental examination, routine dental care including prophylaxis, recordkeeping, genetics and breed differences, feline-specific dental disease, occlusion/malocclusion, periodontics, endodontics, restorative dentistry, oral surgery, and orthodontics are presented. Basic instrumentation, dental radiography, and materials used in dentistry are stressed. The class will use prepared specimens for all sessions.

**VETMED 640 Veterinary Aspects of Captive Wildlife Management**

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. N. Abou-Madi.

This course will concentrate on principles of captive wildlife management, both clinical and nonclinical. Students will be challenged to learn and integrate a variety of disciplines that are essential to managing wildlife successfully in a captive or semi-free-ranging environment. These disciplines include but are not limited to species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) zoonotic and toxicological problems, (5) manual restraint and anesthesia, (6) preventive medicine, and (7) medical and legal ethics. In even-numbered years the course will emphasize non-North American wildlife species (examples include African, Asian, Australian, Central and South American species), and in odd-numbered years the course will focus more on the North American (native) wildlife species.

**VETMED 641 Approaches to Problems in Canine Infectious Diseases**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. C. Barr.

The course consists of two 50-minute lecture periods each week for eight weeks. The letter grade will be obtained entirely from the result of a written examination (usually multiple choice format) given in the final period. The course will emphasize the clinical aspects of the more common canine infectious diseases that are not covered in Foundation Course IV or V. The overall objective is to provide details about specific infectious diseases a future small animal practitioner may need to know to effectively diagnose and treat these diseases. Clinical signs, presentation, clinicopathologic data, diagnostic choices, treatment plans, and prevention will be emphasized. Most lectures will be presented by clinical faculty and therefore the material will be oriented toward practical skills in managing clinical cases.

**VETMED 642 Management of Fluid and Electrolyte Disorders**

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 40. Second-, third-, and fourth-year veterinary students. Letter grades only. D. F. Smith.

Students will focus on clinical manifestations and the pathophysiologic mechanisms associated with fluid, electrolyte, and metabolic acid base disturbances in domestic animals. The course is divided into segments dealing with salt and water imbalances, potassium abnormalities, metabolic acidosis, metabolic alkalosis, and mixed acid-base disturbances.

**VETMED 643 Fundamental Aspects of Embryo Transfer**

Spring. 1 credit. Maximum enrollment 16. Enrollment is done by lottery. Third- and fourth-year veterinary students or graduate students by permission of instructor. S-U grades only. J. R. Hill.

This course introduces the theory and practice of embryo transfer in domestic animals. Topics include background, advantages and disadvantages, superovulation, embryo recovery techniques, embryo culture and manipulation, embryo transfer techniques, registration of offspring, import and export,

and related topics in assisted reproductive technologies. Students are exposed to practical techniques of embryo transfer in cattle, small ruminants, horses, and swine. The course consists of lectures, demonstrations, and laboratory classes during which students practice techniques of embryo recovery, evaluation, handling, and transfer.

**VETMED 644 Equine Surgical and Anesthetic Techniques**

Winter. 1 credit. Prerequisite: VETMED 602 Anatomy of the Horse. Minimum enrollment 3; maximum enrollment 21.

Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only. S. L. Fubini (coordinator) and other large-animal surgeons.

This course consists of five laboratories performing surgical procedures on ponies and cadaver specimens. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with some specialized surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating equine practice after graduation. This course is offered during a one-week period over winter intersession.

**VETMED 645 Food Animal Surgical and Anesthetic Techniques**

Winter. 1 credit. Prerequisite: VETMED 603 Anatomy of the Ruminant. Minimum enrollment 6; maximum enrollment 30.

Third- and fourth-year veterinary students. S-U grades only. Enrollment is done by lottery. S. L. Fubini and other large-animal surgeons.

This course consists of five laboratories performing surgical procedures on sheep, calves, cadaver specimens, and adult cattle. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating food animal practice after graduation. This course is offered during a one-week period over winter intersession.

**VETMED 646 Llama Tutorial**

Fall, spring, summer. 1 credit. Prerequisite: VETMED 540. Second-semester second-, third-, or fourth-year veterinary students. S-U grades only. Independent study. M. C. Smith.

This autotutorial or group tutorial course covers common problems of llamas and alpacas. Participants will be provided with study guides consisting of brief case descriptions and sample study questions. Reference will be made to textbooks, journal articles, videotapes, and (if available) a teaching llama to assist students in finding the answers to the questions efficiently. Grading is based on an oral exam.

**VETMED 647 Poisonous Plants**

Fall. 1 credit. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. S-U grades only. R. Hillman and M. Smith.

Field trips demonstrate toxic plants growing in natural or cultivated settings. Lectures address economically important poisonous plants native to the United States. Information presented includes plant identification, natural habitat, toxic principles, clinical signs of toxicity, and treatment and prevention of

poisoning in animals. Some of the major toxic principles found in plants and considered in detail in the course are nitrates, cyanide, oxalates, photodynamic agents, alkaloids, and mycotoxins.

**VETMED 648 Clinical Management of Native Wildlife**

Fall, spring, summer (credit given in fall). 1 credit. Enrollment not to exceed 20 students per semester, 2 students per rotation. First-, second-, third-, and fourth-year veterinary students by permission of instructor. Letter grades only.

N. Abou-Madi and staff.

This course introduces veterinary students to primary native wildlife care and to wildlife issues that practicing veterinarians face on a daily basis. Students are responsible for the assessment, physical examination, and medical care of native wildlife presented to the Cornell University Hospital for Animals by the public and local wildlife rehabilitators. Student activities are directly supervised and assessed by faculty wildlife clinicians on a daily basis. Successful completion of the course requires 40 hours of satisfactory supervised participation per semester in the clinic. Clinic times will be appropriately scheduled throughout the semester. Students are required to submit two case summaries before the end of the semester and a log of their clinical hours.

**VETMED 649 Introduction to Equine Practice**

Spring. 0.5 credit. Maximum enrollment 30. First- and second-year veterinary students. Letter grades only. R. Hackett and C. Collyer.

This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics will include horse breeds and colors, housing facilities and fencing, and overview discussions of the racing, showing, and breeding industries. Laboratories will emphasize basic equine handling and restraint as well as feeds and bedding.

**VETMED 652 Avian Medicine and Surgery**

Spring. 2 credits. Minimum enrollment 20; maximum enrollment 80. Third- and fourth-year veterinary students. Letter grades only. N. Abou-Madi and staff.

This course is designed to introduce third- and fourth-year veterinary students to the principles and practice of clinical avian medicine and surgery. The course will be taught in a basic didactic lecture and discussion format with laboratories that will reinforce concepts presented in the lectures.

**VETMED 653 Advanced Equine Lameness**

Spring. 1.5 credits. Minimum enrollment 7; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. S-U grades only. N. Ducharme, A. Nixon, and staff.

This course is designed to help students understand the methodology and to develop the manual skills required for lameness examination in horses. Emphasis will be on developing diagnostic skills. Specifically, the student will be expected to develop proficiency in the identification of clinical characteristics associated with recognized lamenesses and to localize the origin of the lameness. Teaching aids will include video modules outlining various gait abnormalities.

In addition, horses with specific gait abnormalities will be available for physical, radiographic, and ultrasonographic examination.

#### **VETMED 654 Current Therapy in Equine Reproduction**

Spring. Lec, 1 credit; lab, 0.5 credit. Lab minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery, if oversubscribed; concurrent enrollment in lecture is required. Third- and fourth-year veterinary students. Letter grades only.

D. H. Volkmann and C. M. Schweizer.

This course covers advanced aspects of equine reproductive physiology. Reproductive management of mares and stallions using natural and artificial breeding strategies is discussed. Diagnosis, treatment, and prevention of common reproductive disorders are stressed. The laboratory component builds on skills acquired during Foundation Courses and provides experience in techniques important in equine theriogenology.

#### **VETMED 655 Production Animal Theriogenology**

Spring. Lec, 1 credit; lab, 1 credit. Lab, minimum enrollment 12; maximum enrollment 24. Laboratory enrollment is done by lottery. Concurrent enrollment in Production Animal Theriogenology Lecture is required. Third- and fourth-year veterinary students. Letter grades only.

J. R. Hill.

This course deals with specific reproductive disorders of production animals as well as reproductive management of production units. Content includes reproductive biology of production animals, economic considerations, and medical and surgical approaches to management of reproductive disorders. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of theriogenology of production animals. Emphasis is on dairy cows.

#### **VETMED 656 Special Problems in Equine Medicine**

Spring. 1.5 credits. Minimum enrollment 10; maximum enrollment 30. Enrollment is done by lottery. Third- and fourth-year veterinary students. S-U grades only.

T. Divers and staff.

This course is intended for students who plan to or may enter equine practice. In-depth study of important diseases, review of recent literature, health management, and hands-on procedures or demonstrations will be the core of this course.

#### **[VETMED 657 Disorders of Large Animal Neonates]**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 100. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2000–2001.

D. Ainsworth.

The common medical problems of foals and calves, with emphasis placed on the neonatal period, are discussed. Specific topics examined in detail include disorders affecting the respiratory, gastrointestinal, and musculoskeletal systems. Students will also spend several hours in the neonatal intensive care unit providing medical care of hospitalized patients under staff supervision.]

#### **VETMED 659 Equine Soft Tissue Surgery**

Spring. 1 credit. Minimum enrollment 6; maximum enrollment 21. Third- and fourth-year veterinary students. Enrollment is done by lottery. Letter grades only.

R. Hackett and staff.

This course, intended for students anticipating equine practice after graduation, will build on material presented in the foundation courses to provide supplemental instruction in surgical disorders of the horse. Lectures will be case based and emphasize disorders likely to be encountered in equine practice (colic, traumatic injuries, upper respiratory tract disorders, prepurchase examination). Laboratories will emphasize diagnostic and therapeutic procedures in which an entry-level equine practitioner should be competent.

#### **VETMED 661 Surgical Pathology**

Spring, summer, fall. Variable 1–2 credits. Second-, third-, and fourth-year veterinary students with permission of instructor.

Letter grades only. S. McDonough.

This one- or two-week course (approximately eight hours per day for one credit per week) will provide hands-on experience in the Surgical Pathology Service of the Department of Biomedical Sciences. Working with the attending pathologist, students will examine tissue specimens histologically, propose diagnoses, and discuss their interpretations. Students may enroll in this course only through the Office of Student Records *within the official add/drop period*. All requests to enroll must be accompanied by the Supplemental Enrollment Form indicating Dr. McDonough's approval of the enrollment and the amount of credit to be awarded. *Second-year students* should not enroll for any term other than summer *unless* they have actually reserved a January or spring break slot through Dr. McDonough.

#### **VETMED 665 Medical and Surgical Problems of Dairy Cattle—Emphasis on the Individual Animal**

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 28. Enrollment is done by lottery. Third- and fourth-year veterinary students. Letter grades only.

S. Fubini and staff.

This course will provide students with a special interest in dairy practice the opportunity for in-depth discussions of special problems in bovine medicine and surgery. Emphasis will be on case discussions, physical examination techniques, and ethical and practical matters. The course will emphasize individual cow treatment.

#### **[VETMED 666 Small Animal Clinical Oncology]**

Spring. 1 credit. Third- and fourth-year veterinary students. Letter grades only.

Not offered 2000–2001. H. J. Harvey.

This course will present common tumor syndromes in small animals. Emphasis will be placed on biological behavior, patient management, and client relations. Format will include lectures, journal club discussions, demonstrations, and seminars.]

#### **VETMED 667 Special Problems in Small Animal Medicine**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third- and fourth-year veterinary students. S-U grades only. K. Simpson and staff.

During the four-week course, students will work through cases in small-animal medicine. The course consists of a 50-minute weekly

discussion period. The focus will be on the medical problems associated with cases using historic, clinical, clinical pathologic, and pathologic findings to elucidate basic pathophysiologic principles of disease. The overall objective is to give future small-animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs and examination skills, assessment of clinical pathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course V and, under the instruction of a clinical faculty member, is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases.

#### **VETMED 668 Practice Management**

Spring. 2 credits. Number of sections will be determined by enrollment. Third- and fourth-year veterinary students. S-U grades only. Staff.

Course participants form a veterinary group practice that includes the specialties of each person's interest. Topics are presented and discussed in the staff meeting format of the practice. Topics include basic practice organization, leadership styles, career planning, communication skills, facility management, human resource management, maintenance of standards, marketing and merchandising, building and maintaining clients, practice growth, finances, computing systems and information management, money management, legal issues and insurance, professional relations and responsibility, and maintaining an acceptable quality of life, including stress management. Various practitioners and practice managers will speak to the group about their very different successful practices, concentrating on management and organizational skills.

#### **VETMED 669 Sheep and Goat Medicine**

Spring. Lec, 1 credit; lab, 0.5 credit. Lab, concurrent enrollment in Sheep and Goat Medicine Lecture is required. Third- and fourth-year veterinary students. S-U grades only. M. Smith.

This course will discuss diagnosis, treatment, and prevention of medical and surgical problems of individual small ruminants and of sheep and goat herds. Basic information on breeds, behavior, nutritional requirements, and management systems will be supplied. Economically important contagious or metabolic diseases will be discussed in depth. The diagnostic evaluation and differential diagnoses for common clinical presentations such as skin disease, neurologic disease, lameness, and mastitis will be considered. Herd monitoring of economically important parameters and necropsy diagnosis of abortions and neonatal losses will be addressed. Breeding systems, pregnancy diagnosis methods, and correction of dystocias will be discussed and demonstrated in optional laboratory sessions.

#### **VETMED 670 Drug Handling in the Body**

Spring. 0.5 credit. Maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. R. A. Cerione and G. A. Weiland.

This course will provide an in-depth consideration of the pharmacological principles of administration, adsorption, distribution, metabolism, and elimination of drugs. Emphasis will be on the conceptual basis of the pharmacokinetic considerations in the

therapeutic use of drugs. The course will build on the pharmacological and physiological principles introduced in Foundation Course III.

#### **VETMED 671 Autonomic Pharmacology**

Spring. 0.5 credit. Maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. G. A. Weiland.

This course will provide an in-depth consideration of the pharmacological and physiological principles of autonomic pharmacology. Molecular, cellular, and organ system mechanisms will be emphasized. The course will explore in more detail the fundamental pharmacological and physiological principles of the effects of drugs on autonomic organs introduced in Foundation Course III.

#### **VETMED 672 Antimicrobial Drug Therapy in Veterinary Medicine**

Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. W. S. Schwark.

The objective of this course is to familiarize students with antimicrobial drugs used in veterinary practice. The course will build on fundamental pharmacological and microbiological principles covered in Foundation Courses III and IV and will consider antibacterial, antifungal, antiparasitic, and anticancer drugs from the point of view of unique pharmacokinetic properties, indications for clinical use, and potential toxicities as the basis for rational use.

#### **VETMED 673 Growth Factor-Coupled Signal Transduction**

Spring, even-numbered years. 0.5 credit. First-, second-, third- and fourth-year veterinary students and permission of instructor. Letter grades only. R. A. Cerione.

This course will present basic information regarding the regulation of cell growth and differentiation. The emphasis will be on the signal transduction pathways that are responsible for translating growth factor binding at the cell surface into nuclear responses and mitogenesis. The course should complement cases covered in Foundation Course II and tie together the biochemical pathways underlying cell growth with biological processes such as wound healing and disease states such as cancer.

#### **VETMED 674 Physiology and Pharmacology in the Understanding and Treatment of Diabetes**

Spring, odd-numbered years. 1 credit. Maximum enrollment 24. S-U grades only. G. Sharp.

This course will cover the basic causes of the manifestations of diabetes, signal transduction mechanisms controlling insulin secretion and insulin action, and the principles underlying current and potential future treatment for this group of diseases. The course will stress the value of basic research into cellular and molecular mechanisms for the treatment and cure of disease.

#### **[VETMED 675 Fundamental Principles of Vertebrate Central Nervous System Pharmacology]**

Spring. 0.5 credit. Minimum enrollment 6. Second-, third-, and fourth-year veterinary students. Letter grades only. Not offered 2000-2001. Next offered spring 2002. L. M. Nowak.

This course will include up-to-date knowledge of physiological and pharmacological aspects of the main central nervous system neu-

rotransmitter receptors and provide a basis for rational understanding of the drugs used during surgery and in treatment of neurological diseases.]

#### **VETMED 676 Clinical Ophthalmology**

Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. R. Riis, N. Irby, and T. Kern.

The principles and practice of entry-level veterinary ophthalmology introduced in Block V, Introduction to Veterinary Ophthalmology, are supplemented by lectures and discussions that emphasize species differences, basic surgical decision-making, and recognition of ocular conditions appropriate for referral.

#### **VETMED 677 Dairy Production Medicine**

Fall. 2 credits. Minimum enrollment 6; maximum enrollment 14. Third- and fourth-year veterinary students. S-U grades only. C. Guard.

This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the dominant software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

#### **[VETMED 678 Small Animal Theriogenology]**

Spring. 1 credit. Third- and fourth-year veterinary students. Letter grades only. Not offered 2000-2001. R. Gilbert.

This is a distribution course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V, Animal Health and Disease. Content includes discussion of breeding management, infectious and noninfectious causes of infertility and pathology of the male and female reproductive tracts, their diagnosis and management. The emphasis of the course will be on conditions affecting dogs and cats, but some conditions of other common pet species will be discussed.]

#### **VETMED 679 Clinical Pharmacology**

Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. W. Schwark.

This course is offered after Blocks I-V and formal exposure to pharmacology course work is completed. The course is designed to familiarize students with drug use in the clinical setting and uses ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice, alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicities. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, using basic concepts obtained during formal course work. The onus will be placed on the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.

#### **VETMED 680 Behavior Problems of Horses**

Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.

The goal of this course is to give veterinary students the ability to treat the behavior problems of horses. History-taking, counseling, diagnostic tests, follow-up, the importance of cooperation with the referring veterinarian, prevention of behavior problems, training techniques of value to the practitioner, and socialization of foals will be presented.

#### **VETMED 681 Behavior Problems of Small Animals**

Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. First-, second-, third-, and fourth-year veterinary students. S-U grades only. K. A. Houpt.

The goal of this course is to give veterinary students the ability to treat the behavior problems of cats and dogs. History-taking, counseling, and follow-up methods will be presented. Each student will have the opportunity to participate in three cases. Behavioral and pharmacological treatments for behavior problems will be presented.

#### **VETMED 682 Topics in Veterinary Emergency and Critical Care Medicine**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 35. Enrollment is done by lottery. Third- and fourth-year veterinary students; all others by permission of instructor. S-U grades optional. P. Moon.

This course will provide an introduction to emergency and critical care medicine. It is designed to have one to two topics per week. An introductory seminar will present basic information on the topic(s) at the beginning of the week followed by a two-hour group discussion later in the week. Although most of the cases will be based on small-animal cases, the same principles will apply to both large- and small-animal situations. Topics that might be covered include: triage, emergency fluid therapy, cardiac and pulmonary emergencies, nutritional support, common toxicology problems, emergency surgical procedures (chest tubes, tracheotomies), and basic and advanced cardiopulmonary resuscitation. When two courses (i.e., section "A" and "B") are offered in the same year, different topics will be covered in each course.

#### **[VETMED 684 Thermoregulation and Exercise]**

Fall. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grades only. Offered odd numbered years. Next offered 2001-2002. D. Robertshaw.

An examination of the competing demands on the body of exercise and heat exposure with particular emphasis on the cardiopulmonary systems and integration of thermoregulatory reflexes.]

#### **VETMED 685 Physiology of Pregnancy**

Spring. 2 credits. Maximum enrollment 20. Second-, third-, and fourth-year veterinary students. Letter grades only. P. W. Nathanielsz.

This course is presented in lecture fashion. One major reference per lecture will be assigned each week. Subjects covered are placental function, fetal growth, central nervous system development, fetal breathing,

biorhythms in maternal and fetal physiology, parturition, and adaptations to newborn life.

**VETMED 689 Fundamentals of Ruminant Digestion and Metabolism**

Spring. 0.5 credit. Minimum enrollment 5; maximum enrollment 50. First-, second-, third-, and fourth-year veterinary students; selected graduate students by permission of instructor. Letter grades only.

T. R. Houpt.

This course is designed for the student who has little or no previous course work in ruminant digestive physiology. It will consist primarily of lectures surveying the functional aspects of control of feed intake; salivation; reticuloruminant motility, including rumination and eructation; microbial flora and fauna; fermentation in reticulorumen (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism; passage of nutrients to lower tract; and a brief consideration of the functions of omasum, abomasum, and small and large intestines. Emphasis will be on the differences of the ruminant digestive processes from those of the simple-stomached animals.

**[VETMED 690 Molecular and Genetic Basis of Inherited Disorders in Animals and Application to Clinical Medicine]**

Spring. 2 credits. Minimum enrollment 5; maximum enrollment 15. First-, second-, third-, and fourth-year veterinary students; graduate and undergraduate students also welcome. Letter grades only. Offered even-numbered years. J. Ray.

This course introduces the molecular basis of inherited diseases in domestic animals. Topics include several inherited metabolic defects causing systematic malfunctions; muscle and bone abnormalities; retinal degeneration; and failure of the immune systems. Techniques to characterize genes and mutations. Use of molecular techniques for diagnosis and prevention. Use of molecular tools for the treatment of inherited disorders.]

**[VETMED 692 Current Concepts in Reproductive Biology]**

Fall. 3 credits. First-, second-, and third-year veterinary students or appropriate undergraduate/graduate training. Letter grades only. Lec, 2 hours each week; disc, 2 hours each week; T R 10:10-12:05. Offered odd-numbered years. Next offered fall 2001. J. Fortune, W. R. Butler, and staff.

This is a team-taught survey course in reproductive physiology/endocrinology. Lectures are given by several reproductive biologists on various aspects of male reproductive function (endocrine regulation, testis function, spermatogenesis, and sperm physiology/function); female reproductive function (endocrinology, ovarian development and function, oocyte physiology/function); pregnancy; parturition; puberty; and reproductive technology. Students participate in the form of discussions and/or presentations.]

**VETMED 695 Genetic Basis of Eye Diseases**

Spring. 1 credit. Minimum enrollment 5; maximum enrollment 14. First-, second-, third-, and fourth-year veterinary students. Letter grades only. G. Aguirre.

This course covers the molecular and genetic basis of inherited eye diseases in domestic and laboratory animals. It is aimed at the

professional student in the veterinary curriculum but is open to graduate-level students. The course will be given in a combination lecture/seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for class discussions and the paper.

**VETMED 696 Fundamental Principles and Techniques of Small Animal Anesthesia: Dogs, Cats, and Birds.**

Spring. 1 credit. Minimum enrollment 15. Third- and fourth-year veterinary medical students. P. F. Moon, R. D. Gleed, and J. W. Ludders.

This course is designed for the veterinary medical student interested in small-animal practice. The course will consist of lectures, case discussions, and development of anesthetic protocols for routine and complicated cases. Subjects to be covered include anesthetic management for elective and emergency surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, and the management of anesthesia-related complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and recent advances in anesthesia will be discussed, the practical application of anesthetic principles and techniques will be a major objective of the course.

**VETMED 697 Fundamental Principles of Large Animal Anesthesia: Equine and Mixed Animal Practice**

Spring. 1 credit. Minimum enrollment 15. Third- and fourth-year veterinary medical students. J. W. Ludders, R. D. Gleed, and P. F. Moon.

This course is designed for the veterinary medical student interested in equine or mixed animal practice. The course will consist of lectures, case discussions, and development of anesthetic protocols for routine and complicated cases. Subjects to be covered include anesthetic management for elective surgery, field anesthesia, management of the high-risk patient, fluid therapy, drug interactions, pain management, and the management of anesthesia-related complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and recent advances in anesthesia will be discussed, the practical application of anesthetic principles and techniques will be a major objective of the course.

**VETMED 698 Special Projects in Veterinary Medicine**

Fall, winter, spring, summer. Variable 1-4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.

This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the faculty.

**VETMED 699 Research Opportunities in Veterinary Medicine**

Fall, winter, spring, summer. Variable 1-4 credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades optional.

This course provides the opportunity for individual students to work in the research

environment of faculty involved in veterinary or biomedical research. Specific course objectives and course content are flexible and reflect the specific research environment. Research projects may be arranged to accumulate credit toward requirements in Distribution Sets I, II, III, IV, and V.

**VETMED 700 Large Animal Theriogenology Service**

Spring. 2 or 4 credits. Prerequisite of VETMED 551. Maximum enrollment 6 per rotation. Third- and fourth-year veterinary students. Letter grades only.

D. H. Volkman and staff.

This clinical service rotation is offered to provide additional hands-on experience in all phases of theriogenology. Equine reproductive management and medicine is stressed. Experience includes teasing, transrectal palpation, ultrasonography, semen collection, evaluation, extension and shipping, artificial insemination, and management of natural breeding. Other techniques emphasized include taking and evaluating endometrial biopsy and cytology samples, as well as samples for culture. Both university-owned and client-owned animals provide the basis for these experiences. Experience in routine dairy reproductive management is provided in the college-owned dairy herd. In addition, client-owned animals admitted to the Cornell University Hospital for Animals with reproductive disorders are managed by this service.

**VETMED 701 Cardiology Service**

Fall and spring. 2 credits. Prerequisite VETMED 551. Minimum enrollment 1 per rotation; maximum enrollment 2. Third- and fourth-year veterinary students. Letter grades only. S. Moise.

The purpose of the cardiology rotation is to provide the student with the opportunity to put into practice what they have learned in the foundation years. The management of the most common cardiac diseases will be emphasized including congestive heart failure, arrhythmias, and secondary cardiac diseases. All species will be examined, large and small, although the majority will be small animals. Diagnostics, including cardiovascular physical examination, electrocardiography, radiography, and echocardiography, will be taught. The rotation includes clinical work, didactic teaching, and self-initiated digging for information.

**VETMED 702 Laboratory Animal Medicine**

Fall and spring. 2 credits. Prerequisite of VETMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. F. Quimby and staff.

The practice of laboratory animal medicine requires a combination of preventive programs, clinical skills, knowledge of various species' biologies, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introduction to that specialty. Students accompany laboratory animal veterinarians on clinical rounds of Cornell's research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the biology, medicine, pathology, and husbandry of rodents, rabbits, and primates and on current legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical

College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in Primates.

### **VETMED 703 Clinical Wildlife, Exotic, and Zoo Animal Medicine**

Fall, winter, spring, summer. 2 credits. Prerequisite: VETMED 551. Maximum enrollment 2 per rotation. Third- and fourth-year veterinary students. Letter grades only. N. Abou-Madi and staff.

This course introduces students to primary medical care of nontraditional pet species, zoo animals, and native wildlife. Students, directly supervised by the attending clinician, are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the Cornell University Hospital for Animals. Other opportunities available to assist in the development of clinical skills in wildlife, zoo and exotic animal medicine include the wildlife clinic cases, ongoing wildlife research and service projects, and trips to the Burnett Park Zoo. Successful completion of the course requires satisfactory performance during this 14-day clinical rotation.

### **VETMED 704 Quality Milk**

Fall or spring. 2 credits. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. Letter grades only. R. Gonzalez, Y. Schukken, D. Wilson and staff.

This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings, discussions, laboratory exercises, and farm visits as part of the Quality Milk Promotion Services—New York State Mastitis Control Program. Participants are expected to complete a case study on a dairy farm with udder health problems and present their findings to the producer and farm personnel. Grading is on performance during the course and a final exam.

### **VETMED 705 Special Opportunities in Clinical Veterinary Medicine**

Fall, spring, and summer. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. S-U grades only.

This course provides opportunities for students finished with Foundation Course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

### **VETMED 707 Poultry Medicine and Production Rotation**

Fall. 2 credits. Prerequisite: VETMED 551 and VETMED 616, Diseases of Birds, is recommended. Third- and fourth-year veterinary students. K. A. Schat.

This course is a two-week rotation that will take place at the University of St. Hyacinthe or the University of Guelph in alternating years. The course provides students with an introduction in practical poultry medicine by a combination of lectures, discussions, and laboratory sessions including postmortem examinations. Students will also visit hatcheries, broiler, layer, and turkey farms.

### **VETMED 708 Clinical Oncology**

Fall and spring. 2 credits. Prerequisite of VETMED 551. Maximum enrollment 4 per rotation. Third- and fourth-year veterinary students. Letter grades only. R. Page.

Management and prevention of cancer in companion animals represents a significant component of the practice of veterinary medicine. The focus of this clinical rotation will be the development of a comprehensive set of skills necessary for a veterinarian to become an advocate for the client/patient with cancer. These skills will include appropriate initial evaluation of animals with cancer, sensitive and effective client and referring veterinarian communication, ability to access relevant information from numerous sources related to cancer management, understand and apply principles of surgical, medical, and radiation oncology as well as techniques specifically related to minimize pain and treatment-related effects in cancer patients.

### **VETMED 720 Issues and Preventive Medicine in Animal Shelters**

Spring. 1 credit. Prerequisite: VETMED 540. Minimum enrollment 5; maximum enrollment 30. Second-, third-, and fourth-year veterinary students. Letter grades only. J. M. Scarlett and staff from the American Society for Prevention of Cruelty to Animals.

Veterinarians often work for or with animal shelters, serve on shelter boards of directors, are community resources for issues relating to companion animal welfare, participate in spay and neuter programs, and influence the quality of the human-animal bond. This course will address the history of the humane movement, role of the veterinarian in relation to shelters, preventive and palliative health management (including highlighting diseases of major concern), issues surrounding euthanasia, reasons for relinquishment, programs for behavior modification, and the legal concerns of shelters. These issues will be addressed using lectures and large group discussions.

### **VETMED 721 Timely Topics in Veterinary Parasitology: Large Animal**

Spring. 0.50 credits. Minimum enrollment 2. Third-, and fourth-year veterinary students. S-U grades only. D. D. Bowman.

This course will present an in-depth look at one or a few parasites of special interest relative to large-animal medicine. The course will present details of taxonomy, biology, epidemiology, clinical presentation, and preventive and curative treatment. Efforts will be made to discuss those aspects of the disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics will vary annually. The course will be presented in a lecture/discussion format.

### **VETMED 722 Timely Topics in Veterinary Parasitology: Small Animal**

Spring. 0.5 credits. Minimum enrollment 2. Third- and fourth-year veterinary students. S-U grades only. D. D. Bowman.

This course will present an in-depth look at one or a few parasites of special interest relative to small-animal medicine. The course will present details of taxonomy, biology, epidemiology, clinical presentation, and preventive and curative treatment. Efforts will be made to discuss those aspects of the

disease as it relates to the practical control of these and in-depth coverage of primary literature relating to the parasite being discussed. Topics will vary annually. The course will be presented in a lecture/discussion format.

### **VETMED 723 Bacteria and Fungi in Veterinary Medicine**

Spring. 2 credits. Minimum enrollment 8; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. D. P. Debbie.

This course will provide an overview and listing of important bacterial and fungal diseases of domestic animals (cow, horse, sheep, pig, goat, dog, cat) in preparation for medicine courses. The etiology, pathogenesis, host response, and prevention will be emphasized. Avian, zoonotic, and exotic (foreign animal) bacterial and fungal diseases will be covered in less detail because they are covered in other courses. The course will also provide insight into diagnostic procedures for bacterial and fungal diseases such as available tests, what samples to take, how to handle samples, and how diagnostic procedures are performed.

### **[VETMED 725 Diagnostic Cytology**

Spring. 1 credit. Prerequisite: VETMED 628. Maximum enrollment 5. Second-, third-, and fourth-year veterinary students. S-U grades only. Not offered 2000–2001.

This two-week course will provide in-depth experience in preparation and interpretation of cytological specimens. Evaluation of the cytological specimens will be incorporated into clinical cases, so that the results are interpreted with respect to the provided case material. The primary mode of instruction is based on faculty-driven microscopic slide evaluation. Students will be required to evaluate the slides independently before the microscope sessions. Selected mini-tutorials and laboratories will complement the microscopic sessions. The course builds on concepts previously addressed in the Foundation Blocks 3 and 4 and in the Clinical Pathology Distribution Course (VETMED 628). This course is limited to students participating in or who have completed the Clinical Pathology Distribution Course.]

### **VETMED 726 Reptile Medicine and Surgery**

Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third-, and fourth-year veterinary students. Letter grades only. N. Abou-Madi.

This course is designed to introduce third- and potentially fourth-year veterinary students to the principles and practices of reptile medicine and surgery. The course will be taught in a basic lecture and discussion format with laboratories (limited) reinforcing concepts presented in the lectures.

### **[VETMED 730 Vaccines: Theory and Practice**

Spring. 1 credit. Prerequisite: introductory course in immunology or VETMED 540 or VETMI 315. Minimum enrollment 10; maximum enrollment 40. Second-, third-, and fourth-year veterinary students and graduate students; others by permission of instructor. Letter grades only. Grades based on two examinations. Offered even-numbered years. T. Clark.

This course will provide an overview of vaccines used in clinical practice, as well as an in-depth look at vaccine development.

Emphasis will be placed on the most recent advances in vaccine design and delivery, including the use of recombinant DNA techniques for targeting specific immunological responses. Lectures will touch on vaccines commonly used in veterinary practice and will address in detail the use of carriers, adjuvants and immunostimulants; attenuated pathogens; synthetic peptides; recombinant subunit vaccines; viral and bacterial vectors for vaccine delivery; synthetic antibodies; and genetic immunization with "naked" DNA.]

#### **VETMED 732 Veterinary Clinical Toxicology**

Spring. 1.5 credits. Second-, third-, and fourth-year veterinary students. S-U grades optional. L. Thompson and K. Earnest-Koons.

This course will provide the veterinary student with a solid introduction to concepts and principles of toxicology and how they are applied in the clinical setting. Students will learn about specific common toxicants, clinical signs in affected animals, and treatment protocols for the toxicants in question. Students will also gain an understanding of the clinical approach to suspected or unknown toxicoses, sample collection and handling, and resources available for clinical toxicologic problems. The course will be conducted with two 1-hour lectures per week and one hour-long large-group discussion per week. The class will meet two days per week, the first day for one hour and the second day for two hours. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral participation.

#### **VETMED 733 Selected Infectious Diseases of Swine**

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. S-U grades optional. K. Earnest-Koons.

This course will provide veterinary students with a solid introduction to concepts and principles of swine infectious diseases and how they are treated in the clinical setting. Students will learn about specific infectious diseases, clinical signs in affected animals, and treatment protocols for the diseases in question. Students will also gain an understanding of the clinical approach to suspected or unknown infectious agents, sample collection and handling, and resources available for infectious disease diagnosis. The course will be conducted with two 1-hour lectures per week and one hour-long large-group discussion per week. The class will meet three days per week for one hour each. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral participation.

#### **VETMED 735 Special Topics in Ambulatory and Production Animal Medicine.**

Fall, winter, spring, and summer. Variable 1-2 credits. Prerequisite: VETMED 560. Enrollment is done by lottery. Second-, third-, and fourth-year veterinary students. Letter grades only. M. E. White and Staff.

This course provides specialized experiences in the Ambulatory and Production Medicine Service. The course will consist of participation in scheduled and emergency farm calls and completion of projects designed to provide experience in herd problem solving, records analysis and implementing herd-health programs. Clinical service assignments will be planned to meet individual student goals.

Examples of focus areas available include livestock production medicine, dairy reproductive examinations, small-ruminant medicine, and equine ambulatory practice.

#### **VETMED 736 Veterinary Diagnostic Imaging: Anatomy and Interpretation**

Spring. 1.5 credits. Minimum enrollment 20; maximum enrollment 50. First- and second-year veterinary students by permission of instructor. Third- and fourth-year veterinary students. Letter grades only. P. Scrivani.

The course is designed to emphasize the relevance of a solid foundation in veterinary anatomy as it clinically applies to diagnostic imaging. Additionally, the course is designed to provide students with an understanding of the strengths and limitation of diagnostic imaging by discussing interpretation principles, pitfalls and interpretations, and measurements obtained through lectures, laboratory exercises, weekly quizzes, and reading assignments. Integration of these objectives will culminate in weekly laboratory exercises where students must make or evaluate decisions regarding patient management based on evaluation of clinical signs and imaging examinations. The "Roentgen-Sign" approach to diagnostic imaging interpretation will be used as a model.

#### **VETMED 737 Principles of Pathology**

Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 40. Second-, third-, and fourth-year veterinary students. Letter grades only. S. McDonough and K. Earnest-Koons.

Principles of Pathology is intended for students who wish to strengthen and broaden their knowledge of the pathologic basis of disease. Fundamental biologic processes as revealed by gross and microscopic pathologic changes will be emphasized. Molecular mechanisms will be integrated into the discussion where appropriate. General pathologic processes will be organized into a logical and uniform system in order to facilitate comprehension and learning with particular attention paid to definition and proper usage of terminology. The course will include two lectures per week and a one-hour large-group discussion. The large-group discussion will allow students to apply general knowledge gained in lecture to a specific problem. Approximately half of the large-group discussions will be held in the Necropsy Teaching Laboratory using actual diseased organs for illustration of general pathologic principles.

#### **VETMED 738 Veterinary Parasitology**

Spring. 2.5 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. D. D. Bowman

This course provides a basic introduction to small-animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant clinical importance to veterinarians and pet owners. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

#### **VETMED 739 Viruses in Veterinary Medicine**

Spring. 1.5 credits. Maximum enrollment 90. Second-, third-, and fourth-year veterinary students. Letter grades only. C. Parrish and J. Baines.

This course is designed to supplement the information provided in the Foundation Courses, particularly courses IV and V. The objective would be to provide, in a survey form, an overview of the major groups of viruses, which infect animals, and to give a summary of the diseases that they cause. The diseases, which are most commonly encountered in veterinary practice, would be given the greatest amount of the available time, and diseases which are less frequently seen would be given less detailed coverage. It is not a major objective of the course to teach students

differential diagnosis or treatment of disease, as that information is more appropriately covered in Foundation Courses V and VI. However, knowledge of the agents and diseases that are described in this course will be useful background for the other courses.

#### **VETMED 745 Dynamics of Dairy Herd Health and Management**

Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Y. T. Grohn and L. D. Warnick.

Competitive pressure, increasing input costs, and comparatively stagnant milk and salvage values require dairy producers to become more efficient. The current trend of increasing herd size drives changes in management. Dairy cattle are handled in groups, although individual cow health and productivity fundamentally underpin the financial success of the dairy enterprise. Veterinarians are called upon to advise dairy producers not only in matters of herd health but increasingly in matters of productivity and management decision making. Identifying opportunity areas to improve productivity and ultimately profitability requires modern veterinarians to recognize and solve complex and interdependent milk production, reproduction, and health issues. Until the advent of the new veterinary curriculum, biological systems were often taught in isolation. Yet there are research models that integrate the dynamic nature of dairy production, health, management, and economics through epidemiological and economic modeling. Despite the existence of such advanced research models, they have not been integrated fully into the curriculum. The goal of this course is to teach students the dynamic relationships of herd performance parameters with dairy herd health and management. This will be done with a combination of lectures and exercises using two computer simulation models. The following topics will be addressed: (1) how often production diseases occur and when, (2) how they are interrelated, (3) the impact of disease on milk production, reproductive performance, and risk of culling, and (4) how to use this information in production medicine.

The format of this eight-week course (two days per week) is a lecture one day and hands-on work with computer simulation models on the other day.

## Biomedical Sciences

### **VETBMS 346 Introductory Animal Physiology (enroll in VETPH 346) (also BIOAP 311) (Undergraduate)**

Fall. 3 credits. Prerequisites: BIOG 105, BIOG 106, or BIOG 101, BIOG 102, BIOG 103, BIOG 104, BIOG 107, BIOG 108; CHEM 207, CHEM 208, or CHEM 206, or CHEM 215, CHEM 216; MATH 106, MATH 111 or MATH 191 or AP credit for any of the above; or one year of college-level biology, chemistry, and mathematics. S-U grades optional. M W F 11:15. E. R. Loew.

A general course in animal physiology emphasizing principles of operation, regulation, and integration common to a broad range of living systems from the cellular to the organismal level. Structure-function relationships are stressed along with underlying physical-chemical mechanisms.

### **VETBMS 600 Special Projects In Anatomy (enroll in VETA 600)**

Fall, spring. 1 credit per 2.5-hour period. By permission of instructor. S-U grades only. Biomedical science staff.

### **VETBMS 628 Graduate Research in Animal Physiology (Graduate) (enroll in VETPH 628) (also BIO S 719)**

Fall, spring. 1-3 credits. By written permission of department chairperson and faculty mentor who will supervise the work and assign the grade. S-U grades optional.

Similar to Biological Sciences 499 but intended for graduate students who are working with faculty members on an individual basis.

### **VETBMS 639 Autotutorial in Laboratory Animal Medicine and Science (enroll in VETPA 639)**

Spring. 1-3 credits. Letter grades only. F. W. Quimby.

This course is offered to individuals interested in pursuing various aspects of laboratory animal medicine and science in depth. A variety of resources are available to assist students in their research on a particular topic: the library of the Division of Laboratory Animal Medicine, including the autotutorial library; the university libraries; and special information collected from other institutions. Grades are determined on the basis of a paper, an oral presentation, or the creation of an audiovisual teaching aid, any of which may be selected by the student.

### **VETBMS 700 Predictions of Form or Phylogeny (enroll in VETA 700)**

Spring. 1 credit. By permission of instructor. S-U grades optional. J. W. Hermanson.

Form and function are often discussed as a correlated entity in biology. This seminar group will start with the question, Does form really predict function? This will be addressed initially with respect to the analysis of paleobiology but will then encompass examples of experimental functional morphology. In particular, there is a growing body of experimental data demonstrating that diverse functions can be achieved with nearly identical morphologies, and that the functional diversity may better be explained by behavior or environmental factors. Might these observations refute current theories about the origin of flight in extinct organisms (i.e., the cursorial or ground-up theory of flight versus the arboreal gliding theory of flight evolution)? Specific topics pursued will be selected by participants in this course. Participation will be

open to interested graduate students, advanced undergraduate students, and veterinary students.

### **VETBMS 713 Cell Cycle and Growth Regulation (enroll in VETPA 713)**

Spring. 1 credit. S-U grades only. A. Yen. Current topics in the control of mammalian cell division will be discussed, including growth factors and oncogenes.

### **VETBMS 720 Special Problems in Physiology (Graduate) (enroll in VETPH 720)**

Fall, spring. 1-3 credits. By permission of instructor. Laboratory work, conferences, collateral readings, and reports. Adapted to the needs of students. S-U grades optional.

### **VETBMS 788 Seminar in Surgical Pathology**

Fall, spring. 1 credit. Intended for residents; third- and fourth-year veterinary students may attend. Letter grades only. B. A. Summers and staff.

The major objective of this discussion and seminar course is to introduce the residents to the discipline of surgical pathology. Selected material from the Surgical Pathology Service is prepared in advance for independent review by the residents. The material is presented in a slide-seminar format by the residents under the review of the faculty. Emphasis is placed on pathogenesis, etiology, and pathologic descriptions of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.

### **VETBMS 796 Medical Primatology (enroll in VETPA 796)**

Fall. 1 credit. For residents and graduate students by permission of instructor. Offered even-numbered years. F. W. Quimby.

This course is a survey of major diseases, medical care, and management techniques for all life stages of primates. Topics include physical examination, restraint anesthesia, housing, and management of various nonhuman primate species; bacterial, viral, and parasitic diseases; noninfectious diseases; infant and nursery care reproduction and behavioral considerations; and therapeutics.

### **VETBMS 811 Advanced Physiology Methods I (enroll in VETPH 811) (also BIO S 811) (Graduate)**

Fall. 2 credits. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only. Lab TBA. J. Ray.

This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

### **VETBMS 812 Advanced Physiology Methods II (enroll in VETPH 812) (also BIO S 812) (Graduate)**

Spring. 2 credits. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only. Lab TBA. J. Ray.

This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and

methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

## Clinical Sciences

### **[VETCS 700 Pathophysiology of Gastrointestinal Surgery]**

Fall. 1.5 credits. S-U grades only. Offered every third year. Next offered fall 2001. N. G. Ducharme.

Normal anatomy and physiology of the gastrointestinal system in carnivores, herbivores and ruminants will be presented initially. This will be followed by in-depth discussion of the pathophysiological mechanisms and sequelae of gastrointestinal obstructions including reperfusion injury, peritonitis, adhesions and short bowel syndrome. The emphasis of this course is development of advanced understanding of surgically relevant gastrointestinal problems that lead to appropriate decision making.]

### **[VETCS 701 Pathophysiology of Orthopedic Surgery (Graduate)]**

Spring 1.5 credits. Prerequisites include DVM, MD, or equivalents or approval of instructor. S-U grades only. Offered every third year. Next offered spring 2002. E. J. Trotter.]

### **[VETCS 702 Pathophysiology of Cardiopulmonary Surgery (Graduate)]**

Fall. 1.5 credits. Prerequisite: DVM degree or equivalent. S-U grades only. Offered every third year. Next offered fall 2002. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey.

Using lectures and group discussions, the objective of this course is to explain the pathophysiology of various cardiovascular diseases (cardiac arrest, cardiac arrhythmia under anesthesia) and airway disease (thoracic and upper airway disease). As a basis for these abnormalities, cardiopulmonary hemodynamics and biomechanical aspects of ventilation will be reviewed. The emphasis is placed on understanding these mechanisms and outlining the surgeon's response to them.]

### **[VETCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)]**

Spring. 1.5 credits. For graduate DVMs (or equivalent) in residency or graduate training programs. S-U grades only. Offered every third year. Next offered spring 2003.

This course is designed for surgery residents and graduate students. It is largely discussion format and examines surgical principles and surgery of the integumentary system.]

### **[VETCS 704 Pathophysiology of Urogenital Surgery (Graduate)]**

Fall. For graduate DVMs or equivalent in residency or graduate training programs. 1.5 credits. S-U grades only. Offered every third year. Next offered fall 2001. S. Fubini.

This course is designed to review and discuss urogenital surgical procedures in animals and the rational basis for them. Pathophysiology will be stressed. Some classes will consist of reprints with discussion.]

### **VETCS 705 Animal Pain and Its Control**

Spring. 2 credits. By permission of instructor. S-U grades optional. R. D. Gleed, J. W. Ludders, and P. F. Moon.

This course is open to third- and fourth-year veterinary medical students, interns, residents, graduate students, and postdoctoral associates

who are interested in the fundamental and applied concepts of pain in animals. The course will emphasize the physiologic and pathophysiologic mechanisms involved in pain perception by animals, their responses (physiological and behavioral) to pain, and the pharmacologic mechanisms underlying analgesic therapy. The subject material will be presented through lectures, group discussions, and group evaluation of analgesic protocols.

#### **VETCS 706 Pathophysiology of Neurologic Surgery (Graduate)**

Spring. 1.5 credits. Prerequisite: DVM, MD, or equivalent or approval of instructor. S-U grades only. Offered every third year.

This course provides specialized training in neurosurgical techniques and application and discusses pathophysiologic implications of neurosurgical and neurologic diseases.

#### **VETCS 710 Advanced Veterinary Anesthesiology I**

Fall, winter. 1 credit. Prerequisite: VETMED 568 Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. P. F. Moon and staff.

The content of this course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for interns and for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology, and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

#### **VETCS 711 Advanced Veterinary Anesthesiology II**

Fall, winter, spring. 1 credit. Prerequisite: VETMED 568, Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. P. F. Moon and staff.

The content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for interns and for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

### **Microbiology and Immunology**

#### **VETMI 315 Basic Immunology (Undergraduate) (also Biological Sciences 305)**

Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U grades optional. J. A. Marsh.

This course is a survey of immunology, with emphasis on the cellular and molecular bases of the immune response. More information is available at the [biog305.courseinfo.org](http://biog305.courseinfo.org) web site.

#### **VETMI 320 Principles of Toxicology (Undergraduate) (also Biological Sciences 320 and Toxicology 320)**

Spring. 3 credits. Prerequisites: one year each of introductory biology and chemistry, with lab; one semester of organic chemistry lecture or waiver by instructor. S-U grades optional. T R 1:25–2:40.

S. Penningroth, R. Dietert, and S. Bloom. This course is an introduction to the interdisciplinary science of toxicology, drawing on material from biology, chemistry, pharmacology, ecology, earth science, risk analysis, and policy studies. Basic principles of toxicological science are presented and illustrated by case examples, such as pesticide toxicity to wildlife reproduction and human health risk assessment at a Superfund hazardous chemical waste site. Chemical risk management is described as a sociopolitical process involving the integration of scientific, economic, and cultural factors.

Independent student projects include a toxic chemical profile and a team analysis of hypothetical "environmental risk scenarios." Periodic talks by toxicology faculty acquaint students with basic research in this interdisciplinary branch of biological science. This is an introductory-level course in toxicology. Format: lecture supplemented by case examples. One field trip to a hazardous chemical waste site. Appropriate for nonmajors seeking basic literacy in environmental and human toxicology. "Gateway course" for students interested in 400- and 600-level toxicology courses.

#### **VETMI 404 Pathogenic Bacteriology and Mycology (also BIOMI 404)**

Spring. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOMI 290 and 291. Seminar is required of graduate students and open to undergraduates with permission of instructor. Maximum enrollment 15 students. Letter grades only. Offered odd-numbered years. Microbiology faculty.

This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The course emphasizes infection and disease pathogenesis. Topics include disease causality; interactions of host, pathogen, and environment, including immunity to bacteria and fungi; and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular levels.]

#### **VETMI 408 Viruses and Diseases I (also Biological Sciences 408)**

Spring. 2 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, Genetics 281. Letter grades only. Offered even-numbered years. J. W. Casey.

The course will cover basic concepts in virology with emphasis primarily on DNA virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia will be highlighted in the context of approaches to prevent or reduce the severity of diseases.

#### **VETMI 409 Viruses and Disease II (also BIOMI 409)**

Fall. 2 credits. Prerequisites: BIOMI 290 and 291 or permission of instructor. Recommended: BIOMI 408, BIOBM 330–332, BIOBM 432. Offered even-numbered years. G. Whittaker.

This course will be complementary to BIOMI 408, Viruses and Disease I, and will emphasize RNA viruses. The course will be complete in its own right. As such, completion of BIOMI 408 is not a requirement. The course will cover the structure and classification of viruses, entry, genome replication, and virus assembly. Particular emphasis will be placed on virus-host cell interactions. Vaccinations, chemotherapy and evolution of viruses will also be discussed.

#### **[VETMI 420 Environment and Inflammation]**

Fall. 1 credit. S-U grades optional. Prerequisite: VETMI 320. Not offered 2000–2001. R. Dietert.

The course will cover environmental factors (chemical and selected infectious agents) that represent important risk factors in host inflammatory reactions. Emphasis will be placed on environmental contaminants, dietary factors, and pharmacological agents that influence the potential for problematic inflammatory reactions in animals and humans. Additionally, the basic mechanisms of inflammation will be covered in the context of specific case studies. Chemicals and societally pervasive health challenges such as allergic diseases and autoimmunity will be introduced. In addition, health issues such as multiple chemical sensitivity (MCS), chronic fatigue syndrome (CFS), sick building syndrome (SBS), and Persian Gulf War illnesses will be discussed.]

#### **VETMI 431 Medical Parasitology (Undergraduate)**

Fall. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 263, 264, 267, 274, 275, 278; BIOG 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 170, 202, 207; BIOMI 192, 290, 398 or equivalent course. Letter grades only. D. D. Bowman.

This course is a systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasitisms.

#### **VETMI 605 Special Projects in Microbiology (Undergraduate)**

Fall, spring. 1–3 credits. By permission of instructor. Prerequisite: a good background in microbiology or immunology. Preferably, students should have background in pathogenic microbiology and immunology. S-U grades only. Microbiology staff.

The course normally provides an opportunity for the student to work in a research laboratory or carry out a special project under supervision.

#### **[VETMI 700 The Biology of Animal Viruses (Graduate and Upper-level Undergraduate)]**

Fall. 2 credits. Letter grades only. Offered odd-numbered years. C. R. Parrish and staff.

This course will examine current topics in studies of animal viruses, including some comparisons with plant viruses where similar mechanisms apply. Selected topics will be examined in depth, including the structures of viruses and their components, viral nucleic

acids and replication strategies, details of the interactions between viruses and their host cell components and metabolism. Other topics will include the evolution and selection of viruses, novel approaches to the prevention of virus infection, and methods for antiviral chemotherapy.]

**[VETMI 701 Pathogenesis of Viral Diseases (also VETMED 619)]**

Spring. 2 credits. Given during 8-week spring distribution period, January-March. Open to graduate students and advanced undergraduates by permission of instructor. Strongly recommended prerequisite: Immunology. Letter grades only. Offered odd-numbered years. Not offered spring 2001. Microbiology faculty.

Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory, and urogenital systems. The basic principles of virus taxonomy, structure, and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature; Nathanson's *Viral Pathogenesis*, 1997; and Field's *Virology*, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.]

**[VETMI 702 Molecular Biology and Immunology of Host-Parasite Interactions (Graduate) (also VETMED 620)]**

Spring. 2 credits. S-U grades optional. Offered even-numbered years. E. J. Pearce. See description for VETMED 620.]

**[VETMI 705 Advanced Immunology (Graduate) (also Biological Sciences 705)]**

Spring. 4 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Letter grades only. Offered even-numbered years. R. G. Bell and staff. Coverage at an advanced level of molecular and cellular immunology.]

**VETMI 706 Immunology Seminar Series (Graduate)**

Fall, spring. No credit. Required of all graduate students in the Field of Immunology. S-U grades only. Fall, R. Bell; spring, D. Holowka.

Presentations of research investigations by Cornell faculty members, postdoctoral fellows, and graduate students in the Field of Immunology and by invited speakers from other institutions.

**VETMI 707 Advanced Work in Bacteriology, Virology, and Immunology (Graduate)**

Fall, spring. 1-3 credits. By permission of instructor. S-U grades optional. Microbiology staff.

This course is designed primarily for graduate students with a good background in pathogenic microbiology and immunology. It may be elected by veterinary students who are properly prepared.

**VETMI 708 Selected Topics in Animal Virology**

Spring, odd-numbered years. 2 credits.

Letter grades only. Microbiology faculty. Principles of animal virus biology with focus on mechanisms in viral pathogenesis.

**VETMI 710 Microbiology Seminar (Graduate)**

Fall, spring. 1 credit. Required of all graduate students in the Department of Microbiology and Immunology. S-U grades only. G. Whittaker.

**VETMI 719 Immunology of Infectious Diseases and Tumors (also Biological Sciences 706) (Graduate)**

Spring. 2 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. S-U grades optional. Offered odd-numbered years. E. Y. Denkers and staff.

Coverage at an advanced level of the immunology of diseases caused by selected bacterial, viral, protozoan, and helminthic parasites, and tumor immunology.

**VETMI 737 Advanced Work in Animal Parasitology (Graduate)**

Fall, spring. 1-3 credits. For advanced undergraduate, graduate, and veterinary students. Letter grades only.

D. D. Bowman and other faculty.

This course is intended for advanced undergraduate, graduate, and veterinary students with interests in parasitology research.

**VETMI 770 Advanced Work in Avian Diseases (Graduate)**

Fall, spring. 1-3 credits. By arrangement with instructor. Letter grades only. Microbiology faculty.

**VETMI 772 Advanced Work in Aquatic Animal Diseases (Graduate)**

Fall, spring. 1-3 credits. By arrangement with instructor. S-U grades only. P. R. Bowser.

**VETMI 783 Seminars in Parasitology (Graduate)**

Fall, spring. 1 credit. Open to veterinary students or graduate students; others by permission of instructor. S-U grades only. D. D. Bowman.

This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasitism, parasite systematics, wildlife parasitology, and parasitic diseases of plants and animals, including humans.

**Molecular Medicine**

**VETMM 470 Biophysical Methods (also A&EP 470) (enroll in VETPR 470)**

Spring. 3 credits. Prerequisite: permission of instructor. Letter grades only. M. Lindau.

This course is an overview of the diversity of modern biophysical experimental techniques used in the study of biological systems at the cellular and molecular level found in articles published in the *Biophysical Journal*. Topics covered include methods that examine both structure and function of biological systems: light microscopy, fluorescence microscopy, Fourier optics and image processing, confocal and multiphoton microscopy, phase contrast, electron microscopy, X-ray diffraction and

protein structure determination, multidimensional NMR, spectroscopy, chromophores, calcium measurements, resonance energy transfer, membrane biophysics, electrophysiology, ion channels, action potentials, ligand-gated channels, fluctuation analysis, patch-clamp, molecular biology of ion channels, rapid kinetics, caged compounds, transmitter release, capacitance measurements, amperometry, optical traps, and molecular force measurements. The course format includes assigned literature reviews by the students on specific topics and individual students' presentation of these topics. The course is intended for students of the engineering, physics, chemistry, and biological disciplines who seek an introduction to modern biophysical experimental methods. Due to the interdisciplinary nature of the course, students will have diverse backgrounds. A basic knowledge of and interest in physics and mathematics is expected but strong attempts are made to give an intuitive understanding of the mathematics and physics involved. Some knowledge of physical chemistry, molecular and cell biology, or neurobiology will be helpful. Depending on individual backgrounds all students will find certain aspects easy and other aspects demanding.

**VETMM 610 Cellular and Molecular Pharmacology (enroll in VETPR 610)**

Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and molecular medicine faculty.

This graduate-level course surveys the molecular and cellular aspects of receptor mechanisms, signaling pathways, and effector systems. Topics include drug-receptor interactions; ligand- and voltage-gated ion channels; G protein pathways; growth factor signaling; lipid signaling; calcium; nutrient and nitric oxide signaling; and mechanisms of receptor-mediated effects on neural excitability, electrical pacemakers, muscle contraction, and gene expression.

**[VETMM 611 Systems Pharmacology (enroll in VETPR 611)]**

Spring. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and molecular medicine faculty.

This graduate-level course surveys system- and organ-related aspects of pharmacology. Topics include drug disposition; pharmacokinetics; autonomic pharmacology; central nervous system pharmacology; pharmacology of inflammation, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.]

**VETMM 672 Protein Kinetics (enroll in VETPR 672) (also CHEM 672)**

Fall. 4 credits. Prerequisite: CHEM 288 or 390, BIOBM 331, or permission of instructor. Letter grades only. B. A. Baird.

This course focuses on protein interactions with ligands and consequent changes in structure and activity. Topics include protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; and role of cell membrane receptors in regulating cellular activities.

**VETMM 700 Calcium as a Second Messenger in Cell Activation (enroll in VETPR 700)**

Fall. 2 credits. By permission of instructor. Lecture-discussion. S-U grades only. Offered even-numbered years. C. M. S. Fewtrell.

This course focuses on regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Topics include calcium channels and exchangers, calcium-binding proteins, and calcium stores; phosphatidylinositol turnover, release of calcium from intracellular stores, and activation of calcium influx; calcium gradients and oscillations; mechanisms of exocytosis and the proteins involved. Each topic will be introduced with a lecture followed by discussion of recent papers from the literature.

**VETMM 701 Organ System Toxicology (enroll in VETPR 701) (also TOX 611)**

Fall. 1 credit. For graduate students in environmental toxicology. S-U grades only. Offered even-numbered years. W. S. Schwartz.

This is a minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract, and cardiovascular system will be considered.

**[VETMM 703 Receptor-Ligand Interactions (enroll in VETPR 703) (also BIONB 790-02)]**

Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered odd-numbered years. R. E. Oswald and G. A. Weiland.

The course covers both the practical and theoretical tools for the study of ligand-receptor interactions, emphasizing the quantitative and physical chemical aspects of receptor theory. Topics discussed are basic methods of radioligand binding assays, including separation and measurement of bound and free ligand; characterization of receptor function; analysis of receptor structure; thermodynamic basis of the binding; methods of analyzing equilibrium binding; equilibrium binding for complex binding mechanisms; and kinetics of simple and complex binding mechanisms.]

**VETMM 704 CNS Synaptic Transmission (enroll in VETPR 704)**

Spring. 2 credits. Maximum enrollment 20 graduate students and undergraduate seniors by permission of instructor. S-U grades optional. Offered odd-numbered years. L. M. Nowak.

This is a survey course in vertebrate central nervous system physiology and pharmacology, and it focuses on mechanisms of neurotransmitter action at the membrane and cellular levels. Roles of selected neurotransmitters in normal and dysfunctional brains are covered. Topics are introduced in lectures and followed up in discussions of recent journal articles.

**VETMM 705 Molecular Mechanisms of Receptor-G Protein Coupled Signaling (enroll in VETPR 705)**

Spring. 2 credits. S-U grades optional. Offered odd-numbered years. R. A. Cerione.

This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are

examined, including adenyl cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating various ion channels, and receptors involved in cell growth regulation.

**VETMM 706 Growth Factor-Coupled Signaling (enroll in VETPR 706) (also BIOBM 734)**

Spring. 0.5 credits. By permission of the instructor. S-U grades optional. Offered odd-numbered years. R. A. Cerione.

The general theme of this course will be mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins will be covered.

**VETMM 707 Protein NMR Spectroscopy (enroll in VETPR 707) (also BIOBM 730)**

Spring. 2 credits. S-U grades optional. Offered odd-numbered years. R. E. Oswald and L. K. Nicholson.

The fundamentals of NMR will be presented and the student will acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR experiments. Application of the technique to proteins for assignment of resonances, determination of structure, and characterization of dynamics will be presented. Special approaches for applying solution NMR techniques to large proteins will be discussed.

**VETMM 708 Lipid Second Messengers (enroll in VETPR 708)**

Spring. 2 credits. Students with a general biology background may enroll by permission of instructor. Lecture-discussion. S-U grades optional. Offered odd-numbered years. H. A. Brown.

This course covers the biochemical pathways involved in the production of lipid second messengers. These pathways function as essential elements of cellular signal transduction cascades. Topics include pathways of phospholipid synthesis, regulation of major mammalian phospholipases by receptors linked through G-proteins and tyrosine kinase receptors to intracellular cascades, and subsequent metabolism of lipid products. The roles of lipids in regulating cell processes, such as membrane structure, exocytosis, cell cycle, and apoptosis, are topics for discussion following reviews of recent publications. A background in general biochemistry is recommended.

**VETMM 709 Cancer Cell Biology (enroll in VETPR 709) (also Biological Sciences 750) (Graduate)**

Spring. 3 credits. Prerequisite: Biological Sciences 330 or 331 or equivalent. Recommended: graduate courses in biological sciences. Letter grade only. Offered odd-numbered years. J. L. Guan, R. A. Levine, B. U. Pauli, and A. Yen.

This advanced graduate course will cover molecular, cellular, and genetic aspects of cancer. The course is divided into four sections. The first section will address tumor etiology, progression, and metastasis. Topics will include causes of cancer, morphologic and genetic models of cancer progression, tumor angiogenesis, tumor invasion, and metastasis. The second section will discuss cell-matrix and cell-cell interactions in cancer. Topics will include the structure and function of the major matrix receptor integrin family of cell adhesion molecules, integrin interactions with the cytoskeleton, intracellular signaling pathways in cell-ECM interactions, integrin-

mediated signaling in cellular growth regulation, changes of integrins in human tumors and metastasis, structure and function of cadherin family of cell-cell adhesion molecules, and signaling mechanisms in cell-cell interactions in normal development and cancer. The third section will be on the cell cycle. It will develop properties of the cell cycle, how its phases are measured, and changes associated with cell transformation. The fourth section will discuss the signaling pathways that regulate cell cycle progression and how oncogenes and tumor suppressor genes regulate cell proliferation, differentiation, and apoptosis.

**Special Projects and Research in Pharmacology**

Fall, spring, summer. 1-3 credits. By arrangement with instructor. S-U grades optional. Independent study or research. Field of pharmacology faculty.

These courses cover a variety of topics related to the research interests of the faculty.

**VETMM 711 The Role of Calcium in Stimulus-Secretion Coupling (enroll in VETPR 711)**

C. M. S. Fewtrell.

**VETMM 713 Mechanisms of Growth-Factor Action (enroll in VETPR 713)**

R. A. Cerione.

**VETMM 714 Central Nervous System Neurotransmitters (enroll in VETPR 714)**

L. M. Nowak.

**VETMM 718 Structure-Function of the Nicotinic Acetylcholine Receptor (enroll in VETPR 718)**

R. E. Oswald.

**VETMM 720 Modulation of Nicotinic Acetylcholine Receptor Function (enroll in VETPR 720)**

G. A. Weiland.

**VETMM 724 The Control of Hormone Secretion (enroll in VETPR 724)**

G. W. G. Sharp.

**VETMM 730 Graduate Research in Molecular Medicine (enroll in VETPR 730)**

Fall, spring, and summer. 1-12 credits. By permission of instructor. S-U grades only. This course is offered by individual faculty members in the Department of Molecular Medicine for graduate students undertaking research toward M.S. or Ph.D. degrees.

**Directed Readings in Pharmacology**

Fall, spring, and summer. 1-3 credits each topic. By arrangement with instructor. S-U grades optional. Field of pharmacology faculty. Reading and discussions.

These courses are offered to small groups or to individual students.

**VETMM 742 Receptor Mechanisms (enroll in VETPR 742)**

G. A. Weiland.

**VETMM 745 Biochemical Neuropharmacology (enroll in VETPR 745)**

G. A. Weiland.

**VETMM 747 Amino Acid Neurotransmitters (enroll in VETPR 747)**

L. M. Nowak.

**VETMM 748 Stimulus-Secretion Coupling (enroll in VETPR 748)**

C. M. S. Fewtrell.

**VETMM 750 Cell Calcium (enroll in VETPR 750)**

C. M. S. Fewtrell.

**VETMM 760 Advanced Topics in Pharmacology (enroll in VETPR 760)****Population Medicine and Diagnostic Sciences****VETPMD 664 Introduction to Epidemiology (Graduate) (enroll in VETCS 664)**

Fall, 3 credits. Prerequisites: Statistics and Biometry 601 (College of Agriculture and Life Sciences) may be taken concurrently or by permission of instructor. S-U grades optional. H. N. Erb.

Lectures and discussion deal with the fundamentals of epidemiology. Current topics in epidemiology from the fields of nutrition, infectious and chronic diseases, occupational medicine, and veterinary medicine will be reviewed to illustrate the principles and practice of epidemiology, especially of clinical-trial design and infectious-disease epidemiology.

**VETPMD 665 Study Designs (Graduate) (enroll in VETCS 665)**

Spring, 2 credits. Prerequisites: VETCS 664 and Statistics and Biometry 601 (College of Agriculture and Life Sciences). S-U grades optional. H. O. Mohammed.

Design and interpretation of cross-sectional, case-control, and cohort studies (including controlled clinical trial) are covered. Design issues will include sample size, bias, and relative advantages and disadvantages.

The course objectives are (1) to know the difference between different epidemiologic study designs and relative advantages and disadvantages of each; (2) given a problem (usually a field situation), be able to design an appropriate epidemiologic study; (3) be able to effectively analyze and criticize published epidemiologic studies.

The course will consist of lectures on the principles of epidemiologic study design and related issues (sample size calculations, validity and precision, and identification and minimizing of bias); basic analysis of epidemiologic data; and discussion of published epidemiologic studies. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies, and hybrid studies (ambidirectional, and other hybrid designs).

**VETPMD 666 Advanced Methods in Epidemiology (Graduate) (enroll in VETCS 666)**

Fall, 3 credits. Prerequisites: VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. M W F 8:45-9:35. Y. T. Grohn.

Concepts introduced in VETPMD 664 and VETPMD 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis, and strategies for the analysis of epidemiologic data.

**VETPMD 700 Special Projects in Diagnostic Endocrinology (enroll in VETDL 700)**

Fall, spring, 1-3 credits. By permission of instructor. Letter grades only. T. J. Reimers. An independent study course. Students have the opportunity to research a particular topic in diagnostic/clinical endocrinology of animals.

**VETPMD 701 Special Projects in Infectious Diseases (enroll in VETDL 701)**

Fall, spring, 1-3 credits. By permission of instructor. S-U grades optional. Diagnostic laboratory faculty.

This course provides laboratory experience with attention to specific aspects of infectious disease problems.

**VETPMD 702 Special Topics in Infectious Diseases (enroll in VETDL 702)**

Fall, spring, 1-3 credits. By permission of instructor. S-U grades optional. Diagnostic laboratory faculty.

The objective of this course is to offer a broad exposure to various aspects of infectious diseases.

**VETPMD 703 Doctoral-Level Thesis Research (Graduate) (enroll in VETDL 703)**

Fall, spring, 6-9 credits. By permission of instructor. S-U grades only. Diagnostic Laboratory faculty.

Research leading to a Ph.D. degree.

**VETPMD 704 Master's - Level Thesis Research (Graduate) (enroll in VETDL 704)**

Fall, spring, 1-3 credits. By permission of instructor. S-U grades only. Diagnostic Laboratory faculty.

Research leading to an M.S. degree.

**VETPMD 705 Interdisciplinary Approaches to Animal Health (enroll in VETDL 705)**

Spring, 3 credits. Minimum enrollment 7. S-U grades optional. A. L. Rivas.

**VETPMD 707 Clinical Biostatistics (Graduate) (enroll in VETCS 707)**

Spring, 2 credits. For veterinary residents or graduate students. Letter grades only. Offered odd-numbered years. H. N. Erb, Y. T. Grohn, H. O. Mohammed, and J. M. Scarlett.

This course will explain the theory behind and interpretation of parametric and nonparametric statistical techniques commonly employed in research/clinical medicine. Students will analyze small data sets using a commercial statistical software package.

**VETPMD 708 Epidemiology Seminar Series (Graduate) (enroll in VETCS 708)**

Fall, spring, 1 credit. S-U grades only. Epidemiology faculty.

Advanced theoretical and analytical epidemiologic concepts and techniques will be discussed.

**VETPMD 766 Graduate Research (Graduate) (enroll in VETCS 766)**

Fall, spring, summer. Credit and hours TBA. Students must be registered in masters or Ph.D. program in epidemiology and obtain permission of the graduate faculty member concerned. S-U grades only. Epidemiology faculty.

This course enables students outside the section of Epidemiology to receive graduate

research credits for projects with epidemiological components.

**VETPMD 799 Independent Studies in Epidemiology (enroll in VETCS 799)**

Fall, spring, 1-3 credits. H. N. Erb, Y. T. Grohn, H. O. Mohammed, and J. M. Scarlett.

The purpose of this course is to investigate an epidemiologic topic with one of the instructors. It provides experience in problem definition, research design, and the analysis of epidemiologic data.

**FACULTY ROSTER**

Abou-Madi, Noha, D.V.M., U. of Montreal (Canada). Lecturer, Clinical Sciences  
 Aguirre, Gustavo D., Ph.D., U. of Pennsylvania.  
 Alfred H. Caspary Professor, Clinical Sciences  
 Ainsworth, Dorothy M., Ph.D., U. of Wisconsin-Madison. Assoc. Prof., Clinical Sciences

## COLLEGE OF ARTS AND SCIENCES

### PROGRAM OF STUDY

#### Introduction

The College of Arts and Sciences—composed of departments in the humanities and the arts, the basic sciences, mathematics and computer science, and the social sciences and history—is a community of about 4,000 undergraduates and 600 faculty members. The college values intellectual breadth and rigor, individual choice and responsibility, imaginative courses of study, and development of critical thinking and writing. The college is also a graduate school and research center attracting faculty whose research and scholarly and creative work require first-rate academic facilities and who bring to all their students the profound questioning and the current ideas of contemporary scholarship. Finally, the college exists within a university of about 19,000 students and 1,500 faculty members. This wider community provides depth and diversity of applied and professional studies beyond what one undergraduate college alone can offer. Students may draw upon the knowledge and facilities of the other undergraduate colleges at Cornell to supplement their studies. Abundant variety and outstanding quality in many fields, including interdisciplinary fields, give the college and the university its distinctive character.

The richness of the college's curriculum is extraordinary; there is no course that all students must take, and there are nearly 2,000 from which they may choose. By choosing courses each semester, students design their own education. They strike a balance between developing known interests and exploring new subjects. They sharpen their verbal and quantitative skills. They also come to understand more thoroughly the Western tradition and learn something about the non-Western world and its peoples. An education in the liberal arts and sciences means honing one's critical capacities, learning about oneself in nature and culture, and gaining real experience with views of the world radically unlike one's own. All this is highly individual, and the college relies on each student and faculty adviser to design a sensible, challenging, and appropriate course of study.

Yet the faculty believes that each student's education should have certain common qualities. These include familiarity with several different ways of knowing that are reflected in clusters of disciplines in the natural sciences, the social sciences, and the humanities and the arts. In addition to these general areas of knowledge, students study foreign languages, acquire effective writing and quantitative skills, and concentrate on one particular field to develop the powers of imaginative and critical thinking as fully as possible. To accomplish these objectives, the college has certain requirements for graduation.

### The College of Arts and Sciences awards one undergraduate degree, the Bachelor of Arts degree

#### Summary of Requirements

- 1) First-Year Writing Seminars: two courses. (See "John S. Knight Writing Program," p. 563.)
- 2) Foreign language: proficiency in one language or qualification in two; zero to four courses, depending on background.
- 3) Distribution: nine courses, three of which are satisfied with a major in humanities or social sciences and four of which are satisfied with a major in sciences.
- 4) Breadth: two courses (may be among courses for distribution, major, or electives).
- 5) Major.
- 6) Electives: four or five courses (at least 15 credits) not used to fulfill other requirements and not in the major field.
- 7) Residence: eight full-time semesters, unless a student can successfully complete all other requirements in fewer than eight semesters and meet the additional criteria to accelerate graduation. (See below under "Acceleration.")
- 8) 34 courses: a three- or four-credit course counts as one course. A two-credit course counts as half a course; a one-credit course does not normally count toward the requirement; a six-credit language course counts as one and one-half courses. (See below under "Courses and Credits" for some one-credit courses in music, dance, and theatre performance that can be cumulated to count as one-half course and for counting other five and six credit courses.)
- 9) Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (Note "Non-credit courses below.")
- 10) Physical education: completion of the university requirement (passing a swim test and two one-credit non-academic courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester.
- 11) Application to graduate. (See below under "Graduation.")

#### Explanation of Requirements

##### Foreign Language Requirement

The faculty considers competence in a foreign language essential for an educated person. Studying language other than one's own helps students understand the problematics of language, our fundamental intellectual tool, and more fully opens another culture for exploration. The sooner a student acquires competence, the more useful it will be.

Hence, work toward the foreign language requirement should be undertaken in the first two years. Courses in foreign languages and/or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Linguistics, Near Eastern Studies, Romance Studies, and Russian Literature.

The language requirement may be satisfied in one of two ways:

- 1) by attaining *proficiency* (competence at the intermediate level) in one language **or**
- 2) by attaining *qualification* (mastery of an introductory sequence) in two languages.

##### Proficiency

Proficiency may be attained in languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Some introductory language courses are taught at the 300- or 400-level (for example, Near Eastern Studies 333–334); these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP language exam earns three credits but does not carry with it proficiency. However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE (Cornell Advanced Standing Examination), which is given during orientation week. On the other hand, a score of 4 or 5 on an AP literature exam in French or Spanish earns proficiency, as well as three credits. Students with those scores should also take the CASE to see if they can earn an additional three credits. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE (see chart below). Native speakers and writers of a language other than English may earn proficiency and six credits by taking the CASE exam or an individual exam (if no CASE exam is available).

##### Qualification

Qualification may be attained in any of the following ways:

- 1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course through an examination. Being placed below the intermediate level does not cancel the qualification.
- 2) Passing the requisite Cornell course: 102, 123, or 134 in most languages; Chinese 110, 112, or 114; Japanese 120, 160, or 241; Korean 102 or 110; Near Eastern Studies 102 or Jewish Studies 106 in Hebrew, 112 in elementary Arabic; 118 in

Elementary Turkish; Classics 103 or 104 in Greek, 106 or 107 in Latin; 132 in Sanskrit (also Classics 132).

Note: Except in the case of Sanskrit, completion of language sequences 131–132 does not constitute qualification.

- 3) A score of 600 in French, 580 in German, and 590 in Italian or Spanish on the SAT II taken in high school or a score of 56 or higher on the appropriate Cornell LP (Language Placement) test.

Students may earn a score of 56 on the placement test at the end of a course numbered 122 (second semester of the introductory sequence) and consequently attain *qualification* without taking 123, the third semester of the introductory sequence.

- 4) By departmental or (when no placement test is available) individual examination at Cornell (if a qualified examiner is here).

#### Placement in Language Courses and Advanced Placement Credit

Placement into language courses and advanced placement credit are separate results of examinations.

#### Placement

Entering students who have had two or more years of high school study in a language, who have been awarded credit for language work at another college or university, or who are native speakers, bilingual, or have spoken the language at home, may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course, or AP, if the score was 4 or 5) or at Cornell (LP test). Students may, but need not, retake a language test if a year or more has passed since last taking it. Being placed into a 200-level course does not earn credit toward the degree. Credit is earned only for high school work equivalent in level to language courses numbered 200 and above at Cornell.

#### Placement Tests and Advanced Placement Credit

The type of test depends upon the language and the student's level of achievement:

- 1) Eight languages offer scheduled placement and advanced standing tests at the beginning of each semester. The schedule of Chinese, Japanese and Korean is available from the Department of Asian Studies; German from the Department of German Studies; French, Italian, and Spanish from the Department of Romance Studies; and Russian from the Department of Russian Literature. Please note that the advanced standing examination in French, German, Italian, Russian, and Spanish, is called the CASE (Cornell Advanced Standing Examination). Eligibility for the CASE may be determined from the placement tables below. In Russian only, *all* students seeking placement take the CASE.

Native speakers of Spanish who have completed their secondary education in a Spanish-speaking country do not take the CASE. For these students, the Spanish program offers a walk-in service, the Native Language Accreditation for Spanish, in the third week of September and the first week of February. Students

\* Students who have a score of 65 or higher on the LPS, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Spanish 200, 201, 203, or 213 without taking the CASE.

interested in this service should contact Eleanor Dozier in Morrill Hall. Spanish-English bilinguals who do not fit the definition of "native speakers," and whose test scores make them eligible, should take the CASE.

- 2) Arabic: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.
- 3) Greek, Ancient and Modern: departmental examination, Department of Classics, 120 Goldwin Smith Hall.
- 4) Hebrew: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.
- 5) Latin: departmental examination, Department of Classics, 120 Goldwin Smith Hall.
- 6) Turkish: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

### Substitutions to the Language Requirement

Outright waivers of the requirement are never granted. However, rarely and as appropriate, alternative courses are approved. Legitimate requests for substitutions require evidence of inability to learn foreign languages in a classroom setting. Most students provide documentation of learning disabilities relating to foreign language acquisition (e.g., an auditory processing problem) to Student Disability Services, 234 Day Hall, 255-3976. Other students who may never have been tested for a disability reveal it through repeated and dedicated but vain attempts in formal language courses. A poor grade in a Cornell introductory language course or taking the LP exam repeatedly and unsuccessfully is not adequate evidence.

Students who wish to request a substitution for the normal requirement should meet with Dean Walbridge, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall. If Dean Walbridge determines that the request has merit, the student meets with the Language Substitution Review Committee. This committee makes the final decision for or against a substitution. If a substitution is allowed, the committee works with the student to select substitute courses.

### Distribution Requirements

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view among disciplines in the college and explore areas that may be entirely new to them. Although students may complete the requirements over eight semesters, they can take advanced courses in subjects they (perhaps unexpectedly) find intriguing only if they have completed the introductory prerequisites.

Students must take a total of nine courses of three or more credits each for the distribution requirements: four courses from Groups 1 and 2 below, at least two of which are from Group 1 and at least one of which is from Group 2 (for example, one chemistry, one physics, one geology, and one mathematics); five courses from Groups 3 and 4 below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts). Courses in the major may be applied to the distribution requirements.

## 1. Physical and Biological Sciences

In fulfilling the science distribution requirement, students must take at least one course from the primary list of courses and may select additional courses from the supplementary list.

### Primary list:

Astronomy: all courses *except* 233 and 234

Chemistry: all courses

Eath and Atmospheric Sciences: all courses

Physics: all courses

Biological Sciences: all courses *except* 152, 200 (*unless permission of the associate director of biology is obtained*), 208, 209, or 367. The following courses are especially suitable for the distribution requirement because they have no prerequisites: BIOG 101-104, 105-106, 107-108, 109-110, 154, 170, 202, 207; BIOGD 184; BIOMI 192; BIOAP 212; BIOPL 240, 241; BIOES 264, 275. *Note that introductory biology can count for distribution only when completed as a two-semester sequence: 109-110, 105-106, or 101 and 103 plus 102 and 104, or 107-108, or a combination of the first term of one sequence and the second term of another.*

### Supplementary list:

Animal Science: 100, 150, 212

Anthropology: 101, 208, 275, 371, 390, 474, 490

Applied and Engineering Physics: 110

Biology and Society: 301

Entomology: 212

Food: 200

Materials Science and Engineering: 277

Natural Resources: 201, 210, 301

Nutritional Science: 115

Plant Breeding: 225

Psychology: 223

## 2. Quantitative and formal reasoning

City and Regional Planning: 320

Computer Science: 100, 211, 312

Economics: 319, 320, 321

Industrial & Labor Relations: 210, 211

Linguistics: 216

Mathematics: all courses *except* 101 and 109

Operations Research & Industrial Engineering: 115

Philosophy: 231, 331, 431, 432, 434, 436

Physics: 205, 209, 210

Psychology: 350

Sociology: 301

If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics.

Under exceptional circumstances and upon petition, certain Cornell courses not listed above under Group 2 (courses

such as those appearing on the following auxiliary list) may be used to satisfy the requirement in quantitative and formal reasoning. The petition should provide a persuasive rationale both in terms of the student's course of study and in terms of meeting the goals of the requirement.

**Auxiliary list:** Agricultural Economics 310; Agricultural Engineering 151; City and Regional Planning 321; Industrial and Labor Relations 312; Linguistics 421, 450; Psychology 472-473 (a sequence of two two-credit courses which may count only in its entirety as one course)

## 3. Social sciences and history

Africana Studies: 171, 172, 191, 204, 205, 220, 231, 271, 280, 283, 290, 300, 301, 311, 352, 370, 380, 381, 410, 420, 451, 459, 475, 478, 479, 483, 484

American Studies: 101, 102, 109, 110, 201, 202, 320

Anthropology: all courses *except* 101, 208, 275, 371, 390, 451, 452, 453, 474, 490

Archaeology: 100, 201, 202, 203, 204, 255, 256, 263, 275, 317, 353, 355, 362, 370, 405, 409, 458, 459, 466, 467, 469, 493, 494

Asian Studies: courses in Asian anthropology, economics, government, history, linguistics, or sociology

Asian American Studies: 110

Biology and Society: 301, 342, 407, 427

City and Regional Planning: 100, 101

Cognitive Studies: 101, 201

Economics: all courses *except* 317, 318, 319, 320, 321

Engineering: 250, 292

Government: all courses

History: all courses

Linguistics: all courses *except* 131, 132, 236, 238, 251, 252, 315, 316

Near Eastern Studies: 244 and all other courses in Near Eastern archaeology and history

Philosophy: 191

Psychology: all courses *except* 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492

Religious Studies: 150, 203, 239, 244, 248, 251, 257, 258, 263, 264, 265, 320, 322, 335, 345, 350, 365, 368, 393, 442, 443, 451, 459

Science and Technology Studies: 101, 201, 233, 250, 281, 282, 283, 285, 287, 292, 311, 350, 352, 355, 360, 390, 391, 401, 407, 411, 427, 433, 442, 444, 447, 453, 466, 467, 483, 490, 493, 645

Sociology: all courses *except* 301

Women's Studies: 206, 211, 212, 234, 244, 277, 281, 307, 321, 362, 438, 459, 467, 478, 479, 480, 487, 488, 631, 688

## 4. Humanities and the arts

Africana Studies: 202, 210, 211, 265, 285, 303, 304, 310, 422, 425, 431, 432, 435, 455

American Studies: 101, 102, 109, 110, 201, 202, 324

Anthropology: 100, 290, 451, 452, 453, 455

Archaeology: 100, 221, 309, 321, 352, 357, 366, 380, 417, 423, 434, 435, 520, 629

Asian Studies: 208, 211, 212, 215, 218 and other courses in Asian art, literature, religion, or culture

Asian American Studies: 110

Biology and Society: 205, 206

Classics: courses at the 200-level and above in Classical civilization, art, and archaeology; Classical languages at the 200-level and above

Comparative Literature: all courses

English: all courses at the 200-level and above

French Literature: all courses *except* language courses

German Studies: all courses *except* 121, 122, 123, 204, 205, 206, 303, 304, 305, 306

History of Art: all courses

Italian Literature: all courses *except* 205 and language courses

Music: one course of at least three credits, *excluding* musical performance, organizations, and ensembles. If a student chooses to satisfy part of the distribution requirement with more than one music course, an acceptable sequence may include four credits in musical performance, organizations, or ensembles combined with introductory, theory, or history and culture courses. (Students may count performance credits as only one course toward distribution.)

Near Eastern Studies: courses in Near Eastern civilization or literature, including 244 and language courses at the 200-level and above

Philosophy: all courses *except* 191 and courses in logic

Religious Studies: 101, 197, 198, 213, 223, 227, 229, 230, 231, 234, 239, 244, 250, 251, 252, 255, 262, 295, 297, 315, 328, 332, 333, 334, 337, 342, 344, 347, 350, 351, 352, 354, 355, 357, 358, 359, 360, 362, 395, 410, 420, 441, 449, 473, 531

Russian Literature: all courses *except* language courses

Science and Technology Studies: 205, 206, 286, 381, 384, 389, 390, 481, 681

Spanish Literature: all courses *except* language courses

Theatre, Film and Dance: all three- or four-credit courses at the 200-level or above *except* technical production studios

Women's Studies: 211, 246, 279, 318, 327, 370, 381, 405, 433, 464, 476, 491, 493, 605, 610, 656

### Restrictions on Applying AP Courses and Credit from Other Institutions to the Distribution Requirements

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups 1 and 2 (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in science at Cornell. Transfer credit applied to distribution in Group 2 (quantitative/formal reasoning) must be in mathematics

or computer science; it may not be in other quantitative subjects, for example, statistics or logic.

Students may apply no advanced placement or transfer credit from other institutions toward satisfaction of the distribution requirements in Groups 3 and 4 (social sciences/history and humanities/arts).

**Students who transfer to the college from another institution or who enter through the Mid-Year Freshman Program** are under the above rules for advanced placement credit, but are eligible to have credit for post high school coursework taken at their previous institution count towards all distribution requirements. Transfer students receive a detailed credit evaluation when they are accepted for admission.

### Restrictions on Applying Cornell Courses to the Distribution Requirement

- 1) Freshman writing seminars may not count towards any distribution requirement.
- 2) No single course may satisfy more than one distribution requirement. However, students may count courses in their major towards distribution. Courses offered or cross-listed by their major department may not be counted towards any distribution category beyond the usual category of the major department itself. For example, a history major may not count a course cross-listed between history and a literature department towards distribution in the humanities.

### Breadth Requirements

Students must include in their undergraduate curricula at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe and one course that focuses on an historical period before the twentieth century. Courses that satisfy the geographic breadth requirement are marked with an @ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a #. Many courses satisfy both requirements, and students may in fact use the same course to satisfy both. Students may use courses satisfying distribution, major, or elective but not writing requirements in satisfaction of either of the breadth requirements. They may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement. They may not apply (a) to either of the breadth requirements advanced placement, (b) credit awarded by examination or, (c) if matriculating as freshmen (unless through the Mid-Year Freshman Program), transfer credit.

### The Major

In their last two years, students devote roughly one-half their time to acquiring depth and competence in a major subject. The choice of major does not define a student's intellect or character or lead directly to a lifetime's occupation, although it sometimes does some of each. By majoring, students focus and develop their imaginative and intellectual capacities through a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found on the following pages in the descriptions of the department and program.

Students may apply for acceptance into the major as soon as they have completed the prerequisites. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. Students must be accepted into a major before the beginning of the junior year. A department or program may refuse admission into the major if the applicant's performance does not meet established standards. A student without a major at the beginning of the junior year is not making satisfactory progress toward the degree, must meet with an advising dean, and may not be allowed to continue in the college.

### Available majors

Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, science of earth systems, and women's studies.

Some students want to pursue an interest that cannot be met within an established major. They may plan, with the help of their faculty adviser, an independent major that includes courses from several departments. See "Independent Major Program," below, under "Special Academic Options." Whatever the major—chemistry, math, philosophy, or music—graduates from the College of Arts and Sciences earn the one degree the college awards, a Bachelor of Arts.

### Double Majors

Only one major is required for graduation. Some students choose to complete two majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors will be posted on the official transcript.

### Electives

Of the 34 courses and 120 credits required for graduation, almost one-third are free electives. How students use these electives frequently makes the difference between an ordinary and a truly interesting course of study. Students must complete at least four courses and at least 15 credits offered outside the major field and not used to fill another requirement except breadth. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to complete one of the established interdisciplinary concentrations described in the pages following descriptions of departments or may form their own unofficial concentration or "minor" separate from their major. Students may also group electives into a second major. Since only one major is required, students may count courses in a second major as electives. Some students choose to explore a variety of subjects; some develop a concentration in a department or subject outside Arts and Sciences to gain practical training or specialized knowledge.

### Residence

The College of Arts and Sciences is a residential college for students who devote their energy and spirit to full-time study. The

faculty believes that integrated, full-time study for a defined period best promotes intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible.

Transfer students from other institutions must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in the College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus in Ithaca as students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, Urban Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Nonetheless, students may spend no more than two semesters on such programs and must be on campus during their last semester.

Semesters of extramural study in the Division of Continuing Education and summer sessions do not count as semesters of residence.

Students occasionally enter with credit from other institutions, take leaves and complete courses at other institutions, or take summer courses at other institutions. The college will accept credit for such courses, if they are comparable to courses offered by departments at Cornell and are approved by those departments (approval forms are available in the Office of Undergraduate Admissions and Advising, 55 and 172 Goldwin Smith Hall). Students may not, however, count such credit as part of the 100 credits required in the College of Arts and Sciences or use such credit to replace a term of residence. Students may complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell only if they have completed their eight full-time semesters of residence or satisfied the criteria listed below under "Part-time study in final semester."

#### Acceleration

Some students decide that they do not need eight semesters of residence to obtain a solid undergraduate education. These students must compress the first four semesters and spend four full semesters in the major. Benefitting from opportunities for advanced, seminar, and independent (sometimes honors) work is what best characterizes undergraduate education in the college. Students considering acceleration should discuss their plans with their major adviser.

Accelerants apply to graduate two semesters before their intended new graduation date. They must obtain an "Application to Graduate" in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

1. Accelerants must meet either condition *a* or *b*:
  - a. Complete 60 credits before beginning their last four semesters in the college and complete the prerequisites for admission to the major in

time to spend *four* semesters in the major.

- b. Pass 48 credits in College of Arts and Sciences courses numbered "300" and above. Upper-level courses taken in other colleges at Cornell University may count as College of Arts and Sciences credit only if approved for the major.
2. All accelerants are required to complete 100 credits at Cornell at "C" or above. Courses completed with a grade of "S" will count toward the 100 credits. Advanced placement credits do not count towards this requirement.
  3. Students may not use credits earned while on leave of absence to reduce their terms of residence.
  4. Accelerants may not finish the degree with credits earned in summer or winter session, through part-time study (unless they meet the guidelines for part-time study), or at an off-campus program, including Cornell-in-Washington, SEA Semester, Urban Semester, or study abroad. That is, they may not exit through any program other than a regular, full-time Cornell semester in Ithaca.

Students matriculating as freshmen may not compress their undergraduate education into fewer than six semesters of residence. Transfer students, both from other institutions and from other colleges at Cornell, must spend at least four semesters in the college on campus in Ithaca.

#### Ninth term

Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is approved, the student enrolls in the college as a special student for the additional work. Such a status allows enrollment in a full schedule of courses for full tuition and full use of campus resources, but allows financial aid only from loans or outside agencies, not from Cornell funds. Students who need only a part-time schedule of courses in a ninth or tenth term in order to graduate should complete the outstanding courses as part-time students paying pro-rated tuition. Students may spend a ninth term with Cornell aid only with permission of the Committee on Academic Records. Such permission is normally granted only to:

1. Students who have been ill or have an exceptionally compelling academic plan.
2. Students attracted late to a field with a hierarchical curriculum (for example, physics).
3. Students who were academically under-prepared for the curriculum at Cornell and needed to begin with a lighter schedule of courses than normal. (See Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, about this option.)

#### Part-time study

Students in good academic standing may take a personal leave of absence and enroll in the Division of Continuing Education, but such semesters of extramural study do not count as terms of residence and credits from such semesters may not be used to reduce the terms of residence.

#### Part-time study in special circumstances

The college and university support students (with financial aid and services) as best they can to make full-time study possible. Occasionally, however, extraordinary but nonfinancial personal, academic, or medical circumstances make becoming a part-time student necessary and appropriate. Students in good academic standing who face extraordinary situations or who have documented disabilities may petition the Committee on Academic Records for part-time status and proration of tuition in the college.

Students requesting part-time status should discuss their situation with Dean Walbridge if their reason is a documented disability that, under the Americans with Disabilities Act, requires appropriate accommodations. Otherwise, students should meet with a dean of their class.

#### Part-time study in final semester

Students may complete their degrees as part-time students at Cornell after fewer than eight semesters of full-time residence only if:

- 1) They have completed all requirements by the end of the sixth or seventh term, met the criteria for accelerated graduation, and are remaining to complete study beyond what is required for the degree.
- 2) They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

In all cases, approval of an advising dean must be sought in the semester *prior* to the part-time semester.

#### Courses and Credits

##### Counting courses and credits

Students must complete at least 34 courses to graduate—that is, an average of four courses during each of six semesters and five courses during each of two semesters. A three- or four-credit course counts as one course; a two-credit course counts as one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series and two in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and of Theatre, Film and Dance). Three one-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as eight credits and 2 1/2 courses each. Archaeology and geology fieldwork for more than six credits counts as two courses each. Biology 281 counts as 1 1/2 courses. Other five- or six-credit courses count as one course. AP exam scores that result in an award of three or four credits count as one course; those in language that result in six credits count as 1 1/2 courses; those in biology that result in six credits count as two courses; those that result in an award of eight credits count as two courses.

Students must also complete 120 credits, 100 of which must be from courses taken in the College of Arts and Sciences. Liberal arts courses approved for study abroad during a semester or academic year of full-time study (not summer study) and courses taken in

certain off-campus Cornell residential programs may be counted toward the 100 credits required in the college and also toward the required 34 courses. Credits earned in other colleges at Cornell, or in any subject at institutions other than Cornell, do not count as part of the 100. Nor do advanced placement credits count as part of the 100. The only exceptions are for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements and for up to two courses that an adviser accepts as part of a completed and formally established cross-college, interdisciplinary concentration.

#### Using courses towards more than one requirement

A course may fulfill more than one college requirement in the following situations:

- 1) A course may be used to fulfill a distribution requirement and also a major requirement.
- 2) A one-semester course in foreign literature (not language) that is acceptable for achieving proficiency in that language may also be used as a partial fulfillment of the distribution requirement in the humanities and the arts.
- 3) Courses may count toward breadth requirements and toward any other requirement except Freshman Writing Seminars.
- 4) Courses in a second major may count as electives.

#### Auditing

The college encourages its students to take advantage of its rich curriculum by sitting in on courses that interest them but that they cannot commit themselves to for credit. As long as the instructor agrees, students are welcome to visit courses. Small seminars and language courses are sometimes not open to visitors. Audited courses do not appear on the student's schedule or transcript.

#### Repeating courses

Students occasionally need to repeat courses. If the instructor certifies that the course content has been changed, credit will be granted a second time. If the content has not changed, both grades nonetheless will appear on the transcript and be included in any average that is calculated, but credit will be counted toward the degree only once; students considering repeating a course under this circumstance should discuss the matter with their adviser and an advising dean. Students who plan to repeat a course submit a petition to the college registrar. If the original course grade was F, no petition is necessary.

#### Non-credit courses

The college does not grant credit toward the degree for every course offered by the university. Courses in physical education, remedial or developmental reading, high school mathematics, supplemental science and mathematics offered by the Learning Strategies Center, keyboarding, shorthand, military training, training as emergency medical technician, and service as a teaching assistant are among those for which degree credit is not given and that do not constitute part of the 12 credits required for good academic standing.

Students enrolled in courses for undergraduate teaching assistants may petition once to have

the nondegree credits count towards good academic standing. This would allow continued eligibility for graduating with distinction in all subjects, but would disqualify the student from being on the dean's list that semester.

Examples of noncredit courses:

Physical Education

All courses numbered below 100 (with the exception of Computer Science 099)

All courses in Military Science, Naval Science, and Aerospace Studies (unless they are cross-listed in a college department)

A&LS 134

Biology G 498

Communications 498

Education 498

Engineering 470

Hotel Administration 170

Human Development and Family Studies 403

Human Ecology 100, 101

Human Service Studies 403, 454

Mathematics 109

Nutritional Science 403

Psychology 498

#### Advanced placement credit

See p. 5. Advanced placement credit counts as part of the 120 credits and 34 courses required for the degree. It does not count as part of the 100 credits required in Arts and Sciences; its application to distribution requirements is restricted, as explained above under "Distribution."

#### Summer session credit

A student may earn credit toward the degree by completing courses in Cornell's summer session or by petitioning to take summer courses at other colleges. Students should consult their advisers regarding summer study plans.

Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall and from Robin Perry, 172 Goldwin Smith Hall. Credit earned in summer courses other than those at Cornell (including summer or orientation programs abroad) will not count toward the 100 credits required in the college and may be applied only to part of the Group 1 and 2 distribution requirements. Transcripts from other institutions must be sent to Robin Perry, 172 Goldwin Smith Hall.

Entering students who want to receive credit toward the degree for courses completed before matriculation in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to Robin Perry, 172 Goldwin Smith Hall. Credits completed in Cornell summer sessions will be awarded automatically.

Summer session at Cornell or elsewhere does not count toward the eight-semester residence requirement.

#### Transferring credit earned away from Cornell while on leave of absence

Students may petition to transfer credits from other accredited institutions for work completed while on leave of absence.

Petitions are available in 55 and 172 Goldwin Smith Hall. The relevant department will decide whether the course is comparable to Cornell courses. Credit approved for transfer counts as part of the 120 required for graduation and as part of the 34 courses. It does not count among the 100 credits required in Arts and Sciences and cannot be used toward graduation in fewer than eight semesters. Its application to distribution and breadth requirements is restricted as described above under "Distribution."

#### Transferring credit (for transfer students from another institution or from another Cornell college)

Transfer students must successfully complete at least 60 credits and 16 courses at Cornell; they must be in residence in the college for four regular semesters (summer session does not count toward the residence requirement). The college evaluates credit earned either at another school or college at Cornell University or at another accredited institution of collegiate rank and determines the number of credits and courses the student may apply toward the various requirements for the Bachelor of Arts degree at Cornell. In addition, it reevaluates advanced placement credit allowed by another institution, including another college at Cornell. Evaluations of transfer credits are normally provided when students are notified of their admission.

## SPECIAL ACADEMIC OPTIONS

### Degree Programs

The following five programs allow students to alter the regular college or major requirements or to work toward more than one degree.

#### Independent Major Program

The Independent Major Program allows students to design their own interdisciplinary majors and pursue a subject that cannot be found in an established major. Proposals for an independent major must be equivalent in coherence, breadth, and depth to a departmental major, well suited to the student's academic preparation, and consistent with a liberal education. Proposals must also be supported by a faculty adviser and are assessed by a board of faculty members. Independent majors substitute for established majors, but students must still satisfy all the other requirements for the baccalaureate degree. Students should contact the director of the Independent Major Program, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall, for further information. Deadlines for submitting independent major proposals are listed on the calendar supplement for the College of Arts and Sciences.

#### College Scholar Program

The College Scholar Program frees up to 40 students in each class from the usual college requirements for a degree and allows them to design their own course of study. It is meant to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars design idiosyncratic programs: some pursue diverse

interests; others integrate a variety of courses into a coherent subject.

College Scholars must complete 120 credits of course work (100 in the college), 34 courses, and, unless they receive permission from the program to accelerate, eight full terms of undergraduate study. They must complete the physical education requirement. All College Scholars must complete a senior project. They are not required to complete or fulfill the general education requirements, although members of the College Scholar Advisory Board believe that the spirit of those requirements is a good one.

Each applicant to the College Scholar Program is asked to write an essay, which is due the last Wednesday in April of the freshman year. Mid-year freshmen apply by that date in their first spring semester in the college. Students should contact the director of the program, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall, for further information.

### Dual-Degree Program with Other Colleges

The Dual-Degree Program enables especially ambitious undergraduate students to pursue programs of study in two colleges. Dual-degree candidates may earn both a Bachelor of Arts degree from the College of Arts and Sciences and (1) a Bachelor of Science degree from the College of Engineering or (2) a Bachelor of Fine Arts degree from the Department of Art in the College of Architecture, Art, and Planning or (3) a Bachelor of Science degree in urban and regional studies from the Department of City and Regional Planning in the College of Architecture, Art, and Planning or (4) a Bachelor of Science degree in architectural history from the Department of Architecture in the College of Architecture, Art, and Planning. Students enter one of these colleges as freshmen or sophomores and begin the Dual-Degree Program with the second college in the second or, in some cases, the third year. The Dual-Degree Program ordinarily takes five years to complete, and students are eligible for five years of financial aid. For further information contact the Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

### Double Registration with and Early Admission to Professional Schools

Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School, Cornell Medical College, or the Johnson Graduate School of Management, is occasionally possible. A very few exceptionally well-prepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the above-named professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms. They earn the A.B. degree after the first year of professional school.

Students with eight or fewer credits and two or fewer courses to complete may apply to enter the Master's of Engineering program during (but no earlier than) the eighth semester; dual-degree students may enter this program no earlier than the ninth semester. They earn the bachelor degree(s) after one semester of graduate school.

Students interested in the joint program with the Law School or the Graduate School of Management, or in early admission to the Master's of Engineering program should apply to the relevant program. Students interested in the joint program with Cornell Medical College should contact the health careers coordinator, 203 Barnes Hall. All candidates should confirm their eligibility with the dean of seniors, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Double-registered students must, of course, complete all requirements for the A.B. degree, including 100 credits in Arts and Sciences courses.

### Teacher Education in Agriculture, Mathematics, and Science

Students at Cornell may pursue teaching credentials in agriculture, biology, chemistry, earth science, general science, mathematics, and physics. Teacher Education in Agriculture, Mathematics and Science (TEAMS) is a university program jointly conducted by the departments of education and mathematics. Although TEAMS offers options for undergraduate and graduate study, most Cornell students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching degree (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates, during their sophomore or junior years.

For more information, contact the TEAMS student support specialist at 255-9255 or D. Trumbull, 255-3108.

### Special-Interest Options

The following options do not alter the college's requirements but enable students to pursue special interests within the usual programs.

#### Informal Minors

Some students organize electives within a discipline or department. Such informal minors can be developed with the help of the departmental directors of undergraduate studies. They are not noted on the transcript.

#### Concentrations

Established interdisciplinary concentrations, described in the pages following the descriptions of the departments and their curricula, provide structures for organizing electives. Completed concentrations are noted on the transcript.

#### Independent Study

Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the independent course, must approve the program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposal forms are available in the Office of Undergraduate Admissions and Advising, 55 and 172 Goldwin Smith Hall). In one semester students may earn up to six credits with one instructor or up to eight credits with more than one instructor.

### Undergraduate Research Program

An excellent way to benefit from being an undergraduate at a research university, at Cornell in particular, is to become an apprentice in on-going faculty research. About 400 students participate each year in creating new knowledge and earn independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—on campus and elsewhere and during the academic year and the summer—and helps students prepare for research and presenting themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have taken, through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work.

Students interested in this program should consult the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

### Language Study

**FALCON (Full-Year Asian Language Concentration).** FALCON allows students who are interested in the Far East to study Chinese or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture. Students who are interested in the Far East should be aware of the opportunities to pursue rapid and thorough beginning studies on campus with the objective of studying abroad later—in China or Japan. Students interested in this program should contact the Department of Asian Studies, 388 Rockefeller Hall; e-mail: falcon@cornell.edu.

### Language House Program

A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing conversational skills in French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. It helps prepare students who plan to study abroad and helps returning students share their cultural experiences while further increasing their language skills. Students interested in this program should see Academic Administrator Daniel Evett, 136 Goldwin Smith Hall.

### Prelaw Study

Law schools neither require nor prefer any particular program of study; they do seek students with sound training in the liberal arts and sciences. It is important that students plan a program in which they are interested and do well. Beyond that, students are advised to take courses that will develop their powers of precise, analytical thinking and proficiency in writing and speaking.

The college offers a concentration in law and society. Students should work toward

completion of this concentration because they find it interesting, not because they will impress law schools.

Students in the College of Arts and Sciences who are applying to law school may consult a career adviser in the Office of Undergraduate Admissions and Advising, 61 Goldwin Smith Hall.

### Premedical Study

The breadth and depth afforded by a liberal arts education are invaluable for people who plan medical careers, whether they intend to practice or go into research. Such training has a profound effect on the doctor's usefulness to patients, and it affords the flexibility of mind that is needed for major research undertakings. Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require particular undergraduate courses, and most students are well advised to begin chemistry in their freshman year. Students who are interested in medical careers are urged to visit the Health Careers Office, 203 Barnes Hall.

The adviser for students in the College of Arts and Sciences who are planning careers in medicine is Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

### Off-Campus Programs

Many students find it important to their majors or to their overall academic programs to study off campus or abroad for one or two semesters. When it makes academic sense, the college encourages its students to pursue such studies and grants credit toward the degree for work satisfactorily completed.

### Study Abroad

Each year about 200 undergraduates in Arts and Sciences include semester- or year-long study abroad as part of their formal undergraduate education. Ideally, study abroad builds on a broad liberal arts background in the early semesters: area studies, language training, and preparation in the proposed field of study are all essential.

Many students go abroad to pursue work in their majors. Focused academic work in an appropriate institution abroad can prepare students for advanced study or honors work in the final semesters back in Ithaca.

**The college insists wherever possible on study at foreign institutions alongside their degree candidates rather than study in self-contained programs that offer courses specially designed for foreigners.**

The primary goals of this educational immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold a new and unexpected range of social attitudes.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal course work in that language. **Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through course work before**

**studying abroad; proficiency in the language is generally the prerequisite.** At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student's preparation for study abroad.

Students planning to study abroad need solid academic credentials to do so productively and successfully. The college requires a minimum overall grade point average of 3.0 for all Cornell course work and good academic standing in the semester immediately before going abroad.

Study abroad is possible during the sophomore and junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved. Important steps to prepare for study abroad include

- substantial progress with college distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad;
- appropriate preparatory study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the college. A maximum of 10 credits is awarded for each trimester of study. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and structure. Students must continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of an advising dean in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall. Although students investigate options for study abroad and submit final applications through the Cornell Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad, an outline of prospective courses to be taken and any other relevant materials.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad do not, however, become part of the Cornell grade point average.

Students who transfer to Cornell and must complete at least four semesters of residence on campus in Ithaca may not study abroad as one of those four semesters.

### Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program

has organized archaeological projects in Central America, Greece, Israel, Italy, and New York State. Students should contact the Archaeology Program for information about the sites currently available.

### Marine Science

Shoals Marine Laboratory is a seasonal field station that offers a variety of courses and experiences designed to introduce undergraduates to the marine sciences. The laboratory is located on Appledore Island, six miles off the Maine/New Hampshire coasts. Students should contact the Office of Undergraduate Biology for further information.

### Cornell-in-Washington

The Cornell-in-Washington program offers students from all colleges in the university an opportunity to earn full academic credit for a semester in Washington, D.C. Students take courses from Cornell faculty, conduct individual research projects, and work as externs. The Cornell-in-Washington program offers two study options: (1) studies in public policy, and (2) studies in the American experience. The program also offers unique externship opportunities: students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externships are arranged through, and approved by, the Cornell-in-Washington program. For further information, see p. 20 or inquire at 311 Caldwell Hall, 255-4090. Study in Washington during a final semester of residence is allowed only and unusually by petition. Students should consult with the dean of seniors, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

### Fieldwork

Sometimes it is appropriate for students to include fieldwork as part of their major. A three-member faculty committee helps the student plan the project, arranges for ongoing supervision, and evaluates the project at the end of the term. Fieldwork almost always involves writing a long paper or several short ones, as well as practical experience. All proposals for fieldwork must be presented in advance to the college faculty's Committee on Academic Records for approval. A maximum of 15 credits in fieldwork may be earned. For further information students should contact an advising dean in Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

## ADVISING

The following advisers and offices provide academic advising or information on college procedures and regulations.

### Faculty Advisers

Each new student is assigned a faculty adviser. Advisers help students plan programs of study and advise them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or may direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if

students and advisers recognize and address problems early.

Advisers and new advisees meet first during orientation week to discuss course selection. New students are encouraged to see their advisers again early in the term, before it is too late to drop courses, to discuss their academic program and to become better acquainted. Advisers and advisees meet at least once each semester to discuss courses for the following term and more often if advisees wish to discuss academic or personal issues or to petition for an exception to college rules.

### Student Advisers

Student advisers pass on lore about the college and life at Cornell and help new students negotiate the university.

### Major Advisers

After acceptance into a major, students are assigned a major adviser, a faculty member in the major department, with whom they shape and direct their course of study. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser's support is especially important if a student petitions for an exception to the requirements for the degree.

### Office of Undergraduate Admissions and Advising

This office, 55 Goldwin Smith Hall, 255-5004 and 172 Goldwin Smith Hall, 255-4833, is a resource for faculty and student advisers and for students themselves and their parents. Advising deans are available to help students define their academic and career goals and to help with special academic options and exceptions to college rules:

Lynne S. Abel, associate dean for undergraduate admissions and advising—255-3386

Gerry Cox, juniors and seniors and pre-law advising—255-4833

Daniel Evett—Language House—255-6543

Stephen Friedfeld, dean's scholars, Cornell presidential research scholars, and undergraduate research

Ken Gabard, first- and second-year students—255-5004

Lisa M. Harris, career services—255-6926

Lawrence Lamphere, internal transfers and minority students—255-4833

Diane J. Miller, career services—255-6924

Herta Teitelbaum, faculty advising, first- and second-year students, and mid-year freshmen—255-5004

Janice Turner, minority students and pre-med advising—255-5004

Peggy Walbridge, transfer students and students with disabilities—255-4833

Catherine Wagner, juniors and seniors and dual degree students—255-4833

Patricia Wasylw, first- and second-year students and study abroad—255-6370

## REGISTRATION AND COURSE SCHEDULING

### Enrollment in Courses in the College of Arts and Sciences

#### New Students

During orientation week, new students attend briefings and other information sessions, meet with faculty advisers, and sign into courses. The college reserves spaces in courses for its in-coming students.

#### Continuing Students

Continuing students select and schedule up to five courses of 3 or more credits and as many 1 and 2 credits as they would like during the semester prior to the one in which the courses will be taken. Students who do not "pre-enroll" during the designated period must wait until the beginning of the term and may have difficulty securing places in the courses they most want. Before signing into courses, students plan their programs and discuss long-range goals with their faculty advisers. In addition, all students are welcome to discuss programs and plans with an advising dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

At the beginning of each term, students find their schedules and should confirm the accuracy of their records on "Just the Facts."

#### Limits on Numbers of Courses and Credits

To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students must average 15 credits per semester. (AP credit and/or summer credits may reduce the average numbers of courses and credits required each semester.)

#### Minimum number of credits per semester

To maintain good academic standing as a full-time student, students must complete at least twelve degree credits per semester; if for compelling personal or academic reasons students need to carry fewer than 12 credits, they should consult their faculty adviser and an advising dean. Permission is by petition only; it is freely given for first-semester students.

#### Maximum number of credits per semester

First-term freshmen must petition to register for more than 18 credits; other students may register for more than 18 credits only if their previous term's average was 3.0 or higher. No more than 22 credits may be taken in a regular semester without permission of the faculty's Committee on Academic Records. Students who fail to receive approval for excess credits from the committee run the risk of having only 18 credits for the semester count toward the degree.

#### Attendance

Attendance in classes is a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Office of Undergraduate Admissions and Advising will notify instructors at the request of the student or the family. Nonetheless, the student must arrange to make up examinations or other work with each instructor. A student who

will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors well in advance of the absence. A student who must miss an examination must also consult with the professor in advance. Alternative arrangements are at the discretion of the instructor.

#### Adding and Dropping Courses

After course enrollment (also known as pre-enrollment), students may not adjust their schedules until the new term begins. During the first three weeks of the semester, students may change courses without petitioning. Add/drop forms are available in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall.

After the third week of classes, students must petition to add courses and may normally add them only for a letter grade. They may drop courses up to the seventh week of the term, if the department approves and no issue of academic integrity is at stake. Between the seventh and twelfth weeks students may petition to withdraw from courses, if (1) the instructor approves; (2) the adviser approves; (3) no issue of academic integrity is at stake; and (4) an advising dean approves. Students must meet with an advising dean to obtain petition forms.

Courses dropped after the seventh week will be noted on the transcript by a "W" where the grade would normally appear. No petitions to withdraw from courses may be submitted after the end of the twelfth week in the term. Deadlines for short courses will be adjusted according to the length of the courses.

#### Leaves of Absence

Taking time off from college to explore goals and direction or to gain experiences or funds is sometimes useful. Usually, of course, students take leaves at the end of a semester for the following semester. Students in good academic standing, however, may take a leave as late as the seventh week of a semester, although there are serious financial consequences to taking leaves after a term has begun. Five years is the maximum length of time a student may be on leave and return without special permission. Leaves of absence are of four types:

- 1) *Personal leaves* impose no conditions concerning reentering the college except for the five-year limit. Readmission is automatic upon written request made at least one month before the beginning of the term in which the student wishes to return.
- 2) *Medical leaves*, usually for at least six months, are granted by the college only on recommendation by University Health Services. In some cases, students must satisfy the UHS that the condition requiring the leave has been corrected before they may return. The student's academic standing will also be subject to review at the time of the leave and on return.
- 3) *Conditional leaves* are granted when the student is not in good academic standing or, in unusual circumstances, between the seventh and twelfth weeks of the term. In consultation with the student, an advising dean sets the conditions for the student's return. Normally students may not return from conditional leaves for at least two

terms or until specific and individual conditions, such as completing unfinished work, have been met. Students may be granted conditional leaves after the twelfth week of a term only under extraordinary circumstances and with the approval of the faculty's Committee on Academic Records.

- 4) **Required leaves:** The Committee on Academic Records may require a leave of absence if a student is not making satisfactory progress toward the degree. See the section "Academic Actions."

Any student who wishes to take a leave of absence should consult an advising dean in the Office of Undergraduate Admissions and Advising, 55 or 172 Goldwin Smith Hall. On readmission, the student's graduation date will be recalculated.

Students who take courses elsewhere while on leave may petition to have credits transferred. If approved, these credits may be applied toward the 120 credits needed for graduation, but not toward the 100 credits required in the college. Approval depends on acceptable grades and the judgment of the relevant departments about the quality of the courses. Credits earned during a leave do not count toward the eight semesters of residence and may not be used to reduce the terms of residence. See the section "Residence."

### Withdrawals

A withdrawal is a permanent severance from the university and from status as a degree candidate. Students planning to withdraw should consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The college faculty's Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

### Transferring within Cornell (Internal Transfer)

Internal transfer from one college or school at Cornell into another is attractive for many students whose intellectual interests change. Students who want to transfer should discuss their eligibility with a counselor in the new school or college.

In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Internal Transfer Division. During the term immediately preceding transfer into the College of Arts and Sciences, students should complete at least 12 credits of courses in the College of Arts and Sciences with a 3.0 average and without any grades of *Incomplete*, any S-U grades (unless only S-U grades are offered for that particular course), or any grades below C. Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student's entire record at Cornell and the high school record, not just the work of one semester. It is also based on ability to complete the A.B. degree within a reasonable time. Interested students should see Dean Lamphere, 172 Goldwin Smith Hall.

## ACADEMIC STANDING

Students are in good academic standing for the term if they successfully complete at least 12 degree credits by the end of the term and earn no more than one D and no F or U grades. If a student completes only three courses, all grades must be above D. In addition, students are expected to make acceptable progress toward satisfying requirements for the degree and to earn grades of C (not C-) or better in at least 100 of the total credits for the degree. Courses listed above under "Noncredit courses" do not count toward good academic standing.

### Academic Actions

Students who are not in good academic standing will be considered for academic action by the faculty Committee on Academic Records or by one of the advising deans of the college. They are urged to present evidence that will help explain their poor academic performance. Students may appeal a decision or action of the committee if they have new relevant information. They must consult an advising dean about appealing.

### Warning

Any student who fails to maintain good standing will, at a minimum, be warned. A warning is posted on a student's college record but is not reported to the university registrar and does not appear on official transcripts.

### Required leave of absence

A student in serious academic difficulty may be required by the faculty Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and reregister in the college, students must describe what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some cases students will be required to furnish evidence that they are ready to return or satisfy other conditions before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee extraordinarily convincing evidence of their readiness to return. "Required leave" and the date are posted on the student's official transcript.

### Required withdrawal

The faculty Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or the requirements of the major. This action expels the student permanently from the college. "Required withdrawal" and the date are posted on the student's official transcript.

### Academic Integrity

Cornell's Code of Academic Integrity and policy about acknowledging the work of others are among the documents new students receive. Students should read them carefully rather than assume they understand what integrity and cheating are and are not. Academic integrity implies more here at the university than it usually did in high school. The standards of integrity are those that prevail in professional life. This means that

students must acknowledge and cite ideas they adopt from others (not just direct quotes) and help they receive from colleagues. With productive emphases on collaborative learning and writing, students must understand the general standards and policies about academic integrity and be sure they understand the expectations in individual courses as well. When in doubt, ask your instructor.

### Forgery on Forms

Forging signatures or credentials on college forms is an academic offense; sometimes it constitutes academic fraud. In all cases of forgery on academic forms, the effect of the forged documents shall be negated. Students may then petition properly to do whatever they attempted to do improperly. Such incidents will be recorded in the Academic Integrity Hearing Board's confidential file for forgeries. If a student forges more than once or if the forgery would advance the student's academic standing unfairly or fraudulently, or if for any other reason the situation requires some response in addition to the uniform penalty, the Academic Integrity Hearing Board might make a different recommendation, such as a notation on the student's transcript, suspension, or dismissal.

## GRADES

### Letter Grades

See Grading Guidelines, page 12.

### S-U Grades

The S-U (satisfactory-unsatisfactory) option allows students to explore unfamiliar subjects or take advanced courses in subjects relatively new to them without being under pressure to compete with better prepared students for high grades. It is not meant to allow students to reduce the amount of work they complete in a course or the amount of effort they devote to it. The S-U option is contingent upon the instructor's willingness to assign such grades. Students must select their grading option and obtain the instructor's approval for the S-U option during the first three weeks of the term. Virtually no exceptions to this deadline are permitted, and consequently students adding courses after the third week of the term must normally add them for a letter grade. A grade of S is equivalent to a grade of C- or higher; a grade of U, which is equivalent to any grade below C-, is a *failing* grade equal to an F. S means the student receives the credit specified for the course. U means no credit is given. A few courses in the college are graded exclusively S-U; in that case, the final grade appears on the transcript as SX or UX.

Courses that will count toward satisfaction of major requirements should not be taken for an S-U grade unless the department grants permission. Students may elect the S-U option in courses used to satisfy the distribution, language, and elective requirements, provided that such courses do not also count toward major requirements or serve as prerequisites for admission to the major. Students are advised to use the S-U option sparingly if they intend to apply to graduate school or for transfer to another college. There is no limit on the number of courses each term for which students may elect the S-U grade, but within the 120 credits required for the degree, a

minimum of 80 credits must be in courses for which a letter grade was received.

### Grades of Incomplete

A grade of incomplete signifies that a course was not completed before the end of the term for reasons beyond the student's control and acceptable to the instructor. Students must have substantial (normally at least 50 percent) equity in the course; that is, they must be able to complete the remaining work without further registration and must have a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form stating what work must be completed, when it must be completed, and the grade (or "frozen" incomplete) earned if the work is not completed by that date. When a final grade is reported, it is recorded on the official transcript with an asterisk and a footnote explaining that this grade was formerly an incomplete.

Students must resolve (make up or "freeze") any incompletes with their instructors before graduation.

### R Grades

R designates two-semester or year-long courses and students enroll in the course both semesters, each time for the full number of credits for the whole course. The R is recorded on the student's transcript at the end of the first term. The grade recorded at the end of the second term evaluates the student's level of performance in the course for the entire year. The total of credits earned for the whole course is listed each term.

### Grade Reports

Students should periodically check their courses and grades on "Just the Facts" to be sure that they are recorded correctly.

### Class Rank

The college does not compute class rank.

### Dean's List

Inclusion on the Dean's List for academic excellence is an honor bestowed by the dean of the college semester by semester. Based on grades, the criteria include about the top 30 percent of students and vary with the number of credits the student completes. The criteria are subject to slight changes from semester to semester and are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

## GRADUATION

### The Degree

The College of Arts and Sciences grants only one degree (no matter what the student's major): the A.B. (or B.A.). A.B. is the abbreviation of the Latin name for the degree, "Artium Baccalarius," or translated into English, B.A., "Bachelor of Arts."

### Application to Graduate

In the first semester of their senior year, students attend senior briefings and then complete an application to graduate. The application allows the college to check each student's plan for fulfilling college requirements. This process is intended to help

seniors identify problems early enough in the final year to make any necessary changes in course selection to satisfy those requirements. *Nonetheless, meeting graduation requirements is the student's responsibility;* problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

### Degree Dates

There are three degree dates in the year: May, August, and January. Students who plan to graduate in August may attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies the following May.

### Honors

#### Bachelor of Arts with Honors

Almost all departments offer honors programs for students who have demonstrated exceptional ability in the major and who have completed original independent research. The honors programs are described by individual departments in their following sections. The degree of Bachelor of Arts with honors will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have satisfactorily completed the honors program in their major and have been recommended for honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

#### Bachelor of Arts with Distinction

The degree of Bachelor of Arts with distinction in all subjects will be conferred on students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:

- 1) completed at least 60 credits while registered in regular sessions at Cornell;
- 2) ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
- 3) received a grade below C- in no more than one course;
- 4) received no failing grade;
- 5) maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four terms; and
- 6) have no *Incompletes* remaining on their records.

## CALENDAR SUPPLEMENT

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

	Fall 2000	Spring 2001
Last day for adding courses without petition.	Sept. 15	Feb. 9
Last day for changing grade option to S-U or letter.	Sept. 15	Feb. 9
First deadline for submitting independent major requests. Go to Academic Advising Center, 55 Goldwin Smith Hall, for further information.	Sept. 28	Feb. 22
Last day for dropping courses without petition.	Oct. 13	March 9
Last day to petition to withdraw from a course.	Nov. 17	April 13
Second deadline for submitting independent major requests. Go to the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, for further information.	Nov. 30	April 5
Deadline for requesting internal transfer to the College of Arts and Sciences for the following term.	Dec. 1	May 1
Deadline for applying to the College Scholar Program.		April 26
Deadline for applying to study abroad.	See Cornell Abroad, 474 Uris Hall	
Course enrollment (preregistration) for the following term.	TBA	TBA

## ADMINISTRATION

Philip E. Lewis, dean—255-4146

Jon C. Clardy, senior associate dean—255-4147

Jonathan D. Culler, senior associate dean—255-4147

Lynne S. Abel, associate dean of admissions and undergraduate education—255-3386

Jane V. Pedersen, associate dean of administration—255-7507

## Courses and Departments

### SPECIAL PROGRAMS AND AREAS OF CONCENTRATION

The college offers a number of interdisciplinary programs described in the section following the departmental program descriptions.

#### AFRICAANS

See Department of German Studies (Dutch).

#### AFRICANA STUDIES MAJOR

See Special Programs and Interdisciplinary Studies.

#### AKKADIAN

See Department of Near Eastern Studies.

#### AMERICAN STUDIES

See Special Programs and Interdisciplinary Studies.

### ANTHROPOLOGY

P. S. Sangren, chair; T. Volman, director of undergraduate studies; R. Ascher, T. Bestor, J. Borneman, J. Fajans, D. Greenwood, J. Henderson, D. Holmberg, B. J. Isbell, B. Lambert, K. March, V. Munasinghe, N. Russell, V. Santiago-Irizarry, J. Siegel, M. Small, T. Turner, A. Willford. Emeritus: J. Murra, R. Smith.

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field has broad scope, uses a variety of methods, addresses basic issues about human origins and human life, and maintains commitment to understanding social life and using this understanding to improve society. Anthropology is an ideal "liberal arts" major. It also serves as a major that, when well designed by the student with their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, social services, and business, among others.

Courses for nonmajors: Anthropology welcomes nonmajors into many of its courses. Unless prerequisites are explicitly stated, 200- and 300-level courses do not have formal prerequisites and can be taken by students without prior experience in anthropology. Such students are welcome in these upper-level courses. For additional information to assist nonmajors and students from other colleges in selecting anthropology courses, see the anthropology department web page ([falcon.arts.cornell.edu/~anthro/](http://falcon.arts.cornell.edu/~anthro/)).

### The Major

The range and complexity of the Field of Anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History" listed below under the heading "Introductory Courses." Provisional acceptance into the major is possible before completing these courses, with permission from the Director of Undergraduate Studies in anthropology. Students are encouraged to contact the Director of Undergraduate Studies or other faculty members as soon as possible in their studies to discuss their interests and a possible major in anthropology.

Students see the Director of Undergraduate Studies to apply to the major and get an adviser. They prepare a short statement about their interests and goals for the major, then meet with their adviser to develop a course plan reflecting these special interests. This concentration should include at least 32 credits in addition to the two introductory courses used to enter the major. Examples of possible concentrations are myth and ritual; ethnicity and identity; action research; nature and culture in human history; anthropology and literature, or law, or the arts, or medicine; human origins; ethnomusicology; primate and human behavior; prehistory of the Americas, or Europe, or Africa; cultural construction of the person; etc. When warranted, the adviser is free to approve up to two cognate courses from other departments totaling up to eight credit hours to fulfill the 32-credit requirement. Students may revise their program of study in consultation with their adviser as they move through their studies. Our goal is to provide a close and supportive advising relationship and a strong and coherent structure for the student's major.

In their senior year, anthropology majors are required to take a Senior Seminar (Archaeologists may substitute Approaches to Archaeology or Archaeological Research Design).

These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively, the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus, the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

**Study abroad and off-campus study programs:** the Department of Anthropology encourages students to consider a semester of study abroad or off-campus study developed as an integral part of the student's major concentration. The Director of Undergraduate Studies serves as the Anthropology Study Abroad adviser.

**The Cornell-Nepal Study Program:** the Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University, the national university of Nepal. Qualified juniors, seniors, and first- or second-year graduate students work with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year; application is through Cornell

Abroad. For further information, consult David Holmberg or Kathryn March in the Department of Anthropology.

Other anthropologically-relevant study abroad options, using existing Cornell Abroad and off-campus options, can be worked out in consultation with the major adviser, the Anthropology Study Abroad adviser, and Cornell Abroad.

### Honors

Honors in anthropology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. Anthropology majors interested in the Honors Program should consult the chair of the Honors Committee in their junior year. To qualify for entrance into the Honors Program, a student must have at least a 3.0 GPA overall and 3.3 GPA in the major, and the consent of a faculty member in anthropology who will guide the honors thesis. After applying to the program and being admitted as a candidate by the Honors Committee, the student will conduct research and write a thesis. This thesis will be evaluated by the faculty research adviser and two other faculty members. Honors (i.e., cum laude, magna cum laude, or summa cum laude) are awarded based on the quality of the thesis and the student's overall record. Honors candidates must start this process by consulting their major adviser about the honors program early in their junior year.

While working on the thesis during the senior year, students should make use of the Senior Seminar as a place to develop the ideas for their thesis. In addition, students may enroll in Anthropology 483 (fall or spring) "Honors Thesis Research." To complete the thesis, students must enroll in 491 (fall or spring) "Honors Thesis Write-up." Only Anthropology 483 may count toward hours for completion of the anthropology major requirements. The credit hours for these courses are variable, grades for these courses are given by the faculty research adviser, and they are based on performance during thesis research and writing.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

### Special Programs and Facilities

**Collections:** the department has an extensive collection of archaeological and ethnological materials housed in the anthropology collections. A limited number of students can make arrangements to serve as interns in the anthropology collections. Olin Library houses some of the most extensive collections of materials on the ethnology of Southeast Asia, South Asia, East Asia, and Latin America to be found anywhere in the United States. The biological anthropology laboratory (McGraw B65) houses an extensive collection of materials for teaching purposes, including (1) human skeletal remains, (2) articulated skeletons and cranial casts of primates, and (3) casts of important fossils in the human lineage.

**Independent Study:** specialized individual study programs are offered in Anthropology 497, Topics in Anthropology, a course open to a limited number of juniors and seniors who have obtained consent and supervision of a

faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

**Colloquia:** the Department of Anthropology holds colloquia almost every week of the semester on Friday at 3:30 in McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies, pick up a copy of the major brochure (which includes descriptions of the courses not offered during 2000-2001), or visit the Anthropology Department web page ([falcon.arts.cornell.edu/~anthro/](http://falcon.arts.cornell.edu/~anthro/)).

## I. Introductory Courses

### A. Nature and Culture:

#### **ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind**

Fall. 3 credits. M. Small.

The evolution of humankind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the roots of human biology and behavior with an evolutionary framework. Fee for lab usage and maintenance, \$5.

#### **ANTHR 103 The Scope of Anthropology**

Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102. S-U grades only. Staff.

This course is intended for majors or prospective majors in anthropology. Each week a different member of the faculty in anthropology at Cornell will make a presentation on the nature of their work within the field and discuss their interests with students. The course is meant to introduce the range of approaches found within anthropology and help students in planning future course work.

#### **[ANTHR 203 Early People: The Archaeological and Fossil Record (also ARKEO 203)] #**

Spring. 3 credits. Not offered 2000-2001.]

#### **ANTHR 211 Nature and Culture @**

Spring. 4 credits. S. Sangren.

Sociocultural anthropology, because it encompasses the comparative study of humankind in society, provides a unique vantage on the nature of humanity. One of the focal questions of the discipline is the relationship between the physical/biological, the symbolic/biological, and the symbolic/moral worlds in which people live. This inquiry places anthropology squarely at the center of social theory, as most social theories and political ideologies are founded on premises regarding human nature. Through study of several conceptual categories which have been flashpoints for debates about nature and culture (e.g., gender, race, and sexuality), this course examines a variety of past and current attempts to explain the relationships between nature and culture in human life.

#### **ANTHR 275 Human Biology and Evolution (also BIOES 275 and NS 275)**

Fall. 3 credits. S-U grades optional, with permission of instructor. Offered alternate years. Lects, W F 10:10; disc, M 10:10. K. Kennedy.

An introduction to the biology of Homo sapiens through an examination of human evolution, biological diversity, and modes of adaptation to past and present environments. Evolutionary theory is reviewed in relation to the current evidence from the fossil record and studies of the evolution of human behavior. A survey of human adaptation covers complex biological and behavioral responses to environmental stress. Human diversity is examined as the product of long-term evolutionary forces and short-term adaptive responses. Topics such as creationism, the Piltdown fraud, and sociobiology debate, genetic engineering, race and IQ, and racism are presented as examples of current issues in human biology. These topics and others are the focus of the optional one-hour weekly discussions.

### B. Culture and History:

#### **ANTHR 100 Introduction to Archaeology (also ARKEO 100) #**

Fall. 3 credits. J. Henderson.

A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both archaeology and anthropology undergraduate majors.

#### **ANTHR 102 Introduction to Anthropology: The Comparison of Cultures @**

Spring. 3 credits. T. Bestor.

An introduction to cultural anthropology through ethnographies, or the descriptive accounts of anthropologists. Through readings and lectures, students acquaint themselves with a number of cultures from several parts of the world. The cultures range in form from those of small-scale tribal societies to those of state societies. Throughout the course, we attempt to make sense of exotic cultures in their own terms. Attention is focused on variation in cultural patterns as they are expressed in social, economic, and ritual practices. In this encounter, the principles of anthropology as a comparative enterprise that pose distinct cultural systems in relief will be developed. Fiction, films, and exercises supplement the formal anthropological materials.

#### **ANTHR 103 The Scope of Anthropology**

Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102. S-U grades only. Staff.

For course description, see section I.A.

#### **ANTHR 200 Cultural Diversity and Contemporary Issues @**

Fall. 3 credits. J. Borneman.

This course will introduce students to the meaning and significance of forms of cultural diversity for understanding contemporary issues. Drawing from films, videos, and selected readings, students will be confronted with different representational forms that portray cultures in various parts of the world and they will be asked to critically examine

their own prejudices as they influence the perception and evaluation of cultural differences. We shall approach cultures holistically, assuming the inseparability of economies, kinship, religion, and politics, as well as interconnections and dependencies between world areas (e.g., Africa, Latin America, the West). Among the issues considered: "political correctness" and truth; nativism and ecological diversity; race, ethnicity, and sexuality; sin, religion, and war; global process and cultural integrity.

#### **[ANTHR 202 Interpretive Archaeology (also ARKEO 202)] #**

Fall. 3 credits. Not offered 2000-2001.]

#### **[ANTHR 204 Ancient Civilizations (also ARKEO 204)] @ #**

Fall. 3 credits. Not offered 2000-2001.]

#### **[ANTHR 215 Stone Age Art (also ARKEO 215)] @ #**

Fall. 3 credits. Not offered 2000-2001.]

#### **[ANTHR 240 Old World Prehistory (also ARKEO 240)] @ #**

Fall. 3 credits. Not offered 2000-2001.]

## II. Honors and Independent Study

#### **ANTHR 483 Honors Thesis Research**

Fall or spring. Credit and hours TBA. Prerequisite: consent of the Honors Committee. Staff.

Independent work under the close guidance of a faculty member selected by the student.

#### **ANTHR 491 Honors Thesis Write-Up**

Fall or spring. Credit and hours TBA. Staff.

#### **ANTHR 497 Topics in Anthropology**

Fall or spring. Credit and hours TBA. Intended for undergraduate students only. Staff.

Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

## III. Anthropology Major Senior Seminars

In the senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively, the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

#### **ANTHR 489 Anthropology Senior Seminar**

Fall or spring. 4 credits. Limited to 15 students. Prerequisite: anthropology majors only. Fall, A. Willford; spring, V. Munasinghe.

This course is a synthesis of each student's undergraduate concentration in the major. In collaboration, the instructor and the students will develop a series of topics representing the interests of the students. Students will be required to read extensively and present topics.

## IV. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on behavior, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

### [ANTHR 208 The Evolution of Human Mating

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 211 Nature and Culture @

Spring. 4 credits. S. Sangren.

For course description, see section I.A.

### ANTHR 242 Early Agriculture @ #

Spring. 3 credits. N. Russell.

Throughout most of the human career, people survived by hunting and gathering wild foods. The advent of food production is one of the most profound changes in (pre)history. This course examines the current evidence for the appearance and spread of agriculture (plant and animal domestication) around the world. We will consider definitions of agriculture and domestication, the conditions under which it arises, the consequences for those who adopt it, and why it has spread over most of the world.

### [ANTHR 344 Male and Female in Chinese Culture and Society (also WOMNS 344) @

Fall. 4 credits. Not offered 2000–2001.]

### ANTHR 370 Environmental Archaeology (also ANTHR 670 and ARKEO 370/670)

Spring. 4 credits. Prerequisite: 2 previous courses in archaeology or permission of instructor. T. Volman.

A survey of selected topics in paleoenvironmental analysis and reconstruction, with emphasis on how they inform interpretations of the archaeological record. The course ranges broadly from a general consideration of human ecology and the role of environment in culture change to detailed study of specific techniques and approaches.

### [ANTHR 371 Human Paleontology (also BIOES 371) @ #

Fall. 4 credits. Not offered 2000–2001.]

### [ANTHR 372 Hunters and Gatherers (also ANTHR 672) #

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 375 Evolutionary Theory and Human Behavior (also ANTHR 675)

Spring. 4 credits. Limited to 20. M. Small.

Humans are biological organism designed by Natural Selection. Our bodies and our behavior are products of genes, environment, and experience. This course will explore the interaction of all three in molding broad patterns of human behavior. The course will begin with the basics of evolutionary theory and then review the most recent research on human mating patterns, aggression, parenting, kin relations, and social interaction. Students will be required to conduct original research on human behavior.

### [ANTHR 390 Primate Behavior and Ecology

Spring. 4 credits. Not offered 2000–2001.]

### [ANTHR 409 Approaches to Archaeology (also ANTHR 609 and ARKEO 409/609)

Fall. 4 credits. Not offered 2000–2001.]

### ANTHR 422 Anthropology and Environment @

Fall. 4 credits. Prerequisite: ANTHR 100, 101, or 102 plus one 300-level course in anthropology. D. Holmberg.

This course explores issues in the environment that anthropology addresses in unique ways. Topics include indigenous knowledge, intellectual property, local and global interrelations, ecotourism, cultural ecology, development and resistance, environmentalism, and cultural diversity framed in the context of extended case studies.

### ANTHR 490 Topics on Primates and Evolution: The Evolution of Language

Fall. 4 credits. Limited to 12. Prerequisite: Anthropology 390 or permission of instructor. A. Arcadi.

This seminar will begin by examining general theoretical issues in the study of animal communication: What is the function of communication? How do signalers and receivers benefit from communicative interactions? The focal behavior of our nearest relatives, the primates, will then be examined. Emphasis will be placed on areas relevant to human language: are primate signals learned? Do they have semiotic content? Are they assembled syntactically? What do they tell us about primate cognition? Finally, distinguishing features of language, as both a highly structured system and a social behavior, will be considered from the point of view of evolution: Did language evolve from a primate focal communication system? Is there fossil and/or symbolic evidence for the origin of language? What does language tell us about human cognition?

### ANTHR 490 Topics on Primates and Evolution: Evolutionary Medicine

Spring. 4 credits. Limited to 12. Prerequisite: Anthropology 390 or permission of instructor. M. Small.

This seminar will focus on one current controversy in primatology. Through readings and discussion, the issues will be subject to critical examination. Current topics might include social intelligence, primates as predators and prey, primate conversation, sexual selection theory, reproductive success, dominance, etc.

## V. Human History and Archeology

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the worldviews of the past, while also teaching field and laboratory methods for uncovering the human past.

### [ANTHR 203 Early People: The Archaeological and Fossil Record (also ARKEO 203) #

Spring. 3 credits. Not offered 2000–2001.]

### [ANTHR 215 Stone Age Art (also ARKEO 215) @ #

Fall. 3 credits. Not offered 2000–2001.]

### [ANTHR 240 Old World Prehistory (also ARKEO 240) @ #

Fall. 3 credits. Not offered 2000–2001.]

### ANTHR 242 Early Agriculture @ #

Spring. 3 credits. N. Russell.

For course description, see section IV.

### ANTHR 317 Stone Age Archaeology (also ARKEO 317)

Spring. 4 credits. T. Volman.

A survey of current approaches to the archaeological record of Stone Age peoples, from the earliest sites to those of recent times. Case studies are used to illustrate the nature of archaeological occurrences, excavation procedures, and analytical methods. Multidisciplinary efforts to expand our knowledge of prehistoric lifeways and behaviors are a major concern of the course.

### ANTHR 355 Ancient Mexico and Central America (also ARKEO 355) @ #

Spring. 4 credits. J. Henderson.

A survey of the cultural history of ancient Mexico and Central America, emphasizing Aztec and Maya civilizations. The use of ethnographic and historical information to enrich archaeological interpretation is a general theme. Specific topics include the emergence of settled farming life, the rise of civilization and the state, and the development of mechanisms that linked the many societies in the region into a single sphere of interaction.

### ANTHR 370 Environmental Archaeology (also ANTHR 670 and ARKEO 370/670)

Spring. 4 credits. Prerequisite: 2 previous courses in archaeology or permission of instructor. T. Volman.

For course description, see section IV.

### [ANTHR 371 Human Paleontology (also BIOES 371) #

Fall. 4 credits. Not offered 2000–2001.]

### [ANTHR 372 Hunters and Gatherers (also ANTHR 672) #

Spring. 4 credits. Not offered 2000–2001.]

### [ANTHR 405 Archaeological Research Design (also ANTHR 605 and ARKEO 405/605)

Spring. 4 credits. Not offered 2000–2001.]

### [ANTHR 409 Approaches to Archaeology (also ANTHR 609 and ARKEO 409/609)

Fall. 4 credits. Not offered 2000–2001.]

### [ANTHR 456 Mesoamerican Religion, Science, and History @ #

Fall. 4 credits. Not offered 2000–2001.]

### [ANTHR 458 Archaeological Analysis (also ANTHR 658 and ARKEO 458/658) @

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 459 Archaeology of the Household (also ANTHR 659 and ARKEO 459/659) @ #

Fall. 4 credits. J. Henderson, N. Russell.

An exploration of the archaeology of domestic life. The primary focus is on identifying residential remains, defining households, and interpreting them in social terms. Topics include cyclical changes in household composition and labor organization, domestic economies, household ritual activities, and the symbolism of the house. Ethnographic and archaeological case studies will be drawn from the Southwest, Mesoamerica, South America, Europe, and the Near East.

**[ANTHR 463 Zooarchaeological Method (also ARKEO 463) #**

Fall. 5 credits. Not offered 2000-2001.]

**[ANTHR 464 Zooarchaeological Interpretation (also ARKEO 464) #**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 466 Humans and Animals (also ANTHR 666 and ARKEO 466/666) #**

Fall. 4 credits. N. Russell.

Human-animal relationships are often seen in utilitarian, especially nutritional terms. This is particularly true of the analysis of animal remains from archaeological sites. It is clear, however, that animals and meat have significance far beyond their economic value. This course focuses on these nondietary roles of animals in human societies, past and present. We will explore a broad range of issues to gain a fuller view of human relations to animals. Domestication involves not only the technical process of controlling animal movements and breeding, but more crucially requires a fundamental shift in the human perception of animals and their relationship to them. Are pets domestic animals in the same sense as animals that are eaten, or do those animals' relationships with their owners more closely resemble that of hunters with their prey? Do wild animals mean the same thing to both hunter-gatherers and farmers who hunt? We will consider the importance of animals as wealth, as objects of sacrifice, as totems (metaphors for humans), and symbols in art. Meat has undeniable dietary value, but the social aspects of consumption is also important. Meat can be used in the context of such behaviors as feasting and meat sharing to create, cement, and manipulate social relationships. In this seminar, we will examine issues primarily (but not exclusively) in the context of the ethnography and archaeology of the Old World with which the instructor is most familiar, but students are encouraged to offer examples from their own areas of expertise. This course is open to students of archaeology, cultural anthropology, and other disciplines with an interest in human-animal relations.

**ANTHR 467 Origins of Agriculture (also ARKEO 467) #**

Spring. 4 credits. N. Russell.

This course will examine the origins of plant and animal domestication and the profound social transformations that accompanied this innovation in several areas of the world. While we will consider the evidence for domestication, the focus will be on critical analysis of the models offered to explain the origins of agriculture. A comparative perspective will help us evaluate whether there is a single universal explanation for agricultural origins.

**[ANTHR 469 Gender and Age in Archaeology (also ANTHR 669 and ARKEO 469/669) #**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 493 Seminar in Archaeology (also ARKEO 493) @ #**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also ARKEO 494) @ #**

Fall. 4 credits. Not offered 2000-2001.]

**VI. Anthropological Thought and Method**

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and a wide variety of anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

**[ANTHR 215 Stone Age Art (also ARKEO 215) @ #**

Fall. 3 credits. Not offered 2000-2001.]

**ANTHR 291 Filming Other Cultures (also ANTHR 691 and THETR 291/691) @**

Spring. 3 credits. Limited to 20 students.

Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, \$35. R. Ascher.

Shortly after the first films were screened, their makers saw in motion pictures a promise for greater understanding among peoples. Was the promise fulfilled? In this discussion course, responses to this question are examined through the study of short, representative films and related readings. The discussions are framed and informed by ideas from anthropology and film studies. For example, we consider: aesthetics, ethics, and responsibility in filming and editing; connections between sound—or lack of it—and image; the implications of film as a product of Euroamerican culture; cultural assumptions in camera movements, film color, and film pace; indigenous people's presentations of themselves and Euroamerican representations of others; and the blurry, ever-changing space that separates fiction from nonfiction film. For one meeting each week, two students, in cooperation with the instructor, are responsible for leading the discussion.

**[ANTHR 306 Ethnographic Description**

Fall. 4 credits. Not offered 2000-2001.]

**ANTHR 324 Anthropology Amongst the Disciplines**

Fall. 4 credits. J. Siegel.

Ethnography has as one of its aims the comprehension of the 'other' in whose eyes the 'I' or the first person is constructed. The history of this idea in Western philosophy and literature has influenced anthropologists' understanding. We look at this history and at its inflection in ethnography, particularly in the study of ritual.

**ANTHR 362 Democratizing Society: Participation, Action, and Research (also ANTHR 662)**

Fall. 4 credits. D. J. Greenwood.

This course poses an alternative to distanced, "objectivist" social science by reviewing some of the numerous approaches to socially engaged research. Among the approaches discussed are those centering on the pedagogy of liberation, feminism, the industrial democracy movement, "Southern" participatory action research, action science, and participatory evaluation. There are no prerequisites and undergraduates are welcome.

**ANTHR 368 Marx: An Overview of His Thought (also ANTHR 668)**

Spring. 4 credits. T. Turner.

A reading and interpretation of Marx's principal writings, emphasizing both the continuities and the changes from his earlier

to his later works, with attention given to contemporary developments and controversies in Marxian scholarship.

**[ANTHR 372 Hunters and Gatherers (also ANTHR 672) #**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 403 The Craft of Anthropology: Ethnographic Field Methods (also ANTHR 603)**

Fall. 4 credits. V. Santiago-Irizarry.

This course will provide students with practical understanding about what anthropologists actually do in the field. We will examine problems that emerge in conducting fieldwork which raise ethical, methodological, theoretical, and practical issues in the observation, participation in, recording, and representation of culture(s). Students will be expected to develop a semester-long, local research project that will allow them to experience fieldwork situations.

**[ANTHR 405 Archaeology Research Design (also ANTHR 605 and ARKEO 405/605)**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 412 Contemporary Anthropological Theory @**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 420 Development of Anthropological Thought**

Fall. 4 credits. J. Fajans.

An examination of the history and development of anthropological theory and practice. The course will focus on the differences and continuities among the various national and historical approaches that have come to be regarded as the schools of anthropology.

**[ANTHR 453 Visual Anthropology**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 458 Archaeological Analysis (also ANTHR 658 and ARKEO 458/658) @**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 459 Archaeology of the Household (also ANTHR 659 and ARKEO 459/659) @ #**

Fall. 4 credits. J. Henderson, N. Russell.

For course description, see section V.

**[ANTHR 463 Zooarchaeological Method (also ARKEO 463) #**

Fall. 5 credits. Not offered 2000-2001.]

**[ANTHR 464 Zooarchaeological Interpretation (also ARKEO 464) #**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 466 Humans and Animals (also ANTHR 666 and ARKEO 466/666) #**

Fall. 4 credits. N. Russell.

For course description, see section V.

**ANTHR 467 Origins of Agriculture (also ARKEO 467) #**

Spring. 4 credits. N. Russell.

For course description, see section V.

**[ANTHR 474 Laboratory and Field Methods in Human Biology (also BIOES 474)**

Spring. 5 credits. Not offered 2000-2001.]

**ANTHR 480 Anthropology and Globalization (also ANTHRO 680)**

Fall. 4 credits. A. Willford.

This course examines anthropological perspectives on globalization and assesses the cultural, political, and social implications of contemporary global processes. In exploring

the factors that are contributing to the production of diasporic consciousness, the intensity and variety of transnational flows of culture, commodities, corporations, and people are considered in order to assess challenges these processes pose to the modern nation-state. Has culture been liberated from the control of the nation-state through the emergence of new cultural networks created by immigration, electronic media, tourism, and multinational corporations and organizations? Or has the acceleration of global processes in the modern world system created new tools of domination within an increasingly stratified global economy? This course addresses these and related questions utilizing both anthropological theories of and ethnographic studies on globalization, ethnicity, diaspora, and nationalism.

**ANTHR 487 Field Research Abroad @**

Fall or spring. Credit TBA. Intended for undergraduate students only. Staff. Field research abroad as part of the Cornell-Nepal Studies Program, the Cornell-Honduras Program, or other departmentally-approved programs. Topics are selected and project proposals prepared by students in consultation with faculty. Fieldwork typically involves extended research (usually four–six weeks) in a foreign setting with faculty supervision, culminating in a major paper or report.

**[ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also ARKEO 494) @ #**

Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 495 Classic Theorists Seminar**

Spring. 4 credits. Not offered 2000–2001.]

## VII. Understanding Cultures

Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take small-scale societies and local sociocultural systems as the object of analysis. They collect data primarily through ethnographic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

### A. Anthropological Approaches to Economy, Society, Law, and Politics:

The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and show how they are shaped culturally and how they shape culture.

**ANTHR 217 Nationalism and Revivalism**

Spring. 4 credits. A. Willford. This course explores the growing phenomenon of religious and ethnic nationalism within modern nation-states. We also examine ways in which religious and ethnic revivalism present alternative models of modernity and group identity, often defined in opposition to state-sponsored nationalist ideologies.

**[ANTHR 305 Emotion, Gender, and Culture (also WOMNS 305) @**

Spring. 4 credits. Not offered 2000–2001.]

**[ANTHR 313 Anthropology of the City @**

Spring. 4 credits. Not offered 2000–2001.]

**ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also ANTHR 621 and WOMNS 321/631) @**

Fall. 4 credits. K. March.

An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines various aspects of the place of the sexes in social, political, economic, ideological, and biological systems to emphasize the diversity in gender and sex-role definition around the world.

**[ANTHR 323 Kinship and Social Organization @**

Spring. 4 credits. Not offered 2000–2001.]

**[ANTHR 326 Economic Anthropology @**

Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 328 Conflict, Dispute Resolution, and Law in Cultural Context @**

Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 380 State, Nation, and Everyday Life**

Spring. 4 credits. Not offered 2000–2001.]

**ANTHR 422 Anthropology and Environment @**

Fall. 4 credits. Prerequisite: Anthr 100, 101, or 102 plus one 300-level course in anthropology. D. Holmberg.

For course description, see section IV.

**[ANTHR 426 Ideology and Social Reproduction @**

Spring. 4 credits. Not offered 2000–2001.]

**ANTHR 429 Anthropology and Psychoanalysis**

Fall. 4 credits. S. Sangren.

This seminar is premised on the notion that an accommodation between anthropology and psychoanalysis is not only potentially productive, but also conceptually necessary. However, there are good reasons why such an accommodation has yet to develop, and an exploration of these reasons is an important part of the seminar. How can the general or (in some cases) universalizing theories of psychoanalysis address cultural differences? Can understanding of collective institutions be advanced with reference to theories of individual motivation and desire? Conversely, can such understanding be advanced in the absence of reference to individual motivation and desire? The course will survey the history of anthropological engagement with psychoanalysis, but the main focus will be a juxtaposition of current psychoanalysis theory (mainly Lacanian) and anthropological treatments of the social production of the person (including interpretivist and structuralist arguments, but with an emphasis on the advantages of a Marxist focus on production).

**ANTHR 460 Culture and International Order**

Spring. 4 credits. J. Borneman.

This course focuses on the interplay of culture, understood in the broadest anthropological sense, with international order. We will examine how different models of linguistic categorization are replicated by and interact with one another at the level of culture and the international (or world) system. By

bringing together research from different domains that tend to be seen as discrete, this seminar hopes to explore how an anthropological perspective can inform the study of international order, and conversely, how an awareness of transnational and transcultural processes can open up more fruitful areas of anthropological research.

**[ANTHR 470 Anthropology, Theory, Politics, Performance (also GOVT 470)**

Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 479 Ethnicity and Identity Politics: An Anthropological Perspective**

Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 481 Sex, Money, and Power: Topics in Kinship Theory**

Fall. 4 credits. Not offered 2000–2001.]

**ANTHR 485 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America (also ANTHR 685) @**

Spring. 4 credits. B. J. Isbell.

Latin America is characterized today as a region of widespread yet diverse forms of mobilization that appear to be in constant transformation. The "Mad Mothers" of Argentina, indigenous environmentalists, liberation theologians, revolutionaries, ethnic leaders, gay activists, and urban squatters are challenging historicity, engaging in cultural innovation, and articulating in diverse ways with the state and national cultures. This seminar will chart a course between theoretical texts on power and mobilization and examples of ethnography/historical cases of social movements.

### B. Interpretive Approaches in Cultural Anthropology:

These courses stress symbolic or textual approaches to human society. They take as their object of analysis structures of meaning in such diverse areas as performance and text, myth and religion, views of the self, gender, and the sociology of knowledge. These same topics arise in many of the area-focused courses as well (Section D), but take center stage in the following courses.

**ANTHR 291 Filming Other Cultures (also ANTHR 691 and THETR 291/691) @**

Spring. 3 credits. Limited to 20 students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, \$35. R. Ascher.

For description, see section VI.

**ANTHR 320 Myth, Ritual, and Symbol (also RELST 320) @**

Spring. 4 credits. D. Holmberg.

This course examines how systems of thought, symbolic forms, and ritual practice are formulated and expressed in primarily non-Western societies. It focuses on anthropological interpretations of space, time, cosmology, myth, classificatory systems (such as color, totems, food, dress, kinship), taboo, sacrifice, witchcraft, sorcery, and rites of passage (birth, initiation, marriage, death). It will examine both the roles of specialists (spirit mediums, curers, priests, ascetics, etc.) and nonspecialists in producing these cultural forms.

**[ANTHR 322 Magic, Myth, Science, and Religion (also RELST 322) @**

Fall. 3 credits (4 by arrangement with instructor). Not offered 2000-2001.]

**[ANTHR 379 Culture, Language, and Thought**

Spring. 4 credits. V. Santiago-Irizarry.  
The relationship among culture, language, and thought has been a core concern in anthropology. Language and culture are commonly defined as processes that are public and shared yet they also operate within and on subliminal experiential realms. In this course we shall examine how anthropologists have explored this relationship, which is engendered in the interaction between culture and language as parallel mediating devices for the constitution, interpretation, and expression of human experience.

**[ANTHR 406 The Culture of Lives (also WOMNS 406) @**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 408 Gender Symbolism (also WOMNS 408) @**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 417 Person, Gender, and Song (also WOMNS 416) @**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 432 Culture and Performance and Performing Culture @**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 453 Visual Anthropology**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 456 Mesoamerican Religion, Science, and History @ #**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 460 Culture and International Order**

Spring. 4 credits. J. Borneman.  
For course description, see section VII.

**[ANTHR 469 Gender and Age in Archaeology @**

Spring. 4 credits. Not offered 2000-2001.]

**C. Cultures in Anthropological Perspective:**

Anthropology constructs its theories in the comparison of different social and cultural systems and thus depends integrally on knowledge about particular places. The courses below are all focused on the cultures and societies of particular areas of the world and organize knowledge about these areas in reference to key anthropological questions. Students without prior experience in anthropology are welcome in these courses.

**[ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also LSP 221 and AM ST 221)**

Fall. 3 credits. V. Santiago-Irizarry.  
Representation is basic to anthropology. In translating cultures anthropologists produce authoritative representations of and about other people's lives. In this course we will examine, with a critical eye, the production of representations of U.S. Latino cultures as these are embodied in anthropological texts. Issues to be explored include the relation between the ethnographer and the people s/he is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.

**[ANTHR 224 The French Experience (also FRLIT 224)**

Fall. 3 credits. Not offered 2000-2001.]

**[ANTHR 230 Cultures of Native North America @ #**

Fall. 4 credits. B. Lambert.  
A survey of the principal Eskimo and American Indian culture areas north of Mexico. Selected cultures will be examined to bring out distinctive features of the economy, social organization, religion, and worldview. Although the course concentrates on traditional cultures, some lectures and readings deal with changes in native ways of life that have occurred during the period of European-Indian contact.

**[ANTHR 303 Asians in the Americas: A Comparative Perspective (also AAS 303) @**

Fall. 4 credits. V. Munasinghe.  
The common perception of ethnicity is that it is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won reputations as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label "Asians" an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

**[ANTHR 316 Power, Society, and Culture in Southeast Asia @**

Spring. 4 credits. A. Willford.  
Southeast Asia is a region where anthropologists have paid great attention to the symbolic within cultural and social processes. While this intellectual orientation has produced contextually rich accounts of cultural uniqueness, there has been a tendency within "interpretive" ethnographies to downplay the role of power and domination within culture and society. This course aims to utilize the traditional strengths of symbolic anthropology by examining the roles of ritual, art, religion, and "traditional" values within contemporary Southeast Asian societies. In doing so, however, we examine how these practices and ideas can also structure ethnic, class, and gender inequalities. Understanding how "traditional" cultural practices and ideologies fit within contemporary nation-states requires that we also examine the effects of colonialism, war, and nationalism throughout the region. In addition to providing a broad and comparative ethnographic survey of Southeast Asia, this course also investigates how culturally-specific forms of power and domination are reflected in national politics and in local and regional responses to the economic and cultural forces of globalization.

**[ANTHR 333 Ethnology of the Andean Region @ #**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 335 Subsistence, Polity, and Worldview in Mainland Southeast Asia @**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 336 Change and Continuity in the Pacific Islands @**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 337 Gender, Identity, and Exchange in Melanesia**

Fall. 4 credits. J. Fajans.  
Anthropologists working in Melanesia (a group of islands in the Western Pacific) have contributed significantly to the development of anthropological theory in gender studies, concepts of person and identity, and ritual and economic aspects of exchange. This course will introduce students to the concepts of anthropology through the intensive study of a particular culture area. Readings will include classic works, explorers accounts, literature from the region, and contemporary anthropological studies.

**[ANTHR 339 Peoples and Cultures of the Himalayas @**

Spring. 4 credits. K. March.  
A comprehensive exploration of the peoples and cultures of the Himalayas. Ethnographic materials draw on the lifeways of populations living in the Himalayan regions of Bhutan, India, Nepal, and Tibet. Some of the cultural issues to be examined through these sources include images of the Himalayas in the West, forms of social life, ethnic diversity, political and economic history, and religious complexity.

**[ANTHR 343 Religion, Family, and Community in China @**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 344 Male and Female in Chinese Culture and Society (also WOMNS 344) @**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 345 Japanese Society @**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 350 Topics in the Anthropology of Europe**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 355 Ancient Mexico and Central America (also ARKEO 355) @ #**

Spring. 4 credits. J. Henderson.  
For course description, see section V.

**[ANTHR 377 The United States (also LSP 377 and AM ST 377)**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 405 Global Tokyo (also S HUM 404 and ASIAN 405) @**

Fall. 4 credits. T. Bestor.  
Since the 1850s, structures of identity, class, social integration, and consumption in Tokyo have been shaped by Japan's encounters with other societies. From the Tsukiji foreign settlement to Tokyo's Disneyland, this seminar will focus on global interactions that have reshaped the city for its residents and have continually renegotiated the lines between local and global identities.

**[ANTHR 413 Religion and Politics in Southeast Asia (also ASIAN 413)**

Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 433 Andean Thought and Culture @ #**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 443 Religion and Ritual in Chinese Society (also RELST 443)] @**  
Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 444 Japanese Social Organization]** @  
Spring. 4 credits. Not offered 2000–2001.]

**[ANTHR 456 Mesoamerican Religion, Science, and History]** @ #  
Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 477 Ethnology of Island Southeast Asia]** @  
Fall. 4 credits. Not offered 2000–2001.]

**[ANTHR 493 Seminar in Archaeology (also ARKEO)]** @ #  
Fall. 4 credits. Not offered 2000–2001.]

## Relevant courses in other departments

Fall. 4 credits. M. Hatch.

**NS 650 Food and Nutrition Assessment in a Social Context**  
Fall. 4 credits. D. Pelletier, G. Pelto.

**NS 651 Food and Nutrition Action in a Social Context**  
Spring. 4 credits. D. Pelletier, G. Pelto.

**NS/HD/BSOC 347 Human Growth and Development: Biological and Behavioral Interactions**  
Spring. 3 credits. J. Haas, S. Robertson.

## VIII. Graduate Seminars

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the anthropology department web page ([falcon.arts.cornell.edu/~anthro/](http://falcon.arts.cornell.edu/~anthro/)). The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the anthropology department web page.

A core set of seminars is required of all graduate students in socio-cultural anthropology: Anthropology 600, 601, and 602. Anthropology 603 is strongly recommended. These courses are open to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social science from humanistic or cultural studies and scholarly from more worldly applications. Our most important method, ethnography, is at once scientific and humanistic; disciplinary aspirations refuse to view cultural interpreta-

tion and analytic explanation as separable values. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

### ANTHR 600 Proseminar: Culture and Symbol

Fall. 6 credits. J. Borneman.  
This course focuses on an appreciation of symbolic, expressive, and representational forms and processes both as producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiology, etc., we will investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlins, among others, as well as contemporary theories are given careful attention.

### ANTHR 601 Proseminar: Social Organization

Spring. 6 credits. T. Turner.  
This course focuses on linkages between culture and social institutions, representations and practices. The nature of these linkages is debated from strongly contesting points of view in social theory (structuralist, poststructuralist, utilitarian, hermeneutic, Marxist). Unlike debates in critical theory where the form of contestation has been mainly philosophical, in anthropology, these issues have developed in ethnographic analyses. The course briefly surveys kinship theory and economic anthropology with a focus on implications for general issues in social theory. Discussion of attempts to develop dialectical syntheses around the motion of "practice" follows. The issues addressed in this section carry over into the next, colonialism and post-colonialism, in which poststructuralist readings of history are counterposed to Marxist ones. Finally, Lacanian and Marxist visions of ideology as they relate to anthropological theory and ethnographic analysis are examined with particular emphasis on the cultural and social production of persons.

### [ANTHR 602 The Practices of Anthropology]

Fall. 4 credits. Not offered 2000–2001.]

### ANTHR 603 Research Design

Fall. 4 credits. V. Santiago-Irizarry.  
For course description, see section VI.

### [ANTHR 604 Praxis and Culture]

Spring. 4 credits. Not offered 2000–2001.]

### [ANTHR 605 Archaeological Research Design (also ANTHR 405 and ARKEO 405/605)]

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 607 Special Problems in Anthropology

Fall or spring. Credit and hours TBA.  
Intended for graduate students only. Staff.

Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

### [ANTHR 609 Approaches to Archaeology (also ANTHR 409 and ARKEO 409/609)]

Fall. 4 credits. Not offered 2000–2001.]

### ANTHR 610 Language and Myth

Fall. 4 credits. J. Seigel.  
An analysis of the theories on language leading to Levi-Strauss and Derrida. Myth and the notion of "the father."

### [ANTHR 614 Reading in the Ethnographic Tradition (1880–1960)]

Fall. 4 credits. Not offered 2000–2001.]

### [ANTHR 615 Reading Contemporary Ethnographies (1960–1990)]

Fall. 4 credits. Not offered 2000–2001.]

### ANTHR 616 Cultural Production of the Person

Spring. 4 credits. J. Fajans.  
The course will address the interdisciplinary nature of the relations between the person and both culture and society. Focusing on the integration of theories of the actor with models of cultural forms and social interaction, the aim will be to develop an understanding of the processes and activities that simultaneously produce the cultural subject, the culture, and the society.

### [ANTHR 619 Anthropological Approaches to the Study of Buddhism in Asia]

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 621 Sex and Gender in Cross-Cultural Perspective (also ANTHR 321 and WOMNS 321/631)

Fall. 4 credits. Time TBA. Graduate section of ANTHR 321. K. March.  
For course description, see ANTHR 321, section VII.A.

### [ANTHR 629 Chinese Ethnology]

Spring. 4 credits. Not offered 2000–2001.]

### [ANTHR 632 Andean Symbolism]

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 635 Southeast Asia: Readings in Special Problems

Fall or spring. Credit and hours TBA. Staff.  
Independent reading course on topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

### [ANTHR 636 Cognition and Classification]

Fall. 4 credits. Not offered 2000–2001.]

### [ANTHR 637 Theorizing Social Movements, Human Rights and Democracy in Latin America]

Spring. 4 credits. Not offered 2000–2001.]

### [ANTHR 639 The Feminine Symbolic]

Spring. 4 credits. Not offered 2000–2001.]

### ANTHR 641 South Asia: Readings in Special Problems

Fall or spring. Credit and hours TBA. Staff.  
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

**[ANTHR 645 Japanese Ethnology]**  
Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 647 Death of the Father]**  
Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 648 Marriage and Death]**  
Fall. 4 credits. Not offered 2000-2001.]

**ANTHR 649 Narrative and the Analysis of Culture**

Spring. 4 credits. J. Borneman.  
The purpose of the course is to acquaint students with narrative form and the use of narrative tools in the analysis of cultural artifacts. Narrative—a specific set of genres of discourse sharing the property of temporally sequenced clauses—is the subject of much research within many disciplines. Narrative is often said to fashion diverse human experiences into a form assimilable to structures of meaning that are generally human rather than culture-specific. By making personal knowledge communicable, narrative is intrinsic to the making of culture, its representation, and its comprehension. Participants will be introduced to the work of major narrative theorists and to attempts to apply narrative theory to culture. They will also be asked to examine critically a variety of cultural artifacts—including ethnography, performance art, film/video, and law—in terms of the theories discussed.

**ANTHR 653 Myth Onto Film (also THETR 653)**

Spring. 4 credits. Enrollment limited by available studio space and equipment. Some knowledge of one of the following: anthropology, filmmaking, mythology, graphics, drawing, or painting is required. Open to undergraduates and graduate students with permission of instructor. Fee for film screening and maintenance, \$50. R. Ascher.

In myths, whales fly, pebbles throw themselves across streams, and trees are transformed into women. Toward the end of visualizing myths—in particular the myths of other people—we explore the possibilities of animated film. The technique used is cameraless animation; that is, we draw and paint, frame by frame, directly onto movie film. The intellectual problem is to visualize the myths of others so that they are comprehensible to us but are not thought to be of us. Reading includes introductory works on both myth and animation and there is background reading on the particular myth that is committed to film.

**ANTHR 655 East Asia: Readings in Special Problems**

Fall or spring. Credit and hours TBA. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

**[ANTHR 656 Maya History]**  
Fall. 4 credits. Not offered 2000-2001.]

**[ANTHR 658 Archaeological Analysis (also ANTHR 458 and ARKEO 458/658)]**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 659 Archaeology of the Household (also ANTHR 459 and ARKEO 459/659) @ #**

Fall. 4 credits. J. Henderson, N. Russell.  
For course description, see section V.

**ANTHR 660 Language, Ideologies and Practices (also LSP 660)**

Spring. 4 credits. V. Santiago-Irizarry.  
Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course will look at the place of language as a signifying practice in the United States by focusing on the experience of Latino communities. Topics to be explored include linguistic diversity and change, accommodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.

**ANTHR 662 Democratizing Society: Participation, Action, and Research (also ANTHR 362)**

Fall. 4 credits. D. J. Greenwood.  
For description, see ANTHR 362, Section VI.

**ANTHR 663 Action Research**

Spring. 4 credits. D. Greenwood.  
This seminar is a practicum in action research (AR) in which the semester becomes a self-managing learning environment for the exploration of the techniques and group processes involved in AR, including co-generative learning, searching, and AR facilitation. Participation in a seminar-centered LISTSERV on the Internet is expected.

**[ANTHR 665 Topics in Native American Societies and Cultures]**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 666 Humans and Animals (also ANTHR 466 and ARKEO 466/666) #**

Fall. 4 credits. N. Russell.  
For course description, see section VI.

**ANTHR 668 Marx: An Overview of His Thought (also ANTHR 368)**

Spring. 4 credits. T. Turner.  
For course description, see section VI.

**[ANTHR 669 Gender and Age in Archaeology (also ANTHR 469 and ARKEO 469/669) #**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 670 Environmental Archaeology (also ANTHR 370 and ARKEO 370/670)**

Spring. 4 credits. T. Volman.  
For course description, see section IV.

**ANTHR 671 Palaeoanthropology of South Asia (also BIOES 671 and ASIAN 620)**

Fall. 3 credits. Limited to 15 students. Lec, M afternoons for 1 hour; sem, W 7:30-9:30 p.m. K. Kennedy.

The course explores recent developments in the prehistoric archaeology, palaeo-ecology, and biological anthropology of the ancient peoples of India, Pakistan, Sri Lanka, and the bordering countries. Issues of origin and decline of the Indus Civilization, fossil record of early humans in the Indian subcontinent, and current research topics are discussed.

**[ANTHR 672 Hunters and Gatherers (also ANTHR 372) #**

Spring. 4 credits. Not offered 2000-2001.]

**[ANTHR 673 Human Evolution: Concepts, History, and Theory (also BIOES 673)]**

Fall. 4 credits. Not offered 2000-2001.]

**ANTHR 680 Anthropology and Globalization (also ANTHR 480)**

Fall. 4 credits. A. Willford.

For course description, see section VI.

**[ANTHR 682 Perspectives on the Nation (also AAS 682)]**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 685 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America**

Spring. 4 credits. B. J. Isbell.  
For course description, see section VIIa.

**[ANTHR 690 Ritual and Myth: Structure, Process, Practice]**

Spring. 4 credits. Not offered 2000-2001.]

**ANTHR 691 Filming Other Cultures (also ANTHR 291 and THETR 291/691)**

Spring. 4 credits. Fee for film screening and maintenance, \$35.  
For description, see ANTHR 291 and THETR 291. Graduate students who register in this course attend the meetings of 291. In addition, they write in-depth studies of one or more films in consultation with the instructor.

**[ANTHR 699 Current Fields in Biological Anthropology]**

Fall. 4 credits. Not offered 2000-2001.]

## ARABIC AND ARAMAIC

See under Department of Near Eastern Studies.

## ARCHAEOLOGY

See under Special Programs and Interdisciplinary Studies.

## ASIAN AMERICAN STUDIES

See under Special Programs and Interdisciplinary Studies.

## ASIAN STUDIES

E. M. Gunn, chair (388 Rockefeller Hall, 255-5095); B. R. Anderson, I. Azis, J. Badgley, S. Bedi, T. Bestor, D. Boucher, K. Brazell, R. Bullock, T. Chaloeontarana, P. Chi, S. Cochran, A. Cohn, B. de Bary, H. Diffloth, S. Feldman, G. Fields, P. Gellert, D. Gold, M. Hatch, R. Herring, S. Hoare, D. Holmberg, N. Jagacinski, Y. Katagiri, M. Katzenstein, Y. Kawasaki, K. A. R. Kennedy, J. V. Koschmann, F. Kotas, S. Kuruvilla, J. M. Law, T. Loos, T. Lyons, B. G. MacDougall, K. March, K. McGowan, R. McNeal, F. Mehta, T. L. Mei, C. Minkowski, S. Mohanty, V. Munasinghe, N. Nakada, Y. Nakanishi-Whitman, V. Nee, A. Nussbaum, S. Oja, A. Pan, C. A. Peterson, J. R. Piggott, T. Poleman, A. Riedy, N. Sakai, P. S. Sangren, K. Selden, Y. Shirai, V. Shue, J. T. Siegel, R. J. Smith, R. Sukle, D. Sudan, H. Tao, K. Taylor, Q. Teng, E. Thorbecke, T. Tranviet, S. Tun, N. Uphoff, J. Whitman, L. Williams, J. U. Wolff, O. Wolters

The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are

taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

### The Major

A student majoring in Asian studies normally specializes in the language and culture of one country and often chooses an additional major in a traditional discipline.

Majors complete two courses at the 200 level (a minimum of six credits with a grade of C or better) in one of the Asian languages offered at Cornell. The major consists of at least 30 additional credits (which may include up to six credits of further language study) selected by the student in consultation with his or her adviser from among the courses listed under the Department of Asian Studies and numbered 250 and above.

The applicant for admission to the major in Asian studies must have completed at least one area studies course selected from among those listed under the Department of Asian Studies and must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in this course and in all other courses counted toward the major.

### Honors

To be eligible for honors in Asian studies, a student must have a cumulative grade average of A- in all Asian studies area courses, exclusive of language study only, and must successfully complete an honors essay during the senior year. Students who wish to be considered for honors should apply to the director of undergraduate studies during the second term of their junior year. The application must include an outline of the proposed project and the endorsement of a supervisor chosen from the Asian studies faculty. During the first term of the senior year the student does research for the essay in conjunction with an appropriate Asian studies course or Asian Studies 401. By the end of the first term the student must present a detailed outline of the honors essay or other appropriate written work and have it approved by the project supervisor and the director of undergraduate studies. The student is then eligible for Asian Studies 402, the honors course, which entails writing the essay. At the end of the senior year, the student has an oral examination (with at least two faculty members) covering both the honors essay and the student's area of concentration.

### Concentration in East Asia Studies

A candidate for the Bachelor of Arts degree at Cornell may take a concentration in East Asia studies by completing at least 18 credits of course work.

Students normally take five courses in East Asian studies at the 200 level or above from those East Asian courses listed (China, Japan, Korea) either under Asian Studies or Asian-related courses. Of these, two courses might be Asian language courses at the 200-level or beyond. East Asian graduate courses may also be offered for the concentration, as well as East Asia-related courses with a research

paper on an East Asian topic. Appropriate courses taken through Cornell Abroad in East Asia may also be counted toward the concentration. Students concentrating in East Asian studies should select an adviser from the East Asia Program faculty for consultation on their course of study. For more information, contact the Asian Studies Department at 388 Rockefeller Hall, (607) 255-5095.

### Concentration in South Asia Studies

A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in South Asian studies by completing at least 18 credits of course work in South Asian studies, including Asian Studies 215 (Introduction to South Asia) and four courses or seminars at the intermediate or advanced levels, two of which may be South Asian language courses.

Students taking a concentration in South Asian studies are considered members of the South Asia Program and will have an adviser from the program faculty. (This adviser will be for the student's concentration and is not a substitute for a student's academic adviser in his or her major.)

One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. The same applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

### Concentration in Southeast Asia Studies

A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in Southeast Asian studies by completing 18 credits of course work. A recommended plan would include Asian Studies 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asian studies are members of the Southeast Asia Program and are assigned an adviser from the program faculty. Such students are encouraged to commence work on a Southeast Asian language either at the 10-week intensive courses offered by the Southeast Asia Studies Summer Institute (SEASSI) or by studying for one semester at IKIP Malang, Indonesia; Khon Kaen University, Thailand; or Hanoi University, Vietnam; fellowships are available for undergraduates through the Cornell Abroad Program.

### Intensive Language Program (FALCON)

The FALCON Program offers intensive instruction in Japanese or Chinese. The program is still the only one in the world offering a full year of intensive instruction, except perhaps for the exclusive language schools of some government agencies. Students must formally apply to the program, but the application process is simple and admissions is open to all students. (Applications available for FALCON from the secretary, room 414 Morrill Hall, or visit or web site [dml.cornell.edu/FALCON/](http://dml.cornell.edu/FALCON/) and apply online). Students may take the entire sequence of 160, 161, 162, or any other portion of the program if they have the necessary background (to be determined by a placement test). The courses are full-time intensive language study; the degree of intensity required does not allow

students to enroll simultaneously in other courses or to work, except perhaps on weekends.

### Study Abroad

Cornell is a member of the Inter-University Center for Chinese Language Study in Taipei and a member of the Council on International Educational Exchange offering study in China at Peking University and Nanjing University. These centers offer intensive training in both spoken and written forms of the languages. The Kyoto Center for Japanese Studies (KCJS) is an undergraduate program for students who want to spend one or two semesters in Japan studying both language and culture.

Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil.

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, cosponsor an academic semester or year in Nepal.

Other opportunities include a junior year abroad at IKIP-Malang, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Undergraduates should consult Cornell Abroad; graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program offices.

### First-Year Writing Seminars

See Freshman seminar booklet for course times and descriptions.

**ASIAN 100 Half the Sky: Women in Modern China (also WOMNS 100)**  
Fall. 3 credits. H. Lee.

**ASIAN 111 Asian Theater**  
Fall and spring. 3 credits. J. Young and K. Brazell.

**ASIAN 115 People and their Environment in China**  
Fall. 3 credits. R. McNeal.

### General Education Courses

**ASIAN 191 Introduction to Modern Asian History (also HIST 191)**  
Fall. 4 credits. T. Loos.  
SEE HIST 191 for description.

**ASIAN 203 Introduction to Comparative Literature (also COM L 203)**  
Fall. 4 credits. Team.  
See ComL 203 for description.

**ASIAN 204 Global Fictions (also COM L 204)**  
Spring. 4 credits. N. Melas.  
See ComL 204 for description.

**ASIAN 206 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also HIST 207)**  
Spring. 4 credits. T. Loos.  
See HIST 206 for description.

**ASIAN 208 Introduction to Southeast Asia @**  
Spring. 3 credits. T. Chaloeamtirana.  
This course is for anyone curious about the most diverse part of Asia; it defines Southeast Asia both as the nation-states that have

emerged since 1945 (Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Viet Nam) and as a larger cultural world extending from southern China to Madagascar and Polynesia. Students will find a serious, organized introduction to a variety of disciplinary and topical approaches to this region, including geography, linguistics, history, religion and ideology, anthropology, marriage and family systems, music, literacy and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, and business and marketing. The course aims to teach both basic information and different ways of interpreting that information.

**ASIAN 211 Introduction to Japan: Japanese Texts in History @ #**

Fall. 3 credits. N. Sakai.

An interdisciplinary introduction to Japanese Studies especially designed for nonmajors. The course takes up a diverse series of cultural artifacts and demonstrates how, against the background of simultaneous and successive rises and falls of polities on the Japanese archipelago, the meanings and readings generated by these artifacts have changed dramatically over time. We will consider verbal and visual, fictional and historical, canonical and noncanonical texts, including the eighth century *Kojiki*, the courtly narrative *Tale of Genji*, eighteenth century puppet theater, modern Ainu autobiography, and films and comic books dealing with themes of nuclear warfare and apocalypse.

**ASIAN 212 Introduction to China @**

Spring. 3 credits (4 credits with a special project; consult instructor for information). E. Gunn.

An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies.

**ASIAN 215 Introduction to South Asian Civilization @**

Fall. 3 credits. D. Gold.

An interdisciplinary introduction to the culture and history shared by India and other states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers will provide the perspective of their disciplines to the general themes of the course: cultural diversity and the role of tradition in contemporary life.

**ASIAN 218 Introduction to Korea (also HIST 218 and GOVT 218) @**

Spring. 3 credits. C. Kim.

An interdisciplinary introduction to Korean history and culture, including geography, ethnography, language, literature, philosophy, religion, political economy, government, music, and art (sculpture, architecture, and painting), with an overview of Korean history from the Three Kingdoms Period to the present, focusing on the March 1, 1919 Independence Movement, the Korean War, the 1960 Student Revolution, the 1980 Kwangju Massacre, and other events.

## Asia—Literature and Religion Courses

The following courses are taught entirely in English and are open to any Cornell student.

**ASIAN 250 Introduction to Asian Religions (also RELST 250) @ #**

Spring. 3 credits. D. Boucher.

This course will explore a range of religious traditions in South Asia (Pakistan, India, and Sri Lanka) and East Asia (China and Japan) including Hinduism, Buddhism (South and East Asian), Confucianism, Daoism, and Shinto. We will concentrate on these religions in traditional times in order to understand better the historical foundations that have influenced much of what these cultures are today. We will attempt to inquire collectively into the nature of religious impulses among peoples who are in some fundamental ways both very much like us and very much different from us. The course format will include lectures and discussion sections.

**ASIAN 277 Meditation in Indian Culture @ #**

Spring. 3 credits. Not offered 2000–2001. D. Gold.

This course probes the truths behind traditional claims of the priority of internal practice in Indian traditions. We will examine both practices themselves—techniques of meditation and contemplation, religious ways of using intellect, forms of chant and ritual—and the dynamics through which these have left a wider mark on South Asian civilization. These dynamics include not only the evident reverberations of practice in philosophical reflection and socioreligious institutions, but also wide-ranging processes of stylization, elaboration, and popularization found throughout South Asian culture. In order to get a sense of the experiences treated in classical religious texts, students will be expected to experiment with some basic meditation practices. At least as important for the work of the course (and much more important for the grade) will be the ways in which students situate these practices within larger South Asian world views as suggested by doctrines, rituals, iconic forms, and literary texts. To keep the interaction between internal practice and broader world views central, we will examine both Hindu and Buddhist sources, consistently examining the ways in which similar practices are given distinct shapes by the two religious traditions.]

**ASIAN 298 The U.S.-Vietnam War (also HIST 289) @**

Spring. 3 credits. Not offered 2000–2001. K. Taylor.

This course will survey events in Vietnam, the United States, and elsewhere related to the U.S. policy of intervention in Vietnam between 1954 and 1975. Readings will include historical narratives, memoirs, and literature. The courses will evaluate the standard winner (Hanoi) and loser (U.S.) narratives and how they have silenced southern Vietnamese voices.]

**ASIAN 299 Buddhism (also RELST 290) @ #**

Fall. 4 credits. D. Boucher.

This course will explore the Buddhist tradition from its origins in ancient India to its migrations throughout Asia and eventually to the West. The first half of the course will deal with Indian Buddhism: the Buddha, the principal teachings and practices of his early followers, and new developments in spiritual orientation. We will then turn to the transmission of Buddhism to Central and East Asia, including China, Japan, and Tibet, concentrating on those traditions in traditional times. From there we will look at the southern migration to Sri Lanka and Southeast Asia and conclude with an examination of Buddhism in America.

**ASIAN 300 Premodern Chinese Literature in Translation @ #**

Fall. 4 credits. Not offered 2000–2001. S. Tian.

This course is an introduction to classical Chinese literature. A variety of forms and genres, such as poetry, fiction, essays, and historical writings, are chosen and arranged in chronological order as well as by general topics and issues, so as to present an overview of how the Chinese literary tradition evolves and to show the interplay of Chinese literature, culture, and history.]

**ASIAN 301 Schools of Thought-Ancient China**

Spring. 4 credits. R. McNeal.

This course introduces students to the most important of China's early moral and political philosophers, such as Confucius, Laozi, and Sunzi, through readings in translation. We will address the traditional conception of six schools of thought in ancient China as reflected in classical and modern historiography and examine newly discovered texts with an eye toward clarifying the relationships among early schools and their representatives.

**ASIAN 311 Modern Korean Culture and Literature @**

Spring. 4 credits. Not offered 2000–2001. Staff.

A survey of the literature of the Post-Liberation period (1945–present), with an emphasis on the development of modern Korean poetry and its relation to the intellectual history of this time. Students will read major poetic texts of each period in English translation as well as writings on cultural movements and major arguments in intellectual history.]

**ASIAN 314 Europe & Its Others (also COM L 304)**

Fall. 4 credits. N. Melas.

See COM L 304 for description.

**ASIAN 347 Tantric Traditions (also RELST 349) @ #**

Fall. 4 credits. D. Gold.

This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, socio-religious, cultic, and visionary dimensions of tantra will be discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.

**ASIAN 348 Indian Devotional Poetry (also RELST 348) @ #**

Fall. 4 credits. Not offered 2000–2001. D. Gold.

A survey of Indian devotional genres, with particular attention to the medieval vernacular literatures. Consideration will be given to social and ritual contexts of the texts, the ways in which their literary conventions work, and their contemplative uses. The predominant focus will be on Hindu traditions, but some Buddhist and Islamic works will also be read. Readings will be in translation.]

**ASIAN 355 Japanese Religions (also RELST 355) @**

Fall. 4 credits. Not offered 2000–2001. J. M. Law.

This course addresses the complexity of religion in Japanese history through a focus on the dominant ideological system of Japanese religious practice and thought—that system commonly referred to as Shinto. In this course, we are interested in understanding the

general methodological issues surrounding tradition formation, continuity, change, and revision. The Shinto case reveals the complexity of a given religious system which simultaneously serves as both a cultural ideology and a path for individual spiritual cultivation. A study of Shinto allows us to develop the intellectual frameworks for understanding the dynamics of religious traditions in societies. We will explore the Shinto tradition by looking at (1) the means by which a central corpus of values, tastes, practices, beliefs, and concerns have been formulated and how this system has interacted with other religious systems in Japan so as to maintain its right to represent the "authentic Japanese spirit;" (2) the academic sources for the study of the Shinto tradition which have also contributed to its identity and continuity; (3) the view of this religious system from the perspective of those who are actively shaping its discourse; (4) the view of this religious system from the perspective of those peripheralized by its ideologies; (5) the issue of personal cultivation and aesthetic taste in the tradition; and (6) the relationship between this religious system and imperialism, war, and historical revisionism.]

**ASIAN 357 Chinese Religions (also RELST 357) @ #**

Spring. 4 credits. D. Boucher.  
This course will present a broad survey of Chinese religions from the earliest historic records through the late imperial and modern periods, from highbrow philosophical movements to local deity cults. Our survey will focus intensively on the great traditions of Confucianism, Taoism, and Buddhism as well as the lesser known practices that often fall through the cracks. Our goal in part will be to trace patterns of continuity among competing and sometimes acrimonious voices.

**ASIAN 358 Chinese Buddhism (also RELST 357) @ #**

Fall. 4 credits. D. Boucher.  
Buddhism was a mature tradition when it came to China, a society of great sophistication and antiquity, and in their remarkable religious and cultural encounter both Buddhism and China were transformed. We will consider Buddhism's introduction and acceptance, the social impact of its monastic system and moral ideals, the literary and artistic contributions of its scriptures and sculpture, the efflorescence of its doctrine and various schools, and its role in Chinese history.

**ASIAN 359 Japanese Buddhism: Texts in Context (also RELST 359) @ #**

Spring. 4 credits. J. M. Law.  
This course explores a number of major dynamics in Japanese Buddhism within the context of the larger Japanese religious ethos. We will focus on the following: (1) strategies used in the introduction and spread of Buddhism in Japan, and systems of accommodation, with special attention to the *Lotus Sutra*; (2) the formulation of Buddhist doctrine and practice of four major figures in Japanese Buddhism: Saicho, Kukai, Nichiren, and Dogen; and (3) understandings of Buddhist practice expressed in the "new" religion, with Reiyukai as our case. Readings are in English, with optional readings in Japanese for graduate students.

**[ASIAN 360 Buddhist and Confucian Cultures of Asia @ #**

Spring. 4 credits. Not offered 2000–2001.  
K. Taylor.  
Confucius and Buddha were contemporaries 2,500 years ago. Teachings attributed to them spread over large parts of Asia and were used to formulate expressions of cultural authority in many times and places. This course surveys historic themes in Buddhist and Confucian studies, such as Theravada and Mahayana, Pure Land, Zen, and other forms of Buddhist thought and practice, including interaction with and adaption to local religions; Confucius and Mencius, Han eclectic Confucianism, Song Chu Hsi Confucianism, and dissenting or variant forms of Confucian thought. This course explores and compares specific examples of these themes in Japan, Korea, China, Vietnam, Thailand, and Burma. This course is intended for Asian studies majors and other interested students. Premodern focus.]

**[ASIAN 373 Twentieth-Century Chinese Literature @**

Spring. 4 credits. Not offered 2000–2001.  
E. Gunn.  
A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present in the People's Republic and Taiwan, with attention to social and political issues and literary theory.]

**[ASIAN 374 Chinese Narrative Literature (also COM L 376) @ #**

Spring. 4 credits. Not offered 2000–2001.  
E. Gunn.  
Selected works in classical Chinese fiction are read in translation. Major novels, such as *The Dream of the Red Chamber* and *Water Margin*, are emphasized.]

**[ASIAN 376 Modern Japanese Literature: From Meiji through the Pacific War (also COM L 369) @**

Fall. 4 credits. Not offered 2000–2001.  
B. de Bary.  
We will read Japanese works of fiction, poetry, and critical theory written from the Meiji Restoration into the Showa Period. The course will take up such issues as modernization and the narrative of discovery, imperialism and the non-Western novel, the politics of visibility, gender and representation, and Japanese colonialism. We will consider how writings of critics like Karatani, Fujii, and Layoun have complicated modernizationist schemas of literary development. We will also attempt to explore what Nagahara Yutaka has called the "phenomenology of discrimination" in relation to Japanese literary texts, pursuing contradictions between egalitarianism and discrimination in the legacy of Meiji Enlightenment thought. Reading of non-Japanese (other Asian, as well as African, American, and European) texts raising pertinent theoretical perspectives will be integrated into the course work.]

**[ASIAN 377 Japanese Tales of Love, War, and the Supernatural @ #**

Spring. 4 credits. Alternates with ASIAN 375. Not offered 2000–2001. K. Brazell.  
The romantic adventures of the Shining Prince Genji, the battles of twelfth-century samurai clans, the ghosts and demons of folklore, and the adventures of Saikaku's men and women who "loved love" are still very much alive in modern Japanese mass culture—in films,

comic books, commercials, TV programs, and video games. This course will survey the original tales (in English translation) to introduce students to this rich array of literature. We will explore some of the changes in the representations of sex and gender, death and dying, and supernatural forces that occurred between the ninth and the nineteenth centuries.]

**ASIAN 383 Introduction to the Arts of China (also ART H 380 and ARKEO 380)**

Fall. 4 credits. A. Pan.  
See ART H 380 for description.

**[ASIAN 384 Representation and Meaning in Chinese Painting (also ART H 385)**

4 credits. Not offered 2000–2001. A. Pan.  
See ART H 385 for description.]

**[ASIAN 388 Theorizing Gender & Race in Asian Histories & Literatures @**

Fall. 4 credits. Not offered 2000–2001.  
N. Sakai.  
In recent years some studies have been published about the questions of gender and race in the fields related to East Asia. Yet, compared with the accumulated factual knowledge about these topics, little attention has been paid to how to conceptualize gender and race, how to analyze the mutual implication of sexism and racism, and how to understand the relationships of these topics to the broader contexts of colonialisms, imperialisms, and nationalisms. This course is designed to offer a series of discussions about the following problems: (1) the historically specific modes of sexism and racism in social spaces which are related to Japan and other areas in East Asia; (2) the mutual implication of sexism and racism in various contexts including those of colonialism, imperialism, and nationalism; (3) the roles of gender and race in the production of knowledge about Japan and East Asia in general; and (4) the conceptions of gender and race in the social formations particular to East Asia. The assigned readings include both English and Japanese materials. Those who register in AS 388, however, are exempt from reading the Japanese materials\*.

\*Students are allowed to take this course either as AS 388 or as AS 688, although those who have studied Japanese for more than four years are strongly encouraged to register in AS 688. Those who register in AS 688 have to spend additional time in class in order to deal with texts in Japanese.]

**[ASIAN 390 The Sanskrit Epics @ #**

Spring. 4 credits. Not offered 2000–2001.  
C. Minkowski.  
Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, supported by a study of the reception of the epics in later Indian imaginative literature. Attention will also be given to comparative theories of the epic in ancient Indo-European languages.]

**ASIAN 394 The House and the World: Architecture of Asia (also ART H 395)**

Spring. 4 credits. K. McGowan.  
See ART H 395 for description.

**ASIAN 395 Classical Indian Philosophical Systems (also CLASS 395 and RELST 395) @ #**

Fall. 4 credits. Prerequisite: some background in philosophy or in classical culture. C. Minkowski.

A survey of the traditions of philosophical inquiry in ancient India, especially Nyaya, Sankhya, Mimamsa, and Vedanta. Topics will include the origins in and relationships to the Vedas; the formation of distinct positions on such subjects as perception, language, identity, karma, and liberation; the dialogue with Buddhist, Jains, skeptics, materialist, and cynics; and new theistic models, particularly among the Saiva philosophers in Kashmir.

**ASIAN 396 Southeast Asian History from the Eighteenth Century (also HIST 396)**

Spring. 4 credits. T. Loos.  
See HIST 396 for description.

**ASIAN 400 Tibetan Buddhism (also RELST 400) @#**

Fall. 3 credits. Prerequisites: at least 1 course on Buddhism or Asian religions, or the permission of the instructor. Class size is limited to 15. J. M. Law.

This course is an exploration of the development of the Vajrayana tradition through a focus on the myths and stories about, and writings by central figures in, what is known in the west as Tibetan Buddhism. Following an overview of the historical development of this tradition, we will explore the contributions made by several (mythico-historical) seminal thinkers in the tradition including Atisa, Naropa, Marpa, Milarepa, and Tsongkapa, and explore how their life works reflect the process of adapting Buddhism to the Tibetan context. (We will also include myths and stories about the mythical founder Padmasambhava.) Readings will include primary source religious works written by or attributed to these figures, hagiographical accounts of their lives (their "biographies" and "autobiographies" and tributes to them by their disciples), and treatises and commentaries on their works which are influential in the formulation of the various schools of Tibetan Buddhism. In the final segment of the course, we will explore the implications of exile for Tibetan Buddhism, and will read several popular works by the Ven. Tenzin Gyatso (the fourteenth Dalai Lama), to show the dramatic changes made in the tradition as it reformulates itself in a more global context. Throughout this course, we will be directing our attention to dynamics of tradition formulation, articulation, and reformation as it changes throughout Tibetan history. In addition to two short writing assignments and a final research project, we will also take field trips to two regional Tibetan monasteries.

**ASIAN 405 Global Tokyo (also S HUM 404)**

Fall. 4 credits. T. Bestor.  
See S HUM 404 for description.

**[ASIAN 406 Contemporary Literary Criticism in Korea]**

Spring. 4 credits. Not offered 2000-2001.  
Staff.

A survey of literary criticism and theory from the liberation in 1945 to the 1990s, including the KAPF (engagement movement of nationalism) versus belletristic movement, new criticism, nationalism based on realism, grass-roots literature movements, postmodernism, and the heteroglossia of critical theories. Major arguments of each of these movements will be covered. Also covered will be current movements in Korean literary criticism influenced by the globalized industry of critical theories, including deconstruction, postmodernism,

poststructuralism, postcolonialism, cultural studies, feminism, and new historicism.]

**ASIAN 407 Religion and Human Rights (also RELST 407)**

Spring. 3 credits. Prerequisite: Permission of instructor. Limited to 15 students.  
J. M. Law.

This course, open to advanced students with a strong background in either religious studies, human rights work, or international law pertaining to human rights, is an exploration of the various ways that the sub-disciplines within religious studies (hermeneutics, critical ideological studies, the sociology of religion, etc.) can shed light on our understanding of human rights issues. In particular, the course will focus on four intersections of religion and human rights: religious traditions as ideologies of oppression used to legitimate major human rights violations; religious tradition identification as the primary "subject relationships" causing certain people or groups to be targeted for persecution; religious traditions and doctrine as the motivation for certain human rights workers to campaign as advocates for victims; and the role of religious discourse in attempts at reconciliation after major human rights violations have occurred. Through specific cases (mostly Asian), students will explore the methodological issues that each of these intersections raises. The focus of the course will be on close readings of primary source documents (some in translation by necessity), context studies of historical and social events surrounding major violations of human rights, and preparation of public response papers for each of the cases studied. In addition to weekly writing assignments prepared as part of a portfolio of written work, students will also prepare one group presentation for the class. This course is being offered in conjunction with the Writing in the Majors Program.

**ASIAN 410 Chinese Performing Arts @**

Fall. 4 credits. E. Gunn.  
The course will survey drama, music theater, and film in twentieth-century China. Some material will require knowledge of Chinese.

**[ASIAN 411 History of the Japanese Language (also LING 411)]**

Fall. 4 credits. Not offered 2000-2001.  
J. Whitman.  
See LING 411 for description.]

**[ASIAN 412 Linguistic Structure of Japanese (also LING 404)]**

Spring. 4 credits. Not offered 2000-2001.  
J. Whitman.  
See LING 404 for description.]

**[ASIAN 415 Virtual Orientalisms (also S HUM 415 and COM L 418) #]**

Spring. 4 credits. Enrollment limited to 25 students. Not offered 2000-2001.  
B. de Bary.

A comparative study of representations of Japan in postwar French, American, and Japanese cultures. The course will be particularly concerned with the role of virtual technologies in representations of Japan, as well as with a proliferation of late twentieth-century representations of Japan as a site of utopic or dystopic virtuality. Positing Orientalism as a broadly-based, but definitely not monolithic, ensemble of representational and regulatory practices, we will attend to differences in the historical context. Examples include; Roland Barthes' figuring of Japan as a "possibility of difference," or of "the very fissure of the symbolic" in post-1968 France,

and Michael Crichton's more recent superimposition of a "Rising Sun" over processes of American racial hybridization, high-tech reproduction and alteration of images, and trade imbalances. Ambiguously represented as a culture of both the "chrysanthemum" (the hyper-aesthetic) and the "sword" (the hyper-phallic), with the advent of what some have called "techno-orientalism," Japan has increasingly become a preoccupation of technological and futurological imagination. We will consider literary, filmic, and theoretical texts, as well as science fiction, video games, and fanzines.]

**ASIAN 416 Undergraduate Seminar on Gender & Sexuality in Southeast Asian History (also HIST 416)**

Fall. 4 credits. T. Loos.  
See HIST 416 for description.

**ASIAN 417 Second Language Acquisition (also LING 415)**

Spring. 4 credits. Y. Shirai.  
See LING 415 for description.

**ASIAN 427 Buddhist Monasticism (also RELST 425)**

Fall. 4 credits. D. Boucher.  
Buddhist monasticism has existed and continues to exist in the context of a complex exchange system within Buddhist cultures. The laity provide for the monks' and nuns' material needs; the mendicants, by accepting these offerings, provide an opportunity for spiritual merit and advancement for the faithful. This course will explore Buddhist renunciant traditions—sedentary monks and nuns, forest hermits, revolutionary reformers, and others—in the light of this "religious capitalism." We will consider the formation of this role for monks in Buddhist societies as well as attempts both to defend and to critique this exchange system within Buddhism. This course will operate in a seminar format, which assumes careful reading, active participation, and independent research on the part of all students.

**ASIAN 429 Structure of the Chinese Language (also LING 429)**

Fall. 4 credits. H. Tao.  
See LING 429 for description.

**[ASIAN 430 Structure of Korean (also LING 430)]**

Spring. 4 credits. Not offered 2000-2001.  
J. Whitman.  
See LING 430 for description.]

**ASIAN 441 Mahayana Buddhism (also RELST 441) @ #**

Spring. 4 credits. D. Boucher.  
By reading successive examples of Mahayana Buddhist literature, we will study the formation and evolution of the ideal of the bodhisattva; the understanding of transcendental wisdom and the concept of emptiness; and the workings of both the conscious and subconscious mind in the course of spiritual practice. We will include discussion of major philosophical schools, as well as issues of social setting and popular religious practice, in both India and East Asia.

**ASIAN 449 History and Methods of the Academic Study of Religion (also RELST 449) #**

Spring. 4 credits. Prerequisite: 1 course satisfying the religious studies major.  
J. M. Law.  
The first segment of this course explores the rise of the discipline of *Religionswissenschaft*

in Europe in the mid-nineteenth century as a self-consciously nonsectarian and academic approach to the study of religious texts and phenomena. We explore the ways this discipline interacted with existing disciplines in the academy, giving special attention to the growing fields of sociology and anthropology. We then look at a number of assumptions inherent in this intellectual movement and focus on (1) the conception of the sacred, (2) the idea of rationality, and (3) the "discovery" and construction of non-Western religious tradition. The second segment surveys major approaches to the academic study of religion currently used today: anthropology, hermeneutics, history, history of religions, literary studies, phenomenology, sociology, and theology. For each of these cases, we will be studying how these angles on religious data both build on the nineteenth-century assumptions of *Religionswissenschaft*, and address twentieth-century religion.

**[ASIAN 460 Indian Meditation Texts (also RELST 460) @ #**

Fall. 4 credits. Not offered 2000–2001.  
D. Gold.

Because texts that record visionary experience prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilizations. Yet the special problems of interpretation that they present have often caused meditation texts to be passed over in embarrassed, sometimes reverent silence. In this course we will draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: in what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings will be drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.]

**[ASIAN 463 Readings in Hindi and Urdu Literature @**

Spring. 4 credits. Not offered 2000–2001.  
D. Gold.

Selected topics in Hindi and Urdu literature, with readings in the original; discussions in Hindi-Urdu and English. May be repeated for additional credit with consent of instructor.]

**[ASIAN 470 The Japanese Noh Theater and Modern Dramatists (also COM L 470 and THETR 470) @ #**

Fall. 4 credits. Alternates with ASIAN 471. Not offered 2000–2001. K. Brazell.

Several weeks will be spent studying the literary, performance, and aesthetic aspects of the noh theater. Emphasis will be on noh as a performance system, a total theater in which music, dance, text, costume, and props all interact to create the total effect. Then attention will turn to modern theater people who have reacted to noh in some creative way. Choice of dramatists will depend partly on student interests but will probably include Yeats, Brecht, Britten, Claudel, Grotowski, and Mishima. All readings may be done in English translation.]

**ASIAN 471 Japanese Theatre (also THETR 471) @ #**

Fall. 4 credits. Alternates with ASIAN 470. K. Brazell.

A study of traditional forms of Japanese theatre. Topics will include ritual and theatre, noh and kyogen, kabuki, and the puppet theatres, and contemporary theatrical use of the traditional forms. Special emphasis will be placed on dramaturgy, acting styles, performance aesthetics, and theories of performer training.

**ASIAN 479 Art of the T'ang Dynasty (also ART H 481)**

Spring. 4 credits. A. Pan.  
See ART H 481 for description.

**ASIAN 481 Translation and Identities @**

Spring. 4 credits. N. Sakai.  
Translation establishes a division of two spheres and thereby marks the limit of what can be expressed in one medium. Broadly understood, translation can take place not only between two national languages but also at a variety of boundaries within a putatively single society. The seminar will investigate different economies of translation by which different social and cultural identities are constructed, emphasizing the disappearance of multi-lingualism in modern nation-state and the mutation of translation economies which gave rise to new ways of imagining the organicist unity of the society in eighteenth-century and twentieth-century Japan. Seminar readings will be translations of pre-modern Japanese and Chinese writings, and modern European and Japanese philosophical articles (in English).

**ASIAN 482 Seminar: Gender Adjudicated (also HIST 480)**

Fall. 4 credits. T. Loos.  
See HIST 480 for description.

**ASIAN 483 Internationalism, Nationalism, and Modern Japanese Discursive Space @**

Spring. 3 credits. N. Sakai.  
The late nineteenth century marks an important transitional period; nation-states formed in Britain, France, Japan, Germany, the United States, and elsewhere sought to become imperial powers; and "internationalism" virtually collapsed. Focusing on Japanese examples, but not excluding other cases, we will study the discursive spaces of modern national subjectivity with a view to the problems of ethnicity, colonialism, imperial sexism, violence, historical memory, post-coloniality and academic knowledge. A major critical paper will be required.

**[ASIAN 490 Tales of the Heike (also History 490) @ #**

Fall. 4 credits. Not offered 2000–2001.  
K. Brazell, J. R. Piggott.  
See HIST 490 for description.]

**ASIAN 491 Art and Collecting: East & West (also ART H 490)**

Spring. 4 credits. K. McGowan.  
See ART H 490 for description.

**[ASIAN 496 Tokugawa Literature and Thought @ #**

Spring. 4 credits. Not offered 2000–2001. N. Sakai.  
An introduction (in English translation) to literary, theatrical, and intellectual works of the Tokugawa period (1600–1868). We will examine the characteristics of early Tokugawa literary and theatrical works and see how

different they are from the literary works of the later Tokugawa period. We will also read the philosophical and philological works on the classics by writers such as Ogyu Sorai and Motoori Norinaga to understand the ways contemporary Japanese intellectuals understood cultural activities and literature during the Tokugawa period.]

**[ASIAN 580 Problems in Asian Art: Water & Politics in Southeast Asia (also ART H 580)**

4 credits. Not offered 2000–2001.  
K. McGowan.  
See ART H 580 for description.]

**Asia—Graduate Seminars**

For complete descriptions of courses numbered 600 or above, consult the director of graduate studies.

**[ASIAN 601 Southeast Asia Seminar: Indonesia (also GOVT 652)**

Fall. 3–4 credits. Not offered 2000–2001.  
J. Siegel.

The course will serve as an introduction to Indonesia, considered in several dimensions: nationalist Indonesia, ethnic Indonesia, the recent history of nationalism and the politics of the present, minority problems, etc. No knowledge of Indonesian is required.]

**ASIAN 602 Southeast Asia Seminar: Thailand**

Spring. 4 credits. K. Kesboonchoo-Mead.

**[ASIAN 603 Southeast Asia Topical Seminar: Sociology of Natural Resources & Development (also R SOC 607)**

Fall. 3 credits. Not offered 2000–2001.  
P. Gellert.

Building on theories in the sociology of development, this seminar will examine the role of natural resource extraction, processing, and exports to global markets in the development trajectories of nations in Asia, Africa, and Latin America. This course engages students in both theoretical debates and practical implications of resource access, control, and conflict amongst various social stakeholders. Detailed historical cases will be examined, primarily from Southeast Asia (Indonesia, Malaysia, Philippines).]

**[ASIAN 604 Southeast Asia Topical Seminar**

Spring. 3–4 credits. Not offered 2000–2001. Staff.]

**ASIAN 605–606 Master of Arts Seminar in Asian Studies**

605, fall; 606, spring. 2–4 credits. Staff.

**ASIAN 607–608 The Plural Society Revisited (also GOVT 653)**

607, fall; 608, spring. 4 credits. 607 may be taken independently for credit; 607 is a prerequisite for 608. B. Anderson.  
See GOVT 653 for description.

**[ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also HIST 609)**

Spring. 4 credits. Not offered 2000–2001.  
N. Sakai, J. V. Koschmann, B. de Bary.  
See HIST 609 for description.]

**[ASIAN 610 SLA and the Asian Languages (also LING 609)**

Fall. 4 credits. Not offered 2000–2001.  
Y. Shirai.  
See LING 609 for description.]

**ASIAN 612 Japanese Bibliography and Methodology**

Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotas.

**ASIAN 613 Southeast Asian Bibliography and Methodology**

Fall. 1 credit. Prerequisite: permission of instructor. A. Riedy.

This course is designed to instruct students in methods of identifying and locating resources for the study of Southeast Asia. Emphasis will be on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. Electronic databases and online services as well as traditional printed resources will be covered. Relevant arcana of library science will be explained as necessary. Required of honors students and Master of Arts candidates. No foreign language competence is required but a reading knowledge of at least one Southeast Asian language or other Asian language (especially Chinese or Japanese) and a major European language (especially French, Spanish, or Dutch) is highly desirable.

**ASIAN 620 Paleoanthropology of South Asia (also BIOES 671 and ANTHR 671)**

Fall. 3 credits. K. Kennedy.  
See BIOES 671 for description.

**[ASIAN 623-624 Topics in South Asia**

623, fall; 624, spring. 1 credit. Not offered 2000-2001. Staff.

A series designed to introduce as well as enhance and build on students' knowledge of various topics of importance to South Asia (Bangladesh, India, Nepal, Pakistan, and Sri Lanka). Weekly lectures will survey contemporary themes in South Asian scholarship where visiting scholars and members of the Cornell community will discuss a multidisciplinary range of issues. These may include science and nation building; ritual power and resistance; tribal communities and the environment; industrial and agrarian relations; gender and the media; and economic liberalization. A short essay will be required at the end of the course.]

**[ASIAN 630 Seminar on Vietnamese Historiography of the Sixteenth-Eighteenth Centuries**

Spring. 4 credits. Permission of instructor required. Not offered 2000-2001. K. Taylor.

A survey of texts and secondary literature about Vietnamese speakers from the Hong Duc era (end of the fifteenth century) to the founding of the Nguyen dynasty (beginning of the nineteenth century). Required work will include class presentations, short essays, and a seminar paper representing new research.]

**ASIAN 676 Reading Seminar: Thai Political Novel**

Fall or spring. 3-4 credits. T. Chaloehtiarana.

**[ASIAN 688 Theorizing Gender and Race in Asian Histories and Literatures @**

Fall. 4 credits. Not offered 2000-2001. N. Sakai.

In recent years some studies have been published about the questions of gender and race in the fields related to East Asia. Yet, compared with the accumulated factual knowledge about these topics, little attention has been paid to how to conceptualize gender and race, how to analyze the mutual implication of sexism and racism, and how to

understand the relationships of these topics to the broader contexts of colonialisms, imperialisms, and nationalisms. This course is designed to offer a series of discussions about the following problems: (1) the historically specific modes of sexism and racism in social spaces which are related to Japan and other areas in East Asia; (2) the mutual implication of sexism and racism in various contexts including those of colonialism, imperialism, and nationalism; (3) the roles of gender and race in the production of knowledge about Japan and East Asia in general; and (4) the conceptions of gender and race in the social formations particular to East Asia. The assigned readings include both English and Japanese materials. However, those who register in AS388 are exempt from reading the Japanese materials\*.

\*Students are allowed to take this course either as AS 388 or as AS 688, although those who have studied Japanese for more than four years are strongly encouraged to register in AS 688. Those who register in AS 688 have to spend additional time in class in order to deal with texts in Japanese.]

**ASIAN 701-702 Seminar in East Asian Literature**

701, fall; 702, spring. 1-4 credits. Staff.

**ASIAN 703-704 Directed Research**

703, fall or spring; 704, fall or spring. 1-4 credits. Staff.

**ASIAN 899 Master's Thesis Research**

Fall, spring. 2-4 credits. Staff.

**ASIAN 999 Doctoral Dissertation Research**

Fall, spring. 2-4 credits. Staff.

**Honors Courses****ASIAN 401 Asian Studies Honors Course**

Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Staff.

Supervised reading and research on the problem selected for honors work.

**ASIAN 402 Asian Studies Honors: Senior Essay**

Fall or spring. 4 credits. Prerequisite: admission to the honors program. Staff.

The student, under faculty direction, prepares an honors essay.

**ASIAN 403-404 Asian Studies Supervised Reading**

Fall, spring, or both. 1-4 credits. Prerequisite: permission of instructor. Open to majors and other qualified students. Intensive reading under the direction of a member of the staff.

**Bengali****BENGL 121-122 Elementary Bengali**

121, fall; 122, spring. 4 credits each term. Prerequisite: for Bengali 122, Bengali 121 or examination. D. Sudan.

The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script will also be introduced.

**BENGL 201-202 Intermediate Bengali Reading @**

201, fall; 202, spring. 3 credits each term. Prerequisites: for Bengali 201, Bengali 122 or examination; for Bengali 202, Bengali 201 or examination. D. Sudan.

Continuing instruction in grammar with attention to speaking and reading skills.

**BENGL 203-204 Intermediate Bengali Composition and Conversation @**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Bengali 203, Bengali 122 or examination; for Bengali 204, Bengali 203 or examination. D. Sudan.

Continuing instruction in grammar with attention to writing skills.

**BENGL 300 Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. D. Sudan.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**BENGL 303-304 Bengali Literature I, II**

303, fall; 304, spring. 4 credits each term. Prerequisites: Bengali 203-204 or equivalent. D. Sudan.

An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abanindranath Tagore and short stories by Bonophul will be covered. The course will be devoted to reading these works and developing literary criticism and creative writing in Bengali.

**Burmese**

**NOTE:** Contact S. Tun in Morrill Hall 405 before classes begin for placement or other testing and organizational information.

**BURM 103-104 Burmese Conversation Practice**

103, fall; 104, spring. 2 credits each term. Prerequisites: for Burmese 104, Burmese 103 and Burmese 121. May not be taken alone. Must be taken simultaneously with Burmese 121-122. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun.

Additional drills, practice, and extension of materials covered in Burmese 121 and 122. These courses are designed to be attended simultaneously with Burmese 121-122 respectively, allowing students to obtain qualification within a year.

**BURM 121-122 Elementary Burmese**

121, fall; 122, spring. 4 credits each term. Prerequisite: for Burmese 122, Burmese 121. May be taken alone or simultaneously with Burmese 103-104. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun.

A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

**BURM 123 Continuing Burmese**

Fall. 4 credits. Prerequisite: Burmese 122. Satisfactory completion of Burmese 123 fulfills the qualification portion of the language requirement. S. Tun.

Continuing instruction in conversational and reading skills, to prepare students for 200-level courses.

**BURM 201-202 Intermediate Burmese Reading @**

201, fall or spring; 202, fall or spring. 3 credits each term. Prerequisites: for Burmese 201, Burmese 123; for Burmese 202, Burmese 201. S. Tun.

Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

**BURM 300 Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. S. Tun.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**BURM 301-302 Advanced Burmese @**

301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Burmese 301, Burmese 202 or permission of instructor; for Burmese 302, Burmese 301. S. Tun.

Continuing instruction on conversational and literary skills, but with special emphasis on reading. Students encounter various genres and styles of written Burmese. Readings will include articles on current events, and either several short stories or a novel. Focus is on developing reading skills, particularly on vocabulary development, consolidating and expanding grammar, and appreciating stylistic and cultural differences.

**BURM 303-304 Advanced Burmese II**

303, fall or spring; 304, fall or spring. 3 credits each term. Prerequisite: for Burmese 303, Burmese 202 or permission of instructor; for Burmese 304, Burmese 303. S. Tun.

This is a course for students who have good conversational ability in Burmese and some familiarity with Burmese culture, but who need to strengthen reading skills and further enrich their vocabulary. Students will, in consultation with the instructor, be able to select reading materials. There will also be an opportunity for those who need it, to strengthen listening skills, through the study of current films, TV, and radio programs in Burmese.

**BURM 401-402 Directed Individual Study**

401, fall; 402, spring. 2-4 credits variable each term. Prerequisite: permission of instructor. S. Tun.

This course is designed to accommodate the needs of advanced or specialized students, and faculty interests. Topics of reading and discussion are selected on the basis of student need.

**Cambodian**

See Khmer.

**Chinese**

**NOTE:** Testing for placement, except for those with near-native abilities (particularly those schooled in a Chinese setting up until the age of about 12) takes place in registration week, before classes begin. Time and place will be posted on the web at [dml.cornell.edu](http://dml.cornell.edu) and the Chinese bulletin board opposite Morrill 416. Students with some Chinese schooling who want to obtain 3 or 6 credits for their proficiency will be tested at the beginning of

the second week of classes. Again, the time and place will be announced.

**CHIN 101-102 Elementary Standard Chinese ('Mandarin')**

101, fall; 102, spring. 6 credits each term. Prerequisite: for Chinese 102, Chinese 101, or equivalent. You must enroll in lecture and 1 section. Since each section is limited to 10-12 students, students missing the first 2 class meetings without a university excuse are dropped so others may register. No student will be added after the second week of classes. Satisfactory completion of Chinese 102 fulfills the qualification portion of the language requirement. Staff.

A course for beginners or those who have been placed in the course by examination. The course gives a thorough grounding in conversational and reading skills. Students with some facility in the spoken language (because Chinese is spoken at home) but who do not read characters should take 109-110. Students who read Chinese, but who speak 'dialects,' such as Cantonese or Amoy, should consult with the staff before enrolling.

**CHIN 109-110 Beginning Reading and Writing (Standard Chinese)**

109, fall; 110, spring. 4 credits each term. Prerequisites: must have permission of instructor to enroll. Students who complete Chinese 110 normally continue with Chinese 209 and 210. Because of high demand for this course, students missing the first 2 meetings without a university excuse are dropped so others may register. Satisfactory completion of Chinese 110 fulfills the qualification portion of the language requirement. F. Lee Mehta.

This course is intended primarily for students who speak some Chinese (e.g., at home), but who have had little or no formal training. The focus is on characters, reading comprehension, basic composition, standard grammar, and reading aloud with standard Chinese ('Mandarin') pronunciation.

**CHIN 111-112 Beginning Cantonese (Spoken)**

111, fall; 112, spring. 3 credits each term. Prerequisite: for Chinese 112, Chinese 111 or equivalent. Chinese 111-112 only satisfies the qualification portion of the language requirement if the student can also demonstrate a comparable reading ability. H. Huang.

A course in conversational standard Cantonese (as spoken in Hong Kong and Canton) for beginners. Students need not have a Mandarin background to take this course, but those with elementary reading skills will also be introduced to Cantonese (character) writing.

**CHIN 113-114 Beginning Reading for Cantonese Speakers**

113, fall; 114, spring. 3 credits each term. Prerequisite: everyday conversational ability in Cantonese. Completion of 114 satisfies the qualification portion of the language requirement. H. Huang.

This course is intended primarily for students who speak some Cantonese (e.g., at home), but who have had little or no formal training in writing. The focus is on characters, reading comprehension, standard grammar, and reading aloud with Cantonese pronunciation.

**CHIN 201-202 Intermediate Standard Chinese ('Mandarin') @**

201, fall or summer; 202, spring or summer. 4 credits each term. Prerequisites: for Chinese 201, Chinese 102 with a grade of C+ or above or equivalent; for Chinese 202, Chinese 201 or equivalent. Satisfactory completion of Chinese 201 fulfills the proficiency portion of the language requirement. Section 1, Q. Teng; Section 2, Staff.

Continuing instruction in written and spoken Chinese with particular emphasis on consolidating basic conversational skills and improving reading confidence and ability.

**CHIN 209-210 Intermediate Reading and Writing @**

209, fall; 210, spring. 4 credits each term. Prerequisites: for Chinese 209, Chinese 110 or equivalent; Chinese 210, Chinese 209. Satisfactory completion of 209 fulfills the proficiency portion of the language requirement. After completing 210, students may only take 400-level courses in Chinese. X. Sun.

Continuing focus on reading and writing for students with spoken background in standard Chinese; introduction of personal letter writing and other types of composition.

**CHIN 211-212 Intermediate Cantonese**

211, fall; 212, spring. 4 credits each term. H. Huang.

Continuing instruction in spoken Cantonese and in characters (Cantonese and Mandarin), reading comprehension, and reading aloud with Cantonese pronunciation.

**CHIN 300 Directed Studies**

Fall or spring. 1-4 credits variable.

Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**CHIN 301-302 High Intermediate Chinese**

301, fall; 302, spring. 4 credits each term. Prerequisites: for Chinese 301, Chinese 202 or equivalent; for Chinese 302, Chinese 301. F. Lee-Mehta.

Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

**CHIN 411-412 Advanced Chinese: Fiction, Reportage, Current Events**

411, fall; 412, spring. 4 credits each term. Prerequisites: for Chinese 411, Chinese 302 or equivalent; for Chinese 412, Chinese 411 and permission of instructor required. Q. Teng.

Reading, discussion, and composition at advanced levels.

**CHIN 425 Special Topics**

Fall or spring, according to demand. 4 credits. Prerequisite: permission of instructor. Staff.

A number of different topics in advanced Chinese language, advertised the previous semester, will be offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Ch'ing documents, xiesheng comedy routines, etc. May be repeated for credit.

## Chinese FALCON (Full-year Asian Language CONcentration)

For full information, brochures, etc., see the FALCON secretary 125 Rockefeller Hall (e-mail: falcon@cornell.edu).

### CHIN 160 Introductory Intensive Mandarin

Summer only. 8 credits. Completion of 160 fulfills the qualification portion of the language requirement. S. Hoare and staff. Introduction to spoken and written Mandarin. Lectures on linguistic and cultural matters, intensive practice with native speakers, and laboratory work. Students who complete this course with a grade of at least B are normally eligible to enroll in Chinese 201.

### CHIN 161-162 Intensive Mandarin @

161, fall; 162, spring. 16 credits each term. Prerequisites: for Chinese 161, Chinese 160 or equivalent or permission of instructor; for Chinese 162, Chinese 161. Satisfactory completion of Chinese 161 fulfills the proficiency portion of the language requirement. S. Hoare and staff.

## Literature in Chinese

### CHLIT 213-214 Introduction to Classical Chinese @ #

213, fall; 214, spring. 3 credits each term. Prerequisite: qualification in Chinese or permission of instructor. May be taken concurrently with Chinese 101-102, 201-202, 301-302. R. McNeal.

### CHLIT 300 Reading from the Early Masters

Fall. 4 credits. Prerequisites: CHLIT 213-214 or permission of instructor. R. McNeal. Students will read and discuss several passages from early classical texts, including the Confucian Analects, the Mozi, the Guanzi, and others. Attention will be paid to grammar, historical context, and methodology. Students who have not completed one year of classical Chinese at Cornell need permission from the instructor to register.

### CHLIT 420 T'ang and Sung Poetry @ #

Spring. 4 credits. Prerequisite: permission of instructor. T. L. Mei. Readings in the original Chinese, together with secondary works by Chinese and Western critics.

### CHLIT 421-422 Directed Study

Fall or spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.

### CHLIT 423 Readings in Chinese History

Fall. 4 credits. Staff. Selected Readings.

### [CHLIT 424 Readings in Literary Criticism

Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered 2000-2001. T. L. Mei.]

### CHLIT 426 History of the Chinese Language (also CHIN 403) @ #

Spring. 4 credits. Prerequisite: reading knowledge of Chinese. T. L. Mei. This course explores the development of the Chinese language from its Sino-Tibetan beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old

Chinese, Middle Chinese, and historical origins of modern dialects.

### [CHLIT 435 Chinese Buddhist Texts @ #

Fall. 4 credits. Prerequisite: 1 year of literary Chinese or permission of the instructor. Not offered 2000-2001. D. Boucher.

This seminar is designed to introduce students to the idiom of Buddhist Chinese. We will start by reading selections from the early translations to gain a grounding in the vocabulary and syntax that came to characterize literary Buddhism in China. From there we will survey some of the so-called apocryphal texts (Buddhist "sutras" produced in China) and look at samples from important writers and schools, depending on student interests. This course is open to students in any area of East Asia with an interest in developing skills in Buddhist texts.]

### [CHLIT 603 Seminar in Chinese Fiction and Drama

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2000-2001. E. Gunn.]

### [CHLIT 605 Seminar in Chinese Fiction and Drama

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2000-2001. Staff.]

### [CHLIT 607 Early Medieval Chinese Poetry

Spring. 4 credits. Not offered 2000-2001. S. Tian.

By reading the poetry, criticism, and discursive prose of the first to sixth centuries AD, we will consider the changing roles and development of Chinese poetry.]

### [CHLIT 610 Chinese Cultural Criticism

Fall. 4 credits. Not offered 2000-2001. E. Gunn.]

### CHLIT 621-622 Advanced Directed Reading: Chinese Historical Syntax

621, fall; 622, spring. 2-4 credits. Prerequisite: permission of instructor. Staff.

## Hindi

### HINDI 101-102 Elementary Hindi-Urdu

101, fall; 102, spring. 6 credits each term. Prerequisite: for Hindi 102, Hindi 101 or equivalent. M. Farooqi.

A semi-intensive course for students without prior experience in Hindi-Urdu or a closely related language. A thorough grounding is given in all language skills: listening, speaking, reading, and writing. Students who have had exposure to Hindi-Urdu or a closely related language in the home or otherwise should generally take Hindi 109-110. Check with instructor regarding placement.

### HINDI 109-110 Accelerated Elementary Hindi-Urdu

109, fall; 110, spring. 3 credits each term. Prerequisite for Hindi 110: Hindi 109 or equivalent. M. Farooqi.

An entry-level sequence for students with some prior exposure to Hindi-Urdu or a closely related language. This course sequence will provide a thorough grounding in all the language skills: listening, speaking, reading, and writing. Completion of this sequence, including satisfactory performance on an examination given at the end of Hindi 110, will constitute a level of performance equal to that of the 101-102 sequence, and

will thus be considered to fulfill qualification for the language requirement plus eligibility for 200-level Hindi-Urdu courses. Check with instructor regarding placement.

### HINDI 201-202 Intermediate Hindi Reading @

201, fall; 202, spring. 3 credits each term. Prerequisites: for Hindi 201, Hindi 102; for Hindi 202, Hindi 201 or permission of instructor. M. Farooqi.

### [HINDI 203-204 Intermediate Composition and Conversation @

203, fall; 204, spring. 3 credits each term. Prerequisites: for Hindi 203, Hindi 102; for Hindi 204, Hindi 203 or permission of instructor. Not offered 2000-2001. M. Farooqi.

Throughout this course sequence all aspects of language learning are practiced: listening, speaking, reading, and writing. In 203, video materials are used and the emphasis is on the conversational aspect of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.]

### HINDI 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. M. Farooqi.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

### HINDI 301-302 Advanced Readings in Hindi Literature @

301, fall; 302, spring. 4 credits each term. Prerequisites: for Hindi 301, Hindi 102; for Hindi 302, Hindi 301 or equivalent. M. Farooqi.

Selected readings in modern Hindi literature.

### [HINDI 303-304 Advanced Composition and Conversation @

303, fall; 304, spring. 4 credits each term. Prerequisites: for Hindi 303, Hindi 204 or equivalent; for Hindi 304, Hindi 303 or equivalent. Not offered 2000-2001. M. Farooqi.]

## Indonesian

For students who have completed Indonesian 121-122-123 or its equivalent there is the option of a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.

Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available from Professor John Wolff (307 Morrill Hall, 255-0733).

### INDO 121-122 Elementary Indonesian

121, fall; 122, spring. 4 credits each term. Prerequisite: for Indonesian 122, Indonesian 121. J. Wolff and staff.

A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

### [INDO 123 Continuing Indonesian

Fall. 4 credits. Prerequisite: Indonesian 122 or equivalent. Satisfactory completion of Indonesian 123 fulfills the qualification portion of the language requirement. Not offered 2000-2001. J. Wolff and staff.

Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings and sharpens listening skills.]

**[INDO 203-204 Intermediate Composition and Conversation**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Indonesian 203, Indonesian 123; for Indonesian 204, Indonesian 203 or permission of instructor. Not offered 2000-2001. J. Wolff and staff.]

**[INDO 205-206 Intermediate Indonesian @**

205, fall; 206, spring. 3 credits each term. Prerequisites: for Indonesian 205, Indonesian 123 or equivalent; for Indonesian 206: Indonesian 205 or equivalent. Satisfactory completion of Indonesian 205 fulfills the proficiency portion of the language requirement. Not offered 2000-2001. J. Wolff and staff. This course develops all four skills: reading, writing, speaking, and comprehension.]

**INDO 300 Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. J. Wolff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**[INDO 301-302 Advanced Readings in Indonesian and Malay**

301, fall; 302, spring. 4 credits each term. Prerequisites: for Indonesian 301, Indonesian 205-206 or equivalent; for Indonesian 302, Indonesian 301. Not offered 2000-2001. J. Wolff and staff.]

**[INDO 303-304 Advanced Indonesian Conversation and Composition**

303, fall; 304, spring. 4 credits each term. Prerequisites: for Indonesian 303, Indonesian 206; for Indonesian 304, Indonesian 303 or equivalent. Not offered 2000-2001. J. Wolff and staff.]

**INDO 305-306 Directed Individual Study**

305, fall; 306, spring. 2-4 credits. Prerequisites: Indonesian 301-302 and 303-304 or equivalent knowledge of Indonesian or Malay. J. Wolff and staff. A practical language course on an advanced level in which the students will read materials in their own field of interest, write reports, and meet with the instructor for two hours a week for two credits and twice a week for four credits.

**[INDO 401-402 Advanced Readings in Indonesian and Malay Literature**

401, fall; 402, spring. 4 credits each term. Prerequisites: for Indonesian 401, Indonesian 302 or equivalent; for Indonesian 402, Indonesian 401 or equivalent. Not offered 2000-2001. J. Wolff and staff.]

**FALCON (Full-year Asian Language CONcentration)**

**[INDO 161-162 Intensive Indonesian**

161, fall; 162, spring. 16 credits each term. Prerequisite: permission of instructor. Not offered 2000-2001. J. Wolff and staff.]

## Japanese

**JAPAN 101-102 Elementary Japanese**

101, fall; 102, spring. 6 credits each term. Prerequisite for Japanese 102: Japanese 101 or placement by the instructor during registration period. Intended for beginners or for those who have been placed in the course by examination. You must enroll in lecture and 1 section. R. Sukle and staff.

A thorough grounding in all four language skills—speaking, hearing, reading, writing—at the beginning level, but with a special emphasis on oral communication and actual use of the language in social context. Homework for the course is largely work on the skill aspects of language through practice in the language lab with tapes or CD-ROM. The lecture provides explanation, analysis, and cultural background necessary for successful interaction with Japanese people. The sections are conducted entirely in Japanese. Materials covered are not the same as for Japanese 141-142.

**JAPAN 121 Continuing Japanese**

Fall. 6 credits. Prerequisite: placement by the instructor at beginning of semester. Sections will co-meet with JAPAN 101-102 sections. Staff.

Accelerated training in listening, speaking, reading, and writing with special emphasis on oral communication. For students who have already acquired a limited facility in Japanese through residence in Japan or through brief formal study and require fewer contact hours per week.

**JAPAN 141-142 Beginning Japanese at a Moderate Pace**

141, fall; 142, spring. 4 credits each term. Prerequisite for Japanese 142: Japanese 141 or placement by instructor during registration period. Y. Shirai and staff. Beginning level training in listening, speaking, reading, and writing, with more emphasis on written skills than Japanese 101-102. Classroom activities focus on oral communication skills. Homework for the course is largely written exercises. Fewer credits and fewer class contact hours than Japanese 101-102; the course meets five hours per week (MTWRF). Materials covered are not the same materials as Japanese 101-102.

**JAPAN 201-202 Intermediate Japanese Conversation @**

201, fall and summer; 202, spring and summer. 4 credits each term. Prerequisites: for Japanese 201, Japanese 102 or placement by the instructor during registration; for Japanese 202, Japanese 201 and 203 or placement by the instructor during registration. You must enroll in lecture and 1 section. Students enrolled in Japan 201 are strongly urged to enroll concurrently in Japan 203. Y. Katagiri.

**JAPAN 203-204 Intermediate Japanese Reading I @**

203, fall; 204, spring. 2 or 3 credits each term. Prerequisites: for Japanese 203, Japanese 102, or placement by the instructor during registration; for Japanese 204, Japanese 203 or placement by the instructor during registration. You must enroll in lecture and 1 section. N. Nakada. Reading of elementary texts emphasizing practical materials, with development of writing skills.

**JAPAN 241-242 Intermediate Japanese at a Moderate Pace @**

241, fall; 242, spring. 4 credits each term. Prerequisites: for Japanese 241, Japanese 142 or placement by instructor during registration period; for Japanese 242, Japanese 241 or placement by instructor. Y. Kawasaki and K. Selden.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command.

**[JAPAN 251-252 Elementary/Intermediate Japanese @**

251, fall; 252, spring. 4 credits each term. Prerequisites: for Japanese 251, Japanese 160 or placement by instructor during registration period; for Japanese 252, Japanese 251, 102, or placement by instructor during registration period. Not offered 2000-2001. Y. Nakanishi-Whitman.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204 into their schedules: MBA students, engineering students, hotel school students, arts college students, and others identical with 541-552. Can be followed by Japanese 351-352.]

**JAPAN 300 Directed Studies**

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**JAPAN 301-302 Communicative Competence @**

301, fall; 302, spring. 3 credits each term. Prerequisites: for Japanese 301, Japanese 202 and placement by the instructor during registration; for Japanese 302, Japanese 301 or placement by the instructor during registration. Y. Katagiri.

This is a course for students who have learned basic Japanese grammar and oral skill and would like to use the language for natural conversation and effective oral communication. The course is intended to: (1) expand vocabulary for daily life use; (2) brush up on knowledge of basic grammar for fluency; and (3) develop communicative skills for varied situations.

**JAPAN 303-304 Intermediate Japanese Reading II @**

303, fall; 304, spring. 4 credits each term. Prerequisites: for Japanese 303, Japanese 202 or placement by the instructor during registration; for Japanese 304, Japanese 303 or placement by the instructor during registration. K. Selden.

Reading of selected modern texts with emphasis on expository style.

**[JAPAN 351-352 Advanced Japanese at a Moderate Pace @**

351, fall; 352, spring. 4 credits each term. Prerequisites: for Japanese 351, Japanese 252 or placement by instructor during registration period; for Japanese 352, Japanese 351 or placement by instructor during registration period. Not offered 2000-2001.

Training in intermediate to advanced listening and speaking, and continued work on reading and writing. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204

into their schedules: MBA students, engineering students, hotel school students, arts college students, and others. Also highly recommended for those with prior background in the language who are weak in the more complex and difficult grammar patterns.]

**JAPAN 401-402 Oral Narration and Public Speaking**

401, fall; 402, spring. 2 credits each term. Prerequisites: for Japanese 401, Japanese 302 or placement by the instructor during registration; for Japanese 402, Japanese 401 or placement by the instructor during registration. N. Nakada.

Instruction in making and delivering socially appropriate and effective speeches, with emphasis on both the construction of discourse and Japanese patterns of oral delivery.

**JAPAN 403-404 Advanced Japanese Reading @**

403, fall; 404, spring. 4 credits each term. Prerequisite: Japanese 304 or permission of instructor.

**Section I:** Area of Humanities. Cannot be used for distribution. K. Selden. Reading of selected modern texts with emphasis on expository style.

**Section II:** Area of Economics and Social Science. Cannot be used for distribution. Y. Kawasaki. Reading of selected modern texts with emphasis on expository style.

**[JAPAN 410 History of the Japanese Language (also LING 411) @ #**

Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 2000-2001. J. Whitman.

An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.]

**[JAPAN 414 Linguistic Structure of Japanese (also LING 404) @**

Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and Linguistics 101 or equivalent introductory course in linguistics. Offered alternate years. Not offered 2000-2001. J. Whitman.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.]

**JAPAN 421-422 Directed Readings**

421, fall; 422, spring. Credit TBA. Limited to advanced students. Prerequisite: placement by the instructor during registration. K. Selden.

Topics are selected on the basis of student needs.

**[JAPAN 551-552 Intermediate Japanese for Business School Students**

551, fall; 552, spring. 4 credits each term. Prerequisites: for Japanese 551, Japanese 160, and permission of instructor or placement by instructors during registration period; for Japanese 552, Japanese 551, 102, or placement by instructors during registration. Not offered 2000-2001. Y. Nakanishi-Whitman.

Training in listening, speaking, reading, and writing for students who have already acquired a basic oral proficiency. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the

more intensive 201/203 or 202/204 courses into their schedules.]

**[JAPAN 555-556 Advanced Japanese for Business School Students**

555, fall; 556, spring. 4 credits each term. Prerequisites: for Japanese 555, Japanese 552 or placement by instructors during registration period; for Japanese 556, Japanese 555 or placement by instructors during registration period. Not offered 2000-2001. Staff.

Training in listening and speaking at intermediate to advanced level; continued work on reading and writing at intermediate level. Course times are arranged to accommodate those in the M.B.A. program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 202/204 courses into their schedules.]

**Japanese FALCON (Full-year Asian Language CONcentration)**

Director: R. Sukle, 123 Rockefeller Hall; FALCON Secretary 125 Rockefeller Hall, 255-6457.

There are three small interactive classes per day conducted entirely in Japanese and one lecture conducted in English and Japanese. The interactive classes are conducted by experienced and highly trained native teachers; the lecture is conducted by an expert in Japanese language structure. Two one-hour sessions in the language lab are required daily. Additional preparation time in the language lab is necessary in the evenings. Exposure to the language exceeds that of even students living and studying in Japan, providing over 1,200 hours of exposure throughout the full-year program. The extensive exposure and intensive work on the language allows students to develop a level of fluency, accuracy, and control of the language not achieved in any other type of academic settings. The course is designed to develop 'copability' in the students by bringing them up to the level where they will be able to successfully make further progress in the language on their own even if they do not have further formal instruction. The intensive nature of the program allows graduate students to complete their language work in minimal time and undergraduates, including freshmen, to achieve levels of Japanese that are far beyond what is normally achieved in a four-year program, provided they continue their study of Japanese after FALCON.

**JAPAN 160 Introductory Intensive Japanese (FALCON)**

Summer only. 8 credits. R. Sukle and staff. (See general description above). This is the first term of the FALCON Program. It is a full-time, intensive, nine-week course which begins at the absolute beginning level, in speaking as well as rudimentary reading and writing. Formal application must be made to the program (see above), but admission is open to all students, not just those planning to take the full-year program. Students completing this course can move smoothly in the academic year to Japanese 251-252 or 551-552 for part-time work, or continue full time with Japanese 161-162.

**JAPAN 161-162 Intensive Japanese (FALCON)**

161, fall; 162, spring. 16 credits each term. Prerequisites: for Japanese 161, Japanese 160, or Japanese 102 at Cornell, or placement by FALCON staff prior to beginning of fall term; for Japanese 162, Japanese 161, or placement by FALCON staff prior to beginning of spring term. Students must apply formally to program (see above); application open to all Cornell students and students from other institutions. R. Sukle and staff.

(See general description above). Work on spoken and written Japanese from an intermediate level to an advanced level. This is a full-time program and full academic load; the demands of the program do not normally permit students to take other courses simultaneously. With a sequence of 160-161-162, in only one calendar year a student can complete as much Japanese as would be contained in three or more years of regular study at most academic institutions. This course sequence also serves to fulfill the language requirement for the M.A. in Asian studies and the joint M.B.A./M.A. in Asian studies.

**Literature in Japanese**

**JPLIT 406 Introduction to Classical Japanese @ #**

Fall. 4 credits. Prerequisite: permission of instructor. K. Brazell.

**JPLIT 421-422 Directed Readings**

421, fall; 422, spring. 2-4 credits. Prerequisite: for JPLIT 421, Japanese 402 or equivalent; for JPLIT 422, Japanese 421 or equivalent. Staff.

**JPLIT 611 Seminar in Classical Japanese Literature**

Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. K. Brazell.

For advanced graduate students in the field of East Asian Literature. This seminar will focus on the reading of Japanese literary and literary-critical texts in relation to a selected topic in classical literature.

**[JPLIT 612 Seminar in Medieval Genres**

Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 2000-2001. K. Brazell.

This seminar will explore medieval literary genres in terms of the contemporary religious, social, political, and aesthetic discourses. Readings will be in classical and modern Japanese as well as in English.]

**JPLIT 613 Seminar in Tokugawa Culture and Thought**

Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. N. Sakai.

This seminar will examine a variety of texts written during the Tokugawa period. The topics discussed in these are many: from the conceptualization of the virtue in the Confucian tradition, to the composition of Waka poetry. The texts are not selected from one school or from one teaching but encompass a wide range of intellectual trends including Neo-Confucianism, the Kogaku and the Kokugaku. In addition to the original texts of the Tokugawa period, we are going to read a few works of modern historiography on Tokugawa thought and culture. These works

do not necessarily represent the standard of the present-day Tokugawa studies, but they clearly show different approaches. In this seminar, we will evaluate critically these works through a careful reading of the original texts of the Tokugawa period.

**[JPLIT 614 Seminar in Modern Japanese Literature (also COM L 695)]**

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. B. de Bary.

How might postmodern debates on language and difference transform our understanding of the project of cross-cultural learning institutionalized in postwar American area studies? Intended as an introductory course for graduate students, this class will emphasize weekly readings of important texts which have grappled with, or attempted to challenge, epistemological assumptions, categories, and processes which have informed modern disciplinary knowledge of cultural others. All readings will be done in English and will attempt to trace the contours of debate over broad theoretical issues whose relevance is by no means confined to the question of area studies. Readings will include texts by Rosi Braidotti, Rey Chow, James Clifford, Jacques Derrida, Gilles Deleuze, William Haver, Luce Irigaray, Alice Jardine, and others.]

## Graduate-Level Reading Courses

**[JPLIT 621 Advanced Readings in Pre-Modern Japanese Narrative Literature]**

Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. K. Brazell.]

**[JPLIT 622 Advanced Readings in Pre-Modern Japanese Poetry]**

Spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. K. Brazell.]

**[JPLIT 623 Advanced Readings in Pre-Modern Drama]**

Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. K. Brazell.]

**[JPLIT 624 Advanced Readings in Modern Japanese Literature]**

Spring. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 2000–2001. B. de Bary.

The course will consider representations of the body and eroticism in fiction, poetry, film, and theoretical writings from the Taisho through early Showa periods (1912 to the late 1930s). Special attention will be given to writings about the "New Woman" and "Modern Girl," to sexuality in modernist cinematic and literary experiments, and to reciprocal relations between colonial and metropolitan culture. All readings will be done in Japanese.]

**[JPLIT 700-701 Seminar: Reading of Historical Materials—Japanese Imperial Nationalism and Its Literature]**

700, fall; 701, spring. 4 credits. N. Sakai.

## Javanese

**[JAVA 131-132 Elementary Javanese]**

131, fall; 132, spring. 3 credits each term. Prerequisite: for Javanese 132, Javanese 131 or equivalent. This language series (131–132) cannot be used to satisfy the language requirement. Not offered 2000–2001. J. Wolff and staff.

An elementary language course for those who have had no previous experience in the language.]

**[JAVA 133-134 Continuing Javanese]**

133, fall; 134, spring. 3 credits each term. Prerequisites: for Javanese 133, Javanese 132 or equivalent; for Javanese 134, Javanese 133 or equivalent. Satisfactory completion of Javanese 134 fulfills the qualification portion of the language requirement. Not offered 2000–2001. J. Wolff and staff.

An intermediate conversation and reading course.]

**[JAVA 203-204 Directed Individual Study]**

203, fall; 204, spring. 3 credits. Prerequisite: Javanese 134 or equivalent. Not offered 2000–2001. J. Wolff and staff.

This is a practical language course on an intermediate level in which the students will work through readings and conversations under the guidance of a native speaker for three contact hours a week.]

**[JAVA 300 Directed Studies]**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not offered 2000–2001. J. Wolff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.]

## Khmer (Cambodian)

**[KHMER 101-102 Elementary Khmer]**

101, fall; 102, spring. 6 credits each term. Prerequisite: for Khmer 102, Khmer 101 or equivalent. Not offered 2000–2001. Staff.

A course for beginners or for those who have been placed in the course by examination. The course gives a thorough grounding in speaking and reading.]

**[KHMER 201-202 Intermediate Khmer Reading @]**

201, not offered 2000–2001; 202, fall. 3 credits each term. Prerequisites: for Khmer 201, Khmer 102; for Khmer 202, Khmer 201. S. Son.

Continuing instruction in spoken and written Khmer.

**[KHMER 203-204 Intermediate Composition and Conversation @]**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Khmer 203, Khmer 102; for Khmer 204, Khmer 203. Not offered 2000–2001. Staff.

Letter writing and other forms of composition.]

**[KHMER 300 Directed Studies]**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. S. Son.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.]

**[KHMER 301-302 Advanced Khmer @]**

301, not offered 2000–2001; 302, fall. 4 credits each term. Prerequisites: for Khmer 301, Khmer 202 or equivalent; for Khmer 302, Khmer 301. S. Son.

Continuing instruction in spoken and written Khmer; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**[KHMER 401-402 Directed Individual Study]**

401, fall; 402, spring. For advanced students. 2–4 credits each term. Prerequisite: permission of instructor. Not offered 2000–2001. Staff.

Various topics according to need.]

## Korean

**[KOREA 101-102 Elementary Korean]**

101, fall; 102, spring. 6 credits each term. Satisfactory completion of Korean 102 fulfills the qualification portion of the language requirement. H. Diffloth and staff.

Covers basics of speaking, reading, and writing. Introduces Hangul writing system and grammar.

**[KOREA 109-110 Elementary Reading]**

109, fall; 110, spring. 3 credits each term. Prerequisite: permission of instructor. Satisfactory completion of Korean 110 fulfills the qualification portion of the language requirement. H. Diffloth and staff.

This course is for students who have spoken some Korean in the home, but whose reading and writing skills are limited or nonexistent. If in doubt about eligibility, see instructor.

**[KOREA 201-202 Intermediate Korean @]**

201, fall; 202, spring. 4 credits each term. Prerequisites: for Korean 201, Korean 102 or permission of instructor; for Korean 202, Korean 201. Satisfactory completion of Korean 201 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.

Covers the basics of speaking, reading, and writing at the intermediate level. Introduces some reading and writing with Chinese characters.

**[KOREA 209-210 Intermediate Reading]**

209, fall; 210, spring. 4 credits each term. Prerequisites: for Korean 209, Korean 110 or permission of instructor; for Korean 210, Korean 209 or permission of instructor. Satisfactory completion of Korean 209 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.

An intermediate level of reading comprehension and writing course for students who have acquired basic oral proficiency. Introduces some reading and writing with Chinese characters. If in doubt about eligibility, see instructor.

**[KOREA 300 Directed Studies]**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not offered 2000–2001. H. Diffloth.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.]

**KOREA 301-302 Advanced Korean @**

301, fall; 302, spring. 4 credits each term.  
Prerequisites: for Korean 301, Korean 202 or placement by instructor; for Korean 302, Korean 301 or placement by instructor.  
H. Diffloth and staff.

Reading of advanced texts, including newspapers and Chinese character material, together with advanced use of the spoken language.

**[KOREA 430 Structure of Korean (also LING 430)]**

Spring. 4 credits. Offered alternate years.  
Not offered 2000-2001. J. Whitman.

See description under LING 430.]

**Literature in Korean****[KRLIT 405 Readings in Korean Literature]**

Fall. 4 credits. Not offered 2000-2001.]

**[KRLIT 406 Korean Literature Translation Workshop @]**

Spring. 2-3 credits. Prerequisite: Korean 301-302 or equivalent; permission of instructor. Not offered 2000-2001.]

**Nepali****Study Abroad in Nepal**

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, co-sponsor an academic year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered both at Tribhuvan University and at the Cornell-Nepal Study Program House adjacent to the university. All courses are officially taught in English. A five-week, in-country orientation program includes classes in intensive Nepali conversation, cultural orientation programs, and a ten-day field trip and trek. Semester course offerings include Nepali language (Tibetan and/or Newari languages also possible), contemporary issues in Nepalese studies, field research design and methods in sociology/anthropology and ecology/environment, and guided field research.

Juniors and seniors in good academic standing from any major field may participate. Students must have a desire to study on the other side of the world, to participate in a multicultural program, and to undertake rigorous field research. No experience in Nepal is necessary and instruction is in English, but some prior Nepali language study is strongly recommended. Students interested in the study abroad in Nepal program should consult with the Cornell Abroad office (474 Uris Hall) for further information.

**NEPAL 101-102 Elementary Nepali**

101, fall; 102, spring. 6 credits each term.  
Prerequisite: for Nepali 102, 101 or examination. S. Oja.

Intended for beginners. The emphasis is on basic grammar, speaking, and comprehension skills, using culturally appropriate materials and texts. Devanagari script for reading and writing is also introduced.

**NEPAL 160 Intensive Nepali**

Summer only. 6 credits. Intended for beginners. Offered alternate years. S. Oja. Emphasis will be on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.

**NEPAL 201-202 Intermediate Nepali Conversation @**

201, fall; 202, spring. 3 credits each term.  
Prerequisites: for Nepali 201, Nepali 102 or examination; for Nepali 202, Nepali 201 or examination. S. Oja.

Intermediate instruction in spoken grammar and verbal comprehension skills, with special attention to developing technical vocabularies and other verbal skills appropriate to students' professional fields.

**NEPAL 203-204 Intermediate Nepali Composition @**

203, fall; 204, spring. 3 credits each term.  
Prerequisites: for Nepali 203, Nepali 102 or examination; for Nepali 204, Nepali 203 or examination. S. Oja.

A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students' professional fields.

**NEPAL 300 Directed Studies**

Fall or spring. 1-4 credits variable.  
Prerequisite: permission of instructor.  
S. Oja.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**NEPAL 301-302 Advanced Nepali**

301, fall; 302, spring. 3 credits each term.  
Prerequisite: Nepali 204 or permission of instructor. S. Oja.

Reading of advanced texts, together with advanced drill on the spoken language.

**Pali**

See also courses listed in this section under South Asian Languages.

**[PALI 131-132 Elementary Pali]**

131, fall; 132, spring. 3 credits each term.  
This language series cannot be used to satisfy the language requirement. Not offered 2000-2001. Staff.

131 is an introduction to the language of the canonical texts of Theravada Buddhism. Reading of authentic texts of Theravada Buddhism. Emphasis on both content and grammatical structure. Familiarity with Sanskrit is not required. 132 is a continuation of 131 with further readings.]

**PALI 300 Directed Studies**

Summer only. 6 credits. Intended for beginners. Offered alternate years. Emphasis is on the spoken (colloquial) language, the writing system is introduced and used to present all Sinhala materials, with additional reading practice with colloquial materials. A foundation is laid for later study of the written language (literary Sinhala).

**SINHA 201-202 Intermediate Sinhala Reading @**

201, fall; 202, spring. 3 credits each term.  
Prerequisites: for Sinhala 201, Sinhala 102; for Sinhala 202, Sinhala 201 or equivalent. Staff.

**[SINHA 203-204 Intermediate Composition and Conversation @]**

203, fall; 204, spring. 3 credits each term.  
Prerequisites: for Sinhala 203, Sinhala 102 or permission of instructor; for Sinhala 204, Sinhala 203 or equivalent. Not offered 2000-2001. Staff.]

**SINHA 300 Directed Studies**

Fall or spring. 1-4 credits variable.  
Prerequisite: permission of instructor. Staff.  
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**[LING 341 India as a Linguistic Area (also LING 341)]**

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2000–2001.

J. W. Gair.

A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.]

**[LING 440 Dravidian Structures (also LING 440)]**

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2000–2001.

J. W. Gair.

A comparative and contrastive analysis of the structures of several Dravidian languages.]

**[LING 442 Indo-Aryan Structures (also LING 442)]**

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2000–2001.

J. W. Gair.

Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the student.]

**Southeast Asian Languages****[LING 230 Introduction to Southeast Asian Languages and Linguistics]**

Fall. 3–4 credits variable. For nonmajors or majors. Not offered 2000–2001. A. Cohn, J. Wolff.

This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: (1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; (2) language structures and typological patterns of the area's languages; and (3) historical linguistics, as well as the linguistic effects of language contact and linguistic evidence for prehistory.]

**[LING 653–654 Seminar in Southeast Asian Linguistics]**

653, fall; 654, spring. 4 credits each term. Prerequisite: permission of instructor. Language 653 isn't a prerequisite for Language 654. Not offered 2000–2001. J. Wolff.

Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.]

**[LING 655–656 Seminar in Austronesian Linguistics (also LING 655–656)]**

655, fall; 656, spring. 4 credits each term. Prerequisites: for 655, permission of instructor, for 656, Language 655. Not offered 2000–2001. J. Wolff.

Descriptive and comparative studies of Malayo-Polynesian languages.]

**Tagalog****TAG 121–122 Elementary Tagalog**

121, fall; 122, spring. 4 credits each term. Prerequisite: for Tagalog 122, Tagalog 121. Staff.

A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

**[TAG 123 Continuing Tagalog]**

Fall. 4 credits. Prerequisite: Tagalog 122 or equivalent. Satisfactory completion of Tagalog 123 fulfills the qualification portion of the language requirement. Not offered 2000–2001. J. Wolff and staff.

Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings; and sharpens listening skills.]

**TAG 205–206 Intermediate Tagalog @**

205, fall; 206, spring. 3 credits each term. Prerequisites: for Tagalog 205, Tagalog 123 or equivalent; for Tagalog 206, Tagalog 205 or equivalent. Satisfactory completion of Tagalog 205 fulfills the proficiency portion of the language requirement. Staff.

This course develops all four skills: reading, writing, speaking, and comprehension.

**TAG 300 Directed Studies**

Fall or spring. 1–4 credits variable.

Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**Thai****THAI 101–102 Elementary Thai**

101, fall; 102, spring. 6 credits each term. Prerequisite: for Thai 102, Thai 101 or equivalent. Intended for beginners or students placed by examination. N. Jagacinski.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

**THAI 201–202 Intermediate Thai Reading**

201, fall; 202, spring. 3 credits each term. Prerequisites: for Thai 201, Thai 102; for Thai 202, Thai 201 or equivalent. N. Jagacinski.

**THAI 203–204 Intermediate Composition and Conversation @**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Thai 203, Thai 102; for Thai 204, Thai 203. N. Jagacinski.

**THAI 301–302 Advanced Thai @**

301, fall; 302, spring. 4 credits each term. Prerequisite: Thai 202 or equivalent. N. Jagacinski.

Selected readings in Thai writings in various fields.

**THAI 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. N. Jagacinski.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**THAI 303–304 Thai Literature**

303, fall; 304, spring. 4 credits each term. Prerequisite: Thai 302 or equivalent. N. Jagacinski.

Reading of significant novels, short stories, and poetry written since 1850.

**THAI 401–402 Directed Individual Study**

401, fall; 402, spring. 4 credits each term. For advanced students or students with special problems or interests. Prerequisite: permission of instructor. N. Jagacinski.

**Urdu**

See listings under Hindi.

**Vietnamese****VIET 101–102 Elementary Vietnamese**

101, fall; 102, spring. 6 credits each term. Prerequisite: for Vietnamese 102, Vietnamese 101 or equivalent. Intended for beginners or students placed by examination. Satisfactory completion of Vietnamese 102 fulfills the qualification portion of the language requirement. T. Tranviet.

A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

**VIET 201–202 Intermediate Vietnamese**

201, fall; 202, spring. 3 credits each term. Prerequisites: for Vietnamese 201, Vietnamese 102 or equivalent; for Vietnamese 202, Vietnamese 201. T. Tranviet.

Continuing instruction in spoken and written Vietnamese.

**VIET 203–204 Intermediate Vietnamese Composition and Reading @**

203, fall; 204, spring. 3 credits each term. Prerequisite: permission of instructor only. T. Tranviet.

Designed for students and "native" speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills.

**VIET 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. T. Tranviet.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**VIET 301–302 Advanced Vietnamese @**

301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Vietnamese 301, Vietnamese 202 or permission of instructor; for Vietnamese 302, Vietnamese 301. T. Tranviet.

Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**VIET 401–402 Directed Individual Study**

401, fall; 402, spring. 2–4 credits variable each term. Prerequisite: permission of instructor. Intended for advanced students. T. Tranviet.

Various topics according to need.

**[VTLIT 222–223 Introduction to Classical Vietnamese @ #]**

222, fall; 223, spring. 3 credits. Prerequisite: qualification in Vietnamese or permission of instructor. Not offered 2000–2001. K. Taylor.

This is the first semester of a two-semester sequence of courses introducing students to Han (Classical Chinese as used in the Vietnamese language) and Nom (vernacular Vietnamese character writing). Students will learn to read Han and Nom texts, mostly from the seventeenth through nineteenth centuries, including historical records, prose writings, and poetry.]

**[VTILIT 224 Continuing Classical Vietnamese @ #**

Fall. 3 credits. Not offered 2000-2001.  
K. Taylor.

This course continues study for students who have completed VTILIT 222-223 "Introduction to Classical Vietnamese."

**ASTRONOMY**

J. F. Veverka, chair (312 Space Sciences Building, 255-3507); M. P. Haynes, director of undergraduate studies (530 Space Sciences Building 255-0610); J. F. Bell, J. A. Burns, D. B. Campbell, D. F. Chernoff, J. M. Cordes, M. M. Davis, S. S. Eikenberry, E. E. Flanagan, P. J. Gierasch, R. Giovanelli, P. F. Goldsmith, T. L. Herter, J. R. Houck, D. Lai, R. V. E. Lovelace, P. D. Nicholson, C. J. Salter, S. W. Squyres, G. J. Stacey, Y. Terzian, S. A. Teukolsky, I. M. Wasserman. Emeritus: T. Gold, T. Hagfors, M. O. Harwit, E. E. Salpeter

Cornell's astronomy faculty, research staff, graduate, and undergraduate students are active in diverse areas of modern astronomy ranging from theoretical astrophysics and general relativity to radio and radar astronomy, infrared and optical astronomy, and the exploration of the solar system. Cornell operates two local optical observatories, the world's largest radio telescope at Arecibo, Puerto Rico, and with two other institutions, the 200-inch optical telescope at Mt. Palomar in California. Several members of the department faculty are also Principal Investigators on major NASA space and planetary exploration missions.

The department offers a number of courses to satisfy a general interest in astronomy. These courses have few or no prerequisites and are not intended for the training of professional astronomers. Among the introductory courses, several choices are available, depending on background and on the requirements to be fulfilled. The 100-level courses are designed primarily for nonscience majors. The alternative introductory sequence Astronomy 211-212 is geared toward sophomore physical science and engineering majors and requires coregistration in beginning calculus. Astronomy 201 and 202 are intended for students with an interest in astronomy but no scientific background; they are topical rather than survey-oriented. Astronomy 332 is

designed for physical science and engineering majors as an introduction to astrophysics. Other courses at the 200 and 300 levels may appeal to students of various backgrounds and interests, as indicated in the individual course descriptions.

Courses numbered above 400 are intended for students who have had two to three years of college physics and at least two years of college mathematics. Astronomy 440, Independent Study, permits students to engage in individual research projects under the guidance of a faculty member.

Interested students are encouraged to become members of the undergraduate Cornell Astronomy Club. The club has access to the Fuyes Observatory on campus and conducts regular observing and astrophotography sessions. All students are invited to visit the Space Sciences Building, see the exhibits on display there, and consult faculty members about career plans or choice of courses.

## The Major

The purpose of the major in astronomy is to provide in-depth knowledge and education about the nature of the universe. Astronomy relies heavily on preparation in physics and mathematics. Consequently, many courses in these fields are included as prerequisites. In preparation for the major, a student would normally elect the introductory physics sequence Physics 112–213–214 or 116–217–218 and the complementary pathway in mathematics, Mathematics 111–122–221–222 or 191–192–293–294 (or equivalent). Students who anticipate undertaking graduate study are urged to elect the honors physics sequence Physics 116–217–218–318–327 if possible. The sophomore seminar, Astronomy 233 "Topics in Astronomy and Astrophysics," will provide an introduction to current research in astronomy and astrophysics for prospective majors, but is not required of students who elect to major in astronomy after the sophomore year. Students are also urged to acquire computer literacy. Astronomy 234 is designed to give students hands-on experience with the methods of analysis, visualization, and simulation needed in astrophysical research. Acceptance to the major will first be considered after completion of three semesters of introductory physics and mathematics and in general will require a GPA of 3.2 in physics and mathematics courses.

The major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

Physics 314 or 318, 316, 323 or 327, 341 and 443

Mathematics 420 and 422 (or equivalent, e.g. A&EP 321–2)

Astronomy 410, 431, and 432.

Upon consent of the major adviser, students interested in planetary studies may substitute appropriate advanced courses or may pursue an independent major under the program in the Science of Earth Systems. Majors are encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level. Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects under the course Astronomy

440 or to apply to a variety of programs at Cornell, Arecibo, and elsewhere that offer undergraduates summer employment as research assistants. Nearly all undergraduate majors and concentrators become involved in research projects in the upperclass years.

Students whose interest in astronomy is sparked somewhat late in their undergraduate career are encouraged to discuss possible paths with the Director of Undergraduate Studies in Astronomy.

**Honors.** A student may be granted honors in astronomy upon the recommendation of the Astronomy Advisers Committee of the astronomy faculty.

**Double majors.** A double major in astronomy and another subject is possible in many circumstances. However, the set of courses used to fulfill the requirements for each major must be completely independent.

**Concentration.** The concentration in astronomy for other majors normally requires 12 credits, at least eight of which must be at the 300 level or above. Astronomy 233 is recommended for sophomores planning to concentrate in astronomy.

## Distribution Requirement

All courses in astronomy, except Astronomy 233 and 234, may be used to fulfill the science distribution requirement in the College of Arts and Sciences.

## Courses

### ASTRO 101 The Nature of the Universe

Fall. 4 credits. No prerequisites. Labs limited to 18 students each and discussions limited to 30 students each. T. Herter, labs: J. Houck.

This course introduces students to the cosmos. The birth, evolution, and death of stars, the formation of the chemical elements, and the nature of white dwarfs, neutron stars, and black holes are discussed. An introduction to the theories of special relativity and general relativity is given. The course covers the search for other worlds outside the solar system and the possible existence of life and intelligence elsewhere in the universe. Modern theories of cosmology are presented, and the origin, structure, and fate of the universe are discussed. The full notes for the course as well as sample exams and simulations are made available on the web.

### ASTRO 102 Our Solar System

Spring. 4 credits. Labs limited to 18 students each; discussions limited to 30 students each. J. Bell; labs: J. Houck. The past few decades have seen incredible advances in the exploration of our solar system. In this course we will learn about the current state and past evolution of the Sun and its family of planets, moons, asteroids, and comets. The course will emphasize images and other data obtained from current and past NASA space missions and how these data provide insights about the important processes that have shaped the evolution of solar system objects. Critical focus will be on developing an understanding of the Earth as a planetary body and discovering how studies of other planets and satellites influence models of the climatic, geologic, and biologic history of our home world. Other topics covered will include impact hazards, the search for life in the solar system, and future missions.

### ASTRO 103 The Nature of the Universe

Fall. 3 credits.

Identical to Astronomy 101 except for omission of the laboratory (see description above).

### ASTRO 104 Our Solar System

Spring. 3 credits.

Identical to Astronomy 102 except for omission of the laboratory.

### ASTRO 105 An Introduction to the Universe

Summer. 3 credits.

How do we measure the size of our galaxy and the size of the universe? Is the universe round or flat? How are the stars born, why do they shine, and how do they die? What are the chemical elements, and how were they formed in stars? What are quasars, pulsars, and black holes? How was the solar system formed? What are the environments of other planets like? What is the basic structure of Earth and the other planets? Will we catastrophically alter the earth? Does life exist elsewhere in the universe? How can we find out? Each student has an opportunity to make observations with small telescopes.

### ASTRO 106 Essential Ideas in Relativity and Cosmology

Summer. 3 credits. Prerequisites: high school algebra and trigonometry.

Einstein's theories of special and general relativity, which brought about a fundamental change in our conceptual understanding of space and time, will be studied. Correspondence to, and conflicts with, common sense will be pointed out. Applications to various areas will be studied: in special relativity—space travel, equivalence of mass and energy, nuclear fission and fusion, and thermonuclear processes in the sun; in general relativity—motion of light and particles in curved space-time, cosmological models, and the question of whether the universe is open or closed.

### ASTRO 107 An Introduction to the Universe

Summer. 4 credits.

Identical to Astronomy 105 except for the addition of the afternoon laboratory.

### ASTRO 195 Observational Astronomy

Fall. 3 credits. Limited to 20 students.

G. Stacey.

This course provides a "hands-on" introduction to observational astronomy intended for liberal arts students at the freshman and sophomore level. High school mathematics is assumed, but there are no formal prerequisites. The course objective is to teach how we know what we know about the universe. The course is set up with two lectures and one evening laboratory per week. Not all of the evening sessions will be used. Planned exercises include five or six observational labs (star gazing with binoculars and small telescopes, telescopic observations and CCD imaging of star clusters, nebulae, and the planets, solar observations, radio observations of the Milky Way Galaxy), plus a selection of exercises from the following: construction and use of simple instruments such as optical spectrometers and sun dials; experiments in planetary cratering; collection and study of micrometeorites; computer simulations of planetary orbits and the effects of obliquity on planetary weather; and cosmological explorations using data from the Hubble Space Telescope available on the web.

**ASTRO 201 Our Home in the Universe**

Fall. 3 credits. Assumes no scientific background. Course intended for freshmen and sophomores. R. Giovanelli, M. Haynes. A general discussion of our relation to the physical universe and how our view of the universe has changed from ancient to modern times. Several main themes are covered over the course of the semester: (1) our view of the night sky from the ancient Greeks to the Hubble Space Telescope; (2) the death of stars and the formation of black holes; (3) dark matter and the structure of galaxies and (4) the origin, evolution, and fate of the universe. We present a nonmathematical introduction to these subjects and discuss uncertainties and unresolved issues in our understanding.

**ASTRO 202 Our Home in the Solar System**

Spring. 3 credits. Prerequisite: some background in science is required. Course intended for freshmen and sophomores. P. Gierasch, J. Veverka. This writing course is designed to develop an understanding of our home planet as a member of a diverse family of objects in our solar system. Discussion will center on how studies of other planets and satellites have broadened our knowledge and perspective of Earth, and vice versa. We will study, debate, and learn to write critically about important issues in science and public policy that benefit from this perspective. Topics to be discussed include global warming, the impact threat, the searches for extrasolar planets and extraterrestrial intelligence and the exploration of Mars.

**ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology**

Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191. J. Houck. The formation and evolution of normal stars, supernovae, pulsars, and black holes. The interstellar medium. Cosmology and the structure and evolution of galaxies.

**ASTRO 212 The Solar System: Planets, Satellites, and Rings**

Spring. 4 credits. Intended for first and second year engineering and physical sciences students. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191; some knowledge of classical physics (mechanics and thermodynamics). P. Nicholson. An introduction to the solar system, with emphasis on the application of simple physical principles. Topics will include the Sun, nucleosynthesis of the elements, radioactive dating, seismology and planetary interiors, planetary surfaces and atmospheres including greenhouse models, orbital mechanics and resonances, interrelations between meteorites, asteroids and comets, the Jovian planets, icy moons and ring systems, and the search for extra-solar planets.

**ASTRO 233 Topics in Astronomy and Astrophysics**

Fall. 2 credits. Prerequisites: Physics 112 or 116 and 213 or 217, Mathematics 112, 122, or 192, or permission of instructor. Intended for sophomores planning to major in astronomy or related fields. D. Lai, S. Squyres. A seminar course on selected topics in astronomy and astrophysics designed for prospective astronomy majors. Content will vary from year to year, but will include topics

from the fields of planetary, galactic, and extragalactic research.

**ASTRO 234 Modern Astrophysical Techniques**

Spring. 2 credits. Prerequisites: 2 semesters of introductory physics and 2 semesters of calculus plus ASTRO 233 or permission of instructor. Some experience with computer programming expected. Intended for sophomores majoring or concentrating in astronomy or related fields. S. Eikenberry. The course reviews the basic techniques employed in astrophysical research, both observational and theoretical, to explore the universe. Basic methods and strategies of data acquisition and image and signal processing will be discussed. Students will gain hands-on experience with visualization techniques and methods of error analysis, data fitting, and numerical simulation. Exercises will address the processes by which astrophysicists piece together observations made with today's foremost astronomical instruments to solve questions concerning the origin of planets, stars, galaxies, and the universe itself.

**ASTRO 280 Space Exploration**

Fall. 3 credits. S. Squyres. This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics will include the design and limitations of instruments. Ethical and political questions associated with space exploration will be discussed. Intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

**ASTRO 290 Relativity and Astrophysics**

Spring. 4 credits. Prerequisites: knowledge of freshman physics, calculus, and geometry. I. Wasserman. This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Included will be discussion of tests of Einstein's theory of space, time, and gravitation; physics of white dwarfs, neutron stars, and black holes; introduction to modern cosmology.

**ASTRO 299 Search for Life in the Universe**

Spring. 4 credits. Prerequisites: 2 courses in any physical science subject or permission of instructor. J. Cordes, Y. Terzian. The contents of the universe will be surveyed. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres, and surfaces will be reviewed. Questions regarding the evolution of life and the development of technology will be discussed. Methods to detect extraterrestrial life with emphasis on radio telescopes and associated instrumentation will be presented. Hypothetical communication systems will be developed and discussed.

**ASTRO 331 Climate Dynamics (also SCAS 331)**

Spring. 4 credits. Prerequisites: Math 112, 122, 192, or equivalent. Physics 213 or 217. G. Stacey.

An introduction to astronomy, with emphasis on the application of physics to the study of the universe. Physical laws of radiation. Distance, size, mass, and age of stars, galaxies, and the universe; stellar evolution and nucleosynthesis. Supernovae, pulsars, and black holes. Galaxies and quasars. Introduction to cosmology. The structure and evolution of planets and of the solar system. Mainly intended for students of science, engineering, and science education interested in astronomy and astrophysics.

**ASTRO 410 Experimental Astronomy**

Fall. 4 credits. Prerequisites: Physics 214/8 (or 310 or 360), Physics 323/7 (or coregistration) or permission of instructor. J. Cordes, J. Houck, S. Eikenberry, P. Goldsmith. Observational astrophysics. Major experiments will involve techniques in CCD (charge-coupled-device) imaging, optical photometry, optical spectroscopy, radiometry, radio spectroscopy and radio astronomy. The experiments involve use of the Hartung-Boothroyd Observatory's 24-inch telescope, a laboratory two-element radio interferometer, and a radio telescope mounted on top of the Space Sciences Building. The laboratory covers the fundamentals of using astronomical instrumentation and data analysis as applied to celestial phenomena: asteroids, normal stars, supernova remnants, globular clusters, planetary nebulae, the interstellar medium, OH masers, and galaxies.

**ASTRO 431 Introduction to Astrophysics and Space Sciences I**

Fall. 4 credits. Prerequisites: mathematics above the 200 level and physics above the 300 level; Physics 443 is recommended. I. Wasserman.

A systematic development of modern astrophysical concepts for physical science majors. Stellar structure and evolution, stellar atmospheres, compact objects (white dwarf, neutron star, and black holes), planets, and brown dwarfs. Current research problems in these areas will be introduced along the way. The emphasis will be on using fundamental physics principles to explain astronomical phenomena. A variety of physics, including elements of general relativity, nuclear physics, solid state physics and fluid mechanics, will be introduced or reviewed in a quick, practical fashion and put into use in solving astrophysics puzzles.

**ASTRO 432 Introduction to Astrophysics and Space Sciences II**

Spring. 4 credits. Prerequisite: Astronomy 431 or permission of instructor. TBA. This course is divided into two broad topics; the astrophysics of the interstellar medium and cosmology. The interstellar medium section will cover thermal equilibrium and radiative transport in HII regions, atomic gas regions, and molecular clouds. The cosmology section will include expansion of the universe, metrics, Friedmann equations, dark matter, cosmological tests, the early universe, and the cosmological production of the elements.

**[ASTRO 434 The Evolution of Planets**

Spring. 4 credits. Not offered 2000-2001. An introduction to the physical and chemical processes that have been active in altering the environments of planets and satellites from their original to their present state. Theories of the formation of the solar system are revealed with special emphasis on chemical differentiation of the primeval solar nebula. A critical

assessment is made of how well the various theories account for the clues left in the meteorite record and how well they explain the current environments of the planets and satellites. The main ideas about the formation and evolution of terrestrial planets, satellite systems, and asteroids are considered in detail. Some specific topics included are the history of the earth-moon system, the probable evolution of Jupiter's Galilean satellites, and the comparative histories of Venus, Earth, and Mars.]

**ASTRO 440 Independent Study in Astronomy**

Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Recommended: familiarity with the topics covered in Astronomy 332, 431, or 434.

Individuals work on selected topics. A program of study is devised by the student and instructor. Students need to fill out an independent study form, have it signed by the instructor, and register in the department office, 610 Space Sciences Building.

**ASTRO 490 Senior Seminar Critical Thinking**

Fall. 3 credits. Y. Terzian. Critical thinking in scientific and nonscientific contexts. Topics will include elements of classical logic and rhetoric, including standards of evidence and paradoxes. Case studies will include examples of competing hypotheses in the history of science, as well as examples from borderline sciences. Stress will be laid on creative generation of alternative hypotheses and their winnowing by critical scrutiny. Topics will include the nature and history of the universe, the nature of time, the nature of reality, the possibilities of life on other planets, and artificial intelligence. The course will include debates by the students.

**ASTRO 509 General Relativity**

Fall. 4 credits. E. Flanagan. For description, see PHYS 553.

**ASTRO 510 Applications of General Relativity**

Spring. 4 credits. E. Flanagan. For description, see PHYS 554.

**[ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also PHYS 525)]**

Spring. 4 credits. Not offered 2000–2001. D. Lai.

The formation of compact objects; neutrino and gravitational radiation from supernova collapse and neutron stars. Equilibrium configurations, equations of state, stability criteria, and mass limits: the influence of rotation and magnetic fields. Pulsar phenomena. Mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes. Compact X-ray sources and gamma-ray bursts. Super massive black holes and active galactic nuclei. Emphasis will be on the application of fundamental physical principles to compact objects. No astronomy or general relativity prerequisites. Text: *Physics of Black Holes, White Dwarfs, and Neutron Stars*, by Shapiro and Teukolsky. Coregistration in ASTRO 699 recommended.]

**[ASTRO 516 Galactic Structure and Stellar Dynamics**

Fall. 4 credits. Not offered 2000–2001. This course is an introduction to the study of the structure of galaxies via the laws of modern physics. Topics include the observed

kinematics and spatial distribution of stars in the vicinity of the Sun, shapes and properties of stellar orbits, the gravitational N-body problem, collisional relaxation in stellar systems, spiral structure, galaxy classification and evolution, and cosmological results in galaxy formation.]

**[ASTRO 520 Radio Astronomy**

Fall. 4 credits. Not offered 2000–2001. Radio astronomy telescopes and electronics; antenna theory; observing procedures and data analysis; concepts of interferometry and aperture synthesis.]

**ASTRO 523 Signal Modeling, Statistical Inference, and Data Mining in Astronomy**

Spring. 4 credits. J. Cordes. The course aims to provide tools for modeling and detection of various kinds of signals encountered in the physical sciences and engineering. Data mining and statistical inference from large and diverse databases will also be covered. Experimental design is to be discussed. Basic topics covered include: probability theory; Fourier analysis of continuous and discrete signals; digital filtering; matched filtering and pattern recognition; spectral analysis; Karhunen-Loeve analysis; wavelets; parameter estimation; optimization techniques; Bayesian statistical inference; deterministic, chaotic, and stochastic processes; image formation and analysis; maximum entropy techniques. Specific applications will be chosen from current areas of interest in astronomy, where large-scale surveys throughout the electromagnetic spectrum and using non-electromagnetic signals (e.g., neutrinos and gravitational waves) are ongoing and anticipated. Applications will also be chosen from topics in geophysics, plasma physics, electronics, artificial intelligence, expert systems, and genetic programming. The course will be self-contained and is intended for students with thorough backgrounds in the physical sciences or engineering.

**[ASTRO 525 Techniques of Optical/Infrared and Submillimeter Astronomy**

Spring. 4 credits. Not offered 2000–2001. T. Herter, G. Stacey. Optical/infrared and submillimeter telescopes and instrumentation will be discussed and related to current research in these fields. The course includes telescope design and general optical design (ray tracing). CCD, photoconductor, photovoltaic, bolometer, impurity band conduction, and heterodyne detection systems are presented. The instrumentation discussion includes general instrument design and specific applications to cameras, spectrographs, and interferometers. Detection limits of various systems, cryogenic techniques, and astronomical data analysis techniques are also discussed. Special topics include speckle interferometry and adaptive optics.]

**[ASTRO 530 Astrophysical Processes**

Spring. 4 credits. Not offered 2000–2001. R. Giovanelli, M. Haynes. Thermal and nonthermal radiation processes encountered in studies of stars, the interstellar and intergalactic media, galaxies, and quasars. Fundamentals of radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering will be covered, as well as spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy.

copy. These topics will be discussed within the framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies and cosmology.]

**[ASTRO 555 Theory of the Interstellar Medium**

Spring. 4 credits. Not offered 2000–2001. Global theories of the interstellar medium-mass and energy exchange between the different phases. The role of shock waves and energetic outflows in the thermal equilibrium and ionization state of gas in the galaxy. Basic astrophysical fluids and plasmas. Galactic dynamics. Observation techniques, current problems and results.]

**ASTRO 560 Theory of Stellar Structure and Evolution (also PHYS 667)**

Spring. 4 credits. D. Lai. Observational overview; hydrostatic equilibrium; equations of state; radiative and convective energy transport; nuclear burning; solar neutrinos; rotation and magnetic fields; stellar seismology; brown dwarfs; pre-main sequence contraction.

**[ASTRO 570 Physics of the Planets**

Fall. 4 credits. Not offered 2000–2001. P. Nicholson.

An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions, resonances, and ring dynamics. An introduction to the theory of planetary interiors, gravitational fields, heat sources, and rotational mechanics. Physics of planetary atmospheres, including radiative transfer, convection, and thermal structure. Important observational results, including those of ground-based optical, infrared, radio, and radar astronomy, as well as those made by spacecraft, will also be discussed. Intended for graduate students and seniors in astronomy, physics, and engineering.]

**[ASTRO 571 Mechanics of the Solar System (also T&AM 673)]**

Spring. 3 credits. Not offered 2000–2001. J. Burns.

Gravitational potential, planetary gravity fields. Free and forced rotations. Chandler wobble, polar wander, damping of nutation. Equilibrium tidal theory, tidal heating. Orbital evolution of natural satellites, resonances, spin-orbit coupling. Cassini states. Long-term variations in planetary orbits. Orbital and Rotational Chaos. Dust dynamics. Dynamics of ring systems. Seismic waves, free oscillations. Illustrative examples are drawn from contemporary research.]

**ASTRO 579 Celestial Mechanics**

Fall. 3 credits. J. Burns. For description, See T&AM 672.

**ASTRO 590 Galaxies and the Universe**

Spring. 4 credits. M. Haynes, T. Herter. The universe, its constituents, its large-scale structure, and its history in the light of the major thrusts of extragalactic research. The morphology, photometry, dynamics, and kinematics of galaxies and their subsystems. Determination of masses, mass-to-light ratios, and the "missing mass." Activity in Seyferts, radio galaxies, and quasars. Binaries, groups, clusters, and superclusters. The extragalactic distance scale. Galaxy formation and evolution. Confrontation of cosmological theories with observational results.

**[ASTRO 599 Cosmology (also PHYS 599)]**  
Fall. 4 credits. Prerequisites: statistical physics, quantum mechanics and electromagnetic theory. Not offered 2000-2001. I. Wasserman.

This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics will include observational overview; growth of irregularities, galaxy formation, and clustering; big bang cosmology, recombination, nucleosynthesis; very early universe, symmetry breaking, inflationary scenarios. At the level of Peebles, *Principles of Physical Cosmology*.]

**ASTRO 620 Seminar: Advanced Radio Astronomy**

Fall. 2 credits. Prerequisites: some background in astronomical spectroscopy suggested. Open to advanced undergraduates by permission of instructor. W 2:30-4:30. R. Giovanelli, P. Goldsmith, M. Haynes.

Selected topics in the application of spectroscopic techniques from the infrared through radio regime to studies of the "dark ages" and the origin of galaxies, stars, and planets. We will emphasize the processes of star formation from the earliest times to the current circumstances of stellar and planetary formation in the Milky Way and other galaxies. Discussions will include the potential of new facilities including the Arecibo and Green Bank telescopes, the Expanded VLA, the Atacama Large Millimeter Array, the Large Millimeter Telescope, the Square Kilometer Array, SIRTF, and the Cornell Atacama Telescope.

**[ASTRO 621 Seminar: Planetary Radar Astronomy]**

Spring. 3 credits. Prerequisites: intended for graduate students and upper-level undergraduates in astronomy, engineering, and geology. A good background in undergraduate mathematics and physics is required. Not offered 2000-2001.

The application of radar to the study of the surfaces of planets, planetary satellites, asteroids, and comets. Topics covered will be target detectability and the specification of the needed antennas, transmitters, and receiving systems; data processing techniques; imaging techniques including delay-Doppler imaging, synthetic aperture radar (SAR) and interferometric SAR; target characterization from cross section, scattering laws and polarization measurements; results from earth-based and spacecraft radar observations of Mercury, Earth, the Moon, Mars, the satellites of Jupiter, the rings of Saturn, asteroids, and comets.]

**ASTRO 640 Advanced Study and Research**

Fall or spring. Credit TBA.  
Guided reading and seminars on topics not currently covered in regular courses. Students need to register in the department office, 610 Space Sciences Building.

**ASTRO 651 Atmospheric Physics (SCAS [EAS] 651)**

Fall. 3 credits. K. Cook, S. Colucci, P. Gierasch.  
For description, see SCAS [EAS] 651.

**ASTRO 652 Advanced Atmospheric Dynamics (also SCAS [EAS] 652)**

Spring. 3 credits. Offered alternate years.  
S. Colucci, K. Cook, P. Gierasch.  
For description, see SCAS [EAS] 652.

**[ASTRO 660 Cosmic Electrodynamics (also A&EP 608)]**

Spring. 2 credits. Not offered 2000-2001.]

**ASTRO 671 Seminar Asteroids**

Fall. 3 credits. J. Veverka, J. Bell.  
We will review what is known currently about asteroids and focus on the discoveries being made by the NEAR mission to S-asteroid 433 Eros. The class will emphasize what the NEAR results tell us about the history and evolution of S-asteroids in general.

**Jupiter**

Spring. 3 credits. P. Nicholson.  
An informal series of lectures discussing the techniques used to obtain and interpret spacecraft and earth-based remote sensing data of the planets, satellites, and smaller bodies in the solar system. Intended for graduate students and seniors. The emphasis this year will be on the Jovian System, reviewing the results on Jupiter—its satellites and rings obtained by the Galileo Orbiter since 1995 and by Cassini during its upcoming flyby in December 2000.

**[ASTRO 673 Seminar: Planetary Atmospheres]**

Spring. 2 credits. Not offered 2000-2001.  
This course will deal with motions in planetary atmospheres. Among the topics to be discussed are the Venus general circulation, dust and water transports on Mars, alternating jets on the outer planets, and compositional layering in the outer planets.]

**[ASTRO 690 Seminar: Computational Astrophysics (also PHYS 680)]**

Spring. 3 credits. Prerequisites: working knowledge of FORTRAN. Not offered 2000-2001. S. Teukolsky.  
A course designed to familiarize graduate students with numerical techniques for solving diverse problems in astrophysics. Numerical methods discussed in the course will include solving ordinary and partial differential equations, linear algebra and eigenvalue problems, Monte Carlo techniques, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the course will be "how-to," rather than theoretical. No theorems will be proved. Students will be allotted computer time to solve, both individually and in small teams, assigned numerical exercises. Text: *Numerical Recipes* by Press, Teukolsky, Vetterling, and Flannery.]

**[ASTRO 699 Seminar: Problems in Theoretical Astrophysics (also PHYS 665)]**

Fall. 2 credits. Not offered 2000-2001.  
An informal seminar that will examine "New Directions in Astrophysics." The participants will discuss neutrino astronomy, LIGO (the gravitational wave observatory), high energy gamma rays and cosmic rays, laboratory searches for dark matter, and the future of optical, radio, and infrared astronomy, both on the ground and in space. The seminar is open to all graduate students.]

**[ASTRO 699 Seminar: Observational High Energy Physics]**

Spring. 2 credits. ASTRO 511 (PHYS 525) is strongly recommended as a co- or prerequisite. Not offered 2000-2001. S. Eikenberry.  
This is a seminar for graduate students, and is intended as a companion course to ASTRO 511 (PHYS 525). The seminar will take an approach to understanding compact objects

(primarily black holes and neutron stars) based on their observed properties, in order to complement the primarily theoretical approach of ASTRO 511. The focus will be on areas of recent progress in the field of high energy astrophysics. Topics to be covered include (but are not limited to): rotation-powered pulsars (including millisecond pulsars and magnetars), black-hole X-ray binaries, microquasars and other relativistic jet sources, X-ray bursters, kilohertz QPO sources, and gamma-ray bursts.]

## BIOLOGICAL SCIENCES

Biology is a popular subject at many universities for a variety of reasons: it is a science that is in an exciting phase of development; it prepares students for careers in challenging and appealing fields such as human and veterinary medicine, environmental sciences, and biotechnology; and it deals with the inherently interesting questions that arise when we try to understand ourselves and the living world around us. Many of the decisions we face today deal with the opportunities and problems that biology has put before us.

The major in biological sciences at Cornell is available to students enrolled in either the College of Agriculture and Life Sciences or the College of Arts and Sciences. Student services provided by the Office of Undergraduate Biology are available to students from either college.

The biology major is designed to enable students to acquire the foundations in physical and life sciences necessary to understand modern biology and to pursue advanced studies in a specific area of biology. Programs of study include animal physiology; biochemistry; ecology and evolutionary biology; general biology; genetics and development; microbiology; molecular and cell biology; neurobiology and behavior; nutrition; plant biology; and systematics and biotic diversity. Students interested in the marine sciences may consult the Cornell Marine Programs Office (G14 Stimson Hall, 255-3717) for academic advice and career counseling. For more details about the biology curriculum, see the section in this catalog on Biological Sciences.

## CHEMISTRY AND CHEMICAL BIOLOGY

P. L. Houston, chair (122 Baker Laboratory, 255-4174); R. C. Fay, director of undergraduate studies; H. D. Abruna, A. C. Albrecht, B. A. Baird, T. P. Begley, J. M. Burlitch, B. K. Carpenter, R. A. Cerione, J. C. Clardy, G. W. Coates, D. B. Collum, H. F. Davis, F. J. DiSalvo, S. E. Ealick, G. S. Ezra, R. C. Fay, J. H. Freed, B. Ganem, M. A. Hines, R. Hoffmann, P. L. Houston, S. Lee, R. F. Loring, S. T. Marcus (associate director of undergraduate studies), T. McCarrick, J. E. McMurry, J. Meinwald, S. O. Russo, D. Y. Sogah, D. A. Usher, B. Widom, C. F. Wilcox, P. T. Wolczanski, D. B. Zax

The chemistry department offers a full range of courses in physical, organic, inorganic, analytical, theoretical, bioorganic, and biophysical chemistry. In addition to their teaching interests, chemistry faculty members have active research programs. The link between teaching and research is a vital one in a continuously evolving scientific subject; it ensures that students will be provided with the most advanced information and perspectives, and affords opportunities for students to participate in research.

### The Standard Major

The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, chemical physics, geochemistry, chemical engineering, materials science, solid state physics, and secondary education. Nearly all of the required courses for the major can be completed in three years, leaving the senior year open for advanced and independent work under the supervision of a professor.

The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably Chemistry 215-216 although Chemistry 207-208 or 206-208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. Chemistry 215-216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry (Chemistry 359-360 is preferred to Chemistry 357-358). The second-year laboratory courses include 300, Quantitative Chemistry and 301, Experimental Chemistry I. Chemistry 389-390, Physical Chemistry I and II, and Chemistry 302-303, Experimental Chemistry II and III, should be completed in the third year. Chemistry 410 should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well. The opportunity for independent research is also available. All students with questions about the major are encouraged to consult the chair of the Department of Chemistry and Chemical

Biology or the chair's representative. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for Chemistry 207.

Prerequisites for admission to a major in chemistry are (1) Chemistry 215-216, 300; or 207-208, 300; or 211, 208, 300; or 206, 208, 300; (2) Physics 207 or 112; and (3) Mathematics 111 or 191. Students are not encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below.

- 1) Chemistry 301-302-303, 359-360 (357-358 may be substituted), 389-390, and 410
- 2) Mathematics 112, 213; or 122, 221-222; or 192-293-294
- 3) Physics 208

Potential majors electing to take Mathematics 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with Chemistry 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement their programs, where possible, with further courses such as Chemistry 405, 605, 606, 665, 666, 668, and 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the biological sciences, and advanced work in chemistry as possible extensions of the basic program.

**Honors.** The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and physical chemistry sequences by the end of the junior year, although failure to have completed those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on a superior cumulative average, including chemistry grades, and good performance in at least four credits of research at Cornell.

Prospective candidates should discuss their plans with advisers by March 1 of their junior year; participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least eight credits of undergraduate research such as is offered in Chemistry 421, 433, 461, or 477. In addition, the writing of a thesis in the honors seminar (Chemistry 498) is expected.

### The Alternative Major

The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements

consist of a core program along with four additional courses chosen by the student. One of the four must be in chemistry at the 300 level or above; the other three may be in another field but should represent a cohesive plan and must be approved by a departmental committee.

### The Core Program for the Alternative Major

- 1) Chemistry 215-216, 300 (or 207-208, 300; or 211, 208, 300; or 206, 208, 300); 251, 257, 287, 289, and 410 (Chem 357-358 or 359-360 can be substituted for Chem 257, or Chem 389-390 can be substituted for Chem 287, thereby fulfilling the requirement for an additional 300-level chemistry course)
- 2) Mathematics 111-112; or 111, 122; or 191-192
- 3) Physics 207-208; or 112, 213

### Additional Courses for the Alternative Major

Possible plans for the remaining three courses might include programs in Biochemistry; Biology; Physics; Computer Science; Polymers; Materials Science; Science, Technology, and Society; History and Philosophy of Science and Technology; Business and Management; Economics; Education; and others.

Premedical students and those interested in pursuing double majors might find the alternative major particularly attractive. The course requirements for admission to the alternative major are the same as those for the standard major.

### Program for Science Teachers

Chemistry majors who wish to become teachers will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students integrate some course work in Education with the rest of their undergraduate studies. All chemistry majors who enter this program will remain in the College of Arts and Sciences to complete the major.

After earning the bachelor's degree, certification students enter the Graduate Field of Education to complete a fifth year of study at Cornell. Following this fifth year, students are eligible for a master's degree from Cornell and a teaching certificate from New York State. Additional information is available from Susie Slack, 424 Kennedy Hall, 255-9255 or Prof. Deborah Trumbull, 426 Kennedy Hall, 255-3108.

### Laboratory Course Regulations

Students registered for laboratory courses who do not appear at the first meeting of the laboratory will forfeit their registration in that course.

Students and members of the teaching staff are required to wear safety goggles and lab aprons in all chemistry laboratories. Close-toed footwear is required (no sandals). Students are reminded to take their goggles and lab aprons to the first laboratory session. Those who fail to cooperate with the safety program will be asked to leave the laboratories.

Students are required to pay for glassware and any other items broken or missing from their

laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a \$10 fee in addition to charges for any breakage.

## Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

### CHEM 105 The Language of Chemistry

Fall. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" (Group I) distribution requirement, as well as satisfying the CALS physical science requirement of one course in chemistry. S-U or letter grades. Lects, M W F 12:20. Prelims: in normal class period at 12:20 P.M. TBA.

In his autobiography, A. Kornberg (Nobel Laureate in Medicine, 1959) wrote, "much of life can be understood in rational terms if expressed in the language of chemistry. It is an international language, a language for all time, a language that explains where we came from, what we are, and where the physical world will allow us to go." Through careful examination of a few milestone investigations of naturally occurring biologically important compounds (such as the antimalarial quinine, bombykol, and the sperm attractants of algae), the principles of chemistry to which Kornberg refers will be developed. Methods of analyzing chemical problems will be emphasized, rather than the memorization of specific results or formulas. There will be an opportunity for students, working in small groups, to prepare and present short reports on topics of particular current interest at the interface between chemistry and biology.

### CHEM 106 Strategies in Science: The World of Chemistry

Spring. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" distribution requirement (Group I) as well as satisfying the CALS physical science requirement of one course in chemistry. S-U or letter grades. Lects, M W F 1:25. Prelims: 7:30-9 P.M., Feb. 27, March 29. TBA.

A general appreciation of chemistry in the everyday world which will highlight for nonscientists the way the scientific method works. The course will focus not only on what modern chemistry has accomplished, but more generally on the way scientists think and how they function.

### CHEM 206 Introduction to General Chemistry

Fall or summer. 4 credits. Enrollment limited. Recommended for students who have not had high school chemistry and for those needing a less intensive course than Chemistry 207. Lects, M W F 11:15; lab, T R or F 8:00-11:00, or M W or F 1:25-4:25. Prelims: 7:30-9 P.M., Oct. 3, Nov. 9. C. F. Wilcox.

An introduction to general chemistry, with emphasis on important principles and facts. Chemistry 206 covers much of the same material as Chemistry 207 plus the basics of chemical equilibrium, but does so at a slower pace.

### CHEM 207-208 General Chemistry

Fall or summer, 207; spring or summer, 208. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for Chemistry 207: high school chemistry. Prerequisite for Chemistry 208: Chemistry 206 or 207. Lects, T R 10:10 or 12:20; lab, T R F 8-12 or M T W R F 12:20-4:25. Prelims: 7:30-9 P.M., Oct. 3, Nov. 9, Feb. 27, April 10. Fall: J. E. McMurtry; spring: R. C. Fay.

Fundamental chemical principles and descriptive facts are covered, with considerable attention given to the quantitative aspects and to the techniques important for further work in chemistry. Second-term laboratory includes a systematic study of qualitative analysis.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall. Taking Chemistry 208 after 215 is not recommended and can be done only with the permission of the 208 instructor.

### CHEM 211 Chemistry for the Applied Sciences

Fall or spring. 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisite: high school chemistry or permission of instructor. Corequisite: a calculus course at the level of Mathematics 111 or 191. Lects, M W F 12:20; lab, fall and spring, M T W R F 1:25-4:25. Prelims: 7:30-9 P.M., Sept. 21, Oct. 19, Nov. 21, Feb. 15, Mar. 13, Apr. 12. Fall: D. B. Zax; spring: J. Marohn.

Important chemical principles and facts are covered with the objective of understanding the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall.

### CHEM 215-216 General and Inorganic Chemistry

Fall, 215; spring, 216. 4 credits each term. Recommended for students who intend to specialize in chemistry or in related fields. Enrollment limited. Prerequisites: good performance in high school chemistry, physics, and mathematics. Corequisite: a calculus course at the level of Mathematics 111 or 191 for students who have not taken high school calculus. Prerequisite for Chemistry 216: Chemistry 215. Lects, M W F 12:20; lab, M T W R or F 1:25-4:25. Prelims: 7:30-9 P.M., Oct. 3, Nov. 9, Feb. 15, Mar. 13, Apr. 12. Fall: B. Widom; spring: S. Lee.

An intensive systematic study of the laws and concepts of chemistry, with considerable emphasis on quantitative aspects. Second term includes systematics of inorganic chemistry. Laboratory work covers qualitative and

quantitative analysis, transition metal chemistry, and spectroscopic techniques.

Note: Taking Chem 208 after 215 is not recommended and can be done only with the permission of 208 instructor.

### CHEM 233 Introduction to Biomolecular Structure

Fall. 2 credits. Limited to 30 students. Prerequisites: CHEM 207-208 or equivalents. Lects, T R 2:30-3:20. S. E. Ealick.

This course is intended for students with a basic understanding of chemistry who are considering a program of study in biochemistry. The interrelationship of the structure and function of biologically important molecules are explored. Emphasis is placed on understanding the way in which the three-dimensional arrangements of atoms determine the biological properties of both small molecules and macromolecules such as proteins and enzymes. The study of molecular structure is aided by interactive computer graphics for visualizing three-dimensional structures of molecules.

### CHEM 251 Introduction to Experimental Organic Chemistry

Fall, spring, or summer. 2 credits. Recommended for non-chemistry majors. Enrollment limited. Prerequisites: coregistration in Chemistry 257 or 357. Lects: fall, R 11:15 or F 8:00; spring, F 8; lab, M T W R or F 1:25-4:25, or T or R 8-11. Prelims: 7:30-9 P.M., Fall: Nov. 9. Spring: Apr. 17. S. Russo.

Introduction to the synthesis, separation, and handling of materials, including applications of many types of chromatography, simple and fractional distillation, crystallization, extraction, and others.

### CHEM 252 Elementary Experimental Organic Chemistry

Spring. 2 credits. Recommended for non-chemistry majors. Prerequisite: Chemistry 251. Lec, R 11:15; lab, M 1:25, W 1:25-4:25, or R 8-11. Prelims: 7:30-9 P.M. Apr. 17. S. Russo.

A continuation of Chemistry 251.

### CHEM 257 Introduction to Organic and Biological Chemistry

Spring. 3 credits. Prerequisite: Chemistry 206 or 207. Because Chemistry 257 is only a 3-credit course, it does not provide a practical route to satisfying medical school requirements. Lects, M W F 11:15. Prelims: in normal class period at 11:15. D. A. Usher.

An introduction to organic chemistry with an emphasis on those structures and reactions of organic compounds having particular relevance to biological chemistry.

### CHEM 287-288 Introductory Physical Chemistry

Fall, 287; spring, 288. 3 credits each term. Prerequisites: Chemistry 208 or 216 and Mathematics 111-112 and Physics 208, or permission of instructor. Prerequisite for Chemistry 288: Chemistry 287 or 389. Lects, M W F 9:05; 287: rec, M or W 1:25, T 9:05; 288: rec, M or W 1:25. Prelims: 7:30-9 P.M., 287: Oct. 5, Nov. 21. 288: Mar. 8, Apr. 17. Fall: A. C. Albrecht; spring: J. H. Freed.

A systematic treatment of the fundamental principles of physical chemistry, focusing in the fall on thermodynamics and the quantum mechanics of the periodic table and chemical bonding. In the spring the course will be oriented to the application of physical chemistry to biological systems, including

transport, kinetics, electrochemistry, spectroscopy. Chemistry 287 satisfies the minimum requirement for physical chemistry in the alternative chemistry major.

#### **CHEM 289-290 Introductory Physical Chemistry Laboratory**

Fall, 289; spring, 290. 2 credits each term. Lecs: fall, R 8:00 A.M.; spring, R 8:00 or 9:05. Lab: fall, M T 1:25-4:25; spring, M T W R 1:25-4:25. T. McCarrick.

A survey of the methods basic to the experimental study of physical chemistry, with a focus on the areas of kinetics, equilibrium, calorimetry, and molecular spectroscopy.

#### **CHEM 300 Quantitative Chemistry**

Fall. 2 credits. Prerequisite: Chemistry 208, or Chemistry 216 or advanced placement in chemistry. Lec, R 10:10; lab, M T W R F 12:20-4:25 or T 8-12. Prelim: 7:30-9 P.M., Oct. 19, Nov. 21. J. M. Burlitch.

Volumetric, spectrophotometric, and potentiometric methods are emphasized. Techniques are learned by analysis of knowns, and then are used on unknowns. Lectures and problem sets stress the relationship between theory and applications.

#### **CHEM 301 Experimental Chemistry I**

Spring. 4 credits. Prerequisites: Chemistry 300, and 357 or 359. Lec, M W F 12:20; 2 labs, M W 1:25-4:25 or T R 8-11 or T R 1:25-4:25. J. M. Burlitch.

An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic reactions will be explored in the laboratory. Laboratory techniques and the theoretical basis for the separation and characterization techniques used will be discussed in the lectures.

#### **CHEM 302 Experimental Chemistry II**

Fall. 4 credits. Enrollment limited; preference given to chemistry majors. Prerequisite: Chemistry 301. Lecs, M W F 9:05; 2 labs, M W 1:25-4:25, T R 8-11 or T R 1:25-4:25. F. J. DiSalvo.

Instrumental methods of analysis, including chemical microscopy, UV, IR, and AA spectroscopies, and gas chromatography. The design, execution, and analysis of experiments is stressed.

#### **CHEM 303 Experimental Chemistry III**

Spring. 4 credits. Each lab limited to 11 students. Prerequisites: Chemistry 302, 389, 390; coregistration in the latter is permissible. Lecs, M W F 9:05; 2 labs, M W 1:25-4:25, or T R 9:00-12 or T R 1:25-4:25. H. D. Abruña.

An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy, and kinetics. The analysis and numerical simulation of experimental data is stressed.

#### **CHEM 357-358 Organic Chemistry for the Life Sciences**

Fall or summer, 357; spring or summer, 358. 3 credits each term. Prerequisite for Chemistry 357: Chemistry 208 or 216 or advanced placement; recommended: concurrent registration in Chemistry 251 or 300. Prerequisite for Chemistry 358: Chemistry 357 or permission of the instructor. Lecs, M W F 9:05 or 10:10; optional rec may be offered. Prelims: 7:30-9 P.M., Sept. 28, Oct. 17, Nov. 14, Feb. 15, Mar. 13, Apr. 12. Fall: B. Ganem; spring: J. Meinwald.

A study of the more important classes of carbon compounds—especially those encountered in the biological sciences. Emphasis will be placed on their three-dimensional structures, mechanisms of their characteristic reactions, their synthesis in nature and the laboratory, methods of identifying them, and their role in modern science and technology.

*Note:* Because of duplication of material, students who take both Chemistry 257 and 357 will receive graduation credit only for Chemistry 257.

#### **CHEM 359-360 Organic Chemistry I and II**

Fall, 359; spring, 360. 4 credits each term. Recommended for students who intend to specialize in chemistry or closely related fields. Enrollment limited. Prerequisites: Chemistry 216 with a grade of B or better, Chemistry 208 with a grade of A or better, or permission of instructor. Prerequisite for Chemistry 360: Chemistry 359. Recommended: coregistration in Chemistry 300-301-302. Lecs, M W F 9:05; dis sec, W 7:30 P.M.; prelims, 7:30-9:00 P.M., Sept. 20, Oct. 18, Nov. 15, Spring: 7:30-9:00 P.M., Feb. 14, Mar. 14, Apr. 18. Fall: D. B. Collum; spring, G. W. Coates.

A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the ways they are synthesized in nature and in the laboratory.

#### **CHEM 389-390 Physical Chemistry I and II**

Fall, 389; spring, 390. 4 credits each term. Prerequisites: Mathematics 213 or, ideally, 221-222; Physics 208; Chemistry 208 or 216 or permission of instructor. Prerequisite for Chemistry 390: Chemistry 389. Lecs, 389: M W F 10:10; rec M or W 1:25 or T 9:05. Lecs, 390: M W F 10:10; prelims: 7:30-9 P.M. 389: Sept. 26, Oct. 24, Nov. 21. 390: Feb. 15, Mar. 13, Apr. 12. Fall: M. A. Hines; spring: 390: H. F. Davis.

The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

#### **CHEM 391 Physical Chemistry II (also CHEM E 391)**

Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: Mathematics 293; Physics 112, 213; Chemistry 208 or 216 or permission of instructor. Corequisite: Math 294. Prerequisite for Chemistry 391: Chemistry 389. Lecs, M W F 9:05; rec M 1:25 or T 9:05; T. M. Duncan.

The study of two topics: (1) Quantum chemistry—the electronic structure of atoms, molecules, and condensed matter; the interaction of electromagnetic radiation with matter for spectroscopy and chemical reaction. (2) Chemistry kinetics—reaction rate laws from experimental data and reaction mechanisms; approximation methods and applications to polymerization and heterogeneous catalysis.

#### **CHEM 404 Entrepreneurship in Chemical Enterprise**

Spring. 1 credit. Lecs, T 2:55-4:10. B. Ganem.

Designed to acquaint students with the problems of planning, starting, and managing a new scientifically oriented business venture, the course will consist of six weekly 90-

minute meetings focusing on case studies and assigned reading, as well as outside lectures by entrepreneurs in the chemical, pharmaceutical, and biotechnology industries. Topics will include new technology evaluation and assessment, business formation, resource allocation, management development, as well as manufacturing and sales issues.

#### **[CHEM 405 Techniques of Modern Synthetic Chemistry]**

Spring. 3 or 6 credits. Enrollment limited.

Prerequisites: Chemistry 302 and permission of instructor. To receive 3 credits, students must perform a minimum of three 2-week experiments. 6 credits will be given for 3 additional experiments.

Completion of 5 exercises in elementary glass-blowing will count as 1 experiment. Lab time required: 16 hours each week, including at least two 4-hour sessions in 1 section (M W 1:25). First meeting will be at 1:30 on first class day of semester. Lec, first week only, at times TBA. Not offered 2000-2001. J. M. Burlitch.

The syntheses of complex organic, organometallic, and inorganic molecules are carried out with emphasis on the following techniques: vacuum line, high pressure, high-temperature solid state, inert atmosphere, nonaqueous solvents, radioactive labeling, sol-gel, photochemical and electrochemical methods, solid phase peptide synthesis, and polymer synthesis. Elementary glassblowing.]

#### **CHEM 410 Inorganic Chemistry**

Fall. 4 credits. Prerequisites: Chemistry 358 or 360, and 287 or 390. Lecs, M W F 11:15. Prelims: 7:30-9:00 P.M., Sept. 21, Oct. 19, Nov. 16. P. T. Wolczanski.

A systematic study of the synthesis, structure, bonding, reactivity, and uses of inorganic compounds, organometallic complexes, and solid state species.

#### **CHEM 421 Introduction to Inorganic Chemistry Research**

Fall or spring. 2-4 credits. Prerequisites: Chemistry 303 and 389-390, or Chemistry 287-288, and Chemistry 289-290 with an average of B- or better, or permission of instructor. Selected faculty.

Research in inorganic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

#### **CHEM 433 Introduction to Analytical Chemistry Research**

Fall or spring. 2-4 credits. Prerequisites: Chemistry 303 and 390 with an average of B- or better or permission of instructor. Selected faculty.

Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

#### **CHEM 450 Principles of Chemical Biology**

Fall. 3 credits. Prerequisites: Chemistry 357-358, Chemistry 359-360 or equivalent. Lecs, T R 10:10-11:25. J. C. Clardy.

Biological processes are increasingly understood in chemical terms, and this course introduces some of the most important chemical approaches to biological processes. Topics such as structure-based drug design, small molecule mediators or protein-protein interaction, combinatorial synthesis, chemical genetics, conformational analysis of biological molecules, and the molecules transfer of biological information will be covered.

**CHEM 461 Introduction to Organic Chemistry Research**

Fall or spring. 2-4 credits. Prerequisites: Chemistry 302 and 358 or 360 with a grade of B- or better or permission of instructor. Selected faculty.

Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

**CHEM 477 Introduction to Physical Chemistry Research**

Fall or spring. 2-4 credits. Prerequisite: Chemistry 390 with an average of B- or better or permission of instructor. Selected faculty.

Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

**CHEM 498 Honors Seminar**

Spring. No credit. Admission to standard Chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as Chemistry 421, 433, 461, or 477; or (2) one 4-credit unit in a course such as Chemistry 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject. W 2:30-4. D. Y. Sogah.

Informal presentations and discussions of selected topics in which all students participate. Professional issues will be discussed, including graduate education, publication, techniques of oral and audiovisual presentation, employment, ethics, chemistry in society, and support of scientific research. Individual research on advanced problems in chemistry or a related subject under the guidance of a faculty member, culminating in a written report.

**CHEM 600-601 General Chemistry Colloquium**

Fall, 600; spring, 601. No credit. Required of all graduate students except those majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. R 4:40. Staff.

A series of talks representative of all fields of current research interest in chemistry other than organic chemistry, given by distinguishing visitors and faculty members.

**CHEM 602 Information Literacy for the Physical Scientist**

Spring. 1 credit. Primarily for first-year graduate students and undergraduate chemistry majors doing research. Lec, T 4:45-6:00. L. Solla.

An introduction to physical science information research methods, including use of paper and electronic resources. With the continued information explosion, much time can be wasted and important information missed unless an efficient information research strategy is developed. This course demonstrates the use of library and other information resources as a method to critically evaluate the success of research projects. Text: *Journal Literature of the Physical Sciences* by Alice Lefler Primack and *How to Find Chemical Information* by Robert E. Maizell.

**CHEM 605 Advanced Inorganic Chemistry I: Symmetry, Structure, and Reactivity**

Fall. 4 credits. Prerequisite: Chemistry 389-390 or equivalent or permission of instructor. Lects, M W F 11:15. R. C. Fay.

Selected topics in structure, bonding, and reactivity of inorganic compounds with emphasis on main group elements; at the level of *Chemistry of the Elements*, by Greenwood and Earnshaw. Group theory applications: hybrid orbitals, molecular orbitals, molecular vibrations, and ligand field theory; at the level of Cotton's *Chemical Applications of Group Theory*.

**CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Coordination Compounds, and Bioinorganic Chemistry**

Spring. 4 credits. Lects, M W F 10:10. P. T. Wolczanski.

Synthesis, structure, and reactivity of modern coordination compounds; oxidation and bioinorganic chemistry. Emphasis on bonding models, structure, and reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Kotz's *Inorganic Chemistry*, and Jordan's *Reaction Mechanisms of Inorganic and Organometallic Systems*.

**CHEM 607 Advanced Inorganic Chemistry III: Solid-State Chemistry**

Spring. 4 credits. Prerequisite: Chemistry 605 or permission of instructor. Lects, M W F 11:15. F. J. DiSalvo.

The third in a three-term sequence. Interdisciplinary approach to solids. Topics include solid-state structure and X-ray diffraction, synthesis methods, defects in solids, phase diagrams, electronic structure, and chemical and physical properties of solids. Text: *Solid State Chemistry and Its Applications*, by West. Readings from inorganic chemistry and solid-state physics texts.

**[CHEM 608 Organometallic Chemistry]**

Spring. 4 credits. M W F 10:10. Not offered 2000-2001. P. T. Wolczanski.

Synthesis, structure, and reactivity of organotransition metal complexes. Current literature is emphasized, and background readings are at the level of Collman, Hefedus, Finke, and Norton's *Principles and Applications of Organotransition Metal Chemistry*.

**CHEM 622 Chemical Communication**

Fall. 3 credits. Lects, M W F 10:10. J. Meinwald, T. Eisner.

For description, see BIONB 623.

**CHEM 625 Advanced Analytical Chemistry I**

Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or equivalent. Lects, M W F 9:05; occasional prelims W 7:30 P.M. B. K. Carpenter.

The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR, and mass spectroscopy are discussed.

**CHEM 627 Advanced Analytical Chemistry II**

Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 793 or equivalent is preferable. Lects, M W F 9:05-9:55. D. B. Zax.

Modern techniques in nuclear magnetic resonance. Little overlap is expected with CHEM 625, as this course will focus on more general questions of experimental design, understanding of multipulse experiments, and aspects of coherent averaging theory. Examples to be taken from both liquid and solid-state NMR. May also be of interest to other coherent spectroscopies.

**[CHEM 628 Isotopic and Trace Element Analysis (also NS 690)]**

Spring. 3 credits. Primarily for graduate students and advanced undergraduates. Prerequisite: Chemistry 288 or 390 or 302, or Chemistry 208 and Mathematics 112, or permission of instructor. Lects T R 10:10. Offered alternate years. Not offered 2000-2001. J. T. Brenna.

Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.]

**CHEM 629 Electrochemistry**

Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: Chemistry 390 or equivalent (Mathematics 213 helpful). Lects, T R 8:40-9:55. H. D. Abruna.

Fundamentals and applications of electrochemistry. Topics will include the fundamentals of electrode kinetics, electron transfer theory, the electrical double layer, diffusion, and other modes of transport. A wide range of techniques and their application as well as instrumental aspects will be covered.

**CHEM 665 Advanced Organic Chemistry**

Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisites: Chemistry 358 or 360, and 390 or equivalents or permission of instructor. Lects, M W F 9:05-9:55. B. K. Carpenter.

A survey of reaction mechanisms and reactive intermediates in organic chemistry.

**CHEM 666 Synthetic Organic Chemistry**

Spring. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: Chemistry 665 or permission of instructor. Lects, T R 10:10-11:25. D. B. Collum.

Modern techniques of organic synthesis; applications of organic reaction mechanisms and retrosynthetic analysis to the problems encountered in rational multistep synthesis, with particular emphasis on modern developments in synthesis design.

**CHEM 668 Chemical Aspects of Biological Processes**

Fall. 4 credits. Prerequisite: Chemistry 360 or equivalent. Lects, T R 8:40-9:55. T. P. Begley.

A representative selection of the most important classes of enzyme-catalyzed reactions will be examined from a mechanistic perspective. Topics discussed will include the chemical basis of enzymatic catalysis, techniques for the elucidation of enzyme mechanism, cofactor chemistry, and the biosynthesis of selected natural products. The application of chemical principles to understanding biological processes will be emphasized.

**CHEM 670 Fundamental Principles of Polymer Chemistry**

Fall. 4 credits. Prerequisite: Physical Chemistry 389/390 and Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymers is required. Lects, T R 10:00-11:15. G. W. Coates.

This course emphasizes general concepts and fundamental principles of polymer chemistry. The first part of the course deals with general introduction to classes of polymers, molar masses and their distributions, and a survey of major methods of polymer synthesis—radical, step growth, ionic, group transfer, Ziegler-Natta, and metathesis polymerization methods—with emphasis on kinetics and mechanisms rather than on structure. The second part deals with characterization and physical properties. These include: solution properties—solubility and solubility parameters, solution viscosity, molecular weight characterizations [gel permeation chromatography, viscometry, light scattering, osmometry]; bulk properties—thermal and mechanical properties; and structure-property relationships. The discussions will focus on chemistry rather than engineering of polymers.

**CHEM 671 Synthetic Polymer Chemistry (also MS&E 671 and CHEM 675)**

Spring. 4 credits. Prerequisites: a minimum of organic chemistry at the level of CHEM 359/360 is essential. Those without this organic chemistry background should see the instructor before registering for the course. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymer chemistry is required although knowledge of material covered in CHEM 670 or MS&E 452 will be helpful but not required. Lects, T R 8:30–10:00. D. Y. Sogah.

The objective of the course is to teach general concepts of polymer synthesis and discuss application of organic synthetic methods to the development of new polymerization methods and polymer architecture control. Emphasis will be on modern concepts in synthetic polymer chemistry and topics of current interest: the study of new methods of synthesis, preparation of polymers with reactive end groups, the control of polymer stereochemistry and topology, and the design of polymers tailored for specific uses and properties. Topics on synthesis will be selected from the following: step-growth polymerization, free radical polymerization and copolymerization, Ziegler-Natta polymerization, recent developments in living free radical polymerization, anionic polymerization, cationic polymerization, group transfer polymerization, ring-opening metathesis polymerization, and cyclopolymerization.

**CHEM 672 Kinetics and Regulation of Enzyme Systems**

Fall. 4 credits. Primarily for graduate students with interests in biophysical chemistry. Prerequisite: Chemistry 288 or 390, BIOBN 331, or equivalents or permission of instructor. Lects, M W F 10:10. B. Baird.

Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

**CHEM 677 Chemistry of Nucleic Acids**

Fall. 4 credits. Primarily for graduate students. Prerequisites: Chemistry 358 or 360, and 390 or equivalents. Lects, M W 10:10–11:00. D. A. Usher.

Properties, synthesis, reactions, and biochemical reactions of nucleic acids.

**CHEM 678 Statistical Thermodynamics**

Fall. 4 credits. Primarily for graduate students. Prerequisite: Chem 390 or equivalent. Lects, M W F 9:05. J. Marohn.

The principles of statistical thermodynamics and how they lead to classical thermodynamics. Ensembles and partition functions. Ideal gases and crystals. Thermodynamic properties from spectroscopic and structural data.

Chemical equilibrium. Dense gases: virial coefficients. Statistical mechanics of solutions. Bose-Einstein and Fermi-Dirac statistics. At the level of the first twelve chapters of *Statistical Mechanics* by McQuarrie.

**CHEM 681 Introduction to Quantum Chemistry**

Fall. 4 credits. Prerequisites: 1 year of undergraduate physical chemistry, 3 semesters of calculus, 1 year of college physics. Lects: T R 10:10–11:25.

R. F. Loring.

An introduction to the application of quantum mechanics in chemistry. This course covers many of the topics in Chemistry 793–794 at a more descriptive, less mathematical level. The course is designed for advanced undergraduates, chemistry graduate students with a minor in physical chemistry, and graduate students from related fields with an interest in physical chemistry. At the level of *Quantum Chemistry*, by Levine, or *Molecular Quantum Mechanics* by Atkins.

**[CHEM 686 Physical Chemistry of Proteins]**

Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 288 or 390 or equivalents. S-U grades. Letter grades for undergraduates. Offered alternate years. Not offered 2000–2001.

Chemical constitution, molecular weight, and structural basis of proteins; thermodynamic, hydrodynamic, optical, spectroscopic, and electrical properties; protein and enzyme reactions; statistical mechanics of helix-coil transition in biopolymers; conformation of biopolymers; protein folding.]

**CHEM 700 Baker Lectures**

Fall, on dates TBA. No credit. Lec, T R 11:15.

Distinguished scientists who have made significant contributions to chemistry present lectures for approximately six weeks. This year's lecturer: Prof. Stephen Lippard, Massachusetts Institute of Technology.

**CHEM 701 Introductory Graduate Seminar**

Fall. No credit. Highly recommended for all senior graduate students, in any field of chemistry. Lects T 4:30–6:00. R. Hoffmann.

A discussion of professional issues facing young chemists as well as life skills: academic and industrial trends, presentations, employment, immigration, publication, research funding, and ethics.

**CHEM 716 Special Topics in Advanced Inorganic Chemistry (Bonding in Molecules)**

Fall. 3 credits. Prerequisite: some exposure to (or a course in) quantum mechanics. A good undergraduate physical chemistry course may be sufficient, while Physics 443 or Chemistry 793 or Chemistry 794 are at a substantially higher level than what is needed. Lects, M W F 12:20. S. Lee.

The purpose of this course is to build a qualitative picture of the bonding in all molecules, including organic, inorganic,

organometallic systems and extended structures (polymers, surfaces, and three-dimensional materials). The approach uses molecular orbital theory to shape a language of orbital interactions. Most quantum mechanic ideas needed will be taught along the way; the course is specifically directed at organic, inorganic, and polymer chemists who are not theoreticians.

**[CHEM 762 Special Topics in Organic Chemistry: Fundamentals of Polymer Chemistry]**

Fall. 4 credits. Prerequisite: Physical Chem 389/390 and Organic Chem 359/360 or equivalent or permission of instructor. Primarily for graduate and advanced undergraduate students. Lects, T R 8:30–10:00. Not offered 2000–2001.

Introduction to polymer physical chemistry. Kinetics and mechanisms of polymerization methods: Ionic, radical, step-growth, and group transfer polymerization. Polymer stereochemistry. Solution properties: molecular weight characterization and polymer solubility. Mechanical and thermal properties. Structure-property relations. The discussions will focus on chemistry rather than engineering of polymers and examples will be taken from current literature.]

**[CHEM 765 Physical Organic Chemistry I]**

Fall. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 665 or permission of instructor. Lects, M W F 10:10. Not offered 2000–2001. C. F. Wilcox.

Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.]

**[CHEM 766 Physical Organic Chemistry II]**

Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 765 or permission of instructor. Not offered 2000–2001.]

**[CHEM 774 Chemistry of Natural Products: Combinatorial Chemistry]**

Spring. 3 credits. Prerequisites: Chemistry 360 and BIOBM 330 or equivalent. Lec, M W F 10:10–11:30. Not offered 2000–2001. T. P. Begley.

Combinatorial chemistry has revolutionized the way organic chemists think about structure function studies on biological systems and the design of inhibitors. This course will explore the design, synthesis, screening, and use of natural (i.e., peptide, protein, nucleic acid, carbohydrate) and unnatural (i.e., totally synthetic) libraries.]

**CHEM 780 Chemical Kinetics and Molecular Reaction Dynamics**

Fall. 4 credits. Prerequisite: Chemistry 681 or permission of instructor. Lects, T R 10:10–11:25. H. F. Davis.

Principles and theories of chemical kinetics and molecular reaction dynamics. Topics include potential energy surfaces, transition state theory, and statistical theories of unimolecular decomposition. Depending on class interest, the course will also include special topics such as surface reactions and photochemistry.

**[CHEM 782 Special Topics in Biophysical and Bioorganic Chemistry]**

Spring. 3 credits. Lects, T R 11:15. Not offered 2000–2001.

Topics vary from year to year.]

**CHEM 787 Modern Methods of Physical Chemistry**

Fall. 4 credits. Prerequisites: 1 year of undergraduate physical chemistry, 3 semesters of calculus. 1 year of college physics, (same as for CHEM 681). Lecs, T R 10:10. J. H. Freed.

This course provides the methodological background for graduate courses in chemical thermodynamics, kinetics, statistical mechanics, and quantum chemistry. It will include the methods of solution of relevant differential equations; the eigenvalue problem and linear algebra; partial differential equations for diffusion and wave mechanics; integral transforms; variational methods; and modern numerical methods. At the level of *Mathematical Methods in the Physical Sciences*, 2<sup>nd</sup> Edition, by Boas. There will be two prelims, one final exam, and 10-12 problem sets.

**CHEM 788 Macromolecular Crystallography (also BIOBM 738)**

Spring. 3 credits. S-U grades optional. Prerequisite: permission of instructor. Offered alternate years. Lecs, M W F 11:15; dis sec 6:00 P.M. S. E. Ealick, P. A. Karplus, J. C. Clardy.

Lectures briefly cover the fundamentals of crystallography and focus on methods for determining the three-dimensional structures of macromolecules. These include crystallization, data collection, multiple isomorphous replacement, molecular replacement, model building, refinement, and structure interpretation.

**[CHEM 789 X-ray Crystallography]**

Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or permission of instructor. Offered alternate years. Lecs, M W F 10:10. Not offered 2000-2001. J. C. Clardy.

A beginning course in the applications of X-ray crystallography to chemistry. Topics include symmetry properties of crystals, diffraction of X-rays by crystals, interpretation of diffraction data, and refinement of structures. The chemical information available from a diffraction experiment is stressed, and practical aspects are incorporated.]

**CHEM 791 Spectroscopy**

Spring. 4 credits. Prerequisite: Chemistry 793 or Physics 443 or equivalent. Lecs, M W F 11:15-12:05. G. S. Ezra.

Principles of molecular rotational, vibrational, and electronic spectroscopy. Topics include interaction of molecules with radiation; Born-Oppenheimer approximation; diatomic molecules; polyatomic molecules; feasible operations and the molecular symmetry group; and spectroscopy, dynamics, and IVR. At the level of Krotz's *Molecular Rotation Spectra*.

**[CHEM 792 Molecular Collision Theory]**

Spring. 4 credits. Lecs, T R 10:10-11:25. Not offered 2000-2001. G. S. Ezra.

The concepts and methods of scattering theory are described with particular emphasis on applications to problems of chemical interest. At the level of Child's *Molecular Collision Theory* and Taylor's *Scattering Theory*.]

**CHEM 793 Quantum Mechanics I**

Fall. 4 credits. Prerequisites: Chemistry 390, coregistration in A&EP 321 or equivalents or permission of instructor. Lecs, M W F 11:15. G. S. Ezra.

Schrodinger's equation, wave packets, uncertainty principle, WKB theory, matrix

mechanics, orbital and spin angular momentum, exclusion principle, perturbation theory, variational principle. At the level of Cohen-Tannoudji's *Quantum Mechanics*.

**CHEM 794 Quantum Mechanics II**

Spring. 4 credits. Prerequisites: Chemistry 793 or equivalent and the equivalent of or coregistration in A&EP 322, or permission of instructor. Lecs, T R 10:10-11:25. B. Widom.

Time-dependent phenomena in quantum mechanics and light-matter interaction. Group theory. Quantum structure of atoms and molecules.

**CHEM 796 Statistical Mechanics**

Spring. 4 credits. Prerequisite: Chemistry 678 and 793 or equivalent. Lecs, T R 8:30-9:55. R. Loring.

Statistical mechanics of systems of interacting molecules. Structure and thermodynamics of molecular liquids. Phase transitions and critical phenomena. Nonequilibrium statistical mechanics, with application to reactive and nonreactive in the liquid state.

**[CHEM 798 Special Topics in Physical Chemistry (Chemical Bonding in Polymers, Surfaces, and the Solid State)]**

Spring. 4 credits. Prerequisite: Chemistry 605, or 681, or 793, or Physics 443, or the equivalent. Lecs, T R 10:10-11:25. Not offered 2000-2001. R. Hoffmann.

The qualitative aspects of the electronic structure and chemical bonding on extended one-, two-, and three-dimensional systems will be discussed, in a way accessible to a wide range of inorganic and organic chemists, and to engineers and physicists as well.]

**CHINESE**

FALCON Program (Chinese)

See Department of Asian Studies.

**CLASSICS**

H. Pelliccia (chair), L. S. Abel, F. M. Ahl, C. Brittain, K. Clinton, J. E. Coleman, G. Fine, J. R. Ginsburg, E. Hohendahl, G. Holst-Warhaft, T. Irving, G. M. Kirkwood (emeritus), H. Koliass, D. Mankin, G. M. Messing (emeritus), C. Minkowski, A. Nussbaum, P. Pucci, H. R. Rawlings III, J. Reed (director of undergraduate studies), J. L. Rife, J. Rusten (director of graduate studies), D. R. Shanzer, B. Strauss, S. Wessel

Cornell University has long recognized the importance of studying the civilizations of ancient Greece and Rome. Particularly in an age of increasing specialization, study of the Classics is widely viewed as an excellent means of acquiring a liberal education; at Cornell, we are deeply interested in the continuing humanistic values contained in the literature of the ancient world and in gaining a fuller understanding of these important cultures and their imprint on subsequent ages.

The Department of Classics at Cornell is one of the oldest and largest in the country. With 11 faculty members, together with professors of related interests in the Departments of History, Philosophy, Comparative Literature, History of Art, Modern Languages, Linguistics, and Near Eastern Studies and in the Archaeol-

ogy, Medieval Studies, and Religious Studies programs, the range of instruction available is very large, including not only the traditional study of language, literature, and ancient history, but also newer developments in the field, such as comparative study of Mediterranean civilizations and modern literary theory.

Although Classics, like other areas of humanistic study, does not aim at providing specific preprofessional training, over the years Classics majors from Cornell have gone on to a wide variety of careers in law, education, medicine, diplomacy, management, educational administration, government, and many others.

The department offers courses in Bronze Age and Classical archaeology and is active in field projects in Classical lands. It sponsors archaeological excavations at Halai in Greece, which serves as a field training school for Cornell undergraduate and graduate students. On campus there are also collections of ancient artifacts, reproductions of ancient sculpture, and one of the few laboratories in the world to concentrate on the tree-ring dating of ancient monuments from Greece, Cyprus, and Turkey. The archaeology courses may be used to satisfy some of the requirements for the Intercollege Program in Archaeology or for the major in Classical Civilization. They require no knowledge of either Greek or Latin. Similarly, the department offers a variety of courses and seminars in English on such subjects as Greek mythology, Greek and Roman mystery religions, early Christianity, and Greek and Roman society, as well as ancient epic, tragedy, history, and philosophy. For those whose interest in things Greek and Roman extends no further than a desire to understand the English language a little better, the department offers one course in the Greek and Latin elements that make up a huge proportion of the vocabulary of Modern English, and another that deals more specifically with the Greek and Latin ingredients of bioscientific vocabulary. Programs in Greek and Latin at the elementary level are also offered. For the more ambitious there are courses involving reading, in the original, of Greek and Latin authors from Homer to St. Augustine and Bede and, periodically, the Latin works of Dante, Petrarch, and Milton. Sanskrit, the classical language of ancient India, is also offered, along with courses in translation on Indic religion, myth, and literature. The department makes every attempt to adapt its program to the needs of each student. If there is a Classical writer you would like to study, the department will do its best to help you do so whether you are a major in the department or not.

**Majors**

The Department of Classics offers majors in Classics, Greek, Latin, and Classical Civilization.

**Classics**

The Classics major comprises seven courses in advanced Greek and Latin (numbered 201 or above) and three courses in related subjects (see below) selected in consultation with the adviser. Classics majors are required to take a minimum of one 300-level course in one language and two 300-level courses in the other.

Students who are considering the option of undertaking graduate study in Classics are strongly advised to complete the Classics major.

## Greek

The Greek major comprises Classics 201 plus five advanced courses in Greek (numbered 203 and above) of which at least three are to be taken at the 300-level, and three courses in related subjects (see below) selected in consultation with the adviser.

## Latin

The Latin major comprises Classics 205 plus five advanced courses in Latin (numbered 207 and above) of which at least three are to be taken at the 300-level, and three courses in related subjects (see below) selected in consultation with the adviser.

## Classical Civilization

Those who major in Classical Civilization must complete (a) qualification in Latin and Greek or proficiency in either; (b) Classics 211 (or History 265), Classics 212 (or History 268), and Classics 220, plus five courses selected from those listed under Classical civilization, Classical archaeology, Ancient Philosophy, Latin, and Greek; and (c) three courses in related subjects (see below) selected in consultation with the adviser.

## Related Subjects

The field or scope of the subject "Classics" is the interdisciplinary study of Greek and Roman antiquity, comprising Greek and Latin language, literature, and linguistics; ancient philosophy; history; archaeology and art history; papyrology; epigraphy; and numismatics. It covers the ancient Mediterranean and neighboring lands as they were during the period extending from approximately 3000 B.C.E. to the sixth century C.E. In addition to the required courses in language and literature, the major includes related courses intended to give breadth and exposure to the other disciplines within the field and to enrich the student's study of the original languages. Since the influence of the Greco-Roman world extended far beyond antiquity, a related course could well focus on some aspect of the classical tradition in a later period. Students select related courses in consultation with their advisers or the DUS.

## Honors

Candidates for the degree of Bachelor of Arts with honors in Classics, Greek, Latin, or Classical civilization must fulfill the requirements of the appropriate major study as given above and must also successfully complete the special honors course 472. Credit for the honors course may be included in the credits required for the major. Students who wish to become candidates for honors must have a cumulative average of B, and B+ in the major. In consultation with the Standing Committee on Honors, the students should choose an honors adviser by the end of their sixth semester. By the second week of their seventh semester they should submit an outline of their proposed honors work to the Standing Committee and to the adviser(s). The thesis will be written under the supervision of the honors adviser(s) chosen by the student. Honors advisers will submit recommendations to the Standing Committee on Honors. The

Committee will read all honors theses and will determine the level of departmental honors. A copy of each successful honors thesis will be filed with the department.

## Independent Study

Independent study at the 300 level may be undertaken by undergraduates upon completion of one semester of work at the 300 level. 200-level independent study may be undertaken only in the case of documented schedule conflict upon application to the DUS.

## Study Abroad

Cornell participates in the Intercollegiate Center for Classical Studies in Rome, which offers courses in Latin, Greek, ancient history, art, archaeology, and Italian. Another opportunity for a semester's study abroad is available through College Year in Athens. (Consult Cornell Abroad for details.) In addition, Cornell is a member institution of the American School of Classical Studies at Athens, whose Summer Program is open to graduate students and qualified undergraduates. The American Academy in Rome, of which Cornell is also a member institution, offers full-year and summer programs for qualified graduate students. For graduate students the Department of Classics offers a few travel grants each year from the Townsend Memorial Fund. Detailed information on these programs is available in the Department of Classics Office, 120 Goldwin Smith Hall.

## Summer Support for Language Study

The Beatrice R. Kanders Memorial Scholarship (for the summer immediately following the freshman or sophomore year; preference given to dyslexic students) is available to students who want to enroll in Intensive Latin or Greek in the Cornell summer session. These courses are designed to enable students to enter second-year Latin or Greek the following fall. Preference is given to Classics undergraduate majors, and other students needing Latin or Greek for completion of their majors. Applications are due to the chair of the Department of Classics by March 16.

## Placement in Latin, Ancient Greek, and Modern Greek

Placement of first-year students in Latin and ancient Greek courses, and proficiency level in modern Greek, is determined by an examination given by the Department of Classics during orientation week or by arrangement with the director of undergraduate studies.

## First-Year Writing Seminars

The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

## Classical Civilization

### CLASS 100 Word Power: Greek and Latin Elements in the English Language

Spring. 3 credits. E. Hohendahl.

This course gives the student with no knowledge of the classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and

scientific English usage. Attention is paid to how words acquire their meaning and to enlarging each student's working knowledge of vocabulary and grammar.

### CLASS 109 English Words: Histories and Mysteries (also LING 109)

Fall. 3 credits. M. Weiss.

For description, see LING 109.

### CLASS 211 The Greek Experience #

Fall. 3 credits. Limited to 50 students.

F. Ahl.

An introduction to the literature and thought of ancient Greece. Topics will include epic and lyric poetry, tragedy and comedy, and historical, political, philosophical, and scientific writings. Some attention will also be given to the daily life of ordinary citizens, supplemented by slides of ancient art and architecture.

### [CLASS 212 The Roman Experience #

Spring. 3 credits. Not offered 2000–2001; next offered 2001–02. Staff.

An introduction to the civilization of the Romans as expressed in their literature, religion, and social and political institutions.]

### CLASS 217 Initiation to Greek Culture #

Fall. 4 credits. Limited to 18 students. This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclass students may be accepted). Apply in writing to the chair, Department of Classics, 120 Goldwin Smith Hall. P. Pucci and L. Abel.

Knowledge of Greek or Latin is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one-hour (occasionally two-hour) session, during which the class will participate in workshops with specially invited guests.

This course covers a wide range of Greek literary and philosophical works, as well as modern critical and philosophical writings on the Greeks. Our focus throughout will be on the status of language, the many forms of discourse that appear in the literature, and the attempts the Greeks themselves made to overcome the perceived inadequacies and difficulties inherent in language as the medium of poetry and philosophy.

We will inquire into the development of philosophy in the context of a culture infused with traditional, mythological accounts of the cosmos. We will ask how poetic forms such as tragedy responded to and made an accommodation with philosophical discourse while creating a most emotional effect on the audience; how the first historians, using literary and philosophical discourse, created space for their own inquiry; and we will try to discuss how these issues persist and are formulated in our own thinking.

### [CLASS 218 Initiation to the Classical Tradition #

Spring. 4 credits. See Classics 217 front matter above. Not offered 2000–2001.]

### CLASS 223 The Comic Theater (also COM L 223 and THETR 223) #

Spring and summer 2001. 3 credits.

J. Rusten.

The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian renaissance (*Commedia erudita* and *Commedia dell'arte*), Elizabethan England, seventeenth-century

France, the English Restoration, and Hollywood in the thirties and forties. Chief topics will be: the growth of the comic theatrical tradition and conventions; techniques and themes of comic plots (trickster, parody, farce, caricature); and the role of comedy in society. All readings in English.

**CLASS 229 War and Peace in Greece and Rome (also HIST 228) #**

Fall. 3 credits. B. Strauss.  
For description, see HIST 228.

**CLASS 231 Ancient Philosophy (also PHIL 211) #**

Fall. 4 credits. G. Fine.  
For description, see PHIL 211.

**CLASS 236 Greek Mythology (also COM L 236) #**

Fall 2000 and summer 2001. 3 credits.  
Limited to 200 students. D. Mankin.  
A survey of the Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness; the factors and influences involved in the creation of myths; and the use of myths for our understanding of Greek literature, religion, and moral and political concepts.

**CLASS 237 Greek Religion and Mystery Cults (also RELST 237) #**

Spring. 3 credits. K. Clinton.  
Greek religion constitutes one of the essential features of ancient Greek civilization and distinguishes it from later Western civilization. Since religion permeates Greek culture, including the major art forms (epic poetry, tragedy, comedy, architecture, painting, and sculpture), the course will investigate the interaction of religion with these forms—an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their history will be studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persephone, the Kabiroi, the Great Gods of Samothrace, and Bacchic rites.

**[CLASS 238 The Ancient Epic and Beyond #**

3 credits. Not offered 2000–2001.  
H. Pelliccia.  
We will move, Odysseus-like, to the West: beginning with Homer's *Iliad* (and including the British poet Christopher Logue's "account" of the opening books) and *Odyssey*, we will continue in the Hellenistic and Augustan eras with Apollonius of Rhodes' *Argonautica* and Virgil's *Aeneid*. A violent shift in space and time will have us conclude with two New World maritime epics: Herman Melville's *Moby Dick* and Derek Walcott's *Omeros*.]

**CLASS 258 Periclean Athens**

Spring. 4 credits. H. Pelliccia, H. R. Rawlings III, and J. Rusten.  
The first five weeks will provide a synoptic view of Athens' historical and cultural achievement in the middle of the fifth century B.C.—the traditional pinnacle of "The Glory that was Greece." Readings will be taken from Greek historians, philosophers, poets, and documentary texts, and from J. J. Pollitt's *Art and Experience in Classical Greece*. At least three of the (75-minute) lectures will be devoted to art history and delivered by a guest speaker. The next 7–8 weeks will follow the course of the Peloponnesian War to its end; readings from Thucydides will be interwoven

with contemporaneous texts composed by the dramatists (Sophocles, Euripides, and Aristophanes) and the sophists (supplemented with readings from Plato). The remaining classes will consider the fate of Socrates and a few other fourth-century developments. The basic aim of the course is to approach an understanding of how and why a vital and creative society came unglued. There will be weekly discussion sections.

**[CLASS 265 Ancient Greece from Homer to Alexander the Great (also HIST 265) #**

4 credits. Open to freshmen. Not offered 2000–2001. B. Strauss.  
For description, see HIST 265.]

**CLASS 268 A History of Rome from Republic to Principate (also HIST 268) #**

Spring. 4 credits. Open to freshmen.  
J. Ginsburg.  
For description, see HIST 268.

**[CLASS 291 Classical Indian Narrative (also ASIAN 291) @ #**

Spring. 3 credits. Not offered 2000–2001.  
C. Minkowski.]

**CLASS 303-304 Independent Study in Classical Civilization, Undergraduate Level**

303, fall; 304, spring. Up to 4 credits.

**CLASS 331 Goths, Vandals, Franks, and Romans**

Fall. 4 credits. D. Shanzer.  
Contemporary views of the Visigothic Sack of Rome by Alaric in 410 will be followed by three different case-studies for co-existence of Roman and barbarian in Late Antiquity: the Vandal kingdom (North), the Ostrogothic kingdom (Italy), and finally the one that lasted, the Frankish kingdom (Gaul). Readings will include contemporary primary works as well as modern historiography.

**[CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also RELST 333) #**

Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. Not offered 2000–2001. K. Clinton.

A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of classical mystery cults and Hellenistic religion, the course will focus on such Hellenistic cults as the mystery cults of Isis, Bacchus, and Attis and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs to determine what Christianity owed to its pagan predecessors and to isolate the factors that contributed to its triumph over the "rival" pagan cults of late antiquity.]

**CLASS 335 Byzantine Theocracy: Church and State from the Fourth to Eighth Centuries A.D. (also HIST 334, NES 340, and RELST 340) #**

Fall. 3 credits. S. Wessel.  
The Byzantine state and society was dominated by two competing yet complementary sources of power: administrative apparatus (*imperium*), and the immense ecclesiastical organization (*sacerdotium*). We will study the interrelationship between these two institutions throughout the first five centuries of the Byzantine Empire, and the impact that these institutions had on the formation of Byzantine society, culture, and religion. A variety of

literary sources will be considered, including ecclesiastical histories, secular historiography, acts of conciliar proceedings, letters, and theological treatises, as well as material sources, such as coins and images.

**CLASS 339 Plato (also PHIL 309) #**

Spring. 4 credits. Prerequisite: at least 1 previous course in philosophy. C. Brittain.  
For description, see PHIL 309.

**[CLASS 345 The Tragic Theater (also COM L 344 and THETR 345) #**

Spring. 4 credits. Limited to 40 students.  
Not offered 2000–2001. F. Ahl.  
Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works studied will include: Aeschylus' *Agamemnon*; Sophocles' *Oedipus Tyrannus*, *Philoctetes*; Euripides' *Alcestis*, *Helen*, *Iphigenia in Aulis*, *Orestes*; Seneca's *Thyestes*, *Trojan Women*; Shakespeare's *Julius Caesar*, *Titus Andronicus*, *Othello*; Strindberg's *The Father*; Dürrenmatt's *The Visit*; Bergman's *Seventh Seal*; Cacoyannis' *Iphigenia*.]

**[CLASS 382 Greeks, Romans, and Victorians (also COM L 382) #**

4 credits. Not offered 2000–2001. F. Ahl.  
This course explores how nineteenth-century (and especially Victorian English and Irish) poets, dramatists, and to a lesser extent, novelists, present Greco-Roman antiquity. The varied influences of Vergil and Homer, Seneca and Sophocles, Plautus and Aristophanes, Horace, and Greek lyric poetry will be discussed in selected works of Thomas More, Shelley, Byron, Swinburne, W. S. Gilbert, Oscar Wilde, and the pre-Raphaelites and Victorian poets.]

**[CLASS 390 The Sanskrit Epics (also ASIAN 390) @ #**

4 credits. Not offered 2000–2001.  
C. Minkowski.  
For description, see ASIAN 390.]

**CLASS 395 Classical Indian Philosophical Systems (also ASIAN 395 and RELST 395) @ #**

Spring. 4 credits. Prerequisite: some background in philosophy or in classical Indian culture. C. Minkowski.  
For description, see ASIAN 395.

**CLASS 450 The Peloponnesian War (also CLASS 632 and HIST 450/630)**

Fall. 4 credits. Prerequisites: CLASS 211 or 217, HIST 265, or permission of instructor.  
B. Strauss.  
For description, see HIST 450.

**CLASS 463 Gender and Politics in the Roman World (also HIST 463 and WOMNS 464) #**

Spring. 4 credits. J. Ginsburg.  
An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions this course will address are: was politics the exclusive domain of men in Roman society (as is generally assumed) or does a broader definition of politics and an understanding of the various forms political activity in ancient Rome might have taken allow a place for women in Roman political life? What role did gender have in Roman political discourse and ideology? Why did issues such as family, marriage, and sexuality become subjects of political debate and legislation?

**[CLASS 469 Equality and Inequality in Ancient Greece (also HIST 469) #**

Fall. 4 credits. Prerequisite: History 265, Classics 211 or 217, or written permission of the instructor. Not offered 2000–2001.

B. Strauss.

For description, see HIST 469.]

**[CLASS 480 Roman Society and Politics under the Julio-Claudians (also HIST 473) #**

4 credits. Prerequisite: Classics 212, History 268, or permission of instructor. Not offered 2000–2001. J. Ginsburg.

This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus's consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the relation of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero's cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.]

**[CLASS 711–712 Independent Study for Graduate Students in Classical Civilization**

711, fall; 712, spring. Up to 4 credits.

**Greek****CLASS 101 Greek for Beginners**

Fall. 4 credits. A. Nussbaum and H. Pelliccia.

Introduction to Attic Greek. Designed to enable the student to read the ancient authors as soon as possible.

**CLASS 103 Attic Greek**

Spring. 4 credits. Prerequisite: 101 or equivalent. J. Rife.

A continuation of Classics 101.

**CLASS 104 Intensive Greek**

Summer. 6 credits. Staff.

An intensive introduction to the fundamentals of ancient Greek grammar. Prepares students in one term for 200-level Greek.

**CLASS 201 Attic Authors #**

Fall. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. P. Pucci.

Selected readings from Greek prose.

**CLASS 203 Homer #**

Spring. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. K. Clinton.

Readings in the Homeric epic with emphasis on formulaic style.

**[CLASS 210 Attic Prose**

3 credits. Prerequisite: Classics 103 or 104 or equivalent. Not offered 2000–2001.]

**CLASS 225–226 Independent Study in Greek, Undergraduate Level**

225, fall; 226, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

**CLASS 305 The Greek New Testament and Early Christian Literature**

Fall. 4 credits. Prerequisite: CLASS 201 or equivalent, or permission of instructor. D. Shanzer.

More advanced readings from the *Acts of the Apostles* and some exercises on the *Gospels*

will be followed by readings from Early Christian Greek literature. The latter may include theological tracts and hagiographical texts, e.g. martyr-acts, such as the *Passion of Pionius* or the *Passion of Perpetua*.

**CLASS 307–308 Independent Study in Greek, Undergraduate Level**

307, fall; 308, spring. Up to 4 credits.

**CLASS 310 Greek Undergraduate Seminar #**

Fall and spring. 4 credits. Prerequisite: two 200-level courses in Greek or permission of instructor. Fall topic: Euripides. K. Clinton. Spring topic: Greek Lyric Poetry. H. Pelliccia.

**CLASS 311 Greek Philosophical Texts: (also PHIL 411) #**

Fall and spring: up to 4 credits. Prerequisites: knowledge of Greek and permission of instructor. T. Irwin, C. Brittain.

Readings of Greek philosophical texts in the original.

**[CLASS 313 Greek Epic #**

Fall. 4 credits. Prerequisite: Classics 206 or equivalent. Not offered 2000–2001.]

**CLASS 342 Greek Prose Composition**

Spring. 4 credits. Prerequisite: one term of 200-level Greek or permission of instructor. P. Pucci.

**[CLASS 417 Advanced Readings in Greek #**

4 credits. Not offered 2000–2001.]

**[CLASS 419 Advanced Greek Composition**

4 credits. Prerequisite: Classics 342 or equivalent. Not offered 2000–2001.]

**[CLASS 555 Graduate Proseminar**

Fall. 1 credit. Not offered 2000–2001. Staff. Graduate students will be introduced to the tools, techniques, and methods of classical scholarship.]

**[GREEK 605–606 Graduate Survey of Greek Literature**

605, fall; 606, spring. 4 credits each term. Prerequisite: linguistic proficiency to be determined by instructor. Not offered 2000–2001.

A survey of Greek literature in two semesters. Classics 605: Greek literature from Homer to the mid-fifth century. Classics 606: Greek literature from the late fifth century to the Empire.]

**CLASS 632 Topics in Ancient History (also CLASS 450 and HIST 450/630)**

Fall. 4 credits. B. Strauss.

For description, see HIST 630.

**CLASS 671 Graduate Seminar in Greek**

Fall. 4 credits.

671.1 topic: *Homer*. A. Nussbaum and H. Pelliccia.

671.2 topic: *Problems in Greek Religion*. K. Clinton.

**CLASS 672 Graduate Seminar in Greek: Sophocles**

Spring. 4 credits. P. Pucci.

**CLASS 701–702 Independent Study for Graduate Students in Greek**

701, fall; 702, spring. Up to 4 credits.

**Latin****CLASS 105 Latin for Beginners**

Fall. 4 credits. Staff.

An introductory course in the essentials of Latin, designed for rapid progress toward reading the principal Latin writers.

**CLASS 106 Elementary Latin**

Spring. 4 credits. Prerequisite: 105 or equivalent. Staff.

A continuation of Classics 105, using readings from various authors.

**CLASS 107 Intensive Latin**

Spring and summer. 6 credits. Staff.

Prepares students in one term for 200-level Latin.

**CLASS 108 Latin in Review**

Fall. 4 credits. Prerequisite: placement by departmental examination. E. Hohendahl.

This course will accommodate students who place too high for beginning Latin, but not high enough for intermediate.

**CLASS 205 Intermediate Latin #**

Fall and spring. 3 credits. Prerequisite: Classics 106, 107, 108, or placement by departmental examination. J. Reed, E. Hohendahl.

Readings in Latin prose.

**CLASS 207 Catullus #**

Fall. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. E. Hohendahl.

**[CLASS 208 Roman Drama #**

3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. Not offered 2000–2001.]

**CLASS 216 Vergil #**

Spring. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. D. Mankin.

**CLASS 227–228 Independent Study in Latin, Undergraduate Level**

227, fall; 228, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

**CLASS 312 Latin Undergraduate Seminar #**

Fall and spring. 4 credits. Prerequisite: 2 terms of 200-level Latin or permission of instructor. Fall topic: *Horace*. D. Mankin. Spring topic: *Ovid*. J. Reed.

**[CLASS 314 The Augustan Age #**

4 credits. Prerequisite: 2 terms of 200-level Latin or permission of instructor. Not offered 2000–2001.]

**CLASS 315–316 Independent Study in Latin, Undergraduate Level**

315, fall; 316, spring. Up to 4 credits.

**[CLASS 317 Roman Historiography #**

4 credits. Prerequisite: 1 term of 300-level Latin or permission of instructor. Not offered 2000–2001. J. Ginsburg.]

**[CLASS 341 Latin Prose Composition**

4 credits. Prerequisite: 1 term of 200-level Latin or permission of instructor. Not offered 2000–2001.]

**CLASS 369 Intensive Mediaeval Latin Reading**

Summer only. 4 credits. D. Shanzer.

751, fall; 752, spring. Up to 4 credits.

## Classical Art and Archaeology

**CLASS 220 Introduction to Art History: The Classical World (also ART H 220) #**

Fall. 4 credits. J. Rife.  
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the late empire.

**CLASS 221 Minoan-Mycenaean Art and Archaeology (also ARKEO 221 and ART H 221) #**

Spring. 3 credits. J. Coleman.  
The birth of civilization in Greece and the Aegean islands during the Bronze Age. The main focus is on the rise and fall of Minoan Crete and Mycenaean Greece, with consideration given to the nature and significance of Aegean interactions with Egypt, the Near East, and Anatolia.

**[CLASS 232 Archaeology in Action I (also ARKEO 232 and ART H 224) #**  
3 credits. Prerequisite: permission of instructor. Not offered fall 2000-2001.  
P. I. Kuniholm.]

**[CLASS 233 Archaeology in Action II (also ARKEO 233 and ART H 225) #**  
3 credits. Prerequisite: permission of instructor. Not offered 2000-2001.  
P. I. Kuniholm.

For description, see ART H 225.]

**CLASS 256 Practical Archaeology (also ARKEO 256)**

Spring. 3 credits. J. Coleman.  
An introduction to the aims and methods of field archaeology. Topics covered include: remote sensing (satellite images and aerial photos); surface survey; subsurface investigations by magnetometer, ground penetrating radar, etc.; the layout and development of a land excavation; underwater excavations; the collection, description, illustration, and analysis of artifacts and data, such as pottery, lithics, botanical samples, and radiocarbon samples. Hands-on experience with potsherds and other artifacts from prehistoric and Classical Greece and Cyprus in the university's collections is intended to prepare students for work in the field.

**CLASS 309 Dendrochronology of the Aegean (also ARKEO 309 and ART H 309)**

Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.

For description, see ART H 309.

**[CLASS 319 Art in the Daily Life of Greece and Rome (also ART H 319) #**

Spring. 4 credits. Not offered 2000-2001.  
A. Ramage.

For description, see ART H 319.]

**[CLASS 320 The Archaeology of Classical Greece (also ART H 320) #**

4 credits. Not offered 2000-2001.  
A. Ramage.]

**[CLASS 321 Mycenae and Homer (also ARKEO 321 and ART H 321) #**

Fall. 4 credits. Prerequisite: at least 1 previous course in archaeology, classics, or history of art. Not offered 2000-2001.  
J. Coleman.

Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric *Iliad* and *Odyssey*. Topics include Mycenaean architecture, burial customs, kingship, and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the "Dark Ages" that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); the nature of the Homeric poems and their value as historical sources.]

**CLASS 322 Greeks and Barbarians (also ART H 328) #**

Fall. 4 credits. Prerequisite: Classics 220 or 221, or permission of instructor.  
J. Coleman.

A study of the archaeological and other evidence for the interaction between Greek civilization and the peoples of the eastern and western Mediterranean from the thirteenth to the fourth centuries B.C.E. The course will focus on Greek relationships with Egypt, Phoenicia, Cyprus, Anatolia, and Italy in the post-Bronze Age period.

**[CLASS 323 Painting in the Greek and Roman World (also ART H 323) #**  
4 credits. Not offered 2000-2001.  
A. Ramage.]

**CLASS 325 Greek Vase Painting (also ART H 325) #**

Fall. 4 credits. A. Ramage.  
For description, see ART H 325.

**[CLASS 327 Greek and Roman Coins (also ART H 327) #**

4 credits. Not offered 2000-2001.  
A. Ramage.  
For description, see ART H 327.]

**[CLASS 329 Greek Sculpture (also ART H 329) #**

4 credits. Not offered 2000-2001.  
J. Coleman.  
An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.]

**CLASS 350 Arts of the Roman Empire (also ART H 322) #**

Fall. 4 credits. A. Ramage.  
For description, see ART H 322.

**CLASS 357-358 Independent Study in Classical Archaeology, Undergraduate Level**

357, fall; 358, spring. Up to 4 credits.

**[CLASS 423 Ceramics (also ARKEO 423 and ART H 423)**

4 credits. Prerequisite: permission of instructor. Not offered 2000-2001.  
A. Ramage.  
For description, see ART H 423.]

**CLASS 430 Seminar on the Bronze Age Architecture of Asia Minor (also ARKEO 425 and ART H 425) #**

Spring. 4 credits. P. I. Kuniholm.  
For description, see ART H 425.

**[CLASS 432 Sardis and the Cities of Asia Minor (also ARKEO 432 and ART H 424) #**

4 credits. Prerequisite: permission of instructor. Not offered 2000-2001.  
A. Ramage.  
For description, see ART H 424.]

**[CLASS 434 The Rise of Classical Greece (also ARKEO 434 and ART H 434) #**

4 credits. Recommended: Classics 220 or 221, History of Art 220 or 221, or permission of instructor. Not offered 2000-2001. P. I. Kuniholm.  
For description, see ART H 434.]

**[CLASS 435 Seminar on Roman Art and Archaeology (also ARKEO 435 and ART H 427) #**

4 credits. Prerequisite: permission of instructor. Not offered 2000-2001.  
A. Ramage.  
For description, see ART H 427.]

**[CLASS 629 The Prehistoric Aegean (also ARKEO 629) #**

4 credits. Not offered 2000-2001.  
J. Coleman.  
Seminar with focus on the Aegean and neighboring regions in the Neolithic and Early Bronze Ages.]

**CLASS 630 Seminar in Classical Archaeology (also ARKEO 520 and ART H 520)**

Fall. 4 credits. J. Coleman.

The subject of the seminar in 2000 is the rise and development of the polis in the Aegean during the eighth to the sixth centuries B.C. Topics will include the archaeological evidence for the existence of the polis in the eighth and seventh centuries B.C.; the importance of trade for the rise of the polis; the city center (acropolis) and its fortifications; the evidence for religious and civic institutions in the early polis; the relationship between center and territory (chora); the role of land-owners, laborers, and slaves in agriculture; port cities and cities with ports; and piracy and warfare as means of production in the polis. Throughout the seminar the archaeological remains of particular cities and towns will be compared and contrasted with the written sources, particularly the descriptions of the ideal poleis of Plato (Laws) and Aristotle (Politics).

**CLASS 721-722 Independent Study for Graduate Students in Classical Archaeology**

721, fall; 722, spring. Up to 4 credits.

## Greek and Latin Linguistics

**[CLASS 421 Greek Comparative Grammar (also LING 451) #**

4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. Not offered 2000-2001. A. Nussbaum.

The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.]

**[CLASS 422 Latin Comparative Grammar (also LING 452) #**

4 credits. Prerequisite: thorough familiarity with the morphology of classical Latin. Not offered 2000-2001. A. Nussbaum.

The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.]

**[CLASS 424 Italic Dialects (also LING 454) #**

4 credits. Not offered 2000-2001. A. Nussbaum.]

**CLASS 425 Greek Dialects (also LING 455) #**

Fall. 4 credits. A. Nussbaum.

**[CLASS 426 Archaic Latin (also LING 456) #**

4 credits. Prerequisite: reading knowledge of Latin. Not offered 2000-2001. A. Nussbaum.]

**[CLASS 427 Homeric Philology (also LING 457) #**

4 credits. Prerequisite: ability to read Homeric Greek. Not offered 2000-2001. A. Nussbaum.

The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a *Kunstsprache*: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.]

**CLASS 429 Mycenaean Greek (also LING 459) #**

Spring. 4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. A. Nussbaum.

## Sanskrit

**[CLASS 131-132 Elementary Sanskrit (also LING 131-132 and SANSK 131-132)**

131, fall; 132, spring. 4 credits each term. Not offered 2000-2001; next offered 2001-2002.

An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.]

**CLASS 251-252 Intermediate Sanskrit (also LING 251-252 and SANSK 251-252) @ #**

251, fall; 252, spring. 3 credits each term. Prerequisite: Classics 132 or equivalent. C. Minkowski.

Readings from the literature of Classical Sanskrit. Fall: selections from the two Sanskrit epics, the *Mahabharata* and the *Ramayana*. Spring: more selections from the epics, and from either Sanskrit story literature or from Sanskrit dramas.

**CLASS 403-404 Independent Study in Sanskrit, Undergraduate Level**

403, fall; 404, spring. Up to 4 credits. C. Minkowski.

**CLASS 703-704 Independent Study for Graduate Students in Sanskrit**

703, fall; 704, spring. Up to 4 credits. C. Minkowski.

Also see Classics 291, 390, and 395 (Classical Civilization listings).

## Honors Courses

**CLASS 472 Honors Course: Senior Essay**

Fall and spring. 8 credits. An adviser must be chosen by the end of the student's sixth semester. Topics must be approved by the Standing Committee on Honors by the beginning of the seventh semester.

See "Honors," Classics front matter.

## COMPARATIVE LITERATURE

W. J. Kennedy, chairman (141 Goldwin Smith), C. Carmichael, director of Undergraduate Studies, (139 Goldwin Smith); N. Saccamano, director of Graduate Studies (145 Goldwin Smith); F. Ahl, C. Arroyo, A. Caputi (Emeritus), C. Carmichael, D. Castillo, C. Chase, W. Cohen, J. Culler, B. deBary, D. Grossvogel (Emeritus), P. Hohendahl, W. Holdheim (Emeritus), W. J. Kennedy, N. Melas, J. Monroe, E. Rosenberg, N. Saccamano, N. Sakai, L. Waugh (Emeritus), W. Wetherbee.

Also cooperating: E. Alfonso, D. Bathrick, R. Brann, S. Buck-Morss, P. Carden, P. Gilgen, E. Hanson, T. Hope, B. Jeyifo, D. LaCapra, D. Mankin, B. Maxwell, L. Meixner, T. Murray, N. Pollak, J. Resina, J. Rusten, D. Schwarz, G. Shapiro, M. Steinberg, S. Toorawa, G. Waite.

The Department of Comparative Literature provides a broad range of courses in European as well as non-European literature. Courses stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, and psychoanalysis.

## The Major

The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student chooses an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

## Requirements for the Major

- 1) Five courses in Comparative Literature at the 200 level and above, including the core course listed below. A student may include up to two literature courses from other departments.
- 2) One core course in Comparative Literature (for 2000-2001 Comparative Literature 304 [fall]), to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.
- 3) Five courses in literature and other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling the language requirement.
- 4) An honor's essay (Comparative Literature 493) of roughly 50 pages is now optional. It is to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close

cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year. In lieu of a Senior Honors Essay, students may take one course at the 400-600 level.

The department also encourages:

- 1) a program that includes broad historical coverage (e.g., Comparative Literature 201-202: Great Books); intensive study of a single genre (e.g., Comparative Literature 363-364: The European Novel, Comparative Literature 365: Contemporary Fiction); analysis of problems in literary theory (e.g., Comparative Literature 302: Literature and Theory, Comparative Literature 448: Subject to Translation). The department also offers a number of strongly recommended 200-level courses designed to acquaint undergraduates with the discipline: Comparative Literature 203: "Introduction to Comparative Literature," as well as broad-ranging introductory courses in World Fiction (Comparative Literature 204) and World Poetry (Comparative Literature 205), with emphasis on the nineteenth and twentieth centuries.
- 2) a second foreign language, especially for students interested in graduate work in literature.

### Honors

A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature. The department bases its decision on the students achieving grades of at least B+ on the senior essay, in course work for the major, and in their overall academic performance at Cornell.

### First-Year Writing Seminars

Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Writing Program" for a full description of the first-year seminar program.

### Courses

#### COM L 201#-202 Great Books

201, fall; 202, spring. 4 credits. Comparative Literature 201 and 202 may be taken independently of each other. Fall: W. J. Kennedy; spring: T. Hope.

A reading each semester of seminal texts that represent and have shaped Western culture and hence form an essential part of the student's intellectual equipment. By analyzing, interpreting, and evaluating, students will develop critical reading abilities.

**201:** Selections from the Bible, Homer, Dante, Rabelais, Shakespeare, and others.

**202:** Close readings of major works of fiction from Shakespeare to the present, with attention to the problems and possibilities of "World Literature" as a way of categorizing texts caught up in the historical tides of colonization and decolonization. How are the spaces described or circumscribed by literary forms—especially psychic, domestic, and national spaces—traversed and ruptured by worlds of inassimilable, inalienable difference? Readings from William Shakespeare, Daniel Defoe, J. W. von Goethe, Charlotte Brontë, Gustave Flaubert, André Gide, Nella Larsen, Jean Rhys, Aimé Césaire, and Assia Djebar.

#### COM L 203 Introduction to Comparative Literature (also ASIAN 203)

Fall. 4 credits. Fall: W. Kennedy and department members.

The course is intended to answer the question persistently asked by undergraduates: "What is comparative literature, anyway?" The format of the course is designed to acquaint students with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the two meetings each week, the first will generally take the form of a lecture; the second will be a discussion of the assigned text. Texts and topics range from the Bible and Dostoevsky to the naturalism of Mann and the word play of Joyce, and from modern American poetry to post-modern critical theory.

#### COM L 204 Global Fictions (also ASIAN 204)

Spring. 4 credits. Not offered 2000-2001. N. Melas.

This course will be an introduction and an inquiry into global perspectives on fiction. Can the reading of fiction point us towards becoming citizens of the world? How might we know this world? How might we imagine it? We will consider the condition of the stranger in this global era as well as construct a geography of reading. Readings will be drawn mainly but not only from the contemporary period and outside Europe. Readings will change depending on the instructor, but may include works of Rushdie, Marquez, Conde, Munif, Castellanos, Oe, Ngugi, Wolf, Kincaid, and Homer.]

#### COM L 205 Introduction to Poetry, Chiefly Modern

4 credits. Not offered 2000-2001. Staff. Unlike Comparative Literature 207, 205 is intended to be a survey that concentrates largely (but of course not exclusively) on foreign poetry. The course will cut across historical periods and poetic genres, from conventional "strict" genres of the sonnet-variety to forms more nearly associated with our own times: free verse, "the prose poem," etc. Difficult as it may be to avoid poets on the order of Shakespeare, Milton, Goethe, and Keats, we propose to focus on the practitioners of the craft from Baudelaire, Whitman, Hopkins, Mallarmé, and Rilke on down.]

#### COM L 206 Introduction to Literary Criticism

Spring. 4 credits. Not offered 2000-2001. Staff.

More advanced undergraduate seminars naturally tend to focus on contemporary literary theory; after all, it is essential for students of literature to be well-informed about contemporary theoretical debates, methodologies, and problems. But literary theory and criticism did not begin with the structuralist revolution of the 1960s, and it is essential for students to understand earlier developments—many of which still have the power to provoke and inspire. Critical historicization should begin at home, with an awareness of how different the forms, practices, institutions, and politics of literary criticism have been, and this course will thus introduce students to the vast field of pre-1960 debates. We will examine the historical evolution of key terms now more or less taken for granted as part of critical vocabulary, and we will pay particular attention to the (relatively recent) emergence of literature itself

as a category of study. Critics and theorists will be chosen from among Plato, Aristotle, Cicero, Horace, and Augustine; Renaissance and neo-classical critics such as Spenser, Dryden, and Dr. Johnson; Enlightenment, Romantic, and post-Romantic theorists such as Kant, Hegel, Schiller, Coleridge, Wilde, and Pater; and such major twentieth-century figures as Heidegger, Bataille, Sartre, Benjamin, Adorno, and I. A. Richards. No prior knowledge of the subject will be assumed, and all texts will be read in English.]

#### COM L 208 Shakespeare and the Twentieth Century (also ENGL 208)

Fall. 4 credits. Not offered 2000-2001. W. Cohen.

What is the relationship between the plays of Shakespeare in their own time and the various ways they have functioned in modern culture? We will compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course as a whole will attempt to provide a systematic introduction to the contemporary study of literature and culture.]

#### COM L 209 Introduction to Cultural Studies

Fall. 4 credits. Not offered 2000-2001. Staff. What is culture above and beyond literature, and how are the aesthetics of walking in the city or receiving a postcard different from (or related to) that of reading a detective story or *National Geographic*? Are we immersed in culture or precipitated out of it? Are we cultural subjects or objects? And who is this "we" in any case? Is this imaginary collective identity itself a product or fantasy of culture? When does culture demand assimilation, and when does it allow for or violently enforce the operations of (class, sexual, racial) difference? Do cultures exist in the plural, and would this plural be one of particularity or relationality? How does or do culture(s) mediate between recent enactments of multiculturalism, on the one hand, and globalization on the other? Readings will range from Freud, Marx, and Saussure to contemporary poststructuralist critiques and reformulations of cultural identification.]

#### COM L 215 Comparative American Literatures (also AM ST 215)

Spring. 4 credits. B. Maxwell. Twentieth-century writing from Canada, the United States, the Caribbean, and Latin America. A hemispheric American Studies perspective will encourage thinking about and across cultural, linguistic, and national demarcations. This course proposes that a question put by the poet William Carlos Williams—"History, history! What do we fools know or care?"—finds its counter-statement in words from Africa, passed on by the novelist Paule Marshall: "Once a great wrong has been done, it never dies. People speak the words of peace, but their hearts do not forgive. Generations perform ceremonies of reconciliation but there is no end." Countering the literature of amnesia and baseless optimism, the works that we will read cannot forget, and decline to forgive, the historical traumas that so bitterly flavor them. Our concern largely will be with understanding the aesthetic means and strategies that certain writers use to perform ceremonies *not* bent on reconciliation. Readings (in English) will include Joy Kogawa, *Obasan*; Sheila Watson, *The Double*

*Hook*; Hubert Aquin, *The Antiphony*; Jean Toomer, *Cane*; William Faulkner, *Absalom, Absalom!*; Wilson Harris, *The Palace of the Peacock*; Edward Kamau Brathwaite, *X/Self and Trench Town Rock*; Mariano Azuela, *The Underdogs*; Jose Donoso, *Curfew*; and Eduardo Galeano, *The Book of Embraces* and selections from the work of John Sanford, Rosario Castellanos, Clarice Lispector, and Juan Gelman.

**COM L 220 Thinking Surrealisms**

Fall. 4 credits. B. Maxwell.

Borrowing its title from a formulation of the Marxist philosopher Ernst Bloch and beginning from the "forays of demoralization" instigated by the Dadas, who bequeathed to surrealism the precious gift of unreconciliation to the given, this course will range over the protean expressiveness of several surrealist moments of the last century. The inception of surrealist precept and practice in Paris in the mid-1920s will be a consideration, perhaps only slightly more central to the course than the explicitly anti-fascist political phase of the 1930s and '40s; the supplementation of Parisian surrealism by Caribbean, Mexican, African American, Quebecois, and Mauritian writers and artists; the renegade practice of Hans Bellmer and the unschooled surreality of Eugene Atget; the reflections of and on surrealism by Walter Benjamin, Ernst Bloch, and Theodor W. Adorno; the relations of surrealism to the Situationist International; and the recent critiques of surrealism in fiction (Milan Kundera) and scholarship (Hal Foster). Throughout, the course will ask what the proliferation of "thinking surrealisms" meant to twentieth-century culture and politics. All readings in English.

**COM L 223 The Comic Theater (also CLASS 223 and THETR 223) #**

Spring and summer 2001. 3 credits.  
J. Rusten.

For description, see Classics 223.

**COM L 236 Greek Mythology (also CLASS 236) #**

Fall. 3 credits. Limited to 200. D. Mankin.

For description, see Classics 236.

**COM L 239 Cultural History of the Jews of Spain (also NES 239, JWST 239, RELST 239 and SPAN L 239)**

Fall. 3 credits. E. Alfonso.

For description, please see Near Eastern Studies 239.

**COM L 250 Muhammad and Mystics in the Literatures of the Islamic World (also NES 250)**

Spring. 4 credits. S. Toorawa.

For course description, please see Near Eastern Studies 250.

**COM L 279 The Russian Connection, 1830-1867 (also RUSSL 279)**

Fall. 4 credits. P. Carden.

For course description, please see Russian Literature 279.

**COM L 280 The Russian Connection, 1870-Present (also RUSSL 280)**

Spring. 4 credits. P. Carden.

For course description, please see Russian Literature 280.

**COM L 302 Literature and Theory (also COM L 622 and ENGL 302/602)**

Fall. 4 credits. J. Culler.

Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and

feminism. Readings from Barthes, Derrida, Foucault, J. Butler, B. Johnson, and others. No previous knowledge of literary theory is assumed.

**COM L 304 Europe and Its Others: An Introduction to the Literature of Colonialism @**

Fall. 4 credits. Limited to 15. N. Melas.

Through an examination of selected works from the early twentieth century to the present from France, England, Africa, and the Caribbean, this course will provide an introduction to the literature written alongside and against the historical phenomenon that has arguably had the most far reaching impact in modern history: European colonialism. How was culture instrumental in the political project of domination? How have writers of the postcolonial period attempted to write back? What problems and possibilities does colonialism present for cultural identity and cultural resistance? In addition to close reading of texts and a consideration of historical background we will also examine visual representations of colonialism, particularly film. Authors will include Conrad, Ngugi, Nandy, Condé, Duras, Salih, Fanon, Memmi, Djebbar, Resnais, and Pontecorvo. All readings available in English.

**COM L 311 Modern European Literature and Culture (also FRLIT 315)**

Spring. 4 credits. Staff.

We shall concern ourselves with European culture as embracing the area from Russia to the Atlantic Ocean, not as divided into Western, Eastern, or Central. European culture crosses the old East-West political boundaries. Case studies: Ireland, France, Czech Republic, Russia.

This course is designed for those interested both in the artistic, imaginative side of European literature and in the ways in which culture expresses some of the most significant concerns of our age. The conceptual links will include issues of national identity and social justice, as well as concerns of private emotions and individual personality. Popular culture, film, TV, and theatre will be integrated with the reading and class discussion. Some authors who will be read: Flaubert, Charlotte Brontë (*Villette*), Karl Marx, Dostoevsky, Mayakovsky, Yeats, Malraux, Camus, Joyce, Solzhenitsyn, Kundera, and others.

**COM L 318 Bodies Politic: Queer Theories and Literature of the Body (also WOMNS 318)**

Fall. 4 credits. T. Hope.

This course will examine notions of corporality—of bodies both social and individual—as deployed and analyzed in theories of gender and sexuality of the last century. How do concepts of perversion and degeneration haunt the idea of the social body? How are individual bodies stigmatized, encoded, and read within the social sphere? Sexology, psychoanalysis, and new-historicist critiques, including those that emphasize the discursive intersections of sexuality, race, and nationhood, will constitute our textual *corpus*; in an attempt to question the habitual dichotomization of "theoretical" and "cultural" production, we shall also include a small number of literary and visual texts which comment upon these theoretical traditions. Included are works by: Sigmund Freud, Havelock Ellis, Max Nordau, André Gide, Radclyffe Hall, E. M. Forster, Luce Irigaray,

Cherrie Moraga, Judith Butler, Michael Foucault, Homi Bhabha, Biddy Martin, Esther Newton, Julia Kristeva, Janine Chasseguet-Smirgel, Adrienne Rich, Leo Bersani, Richard Fung, Kobena Mercer, Jewelle Gómez, Teresa de Lauretis.

**COM L 319 Crime and Conflict in the Modern Arabic Novel (also NES 319)**

Fall. 4 credits. S. Torrawa.

For course description, please see Near Eastern Studies 319.

**COM L 326 Christianity and Judaism (also RELST 326)**

Spring. 4 credits. C. Carmichael.

A study of the New Testament as a product of the First Century Palestinian and Hellenistic Judaism. Other text (also in translation): *The Passover Haggadah*.

**COM L 328 Literature of the Old Testament (also RELST 328) @ #**

Fall. 4 credits. C. M. Carmichael.

Analysis of small sections of well-known material for in-depth discussion.

**[COM L 336 European Drama 1660-1900: Molière to Ibsen (also ENGL 335 and THETR 336) #**

Spring. 4 credits. Not offered 2000-2001.

A. R. Parker.

Major works by such writers as Molière, Congreve, Goethe, Schiller, Kleist, Shelley, Byron, Büchner, Ibsen, and Chekhov. Attention to influential theater traditions (commedia dell'arte, melodrama, pantomime); theories and styles of acting (Diderot, Garrick, Kean); the role of theater in the cultural politics of Enlightenment and Revolutionary Europe (Rousseau, Burke).]

**[COM L 343 Contemporary Mass Culture in Japan and in the U.S. (also ASIAN 363)**

Spring. 4 credits. Enrollment limited to 25.

Not offered 2000-2001. B. deBary.

For description, please see Asian Studies 363.]

**[COM L 344 Tragic Theatre (also CLASS 345)**

Spring. 4 credits. Not offered 2000-2001.

F. Ahl.

For course description, please see Classics 345.]

**COM L 352 European Cultural History, 1815-1870 (also HIST 362) #**

Fall. 4 credits. M. Steinberg.

For description, please see History 362.

**COM L 356 Renaissance Literature**

Spring. 4 credits. W. Kennedy.

An introduction to Renaissance literary texts with some attention to cultural backgrounds and intellectual history. Readings from Machiavelli, Erasmus, Rabelais, Shak, Cervantes, and others.

**[COM L 358 Literature and Religion: Western Mysticism (also ROMS 358, RELST 358)**

Spring. 4 credits. Not offered 2000-2001.

C. Arroyo.

Analysis of some canonical texts of western mysticism toward a systematic view of their common features (a semiotics of the mystic text). Readings include: excerpts from the Bible, Plotinus, Pseudodionysius, Bernard of Clairvaux, Ibn Arabi of Murcia, The Zohar, Meister Eckhart, Teresa of Avila, John of the Cross, and expressions of silence and the ineffable in our times.]

**[COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 364, MUSIC 390, ART H 351 and RELST 362)]**

Spring. 4 credits. Not offered 2000-2001.  
C. Kaske, W. J. Kennedy.

Members of various departments will lecture on Luther, Michelangelo, Edmund Spenser, Cervantes, Copernicus, Galileo, and Monteverdi. Guest lectures will include Peter Dear, History; Esther Dotson, History of Art; and Rebecca Harris-Warrick, Music. Lectures and discussion will introduce different methods of interpretation and of historical analysis. Written requirements: two short papers and a final take-home examination.]

**[COM L 363-364 The European Novel (also SPANL 363)]**

363, fall; 364, spring. 4 credits. Comparative Literature 363 and 364 may be taken independently of each other. Fall: staff; spring: E. Rosenberg.

**363: From Boccaccio to Goethe.** Survey of the history of the novel from its origins to the end of the eighteenth century. The new genre of Humanism and the medieval romances of chivalry. Ambiguities derived from the lack of the word "novel." Different steps in the conquest of realism. The novel and intellectual history in different epochs: character and structure in the novels and contemporary philosophical views on man, cosmos, gender, and social classes. Readings include Boccaccio's *Fiammetta*; G. Pérez's *Lazarillo de Tormes*; Cervantes's *Don Quixote*; Mme de Lafayette's *The Princess of Cleves*; Defoe's *Robinson Crusoe*; Horace Walpole's *The Castle of Otranto*; and Goethe's *The Sorrows of Young Werther*, as well as a short package containing theoretical statements about the genre from Giraldo Cinthio to Goethe. All texts read in English.

**364: From Stendhal to the present** (in translation). Close reading of novels from the nineteenth and twentieth centuries: Stendhal's *The Red and the Black*; Flaubert's *Madame Bovary*; Dostoevsky's *Crime and Punishment*; Joyce's *Portrait of the Artist as a Young Man*; Kafka's *The Metamorphosis*; and Kundera's *The Unbearable Lightness of Being*. Study of the changing ways of representing recurring themes: the role of the creative imagination; the city and country; rebellions and revolutions; communities and solidarity; dominant groups and minorities (social, ethnic, religious, psychological); interplay of politics, sex, and humor. Artistic and structural developments: coherence, connectedness, fragmentation; from realism to modernism.

**[COM L 365 Contemporary Fiction]**

Fall. 4 credits. Not offered 2000-2001.  
B. Maxwell.

A study of European fiction and drama largely drawing on texts from the first half of the twentieth century. We will pay particular attention to the making of literary types and characters; to traces of utopian and messianic elements; to the relations between memory and political revolution; and to the motive of *ressentiment*. Readings (in translation) chosen from the following: Robert Walser, *Snowwhite* and *The Walk*; Franz Kafka, *The Trial*; Thomas Mann, *Death in Venice*; Bertolt Brecht, *The Rise and Fall of the City of Mahagonny*; Joseph Roth, *Hotel Savoy*; Alfred Döblin, *Berlin Alexanderplatz*; Christa Wolf, *The Quest for Christa T.*; Louis Aragon, *Paris Peasant*; Louis-Ferdinand Celine, *Death on the Installment Plan*; Elio Vittorini, *In Sicily*; Natalia Ginzburg,

stories; and Isaac Babel, stories. Collateral theoretical readings by Georg Lukács, Ernst Bloch, Bertolt Brecht, Walter Benjamin, Siegfried Kracauer, Gershom Scholem, Elias Canetti, and Christa Wolf.]

**[COM L 367 The Russian Novel (also RUSS L 367)]**

Fall. 4 credits. N. Pollak.  
For description, please see Russian Literature 367.

**[COM L 368 Visual Culture and Social Theory (also GOVT 375 and ART H 370)]**

Fall. 4 credits. S. Buck-Morss.  
For description, please see Government 375.

**[COM L 371 A Mediterranean Society and Its Culture: The Jews under Classical Islam (also NES 371, JWST 371, RELST 371)]**

Spring. 4 credits. R. Brann.  
For course description, please see Near Eastern Studies 371.

**[COM L 385 Reading Nabokov (also RUSS L 385, ENGL 379)]**

Fall. 4 credits. Enrollments limited to 25.  
G. Shapiro.  
For course description, please see Russian Literature 385.

**[COM L 404 History into Fiction: Nazis and the Literary Imagination (also JEWST 414, ENGL 404 and GERST 414)]**

Fall. 4 credits. Limited to 15. E. Rosenberg.  
For description, see English 404.

**[COM L 411 The Short Novel from Flaubert and James to the Present]**

Spring. 4 credits. Enrollment limited. Not offered 2000-2001. E. Rosenberg.  
Discussion of some 10 authors who excelled in the form of the novella and whose names are thus up to a point "given": in addition to James and Flaubert, writers like Conrad, Tolstoy, Mann, Kafka, Joyce, Faulkner, Marquez, and Morrison. One novella each week or week and a half, but not in canonical order; e.g., Conrad's *Heart of Darkness*, Kafka's *Penal Colony*, and Ozick's *The Shawl* as versions of modern politics (or atrocities); the question of "status" as this is reflected in the relations between employer and domestic in things like Flaubert's *Simple Heart*, Tolstoy's *Master and Man*, and Gertrude Stein's *The Good Anna*; versions of the *récit*—specifically on the conditions of marriage—in Tolstoy's *Kreutzer Sonata* and (to stick with Beethoven) André Gide's *Pastoral Symphony*; same-sex relations in James's *Pupil* and Mann's *Death in Venice*; then also varieties of the fantastic in, say, *Jekyll and Hyde*, *Turn of the Screw*, and Dostoevski's *Double*.]

**[COM L 413 Death, Culture, and the Literary Monument]**

Fall. 4 credits. Not offered 2000-2001.  
N. Melas.  
Beginning with Homer's *Iliad*, this course will inquire into the monumental transformation of death into immortality in the literary composition. How do death's negations become fiction's triumph? We will pay particular attention to the fate of this procedure when its subjects are no longer heroic warriors but slaves and women. How do colonial domination and gender difference alter the aesthetic procedures and assumptions underlying commemoration and literary immortality? In addition to death and language, we will consider such themes as the

relation of antiquity to the present, of identity to its dissolution and of politics to culture. Readings of literary texts drawn from a variety of languages and traditions will be attended by selected readings in critical theory and a glance at visual culture, particularly surrounding monuments commemorating the emancipation of slaves and the holocaust. Authors will include Homer, Derek Walcott, Simone Schwartz-Bart, Virginia Woolf, Krista Wolf, Tayeb Salih, Maurice Blanchot, Hegel, Orlando Patterson, Walter Benjamin.]

**[COM L 417 Faust (also GER ST 417)]**

Spring. 4 credits. H. Deinert.  
For course description, please see German Studies 417.

**[COM L 418 Virtual Orientalisms (also ASIAN 415)]**

Spring. 4 credits. Not offered 2000-2001.  
B. deBary.  
Registration limited to 25. For course description, please see Asian Studies 415.]

**[COM L 419-420 Independent Study]**

419, fall; 420, spring. Variable credit.  
Comparative Literature 419 and 420 may be taken independently of each other.  
Applications available in 145 G.S.

**[COM L 426 New Testament Seminar (also RELST 426)]**

Spring. 4 credits. Enrollment is limited to 20 students. Not offered 2000-2001.  
C. Carmichael.  
Identification and discussion of problems in the New Testament.]

**[COM L 428 Biblical Seminar (also RELST 427)]**

Fall. 4 credits. C. Carmichael.  
We will discuss attitudes to sexuality in the Bible. In Old and New Testament texts we will examine the clash between ancestral behavior and subsequent laws and between legal and religious ideas. Topics will include: marriage and divorce, incest, intermarriage, gender discrimination, guilt and shame, homosexuality, women and purity, sexual language, and symbols.

**[COM L 430 Brecht, Artaud, Mueller, Wilson (also GERST 430, THETR 420)]**

Fall. 4 credits. D. Bathrick.  
For course description, please see German Studies 430.

**[COM L 442 Spinoza and New Spinozism (also GERST 409)]**

Spring. 4 credits. G. Waite.  
For course description, please see German Studies 409.

**[COM L 448 The City as Text (also S HUM 403, SPANL 403)]**

Fall. 4 credits. J. Resina.  
For description, please see Society for the Humanities 403.

**[COM L 450 Renaissance Poetry (also COM L 650, ENGL 422/622)]**

Spring. 4 credits. W. Kennedy.  
A reading and discussion of key texts in lyric poetry from Italian, French, English, and other European literatures of the Renaissance. Topic for spring 2001: Forms of national identity in Petrarch, DuBella, Sidney, and Wroth.

**[COM L 451 Renaissance Narrative]**

Spring. 4 credits. Not offered 2000-2001.  
W. Kennedy.  
A reading and discussion of key texts in narrative epic and chivalric romance from

Italian, French, English, and other European literatures of the Renaissance.]

**[COM L 452 Renaissance Humanism (also COM L 652)]**

Spring. 4 credits. Enrollment limited to 15. Not offered 2000–2001. W. Kennedy. A reading and discussion of key texts by Renaissance humanists in Italian, French, English and other European literatures from the fourteenth to seventeenth centuries.]

**COM L 453 Rescreening the Holocaust (also GERST 449, THETR 450)**

Spring. 4 credits. D. Bathrick. For description, please see German Studies 449.

**COM L 461 Art and Social Histories (ART H 461)**

Spring. 4 credits. L. Meixner. For description, please see History of Art 461.

**COM L 463 Decadence, Degeneration, and the Nineteenth-Century Imaginary (also FRLIT 482)**

Spring. 4 credits. Limited to 15. T. Hope. Core course for 2000–2001. Through critical reading of French, British, and German prose fiction as well as examples of medical, anthropological, and philosophical thought, we shall examine the social significance of discourses of disease, decadence, and degeneration from the late eighteenth century to the early twentieth. How are questions of bodily pathology related to the construction of "national" bodies? How does perversion emerge at the core of theories of heredity and genealogy that traverse Europe's colonial scenes? What is the relationship between symptoms and texts, between sickness and subversion, in the mapping of gender, class, race, and sexuality onto the body? The course material will include readings from Jean-Jacques Rousseau, Alexandre Dumas *films*, Edgar Allan Poe, Honoré de Balzac, Arthur Schopenhauer, Friedrich Nietzsche, Sigmund Freud, Remy de Gourmont, Havelock Ellis, Radclyffe Hall, and Thomas Mann. Students may read in the original language or in translation.

**COM L 467 Poetry and Rhetoric (also COM L 667, ENGL 483/683, FRLIT 437/637)**

Fall. 4 credits. C. Chase. In present-day common usage, "poetry" means emotion or beauty, and "rhetoric" means deceptive, decorative language. These incompatible meanings cover over a history of close connection between poetry and rhetoric. Historically, if poetry and rhetoric at times have been seen as opposite, incompatible kinds of language, they also have been identified with each other and strongly distinguished from philosophy and science. Where rhetoric belongs turns out to raise issues of politics and philosophy not only of literary history and language. Such questions and issues have been intently pursued in modern poetry beginning with the Romantics. In this course we will read poetry and criticism or "theory" that explore what it means for language to be rhetorical. Readings from Aristotle, Shakespeare, Marvell, Coleridge, Wordsworth, Mallarmé, Rilke, Valéry, Wallace Stevens, Jean Paulhan, Gerard Genette, Derrida, De Man, and Judith Butler. Two papers (one short, one longer) required. Reading knowledge of French and/or German recommended but not required.

**[COM L 472 Poetry of the 1990s (also ENGL 408, SPAN L 472, and GERST 472)]**

Fall. 4 credits. Enrollment limited to 15 students. Not offered 2000–2001. J. Monroe. Where is poetry now? Where is it heading as we move toward the twenty-first century? What is its current situation in light of the historic changes that have occurred since 1989? Exploring how contemporary poetry is responding to a new era of altered expectations and redrawn boundaries, a time of renewal and redefinition, we will track the principal issues, directions, figures, and forces shaping the process of poetry's unfolding in the twentieth century's final decade. Materials will be drawn from a wide variety of forms and contexts, including movies, literary journals, general circulation magazines, and anthologies, as well as individual poetry collections.]

**COM L 474 Topics in Modern European Intellectual and Cultural History (also HIST 474)**

Fall. 4 credits. D. LaCapra. For course description, please see History 474.

**COM L 480 Baudelaire in Context (also COM L 680)**

Spring. 4 credits. J. Culler. A reading of *Les Fleurs du Mal* and *Les Petits poèmes en prose*, in conjunction with major twentieth-century critical treatments of them, so as to grasp what has been at stake in discussions of Baudelaire. Critics to be read include Benjamin, Bersani, de Man, Friedrich, Jakobson, Jauss, Johnson, and Sartre. Reading knowledge of French required.

**[COM L 482 Latin American Women Writers (also SPANL 492, WOMN 481)]**

Spring. 4 credits. Not offered 2000–2001. D. Castillo. For course description, please see Spanish Literature 492.]

**COM L 483 Imagining the Holocaust (also ENGL 458/658, JWST 458/658, COM L 683, GERST 483)**

Spring. 4 credits. D. Schwarz. For course description, please see English 458.

**COM L 489 Seminar in Comparative Twentieth-Century Anglophone Drama (also ENGL 483, THETR 483)**

Fall. 4 credits. B. Jeyifo. For description, please see English 483.

**COM L 493 Senior Essay**

Fall and spring. 8 credits. Hours TBA individually in consultation with the director of the Senior Essay Colloquium. Approximately 50 pages to be written over the course of two semesters in the student's senior year under the direction of the student's adviser. An "R" grade will be assigned on the basis of research and a preliminary draft completed in the first semester. A letter grade will be awarded on completion of the second semester.

**COM L 495 The Cultural Theory of the Frankfurt School (also GERST 495, GOVT 471)**

Fall. 4 credits. P. Hohendahl. For description, please see German Studies 495.

**[COM L 604 Translation and the Global Marketplace]**

Fall. 4 credits. Not offered 2000–2001. N. Melas.

The seminar will investigate the global politics of translation, focusing on how works are picked up (or not) for international circulation. Issues to be examined will include: how the politics of local censorship restrict or enable visibility; how the problem of cultural essentialism is packaged and marketed transnationally; how cultural and national identity come through (or don't) in translation; how experiments in non-standard English (ebonics, cubonics, créolité, drug argot, and class slang) disturb or reaffirm linguistic identity politics. In addition to critical texts, the course will engage with textual studies of Ken Saro-wiwa's *Sozaboy: A Novel Written in Rotten English*, Salman Rushdie's *The Satanic Verses*, Theresa Hak Cha's *Dictée*, Patrick Chamoiseau's *Texaco*, Irvine Welsh's *Trainspotting*, and Gustavo Perez Firmat's *Life on the Hyphen*. The final section of the seminar will be devoted to exploring ways in which a growing number of non-Western writers have begun to break out of traditionalist narrative modes in order to "translate" the effects of new media on literary representation, from Afro-futurism to postcolonial cyberpunk.]

**[COM L 609 Comparison and Cultural Difference]**

Fall. 4 credits. Not offered 2000–2001. N. Melas. This course will be a wide-ranging investigation of the pitfalls and possibilities for cross-cultural comparison. We will examine the structure and mechanisms of comparison, both as a disciplinary method and as a concept or practice: to what extent and in what circumstance can comparison produce cultural difference, consolidate it, dissolve it, erect borders, inhabit borderlands, propose a global ecumene? With particular attention to colonialism and globalization, we will inquire into the relation between various modes of comparison and broader contexts and ideologies. Though focused on the humanities and on theoretical texts, readings will include incursions into the social sciences and selected poetry and film. Authors may include Lyotard, Foucault, Fanon, Tilley, Gilroy, Clifford, Appadurai, Bhabha, Lanser, Kincaid, Walcott.]

**[COM L 610 Modern Japanese Studies: The Formation of the Field in History and Literature (also ASIAN 609)]**

Spring. 4 credits. Not offered 2000–2001. B. deBary, N. Sakai, J. Koschmann. For course description, please see Asian Studies 609.]

**COM L 619–620 Independent Study**  
619, fall; 620, spring. Variable credit. Comparative Literature 619 and 620 may be taken independently of each other. Applications available in 145 G.S.

**COM L 622 Literature and Theory (also COM L 302 and ENGL 302/602)**

Fall. 4 credits. J. Culler. For description, please see Comparative Literature 302.

**COM L 630 Aesthetics in the Eighteenth Century (also ENGL 630)**

Fall. 4 credits. N. Saccamano. For description, please see English 630.

**COM L 650 Renaissance Poetry (also COM L 450, ENGL 622, ITALL 450/650)**

Spring. 4 credits. W. Kennedy. For course description, please see Comparative Literature 450.

**[COM L 652 Renaissance Humanism (also COM L 452)]**

Spring. 4 credits. Not offered 2000–2001.  
W. Kennedy.]

**COML 655 Decadence (also ENGL 655, WOMNS 656)**

Fall. 4 credits. E. Hanson.

For description, please see English 655.

**COM L 663 Nietzsche and Heidegger (also GERST 663)**

Fall. 4 credits. G. Waite.

For description, please see German Studies 663.

**COM L 667 Poetry and Rhetoric (also COM L 467, ENGL 4483/683, FRLIT 437/637)**

Fall. 4 credits. C. Chase.

For course description, please see Comparative Literature 467.

**COM L 670 Joyce's Ulysses (also ENGL 670)**

Fall. 4 credits. D. Schwarz.

For description, please see English 670.

**COM L 671 Transnational Imaginaries: Globalization and Culture**

Fall. 4 credits. N. Melas.

The term "globalization" has become ubiquitous in recent years as the primary conceptual frame and material basis for understanding contemporary transnationalism. It evokes a brave new borderless world in which politics, culture, and social formations are no longer necessarily congruent nor primarily beholden to national boundaries, thus making neocolonial domination easier to see and harder to combat. It triumphantly or despairingly announces the end of history when space precedes time as the measure of human experience, and that experience exceeds the grasp of modernity's autonomous subject. Globalization thus challenges almost all aspects of our understanding of culture—in both its ethnographic and humanist guises—and the categories through which we apprehend and analyze it. This course will provide an introduction to recent writings surrounding globalization in that shifting borderland between the humanities and the social sciences. The course will, however, focus on some theoretical implications of globalization rather than attempt to provide an exhaustive survey; emphasis, consequently, will be placed on examining the philosophical and methodological presuppositions of various texts and approaches and on engaging the difficulties and aporias of cross-disciplinary discussion. We will dwell specifically on (1) the theoretical implications for culture's relation to space, time, and subjectivity of the "time-space compression" that underlies globalization and (2) the redrawing of boundaries for comparative transnational studies around the pairing of the global and the local.

While considering these issues, this seminar will focus on how globality is represented, or rather imagined, particularly in cultural texts (chiefly theory, literature, and film) marginal to the centers of power. In addition to providing a critical survey of some of the most influential texts and debates on the subject of globalization, this seminar will also attempt a re-evaluation (not to say a rehabilitation) of the notion of "imagination" and the pivotal if often covert role it plays in claims for cultural resistance. Authors may include Amin, Wallerstein, Hall, Myoshi, Harvey, Robertson,

Appadurai, Agamben, Walcott, Brennan, Jameson, Glissant, and Mies.

**[COM L 674 Contemporary Poetry and Culture: 1968–1998 (also ENGL 697 and GERST 674)]**

Spring. 4 credits. Not offered 2000–2001.

J. Monroe.

The redrawing of cultural and political boundaries underway since the late 1980s has made it possible to conceive of the poetry of the Cold War era with a degree of closure unimaginable only a few years ago. In light of this changed situation, we will focus on the second half of the post-1945 period—the 30 years extending from 1968 to the present—with particular attention to the past two decades. Exploring issues of emerging and evolving importance for a poetry of the present moment in light of the recent past, we will consider dominant modes as well as alternative practices; canon formation, gender, and multiculturalism; the roles of the publishing industry, popular culture, creative writing programs, and new computer technologies in shaping reading habits and writing communities.]

**[COM L 675 After the Divide: German Critical Theory of the Seventies and Eighties (also GERST 675 and HIST 675)]**

Fall. 4 credits. Not offered 2000–2001.

P. Hohendahl.

For description, please see German Studies 675.]

**COM L 680 Baudelaire in Context (also COM L 480)**

Spring. 4 credits. J. Culler.

For course description, please see Comparative Literature 480.

**COM L 683 Imagining the Holocaust (also COM L 483, ENGL 458/658, JWST 458/658, GERST 483)**

Spring. 4 credits. D. Schwarz.

For course description, please see English 458.

**COM L 685 Gramsci and Cultural Politics (also GERST 685, GOVT 675)**

Spring. 4 credits. G. Waite.

For description, please see German Studies 685.

**[COM L 689 Adorno's Aesthetic Theory (also GERST 689)]**

Fall. 4 credits. Not offered 2000–2001.

P. Hohendahl.

For course description, please see German Studies 689.]

**COM L 693 "The Sign of History": Kant and Lyotard (also GERST 693, GOVT 761)**

Spring. 4 credits. P. Gilgen.

For description, please see German Studies 693.

**[COM L 695 Post-Modern Thought and Area Studies (also JAPL 614)]**

Fall. 4 credits. Not offered 2000–2001.

B. deBary.

For course description, please see Japanese Literature 614.]

**COM L 721 Baroque Perspectives (also ENGL 721)**

Spring. 4 credits. T. Murray.

For description, please see English 721.

## COMPUTER SCIENCE

C. Van Loan, chair; B. Arms, K. Birman, C. Cardie, T. Coleman, R. L. Constable, A. Demers, R. Elber, J. Gehrke, D. Greenberg, J. Halpern, J. Hartmanis, J. E. Hopcroft, D. Huttenlocher, J. Kleinberg, D. Kozen, L. Lee, G. Morrisett, A. Myers, K. Pingali, F. B. Schneider, B. Selman, P. Seshadri, D. Shmoys, E. Tardos, R. Teitelbaum, S. Toueg, S. Vavasis, T. vonEicken, R. Zabih

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in computer science. For details, visit our web site at [www.cs.cornell.edu/ugrad](http://www.cs.cornell.edu/ugrad).

## The Major

CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:

- four semesters of calculus (MATH 111–122 (or 112)–221–222 or 191–192–293–294)
- two semesters of introductory computer programming (COM S 100 and 211)
- a seven-course computer science core (COM S 222, 280, 312, 314, 381, 414, and 482)
- two 400+ computer science electives, totaling at least six credits
- a computer science project course (COM S 413, 415, 418, 433, 473, 501, 514, 519, or 664)
- a mathematical elective course (OR&IE 270, MATH 300+, T&AM 300+, etc.)
- two 300+ courses that are technical in nature and total at least six credits
- a three course specialization in a topic area other than computer science. These courses must be numbered 300 level or greater.

Note: All of the field electives described above must be courses of three or more credit hours with the exception of the COM S project course, which may be two credits.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the adviser, the computer science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.

## Admission

All potential affiliates are reviewed on a case-by-case basis relative to the following criteria:

- 1) Completion of MATH 293 (or MATH 221), COM S 211, and COM S 280.
- 2) A grade of C or better in all COM S courses, excluding COM S 100, with the overall average of these courses being not less than 2.7.

- 3) A grade of C or better in all math courses, with the overall average of these courses being not less than 2.7.
- 4) An overall GPA of not less than 2.0 (2.5 or better recommended).

If any courses are repeated, both grades will be counted in the averages used for admissions. Qualifying courses must be taken at Cornell.

Note: Students who do not meet these requirements are discouraged from attempting affiliation with the major. The COM S major can be exceptionally rigorous for students who are not suitably prepared for the academic requirements of the program and are unlikely to be admitted to the major if they do not meet the admissions standards listed above.

**Honors.** To qualify for departmental honors a student must have:

- maintained a cumulative GPA  $\geq 3.5$
- completed eight credit hours of COM S course work at or above the 500 level
- completed six credit hours of COM S 490 research with a COM S faculty member, spread over at least two semesters and with grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement, the COM S project requirement, the math elective, or the specialization. See the COM S undergraduate web site for more information on eligibility: [www.cs.cornell.edu/ugrad](http://www.cs.cornell.edu/ugrad).

## Courses

For complete course descriptions, see the computer science listing in the College of Engineering section.

### COM S 099 Fundamental Programming Concepts

Fall, summer. 2 credits. S-U grades only. No prerequisites.

### COM S 100 Introduction to Computer Programming

Fall, spring, summer. 4 credits. During the fall semester, two versions of COM S 100 (COM S 100M and COM S 100J) are available as described in the computer science listing in the College of Engineering.

### COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102)

Fall. 3 credits.

### COM S 113 Introduction to C

Fall, spring. 1 credit. Usually weeks 1–4. Prerequisite: COM S 100 or equivalent programming experience. Credit is granted for both COMS 113 and 213 only if 113 is taken first. S-U grades only.

### COM S 114 Unix Tools

Fall, spring. 1 credit. Usually weeks 5–8. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

### COM S 130 Creating Web Documents

Fall. 3 credits.

### COM S 201 Cognitive Science in Context Laboratory (also COGST 201 and PSYCH 201)

Fall or spring. 4 credits. Concurrent or prior registration in "Introduction to Cognitive Science" PSYCH 102/COGST 101/COM S 101/LING 170/PHIL 191 is

suggested but not required. Knowledge of programming languages is not assumed. Limited to 24 students. Fall, B. Halpern and staff; spring, D. Field and staff.

### COM S 202 Transition to Java

Fall, spring. 1 credit. Usually weeks 1–4. Prerequisite: one semester-long programming course.

### COM S 211 Computers and Programming (also ENGRD 211)

Fall, spring, summer. 3 credits. Prerequisite: COM S 100 or an equivalent course in Java or C++.

### COM S 213 C++ Programming

Fall, spring. 2 credits. Prerequisite: COM S 100 or equivalent programming experience. Students who plan to take COMS 113 and 213 must take 113 first. S-U grades only.

### COM S 221 Numerical Methods in Computational Molecular Biology

Fall. 3 credits. Prerequisites: at least one course in calculus such as MATH 106, 111, or 191 and a course in linear algebra such as MATH 221 or 294 or BTRY 417. No particular course in programming is required, but the student should have some familiarity with iteration, arrays, and procedures.

### COM S 222 Introduction to Scientific Computation (also ENGRD 222)

Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or 294).

### COM S 230 Intermediate Web Design

Spring. 3 credits. Prerequisite: COM S 130. Not offered every year; may be offered spring 2001.

### COM S 280 Discrete Structures

Fall, spring. 4 credits. Pre- or corequisite: COM S 211 or permission of instructor.

### COM S 312 Structure and Interpretation of Computer Programs

Fall, spring. 4 credits. Prerequisite: COM S 211 or equivalent programming experience.

### COM S 314 Computer Organization (also ELE E 314)

Fall, spring. 4 credits. Prerequisite: COM S 211; COM S 312 or ENGRD 231/ELE E 232 recommended, but not required.

### COM S 381 Introduction to Theory of Computing

Fall, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

### [COM S 400 The Science of Programming

Spring. 4 credits. Prerequisite: COM S 280 or equivalent. Not offered every year; semester TBA.]

### COM S 409 Data Structures and Algorithms for Computational Science

Spring. 4 credits. This course is not open to COM S majors. Prerequisite: COM S 211 or equivalent programming experience.

### [COM S 411 Programming Languages and Logics

Fall. 4 credits. Prerequisites: COM S 312 or permission of instructor. Not offered every year; semester TBA.]

### COM S 412 Introduction to Compilers and Translators

Spring. 3 credits. Prerequisites: COM S 211, 312 (or permission of instructor) and 314. Corequisite: COM S 413.

### COM S 413 Practicum in Compilers and Translators

Spring. 2 credits. Corequisite: COM S 412. A compiler implementation project related to COM S 412.

### COM S 414 Systems Programming and Operating Systems

Fall, summer. 3 credits. Prerequisite: COM S 211, 312 (or permission of instructor), and 314.

### COM S 415 Practicum in Operating Systems

Fall. 2 credits. Corequisite: COM S 414.

### COM S 417 Computer Graphics and Visualization (also ARCH 374)

Spring. 3 credits. Prerequisite: COM S 211.

### COM S 418 Practicum in Computer Graphics (also ARCH 375)

Spring. 2 credits. Enrollment limited. Permission of instructor. Recommended: COM S 314. Corequisite: COM S 417.

### COM S 421 Numerical Analysis

Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

### COM S 432 Introduction to Database Systems

Fall. 3 credits. Prerequisites: COM S 211 and 312 (or permission of instructor). Recommended: COM S 213 and strong programming skills in C, C++, or Java.

### COM S 433 Practicum in Database Systems

Fall. 2 credits. Corequisite: COM S 432.

### [COM S 444 Distributed Systems and Algorithms

Fall. 4 credits. Pre- or corequisite: COM S 414 or permission of instructor. Not offered every year. Not offered 2000–2001.]

### COM S 472 Foundations of Artificial Intelligence

Fall. 3 credits. Prerequisites: COM S 211 and 280 (or equivalent).

### COM S 473 Practicum in Artificial Intelligence

Fall. 2 credits. Corequisite: COM S 472.

### COM S 478 Machine Learning

Spring. 3 credits. Prerequisites: COM S 211, 280, and 312.

### COM S 481 Introduction to Theory of Computing

Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481. A faster-moving and deeper version of COM S 381. Corrective transfers between COM S 481 and 381 (in either direction) are encouraged during the first few weeks of instruction.

### COM S 482 Introduction to Analysis of Algorithms

Spring, summer. 4 credits. Prerequisites: COM S 211, 280, 312, and either 381 or 481, or permission of instructor.

**COM S 483 Quantum Information Processing (also PHYS 481, 681)**  
Fall. 2 credits. Prerequisite: familiarity with the theory of vector spaces over the complex numbers.

**COM S 486 Applied Logic (also MATH 486)**  
Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.

**COM S 490 Independent Reading and Research**  
Fall, spring. 1-4 credits.

**COM S 501 Software Engineering**  
Fall. 4 credits. Prerequisite: COM S 211 or 410 and experience programming in Java or C++.

**COM S 502 Computing Methods for Digital Libraries**  
Spring. 3 credits. Prerequisite: COM S 211 or 410 and some familiarity with the technology of web sites.

**COM S 504 Applied Systems Engineering I (also CEE 504, ELE E 512, MAE 591, ORIE 512)**  
Fall. 3 credits. Prerequisite: permission of instructor.

**COM S 505 Applied Systems Engineering II (also CEE 505, ELE E 513, MAE 592, ORIE 513)**  
Spring. 3 credits. Prerequisite: Applied Systems Engineering I.

**COM S 513 System Security**  
Spring. 4 credits. Prerequisites: COM S 414 or 519 and familiarity with JAVA programming language.

**COM S 514 Intermediate Computer Systems**  
Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.

**COM S 515 Practicum in Systems**  
Fall or spring. 1-2 credits. Corequisite: COM S 514.

**COM S 519 Engineering Computer Networks**  
Fall. 4 credits. Prerequisites: COM S 314 or permission of instructor. Not offered every year.

**COM S 522 Computational Tools and Methods for Finance**  
Spring. 4 credits. Prerequisites: programming experience (e.g. C FORTRAN, or MATLAB) and some knowledge of numerical methods, especially numerical linear algebra. Not offered every year.

**COM S 574 Heuristic Methods for Optimization (also CEE 509)**  
Spring. 3 or 4 credits. Prerequisite: COM S/ENGRD 211 or 222 or CEE/ENGRD 241, or graduate standing, or permission of instructor.

**COM S 601 System Concepts**  
Fall. 3 credits. Prerequisite: open to students enrolled in the COM S Ph.D. program.

**COM S 611 Advanced Programming Languages**  
Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

**COM S 612 Compiler Design for High-Performance Architectures**  
Spring. 4 credits. Prerequisites: COM S 314 and 412 or permission of instructor.

**COM S 613 Concurrent Programming**  
Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; semester TBA.

**COM S 614 Advanced Systems**  
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

**[COM S 618 Principles of Distributed Computing—Message Passing]**  
Fall. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in even-numbered years. Not offered fall 2000.]

**[COM S 619 Principles of Distributed Computing—Shared Memory]**  
Fall. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in odd-numbered years.]

**COM S 621 Matrix Computations**  
Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

**COM S 622 Numerical Optimization and Nonlinear Algebraic Equations**  
Spring. 4 credits. Prerequisite: COM S 621. Offered in odd-numbered years.

**[COM S 624 Numerical Solution of Differential Equations]**  
Spring. 4 credits. Prerequisite: previous exposure to numerical analysis (e.g. COM S 421 or 621) to differential equations, and knowledge of MATLAB. Offered in even-numbered years.]

**COM S 626 Computational Molecular Biology**  
Spring. 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations and nonlinear optimization methods.

**COM S 632 Advanced Database Systems**  
Spring. 4 credits. Prerequisite: COM S 432/433 or permission of instructor.

**COM S 664 Machine Vision**  
Spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and MATH 221 or equivalent.

**COM S 671 Introduction to Automated Reasoning**  
Fall. 4 credits. Prerequisite: COM S 611 and graduate standing or permission of instructor.

**COM S 672 Advanced Artificial Intelligence**  
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor.

**COM S 674 Natural Language Processing**  
Spring. 3 credits. Prerequisites: COM S 472 or permission of instructor. Not offered every year; semester TBA.

**COM S 676 Reasoning about Knowledge**  
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in even-numbered years. Not offered every year.

**[COM S 677 Reasoning about Uncertainty]**  
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in odd-numbered years.]

**COM S 681 Analysis of Algorithms**  
Fall. 4 credits. Prerequisite: (COM S 381 or 481, and graduate standing) or permission of instructor.

**COM S 682 Theory of Computing**  
Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681) or permission of instructor.

**COM S 686 Logics of Programs**  
Spring. 4 credits. Prerequisites: COM S 481, 682, and (MATH 481 or MATH/COM S 486).

**COM S 709 Computer Science Colloquium**  
Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

**COM S 713 Seminar in Systems and Methodology**  
Fall, spring. 4 credits. Prerequisites: a graduate course employing formal reasoning, such as COM S 611, 613, 671, a logic course, or permission of instructor. Not offered every year; semester TBA.

**COM S 715 Seminar in Programming Refinement Logics**  
Fall, spring. 4 credits. Prerequisite: permission of instructor.

**COM S 717 Topics in Parallel Architectures**  
Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester TBA.

**COM S 719 Seminar in Programming Languages**  
Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

**COM S 722 Topics in Numerical Analysis**  
Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not offered every year; semester TBA.

**COM S 729 Seminar in Numerical Analysis**  
Fall, spring. 1-4 credits (TBA). Prerequisite: permission of instructor. S-U grades only.

**COM S 754 Systems Research Seminar**  
Fall, spring. 1 credit. S-U grades only.

**COM S 772 Seminar in Artificial Intelligence**  
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

**COM S 773/774 Proseminar in Cognitive Studies I & II (also COGST, PHIL, LING, and PSYCH 773/774)**  
Fall, 773; spring, 774. 4 credits.

**COM S 775 Seminar in Natural Language Understanding**  
Fall, spring. 2 credits.

**COM S 789 Seminar in Theory of Algorithms and Computing**  
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

**COM S 790 Special Investigations in Computer Science**

Fall, spring. Prerequisite: permission of a computer science adviser. Letter grade only. Independent research or Master of Engineering project.

**COM S 890 Special Investigations in Computer Science**

Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Master of Science degree research.

**COM S 990 Special Investigations in Computer Science**

Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

**EARTH AND ATMOSPHERIC SCIENCES**

B. L. Isacks, chair; S. J. Riha, associate chair; directors of undergraduate studies: K. H. Cook (science of earth systems), R. W. Kay (geological sciences), and D. S. Wilks (atmospheric science); R. W. Allmendinger; W. D. Allmon, M. Barazangi, J. M. Bird, L. D. Brown, L. M. Cathles, J. L. Cisne, S. J. Colucci, L. A. Derry, C. H. Greene, T. E. Jordan, S. Mahlburg Kay, M. C. Kelley, F. H. T. Rhodes, D. L. Turcotte, W. M. White, M. W. Wysocki

The new Department of Earth and Atmospheric Sciences joins faculty in the geological sciences with faculty in atmospheric sciences to cover the breadth of modern earth sciences. We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policymakers and ordinary citizens.

The new department is the home department for three majors: geological sciences, atmospheric sciences, and science of earth systems (SES). Geological sciences emphasizes the solid earth and its history, atmospheric sciences emphasizes basic understanding of modern climate and weather, while the science of earth systems major covers the new disciplines which study the interactions among rock, water, air, and life in our planet's operation. The geological sciences and SES majors are available for students in the

College of Arts and Sciences. The geological sciences major is described below, and the SES major is described in the section, "Special Programs and Interdisciplinary Studies." Atmospheric sciences has been proposed as a new major in the College of Arts and Sciences. If approved, the new major would commence during 2000–2001. The goal is to have the breadth of earth sciences available to students in the Colleges of Arts and Sciences, Engineering, and Agriculture and Life Sciences. The community of majors in these inter-collegiate programs share a common interest in a rigorous scientific understanding of how our planet works.

For the latest information about these programs, please consult our web site at [www.geo.cornell.edu/](http://www.geo.cornell.edu/).

**The Geological Sciences Major**

The geological sciences major reveals Earth's turbulent history from the formation of our solar system to the plate tectonic cycles that dominate Earth's present behavior. That history is highlighted by the co-evolution of life and the Earth system, a dramatic story that starts with the origin of life in our sun's planetary system and leads to the modern interglacial phase of our planet's latest ice age during which our species has emerged to play a major role in the planetary system. Topics of study also include the fundamental processes responsible for the concentration of mineral and energy resources that have enabled our technological evolution, and include natural hazards such as earthquakes, volcanic eruptions, floods, and landslides which pose dangers to our increasingly vulnerable cities and infrastructure.

The geological sciences major prepares students in geology, geophysics, geochemistry, and geobiology for careers in mineral and petroleum exploration, environmental geology, and academic and government research enterprises. Many of these career tracks involve graduate study, for which the major is excellent preparation. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K–12 education.

In addition to course work, students learn by outdoor fieldwork and involvement in the vigorous research programs of the department. Facilities include equipment for processing seismic signals and satellite images of the Earth's surface using extensive libraries of earthquake records, satellite images, and exploration seismic records, and instruments for highly precise chemical and physical analyses of earth materials, including instruments of the Cornell Center for Material Research, Ward Laboratory and the Cornell High Energy Synchrotron Source (CHESS). Undergraduates have served as field assistants for faculty members and graduate students in Argentina, Mexico, British Columbia, the Aleutian Islands and southeastern Alaska, Scotland, Switzerland, Tibet, and the Barbados. Undergraduates are encouraged to participate in research activities, frequently as paid assistants.

For admission to the geological sciences major, a student should have made substantial progress toward completing the following basic science requirements for the major: MATH 111–112 or MATH 191–192, PHYS 207–208 or PHYS 112–113, CHEM 207 or 211. Freshmen and sophomores should take an

introductory EAS course (or courses), normally EAS 101 or EAS 201, or EAS 102 or EAS 104. Juniors with a strong foundation in mathematics and science may be accepted into the major without an introductory course. Majors take EAS 210, the five 300-level core courses listed below, six credits of additional course work from earth and atmospheric sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or biological science or an intermediate-level course in biological science, mathematics, chemistry, or physics. In addition, a requirement for an advanced outdoor field experience may be met by completing one of the following four-credit options: (a) EAS 417 (Field Mapping in Argentina, 3 credits) and EAS 491 or 492 (based on field observations) for a combined four-credit minimum; (b) EAS 437 (Geophysical Field Methods, 3 credits) plus at least one credit of EAS 491 or 492 using geophysical techniques from EAS 437; (c) EAS 491–492 (Undergraduate Research, 2 credits each) with a significant component of field work; or (d) an approved outdoor field course taught by another college or university (4-credit minimum).

**Core Courses**

- EAS 326 Structural Geology
- EAS 355 Mineralogy
- EAS 356 Petrology and Geochemistry
- EAS 375 Sedimentology and Stratigraphy
- EAS 388 Geophysics and Geotectonics

Prospective majors should contact R. W. Kay as early as possible for advice in planning a program. Students majoring in geological sciences may attend the departmental seminars and take advantage of cruises, field trips, and conferences offered through the Department of Earth and Atmospheric Sciences.

Courses offered at the 100 and 200 level are open to all students. Certain 300- and 400-level courses in earth and atmospheric sciences may be of particular interest to students of chemistry, biology, and physics. Students are encouraged to inquire about courses that interest them at the department office in 2122 Snee Hall.

**Honors.** An honors program is offered by the Department of Earth and Atmospheric Sciences for superior students. Candidates for honors must maintain an overall 3.0 grade-point average, a cumulative average of 3.5 in the major, and complete an honors thesis (EAS 491 or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year.

**Courses****EAS 101 Introductory Geological Sciences**

Fall, spring, or summer. 3 credits. Fall, A. Moore; spring, J. M. Bird; summer, W. Brice.

Designed to enhance an appreciation of the physical world. Emphasizes natural environments, surface temperatures, and dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (earth system science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

**EAS 102 Evolution of the Earth and Life (also BIO G 170)**

Spring. 3 credits. J. L. Cisne.

Earth systems and their evolution. Earth history's astronomical context. Plate tectonics, continental drift, and their implications for climate and life. Co-evolution of life and the atmosphere. Precedents for ongoing global change. Dinosaurs, mass extinctions, and human ancestry. Laboratories on reconstructing geological history and mapping ancient geography. Fossil collecting on field trips.

**EAS 104 The Sea: An Introduction to Oceanography (also BIO ES 154)**

Spring, summer. 3-4 credits (4 credits with lab section). Spring: C. H. Greene, W. M. White; summer: J. Chiment.

A survey of the physics, chemistry, geology, and biology of the oceans for both science and nonscience majors. Topics include: sea-floor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.

**EAS 105 Writing on Rocks (Freshman Seminar)**

Fall. 3 credits. J. Chiment.

See Freshman Seminar Handbook for description.

**EAS 106 Vertebrate Fossil Preparation**

Spring. 1 credit. Prerequisite: 1 introductory geology course or concurrent enrollment, class size is limited. J. Chiment.

A laboratory-oriented course that will expose students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix will be covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques will be discussed.

The class will meet for one hour each week for the first six weeks of the semester. Students will be assigned to an individual or group project requiring two hours of participation each week for the remainder of the semester.

**EAS 107 How the Earth Works**

Fall. 1 credit. J. L. Cisne.

A user-friendly introduction to the workings and interactions of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

**EAS 109 Dinosaurs**

Fall. 1 credit. J. L. Cisne.

An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

**EAS 111 To Know the Earth and Build a Habitable Planet**

Fall. 3 credits. J. M. Bird.

Acquaints the nonscientist with Earth. Major features and how Earth has evolved. Earth system science and building a habitable planet. Effects of human activity on geologic environments, mitigating environment damage, living with natural hazards. Mineral resource use in the twenty-first century and an environmentally sound fuel-minerals cycle.

**EAS 122 Earthquake! (also ENGR 122)**

Fall. 3 credits. L. D. Brown.

The science of natural hazards and strategic resources is explored. Techniques for locating and characterizing earthquakes and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic minerals; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

**EAS 200 Art, Archaeology, and Analysis (also ARKEO 285, ARTH 200, ENGR 185, PHYS 200)**

Spring. 3 credits. R. W. Kay.

An interdepartmental course on the use of techniques of science and engineering in cultural research. Applications of physical and physiological principles to the study of archaeological artifacts and works of art. Historical and technical aspects of artistic creation. Analyses by modern methods to deduce geographic origins and for exploration, dating, and authentication of cultural objects. Does not meet liberal studies distribution requirement for engineering.

**EAS 201 Introduction to the Physics and Chemistry of the Earth (also ENGRD 201)**

Fall. 3 credits. Prerequisites: PHYS 112 or 207. L. M. Cathles.

Formation of the solar system: accretion and evolution of the earth. The rock cycle: radioactive isotopes and the geological time scale, plate tectonics, rock and minerals, earth dynamics, mantle plumes. The hydrologic cycle: runoff, floods and sedimentation, groundwater flow, and contaminant transport. Weathering cycle: chemical cycles, CO<sub>2</sub> (weathering), rock cycle, controls on global temperature (CO<sub>2</sub> or ocean currents), oil, and mineral resources.

**[EAS 203 Natural Hazards and the Science of Complexity]**

Fall. 3 credits. Prerequisites: 1 calculus course. Not offered 2000-2001.

D. L. Turcotte.

Studies of natural hazards; earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards: fractals, chaos, and self-organized criticality.]

**EAS 204 Ocean Sciences Laboratory**

Spring. 3 credits. Prerequisite or corequisite: BIO ES 154/EAS 104.

C. H. Greene, B. W. Monger.

A laboratory course investigating the physics, chemistry, geology, and biology of the oceans. This course is intended for science majors to supplement the material covered in BIO ES 154/EAS 104. The course includes a discussion session and laboratory each week.

**EAS 210 Introduction to Field Methods in Geological Sciences**

Fall. 3 credits. 1 lecture, Saturday field trips. Prerequisites: GEOL 101 (or 201) or permission of instructor. S. Mahlburg Kay (255-4701, smk16@cornell.edu).

The methods by which rocks are used as a geological database. Field methods used in the construction of geological maps and cross sections; systematic description of stratigraphic sections. Field and laboratory sessions on Saturdays until Thanksgiving. One additional lecture during most of these weeks. One weekend field trip to eastern New York.

**EAS 212 Caribbean Field Trip**

Spring. 2 credits. Prerequisite: permission of instructor. Enrollment limited to 15.

Approximate cost \$1,100. L. D. Brown.

A multidisciplinary look at earth science and environmental issues represented in the Yucatan Peninsula of Mexico. Base for operations will be the Centro Ecologico Akumal, located on the Caribbean coast south of Cancun. This coast and its associated reef epitomizes the conflict between ecological preservation and economic development on an international scale. Excursions may include visits to Merida, a historic Spanish town which lies above the buried impact structure that many believe resulted in the death of the dinosaurs; ruins at Chichen Itza, Mayapan, Coba, and Tulum associated with the rise and fall of Mayan culture; and wildlife (monkeys, jaguars, crocodiles) preserves where recent geological studies have found evidence that the fall of the Mayans may have been triggered by climate change. The field trip will feature snorkel tours of reefs and lagoons as well as the cenotes (sinkholes) that characterize this classic karst landscape. Weekly lectures during the semester will provide background; field trip scheduled for January.

**EAS 213 Marine and Coastal Geology**

Summer. 2 credits. Prerequisite: an introductory course in geology or permission of instructor. Staff.

A special one-week course offered at Cornell's Shoals Marine Laboratory (SML) on an island near Portsmouth, New Hampshire. For more details and an application, consult the SML office, G14 Stimson Hall. Estimated cost for 2001 (including tuition, room, board, and ferry transportation) is \$1,100.

**EAS 260 Soil Science (also CSS 260)**

Fall. 4 credits. S-U grades optional.

S. J. Riha.

Designed for students interested in a comprehensive introduction to soil science from both an environmental and plant management perspective, this course is divided into three units. A unit on soil information introduces students to soil characterization, testing, mapping, classification, GIS, and land evaluation. A soil management unit addresses fertility, pest management, water, and microclimate, as well as erosion, conservation, pollution, and soil health. The unit on the role of soils in ecosystems considers topics such as biodiversity, soils as sinks and sources of greenhouse gases, and the impact of soils on land use. Labs will initially be field-oriented with an emphasis on learning practical skills needed to evaluate and manage soils. Subsequent labs will focus on accessing, interpreting, and applying soil information.

**EAS 296 Forecast Competition**

Fall and spring. 1 credit. S-U grades only.

Prerequisites: sophomore undergraduate standing in atmospheric science or permission of instructor. D. S. Wilks.

This two-semester course provides daily exercise in probabilistic weather forecasting, in which students compete to forecast local weather most skillfully. Enroll for two consecutive semesters, with credit awarded after the second semester. May be repeated for credit.

**EAS 302 Evolution of the Earth System (also SES 302)**

Spring. 4 credits. Prerequisites: MATH 112 or 192 and CHEM 207 or equivalent.

B. L. Isacks and staff.

Co-evolution of life and the earth system: Earth's early history; plate tectonics, continental drift, and climate changes during the past billion years; mountain building, ice ages, and our own emergence during the past ten million years. Introduction to methods of interpreting information preserved in the rock record.

**EAS 315 Geomorphology**

Fall. 4 credits. Prerequisite: 1 of the following: a 3-credit EAS or SES course, or EAS 260. T. E. Jordan and B. L. Isacks.

A study of the processes that sculpt the Earth's landscapes (above and below sea level) and the nature of those landforms. Landforms constructed by Earth's internal processes are the point of departure as we examine their modification by physical interaction with the atmosphere and oceans. Also treated are depositional landforms that are generated by accumulations of grains or sediment. Laboratory exercises include both field examination of landforms of the Finger Lakes area and computer analysis of satellite images and Digital Elevation Models of examples from around the globe. Two Saturday field trips.

**EAS 321 Introduction to Biogeochemistry (also SES 321, NTRES 321)**

Fall. 4 credits. Prerequisites: CHEM 207, MATH 112, plus a course in biology and/or geology. L. A. Derry, J. Yavitt.

Control and function of the Earth's global biogeochemical cycles. The course begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biogeochemical cycling of carbon, nutrients, and metals that take place in soil, sediments, rivers, and the oceans. Topics include weathering, acid-base chemistry, biological redox processes, nutrient cycling, trace gas fluxes, bio-active metals, the use of isotopic tracers, and mathematical models. Interactions between global biogeochemical cycles and other components of the Earth system are discussed.

**EAS 326 Structural Geology**

Spring. 4 credits. Prerequisite: MATH 112, EAS 101 or 201, or permission of instructor. R. W. Allmendinger.

Nature and origin of deformed rocks at microscopic to macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, minor structures, faulting, folding, and structural families.

**EAS 331 Climate Dynamics (also ASTRO 331)**

Fall. 4 credits. Prerequisites: MATH 112 or 192 or equivalent. Lects, M W F 1:25–2:25; disc, W 2:30. K. H. Cook, P. J. Gierasch.

Processes that determine climate and contribute to its change are discussed, including atmospheric radiation, ocean circulation, and atmospheric dynamics. Contemporary climate change issues are investigated and discussed in the context of natural variability of the system.

**[EAS 334 Microclimatology]**

Spring. 3 credits. Prerequisite: a course in physics. Offered alternate years. Not offered 2000–2001. D. S. Wilks.

The relationships of radiant energy, temperature, wind, and moisture in the atmosphere near the ground. The interplay between physical processes of the atmosphere, plant canopies, and soil is examined with emphasis on the energy balance.

**EAS 341 Atmospheric Thermodynamics and Hydrostatics**

Fall. 3 credits. Prerequisites: 1 year of calculus and 1 semester of physics. W. W. Knapp.

Introduction to the thermodynamics and hydrostatics of the atmosphere and to the methods of description and quantitative analysis used in meteorology. Topics covered include thermodynamic processes of dry air, water vapor, and moist air and concepts of hydrostatics and stability.

**EAS 342 Atmospheric Dynamics**

Spring. 3 credits. Prerequisites: 1 year each of calculus and physics. K. H. Cook.

Introduction to atmospheric dynamics and to the methods of description and quantitative analysis used in meteorology. Topics considered include equations of atmospheric motion, motion in the free atmosphere, vertical variations of wind and pressure fields, mathematical representation and characteristics of fronts, mechanisms of pressure change, concepts of circulation and vorticity, and effects of friction on atmospheric motion.

**EAS 355 Mineralogy**

Fall. 4 credits. Prerequisites: EAS 101 or 201 and CHEM 207 or permission of instructor. S. Mahlburg Kay.

Examination of minerals by hand-specimen properties and optical microscopy. Geological setting, classification, crystal structures, phase relations, chemical properties, and physical properties of minerals. X-ray diffraction is introduced. Independent research project.

**EAS 356 Petrology and Geochemistry**

Spring. 4 credits. Prerequisite: EAS 355. R. W. Kay.

Principles of phase equilibrium as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

**EAS 375 Sedimentology and Stratigraphy**

Fall. 4 credits. Prerequisite: EAS 101 or 201. J. L. Cisne.

Formation of sedimentary rocks. Depositional processes and environments. Correlation of strata in relation to time and environment. Petrology of sandstone and limestone. Geological age determination. Reconstruction of paleogeography and interpretation of earth history from stratigraphic evidence. Organization of strata in stratigraphic sequences.

**EAS 388 Geophysics and Geotectonics**

Spring. 4 credits. Prerequisites: MATH 192 (or 112) and PHYS 208 or 213. B. L. Isacks.

Global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth's gravitational and magnetic fields, and heat flow.

**[EAS 411 Satellite Remote Sensing in Geosciences]**

Fall. 3 credits. Prerequisite: permission of instructor. Not offered in 2000–2001.

B. L. Isacks.

Instruction in satellite remote sensing, image processing, geographic information systems (GIS), and analysis of digital elevation models, using advanced computer workstations, via participation in current research on earthquakes, glaciers, and tectonics.

**EAS 417 Field Mapping in Argentina**

Summer. 3 credits. Prerequisites: EAS 210 and 326; Spanish desirable, but not required. S. Mahlburg Kay.

Modern techniques of geological mapping applied in the region of San Juan, Argentina, including folded and faulted sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampean Ranges (Pie de Palo), and shallow-level silicic intrusives (Cerro Blanco-Ullun).

**[EAS 423 Petroleum Geology]**

Fall. 3 credits. Recommended: EAS 326. Offered alternate years. Not offered in 2000–2001.

Introduction to hydrocarbon exploration and development. Exploration techniques, including well logs, fluid pressures, seismic-reflection methods, gravity, and magnetic measurements to map subsurface structures and stratigraphy. Petroleum origin and migration. Dispersal systems and depositional patterns of petroleum reservoirs. Economics of exploration, leasing, drilling, and production. Estimates of petroleum reserves, including tar sands and oil shales.

**[EAS 434 Reflection Seismology]**

Spring. 4 credits. Prerequisites: MATH 192 and PHY 208, 213, or equivalent. Not offered in 2000–2001. L. D. Brown.

Fundamentals of subsurface imaging by multichannel seismic reflection techniques as used in oil exploration and geohydrological investigations. Covers survey design, acquisition, analysis, processing, and interpretation in both 2-D and 3-D. Includes discussion of related techniques such as seismic refraction analysis, tomographic inversion, vertical seismic profiling, shear wave exploration, and ground penetrating radar. Lab is keyed to state-of-the-art seismic processing, modeling and interpretation software from LandMark.

**EAS 435 Statistical Methods in Meteorology**

Fall. 3 credits. Prerequisites: an introductory course in statistics (e.g., BTRY 215 or ARME 210) and calculus. D. S. Wilks.

Statistical methods used in climatology, operational weather forecasting, and selected meteorological research applications. Some statistical characteristics of meteorological data, including probability distributions and correlation structures. Operational forecasts derived from multiple regression models, including the MOS system. Forecast verification techniques and scoring rules. Time series analysis, EOFs, and other research topics as time permits.

**EAS 437 Geophysical Field Methods**

Fall. 3 credits. Prerequisite: PHYS 213 or 208, or permission of instructor. L. D. Brown.

Introduction to field methods of geophysical exploration, especially as applied to environ-

mental issues. Emphasis on seismic, ground penetrating radar, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester are analyzed and interpreted. A field companion to EAS 436, which is recommended but not required prior to this course.

**[EAS 444 Tropical Meteorology]**

Spring. 3 credits. Prerequisite: EAS 342 or instructor's approval. Offered alternate years. Not offered in 2000-2001.  
K. H. Cook.

Structure and dynamics of the tropical atmosphere on a wide range of time and space scales ranging from meso-scale convective systems to planetary waves. Topics include hurricanes, monsoonal circulation, and El Niño.]

**EAS 445 Hydrology and the Environment (also ABEN 471 and CEE 431)**

Fall. 3 credits. Prerequisites: MATH 294 and ENGR 202. W. Brutsaert, L. M. Cathles, J.-Y. Parlange, T. S. Steenhuis.

Intermediate-level study of aquifer geology, groundwater flow, and related design factors. Includes description and properties of natural aquifers, groundwater hydraulics, soil water, and solute transport.

**[EAS 447 Physical Meteorology]**

Fall. 3 credits. Prerequisites: 1 year each of calculus and physics. Offered alternate years. Not offered 2000-2001.  
W. W. Knapp.

Primarily a survey of natural phenomena of the atmosphere, with emphasis on their underlying physical principles. Topics include composition and structure of the atmosphere, atmospheric optics, acoustics and electricity, solar and terrestrial radiation, and principles of radar probing of the atmosphere.]

**EAS 451 Synoptic Meteorology II**

Fall. 3 credits. Prerequisites: EAS 341 and 342. S. J. Colucci.

Structure and dynamics of large-scale, mid-latitude weather systems, such as cyclones, anticyclones, and waves, with consideration of processes that contribute to temperature changes and precipitation. Laboratory sessions involve real-time weather forecasting and the computer application of a numerical model of the atmosphere to study selected large-scale, mid-latitude weather events.

**EAS 453 Advanced Petrology**

Fall. 3 credits. Prerequisite: EAS 356. Offered alternate years. R. W. Kay.

Magma and metamorphism in the context of plate tectonics. Major and trace element chemistry and phase petrology as monitors of the creation and modification of igneous rocks. Temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic rocks. Application of experimental studies to natural systems.

**EAS 454 Advanced Mineralogy**

Spring. 3 credits. Prerequisite: EAS 355 or permission of instructor. Offered alternate years. W. A. Bassett.

Crystallography and crystal chemistry of minerals and the methods of their study. X-ray diffraction, optical methods, computer simulation of crystal structures. Emphasis on effects of high pressures and temperatures with implications for understanding the Earth's interior.

**[EAS 455 Geochemistry]**

Fall. 4 credits. Prerequisites: CHEM 207 and MATH 192 or equivalent. Recommended: EAS 356. Offered alternate years. Not offered 2000-2001. W. M. White.

The Earth from a chemical perspective. Formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and solar system; trace-element geochemistry; isotope geochemistry; geochemical thermodynamics and kinetics; chemical evolution of the crust, mantle, and core; weathering and the chemistry of natural waters; chemistry of rivers and the oceans; hydrothermal systems and ore deposition.]

**[EAS 456 Mesoscale Meteorology]**

Spring. 3 credits. Prerequisites: EAS 341 and 342 or permission of instructor. Offered alternate years. Not offered 2000-2001. S. J. Colucci.

Structure and dynamics of mid-latitude mesoscale weather systems such as fronts, jets, squall lines, convective complexes, precipitation bands, downslope windstorms, mountain breezes, sea breeze circulations, and lake effect snowstorms.]

**EAS 458 Volcanology**

Spring. 3 credits. Corequisite: EAS 356 or equivalent. Offered alternate years.  
R. W. Kay and W. M. White.

Causes of volcanism, melting in the Earth, and the origin of magmas. Physical volcanology, nature and types of volcanic eruptions and associated deposits, eruption mechanisms. Volcanic plumbing systems, magma chamber processes, evolution of magma. Volcanism and impact phenomena in the solar system. Volcanic hazard assessment and volcano monitoring. Ore deposits associated with volcanism.

**EAS 462 Marine Ecological Processes (also BIOES 462)**

Spring. 3 credits. Limited to 75 students. Prerequisite: BIOES 261. Offered alternate years. C. D. Harvell, C. H. Greene.

Lectures and discussion focus on current research in broad areas of marine ecology with an emphasis on processes unique to marine systems. A synthetic treatment of multiple levels of organization in marine systems including organismal, population, community, ecosystems, and evolutionary biology. Examples are drawn from all types of marine habitats including polar seas, temperate coastal waters, and tropical coral reefs.

**EAS 475 Special Topics in Oceanography**

Spring, summer. 2-5 var. credits. Prerequisites: EAS 104 or BIO ES 154, and permission of instructor. C. H. Greene.

Undergraduate instruction and participation in advanced areas of oceanographic research. Topics will change from term to term. Contact instructor for further information.

**EAS 476 Sedimentary Basins: Tectonics and Mechanics**

Fall. 3 credits. Prerequisite: EAS 375 or permission of instructor. T. E. Jordan.

Subsidence of sedimentary basins from the point of view of plate tectonics and geomechanics. Interactions of subsidence, sediment supply, and environmental characteristics in development of stratigraphic sequences. Stratigraphic characteristics of active-margin, passive-margin, and cratonic basins. Geophysical and stratigraphic

modeling; sequence stratigraphy. Modern and ancient examples.

**[EAS 478 Advanced Stratigraphy]**

Fall. 3 credits. Prerequisite: EAS 375 or permission of instructor. Offered alternate years. Not offered 2000-2001. T. E. Jordan. Modern improvements on traditional methods of the study of ages and genetic relations among sedimentary rocks, emphasizing 3-D relationships. Techniques and applications of sequence stratigraphy at scales ranging from beds to entire basins. Physical correlation, dating techniques, and time resolution in sedimentary rocks. Physical controls on the stratigraphic record. Numerical modeling.]

**EAS 479 Paleobiology (also BIOES 479)**

Fall. 4 credits. Prerequisites: 1 year of introductory biology for majors and either BIOES 274, 373, EAS 375, or permission of instructor. W. Allmon.

A survey of the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of earth and atmospheric sciences students concerning the nature and significance of the fossil record for their respective studies.

**EAS 481 Senior Survey of Earth Systems**

Fall. 3 credits. Limited to seniors majoring in geological science. J. M. Bird.

Survey course that integrates undergraduate course work, intended to enhance overall understanding of geological sciences. Emphasis on current models of earth's dynamic systems (e.g., global climate change; mantle evolution). Guest lecturers; synthesis and review literature; scientific literature readings; discussions; student presentations.

**EAS 483 Environmental Biophysics (also CSS 483)**

Spring. 3 credits. Prerequisites: EAS/CSS 260 or equivalent, or permission of instructor. Offered alternate years.  
S. J. Riha.

Introduction to basic principles of energy and mass transfer and storage in soil-plant systems. Energy budgets, soil heat flow, water movement in saturated and unsaturated soils, evapotranspiration, water, gas, and nutrient dynamics in the soil-plant-atmosphere continuum will be covered. Applications to agronomic and environmental problems and instrument design and use are considered through discussion and problem sets.

**EAS 491-492 Undergraduate Research**

Fall, spring. 1-4 credits. Staff. (R. W. Kay, coordinator.)

Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current staff research projects. Topics chosen in consultation with, and guided by, a staff member. A short written report is required, and outstanding projects are prepared for publication.

**EAS 496 Internship experience**

Fall or spring. 1-2 credits. S-U grades only.

**EAS 497 Individual Study in Atmospheric Science**

Fall or spring. 1-6 credits. S-U grades optional. Students must register with an Independent Study form.

Topics are arranged at the beginning of the term for individual study or for group discussions.

**EAS 498 Teaching Experience in Atmospheric Science**

Fall or spring. 1–5 credits. S-U grades optional. Students must register with an Independent Study form.

Teaching experience is obtained by assisting in the instruction of an atmospheric science course.

**EAS 499 Undergraduate Research in Atmospheric Science**

Fall or spring. Credit by arrangement. Students must register with an Independent Study form.

Independent research on current problems in atmospheric science.

**EAS 500 Design Project in Geohydrology**

Fall, spring. 3–12 credits. An alternative to an industrial project for M.Eng. students choosing the geohydrology option. May continue over 2 or more semesters. L. M. Cathles.

The project may address one of the many aspects of groundwater flow and contamination and must involve a significant geological component and lead to concrete recommendations or conclusions of an engineering nature. Results are presented orally and in a professional report.

**EAS 502 Case Histories in Groundwater Analysis**

Spring. 4 credits. L. M. Cathles.

Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, is analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working as an engineering analysis team. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at the end of term.

**[EAS 622 Advanced Structural Geology I]**

Spring. 3 credits. Prerequisites: EAS 326 and permission of instructor. Offered alternate years. Not offered 2000–2001. R. W. Allmendinger.

Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis; pressure solution and cleavage development; and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittle-ductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.]

**EAS 624 Advanced Structural Geology II**

Spring. 3 credits. Prerequisites: EAS 326 and permission of instructor. Offered alternate years. R. W. Allmendinger.

Geometry, kinematics, and mechanics of structural provinces. Concentration on thrust belts, rift provinces, or strike-slip provinces. Techniques of balanced cross sections.

**EAS 628 Geology of Orogenic Belts**

Spring. 3 credits. Prerequisite: permission of instructor. J. M. Bird.

A seminar course in which students study specific geologic topics of an orogenic belt selected for study during the term. The course is intended to complement EAS 681.

**[EAS 634 Advanced Geophysics I: Fractals and Chaos in Geology and Geophysics]**

Spring. 3 credits. Prerequisite: EAS 388 or permission of instructor. Offered alternate years. Not offered 2000–2001. D. L. Turcotte.

Definitions of fractal sets and statistical fractals, scale invariance, self-affine fractals, multifractals, applications to fragmentation, seismicity and tectonics, petroleum distribution and reserves, ore grade and tonnage, drainage networks and landforms, and floods and droughts. Definitions of chaos and self-organized criticality, renormalization groups, diffusion limited aggregation and percolation clusters, wavelet transforms, applications to mantle convection, the earth's dynamo, and distributed seismicity.]

**EAS 635 Advanced Statistical Meteorology**

Fall. 3 credits. Prerequisites: coursework in or elementary knowledge of statistics, calculus, matrix algebra, and computer programming. D. S. Wilks.

Lectures and topics concurrent with EAS 435, plus an extra 40-minute session per week in which selected topics from EAS 435 are treated in more depth and additional topics are covered which may vary from year to year according to student interest. Term project required. Not open to students who have taken EAS 435 for credit.

**EAS 636 Advanced Geophysics II: Quantitative Geodynamics**

Spring. 3 credits. Prerequisite: EAS 388 or permission of instructor. Offered alternate years. D. L. Turcotte.

Stress and strain in the earth, elasticity and flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, chemical geodynamics, flow in porous media.

**EAS 641 Analysis of Biogeochemical Systems**

Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years. L. A. Derry.

Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab; applications to current research of participants or from recent literature.

**EAS 651 Advanced Atmospheric Thermodynamics (also ASTRO 651)**

Fall. 3 credits. Prerequisite: a good background in undergraduate calculus and physics is required. Offered alternate years. K. H. Cook, P. J. Gierasch, S. J. Colucci.

A survey of the fundamental physical processes in atmospheres. Topics include thermodynamics of atmospheric gases, moist effects, hydrostatics, convective instability, atmospheric radiation and radiative heating, radiative-convective equilibrium, clouds, cloud microphysics, and precipitation processes. Thermal structure and greenhouse effects on the Earth and other planets will be discussed. The course will be taught at the level of *Fundamentals of Atmospheric Physics* by Salby.

**EAS 652 Advanced Atmospheric Dynamics (also ASTRO 652)**

Spring. 3 credits. Prerequisites: EAS 341 and 342 or permission of instructor. Offered alternate years. S. J. Colucci, K. H. Cook, P. J. Gierasch.

Quasigeostrophic theory, atmospheric waves, hydrodynamic instability, the general circulation of the atmosphere, and topics selected from among numerical weather prediction and tropical, mesoscale, and middle atmosphere processes according to student interest.

**[EAS 656 Isotope Geochemistry]**

Spring. 3 credits. Open to undergraduates. Prerequisite: EAS 455 or permission of instructor. Offered alternate years. Not offered 2000–2001. W. M. White.

Nucleosynthetic processes and the isotopic abundances of the elements. Geochronology and cosmochronology using radioactive decay schemes, including U-Pb, Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as  $^{14}\text{C}$  and  $^{36}\text{Cl}$ . Use of radiogenic and stable isotopes in petrology and their application to study of the evolution of the crust and mantle. Isotopic evidence regarding the formation of the Earth and the solar system. Stable isotopes and their use in geothermometry, ore petrogenesis, paleontology, and the global climate system.]

**[EAS 675 Modeling the Soil-Plant-Atmosphere System (also CSS 675)]**

Spring. 3 credits. Prerequisites: EAS/CSS 483 or equivalent. Offered alternate years. Not offered 2000–2001. S. J. Riha.

Introduction to the structure and use of soil-plant-atmosphere models. Topics covered will include modeling plant physiology, morphology, and development; potential crop production and crop production limited by moisture and nutrient availability; plant-plant competition; and land surface processes as well as model data requirements, validation, and scale. Use of soil-plant-atmosphere models for teaching, research, extension, and policy formation will be discussed.]

**EAS 681 Geotectonics**

Fall. 3 credits. Prerequisite: permission of instructor. J. M. Bird.

Theories of orogeny; ocean and continent evolution. Kinematics of lithosphere plates. Rock-time assemblages of modern oceans and continental margins, and analogs in ancient orogenic belts. Time-space reconstructions of specific regions. Problems of dynamic mechanisms—corollaries and evidence from crustal features.

**EAS 692 Special Topics in Atmospheric Science**

Fall or spring. 1–6 credits, S-U grades optional.

Study of topics in atmospheric science that are more specialized or different from other courses. Special topics to be covered will depend on staff and student interests.

**EAS 695 Computer Methods in Geological Sciences**

Fall, spring. 3 credits. L. Brown, B. L. Isacks.

Independent research projects using state-of-the-art computational resources in the Department of Earth and Atmospheric Sciences. Possibilities include image and seismic processing, seismic and geomechanical modeling, GIS, use of interpretational workshops for 3-D seismic and satellite imagery, modeling fluid flow through complex media.

**EAS 700-799 Seminars and Special Work**

Fall, spring. 1-3 credits. Prerequisite: permission of instructor. Staff.  
Advanced work on original investigations in earth and atmospheric sciences. Topics change from term to term. Contact appropriate professor for more information.

**EAS 722 Advanced Topics in Structural Geology**

R. W. Allmendinger.

**EAS 731 Plate Tectonics and Geology**

J. M. Bird.

**EAS 733 Fractals and Chaos—Independent Studies**

D. L. Turcotte.

**EAS 751 Petrology and Geochemistry**

S. Mählburg Kay, R. W. Kay.

**EAS 753 Advanced Topics in Mineral Physics**

W. A. Bassett.

**EAS 755 Advanced Topics in Petrology and Tectonics**

J. M. Bird, W. A. Bassett.

**EAS 757 Current Research in Petrology**

S. Mählburg Kay, R. W. Kay.

**EAS 762 Advanced Topics in Petroleum Exploration**

Fall. W. B. Travers.

**EAS 771 Advanced Topics in Sedimentology and Stratigraphy**

T. E. Jordan.

**EAS 773 Paleobiology**

J. L. Cisne.

**EAS 775 Advanced Topics in Oceanography**

Spring. C. H. Greene.

**EAS 780 Earthquake Record Reading**

Fall. M. Barazangi.

**EAS 781 Geophysics, Exploration Seismology**

L. D. Brown.

**EAS 783 Advanced Topics in Geophysics**

B. L. Isacks.

**EAS 789 Lithospheric Seismology (COCORP Seminar)**

L. D. Brown.

**EAS 793 Andes-Himalayas Seminar**

S. Mählburg Kay, R. W. Allmendinger, B. L. Isacks, T. E. Jordan.

**EAS 795 Low Temperature Geochemistry**

Spring. L. A. Derry.

**EAS 796 Geochemistry of the Solid Earth**

W. M. White.

**EAS 797 Fluid-Rock Interactions**

L. M. Cathles.

**EAS 799 Soil, Water, and Geology Seminar**

L. M. Cathles, T. S. Steenhuis.

**EAS 850 Master's-Level Thesis Research in Atmospheric Science**

Fall or spring. Credit by arrangement. S-U grades only. Hours by arrangement. Graduate faculty.

Limited to students specifically in the master's program in atmospheric science.

**EAS 950 Graduate-Level Dissertation Research in Atmospheric Science**

Fall or spring. Credit by arrangement. S-U grades optional. Hours by arrangement. Graduate faculty.

Limited to students in the atmospheric science Ph.D. program *only before* the "A" exam has been passed.

**EAS 951 Doctoral-Level Dissertation Research in Atmospheric Science**

Fall or spring. Credit by arrangement. S-U grades optional. Hours by arrangement. Graduate faculty.

Limited to students admitted to candidacy in the atmospheric science Ph.D. program *after* the "A" exam has been passed.

## ECONOMICS

T. Mitra, chair; R. Masson, graduate field representative; T. Lyons, director of undergraduate studies; K. Basu, L. Blume, R. Burkhauser, S. Coate, G. Cozzi, T. E. Davis, D. Easley, R. Ehrenberg, G. Fields, R. Frank, G. Hay, Y. Hong, R. Kanbur, N. Kiefer, P. D. McClelland, M. Majumdar, T. O'Donoghue, S. Ortigueira, U. Possen, R. E. Schuler, K. Shell, G. J. Staller, S. Subramanian, E. Thorbecke, T. Vogelsang, H. Y. Wan, Jr., Y. Wen, J. Wissink. Emeritus: W. Isard, A. Kahn, J. Vanek

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking; international and comparative economics; econometrics; theory; history; growth and development; and the organization, performance, and control of industry.

## Social Science Distribution Requirement

The microeconomics distribution requirement can be fulfilled with any of the following:

Economics 101, Economics 301, or Economics 313.

The macroeconomics distribution requirement can be satisfied with any of the following:

Economics 102, Economics 302, or Economics 314.

## The Major Prerequisites

Economics 101 and 102 and Math 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.

Economics 301 with a grade of C or better substitutes for 101; Economics 302 with a grade of C or better substitutes for 102.

## Requirements

Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major adviser, all with grades of C- or better. (S-U grade option is not allowed.)

These eight courses must include:

- (1) Economics 313 and 314
- (2) Economics 321, or Economics 319 and 320

- (3) at least three courses from the following: 318, 320, 322-99, 467

Economics 301 with a grade of B or better substitutes for both 101 and 313; Economics 302 with a grade of B or better substitutes for both 102 and 314.

If Economics 321 is applied toward the major, neither 319 nor 320 can be applied.

Economics 498 and 499 *cannot* be counted toward the eight-course requirement.

If ECON 313 is applied to the major, ECON 301 cannot be.

If ECON 314 is applied to the major, ECON 302 cannot be.

An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.

Students planning graduate work in economics and business are strongly encouraged to prepare themselves well in mathematics and econometrics. These students are strongly encouraged to enroll in Economics 319-320 rather than Economics 321.

## Courses

**ECON 101 Introductory Microeconomics**

Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.

Explanation and evaluation of how the price system operates in determining what goods are produced, how goods are produced, who receives income, and how the price system is modified and influenced by private organizations and government policy.

**ECON 102 Introductory Macroeconomics**

Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.

Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics discussed may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

**ECON 230 International Trade and Finance**

For description, see ARME 230.

**ECON 301 Microeconomics**

Fall. 4 credits. Prerequisite: calculus.

Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 101 and 313. (Can replace 313 only with grade of B or better.) This course covers the topics taught in Economics 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

**ECON 302 Macroeconomics**

Spring. 4 credits. Prerequisite: Economics 301.

Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 102 and 314. This course covers the topics taught in Economics 102 and 314. (Can replace 314 only with grade of B or better.) An introduction to the theory of national income determination, unemployment, growth, and inflation.

**ECON 307 Introduction to Peace Science (also CRP 495.18)**

Winter session. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.

Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory; conflict management procedures and other analytical tools and methods of peace science; and alternatives to war.

**ECON 313 Intermediate Microeconomic Theory**

Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.

The pricing processes in a private enterprise economy are analyzed under varying competitive conditions, and their role in the allocation of resources and the functional distribution of national income is considered.

**ECON 314 Intermediate Macroeconomic Theory**

Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.

The theory of national income and determination and economic growth in alternative models of the national economy is introduced. The interaction and relation of these models to empirical aggregate economic data is examined.

**[ECON 317 Intermediate Mathematical Economics I]**

Fall. 4 credits. Prerequisites: Economics 101–102 and Math 111–112. Not offered 2000–2001.

Introduction of calculus and matrix algebra; problems of maximization of a function of several variables. Economic examples are used to illustrate and teach the mathematical concepts.]

**[ECON 318 Intermediate Mathematical Economics II]**

Spring. 4 credits. Prerequisites: Economics 101–102 and Math 111–112. Not offered 2000–2001.

Advanced techniques of optimization and application to economic theory.]

**ECON 319 Introduction to Statistics and Probability**

Fall. 4 credits. Prerequisites: Economics 101–102 and Mathematics 111–112.

This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

**ECON 320 Introduction to Econometrics**

Spring. 4 credits. Prerequisites: Economics 101–102, 319, or equivalent.

Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

**ECON 321 Applied Econometrics**

Fall and spring. 4 credits. Prerequisites: Economics 101–102 and calculus.

This course provides an introduction to statistical methods and principles of probability. Topics to be covered include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

**ECON 323 American Economic History #**

Fall. 4 credits. Prerequisites: Economics 101–102 or equivalent.

Problems in American economic history from the first settlements to early industrialization are surveyed.

**ECON 324 American Economic History #**

Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent.

A survey of problems in American economic history from the Civil War to World War I.

**[ECON 324A American Economic History #]**

Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent. Instructor's permission required. Not offered 2000–2001.

Same material as Economics 324, seminar limited to 12 students.]

**ECON 331 Money and Credit**

Fall. 4 credits. Prerequisites: Economics 101–102 and 314.

A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

**ECON 333 Financial Economics**

Spring. 4 credits. Prerequisites: Economics 313 and 314.

The theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets are examined.

**ECON 335 Public Finance: The Microeconomics of Government**

Fall. 4 credits. Prerequisites: Economics 101–102 and 313, or their equivalent, and 1 semester of calculus.

The role of government in a free market economy is analyzed. Topics covered include public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature will vary from term to term.

**ECON 336 Public Finance: Resource Allocation and Fiscal Policy**

Spring. 4 credits. Prerequisites: Economics 101–102, 313 or their equivalent and 1 semester of calculus.

This course covers the revenue side of public finance and special topics. Subjects covered include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

**ECON 341 Labor Economics**

For description, see ILRLE 240.

**ECON 351 Industrial Organization I**

Fall. 4 credits. Prerequisite: Economics 313 or its equivalent.

This course examines markets with only a few firms (i.e., oligopolies), and the primary focus will be the strategic interactions between firms. Topics include static competition in

oligopolies, cartels and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, R&D behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

**ECON 352 Industrial Organization II**

Spring. 4 credits. Prerequisite: Economics 313 or its equivalent.

This course primarily focuses on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a durable good. In addition to pricing decisions, the course will consider topics associated with private information such as adverse selection, signaling, and moral hazard. Numerous theoretical models are presented and empirical results are discussed.

**ECON 361 International Trade Theory and Policy**

Fall. 4 credits. Prerequisites: Economics 101–102 and 313.

This course surveys the sources of comparative advantage. It studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

**ECON 362 International Monetary Theory and Policy**

Spring and summer. 4 credits. Prerequisites: Economics 101–102 and 314.

This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

**ECON 371 Economic Development**

Fall. 4 credits. Prerequisites: Economics 313 or equivalent.

Study of the problem of sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

**ECON 372 Applied Economic Development**

Spring. 4 credits. Prerequisite: Economics 101–102.

This course examines several special topics in the economics of developing countries. Among the topics covered recently are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

**ECON 404 Economics and the Law**

Fall. 4 credits. Prerequisite: Economics 101.

An examination, through the lens of economic analysis, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

**ECON 408 Production Economics and Policy**

For description, see ARME 608.

**ECON 409 Environmental Economics and Policy**

For description, see ARME 451.

**ECON 415 Price Analysis**

For description, see ARME 415.

**[ECON 416 Intertemporal Economics**

Spring. 4 credits. Prerequisites: Economics 313. Not offered 2000-2001.

This course is intended for advanced economics majors who are especially interested in economic theory. Topics to be covered: (1) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (2) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (3) growth, exhaustible resources; pollution and conservation: discussion of the trade-offs facing a society.]

**ECON 417 History of Economic Analysis #**

Fall or spring. 4 credits. Prerequisites: Economics 101-102 or permission of instructor.

Early writings in economics and their relationship to current economic analysis and policy issues, for example, ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Cantillon); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course is Adam Smith's *Wealth of Nations* but the emphasis is on the relationship between the precursors of Adam Smith and his *Wealth of Nations* to modern economics analysis and current efforts to answer some of the questions raised in the early writing on economics.

**[ECON 419 Economic Decisions under Uncertainty**

Fall. 4 credits. Prerequisites: Economics 313 and 319. Not offered 2000-2001.

This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.]

**ECON 420 Economics of Family Policy—Adults**

Economics 420 and 421 together, count as 1 course for the Economics major.

For description, see CEH 320.

**ECON 421 Economics of Family Policy—Children**

Economics 420 and 421 together, count as 1 course for the Economics major.

For description, see CEH 321.

**ECON 422 The Economics of Infrastructure and a Sustainable Environment**

For description, see CEE 422.

**ECON 425 Economic History of Latin America @ #**

Spring. 4 credits.

A survey of changing economic institutions and policies from pre-Columbian to modern times.

**[ECON 426 History of American Enterprise #**

Spring. 4 credits. Prerequisites: Economics 101-102 or equivalent. Not offered 2000-2001.

History of the changing structure of American business from 1800 to the present, with major emphasis on developments after the Civil War. The focus of the course will be the changing structure of challenges (for example, the rise of unions, development of a national capital market, changing role of government) and the various responses of business organizations and entrepreneurs to those challenges.]

**ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade**

For description, see ARME 630.

**ECON 440 Analysis of Agricultural Markets**

Economics 440 and 441 together, count as 1 course for the Economics major.

For description, see ARME 640.

**ECON 441 Commodity Futures Markets**

Economics 440 and 441 together, count as 1 course for the Economics major.

For description, see ARME 641.

**ECON 444 Modern European Economic History**

For description, see ILRLE 444.

**ECON 445 Topics in Microeconomic Analysis—Markets and Planning**

Fall. 4 credits. Prerequisites: Economics 313.

This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include (1) How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? (2) What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? (3) How can economic planning be decentralized efficiently? This course serves two purposes: to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and to illustrate the deductive approach of modern economic analysis—how to define concepts unambiguously, how to form propositions in clear-cut fashion, and how to follow up logical implications sequentially to the conclusion.

**[ECON 446 Topics in Macroeconomic Analysis—Is Keynesianism Dead?**

Fall or spring. 4 credits. Prerequisites:

Economics 314. Not offered 2000-2001.

The coverage of this course may vary from term to term. Presently, the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economics, alias the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We shall review critically critiques to Keynesian theory.]

**ECON 447 Economics of Social Security**

For description, see CEH 346.

**ECON 450 Resource Economics**

For description, see ARME 450.

**ECON 451 Economic Security**

For description, see ILRLE 340.

**ECON 453 The Economics of Unemployment**

For description, see ILRLE 348.

**ECON 454 The Economics of Health Care**

For description, see ILRLE 440.

**ECON 455 Income Distribution**

For description, see ILRLE 441.

**ECON 456 The Economics of Employee Benefits**

For description, see ILRLE 442.

**ECON 457 Women in the Economy**

For description, see ILRLE 445.

**ECON 458 Topics in Twentieth-Century Economic History**

For description, see ILRLE 448.

**ECON 459 Economic History of British Labor 1750-1940**

For description, see ILRLE 640.

**ECON 460 Economic Analysis of the Welfare State**

For description, see ILRLE 642.

**ECON 461 The Economics of Occupational Safety and Health**

For description, see ILRLE 644.

**ECON 462 Labor in Developing Economies**

For description, see ILRIC 332.

**ECON 464 Economics of Agricultural Development**

For description, see ARME 464.

**ECON 465 Food and Nutrition Policy**

For description, see ARME 665.

**ECON 466 Economics of Development**

For description, see ARME 666.

**ECON 467 Game Theory**

Fall. 4 credits. Prerequisites: Economics 313 and 319.

This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

**ECON 468 Economic Problems of Latin America @**

Spring. 4 credits. Prerequisites: Economics 101-102.

Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.

**ECON 469 China's Economy under Mao and Deng @**

Fall. 4 credits. Prerequisites: Economics 101-102 or permission of instructor.

Examines the development of the Chinese economy and the evolution of China's economic system between 1949 and the early 1990s.

**ECON 471 The Economies of the Former Soviet Union and of Central Europe: From Central Planning to Markets**

Fall. 4 credits. Prerequisites: Economics 101, 102.

The course will introduce first the basic features of a centrally planned economy and proceed to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis will be extended to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course will proceed to current attempts to move away from Socialist central planning

and its legacies to market economy, privatization, and independence.

**ECON 472 Comparative Economic Systems: East and West**

Fall. 4 credits. Prerequisites: Economics 101–102.

The course will develop first a framework for studying economic systems and national economies and present three simple stylized systemic models: capitalist market, socialist market, and central planning. Secondly, the course will consider economic goals to be achieved (such as growth, stability, and productivity) and introduce quantitative measures used in the evaluation of the performance. Thirdly, comparative studies of selected national economies representing the models will be carried out.

**ECON 473 Economics of Export-Led Development @**

Spring. 4 credits. Prerequisites: Economics 313, 314, or their equivalent.

This course will examine the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration will be on experiences within the West Pacific Rim.

**ECON 474 National and International Food Economics**

For description, see NS 457.

**ECON 475 The Economy of India @**

Fall. 4 credits. Prerequisite: Economics 101–102 or equivalent background.

This course will present the major economics and development problems of contemporary India and examine the country's future economic prospects. It will, however, be our aim to discuss these problems in their proper historical perspectives. Hence, the course will start with a brief outline of the social and political history of India. It will then turn to a more detailed account of the economic history of India in two stages.

**ECON 477 Contemporary Development of Southeast Asian Economies**

Spring. 3 credits. Prerequisites: Economics 101, 102.

See CRP 679.09 for description.

**ECON 498 Readings in Economics**

Fall or spring. Variable credit. Independent study.

**ECON 499 Honors Program**

Fall and spring. 8 credits. Prerequisites: Economics 313, 314, 321 (or 319–320).

Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

**Graduate Courses and Seminars**

**ECON 609 Microeconomic Theory I**

Fall. 4 credits.

Topics in consumer and producer theory.

**ECON 610 Microeconomic Theory II**

Spring. 4 credits.

Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

**ECON 613 Macroeconomic Theory I**

Fall. 4 credits.

Static general equilibrium. Intertemporal general equilibrium: infinitely lived agents

models and overlapping generations models. Welfare theorems. Equivalence between sequential markets and Arrow-Debreu Markets. Ricardian proposition. Modigliani-Miller theorem. Asset pricing. Recursive competitive equilibrium. The Neoclassical Growth Model. Calibration. Introduction to dynamic programming.

**ECON 614 Macroeconomic Theory II**

Spring. 4 credits.

Dynamic programming. Stochastic growth. Search models. Cash-in-advance models. Real business-cycle models. Labor indivisibilities and lotteries. Heterogeneous agents models. Optimal fiscal and monetary policy. Sustainable plans. Endogenous growth.

**ECON 616 Applied Price Theory (also NBA 527)**

Spring. 4 credits.

The course emphasizes the applications of the principles of price theory to a variety of problems taken from concrete, practical settings.

**ECON 617 Intermediate Mathematical Economics I**

Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.

The course will cover selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

**[ECON 618 Intermediate Mathematical Economics II**

Spring. 4 credits. Not offered 2000–2001.

A continuation of Economics 617, the course develops additional mathematical techniques for applications in economics. Topics covered could include study of dynamic systems (linear and nonlinear difference equations, differential equation, chaotic behavior), dynamic optimization methods (optimal control theory, nonstochastic and stochastic dynamic programming), and game theory (repeated dynamic and evolutionary games).]

**ECON 619 Econometrics I**

Fall. 4 credits. Prerequisites: Economics 319–320 or permission of instructor.

This course gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics to be covered are (1) probability theory: probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems, Monte Carlo simulation; (2) statistics: sample statistics, sufficiency, exponential families of distributions. Further topics in statistics will be considered in Economics 620.

**ECON 620 Econometrics II**

Spring. 4 credits. Prerequisite: Economics 619.

This course is a continuation of Economics 619 (Econometrics I) covering (1) statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing and (2) econometrics: the general linear model, generalized least squares, specification tests, instrumental

variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

**ECON 699 Readings in Economics**

Fall or spring. Variable credit. Independent study.

**ECON 703 Seminar in Peace Science**

Fall. 4 credits.

Among topics to be covered at an advanced level are game theory, coalition theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, macrosocial processes, and general systems analysis.

**ECON 710 Stochastic Economics: Concepts and Techniques**

Spring. 4 credits. Prerequisites: Economics 609, 610, 613, 614, 619, and 620.

This course will review a number of techniques that have been useful in developing stochastic models of economic behavior. Among these are (a) discrete-time Markov processes, (b) dynamic programming under uncertainty, and (c) continuous-time diffusion processes. Examples of economic models will be drawn from recent literature on optimal capital accumulation and optimal savings and portfolio selection problems; permanent income hypothesis; dynamic models of price adjustment, etc. Advanced graduate students contemplating work in economic theory and econometric theory will gain exposure to current research.

**ECON 712 Advanced Macroeconomics**

4 credits. Prerequisites: Economics 613, 614.

The purpose of this course is to introduce the student to some of the topics and analytic techniques of current macroeconomic research. The course will fall into three parts: dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section will include models of consumption, investment, and real business cycles. The new Keynesian section will cover models of wage and price rigidity, coordination failure and credit markets. The section on endogenous growth will look at recent efforts to add nonconvexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere.

**ECON 713 Advanced Macroeconomics II**

Spring. 4 credits. Prerequisites: ECON 613, 614.

This course reviews the most recent research in endogenous growth theory. This theory is little more than a decade old, but it has produced a large amount of both empirical and theoretical results that have substantially reshaped the general field of macroeconomics. It is perhaps no exaggeration to say that most of the work at the frontier of today's macroeconomics belongs to this field. An increasing number of papers have been touching important issues such as; learning by doing, R&D investment, market structure, private and public organization of R&D, education financing, human capital accumulation, technological unemployment, growth and business cycles, inequality and growth, political equilibrium, democracy and growth, instability, social conflict, capital accumulation, intergenerational and vested interests and barriers to technology adoption, international transfers of technologies, sustainable development, etc.

This course tries to orient the student in this large and variegated literature consisting of recently published articles and working papers. Understanding this literature is a sound training in the analytical methods used at the frontier of theoretical research, but it also provides a number of empirical results at the center of the economic debate.

**ECON 717 Mathematical Economics**

4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).

The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in dynamic economies. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

**[ECON 718 Topics in Mathematical Economics]**

4 credits. Not offered 2000–2001.]

**ECON 719 Advanced Topics in Econometrics I**

Fall. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.

Advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

**ECON 720 Advanced Topics in Econometrics II**

Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.

For description see Economics 719.

**ECON 721 Time Series Econometrics**

Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.

This course covers traditional and current time series techniques that are widely used in econometrics. Topics include the theory of stationary stochastic processes including univariate ARMA(p,q) models, spectral density analysis, and vector autoregressive models; parametric and semi-parametric estimation; current developments in distributional theory; estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

**ECON 731 Monetary Theory and Policy**

Spring. 4 credits. Prerequisites: Economics 614 or permission of the instructor.

Advanced topics in monetary economics, macroeconomics, and economic growth—such as overlapping-generations, taxes and transfers denominated in money, transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.

**ECON 732 Monetary Theory and Policy**

Fall. 4 credits. Prerequisites: Economics 731 or permission of the instructor.

Advanced topics in monetary economics, macroeconomics, and economic growth—such as economic volatility, the “burden” of government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.

**ECON 735 Public Finance: Resource Allocation and Fiscal Policy (also ARME 735)**

Spring. 4 credits.

This course develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics covered include generalizations and extensions of the fundamental theorems of welfare economics, in-depth analysis of social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending on faculty research interests.

**ECON 736 Public Finance: Resource Allocation and Fiscal Policy**

Fall. 4 credits.

This course spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security, unemployment insurance, deficits, and interactions between different levels of government.

**[ECON 737 Location Theory and Regional Analysis]**

Fall. 4 credits. Prerequisites: Economics 609, 617, and Econometrics. Not offered 2000–2001.

Economic principles influencing the location of economic activity, its spatial equilibrium structure, and dynamic forces. Topics include spatial pricing policies, price competition, and relocation by firms; residential location patterns; patterns of regional growth and decline; and patterns of urbanization.]

**ECON 738 Public Choice**

Spring. 4 credits. Prerequisites: ECON 609, 610.

This class has two parts. It begins with an introduction to economic theories of political decision making. We review the theory of voting, theories of political parties and party competition, theories of legislative decision making and interest group influence. We also discuss empirical evidence concerning the validity of these theories. The second part uses these theories to address a number of issues in Public Economics. We develop the theory of political failure, analyze the performance of alternative political systems and discuss the problem of doing policy analysis which takes into account political constraints.

**ECON 741 Seminar in Labor Economics**

For description see ILRLE 744.

**ECON 742 Seminar in Labor Economics**

For description see ILRLE 745.

**ECON 751 Industrial Organization and Regulation**

Fall. 4 credits. Prerequisites: ECON 609, 610.

This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include market structure, nonlinear pricing, quality, durability, location selection, repeated games, collusion, entry deterrence, managerial incentives, switching costs, government intervention, and R&D/Patents. These topics are discussed in a game-theoretic context.

**ECON 752 Industrial Organization and Regulation**

Spring. 4 credits. Prerequisites: ECON 609, 610, 751.

This course rounds out some topics in the Theory of Industrial Organization with the specific intent of addressing the empirical implications of the theory. The course reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

**[ECON 753 Public Policy Issues for Industrial Organizations]**

Spring. 4 credits. Prerequisites: Economics 609, 610, and 751. Not offered 2000–2001.

The course takes an in-depth view of the interaction between the government and business. Methods of business control, including antitrust, price regulation, entry regulation, and safety regulation. Emphasis will be not only on the economic effects on business, but on the economics of selecting and evolving the method of control.]

**[ECON 755 Rivalry and Cooperation]**

Fall. 4 credits. Prerequisites: Economics Graduate Core or instructor's permission. Not offered 2000–2001.

In standard models, economic interaction is impersonal. Agents respond to price signals and measure their own welfare not in relative but in absolute terms; and cooperative behavior emerges only when it coincides with narrow self-interest. This course will explore the details of rivalry and cooperation in an effort to synthesize broader views of economic interaction. Topics will include the effect of concerns about relative income on wage rates, consumption, savings, and regulation; the effect of concerns about fairness on prices and wages; the conditions that foster trust and cooperation; and the role of positional competition in the distribution of economic rewards.]

**ECON 756 Noncooperative Game Theory**

Fall. 4 credits. Prerequisites: Economics 609–610 and 619.

This course surveys equilibrium concepts for noncooperative games. We will cover Nash equilibrium and a variety of equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We will pay attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of our analysis will be from the strict decision-theoretic point of view, but we will also survey some models of bounded rationality in games, including games played by automata.

**ECON 757 Economics of Imperfect Information**

Spring. 4 credits. Prerequisites: Economics 609–610 and 619.

The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory will be discussed.

**ECON 760 Topics in Political Economy**

Fall. 4 credits. Prerequisite: Economics graduate core or instructor's permission. This course will develop critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms; the meaning and emergence of property rights; the role of policy advice in influencing economic outcomes; and the effect of political power and ideology on economic variables will be studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally, game-theoretic thinking allows us to approach these topics from a new perspective. Hence, the course will begin by devoting some lectures to elementary ideas in game-theory and strategic analysis.

**ECON 761 International Economics: Trade Theory and Policy**

Fall. 4 credits. Prerequisites: ECON 609, 610.

This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

**ECON 762 International Economics: International Finance and Open Economy Macroeconomics**

Spring. 4 credits. Prerequisite: ECON 761. This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics will be covered.

**ECON 770 Topics in Economic Development**

For description, see ARME 667.

**ECON 771 Economic Development and Development Planning**

Spring. 4 credits. Prerequisites: graduate core or instructor's permission. Reviews the existing literature on the determinants of economic growth and the interrelationship of growth and income distribution through the process of economic development. A general equilibrium approach to development is taken. Computable general equilibrium models, based on social accounting matrices, are used to explore the performance of a variety of developing countries. Among the topics explored are: impact of structural adjustment and stabilization policies on growth, equity and internal and external equilibrium; sectoral interrelationship and interdependence through the growth process. Critical review and evaluation of national, sectoral, and regional development models built for such developing countries as India, Brazil, Indonesia, and Ecuador.

**ECON 772 Economics of Development**

Spring. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.

Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from

economic development, labor market models, project analysis with application to the economics of education, and development policy.

**ECON 773 Economic Development**

Fall. 4 credits. Prerequisites: Economics 609 and 620.

The course is concerned with theoretical and applied works that seek to explain economic development, or lack thereof, in countries at low-income levels. Specific topics vary each semester.

**ECON 774 Economic Systems**

Spring. 4 credits.

The course deals with economic systems, formerly centrally planned economies, and economies in transition.

**ECON 784 Seminars in Advanced Economics**

Fall and spring. 4 credits.

**ENGLISH**

H. Shaw, chair; B. Correll, director of undergraduate studies (255-3492); D. Mermin, director of graduate studies (255-7989); H. S. McMillin, director of honors program; B. Adams, J. Ashton, A. Boehm, F. Bogel, L. Bogel, M. P. Brady, L. Brown, C. Chase, J. Culler, S. Davis, E. DeLoughrey, L. Fakundiny, R. Farrell, D. Fried, A. Galloway, R. Gilbert, J. Goldsby, K. Gottschalk, E. Hanson, L. Herrin, T. Hill, M. Hite, M. Jacobus, P. Janowitz, B. Jeyifo, C. Kaske, M. Koch, B. Maxwell, D. McCall, K. McClane, M. McCoy, S. Mohanty, R. Morgan, T. Murray, R. Parker, J. Porte, E. Rosenberg, N. Saccamano, P. Sawyer, D. Schwarz, M. Seltzer, R. Shepherd, S. Siegel, H. Spillers, G. Teskey, S. Vaughn, H. Viramontes, W. Wetherbee, S. Wong. Emeriti: M. H. Abrams, A. R. Ammons, J. Bishop, J. Blackall, A. Caputi, D. Eddy, R. Elias, A. Lurie, P. Marcus, J. McConkey, S. Parrish, M. Radznowicz, S. C. Strout.

The Department of English offers a wide range of courses in English, American, and Anglophone literature as well as in creative writing, expository writing, and film analysis. Literature courses focus variously on close reading of texts, study of particular authors and genres, questions of critical theory and method, and the relationship of literary works to their historical contexts and to other disciplines. Writing courses typically employ the workshop method in which students develop their skills by responding to the criticism of their work by their classmates as well as their instructors. Many students supplement their formal course work in English by attending public lectures and poetry readings sponsored by the department or by writing for campus literary magazines. The department seeks not only to foster critical analysis and lucid writing but also to teach students to think about the nature of language and to be alert to both the rigors and the pleasures of reading texts of many sorts.

**First-Year Writing Seminars**

As part of the university-wide First-Year Writing Seminars program administered by the John S. Knight Writing Program, the department offers many one-semester courses dealing with various forms of writing (e.g.

narrative, autobiographical, and expository), with the study of specific areas in English and American literature, and with the relation of literature to culture. Students may apply any of these courses to their First-Year Writing Seminar requirement. Detailed course descriptions may be found in the First-Year Writing Seminars program listings, available from college registrars in August for the fall term and in November for the spring term.

Freshmen interested in majoring in English are encouraged to take at least one of the department's 200-level First-Year Writing Seminars: "The Reading of Fiction" (ENGL 270), "The Reading of Poetry" (ENGL 271), and "Introduction to Drama" (ENGL 272). These courses are open to all second-term freshmen. They are also open, as space permits, to first-term freshmen with scores of 700 or above on the CEEB College Placement Tests in English composition or literature, or 4 or 5 on the CEEB Advanced Placement Examination in English, as well as to students who have completed another First-Year Writing Seminar.

**Courses for Nonmajors**

For students majoring in fields other than English, the department provides a variety of courses at all levels. A number of courses at the 200 level are open to qualified freshmen, and all are open to sophomores. Courses at the 300 level are open to all sophomores, juniors, and seniors; they are also open to freshmen who have received the instructor's prior permission. The suitability of courses at the 400 level for nonmajors depends in part on the course topics, which are subject to change from year to year. Permission of the instructor is sometimes required; prior consultation is always in order and strongly advised.

**The Major in English**

Students who major in English develop their own programs of study in consultation with their major advisers. Some choose to focus on a particular historical period or literary genre or to combine sustained work in creative writing with the study of literature. Others pursue special interests in such areas as women's literature, African-American literature, literature and the visual arts, or critical theory.

The department recommends that students prepare themselves for the English major by taking one or more of its preparatory courses, such as "The Reading of Fiction" (ENGL 270), "The Reading of Poetry" (ENGL 271), or "Introduction to Drama" (ENGL 272). (The "ENGL" prefix identifies courses sponsored by the Department of English, all of which appear in the English section of *Courses of Study* or the department's supplementary lists of courses; it also identifies courses sponsored and taught by other academic units and cross-listed with English.) These courses concentrate on the skills basic to the English major and to much other academic work—responsive, sensitive reading and lucid, forceful writing. As First-Year Writing Seminars, any one of them will satisfy one-half the College of Arts and Science's First-Year writing requirement. ENGL 280, 281, 288, and 289 are also suitable preparations for the major and are open to students who have completed their First-Year Writing Seminar requirement. ENGL 201 and 202, which together constitute a two-semester survey of major British writers, though not

required are strongly recommended for majors and prospective majors. ENGL 201 and 202 (unlike ENGL 280, 281, 288, and 289) are also "approved for the major" in the special sense of that phrase explained below.

To graduate with a major in English, a student must complete with passing letter grades 10 courses (40 credit hours) approved for the English major. All ENGL courses numbered 300 and above are approved for the major. In addition, with the exception of First-Year Writing Seminars (ENGL 270, 271, and 272), 200-level courses in creative and expository writing (ENGL 280, 281, 288, and 289), and courses designated for nonmajors, all 200-level ENGL courses are also approved for the major. Courses used to meet requirements for the English major may also be used to meet the "Humanities and the Arts" distribution requirement of the College of Arts and Sciences. Many of these courses may be used to meet the college's "historical breadth" requirement as well.

Of the 40 credits required to complete the major, 8 credits (two courses) must be at the 400 level or above; 12 credits (three courses) must be from courses in which 50 percent or more of the material consists of literature originally written in English before 1800; and another 12 credits (three courses) must form an intellectually coherent "concentration." The 400-level and pre-1800 requirements may be satisfied only with ENGL courses, and ENGL 493-494, the Honors Essay Tutorial, may not be used to satisfy either one. Courses that satisfy the pre-1800 requirement are so designated in *Courses of Study*. Many English majors use ENGL 201 to begin meeting this requirement since it provides an overview of earlier periods of British literature and so enables them to make more informed choices of additional pre-1800 courses. ENGL 202, however, does not qualify as a pre-1800 course. Neither do courses offered by other departments unless they are cross-listed with English. Although advanced courses in foreign literature read in the original languages may not be used to fulfill the pre-1800 requirement, they may be used for English major credit provided they are included within the 12-credit limit described below. The three-course concentration requirement may be satisfied with any courses approved for the major. The department's "Guide to the English Major" contains suggested areas of concentration and lists of courses that fall within the areas proposed, but majors are expected to define their own concentrations in consultation with their advisers.

As many as 12 credits in courses offered by departments and programs other than English may be used under certain conditions to be used to satisfy English major requirements. Courses in literature and creative writing offered by academic units representing neighboring or allied disciplines (German Studies, Romance Studies, Russian, Asian Studies, Classics, Comparative Literature, Africana Studies, the Society for the Humanities, American Studies, Women's Studies, Religious Studies, Asian American Studies, Latino Studies, and Theatre, Film, & Dance) are routinely counted toward the 40 hours of major credit provided they are appropriate for juniors or seniors, as are most courses at the 300 level and above. English majors who are double majors may exercise this option even if all 12 credits are applied to their second major. All English majors are urged to take courses in which they read

foreign works of literature in the original language, and for that reason 200-level literature courses for which qualification is a prerequisite (as well as more advanced foreign literature courses taught in the original language) may be counted toward the English major. Credit from other non-ENGL courses may be included within the 12 credits of nondepartmental courses approved for the major only when the student is able to demonstrate to the adviser's satisfaction their relevance to his or her individual program of study.

Students who declared the English major prior to July 1999 may elect to substitute for these requirements those in effect when they entered the major.

### The Major in English with Honors

Second-term sophomores who have done superior work in English and related subjects are encouraged to seek admission to the department's program leading to the degree of Bachelor of Arts with Honors in English. Following an interview with the chair of the Honors Committee, qualified students will be admitted provisionally to the program. During their junior year these students must complete at least one Honors Seminar (ENGL 491 or 492); they are encouraged to take an additional 400-level English course in the field in which they plan to concentrate. On the basis of work in these and other English courses, a provisional Honors candidate is expected to select a thesis topic and secure a thesis adviser by the end of the junior year. A student who has been accepted by a thesis adviser becomes a candidate for Honors rather than a provisional candidate.

During the senior year, each candidate for Honors in English enrolls in a year-long tutorial (ENGL 493-494) with the faculty member who has agreed to serve as the student's thesis adviser. The year's work culminates in the submission of a substantial scholarly or critical essay to be judged by at least two members of the faculty. More information about the Honors Program may be found in a leaflet available in the English offices.

### First-Year Writing Seminars Recommended for Prospective Majors

#### ENGL 270 The Reading of Fiction

Fall, spring, each summer. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English. This course examines modern fiction, with an emphasis on the short story and novella. Students will write critical essays on authors who flourished between 1870 and the present, such as James, Joyce, Woolf, Hurston, Lawrence, Fitzgerald, Hemingway, Faulkner, Rhys, Welty, Salinger, and Morrison. Reading lists vary from section to section, and some may include a novel, but close, attentive, imaginative reading and writing are central to all. *This course does not satisfy requirements for the English major.*

#### ENGL 271 The Reading of Poetry

Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English. How can we become more appreciative, alert readers of poetry, and at the same time better writers of prose? This course attends to the

rich variety of poems written in English, drawing on the works of poets from William Shakespeare to Sylvia Plath, John Keats to Li-Young Lee, Emily Dickinson to A. R. Ammons. We may read songs, sonnets, odes, villanelles, even limericks. By engaging in thorough discussions and varied writing assignments, we will explore some of the major periods, modes, and genres of English poetry, and in the process expand the possibilities of our own writing. *This course does not satisfy requirements for the English major.*

#### ENGL 272 Introduction to Drama

Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English.

Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. A typical reading list might include works by Sophocles, Shakespeare, Moliere, Chekhov, Brecht, Miller, Beckett, and Shange. Course work consists of writing and discussion and the occasional viewing of live or filmed performances. *This course does not satisfy requirements for the English major.*

### Expository Writing

#### ENGL 288 Expository Writing

Fall, spring, summer, winter. 3 credits. Each section limited to 16 students. Prerequisite: students must have completed their colleges' first-year writing requirements or have the permission of the instructor. S. Davis and staff. English 288-289 offers guidance and an audience for students who wish to gain skill in expository writing. Each section provides a context for writing defined by a form of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members will read in relevant published material and write and revise their own work regularly, while reviewing and responding to each other's. Since these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructors will confer individually throughout the term. Web site: [instruct1.cit.cornell.edu/Courses/engl288/](http://instruct1.cit.cornell.edu/Courses/engl288/). *This course does not satisfy requirements for the English major.*

Section 1—M. Wesling—Dreaming in Color: TV in America

Section 2—J. Bernes—The Essay: Personal to Public

Section 3—A. Boehm—The Reflective Essay

Section 4—S. Jefferis—Issues, Audiences, and Ourselves

Section 5—B. LeGendre—Minding the Body

Section 6—J. Palermo—Reading the News, Understanding the Media

**Spring 2000:** To be announced.

See English department *Course Offerings* for full fall and spring section descriptions.

#### ENGL 381 Reading as Writing

Fall. 4 credits. S. Davis. Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose), which should reach the instructor before the first day of class.

This course practices related arts: reading selected nineteenth- and twentieth-century prose fictions and poems and writing interpretive essays about them and in addition, writing as a reader of one's own work and revising in the light of others' responses to it. Course members will work with a fairly small number of texts—tentatively, Wordsworth's two-part *Prelude*, Brontë's *Jane Eyre*, James' *Turn of the Screw*, Rhys's *Wide Sargasso Sea*, Wilde's *Dorian Gray*, and Nabokov's *Pale Fire*—and build sustained essays from shorter (written) "readings" of them. Students will present their work to the group at various stages of completion and develop a portfolio of well-crafted prose for submission at the end of the term. They will also pay conscious attention to the ways in which both critical readers and creative writers "rewrite" the texts they read. This is a course for English majors and nonmajors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. It will be advantageous for students planning to write honors theses in English or another discipline.

#### ENGL 386 Philosophic Fictions

Fall. 4 credits. S. Davis.

Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose), which should reach the instructor before the first day of class.

"Fictions"—of voice, audience, plot, point of view, figurative language, and thought—abound in good expository writing; they stand out in works that deliberately test and play with ideas: dialogues, satires, parodies, parables, philosophic tales, and "thought-experiments." Students will write critically about such works and the issues they raise and will experiment with writing in similar forms. The "fictions" read and written in this course are not realistic narratives or evocations of personal experience; they are the vehicles and animating resources of writers who want to argue flexibly, provoke thought, ridicule vice or folly, play games, or involve readers in pleasingly or disturbingly insoluble problems. Readings will include such works as Plato's *Gorgias*, Swift's "Modest Proposal" and *Tale of a Tub*, Voltaire's *Candide*, Carroll's *Alice books*, short fictions by Jorge Luis Borges and Octavia Butler, and essays by Richard Rorty and Anthony Appiah.

#### ENGL 387 Autobiography: Theory and Practice

Spring. 4 credits. A. Boehm.

In this nonfiction prose-writing seminar we explicate canonical autobiographies as models of rhetoric to be imitated in weekly writing assignments.

#### ENGL 388 The Art of the Essay

Fall. 4 credits. Limited to 15 students.

Interested students should submit 1 or more pieces of recent writing (prose) to the instructor before the beginning of the term, preferably at preregistration.

L. Fakundiny.

For both English majors and nonmajors who have done distinguished work in first-year writing seminars and in such courses as English 280–281, 288–289, and who desire intensive practice in writing essays as a kind of creative nonfiction. The course assumes a high degree of self-motivation, a capacity for independent work, and critical interest in the

work of other writers; it aims for a portfolio of conceptually rich and stylistically polished writing.

### Creative Writing

Students usually begin their work in Creative Writing with English 280 or 281, and only after completion of the First-Year Writing Seminar requirement. Please note that either English 280 or English 281 is the recommended prerequisite for 300-level creative writing courses. English 280 and 281 may satisfy a distribution requirement in your college (please check with your college adviser). English 382–383, 384–385, and 480–481 are approved for the English major.

#### ENGL 280–281 Creative Writing

Fall, spring, summer, winter session. 3 credits. Prerequisites: completion of the Freshman Seminar requirement. Limited to 18 students.

**Majors and prospective majors, please note.** Although recommended for prospective English majors, English 280–281 cannot be counted towards the 40 credits required for completion of the English major. It is a prerequisite for 300-level courses in creative writing, which count towards the major. English 280 is not a prerequisite for English 281.

An introductory course in the theory, practice, and reading of prose, poetry, and allied forms. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

#### ENGL 382–383 Narrative Writing

Fall, 382; spring, 383. 4 credits each term. Each section limited to 15 students.

Previous enrollment in English 280 or 281 recommended. Prerequisite: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, H. Viramontes; sec. 2, D. McCall; sec. 3, M. McCoy. Spring: S. Vaughn, M. Koch, M. McCoy, L. Herrin.

The writing of fiction; study of models; analysis of students' work.

#### ENGL 384–385 Verse Writing

Fall or summer, 384; spring, 385. 4 credits each term. Each section limited to 15 students. Prerequisites: English 280 or 281, or permission of instructor. Fall:

P. Janowitz, K. McClane. Spring:

R. Shepherd, N. Cuoto.

The writing of poetry; study of models; analysis of students' poems; personal conferences.

#### ENGL 480–481 Seminar in Writing

Fall, 480; spring, 481. 4 credits each term. Each section limited to 15 students.

Prerequisite: permission of instructor, normally on the basis of a manuscript. The manuscript should be submitted to the instructor no later than the first day of class. Previous enrollment in English 280 or 281 and at least one 300-level writing course recommended. Successful completion of one half of the 480–481 sequence does not guarantee enrollment in the other half; students must receive permission of the instructor to enroll in the second course. Fall: Sec. 1, M. McCoy, sec. 2, K. McClane. Spring: R. Morgan, R. Shepherd.

Intended for those writers who have already gained a basic mastery of technique. Although

English 480 is not a prerequisite for English 481, students normally enroll for both terms and should be capable of a major project—a collection of stories or poems, a group of personal essays, or perhaps a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

### Courses for Freshmen and Sophomores

These courses have no prerequisites and are open to freshmen and nonmajors as well as majors and prospective majors.

### Introductions to Literary Studies

#### ENGL 201–202 The English Literary Tradition #

**201:** Fall. 4 credits. English 201 is not a prerequisite for 202. This course may be used as one of the three pre-1800 courses required of English majors. D. Fried.

An introduction to the study of English literature, examining its historical development and achievements. Works to be read include *Sir Gawain and the Green Knight*; selections from Chaucer's *Canterbury Tales* and Spenser's *Faerie Queene*; Shakespeare's *Twelfth Night* and *King Lear*; poems by Sidney, Jonson, Donne, Herbert, Herrick and Marvell; and selections from Milton's *Paradise Lost*.

**202:** Spring. 4 credits. D. Fried.

A survey of English literature from the late seventeenth century to the early twentieth century, including poetry and some prose works from the Restoration and eighteenth century, the Romantic period, the Victorian period, and Modernism. Lectures and discussion sections.

#### [ENGL 204 Mostly Poems and Stories 4 credits. Next offered 2001–2002.]

#### ENGL 207 Introduction to Modern Poetry

Fall. 4 credits. R. Shepherd.

This course will sample the vast array of poetic modes and forms employed over the past century and a half, with primary emphasis on the work of American poets. Our focus in the course will be on the poems themselves—what they mean, how they feel, sound, look, and behave. Lectures, discussions, and written assignments will emphasize both the craft of writing poetry and the discipline of reading it with understanding and appreciation. No previous study of poetry required.

#### ENGL 208 Shakespeare and the Twentieth Century

Spring. 4 credits. S. Davis.

What can we learn about Shakespeare's plays from their reception in the twentieth century? What can we learn about twentieth-century culture from its appropriations of the Shakespeare legend and texts? We will compare four or five plays with their adaptations in fiction, theater, and film and explore the uses made of Shakespeare in education, advertising, and public culture. Our discussions will try to illuminate the vast differences and surprising continuities among the Shakespeares handed down by earlier times and those recovered or invented in the modern era; we will also pay attention to the variety of critical approaches readers and viewers have taken to Shakespeare on the page and in performance.

**ENGL 227 Shakespeare #**

Spring, summer, and winter. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. W. Wetherbee.

Careful study of 10 of Shakespeare's major plays, including at least three videotaped performances.

**Major Genres and Areas****[ENGL 203 Major Poets**

4 credits. Next offered 2001-2002.]

**[ENGL 205 Readings in English Literature**

3 credits. This course is intended for nonmajors. Next offered 2001-2002.]

**[ENGL 206 Readings in English and American Literature**

3 credits. This course is intended for nonmajors. 2 lectures and 1 discussion section each week. Next offered 2001-2002.]

**[ENGL 209 Introduction to Cultural Studies**

4 credits. Next offered 2001-2002.]

**[ENGL 210 Medieval Romance: The Voyage to the Other World**

3 credits. Next offered 2001-2002.]

**[ENGL 212 Introduction to Medieval Epic**

4 credits. This course may be used as one of the three pre-1800 courses required for the English major. Next offered 2001-2002.]

**[ENGL 240 Survey in U.S. Latino Literature (also LSP 240)**

4 credits. Next offered 2001-2002.]

**ENGL 251 Twentieth-Century Women Novelists (also WOMNS 251 and AM ST 252)**

Spring. 4 credits. K. McCullough.

This course will be particularly concerned with questions about women's experience and perspective and will explore intersections of gender, ethnicity, race, sexuality, and other vectors of identity. We will read novels by Nella Larsen, Dorothy Allison, Louise Erdrich, Toni Morrison, Helena María Viramontes, Fae Ng, Cristina Garcia, and others. Assignments include two papers, a research project, and a number of short in-class writings.

**[ENGL 253 The Modern Novel**

4 credits. Next offered 2001-2002.]

**ENGL 255 African Literature**

Spring. 4 credits. B. Jeyifo.

An introduction to major African writers and literary traditions. Authors to be studied may include Wole Soyinka, Chinua Achebe, Bessie Head, Ayi Kwei Armah, Ama Ata Aidoo, Tayeb Salih, and Ousmane Sembene.

**[ENGL 260 Introduction to American Indian Literatures (also AM ST 260)**

4 credits. Next offered 2001-2002.]

**[ENGL 262 Asian American Literature (also AAS 262 and AM ST 262)**

4 credits. Next offered 2001-2002.]

**[ENGL 265 Introduction to African American Literature (also AM ST 265)**

4 credits. Next offered 2001-2002.]

**[ENGL 274 Scottish Literature and Culture #**

3 or 4 credits. The course may be taken for 3 or 4 credits: those taking it for 4 credits will complete an additional writing project.

This course only counts towards the English major when taken for 4 credits.

Nonmajors are welcome. Enrollment limited to 20. Next offered 2001-2002.]

**ENGL 275 The American Literary Tradition (also AM ST 275)**

Fall. 4 credits. J. Ashton.

The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

**ENGL 278 Queer Fiction (also WOMNS 278)**

Spring. 4 credits. E. Hanson.

An introductory survey of canonical English and American novels of the past century through which we might question what we mean by lesbian and gay desire, identity, politics, and culture. How has homoerotic desire been articulated through narrative and literary style? How does desire both determine sexual identity and subvert it? How have various novelists conceived of homoeroticism with respect to religion, the law, psychology, class, and race? In order to think carefully about what it might mean to label a text, a writer, or a reader as "queer," we will begin with a landmark historical event about which such a question has often been asked, Oscar Wilde's trial for "gross indecency" in 1895, and read *De Profundis*, his prison memoir about his relationship with Lord Alfred Douglas. We will also discuss novels by Radclyffe Hall, E. M. Forster, Ronald Firbank, Djuna Barnes, Nella Larsen, Gore Vidal, Edmund White, and Jeanette Winterson. In addition, we will consider certain influential theoretical essays by Sigmund Freud, Havelock Ellis, Susan Sontag, Adrienne Rich, Gayle Rubin, Judith Butler, and Neil Bartlett.

**ENGL 295 The Essay in English #**

Fall. 4 credits. Prerequisite: completion of the First-Year Writing Seminar requirement. This course may be used as one of the three pre-1800 courses required of English majors. L. Fakundiny.

What is an essay and what is it for? How does it work as prose discourse, as a text of the self? Impelled by such generic questions and others raised by Montaigne's French *Essais* (1588), this course explores the invention of the essay in English during the sixteenth and seventeenth centuries and its flowering in the periodicals and magazines of the eighteenth and nineteenth centuries. Readings include selections from the work of Bacon, Cornwallis, Donne, Earle, Cowley, Swift, Addison, Johnson, Franklin, Goldsmith, Lamb, Hazlitt, Irving, and DeQuincey. Essays by earlier writers are matched rhetorically and/or thematically with readings from more recent practitioners of the genre including DuBois, Woolf, Orwell, Welty, Baldwin, Selzer, Ozick, Achebe, Didion, S. Naipaul, Dillard, Sanders, and others. This is a course for students interested in reading essays and in thinking about how this nonfiction prose genre developed and how it works. No special background in literary history is assumed.

**Special Topics****ENGL 235 Rewriting the Classics: Stories of Travels and Encounters**

Spring. 4 credits. E. DeLoughrey.

This course will examine the way particular narratives travel across time and space. We will read canonical works of literature produced during the era of the British empire, such as *The Tempest*, *Robinson Crusoe*, *Jane Eyre*, and *Heart of Darkness* and position them in relation to novels that rewrite, contest, and mitigate the depiction of contact between Europeans and others. We will not only interrogate the relationship between writers from the colonies (in Africa, India, and the Caribbean) and those from Great Britain, but also examine the ways in which these British texts were revisions of earlier European travel narratives and legends. Requirements: active class participation, student presentations, a few short essays, and a final paper.

**ENGL 263 Interpreting Hitchcock (also THETR 263)**

Fall. 4 credits. Lab fee. Enrollment limited to 20. L. Bogel.

Through detailed analysis of about 15 of Hitchcock's major films—from early British talkies (*Blackmail*, *The Thirty-Nine Steps*), to early 40s work in Hollywood (*Shadow of a Doubt*, *Notorious*), and major American films of his late period (*Rear Window*, *Psycho*, *The Birds*, *North by Northwest*)—we will consider Hitchcock as a major technical and stylistic innovator in the history of cinema. As texts for psychoanalytic and feminist approaches to study, his films invite questions about film language, the ethics of spectatorship, and the nature of desire and sexuality. For this writing-intensive seminar—including two essays, numerous reading responses, and viewing exercises in close analysis—students must be free to attend Monday evening screenings of the films.

**ENGL 268 Politics and Culture in the 1960s (also AM ST 268)**

Spring. 4 credits. P. Sawyer.

Were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an impassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, the Vietnam War, the counterculture, the New Left, the woman's movement and the movement for gay rights. Texts will include *The Autobiography of Malcolm X*, *The Electric Kool-Aid Acid Test*, *Dispatches*, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, and manifestos.

**Engl 273 Children's Literature**

Spring. 4 credits. J. Adams.

An historical study of children's literature from the seventeenth century to the present, principally in Europe and America, which will explore changing literary forms in relation to the social history of childhood. Ranging from oral folklore to contemporary novelistic realism (with some glances at film narrative), major figures will include Perrault, Newbery, the Grimms, Andersen, Carroll, Alcott,

Stevenson, Burnett, Kipling, the Disney studio, E. B. White, C. S. Lewis, Sendak, Silverstein, Mildred Taylor, and Bette Greene. We'll also encounter a variety of critical models—psychoanalytic, materialist, feminist, structuralist—that scholars have employed to explain the variety and importance of children's literature.

**ENGL 291 The American 1920s: Literature and Culture (also AM ST 291)**

Fall. 4 credits. B. Maxwell.

The course will take a broad approach to the cultural activities of the decade following the First World War and preceding the Great Depression. Topics will include the new motives, forms, and audiences of fiction and poetry; literary realism under duress; the Harlem Renaissance; postwar blues and the influenza epidemic; suffragist politics and the New Woman; *Fugitive* revanchism; the masses as a matter for intellectual scrutiny; Fordism; the Red Scare, nativism, and the fear of anarchism; the cultures of radio, children's illustrated books, popular song and jazz. We will ask: what made for aesthetic radicalism and political radicalism in the period; what were the relations of pleasure and labor; how differentiated was the self-consciousness of the "Lost Generation"; and what appear to be the legacies of the decade? Readings will include essays by Randolph Bourne, Margaret Sanger, Walter Lippmann, W. E. B. DuBois, and Lewis Mumford; fiction by Jean Toomer, Ernest Hemingway, Sherwood Anderson, Dorothy Parker, Nella Larsen, John Dos Passos, Samuel Ornitz, Sinclair Lewis, Dashiell Hammet, and perhaps even F. Scott Fitzgerald; and poetry by Pound, Eliot, H. D. Williams, Langston Hughes, Hart Crane, Marianne Moore, and Louis Zukofsky.

**Courses for Sophomores, Juniors, and Seniors**

Courses at the 300 level are open to sophomores, juniors, and seniors and to others with the permission of the instructor.

**ENGL 301 Mind and Memory (also S HUM 301, THETR 301, and MUSIC 372)**

Spring. 4 credits. J. Morgenroth.

For complete description see Society for the Humanities 301.

**ENGL 302 Literature and Theory (also ENGL 602 and COM L 302 and 622)**

Fall. 4 credits. J. Culler.

Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings by Roland Barthes, Judith Butler, Jacques Derrida, Michel Foucault, Barbara Johnson, Jacques Lacan, and others. No previous knowledge of literary theory is assumed.

**[ENGL 308 Icelandic Family Sagas #**

4 credits. Next offered 2001–2002.]

**[ENGL 310 Old English in Translation #**

4 credits. Next offered 2001–2002.]

**[ENGL 311 Old English (also ENGL 611) #**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**[ENGL 312 Beowulf (also ENGL 612) #**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. One semester's study, or the equivalent, of Old English is a prerequisite. Next offered 2001–2002.]

**ENGL 319 Chaucer #**

Fall. 4 credits. R. Farrell.

This course may be used as one of the three pre-1800 courses required of English majors.

This course will begin with the study of the major *Canterbury Tales* and some of his minor works, such as *The Book of the Duchess*. If time permits, we will read at least part of his great epic romance *Troilus and Criseyde*. All works will be read in Middle English, but ample time will be devoted to learning the language, for it is impossible to read Chaucer as a poet without Middle English. There will be lectures on Chaucer's life, society, literary, and religious content. There will be take-home, mid-, and end-of-term exams and student presentations.

**[ENGL 320 Literature of the English Renaissance (1500–1660) #**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**ENGL 321 Spenser and Malory (also RELST 319) #**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Informal lecture and discussion. 2 papers, no exams. C. Kaske.

Paired selections covering about half of Malory's *Morte d'Arthur* and half of Spenser's *Faerie Queene*. Chrétien's romances, *Sir Gawain and the Green Knight*, and some of Spenser's minor poems will be mentioned occasionally as background. Comparisons will assess possible literary influence, the distinctive genius of each author as a writer of romance, and the development of Arthurian romance from the Middle Ages to the Renaissance.

**ENGL 327 Shakespeare: Gender and Society (also WOMNS 327) #**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Correll.

A study of Shakespearean texts—comedy, tragedy, narrative poetry—in which questions of gender and power are of central importance. The reading will include *The Rape of Lucrece*, *The Taming of the Shrew*, *Antony and Cleopatra*, *Troilus and Cressida*, and *Coriolanus*, among others. Lectures and discussions will address issues of form, thematic content, historical context, and some lively cultural debates of the Renaissance.

**[ENGL 328 The Bible #**

4 credits. Next offered summer 2001.]

**ENGL 329 Milton #**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. G. Teskey.

An introduction to the life, poetry, and ideas of John Milton, the most important English poet after Shakespeare.

**ENGL 330 Restoration and Eighteenth-Century Literature #**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Bogel.

Close reading of texts in a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

**ENGL 333 The Eighteenth-Century English Novel #**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Saccamano.

A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction; romance, realism, satire, and the gothic; heroic and mock-heroic modes; sentiment, sensibility, and sexuality; race and gender; and the forms and uses of narrative. Readings may include Behn's *Oroonoko*, Defoe's *Moll Flanders*, Richardson's *Clarissa*, Fielding's *Tom Jones*, Johnson's *Rasselas*, Walpole's *The Castle of Otranto*, Sterne's *A Sentimental Journey*, and Austen's *Emma*.

**ENGL 340 The English Romantic Period #**

Spring. 4 credits. C. Chase.

Readings in various writers from the early 1790s to the early 1820s—among them Blake, Wordsworth, Wollstonecraft, Coleridge, Byron, Mary Shelley, Percy Shelley, and Keats—with major emphasis on poetry but with attention also to prose fiction, letters, and political and literary essays. The course will be concerned with close reading of formal experiments in lyric and narrative, and analysis of their relation to political and cultural issues and contexts in an age of national reform and international revolution and conflict.

**ENGL 345 Victorian Controversies**

Fall. 4 credits. S. Siegel.

Economic, political and technological changes transformed the nineteenth century. We will consider some of the controversies these transformations provoked in England and Ireland. Our readings will be selected chiefly from leading nineteenth-century periodicals and from essays that contributed greatly to shaping public opinion. We will explore the social problems Victorian critics and artists identified, the various solutions they proposed, and their contrasting visions of their nation and its colonies. The men and women who contributed to the periodical press, and who anticipated new cultural forms were preoccupied with urgent questions about themselves: Was their century marked by progress or by decline? Would machines degrade or ennoble workers? Did aesthetic experience complement or compete with religious doctrine? Were art and science dependent on or opposed to each other? Should all forms of expression be permitted or should certain forms be censored? Should the colonies be permitted to rule themselves or remain dependent on England? Would prestige be gained if institutions of higher learning awarded degrees to women? Was "manliness" revealed through "character" or through "behavior"? In addition to these intellectual conflicts, we will be attentive to the emergence of new visual forms that

participated in and provoked controversy. Accordingly, we will view photographs and descriptions of England's great Crystal Palace Exhibition of 1851, the objections such displays aroused, as well as the emergence of new and controversial fashions in painting, clothing, interior design, and home furnishings. Authors will include Arnold, Browning, Eliot, Morris, Pater, the Rossetis, Ruskin, Shaw, Swinburne, Wilde, and Yeats. Classes will be by lecture and discussion. Examinations will be in-class and take-home exercises.

**[ENGL 348 Studies in Women's Fiction (also WOMNS 348)]**

4 credits. Next offered 2001-2002.]

**ENGL 350 The Modern Tradition I: 1890-1930**

Fall. 4 credits. D. Schwarz.

Critical study of major works by Hardy, Conrad, Lawrence, Joyce, Woolf, Eliot, Yeats, Hopkins, Wilde, Wallace Stevens, and others. While the emphasis will be on close reading of individual works we shall place the authors and works within the context of literary and intellectual history. The course will seek to define the development of literary modernism (mostly but not exclusively in England), and relate literary modernism in England to that in Europe and America as well as to other intellectual developments. We shall be especially interested in the relationship between modern literature and modern painting and sculpture, occasionally looking at slides.

**[ENGL 355 Decadence (also COM L 355 and WOMNS 355)]**

4 credits. Next offered 2001-2002.]

**[ENGL 356 Postmodernist Fiction]**

4 credits. Next offered 2001-2002.]

**ENGL 361 Early American Literature (also AM ST 361) #**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required for the English major. J. Porte.

American literature and culture from the 1630s to the 1830s, including some of the following: prose and poetry of the Puritans (Winthrop, Bradford, Bradstreet, Rowlandson, Taylor, Cotton Mather) study of the witchcraft phenomenon; Edwards and Franklin; Jefferson; Crèvecoeur; Rebecca Rush's Kelroy; selections from Irving's Sketchbook; the writing of William Apess; the poetry of Bryant; a novel by James Fenimore Cooper; the early work of Emerson and Hawthorne.

**[ENGL 362 The American Renaissance (also AM ST 362)]**

4 credits. Next offered 2001-2002.]

**[ENGL 363 The Age of Realism and Naturalism (also AM ST 363)]**

Fall. 4 credits. Next offered 2001-2002.]

**[ENGL 364 American Literature Between the Wars (also AM ST 364)]**

4 credits. Next offered 2001-2002.]

**ENGL 366 The Nineteenth-Century American Novel (also AM ST 366)**

Spring. 4 credits. D. McCall.

A study of American fiction in its first flowering. This course will include such major works as Hawthorne's *The Scarlet Letter*, Melville's *Moby-Dick*, James's *The Portrait of a Lady*, and Mark Twain's *Adventures of Huckleberry Finn*.

**[ENGL 369 Studies in Film Analysis: Fast Talking Dames]**

4 credits. Next offered 2001-2002.]

**ENGL 370 Victorian Novel (also WOMNS 370)**

Fall. 4 credits. E. Hanson.

A survey of major British novels of the nineteenth century. Victorian novels are well known for their marriage plots—narratives that presume that marriage or suicide is the only fate appropriate for the heroine—nevertheless, the best of these novels offer rich insights into the psychology and social condition of women, the historical construction of the Victorian gentleman, and the literary articulation of sexual pleasure. Topics for discussion will include the development of the novel as a literary form in the nineteenth century, reading and writing as a social practice, the politics of class and empire, the representation of marriage and family life, and the rhetoric of love and desire. We will read novels by Emily and Charlotte Brontë, William Makepeace Thackeray, George Eliot, and Thomas Hardy, as well as the Regency writer Jane Austen.

**ENGL 372 English Drama to 1700 (also THETR 372) #**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. S. McMillin.

Major plays and other events in the English theatre, from the medieval craft cycles through the age of Shakespeare and into the Restoration period. Writers include Marlowe, Kyd, Shakespeare, Dekker, Jonson, Middleton, Beaumont and Fletcher, Webster, Wycherley, and Congreve.

**ENGL 373 English Drama from 1700 to the Present (also THETR 373)**

Spring. 4 credits. S. McMillin.

The modern side of English drama, from the Restoration to contemporary plays. Writers include Behn, Congreve, Dryden, Tate, Sheridan, Shelley, Robertson, Shaw, and Churchill.

**ENGL 376 Survey in African American Literature: 1918 to present**

Spring. 4 credits. H. Spillers.

This course will select its readings from the genres of poetry, drama, fiction, and nonfiction produced by black American writers from the period of the Harlem Renaissance, to the present. Readings will include poems by Harlem Renaissance poets, the poets of African-American modernism, i.e., Gwendolyn Brooks and Robert Hayden, and some of the poetry of the Black Arts Movement of the 60s, by way of Leroi Jones/Imamu Baraka's and Larry Neal's *Black Fire*; plays by Lorraine Hansberry, Ed Bullins, and August Wilson; nonfictional and fictional writings by Malcolm X, Martin Luther King, Nella Larsen, Jean Toomer, Zora Neale Hurston, Toni Morrison, and Nate Mackey. *Cane*, *The Autobiography of an Ex-Colored Man*, *Passing*, *The Autobiography of Malcolm X*, *Letter from an Birmingham Jail*, *Black Boy*, *Invisible Man*, *Flight to Canada*, *Oxherding Tales*, *Middle Passage*, *Jazz*, and *The Bedouin Hornbook* will be among the selected texts. The course is designed for majors, but will be open to all interested students.

**[ENGL 378 American Poetry Since 1950 (also AM ST 372)]**

4 credits. Next offered 2001-2002.]

**ENGL 379 Reading Nabokov**

Fall. 4 credits. G. Shapiro.

For complete description, see Russian literature 385.

**ENGL 381 Reading as Writing**

See complete course description in section headed Expository Writing.

**ENGL 382-383 Narrative Writing**

See complete course description in section headed Creative Writing.

**ENGL 384-385 Verse Writing**

See complete course description in section headed Creative Writing.

**ENGL 386 Philosophic Fictions**

See complete course description in section headed Expository Writing.

**ENGL 387 Autobiography: Theory and Practice**

See complete course description in section headed Expository Writing.

**ENGL 388 The Art of the Essay**

See complete course description in section headed Expository Writing.

**[ENGL 390 Autobiography: Memoir, Memory, and History]**

4 credits. Next offered 2001-2002.]

**ENGL 395 Video: Art, Theory, and Politics (also THETR 395)**

Fall. 4 credits. T. Murray.

The course will offer an overview of video art, alternative documentary video (which often incorporates styles of "video art"), and new digital art. It will analyze four phases of the history of video: 1) the development of video from its earliest turn away from television; 2) video's relation to performance art and installation; 3) video's incorporation in film through experiments in technology; 4) digital art's transformation of video. Screenings will include early political and feminist video (from Ant Farm, Chip Lord, Martha Rosler, Joan Jonas, Lynn Hirshman, and Paper Tiger TV, etc.), conceptual video of the 80s and 90s (Woody Vasulka, Thierry Kuntzel, Mary Lucier, Bill Viola, Gary Hill, Steve Fagin, etc.), gay and multicultural video of the 90s (Muntadas, Juan Downey, the Yonemotos, Jerry Tartaglia, Richard Fung, Pratibha Parmar, Marlon Riggs, Keith Piper, etc.), and art on the net and CD-Rom (Chris Marker, Reginald Woolery, Guillermo Gómez-Peña, etc.). Secondary theoretical readings on postmodernism, video theory, multiculturalism, and documentary will provide students with a cultural and political context for the discussion of video style, dissemination, and reception.

**ENGL 396 Introduction to Global Women's Literature (also WOMNS 396)**

Spring. 4 credits. E. DeLoughrey.

This course is an introduction to contemporary women's writing in English from "postcolonial" regions such as the Pacific, Caribbean, India, and Africa. During the semester we will look at how women from these regions depict the process of migration within the nation (from rural to urban spaces) or from the "postcolony" to metropolises such as England. As women are generally associated with private, domestic space, this course will explore the motifs of exile and border crossing and sketch out the ways in which gender, nation, and class relate to predominantly masculinist productions of "traveling

theory." We will read novels/poetry by Joan Riley, Merle Hodge, Patricia Grace, Bapsi Sidhwa, and Grace Nichols and align these texts with theoretical works by Edward Said, Caren Kaplan, Paul Gilroy, and M. Nourbese Philip. Requirements: active class participation, student presentations, a few short essays, and a final paper on the writer of your choice.

**ENGL 397 Policing and Prisons in American Culture (also AM ST 395)**  
Spring. 4 credits. B. Maxwell.

Having attained the highest number of incarcerated persons of any nation on earth, while subjecting the citizenry to ordeals that most recently bear the names King, Louima, and Diallo, United States regimes of policing and imprisonment compel historical and critical attention. This course considers policing and imprisonment in United States culture, stressing prisoners' writing, song, slang, and graphic art. Edgar Allan Poe wrote in 1849: "in looking back through history...we should pass over all biographies of 'the good and great,' while we search carefully the slight records of wretches who died in prison, in Bedlam, or upon the gallows." These records—novels, stories, poems, plays, raps, songs, essays, autobiographies, letters, manifestoes, paintings, drawings, crafts, and tattoos—are of course less slight now than they were in Poe's day and will make up the greater part of our source material. In addition to work by imprisoned people, readings will draw on carceral theory, activist documentation, and the history of criminal justice. Finally, we will consider questions raised by noncriminal confinement in U.S. history: slavery, indentured servitude, the reservation system for indigenous peoples, prisoners of war in the Civil War, the wartime internment of Japanese Americans, and carceral and punitive operations of the Immigration and Naturalization Service.

## Courses for Advanced Undergraduates

Courses at the 400 level are open to juniors and seniors and to others by permission of instructor unless other prerequisites are noted.

**ENGL 401 The Vertical City (also S HUM 417)**

Spring. 4 credits. P. Saint-Armour.  
For complete description, see Society for the Humanities 417.

**ENGL 402 Literature as Moral Inquiry**

Spring. 4 credits. S. Mohanty.  
What can literary works, especially novels and short stories, tell us about moral issues? Should they be seen as suggesting a form of moral inquiry similar to the kind of philosophical discussion we get in, say, Aristotle's *Nicomachean Ethics*? Do they deal with the same range of issues? Can reading philosophical works in ethics together with novels that deal with similar themes help us understand these themes better? This course is an attempt to answer these questions. We will read selections from key texts in moral philosophy, including works by Aristotle, Kant, Marx, Nietzsche, and Rawls. Our attempt will be to use these works to help us understand the nature of moral debate and inquiry in novels like Eliot's *Middlemarch*, James's *Portrait of a Lady*, Morrison's *Beloved*, Woolf's *Mrs. Dalloway*, Conrad's *Heart of Darkness*, and Achebe's *Things Fall Apart*. Other writers we will most probably read include Nadine Gordimer, Doris Lessing, and Kazuo Ishiguro.

The emphasis will be on close reading, with particular attention to the relationship between formal elements (such as the use of narrative techniques) and the moral questions the texts organize and explore. Assignments include two papers and a journal.

**ENGL 403 Studies in American Poetry: Great Books, 1855–1926 (also AM ST 403)**

Fall. 4 credits. R. Gilbert.  
A close study of seven classic volumes of American poetry, mainly published in the second two decades of the twentieth century, with careful attention to each book's thematic design and its stylistic and formal range as well as to the individual poems it contains. We'll also consider each book's critical reception and its influence on later American poetry. Books of poetry to be studied: Walt Whitman, *Leaves of Grass* (1855–60), Gertrude Stein, *Tender Buttons* (1914), Robert Frost, *North of Boston* (1914), Wallace Stevens, *Harmonium* (1923), William Carlos Williams, *Spring and All* (1923), Marianne Moore, *Observations* (1924), Hart Crane, *White Buildings* (1926).

**ENGL 404 History into Fiction: Nazis and the Literary Imagination (also COM L 404 and GERST 414)**

Fall. 4 credits. E. Rosenberg.  
The 12 years of Hitler's rule remain the most critical, "longest" years of the century. We shall read some eight texts by Anglophone and Continental novelists (and a few playwrights and poets) that explore the salient features of the regime: Weimar and Hitler's rise to power (e.g., Mann's "Mario and the Magician," Brecht's *Arturo Ui*, Isherwood's *Goodbye to Berlin*); civilian life in Nazi Germany (Brecht's "Jewish Wife" and other one-act plays, Günter Grass's *Tin Drum*); World War II and the Occupation of Europe (e.g., Camus's *The Plague*, Heinrich Böll's short fiction, Anne Frank's *Diary*); the persecution of the European Jews and genocide (e.g., Sartre's "Childhood of a Leader," Peter Weiss's *The Investigation*, Borowski's *This Way for the Gas, Spiegelman's Maus I or Maus II*, Ozick's "The Shawl"). Lastly some lyrics by Celan, Nelly Sachs, Anthony Hecht. Brief ancillary selections by historians and memorialists (Arendt, Primo Levi, Bettelheim) and the instructor's private documentation of life under Hitler. Two papers, no exam.

**ENGL 413 Middle English (also ENGL 613) #**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**ENGL 415 Medieval Writers and the City (also ENGL 615 and S HUM 409) #**

Fall. 4 credits. A. Galloway.  
For complete description, see Society for the Humanities 409.

**ENGL 416 Chaucer and the Politics of Love #**

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**ENGL 417 Early Medieval Archaeology and Literature (also ENGL 617 and ARKEO 417 and 617) #**

Fall. 4 credits. Prerequisite: permission of instructor. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.

This course is intended to provide an overview of the early middle ages in what is now called Great Britain. A massive amount of evidence on the material culture has come to light in the past 50 years, evidence which permits us a far better comprehension of written sources. We will start with a reading of the great Old English epic *Beowulf* and a close study of the material culture of a society in transition from pagan Germanic to cosmopolitan Christian culture. Our next focus will be Bede's *Ecclesiastical History of the English People* and the material evidence for the complex cultural developments in England, Ireland, Scandinavia, and the continent. There will be frequent student oral reports, a take-home midterm, and a take-home final OR extended research paper. Graduate students will be expected to do more detailed oral reports and research papers.

**ENGL 420 Biblical Cities (also ENGL 620 and S HUM 408)**

Fall. 4 credits. G. Teskey.  
For complete description, see Society for the Humanities 408.

**ENGL 421 Urban Archeology of the Manuscript (also ENGL 621 and S HUM 403)**

Spring. 4 credits. A. Galloway.  
For complete description, see Society for the Humanities 403.

**[ENGL 423 Seventeenth-Century Lyric #**

Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Not open to sophomores. Next offered 2001–2002.]

**[ENGL 425 Elizabethan and Jacobean Drama (also ENGL 628) #**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**ENGL 426 Seminar in Theatre History: The Provincetown Players and Greenwich Village Culture: 1915–1922 (also THETR 429)**

Fall. 4 credits. J. E. Gainor.  
For complete description, see Theatre Arts 429.

**[ENGL 427 Studies in Shakespeare #**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**[ENGL 432 Studies in the Eighteenth Century: The Development of Print Culture #**

4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Next offered 2001–2002.]

**[ENGL 434 Electronic Art and Culture**

4 credits. Next offered 2001–2002.  
T. Murray.]

**ENGL 437 Fiction(s) of Race, Fact(s) of Racism: Perspectives from South African and Afro-American Literatures**

Spring. 4 credits. B. Jeyifo.  
This course examines works of South African and Afro-American fiction and drama in light of the powerful claim that "race" is a socially constructed fiction with no scientific, rationally provable basis to it. The works explored in the course also see race as a fiction, but consistent with the dialectics of artistic representation, they juxtapose the fiction of

race to the fact(s) of racism to pose the fundamental question: Can we imagine a time, a place, a world where racism, like "race," will become fiction? Authors examined will include Baraka, Morrison, Naylor, August Wilson, Gordimer, Nkosi, Fugard, and Coetzee.

**[ENGL 439 Austen in the Eighteenth Century #**

4 credits. Next offered 2001-2002.]

**ENGL 443 The Dandy in London and Dublin**

Spring. 4 credits. S. Siegel.

The emergence of the figure of the dandy constituted a new cultural form. This seminar will trace the transformation of that form, in and out of fiction. Our readings, drawn from novels and plays, memoirs, anecdotes, reviews, and graphic representations in the periodical press, will be guided by four questions: How does the word "dandy" behave in different temporal and geographical contexts? How and why does the form change? From whom were "dandies" thought to differ? How are we to understand the politics of this literary legend and of this cultural form? Changing perceptions of "gender" and "sexuality" will claim our attention throughout the semester. Readings will include Baudelaire, Beerbohm, Bulwer, Byron, Carlyle, Chesterfield, Brummell, Lover, Pater, Sheridan, Stein, Wilde, and Woolf.

Some familiarity with the history of England and Anglo-Irish and Anglo-French relations would be helpful and a reading knowledge of French would not hurt. There are, however, no prerequisites for this course and students across the disciplines are welcome. Discussion, seminar presentations, and one paper.

**[ENGL 448 The American Short Story**

Fall, spring, or summer. 4 credits. Next offered 2001-2002.]

**ENGL 449 Nineteenth-Century Poetry, Gender, and the Literary Tradition**

Spring. 4 credits. J. Najarian.

This course will examine how Victorian Poetry follows from, argues with, imitates, criticizes, and extends the poetry of the Romantic Period, with particular attention to issues of gender and sexuality. It is appropriate for students who may not be familiar with Romantic poetry as well as those who are, and it requires no previous knowledge of Victorian verse. We will begin with lyrics and prose by William Wordsworth, John Keats, Percy Shelley, and Felicia Hemans. The bulk of the course will focus on canonical and noncanonical Victorians, including Alfred Tennyson, Matthew Arnold, Christina Rossetti, Robert Browning, Dante Gabriel Rossetti, Gerard Manley Hopkins, Coventry Patmore, and Charlotte Mew.

**ENGL 452 Wilde and Woolf: On Style (also ENGL 652)**

Fall. 4 credits. S. Siegel.

This seminar will consider the question of style: what does the word mean; why has it claimed attention; how has it behaved in the work of two authors whose writing among their contemporaries marked distinctive departures? We will explore Oscar Wilde and Virginia Woolf as readers of literary and social texts. Along the way, we will direct our attention to the implicit expectations we bring to our understanding of "Victorians" and "Modernists." Selections will be drawn from the full range of Wilde and Woolf's work. Our

principal texts, however, will be limited to a few essays by each author.

**ENGL 454 American Musical Theatre (also MUSIC 490 and THEATRE 454)**

Spring. 4 credits. Prerequisite: English 272 or Theatre Arts 240-241 plus some ability to read music. Limited to 15 students. S. McMillin.

A close reading of some seven or eight leading examples of the American musical, together with their sources, from *Showboat* to *Sweeney Todd*. A chronological approach will give a historical basis to the course, but the primary concern will be learning how to analyze musical drama and how to handle the problems and opportunities of interpretation integral to this complex theatrical form. Readings will include Rogers and Hammerstein's *Oklahoma!* and its source, Lynn Riggs' *Green Grow the Lilacs*; the Gershwins' *Porgy and Bess* and its source, Dubose Heyward's novel *Porgy*; Loesser and Burrows' *Guys and Dolls* and its source stories by Damon Runyon; Kander and Ebb's *Cabaret* and its source, Isherwood's *Berlin Stories*.

**ENGL 458 Imagining the Holocaust (also ENGL 658, JWST 458 and 658, COM L 483 and 683)**

Spring. 4 credits. D. Schwarz.

What is the role of the literary imagination in keeping the memory of the Holocaust alive for our culture? We shall examine major and widely read Holocaust narratives which have shaped the way we understand and respond to the Holocaust. As we move further away from the original events, why do the kinds of narratives with which authors render the Holocaust horror evolve to include fantasy and parable? Employing both a chronological overview and a synchronic approach—which conceives of the authors having a conversation with one another—we shall discover recurring themes and structural patterns in the works we read.

We shall begin with first person reminiscences—Wiesel's *Night*, Levi's *Survival at Auschwitz*, and *The Diary of Anne Frank*—before turning to searingly realistic fictions such as Hersey's *The Wall*, Kosinski's *The Painted Bird*, and Ozick's "The Shawl." In later weeks, we shall explore diverse kinds of fictions and discuss the mythopoetic vision of Schwarz-Bart's *The Last of the Just*, the illuminating distortions of Epstein's *King of the Jews*, the Kafkaesque parable of Appelfeld's *Badenheim 1939*, and the fantastic cartoons of Spiegleman's *Maus* books. We shall also include Kineally's *Schindler's List*, which was the source of Spielberg's academy award winning film, and compare the book with the film.

**[ENGL 459 Contemporary British Drama**

4 credits. Next offered 2001-2002.]

**ENGL 460 Riddles of Rhythm**

Fall. 4 credits. D. Fried.

What makes a poem's pulse beat? How and why does language ordered into rhythm affect us? How do poets shape our responses through rhythmic means? What are some of the ways that poets and their readers have tried to make sense of the essence and effects of rhythm? Is poetic rhythm best understood on the model of music? Does ordinary language outside of poetry have its own rhythms? What does the arrangement of poems in lines have to do with its rhythms? Is "free verse" free from rhythm? We will read a variety of poems from the Renaissance to the

present, and a range of essays about poetry in an attempt to answer these questions. Writing assignments will include interpretive essays about poems, analysis of accounts of poetic rhythm, including accounts offered by the poets themselves, and occasional short exercises working with poetic rhythm and other formal features of poems. Poets to be studied may include Shakespeare, Herbert, Marvell, Milton, Pope, Keats, Byron, Poe, Dickinson, Whitman, Hopkins, Hardy, Owen, Frost, Williams, Moore, Bishop, and Ammons. No previous study of poetic meter or rhythm is assumed.

**ENGL 462 Between Aztlan and Queens: Latina Culture and the Making of Space (also LSP 462)**

Fall. 4 credits. M. P. Brady.

How do cultural practices like music and film produce space? What do freeways, zoning laws, advertising codes, and hiking trails have to do with literature? How have changing urban demographics and immigration shaped, even "Latinoized," cities, and how have these changes been reflected or resisted in Latina cultural production? How does paying attention to space change our reading practices? This interdisciplinary course will examine these questions and explore how place and space shape Latina cultures and how Latina cultures shape place and space. We will draw from scholarship in fields such as urban planning, law, architecture, geography, anthropology, literature, and history. Students should plan to do extensive reading, write two to three papers, and produce a research paper.

**[ENGL 463 Problems in the Novel: Murder and Crimewriting**

4 credits. Next offered 2001-2002. M. Seltzer.]

**[ENGL 464 Emerson and Poe**

4 credits. Next offered 2001-2002. R. Morgan.]

**[ENGL 465 Proseminar in American Studies (also AM ST 465)**

4 credits. Next offered 2001-2002.]

**[ENGL 466 James on Film**

4 credits. Next offered 2001-2002.]

**[ENGL 469 Faulkner (also AM ST 469)**

4 credits. Next offered 2001-2002.]

**[ENGL 470 Studies in the Novel: Hemingway, Fitzgerald, Faulkner**

4 credits. Next offered 2001-2002.]

**ENGL 471 Humor in Literature**

Fall. 4 credits. A. Lurie.

Why do we laugh, and at what? Why do some works seem funny at certain periods and in certain social contexts? This course will look at different ways of answering these questions, and at different kinds of literary humor: romantic comedy, black comedy, farce, satire, parody, and nonsense. Among works that may be read are humorous folktales, comic verse, *A Midsummer Night's Dream*, *The Way of the World*, *Gulliver's Travels*, *Alice in Wonderland*, *The Importance of Being Earnest*, *Patience*, *Waiting for Godot*, and stories by James Thurber, Flannery O'Connor, Grace Paley, Philip Roth, Donald Barthelme, and Garrison Keillor.

**[ENGL 473 American Indian Autobiography**

4 credits. Next offered 2001-2002.]

**[ENGL 474 Contemporary African American Poetry]**

4 credits. Limited to 15 students. Admission by permission of instructor only. Next offered 2001–2002.]

**ENGL 475 Studies in the Twentieth Century: Writers' Writers in Twentieth-Century Literature**

Spring. 4 credits. Limited to 20 students. L. Herrin.

The term "a writers' writer" has sometimes been regarded as a dubious distinction. Does a writer's appeal to his fellow writers come at the expense of a broader audience? Can a writer write too well for his own good? Does "elegance" carry a connotation of "exclusiveness"? Is there something unAmerican (and, hence, proEuropean) about too much attention to style? I propose reading a list of fictional works spanning the century to see which of them survive because of or in spite of their heightened attention to style?

Opinionated discussion from start to finish and wise and passionate papers defending (or deflating) your favorite writers' writer. Works taken from the following authors: Henry James, Ernest Hemingway, Katherine Ann Porter, Eudora Welty, William Gass, J. D. Salinger, John Hawkes, Grace Paley, Vladimir Nabokov, James Salter, and Cormac McCarthy.

**[ENGL 476 Global Women's Literature (also WOMNS 476)]**

4 credits. Next offered 2001–2002.]

**[ENGL 477 Studies in Native American Literature: Native American Literature and Criticism (also ENGL 677)]**

4 credits. Next offered 2001–2002. Staff.]

**[ENGL 479 Jewish-American Writing (also AM ST 479 and JEWST 478)]**

4 credits. Next offered 2001–2002. J. Porte.]

**ENGL 480–481 Seminar in Writing**

Fall, 480; spring 481. 4 credits.

See complete description in section headed Creative Writing.

**ENGL 483 Seminar in Comparative Twentieth-Century Anglophone Drama**

Fall. 4 credits. B. Jeyifo.

The course will explore twentieth-century Anglophone drama in diverse areas of the English-speaking world. Through works of Irish, African, Caribbean, and U.S. playwrights like Friel, Soyinka, Fugard, Walcott, and Shange, the seminar will be organized around two principal issues: the use of folk, ritual, vernacular, and carnivalesque performance idioms to transform the received genre of Western literary drama; themes of empire, colony, and postcolony in the making of the modern world. Some knowledge of classical and avantgarde theories of drama and theatre would be useful, but is not a prerequisite for this course.

**ENGL 484 Poetry and Rhetoric (also ENGL 683, COM L 467 and 667 and FRLIT 437 and 637)**

Fall. 4 credits. C. Chase.

For complete description, see Comparative Literature 467.

**[ENGL 490 Literatures of the Archipelagoes: Caribbean and Pacific "Tidalectics"]**

4 credits. Next offered 2001–2002.

E. DeLoughrey.]

**ENGL 491 Honors Seminar I**

Fall. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

**Experimental Novels by Twentieth-Century Women M. Hite.**

Innovative (weird, difficult) prose narratives by Dorothy Richardson, Virginia Woolf, H. D. (Hilda Doolittle), Djuna Barnes, Stevie Smith, Doris Lessing, Toni Morrison, Margaret Atwood and Angela Carter, along with some critical and theoretical readings. Seminar participants will do a weekly e-mail assignment, at least one class presentation, and two major papers.

**ENGL 492 Honors Seminar II**

Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

**Section I: Reading Joyce's *Ulysses* D. Schwarz.**

A thorough, episode-by-episode study of the art and meaning of Joyce's *Ulysses*. We will explore the relationship between it and the other experiments in modernism and show how *Ulysses* redefines the concepts of epic and hero. We will also view *Ulysses* to address major issues in literary study and to test various critical and scholarly approaches. Such a self-conscious inquiry into theories and methods should prepare students to confront other complex texts, as well as help them define their own critical positions as they plan their senior honors theses.

**Section II: Victorians and the Unconscious P. Sawyer.**

Though Freud claimed that his theories of unconscious mental functioning were universally valid, they are also in some ways products of Victorian culture. This course will look at some of Freud's antecedents in Victorian literature by asking two questions: To what extent does Freudian psychoanalysis help us interpret literary texts? And to what extent do they help us to "interpret" Freud—that is, to illuminate ways of thinking about identity, sexuality, and social order that Freud shared with the Victorians, and to some extent with us as well? We will consider such topics as the theory of the "hidden soul," the double, the *id* as a dangerous social force, female sexuality, the woman as confessor and patient, and the invention of "perversions." Readings will include *The Autobiography of John Stuart Mill*, *Great Expectations*, *The Lifted Veil*, *Dracula*, and *The Picture of Dorian Gray*; also, essays by Freud and Michel Foucault's powerful challenge to Freud, *The History of Sexuality* (Vol. I). Students will write a research paper that may serve as a preparation for the honors thesis.

**ENGL 493 Honors Essay Tutorial I**

Fall or spring. 4 credits. Prerequisites: senior standing and permission of Director of the Honors Program.

**ENGL 494 Honors Essay Tutorial II**

Fall or spring. 4 credits. Prerequisites: English 493 and permission of Director of the Honors Program.

**ENGL 495 Independent Study**

Fall or spring. 2–4 credits. Prerequisites: Permission of departmental adviser and director of undergraduate studies.

**Courses Primarily for Graduate Students**

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600-level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each term.

**Graduate English Courses for 2000–2001 Fall****ENGL 600 Colloquium for Entering Students**

M. Hite.

**ENGL 602 Literature and Theory (also ENGL 302 and COM L 302/622)**

J. Culler.

**ENGL 615 Medieval Writers and the City (also ENGL 415 and S HUM 409)**

A. Galloway.

**ENGL 617 Early Medieval Archaeology and Literature (also ENGL 417 and ARKEO 417/617)**

R. Farrell.

**ENGL 620 Biblical Cities (also ENGL 420 and S HUM 408)**

G. Teskey.

**ENGL 630 Aesthetics in the Eighteenth Century (also COM L 630)**

N. Saccamano.

**ENGL 646 Studies in Victorian Literature: Gender in Fiction**

P. Sawyer.

**ENGL 652 Wilde and Woolf: On Style (also ENGL 452)**

S. Siegel.

**ENGL 655 Decadence (also WOMNS 655 and COM L 655)**

E. Hanson.

**ENGL 665 American Renaissance**

J. Porte.

**ENGL 670 Joyce's *Ulysses* and the Modern Tradition**

D. Schwarz.

**ENGL 683 Poetry and Rhetoric (also ENGL 484, COM L 467/667 and FRLIT 437/637)**

C. Chase.

**ENGL 690 Travelling Natives: Roots and Routes in Pacific and Caribbean Island Literature**

E. DeLoughrey.

**ENGL 694 Marxism and Postcolonial Discourse**

B. Jeyifo.

**ENGL 721 Baroque Perspectives (also COM L 721)**

T. Murray.

**ENGL 780.01 M.F.A. Seminar: Poetry**

P. Janowitz.

**ENGL 780.02 M.F.A. Seminar: Fiction**

H. Viramontes.

*Spring***ENGL 619 Chaucer**

W. Wetherbee.

**ENGL 621 Urban Archaeology of the Manuscript (also ENGL 421 and S HUM 403)**

A. Galloway.

**ENGL 622 Renaissance Poetry (also COM L 450/650, and ITALL 450/650)**

W. Kennedy.

**English for Academic Purposes****ENGLF 205 English as a Second Language**

Fall. 4 credits. Prerequisite: placement by examination. S. Schaffzin.

An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

**ENGLF 206 English as a Second Language**

Spring. 3 credits. Prerequisite: ENGLF 205 or placement by examination. S. Schaffzin.

A writing class for those who have completed ENGLF 205 and need further practice, or for those who place into the course. Individual conferences are also included.

**ENGLF 209 English as a Second Language**

Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving

informal presentations. Individual conferences with the instructor supplement class work.

**ENGLF 210 English as a Second Language**

Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotaped and reviewed with the instructor. Individual conferences supplement class work.

**ENGLF 211 English as a Second Language**

Fall, spring, or summer. 3 credits.

Prerequisite: placement by examination. D. Campbell.

Academic writing with emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers relevant to students' fields. Frequent individual conferences supplement class work.

**ENGLF 212 English as a Second Language**

Spring. 3 credits. Prerequisite: permission of instructor. Enrollment is restricted to 12 on a first-come, first-served basis.

D. Campbell.

Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for their graduate work. This can be a thesis proposal; a pre-thesis; part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

**ENGLF 213 Written English for Non-Native Speakers**

Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

**First-Year Writing Seminar****ENGLB 215-216 English for Later Bilinguals**

For description, see first-year writing seminar brochure.

**Intensive English Program**

105 Morrill Hall

J. M. Mancusi, director; E. J. Beukenkamp, R. L. Feldman, K. Golkowska, M. Johns, L. Porterfield, M. T. Lovell, S. Yates

This noncredit, nondegree program provides full-time intensive English language instruction as well as academic, social, and cultural orientation to the United States and its institutions. The aim of the program is for participants to acquire proficiency in the

language in order to pursue goals in English for academic, business, professional, or personal purposes.

Programs are offered both fall and spring semesters and in the six-week summer session (from late June to early August). Participants receive a minimum of 20 hours of classroom instruction weekly in speaking, listening, reading, writing, and grammar, which are taught at all levels from low intermediate through very-high advanced. Applicants must be at least 17 years of age, hold the equivalent of a high school diploma, and have had some previous study of English.

Students who have gained full admission to or who are already registered in degree-granting programs at Cornell should consult the section "English for Academic Purposes" (series ENGLF).

The Intensive English Program is coordinated by the director, Jeanette Mancusi. Information and application materials are available directly from the program at: Cornell University, Intensive English Program, Morrill Hall, Ithaca, NY 14853-4701, U.S.A.: tel. 607/255-4863; fax 607/255-7491; e-mail CUIEP@cornell.edu; web page: dml.cornell.edu/languages/IEP/cuiep.html.

**FILM**

See Department of Theatre, Film and Dance.

**FRENCH**

See Romance Studies.

**FIRST-YEAR WRITING SEMINARS**

For information about the requirements for writing seminars and descriptions of seminar offerings, see "Special Programs and Interdisciplinary Studies" at the end of the Arts and Sciences section of this catalog and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in October for the spring term.

**GERMAN STUDIES**

L. Adelson, chair; P. Gilgen, director of undergraduate studies; A. Schwarz, director of graduate studies; D. Bathrick, M. Briggs (Dutch), B. Buettner, H. Deinert, I. Ezerzailis, A. Groos, P. U. Hohendahl, G. Lischke, B. Martin, L. Trancik (Swedish), G. Valk, G. Waite

The Department of German Studies offers students a wide variety of opportunities to explore the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies, or a double major involving another discipline, or as preparation for graduate school or an international professional career. Courses are offered in English translation as well as in German; subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and women's studies.

The department's offerings in English begin with a series of First-Year Writing Seminars introducing various aspects of German literature (the fairy-tale and romantic narratives, twentieth-century writers such as Kafka, Hesse, Mann, Brecht), issues in mass culture and modernity, problems of German national identity/ies, and cinema and society. A variety of courses in English translation is also offered at the 300 and 400 level. They explore such topics as the Faust legend, aesthetics from Kant to Heidegger, Freud and his legacy, opera from Mozart to Strauss, the German novel, political theory and cinema, the Frankfurt School, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Students wishing to begin German language at Cornell enroll in GERST 121–122. Those successfully completing this sequence and those placing into the 200 level may pursue further language study or begin with the literature and cultural studies tracks in German Studies. The beginning sequence of 200-level courses in German Studies, with readings and discussion in German, is designed to provide further grounding in the language as well as introduce German literature and cultural studies. More advanced courses introduce majors and other qualified students to a broad variety of literary and cultural topics. (Beginning in spring 1998, GERST 201 and GERLA 203 were replaced by GERST or GERLA 200.)

### Sequence of courses

First level: German 121–122; after completion, placement into German 123 or 200, 205

Second level: German 200, 202, 204, 205–206.

Third level: German 301, 302, 303–304, 306, 307.

Further 300- and 400-level literature and culture courses.

### Advanced Standing

Students with an AP score of 4 or better are automatically granted three credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or an SAT II score of 680 or higher must take the CASE examination for placement in courses above GERST 200. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

### The Majors

The department offers two options for the major: German literature/culture and German area studies, the latter a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German. Students interested in a major should consult the director of undergraduate studies, Peter Gilgen, 192 Goldwin Smith Hall.

### German (Literature/Culture)

Although the emphasis of this track is on literature, majors may also pursue individual interests in courses on film and visual culture, theater and performing arts, music, intellectual and political history, and women's studies that have a substantial German component. Please consult with the director of undergraduate studies.

**Admission:** By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERST or GERLA 204.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, GERST or GERLA 303, 305) or the equivalent.
2. Complete six courses in German Studies at the 300 level or above. One of these must be the Senior Seminar (GERST 410).

### German Area Studies

Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies.

**Admission:** By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERST or GERLA 204.

To complete the major, a student must:

1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, GERST or GERLA 303, 305) or the equivalent.
2. Complete six courses with a substantial German component at the 300 level or above. Three of these must be in German Studies, including the Senior Seminar (GERST 410).
3. Select a committee of one or more faculty advisers to help formulate a coherent program of study. One of the advisers must be from the Department of German Studies.

### Study Abroad

The department encourages undergraduate majors to consider studying abroad for 1–2 semesters, normally during the junior year, as regular students at a German-speaking university. Interested students should consult Bonnie Buettner or Gunhild Lischke as early as possible.

### Honors

**Eligibility:** A student wishing to receive honors in German Studies must have a GPA of 3.5 in all courses relevant to the major.

**Committee:** Candidates for honors form an advisory committee consisting of an adviser from German Studies and at least one

additional faculty member.

**Honors essay:** During the first term of their senior year, students determine the focus of their honors essay through an appropriate course, GERST 453, under the direction of their advisers. During the second term they complete an honors essay, GERST 454, which will be evaluated by the committee.

**Determination of honors:** An oral examination concludes the process. Honors will be determined by the essay, the exam, and grades in the major.

### Freshman Writing Seminars

See Freshman Seminar booklet for course times and descriptions.

### GERST 109 From Fairy Tales to the Uncanny: Exploring the Romantic Consciousness

Fall or spring. 3 credits. B. Buettner, P. Gilgen, and staff.

### [GERST 111 Workshop in German Studies

Fall. 3 credits. Not offered 2000–2001. H. Deinert.]

### GERST 130 Metropolis, Modernity, and Mass Culture: The Roaring Twenties, German-Style

Fall. 3 credits. B. Buettner, P. Gilgen, and staff.

### [GERST 150 Imagining Germany/s

Not offered 2000–2001.]

### GERST 151 Kafka, Hesse, Brecht, and Mann

Spring. 3 credits. H. Deinert.

### GERST 170 Marx, Nietzsche, Freud

Fall. 3 credits. G. Waite and staff.

### GERST 175 Cinema and Society

Fall. 3 credits. G. Waite and staff.

### [GERST 180 Toward the Net.Citizen: Writing and New Communication Technologies

Not offered 2000–2001.]

## Courses Offered in German

All courses are now designated GERST. Courses in earlier years were designated either GERLA or GERST. Course numbers remain the same.

### GERST 121 Elementary German I

Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. G. Lischke, G. Valk, and staff. Elementary German I is designed to familiarize students with basic vocabulary and syntax so they can communicate about everyday life. Videos and audio tapes facilitate listening comprehension and insight into German culture. Daily practice in section provides the opportunity to learn vocabulary and syntax.

### GERST 122 Elementary German II

Fall or spring. 4 credits. Prerequisite: German 121, LPG score 37–44, or SAT II 370–450. Students who obtain an LPG score of 56 or above after German 122 attain qualification and may enter a 200-level course; otherwise successful completion of German 123 is required for qualification. G. Lischke, B. Buettner, and staff.

Elementary German II, the second semester of elementary German, presupposes that students have not yet learned narrative past, subjunctive, passive, or dependent word order. Topics include travel, leisure activities, work and the media, including TV, newspaper, film, and fiction. There is also discussion of a timeline of key events in Germany from 1917-1989.

#### **GERST 123 Continuing German**

Fall or spring. 4 credits. Limited to students who have previously studied German and have an LPG score 45-55 or SAT II 460-570. Satisfactory completion of German 123 fulfills the language qualification requirement. G. Valk, B. Buettner, G. Lischke, and staff. German 123 is a course on the beginning intermediate level. Students will further develop their language proficiency by communicating about broad cultural topics and themes. To provide each student with a maximum opportunity for speaking in German and getting as much help and feedback as possible, much of the work in class will be done in pairs and/or small groups.

#### **GERST 200 Contemporary Germany (formerly also GERLA 200)**

Fall or spring. 3 credits. Prerequisite: qualification in German (GERST or GERLA 123 or LPG score of 56-64 or SAT II score of 580-670) or placement by examination. Successful completion of German 200 fulfills the Arts and Sciences language proficiency requirement and counts toward the distribution requirement in the humanities. B. Buettner, G. Valk, and staff. A content-based language course on the intermediate level. Students examine important aspects of present-day German culture while expanding and strengthening their reading, writing, and speaking skills in German. Materials for each topic are selected from a variety of sources (fiction, newspapers, magazines, and the Internet). Units address a variety of topics including studying at a German university, modern literature, Germany online, and Germany at the turn of the century. Oral and written work and individual and group presentations emphasize accurate and idiomatic expression in German. Successful completion of the course enables students to continue with more advanced courses in language, literature, and culture.

#### **GERST 202 Exploring German Literature**

Fall or spring. 3 credits. Prerequisite: GERST or GERLA 200, GERST or GERLA 203 or equivalent or permission of instructor. Taught in German. Can be used in partial fulfillment of the humanities distribution requirement. G. Valk and staff. In this intermediate course, we will read and discuss a number of works belonging to different literary genres by major German-speaking authors such as Kafka, Walser, Brecht, Mann, Frisch, Dürrenmatt, Bachmann, and others. We will explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments in this course will focus on the development of reading competency in different literary genres, the use of accurate and idiomatic expressions, the expansion of students' German vocabulary, and the systematic review of select topics in German grammar.

#### **GERST 204 Intermediate Conversation and Composition**

Fall or spring. 3 credits. Prerequisite: GERST or GERLA 200, GERST or GERLA 203 or GERST 201, or GERST or GERLA 205 or placement by examination (placement score and CASE). G. Valk. Emphasis on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include awareness of culture, dependence of meaning on perspective, interviews with native German speakers, German news broadcasts, reading German newspapers on the Internet.

#### **GERST 205 Business German I**

Fall. 3 credits. Prerequisite: qualification in German (German 123 or an LPG score of 56-64 or an SAT II score between 580-670). Successful completion of GERST or GERLA 205 fulfills the language proficiency requirement. G. Lischke. Learn German and understand German business culture at the same time. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook.

#### **GERST 206 Business German II**

Spring. 3 credits. Prerequisite: proficiency in German (GERST or GERLA 205, GERST or GERLA 200, GERST or GERLA 203, GERST 201 or placement by examination [placement score and CASE]). G. Lischke. This course is a continuation of GERST or GERLA 205; however students without previous knowledge of Business German are welcome. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to be effective in a work environment, Germany's role within the European Union, the role of the German Bundesbank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage, and a Business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch für den Beruf" will be offered.

#### **[GERST 220 Was ist deutsch?**

Not offered 2000-2001. B. Buettner.]

#### **GERST 301 Scenes of the Crime: German Mystery and Detective Fiction**

Fall. 4 credits. Prerequisite: GERST 202, or GERST 220, or GERST/GERLA 204 or equivalent or permission of instructor. Taught in German. This course may be counted towards the requirement for 300-level language work in the major. P. Gilgen.

An exploration of German crime, detective, and mystery writing in texts ranging from the early nineteenth century to contemporary fiction. Authors to be studied may include: Kleist, E. T. A. Hoffmann, Dürrenmatt, Schatten, Süskind, Handke, and Oren. In addition to exercising hermeneutic skills (and, by extension, that gray matter of which Sherlock Holmes was so fond), this course aims at improving proficiency in aural and reading comprehension, as well as speaking and writing skills, with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended to students interested in a combined introduction to literature and high-level language training. The follow-up course, GERST 302, Youth/Adolescence, will be taught in the spring only.

#### **GERST 302 Youth Culture: Adolescence in German Fiction**

Spring. 4 credits. Prerequisite: GERST 202 or 220 or GERST or GERLA 204 and GERST 301 or equivalent or permission of instructor. Taught in German. B. Buettner. Examination of literary and cultural approaches to childhood, youth, and adolescence in texts ranging from the late eighteenth century to the present. Authors include: Hoffmann, Keller, Goethe, Mann, Walser, Musil, Zweig, Handke, and Kaschnitz. Aimed at further improving students' proficiency in aural and reading comprehension, as well as in speaking and composition skills. Focus on high-level grammar review, stylistic and expository refinement and vocabulary expansion. Recommended for students wishing to combine intensive language training with reading and discussion of short fiction.

#### **[GERST 303 Advanced Conversation and Composition**

Not offered 2000-2001.]

#### **[GERST 304 Advanced Conversation and Composition**

Not offered 2000-2001.]

#### **GERST 306 Zeitungsdeutsch**

Spring. 4 credits. Prerequisite: GERST 202, 204, or 206, or equivalent. G. Valk. Analysis of various German daily and weekly newspapers, magazines, and German TV with special emphasis on stylistic differences in journalism and discussion of current events. Students have the opportunity to research material for class presentations, lead discussions, and share their interests/special fields with the group.

#### **[GERST 307 Modern Germany**

Not offered 2000-2001. L. Adelson.]

#### **[GERST 353 Kleist #**

Not offered 2000-2001.]

#### **[GERST 354 Schiller #**

Not offered 2000-2001.]

#### **[GERST 357 Major Works of Goethe (1749-1832) #**

Not offered 2000-2001.]

#### **Courses offered in English**

It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

**GERST 237 The Germanic Languages (also LING 237)**

Not offered 2000–2001. W. Harbert, M. Diesing.]

**GERST 318 "1800" #**

Not offered 2000–2001. P. Gilgen.]

**GERST 320 Postwar German Novel**  
Not offered 2000–2001.]**GERST 330 Political Theory and Cinema (also COM L 330, GOVT 370 and THETR 329)**

Not offered 2000–2001. G. Waite.]

**GERST 340 Metropolis: Urban Sites in Literature**

Not offered 2000–2001. A. Schwarz.]

**GERST 374 Opera and Culture (also MUSIC 374) #**

Spring. 4 credits. Prerequisite: any 3-credit music course or proficiency in German or Italian. A. Groos.

This course is designed to explore interrelationships between opera and cultural practice, using examples principally from the German and Italian repertoires (e.g., Mozart, Wagner, Verdi, Puccini, Strauss). Lectures and discussions will examine operatic representations of central issues in the emergence of modern culture in the late eighteenth and nineteenth centuries: politics and national identity, issues of gender and sexuality, orientalism, representations of madness and disease. Depending on student interest, a final segment of the semester may extend our focus into twentieth-century opera or other media such as film and theater.

**GERST 378 German Aesthetic Theory: From Kant to Hegel #**

Not offered 2000–2001.]

**GERST 383 German Literature of the Twentieth Century**

Not offered 2000–2001.]

**GERST 392 Minority Literature in the Federal Republic**

Spring. 4 credits. Prerequisite: German 301, or 302, or 303, or 307 or equivalent or permission of instructor. Taught in German. Required readings are in German. L. Adelson.

The course will focus on West German literature by Jewish, Iranian, Turkish, and Afro-German authors. Additionally, critical questions about the German public sphere since 1945 will be explored against the background of twentieth-century German history and demographics. Readings include works by Grete Weil, Irene Dische, TORKAN, May Ayim, Katharina Oguntoye, Sinasi Dikmen, Zafer Senocak, and others. Some films will also be shown.

**GERST 395 Rilke: The Duino Elegies and Sonnets to Orpheus**

Not offered 2000–2001. H. Deinert.]

**GERST 396 German Film (also COM L 396 and THETR 396)**

Not offered 2000–2001.]

**Advanced Undergraduate and Graduate Courses****GERST 403 The Afro-Europeans**

Not offered 2000–2001.]

**GERST 404 Modern German Syntax**

Not offered 2000–2001. M. Diesing.]

**GERST 405 Introduction to Medieval German Literature I #**

Fall. 4 credits. Prerequisite: reading knowledge of German. A. Groos.

After a brief introduction to basic aspects of the medieval universe, ranging from cosmology to psychology, readings will focus on introductory texts of late twelfth-century courtly culture. Using the predominant genres of aristocratic self-representation, the heroic epic ("Nibelungenlied"), Arthurian romance (Hartmann's "Iwein"), and Minnesang, discussions will investigate the court as the locus of conflicting forces in the rise of the secular culture in Germany, examining such issues as the first vernacular construction of social and sexual identity, generational conflicts within the communal-dynastic order, the rise of individualism (the knightly quest), and subjectivity (the love lyric).

**GERST 406 Introduction to Medieval German Literature II #**

Spring. 4 credits. Prerequisite: German 405 or equivalent or permission of instructor.

This is the anchor course for the medieval period. A. Groos.

Political lyrics by Walther von der Vogelweide will introduce agendas of conflict in thirteenth-century German culture, ranging from crusades to civil war. Against this background, we will examine the utopian quest to win the Holy Grail and heal the Fisher King in Wolfram's "Parzival," using Bakhtin's approach to pre-novelistic discourse. Readings from the love lyric trace representation of gender across emerging class differences, the increasing complexity of self, and instabilities of the performance text. Concluding topics include women mystics and late medieval narratives of socio-sexual violence, anti-Semitism, and urban "Angst."

**GERST 407 Teaching German as a Foreign Language**

Fall. 4 credits. Staff.

This course has been designed to familiarize students with current ways of thinking in the field of applied linguistics and language pedagogy. It introduces different concepts of foreign language methodology as well as presents and discusses various techniques as they can be implemented in the foreign language classroom. Special consideration is given to topics such as planning syllabi, writing classroom tests, and evaluating student's performance.

**GERST 408 Uncanny Communities**

Not offered 2000–2001.]

**GERST 409 Spinoza and New Spinozism (also COM L 442, GOVT 464, FRLIT 403)**

Spring. 4 credits. G. Waite.

This course is an introduction to the basic works of Spinoza, including selections from the early writings, the *Ethics*, *Theologico-Political Treatise*, *Political Treatise*, and letters. Of particular interest to us will be the hypothesis of the post-Althusserian New Spinozists that Spinoza provides the most radical alternative to later (more dominant and familiar) philosophical systems, including not only those of Kant and Hegel but indeed of all others. That is, we will be challenged by Henri Bergson's remark that "every philosopher has two philosophies: his own and Spinoza's" and by Fredric Jameson's that "the new world system, the ultimate third stage of capitalism, is for us the absent totality, Spinoza's God or Nature: the ultimate (indeed

perhaps the only) referent, the true ground of Being in our time." In addition to our primary focus on Spinoza's own works, we will study the recent anthology *The New Spinoza* (essays by Gabriel Albiac, Louis Althusser, Étienne Balibar, Gilles Deleuze, Emilia Giancotti, Luce Irigaray, Pierre Macherey, Alexandre Matheron, Pierre-François Moreau, Antonio Negri, and André Tosel), as well as works in other traditions (e.g., Pierre Bayle, F. W. J. Schelling, Roger Scruton, and Leo Strauss).

**GERST 410 Senior Seminar**

Fall. 4 credits. Open to all students with an adequate command of German. Prerequisite: any German course at the 300 level or equivalent or permission of instructor.

Texts and seminar discourse in German. P. Gilgen.

**Topic: Goethe's Novels**

Each of Goethe's four novels had a tremendous cultural impact, beginning with the bestseller *Die Leiden des jungen Werthers* of 1774, which instantly became a literary model and enticed many a sentimental reader into suicide. *Wilhelm Meisters Lehrjahre*, published in 1795–96, contains echoes of Werther and reflects Goethe's encounter and collaboration with Karl Philipp Moritz in Rome, his interest in Kant's philosophy, and his literary friendship with Schiller. One of the three "greatest tendencies of the age" (F. Schlegel), *Wilhelm Meister* came to represent the *Bildungsroman* and define the romantic novel. The plan for a continuation was interrupted several times. In one instance, Goethe decided to turn a novella that was meant to be part of the second *Wilhelm Meister* novel into a novel of its own. *Die Wahlverwandtschaften*, published in 1809, met with some vocal disapproval. Goethe's sustained exploration of the question of "fate" earned him the reputation of a determinist. His final novel, *Wilhelm Meisters Wanderjahre* (1821; republished in an augmented version in 1829), stretched the possibilities of the novel; an "archival novel", it is more an aggregate of seemingly disjointed elements than an organic whole. Goethe himself recognized "the incommensurable" at work in his text. In this course, we will address Goethe's responses to contemporary social and cultural questions in his novels, the theory of subject formation exemplified in each novel, the (dis)continuity of Goethe's literary aesthetics, and the dialectics between hermetics and hermeneutics instigated by and thematized in these texts. A number of critical works, ranging from Walter Benjamin's influential essay on the *Wahlverwandtschaften* to Friedrich Kittler's groundbreaking analysis of the discursive changes that can be traced in the re-writing of *Wilhelm Meisters Lehrjahre*, will provide orientation in our attempt to read Goethe against the grain of the prevalent hagiographic-hermeneutic tradition.

**GERST 412 German Literature from 1770 to 1848 #**

Not offered 2000–2001.]

**GERST 413 Women around Freud (also COM L 412 and WOMNS 413)**

Not offered 2000–2001.]

**GERST 414 History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, and NES 404)**

Fall.

For description, see COM L 404.

Not offered 2000-2001.]

**GERST 417 Faust: Transformations of a Myth (also COM L 417) #**Spring. 4 credits. Taught in English.  
H. Deinert.

Few legends have so engaged the imagination as that of the man who signed a pact with the devil to obtain pleasure, power, and knowledge. While the myth itself is timeless, the modern version takes its cue from one real Georg Faust, a figure of dubious character, half scholar, half quack, during the time of the German Reformation. The German *Volksbuch* depicting his adventures was almost immediately translated into English and became the inspiration for Marlowe's *Tragical History of Doktor Faustus*. Goethe devoted some 60 years to his *Faust*, completing it only months before his death in 1832. While Marlowe's Faust deserves eternal damnation for his hubris, Goethe's protagonist finds favor with God for the same reason. We will look at various representations of the myth from the late sixteenth century through the early nineteenth. The *Faust Book*, Marlowe, and Goethe will be our main texts. We will listen to some of the music they have inspired: Schubert, Schumann, Berlioz, Gounod, Mahler; and look at related mythical figures like Lucifer, Prometheus, Don Juan, Ahasverus, Schlemihl, and others. Time permitting, we will discuss selections from several recent versions: Bulgakov's *The Master and Margarita* (1938), Valéry's *Mon Faust* (1940), and Thomas Mann's *Doktor Faustus* (1947).

Not offered 2000-2001.]

**GERST 430 Brecht, Artaud, Müller, Wilson (also COM L 430 and THETR 420)**

Fall. 4 credits. D. Bathrick.

This course will explore in depth the writings and practices of four major twentieth-century theatrical artists: Bertolt Brecht, Antonin Artaud, Heiner Müller, and Robert Wilson, in order to (1) map out differences and similarities among the four as representatives of avant-garde theater and performance art; (2) situate their respective work in the political and cultural contexts out of which they emerged; and (3) explore their impact on succeeding movements and artists of modern drama and cinema. A central focus of the course will be to explore the differing and changing notions of "avant-garde theater" as demonstrated in the work and reception of Brecht, Artaud, Müller, and Wilson. Exploration of the work of these four artists will serve methodologically both to interrogate critically what have become competing strategies in the development of performance theater and avant-garde theater as well as to consider ways in which these models have been and could be synthesized.

**GERST 449 Rescreening the Holocaust (also COM L 453 and THETR 450)**

Spring. 4 credits. D. Bathrick.

Rescreening the Holocaust will offer a survey of the major films dealing with the Holocaust beginning with *Night and Fog* (1955) and including such works as the TV film *Holocaust*, *Schindler's List*, *Shoah*, *Life is Beautiful*, *Sophie's Choice*, *Jacob the Liar*, *The Diary of Anne Frank*, *Kapo*, *My Mother's Courage*, and others. The course will focus on major issues of debate around the possibilities and limits of representing the Holocaust cinematically as well as questions more specifically concerning commercialization, fictionalization, trivialization, documentation, visualization, and narrativization in the making and distributing of films about this event. What are the concerns that have arisen over the years concerning the dangers of aestheticizing the Holocaust in works of literature and the visual arts? Is it possible to employ a comedic narrative to deal with such a topic, and, if so, what are the benefits or potential problems of such an approach? Is the very treatment of such a topic within the framework of the Hollywood entertainment industry itself a violation of respect for those who perished? The title of the course suggests a methodological approach which emphasizes the notion that screenings of the Holocaust are at the same time often rescreenings, to the extent that they are built on, presuppose, or even explicitly cite or take issue with earlier cinematic renderings.

Spring. 4 credits. Prerequisite: reading knowledge of German. Open to undergraduates with permission of instructor only. P. U. Hohendahl.

The seminar will focus on eighteenth-century German literature and philosophy from 1730 to 1790. Emphasis will be placed on the concept of "Aufklärung" and its meaning for the development of German thought. The discussions will stress major areas of critical inquiry, such as religion, philosophy, and literature. Readings will be taken from authors like Forster, Gellert, Gottsched, Kant, Lessing, and Wieland. The critical literature will include the writings of Adorno, Foucault, Habermas, Horkheimer, and Koselleck.

**GERST 647 German Literature from 1949 to 1989: Questions about Identity**  
Fall. 4 credits. Prerequisite: reading knowledge of German. L. Adelson.

This seminar/anchor course will focus on German literature during the period between 1949 and 1989. The point of the course will be to trace major themes and styles in German-speaking literature, East and West, in light of recent events. While individual texts will be examined within their specific historical (temporal, geopolitical, aesthetic) contexts, the course will also be organized comparatively around critical debates concerning such topics as fictional representations of the immediate past; attempts by minority/majority voices to challenge and change the canon; writing and social change; questions concerning a national cultural identity; the politics of postmodernity; etc. Readings will be taken from authors such as Böll, Grass, Bachmann, Koeppen, Andersch, Handke, Dürrenmatt, C. Wolf, Weiss, H. Müller, V. Braun, Hein, Morgner, J. Becker, Enzensberger, B. Strauss, Süskind, and Maron.

**GERST 663 Nietzsche and Heidegger (also COM L 663)**  
Fall. 4 credits. G. Waite.

This seminar provides, primarily, a basic introduction to the thinking of Nietzsche and Heidegger, including the latter's appropriation of the former. We will also be interested in the types of argumentation and styles of writing of both philosophers, in light of the hypothesis that both were working in the long tradition of esotericism, that is, that neither

wrote exactly what he thought and that they intended their impact to come beneath the level of conscious apprehension. Secondly, in addition to their own work, we will consider their influence in writers across the 'Left-Center-Right' spectrum (e.g., T. W. Adorno, G. Bataille, P. Bourdieu, J. Butler, J. Derrida, G. Deleuze, M. Foucault, H.-G. Gadamer, L. Irigaray, P. Klossowski, S. Rosen, L. Strauss).

Not offered 2000–2001.]

**GERST 685 Gramsci and Cultural Politics (also COM L 685 and GOVT 675)**  
Spring. 4 credits. G. Waite.

This seminar provides a basic introduction to the political and cultural writings of Antonio Gramsci and to his legacy. Contemporary transnational capitalism and nation states rule not only by overt domination but by 'hegemony,' that is, the "noncoercive coercion" of discursive and cultural practices. The basic question is whether alternative, oppositional practices are possible. Other questions follow: What is the proper role of intellectuals (and what is an intellectual?) in cultural politics? How do, or should leftist cultural critics, theorists, and artists living under late capitalism relate to one another globally, including to political parties and movements? Is Gramsci's work best understood as 'Western Marxist' or rather as an extension of Leninist 'orthodoxy'? Starting from Gramsci's pre-prison writings, letters from prison, and Prison Notebooks, we will work both backwards to his main sources (e.g., Machiavelli, Marx, Lenin, and Croce) and forward to his extensive influence, including on Althusser, Pasolini, and other filmmakers, Laclau and Mouffe, and Aijaz Ahmad, but also on social movements around the world.

**[GERST 686 Althusser and Lacan (also COM L 686, GOVT 679, and FRLIT 623)]**

Not offered 2000–2001.]

**GERST 693 "The Sign of History": Kant and Lyotard (also COM L 693, GOVT 761)**

Spring. 4 credits. P. Gilgen.

This course examines Immanuel Kant's political writings and their underlying philosophy of history, a topic that has perplexed Kant scholarship and led to a number of mutually incompatible readings. In part this is due to the relatively unsystematic treatment that Kant affords these topics in a series of popular essays. Furthermore, even a cursory reading shows that Kant's views on the subject underwent changes over time. We will read all relevant texts, from the "Idea for a Universal History with a Cosmopolitan Purpose" (1784) to *The Conflict of the Faculties* (1798) to reconstruct Kant's thought on history. In addition, we will analyze Kant's moral philosophy as well as his theory of teleological judgment in order to relate his view of history to morality and teleology. In this process, the traditional inflections in the treatment of Kant (especially his practical philosophy) will be supplemented by emphases on history in relation to the "final purpose" of creation and the doctrine of the "highest good." In a second part, we will review Jean-François Lyotard's postmodern reconstruction of the Kantian "sign of history." Of particular concern will be: the application of "negative Darstellung" (as outlined in the "Analytic of the Sublime" in Kant's *Critique of Judgment*) to meaning in history; Lyotard's Kantian turn and its consequences for the postmodern condition; and the possibility of a post-historical ethics of commemoration.

**[GERST 699 German Film Theory (also COM L 699 and THETR 699)]**  
Not offered 2000–2001.]

**GERST 753–754 Tutorial in German Literature**

Fall and spring. 1–4 credits per term.  
Prerequisite: permission of instructor.

## Dutch

**DUTCH 121–122 Elementary Dutch**  
121, fall; 122, spring. 4 credits each term.  
Prerequisite: permission of instructor.  
M. Briggs.

Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

**DUTCH 203 Intermediate Composition and Conversation**

Fall. 3 credits. Prerequisite: qualification in Dutch or permission of instructor.  
M. Briggs.

Improved control of Dutch grammatical structures and vocabulary through guided conversation, compositions and reading, drawing on all Dutch-speaking cultures. Taught in Dutch.

**DUTCH 204 Intermediate Composition and Conversation**

Spring. 3 credits. Prerequisite: Dutch 203 or permission of instructor. M. Briggs.  
This course aims to emphasize written and oral application of accurate, idiomatic Dutch. Reading of authentic material such as newspapers, literature, and history, with emphasis on the students' interests and specializations. Taught in Dutch.

**DUTCH 300 Directed Studies**

Fall or spring. 1-4 credits variable.  
Prerequisite: proficiency in Dutch or permission of instructor. M. Briggs.  
Individualized advanced Dutch studies. This course aims to provide students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research. Literature history in support of all disciplines. Taught in Dutch. Topic for fall: Afrikaans.

**Swedish****SWED 121-122 Elementary Swedish**

121, fall; 122, spring. 4 credits each term.  
Prerequisite: for Swedish 122, Swedish 121 or equivalent. L. Trancik.

The aim of this course is to develop skills in listening, speaking, reading, and writing within Sweden's cultural context. Work on the Internet and interactive computer programs are used in these courses.

**SWED 123 Continuing Swedish**

Fall. 4 credits. Prerequisite: Swedish 122 or equivalent. L. Trancik.  
Development of skills in spoken and written Swedish within Sweden's cultural context.

**SWED 203 Intermediate Swedish**

Spring. 3 credits. Prerequisite: Swedish 123 or permission of instructor. L. Trancik.  
Intermediate to advanced-level instruction using audio-visual material and text to enhance language comprehension.

**SWED 204 Advanced Swedish**

Fall. 3 credits. Prerequisite: Swedish 203 or permission of instructor. Taught in Swedish. L. Trancik.

Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

**SWED 300 Directed Studies**

Fall or spring. 1-4 credits variable.  
Prerequisite: permission of instructor. L. Trancik.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

I. Kramnick, chair; B. R. O'G. Anderson, R. Bense, M. G. Bernal, S. Buck-Morss, R. Bullock, V. Bunce, A. Carlson, J. Cowden, M. Evangelista, R. Herring, N. Hirschmann, M. Katzenstein, P. Katzenstein, E. W. Kelley, J. Kirshner, T. J. Lowi, R. McDermott, W. Mebane, K. O'Neill, J. Pontusson, J. Rabkin, E. Sanders, H. Schamis, M. Shefter, V. Shue, A. M. Smith, J. J. Suh, S. G. Tarrow, N. T. Uphoff, C. Way

Government is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on applications. Some engage in the close reading of great texts of political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies. Government is divided into four subfields: U. S. politics, comparative politics (other nations), political theory (philosophy), and international relations (transactions between nations).

To accommodate new courses or course changes, a supplementary announcement is prepared by the department. Before enrolling in courses or registering each term, students are requested to consult the current supplement listing courses in government, available in 125 McGraw Hall.

**The Major**

**To be admitted to the major.** a student must pass two government courses.

**To complete the major.** a student must (1) pass two of the introductory government courses (Government 111, 131, 161, 181); (2) pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars. Students are strongly advised to take at least one course in each of the four subfields; (3) accumulate an additional 28 credits of government course work at the 200-level or above; (4) complete at least one seminar-style course in government which may be applied toward the 28 credits. These courses include those numbered 400.XX to which students are admitted

by application only; (5) accumulate 12 credits in upper-level courses in related fields (such as anthropology, economics, history, science and technology studies, psychology, and sociology). Upper-level courses are usually courses numbered at the 300 level or above (200-level courses are not considered upper-level). Students should consult with their major adviser to choose appropriate courses. All choices of related courses must be approved by the major adviser or the director of undergraduate studies; (6) all courses used to fulfill a government major must be passed with a letter grade.

To summarize, a total of 10 government courses and three additional courses (12 credits) of upper-level related courses are required to complete the major.

**Cornell-in-Washington Program.** Government majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

**European Studies Concentration.**

Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein, J. Pontusson, and S. G. Tarrow for advice on course selection and foreign study programs.

**Model European Community Simulation.**

Undergraduates with an interest in the European Union, public affairs, or debating may participate in an annual European Union simulation held, on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of current concern to the European Union.

To prepare for the simulation, a two-credit course is offered by the Government department each year (Government 431 or Government 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255-7592.

**International Relations Concentration.** See the description under "Special Programs and Interdisciplinary Studies."

**Honors.** In their junior year, Government majors with a G.P.A. of 3.3 in all subjects may join the honors program, which involves a sequence of special courses in the junior and senior year. Application to the honors program will be made in the late spring of the sophomore year and application forms will be available in 125 McGraw Hall. The courses comprising the honors sequence (honors courses) are described below. Students may be admitted to the honors program in the junior or senior year only with the special permission of the Director of Undergraduate Studies.

**Introductory Courses**

Students registering for introductory courses should register for the lecture only. Sections will be assigned during the first week of class. Introductory courses are also offered during summer session.

**GOVT 111 Introduction to American Government and Politics**

Fall and summer. 3 credits. T. J. Lowi.  
An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

**GOVT 131 Introduction to Comparative Government and Politics**

Spring and summer. 3 credits.  
J. Pontusson.  
This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we will analyze institutional variations among liberal democracies, and their political implications. We will then probe the origins of democracy in Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we will explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy will be related to problems of economic development, efficiency, and equality.

**GOVT 161 Introduction to Political Philosophy #**

Spring. 3 credits. N. Hirschmann.  
A survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

**GOVT 181 Introduction to International Relations**

Fall and summer. 3 credits. P. Katzenstein.  
An introduction to the basic concepts and practice of international politics.

**First-Year Writing Seminars****GOVT 100 Freshman Seminars**

Fall, spring, or summer. 3 credits. Seminars will be offered in fall, spring, and summer terms. Consult the listings for the Freshman Seminar Program in the section "Special Programs and Interdisciplinary Studies," the supplement issued by the department, and the Freshman Seminar booklet for course descriptions and instructors.

**Major Seminars****GOVT 400 Major Seminars**

Fall or spring. 4 credits.  
These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given to majors over nonmajors and seniors over juniors. Topics and instructors change each semester. To apply, students should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

**American Government and Institutions**

Government 111 is recommended.

**[GOVT 302 Social Movements in American Politics (also AM ST 302)]**

4 credits. Not offered 2000–2001.]

**[GOVT 303 Introduction to American Political Parties]**

4 credits. Not offered 2000–2001.]

**GOVT 304 Public Opinion and Political Participation**

Fall. 4 credits. J. Cowden.  
Government 304 is a survey course about the nature and impact of public opinion and mass political behavior. We will examine classic and contemporary scholarship on the following topics: the role of public opinion in democratic theory; the measurement of opinions; the political sophistication of the electorate; racial and political intolerance; political socialization; party identification and party systems; media effects; candidate preference; turnout and abstention; attitudes about distributive justice; and the intersection between public opinion and public policy.

**[GOVT 305 Atomic Consequences: The Incorporation of Nuclear Weapons in Post-War America]**

4 credits. Not offered 2000–2001.]

**[GOVT 306 Latino Politics in the United States]**

4 credits. Not offered 2000–2001.]

**GOVT 308 Science in the American Polity 1800–1960 (also S&TS 390)**

Fall. 3 credits. M. Dennis.  
See S&TS 390 for description.

**[GOVT 309 Science in the American Polity]**

4 credits. Not offered 2000–2001.]

**GOVT 310 Power and Poverty in America**

Spring. 4 credits. E. W. Kelley.  
Despite egalitarian democratic rights, the United States remains a stratified society conspicuous for great disparities in the allocation of income and wealth. The purpose of this class is to investigate these disparities, both empirically and normatively, and to assess the impact of government on them. Topics for discussion will include: What do we mean by distributional inequality and by the demand for greater egalitarianism? What is the extent of inequality and of poverty in America today? How does one establish minimum standards for distributional justice? Is the United States currently on the road toward achieving that minimum standard? What is the array of federal welfare programs presently available and what is their effect? What reforms or changes are currently on the political agenda? Can we imagine a society somewhat like that in the United States achieving a very different distribution of educational and occupational outcomes as described by race, income, class, and language spoken by parents?

**GOVT 311 Urban Politics**

Fall. 4 credits. M. Shefter.  
The major political actors, institutions, and political styles in large American cities: mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics, and the municipal reform movement. The implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

**GOVT 313 The Nature, Functions, and Limits of Law**

Spring. 4 credits. Undergraduates only.  
R. Hillman.  
A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

**GOVT 314 Prisons**

Spring. 4 credits. M. Katzenstein.  
This seminar will look at the politics of incarceration. Why is prison construction a growth industry? What is the role of public policy and of the law in this process of prison expansion? How does race and racism in American society figure in this? Are women's prisons designed to respond to the needs of a "generic-male" prisoner or are they organized around women's needs? Are there "spaces" within the prison (educational programs, libraries, chaplain's offices) which alleviate the grim realities of prison life. We will devote a section of the course to reading about and discussing different forms of political activism on behalf of prison reform. Seminar members should plan on an occasional extra class time, likely to be Wednesday or Thursday evenings, to hear guest speakers and see films.

**GOVT 316 The American Presidency (also AM ST 316)**

Fall. 4 credits. E. Sanders.  
Analysis of the politics of the presidency and the executive branch with emphasis on executive-legislative relations, executive branch policymaking, and the problems of the modern presidency.

**GOVT 317 Campaigns and Elections**

Fall. 4 credits. W. Mebane.  
This course examines campaigns and elections, focusing primarily on national elections in the United States. Topics include the relationship between elections and the economy, the weakness of the American party system, voter turnout, individual voting decisions, negative campaigning, and the noncompetitiveness of congressional elections. We examine several theories that explain these phenomena, including in particular the theory of rational choice. Course requirements include one or two papers based on original analysis of election survey data.

**GOVT 318 The American Congress**

Spring. 4 credits. M. Shefter.  
The role of Congress in the American political system. Topics to be discussed: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas.

**[GOVT 320 Public Opinion and Public Choice]**

4 credits. Prerequisite: Government 111 or permission of the instructor. Not offered 2000–2001.]

**[GOVT 324 Legal Reasoning and Legal Adaptation: A Comparison of American and Talmudic Law]**  
4 credits. Not offered 2000-2001.]

**[GOVT 327 Civil Liberties in the United States]**  
4 credits. Not offered 2000-2001.]

**[GOVT 328 Constitutional Politics: The United States Supreme Court]**  
4 credits. Not offered 2000-2001.]

**[GOVT 353 Feminism Movements and the State (also WOMNS 353)]**  
4 credits. Not offered 2000-2001.]

**GOVT 405/705 Government and the Economy**

Spring. 4 credits. E. W. Kelley.  
What would Adam Smith and Karl Marx consider the causes of such problems as stagflation, an unfavorable balance of trade, the threat of protectionism, the growth of massive public and private sector bureaucracies, and excessive government regulation? What suggestions would they make about remedies? How can we evaluate both their suggestions and their evidence? Is representative democracy itself part of the problem? Can Woodrow Wilson, Thomas Jefferson, or Grant McConnell help us understand the effects of legislative behavior on economic transactions? This course will use selected works of Smith, Marx, Durkheim, Wilson, and more recent authors like Mancur Olson, Bendix, and McConnell. Substantive focus will be on classical political economy; the development of the state; the rise of professions, guilds, and labor unions; regulation and the increased delegation of public authority to private groups. Methodological focus will be on the ways of evaluating both discursive and quantitative evidence for the factual and causal claims of the authors studied.

**GOVT 406/706 Politics of Education**  
Fall. 4 credits. E. W. Kelley.

Education is simultaneously America's biggest business and the institutional process through which skills and values are passed on to the next generation. This course deals with conflicts about, and the politics of, education as they occur at national, state, and local levels. What (including values) will be taught and to whom? Who will benefit from formal education as a vehicle for entry into economic opportunity? What are the powers and restrictions on government in this area? How does the American system differ from other systems? How does educational testing affect equal opportunity to obtain meaningful competencies and jobs?

**GOVT 408 Politics of the American Civil War (also AM ST 430)**

Spring. 4 credits. R. Bensel.  
The Civil War, along with the Founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American political development. Arising out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention will be paid to: (1) the political economy and culture of plantation slavery in the antebellum South; (2) the apparent inevitability of collision between the slave and free states and their respective

societies; (3) the military, political, and economic strategies that determined, on both sides, the course and duration of the war; (4) the limits and possibilities of reform of southern society during Reconstruction; and (5) the impact of the Civil War on the subsequent development of the United States.

**[GOVT 409 Racial Prejudice and Political Intolerance]**  
4 credits. Not offered 2000-2001.]

**GOVT 412 American Political Parties and Elections**

Spring. 4 credits. J. Cowden.  
This seminar examines changes in the character of political parties and the behavior of the electorate. It also considers the changing relationship between political parties and elections, on the one hand, and other political processes and institutions, on the other.

**[GOVT 413/613 Finance, Federalism, and Politics]**  
4 credits. Not offered 2000-2001.]

**GOVT 419 The Politics of Scandal**

Spring. 4 credits. M. Shefter, J. Rabkin.  
This seminar will discuss the politics of "scandal" and "reform" in constitutional doctrine, American history, and recent experience.

**[GOVT 427 The Politics of Environmental Protection in America]**  
4 credits. Not offered 2000-2001.]

**GOVT 428/728 Government and Public Policy: An Introduction to Analysis and Criticism**

Fall. 4 credits. T. J. Lowi.  
Government 428 concentrates on history and criticism of U.S. policies and the politics associated with them. Particular attention given to the origins and character of the regulatory state and the welfare state.

**GOVT 429 Government and Public Policy: An Introduction to Analysis and Criticism**

Spring. Open to undergraduates. 428 and consent of instructor are required for 429.  
T. J. Lowi.  
Government 429 is an opportunity to pursue further the research begun in 428.

## Comparative Government

Government 131 is recommended.

**[GOVT 251 The Politics of Economic Life]**  
4 credits. Not offered 2000-2001.]

**GOVT 326 Building a Better Democracy**  
Fall. 4 credits. K. O'Neill.

How would you put together a constitution for a newly democratic country? Democracy exhibits a variety of forms throughout the world. While all of these forms are democratic, the different structures and rules adopted by countries can lead to surprisingly different outcomes. This course explores the tradeoffs inherent in choosing a presidential versus a parliamentary structure. We will look at the consequence of using different electoral rules, whether there is a meaningful difference between systems with two parties and those with multiple parties, and what the different arguments are for choosing a unitary versus a federal government structure. The course combines theoretical arguments about different democratic institutions with real

world examples of constitutional assemblies and constitutional reforms from Africa, Latin America, Israel, the United States, and Western and Eastern Europe.

**GOVT 332 Modern European Politics**  
Fall. 4 credits. D. Schirmer.

The course gives an introduction to politics and political systems in Western Europe. It starts with a brief history of the formation of the nation state and the establishment of democratic rule. It continues with the modes and structures of political conflict and explores political cultures, party and electoral systems, the roles of interest groups and social movements, and the mass media. It then turns to a discussion of parliament and government. The main countries studied include Britain, France, Germany, and Italy. The main dimensions guiding the comparison will be conflict vs. consent, federalism vs. centralism, parliamentary vs. presidential systems, and majority vs. proportional representation. The course will conclude with a discussion of minority-majority relations and the problem of democratic inclusion.

**[GOVT 333 Government and Politics of the Former Soviet Union]**  
4 credits. Not offered 2000-2001.]

**GOVT 334 Political Economy of East Asia**

Spring. 4 credits. R. Bullock.  
This lecture course examines East Asian political economy in historical and comparative perspective. Central questions include: Why have Japan, South Korea, and Taiwan developed so rapidly in the postwar era? Can we identify an East Asian mode of development? What does the region's growth mean for other countries and for the international economy? Are Southeast Asian countries following a similar trajectory today? Particular topics include Japanese colonialism, industrial policy and its critics, domestic political consequences of rapid growth, political corruption, U.S.-Japan economic conflict, and recent attempts at political-economic liberalization.

**GOVT 335 America in the World #**  
Spring. 4 credits. M. Bernal and J. Henderson.

Most studies of America deal with local or autochthonous developments up to 1492 or with the influences of other continents, notably Europe, on "the New World" after that date. In this course we shall look at the other sides of these pictures and consider contacts between America and the other continents of Asia, Europe, and Africa before Columbus, as well as some of the influences of America on the rest of the world after his arrival. The course will involve discussions with professors from archaeology, anthropology, and classics on the possibilities of Pre-Columbian contacts.

**GOVT 336 Postcommunist Transitions**  
Fall. 4 credits. V. Bunce.

This course will compare economic and political developments since the collapse of communism in Eastern Europe and the former Soviet Union. Primary emphasis will be placed on the relationship between democratization and the transition to capitalism, with some attention paid as well to nationalism and (for the new states in the region) state-building. Cases examined in greatest detail will vary by year, but will always be multiple such as to encourage comparative observations and generalizations.

**GOVT 338 Comparative Political Economy**

Spring. 4 credits. C. Way.

This course examines the juncture of politics and the economy in the advanced industrial democracies. Why do some countries have large, inclusive welfare states while others have minimal social programs? Is the welfare state in decline, and if so why? Does it really make any difference for the economy whether parties of the left or right govern? Do strong unions have negative effects on the economy, or can they actually boost economic performance? What does increasing globalization of the world economy mean for the constraints and opportunities facing governments in managing the economy and providing social welfare? How will the Euro and increasing European integration change the world? Are all market economies pretty much the same, or are there varieties of capitalism that differ in important ways? We will use a variety of theoretical perspective to provide some insight into these and other questions, paying particular attention to evaluating the theoretical arguments with both systematic and historical evidence.

**[GOVT 340 Latin American Politics @**  
4 credits. Not offered 2000–2001.]**GOVT 341 Modern European Society and Politics (also SOC 341)**

Spring. 4 credits. S. Tarrow.

Since the French and industrial revolutions, modern Europe has been the major source of innovation and stability, freedom and imperialism, war and peace, capitalism and socialism, rule of law and state terror, and modernity and its critics. Even the 50-year division of the continent by the Cold War could not destroy its common, but contradictory heritage. This interdisciplinary core course in Modern European Studies will serve as an introduction to European society and politics. Topics include European state-building and capitalism, nationalism and socialism, cycles of revolution and reaction, stratification and mobility, law and violence, and war and democracy. The course will end with an introduction to the European Union and its conflicts. (May be taken separately, or in combination with Government 342, The New Europe, which focuses on contemporary Europe). Should qualified student interest permit it, a section will be offered in French or German.

**GOVT 342 United Germany in the New Europe**

Fall. 4 credits. P. Katzenstein.

German unification in 1990 and the accelerating movement toward European integration have created new political conditions for our understanding of German and European politics. The end of the Cold War has brought forth old fears about the domination of Europe by an unpredictable German giant. Alternatively, these changes have also fueled new hopes for Germany and Europe as models of political pluralism in a more peaceful and prosperous world. This course will thus reflect on two kinds of politics: the specter of the "Germanization" of Europe and the vision of the "Europeanization" of Germany.

**GOVT 346 Modern Japanese Politics @**  
Fall. 4 credits. R. Bullock.

This course is an introduction to Japanese domestic politics and political economy. Subject matter begins with post-Meiji Japan

but focuses on the postwar era. Questions to be explored include: Who rules Japan? How is policy formulated? How do we account for postwar political stability and rapid economic growth? How are opposition interests accommodated or ignored? How is the political system changing today?

**GOVT 347 Government and Politics of China @**

Fall. 4 credits. V. Shue.

An introduction to the main currents in China's domestic politics over the last 60 years. Topics include the revolutionary rise of communism; Maoism, in theory and in practice; the politics of bitterness during the "Cultural Revolution"; the evolving roles of the party and the military, and of peasants, workers, and intellectuals in the polity; the prospects for democracy, perceived social inequality, violence, corruption, and other pressing problems that have emerged with the reforms under Deng Xiaoping.

**[GOVT 349 Political Role of the Military**  
4 credits. Not offered 2000–2001.]**[GOVT 351 India**

4 credits. Not offered 2000–2001.]

**[GOVT 354 Capitalism, Competition, and Conflict in the Global Economy**

4 credits. Not offered 2000–2001.]

**[GOVT 356 Enlarging the New Europe: Labor, Business, and Politics (also ILRIC 337)**

3 credits. Not offered 2000–2001.]

**GOVT 357 American Indian Politics and Policy (also AIS 367 and R SOC 367)**

Fall. 3 credits. Enrollment limited to 20.

B. Baker.

This course addresses the Constitutional basis of the Federal-Indian Relationship through an examination of treaties, Supreme Court decisions, and Congressional law/policy. The effects of European and American forms of governance on traditional American Indian political structures are detailed and contrasted with contemporary tribal governments and political organizations. Issues relating to sovereignty and self-governance with respect to American Indian tribal governments are addressed relative to state and federal governments.

**GOVT 358 Modern History of the Middle East: Changing Politics, Society, and Ideas @**

Spring. 4 credits. Staff.

For description, see NES 390.

**[GOVT 415 Race, Gender, and Organization**

4 credits. Not offered 2000–2001.]

**[GOVT 430 Democracy, Power, and Economic Reform**

4 credits. Not offered 2000–2001.]

**GOVT 431 Model European Union**

Spring. 2 credits. J. Pontusson.

This two-credit course is designed to prepare students to participate in the annual Model European Union Simulation held, on an alternating basis, at SUNY Brockport and in Brussels. The simulation provides an opportunity for participants, representing politicians from the member states of the European Union, to discuss issues and resolutions of current concern to the E.U. The preparatory course introduces students to the E.U., the country that the Cornell team will

represent, and the issues to be discussed at the simulation. A substantial part of travel costs for the Cornell team will be paid by the Institute for European Studies, and course enrollment will be restricted by budgetary considerations. Students enrolled in this course are required to write a research paper.

**[GOVT 432 Model European Union II**  
2 credits. Not offered 2000–2001.]**GOVT 433 The Politics of Economic Liberalization in the Developing World @**

Fall. 4 credits. H. Schamis.

What drives the current processes of economic liberalization taking place in most of the developing world? What kinds of constraints and opportunities do governments embarked upon such policy reforms face? What types of factors account for their success or failure? What is the relationship between the international dimension of this phenomenon and the domestic political conditions? This seminar addresses these questions by examining the interplay of domestic and international ideas, local and foreign actors, and national and transnational institutions which take part in these processes. The course focuses extensively on, but is not limited to, Latin America.

**[GOVT 436 Environmental Politics and Policy**

4 credits. Not offered 2000–2001.]

**GOVT 437 Contemporary China: Society and Politics @**

Fall. 4 credits. V. Shue.

Selected reading and in-class discussion of some of the central dilemmas that have been posed by the rapidly escalating processes of social change taking place under conditions of continuing political authoritarianism in China today. Topics include broad changes in demographic and social structure; rising tensions in family and gender relations; the enduring salience of community and workplace; the resurgence of Chinese nationalism, of ethnic nationalisms, of regionalism, and of popular religious movements; the significance of rising rates of crime and of political corruption; the growing crisis of social welfare delivery; and the limits on political dissent and on the development of civil society.

**[GOVT 438 Contemporary China: Political Economy @**

4 credits. Not offered 2000–2001.]

**GOVT 439 Japan in International Politics @**

Spring. 4 credits. R. Bullock.

The focus of the course is on how Japan shapes and is shaped by the international environment, with particular emphasis on the post-cold war era. Our approach will be both thematic and institutional. Topics to be discussed include U.S.-Japan trade friction, Japan's investment and ODA in Southeast Asia, and cultural politics and notions of a New Asian Identity.

**[GOVT 440 The Political Economy of Market Reform (also GOVT 630)**

4 credits. Not offered 2000–2001.]

**[GOVT 444 Afrocentrism**

4 credits. Not offered 2000–2001.]

**[GOVT 445 Stalinism as Civilization**

4 credits. Not offered 2000–2001.]

**[GOVT 446 Social Welfare and International Competitiveness]**  
4 credits. Not offered 2000-2001.]

**GOVT 448 The Quality of Democracy in Latin America**

Spring. 4 credits. K. O'Neill.  
This course explores major issues affecting the quality of democracy in Latin America. We begin by trying to capture the many meanings of the term "democracy" and by thinking through how it is possible to measure changes in the quality of democracy over time. The course will examine both institutional bases for Latin America's level of democracy—whether the quality of democracy is affected by government structures in the region—and also specific topics that affect the region's democracies. These subjects will include ethnic mobilization, guerrilla insurgencies, civil wars and peace processes, human rights violations, rising poverty rates, income inequality, and economic globalization.

**GOVT 449/749 Politics and Magic: Popular Religion and Political Power in China**

Spring. 4 credits. V. Shue.  
A course of readings, research, and seminar discussions illuminating the intersections, past and present, between popular religious organizations, mass spiritual movements, the exercise of state power, and the patterns of political dissent in China. Topics include the Taiping Heavenly Kingdom, the Boxer Uprising, Chinese medicine and contemporary charismatic healing cults, as well as the recent global rise (and repression in China) of the Falun Dafa movement.

**[GOVT 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also COM L 454, HIST 454)]** #

4 credits. Not offered 2000-2001.]

**GOVT 456 Poor People's Movements**

Fall. 4 credits. M. Katzenstein and S. Tarrow.  
In the world today, millions of poor people are being hit by globalization, liberalization, and "flexibilization" of industry. Even in the United States, a period of unprecedented economic expansion has seen a greater gap between rich and poor. Movements on behalf of the poor, the homeless, single welfare mothers, and poor peasants are being launched all over the world. How do these movements—mainly staffed by well-trained, articulate, and middle class activists—articulate with the disorganized and dispossessed of the world? What role do traditional representatives of the lower classes—trade unions and political parties of the left—play in this struggle? What kinds of new collective identities and modes of protest can help the poor to organize themselves? What is the future of poor people's movements in a world of wealth and globalization?

**[GOVT 458 Comparative Democratization]**  
4 credits. Not offered 2000-2001.]

**[GOVT 468 Global and Domestic Dimensions of Science and Technology Policy (also S&TS 425)]**  
4 credits. Not offered 2000-2001.]

## Political Theory

Government 161 is recommended.

**[GOVT 260 Social and Political Philosophy (also PHIL 260)]**  
4 credits. Not offered 2000-2001.]

**GOVT 293 Inequality, Diversity, and Justice**

Fall. 4 credits. R. Miller.  
See Philosophy 193 for description.

**GOVT 360 Ideology**

Fall. 4 credits. D. Rubinstein.  
This course will focus on critical approaches to the study of ideology in order to understand the role of ideology in political subject formation. After an initial exploratory presentation of key Marxist (Marx, Gramsci, Althusser, Hebdige), structuralist/semiotic (Barthes, Eco), and psychoanalytic models (Freud, Lacan), we will focus on specific ideologies of race, technology, and gender. Students will be required to write a seven- to eight-page take-home examination and a longer 10- to 12-page (double spaced) paper related to the issues addressed by the course material. A recommended bibliography will be available to assist in the selection of the final paper topic.

**[GOVT 361 Modern Ideologies: Liberalism and Its Critics #]**  
4 credits. Not offered 2000-2001.]

**[GOVT 364 The Selfish Individual and the Modern World]**  
4 credits. Not offered 2000-2001.]

**GOVT 366 American Political Thought from Madison to Malcolm X (also HIST 316 and AM ST 366) #**

Fall. 4 credits. I. Kramnick.  
A survey of American political thought from the eighteenth century to the present. Particular attention will be devoted to the persistence of liberal individualism in the American tradition. Politicians, pamphleteers, and poets will provide the reading. The professor offers insightful historical and social context.

**[GOVT 369 Introduction to Feminist Political Thought (also WOMNS 269)]**  
4 credits. Not offered 2000-2001.]

**[GOVT 370 Political Theory and Cinema (also GERST 330, COM L 330, THETR 330)]**  
4 credits. Not offered 2000-2001.]

**GOVT 375 Visual Culture and Social Theory (also ART H 370 and COM L 368)**

Fall. 4 credits. S. Buck-Morss.  
Introduction to critical concepts for the analysis of visual culture, in specific socio-historical contexts.

**[GOVT 377 Concepts of Race and Racism]**  
4 credits. Not offered 2000-2001.]

**[GOVT 461 Interpreting Race and Racism]**  
4 credits. Not offered 2000-2001.]

**GOVT 462 Modern Political Philosophy (also PHIL 346)**

Fall. 4 credits. R. Miller.  
See Philosophy 346 for description.

**GOVT 464 Spinoza and New Spinozism (also GERST 409)**

Spring. 4 credits. G. Waite.  
For description, see GERST 409.

**[GOVT 465 Reconciling Liberalism (also PHIL 447)]**  
4 credits. Not offered 2000-2001.]

**[GOVT 466 Feminism and Gender Discrimination]**  
4 credits. Not offered 2000-2001.]

**[GOVT 467 Radical Democratic Feminisms]**  
4 credits. Not offered 2000-2001.]

**[GOVT 468 Global and Domestic Dimensions of Science and Technology Policy]**  
4 credits. Not offered 2000-2001.]

**[GOVT 469 Limiting War (also PHIL 369)]**  
4 credits. Not offered 2000-2001.]

**GOVT 470 Contemporary Reading of the Ancients**

Spring. 4 credits. D. Rubinstein.  
This course will focus on contemporary theoretical strategies of reading Plato, Aristotle, and St. Augustine. We will be primarily concerned with French deconstructive (Derrida), feminist (Irigaray, Le Doeuff), post-structuralist (Foucault), and psychoanalytic (Lacan) approaches to the ethics of love, pedagogy, friendship, and citizenship. We will also consider the contribution of queer theory (Halperin, Davidson) to the understanding of key texts such as Plato's *Symposium*. Readings will include Plato's *Phaedrus*, *Symposium*, *Apology*; Aristotle's *Nicomachean Ethics* and *Physics*, and St. Augustine's *Confessions*. Students will be required to write a short five-page (double spaced) discussion paper engaged with one week's readings and a longer 10- to 12-page final paper that would be a sustained close reading of an ancient text of political thought informed by a theoretical approach discussed in the course.

**GOVT 471 The Cultural Theory of the Frankfurt School (also GERST 495, COM L 495)**

Fall. 4 credits. P. U. Hohendahl.  
For description see German Studies 495.

**[GOVT 473 Marx, Nietzsche, Freud (also GERST 415)]**  
4 credits. Not offered 2000-2001.]

**GOVT 474 Community, Nation, and Morality (also PHIL 446)**

Spring. 4 credits. R. Miller.  
See Philosophy 446 for description.

## International Relations

Government 181 is recommended.

**[GOVT 294 Global Thinking (also PHIL 294)]** @  
4 credits. No prerequisites; intended for freshmen and sophomores. Fulfills geographical distribution requirement. Not offered 2000-2001.]

**[GOVT 380 The Politics of Modern Germany]**  
4 credits. Not offered 2000-2001.]

**GOVT 382 International Relations of East Asia @**

Spring. 4 credits. J. J. Suh.  
An introduction to the East Asian international relations, this course focuses primarily on interaction among the Northeast Asian powers (China, Japan, Korea, Russia, and the United States). After an initial survey of regional dynamics in a historical, Cold War, and post-Cold War context, we will attempt to answer a number of theoretically driven questions regarding stability and security in the region.

Themes emphasized include the influence of domestic factors; the nexus between economics and national security; the influence of culture and history on international relations; the post-Cold War Asian redistribution of power and influence; the changing configuration of regional relations; and alternative futures of Asian security.

**GOVT 385 American Foreign Policy**

Fall. 4 credits. R. McDermott.

This course will provide an overview of the history of American foreign policy, concentrating on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy will be covered, including international, domestic, and individual levels of analysis. These interpretations will be used to examine events including: the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Suez and Berlin crises, and the Cuban missile crisis; and the Korean, Vietnamese, and Gulf Wars. Emphasis will be placed on security as opposed to economic foreign policy issues.

**[GOVT 386 The Causes of War]**

4 credits. Not offered 2000–2001.]

**GOVT 387 Political Psychology in International Relations**

Spring. 4 credits. R. McDermott.

This course provides a survey of how social and cognitive psychology are used in the study of international relations. This course will cover various methodologies including psychobiography and experimental and survey research. It will also cover several theoretical approaches including recent work in neuroscience and evolutionary psychology. These theories and methods will be applied to topics including risk taking, leadership, group dynamics, and the influence strategies of the media. Particular attention will be placed on the interaction of emotion, cognition, and behavior in processes of judgment and decision making.

**[GOVT 388 International Political Economy]**

4 credits. Not offered 2000–2001.]

**GOVT 389 International Law**

Spring. 4 credits. J. Rabkin.

Is international law a pious delusion, helpless in the face of real power? Or is public policy becoming so entangled in international standards that international law is now eroding national sovereignty? This course will survey the theoretical foundations and general history of international law since the seventeenth century in order to highlight what is new in the doctrines and institutions by which it operates in the contemporary world. The course will give special attention to the relation between international and U.S. law and to the workings of international law in particular fields—including environmental and human rights protection, trade regulation, and control of terrorism.

**GOVT 390 International Relations and Film Theory**

Fall. 4 credits. J. Kirshner.

This course will consider how ideas about major themes in the history of world politics have been expressed through film. The course will include a review of principal theories of international relations as well a consideration of visual analysis: how filmmakers express their ideas through the construction, juxtaposi-

tion, and manipulation of images. Topics such as World War I, the Cold War, and globalization will be addressed and films discussed will include *Paths of Glory*, *Lifeboat*, and *The Manchurian Candidate*.

**GOVT 391 Chinese Foreign Policy @**

Fall. 4 credits. A. Carlson.

In this course we will examine the dramatic rise of China through review of the main themes and trends in contemporary Chinese foreign policy since the establishment of the People's Republic, and more specifically concentrating on major developments in Chinese foreign policy during the 1980s and 1990s. Such a survey will involve not only a consideration of the evolution of China's relations with its major bilateral partners, but also investigating its changing relationship with international institutions and norms. In addition, students will be asked to consider the extent to which Chinese foreign policy is simply a reflection of systemic and structural variables, such as shifts in the relative balance of power, and what role other factors, such as ideology, culture, leadership psychology, and/or domestic politics play. In short, we will be exploring how important "China" is in determining the course of Chinese foreign policy.

**[GOVT 392 International Relations of the Middle East (also NES 395) @]**

4 credits. Not offered 2000–2001.]

**[GOVT 393 Introduction to Peace Studies (also SOC 310)]**

**[GOVT 394 Comparative Foreign Policy]**

4 credits. Not offered 2000–2001.]

**[GOVT 395 Palestinian Nationalism (also NES 399)]**

4 credits. Not offered 2000–2001.]

**[GOVT 475 The Politics of International Monetary and Financial Relations]**

4 credits. Not offered 2000–2001.]

**GOVT 477 Rational Choice Approaches to International Relations**

Spring. 4 credits. R. McDermott.

Rational choice paradigms are becoming increasingly predominant in international relations scholarship. This course teaches international relations from a rational choice perspective. This course will cover modeling methodology and theoretical issues. Familiarity with mathematics is not required, but logical reasoning is emphasized. This course will cover rational choices approaches to social choice and public-good problems, negotiation, alliances, and constraints of domestic politics. Critiques of balance of power, deterrence, and power transition theories from a rational choice perspective will be included. An introduction to game theory will be provided. Alternative psychological approaches will be mentioned briefly.

**GOVT 478 Decision Making**

Fall. 4 credits. R. McDermott and J. Cowden.

This class will examine individual and group decision making from a variety of theoretical perspectives. Topics to be covered include voting behavior, crisis decision making, bargaining and negotiation, uncertainty, overconfidence, ambiguity, and self-fulfilling prophecies.

**GOVT 479 Sovereignty and International Relations**

Spring. 4 credits. A. Carlson.

In recent years international relations theorists have become embroiled in an increasingly heated debate over the role of sovereignty in the contemporary international system. In this seminar we will investigate the main aspects of this debate by paying particular attention to questions involving the historical evolution of sovereignty and its contemporary meaning in an international system that is increasingly defined by apparent signs of economic and political integration between states. The intent of such a course is not only to critically analyze sovereignty's role in international politics, but also to explore what the approach IR theorists take in regards to sovereignty reveals about their understanding of systemic and structural change within the international system.

**GOVT 481 Democracies in the International System**

Fall. 4 credits. C. Way.

In what ways do the incentives created by democratic political institutions lead to distinctive behavior in international politics? The "democratic peace" literature has spurred great interest in the relationship between democracy and war. We will delve into this literature in depth, but not stop there. In addition, we will explore a range of ways that democracies might behave in a distinctive fashion across a variety of issue areas. Are democracies more peaceful than other types of states, and if so what explains this "democratic peace"? Why do democracies seem to be more likely to win the wars they do choose to fight than other types of states? If they are indeed dovish, why do democratic publics seem to reward threats to use force by "rallying around the flag" in support of their governments? Are democracies more vulnerable to protectionist forces, or more likely to be free traders? How do the rhythms of the electoral cycle influence diplomacy in both the economic and security realms? Do democratic institutions make it harder or easier to pursue deterrence policies successfully? We will assess the theoretical and empirical literature addressing these and other questions about how democracies behave in the international system.

**[GOVT 482 International Relations of East Asia @]**

4 credits. Not offered 2000–2001.]

**[GOVT 483 The Military and New Technology (also S&TS 483)]**

4 credits. Not offered 2000–2001.]

**GOVT 486 Gender, Nationalism, and Conflict**

Fall. 4 credits. M. Katzenstein and M. Evangelista.

This course will consider how gender is imbricated in the theory and experiences of colonialism, nationalism, and conflict more generally. We will consider such fundamental questions as: How is gender related to the propensity for peaceful or conflictual behavior? Are men more prone to violence? Are women better mediators? We will also direct ourselves to specific topics such as (1) the role gender plays in ethnic conflict—the use of gender identities and violent strategies in "ethnic cleansing," (2) the ways colonial experiences and nationalist movements produce different ideas of gender and gender practices; (3) how changing ideas of gender

and sexuality have shaped and been shaped by the institution of the military.

**[GOVT 491 Conflict, Cooperation, and Norm: Ethical Issues in International Affairs]**

4 credits. Not offered 2000-2001.]

## Honors Courses

Late each spring a limited number of sophomore majors are admitted to the honors program, their work to begin the following fall. Application forms and a full description of the program may be obtained in 125 McGraw Hall.

**GOVT 493 Studying Politics: The Junior Honors Seminar**

Fall and spring. 4 credits. Fall, K. O'Neill; spring, H. Schamis.

The seminar will meet twice weekly under the supervision of a senior faculty member with numerous classes being led by other members of the department faculty. The seminar will survey the broad range of what we mean by "the study of politics" and the various methods we enlist to carry out the study. The seminar will be writing intensive, requiring at least five papers.

**GOVT 494 Honors Seminar: Thesis Clarification and Research**

Fall. 4 credits. E. Sanders.

Each student works individually with a faculty member. The student initiates the tutorial by interesting a faculty member in his or her likely thesis project and by submitting to the director of undergraduate studies a form outlining the general area the thesis will treat and bearing the faculty tutor's signature. This form is due the third week of classes. The tutorial culminates in a 10- to 15-page paper setting forth the central questions to be addressed by the thesis, the state of existing knowledge regarding those questions, and why they matter.

**GOVT 495 Honors Thesis: Research and Writing**

Spring. 4 credits. Limited to students who have successfully completed Government 494.

Students continue the work of the preceding semester typically with the same faculty tutor. Research on the thesis is completed and writing begun. The tutorial culminates in a thesis of some 60 to 80 pages. The grade for the tutorial is determined by the faculty tutor, while the degree of honors (if any) awarded the thesis is decided by a committee of faculty members established for that purpose.

## Independent Study

Independent study, Government 499, is a one-on-one tutorial which is arranged by the student with a faculty member of their choosing. Government 499 is open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty sponsor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than four credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester.

Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

**GOVT 499 Readings**

Fall or spring. 1-4 credits.

## Graduate Seminars

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

### Field Seminars

**GOVT 603 Field Seminar in American Politics**

Spring. 4 credits. E. Sanders.

The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

**GOVT 606 Field Seminar in International Relations**

Fall. 4 credits. M. Evangelista and J. J. Suh.

A general survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants will be expected to do extensive reading in the literature as well as research.

**GOVT 607 The Western Political Tradition: A Survey**

Spring. 4 credits. N. Hirschmann.

An introduction to political theory through a reading of selected classics in political thought from Plato to Marx.

### Methodology

**GOVT 601 Scope & Methods of Political Analysis**

Fall. 4 credits. W. Mebane.

This course introduces the major analytical approaches used in contemporary political science research. We touch on broad philosophical issues concerning the nature of theory and inference, the practices of cultural and historical interpretation, and the relevance of moral values and political commitments. Several kinds of research designs, including comparative case study and quasi-experimentation, are briefly examined. The basic analytical ideas involved in statistical methods such as sampling and regression analysis are introduced, as are the basic concepts of the theory of collective choice and the elementary methods of applied game theory.

**GOVT 602 Field Seminar in Political Methodology**

Spring. 4 credits. J. Cowden.

This course provides an introduction to some of the quantitative methods used in the social sciences. Topics discussed will include elementary probability theory, random variables, functions of random variables, and

sampling distributions; concepts of inference including point estimation, confidence intervals, and hypothesis testing; bivariate regression; and multiple regression.

**GOVT 605 Comparative Methods**

Spring. 4 credits. C. Way and K. O'Neill.

This seminar provides a survey of different methodological approaches to the study of comparative politics: single case studies, comparative case studies based on Millian logic, qualitative comparative analysis, and a variety of quantitative methods. Substantive works will be used to illustrate each approach. Throughout, the discussion will emphasize methodological issues that are common to all forms of comparative inquiry.

**[GOVT 707 Game Theory for Political Science]**

4 credits. Not offered 2000-2001.]

### American Government and Institutions

**[GOVT 611 The Political Economy of American Development, 1860-1900]**

4 credits. Not offered 2000-2001.]

**[GOVT 613/413 Finance, Federalism, and Politics]**

4 credits. Not offered 2000-2001.]

**[GOVT 615 State and Economy in Comparative Perspective]**

4 credits. Not offered 2000-2001.]

**[GOVT 618 Politics, Markets, and the Middle Classes]**

4 credits. Not offered 2000-2001.]

**GOVT 620 The United States Congress**

Spring. 4 credits. R. Bensel.

The United States Congress will be examined first, as a "closed system" in which institutional arrangements decisively apportion political power; and second, as the product of electoral and social forces outside the institution. Emphasis will be placed on the historical relationship between institutional growth and state formation; parliamentary rules as both arrangements within which the "rational choices" of legislators are played out and as deliberate constructions and allocations of political influence; and the use of legislative behavior as evidence in the analysis of fundamental principles of politics. Because the literature on the lower chamber is generally more rich, the House of Representatives will receive greater attention than the Senate.

**[GOVT 623 The Politics of Courts]**

4 credits. Not offered 2000-2001.]

**[GOVT 628 Bureaucracy and Law]**

4 credits. Not offered 2000-2001.]

**GOVT 703 Political Economy**

Spring. 4 credits. J. Kirschner.

This course will undertake a general survey of the classical and modern theories of political economy. The works of Smith, List, Marx, Weber, Keynes, Shumpeter, Hayek, and Friedman, among others, will be studied and placed within the context of the history and evolution of the thought, practice, and method of the field.

**GOVT 705/405 Government and the Economy**

Spring. 4 credits. E. W. Kelley.

See Government 405 for description.

**GOVT 706/406 The Politics of Education**

Spring. 4 credits. E. W. Kelley.

See Government 406 for description.

**GOVT 728 Government and Public Policy**

Fall. 4 credits. T. J. Lowi.  
For description see Government 428.

**Comparative Government****GOVT 630 The Political Economy of Market Reform**

Fall. 4 credits. V. Bunce and H. Schamis.  
This seminar is open to advanced undergraduate and graduate students. It addresses the political economy of market reform in East-Central Europe and Latin America. Specifically, we will study the relatively fast collapse of state socialism versus the long decline of import substituting industrialization, and their respective legacies on new economic and political systems. We will focus on the role of major agents in the transformation process—the international system, coalitions of interest groups, political (especially state) institutions, and ideologies. Throughout the semester, we will examine the emerging market societies in the east and the south in comparative fashion.

**[GOVT 632 Politics and Society in Western Europe]**

4 credits. Not offered 2000–2001.]

**[GOVT 633 European Party Systems and Political Change]**

4 credits. Not offered 2000–2001.]

**[GOVT 634 Genetic Engineering: Politics and Society in Comparative Perspective]**

4 credits. Not offered 2000–2001.]

**[GOVT 638 Latin American Political Economy]**

4 credits. Not offered 2000–2001.]

**GOVT 639 Studying Political Culture**

Spring. 4 credits. D. Schirmer.  
Selected readings deploying a range of differing approaches to the study of the relations between culture and politics. Discussion of central methodological and interpretive questions and paradigms including the linkage of cultural with structural explanations and the framing of informative comparisons across cultures. Readings and discussion will focus on European and North American examples.

**GOVT 642 Comparative Political Economy: East and Southeast Asia**

Fall. 4 credits. R. Bullock.  
This seminar focuses on the political economy of rapid growth in postwar Japan, South Korea, and Taiwan. Seminar themes include: Japanese colonial legacies; contending models of East Asian economic success; international implications of rapid growth; the “Japanese model of development” and regional variance; one-party conservative rule; structural corruption and political scandal; ongoing efforts at political-economic liberalization; and Southeast Asian cases as second-generation NICs.

**[GOVT 645 Chinese Politics]**

4 credits. Not offered 2000–2001.]

**[GOVT 652 Southeast Asia Seminar: The Philippines (also ASIAN 601)]**

4 credits. Not offered 2000–2001.]

**GOVT 653 The Plural Society Revisited (also ASIAN 607)**

Fall. 4 credits. B. Anderson.  
John Furnivall's concept, invented 40 years ago, posited colonial society as one in which race (and ethnicity), class, occupation, and residence were distributed more or less

isomorphically. The seminar will review the utility of the concept in light of subsequent research on colonial Asia, and its applicability to developments since the achievement of independence. It will also consider the relevance of the concept to (uncolonized) modern Thailand. The core problematic issue will be the relationship between classification (naming) and power.

**[GOVT 655 Gender, Politics, and Welfare Policies in Europe and the U.S. (also GOVT 442)]**

4 credits. Not offered 2000–2001.]

**GOVT 656 Comparative Political Economy**

Spring. 4 credits. J. Pontusson.  
While exploring selected topics in the comparative political economy of advanced industrial societies, this seminar seeks to delineate “political economy” as a subfield of political science. At the level of theory, our goal is to bridge two research traditions, one concerned with microeconomic issues (industrial organization, industrial policy, competitiveness) and the other concerned with macroeconomic issues (wage bargaining, fiscal and monetary policy), and to explore what a synthesis of these research traditions might look like. At the level of methodology, we seek to bridge and integrate qualitative and quantitative approaches to comparative political economy. Students are expected to have some prior exposure to quantitative analysis (e.g., GOVT 601).

**[GOVT 657 Comparative Democratization]**

4 credits. Not offered 2000–2001.]

**GOVT 660 Social Movements and Contentious Politics (also SOC 660)**

Fall. 4 credits. S. Tarrow.  
This is a research seminar on the relationships among politics, organized social movements, and periods of mass mobilization like those that swept through Western Europe and the U.S. in the 1960s and in Eastern and Central Europe today. The course begins with a theoretical introduction to major approaches to social movements and collective action, concentrating on the factors which induce masses of people to adopt disruptive forms of collective action. It moves from there to a historical section focusing on cycles of protest in the recent and not-so-recent past. It continues with case materials that illustrate a series of theoretical problems in the study of movements and collective action—particularly that of the relations between protest and reform. Students will write term papers on particular cycles of protest and reform.

**GOVT 692 The Administration of Agricultural and Rural Development**

Spring. 4 credits. N. Uphoff.  
For description, see INTAG 603.

**[GOVT 731 Political Ecology]**

4 credits. Not offered 2000–2001.]

**[GOVT 732 Postsocialist Transformations]**

4 credits. Not offered 2000–2001.]

**GOVT 735 Politics of South Asia**

Fall. 4 credits. R. Herring.  
This course investigates the politics of the South Asian region by examining the substantive and theoretical literature on various specific subjects, with special emphasis on India. Themes will vary by term, but include some mix of political economy

and development; agrarian movements and policy; politics of ethnicity, identity and subnationalism; and environmental politics. An explicit focus is comparative method, both within the region and between the region and other world areas. The course is seminar in format and premised on significant student participation.

**GOVT 749/449 Politics and Magic: Popular Religion and Political Power in China**

Spring. 4 credits. V. Shue.  
See Government 449 for description.

**Political Theory****[GOVT 663 Political Theories of Power]**

4 credits. Not offered 2000–2001.]

**[GOVT 664 Contemporary Democratic Theory]**

4 credits. Not offered 2000–2001.]

**[GOVT 665 American Political Thought: From Madison to Malcolm X]**

4 credits. Not offered 2000–2001.]

**[GOVT 667 Major Figures in Modern Political Theory]**

4 credits. Not offered 2000–2001.]

**GOVT 668 Major Figures in Modern Political Theory II: Freedom**

Fall. 4 credits. N. Hirschmann.  
A complementary course to Government 667, this graduate seminar will allow students to continue intensive study of major figures in modern political theory through particular temporal or thematic lenses. While the focus will change from year to year, the seminar will either engage in intensive analysis of two or three particular “great names” in the field of political theory, or focus on a specific theme—such as freedom, justice, obligation—as it is treated by significant theorists of the modern era. Theme for fall 2000: The Concept of Freedom.

**GOVT 669 Modern Social Theory I (also GERST 669)**

Fall. 4 credits. S. Buck-Morss.  
Readings vary, but topics are drawn from the traditions of Marx, Weber, Durkheim, the Frankfurt School, and Freud. They include political economy, the transformation to “modernity,” ideology as the legitimization of power, and social institutions as social constraints. The methods of critical theory, structuralism, post-structuralism, and feminism will be considered. The focus in fall 2000 will be on the topic of globalization.

**GOVT 670 Modern Social Theory II (also GERST 670)**

Spring. 4 credits. S. Buck-Morss.  
Issues raised by neo-Marxism, critical theory, post-structuralism, and feminism.

**[GOVT 671 Graduate Seminar in Feminist Political Theory]**

4 credits. Not offered 2000–2001.]

**GOVT 673 Republicanism and Liberalism**

Spring. 4 credits. I. Krannick.  
This seminar will look at the intellectual roots of what is today, at least in Anglo-American political thought, a central debate between community-oriented visions of the ideal polity and individual-centered ideals. The seminar will read Aristotle, Cicero, Machiavelli, Hobbes, Locke, Mill, Rousseau, Paine, Smith, and the Federalist Papers.

**GOVT 674 Theory and Practice of Nationalism**

Fall. 4 credits. B. Anderson.

This course will be devoted to the comparative study of the rise and transformation of nationalism, according to different theoretical and philosophical traditions. The relationship of nationalism to questions of race, gender, class, and time will also be discussed on the basis of both theoretical and empirical studies.

**GOVT 675 Gramsci and Cultural Politics (also GERST 685)**

Spring. 4 credits. G. Waite.

See German Literature 685 for description.

**[GOVT 676 Theories of Governmentality**  
4 credits. Not offered 2000-2001.]**[GOVT 678 Classics in Political Thought**  
4 credits. Not offered 2000-2001.]**[GOVT 679 Althusser and Lacan**  
4 credits. Not offered 2000-2001.]**[GOVT 760 Theoretical Approaches to Ideology**  
4 credits. Not offered 2000-2001.]**GOVT 761 "The Sign of History": Kant and Lyotard (also GERST 693)**

Spring. 4 credits. P. Gilgen.

For description, see GERST 693.

**International Relations****[GOVT 681 Politics of Transnationalism**  
4 credits. Not offered 2000-2001.]**[GOVT 684 Strategies of Inquiry for International and Comparative Politics**  
4 credits. Not offered 2000-2001.]**GOVT 685 International Political Economy**

Fall. 4 credits. P. Katzenstein and J. Kirshner.

An exploration into a range of contemporary theories and research topics in the field of international political economy. The seminar will cover different theoretical perspectives and a number of substantive problems.

**[GOVT 686 International Strategy**  
4 credits. Not offered 2000-2001.]**[GOVT 688 Political Economy and National Security**  
4 credits. Not offered 2000-2001.]**[GOVT 689 International Security Politics**  
4 credits. Not offered 2000-2001.]**[GOVT 691 Normative Elements of International Relations**  
4 credits. Not offered 2000-2001.]**Independent Study**

This course is *NOT* open to undergraduates. Undergraduates wishing to conduct supervised study should register for Government 499.

**GOVT 799 Independent Study**

Fall or spring. 4 credits.

Government 799 is a course of individualized readings and research for graduate students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their

course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 125 McGraw Hall.

**HISTORY**

I. Hull, chair; J. V. Koschmann, director of graduate studies; R. Weil, director of undergraduate studies; S. Blumin, T. Borstelmann, V. Caron, S. Cochran, P. R. Dear, M. C. Garcia, S. Greene, P. Holquist, I. Hull, P. R. Hyams, J. J. John, C. Kammen, M. Kammen, S. L. Kaplan, J. V. Koschmann, D. C. LaCapra, W. F. LaFeber, T. L. Loos, R. L. Moore, J. M. Najemy, M. B. Norton, C. Peterson, J. R. Piggott, S. Pohl, R. Polenber, W. B. Provine, M. J. Roldan, J. H. Silbey, M. Steinberg, B. Strauss, E. Tagliacozzo, D. Usner, M. Washington, R. Weil, J. H. Weiss, D. Wyatt

Emeritus: D. A. Baugh, K. Biggerstaff, W. M. Pintner, F. Somkin, B. Tierney, O. W. Wolters

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

**Advanced Placement and International Baccalaureate**

Advanced placement and International Baccalaureate credit awarded by the College of Arts and Sciences counts towards the 120 credits needed for graduation, but does not count toward completion of the history major. Students earning a 4 or 5 in the Advanced Placement Examination or a 6 or 7 in the International Baccalaureate history examinations are urged to enroll in intermediate or advanced history classes. Students who are unsure about their qualification should consult the instructor.

**The Major**

To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of *any* two History courses excluding First-Year Writing Seminars.

- 1) Take nine history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count towards fulfilling the major.)
- 2) Of the total nine courses:
  - a) four must be outside of American history and
  - b) three must be in history before 1800.

Courses used to fulfill Requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).
- 3) Of the total nine courses, one must be a 400-level seminar. History 400 may be used to fulfill this requirement. Appropriate 400-level seminars may be used to fulfill Requirements (2a) and (2b).

**Honors**

The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Proseminar (History 400) plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second term of sophomore year or early in junior year, interested students should speak to a faculty member or faculty adviser about the honors program.

Before the beginning of senior year, the candidate presents in conversation or in writing a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in History 401, Honors Research, with their supervisors. Any exceptions to this must be approved by the Honors Committee. History 401 is a four-credit course that permits honors candidates to conduct research and to begin writing the honors essay. At the end of the first semester of the senior year, as part of the requirements for History 401, the student submits to the supervisor a 10- to 15-page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole and meets with a committee consisting of the student's supervisor and one other department member who will eventually serve as a reader of the thesis. That committee then recommends whether the student may proceed to enroll in History 402, Honors Thesis, during the final semester of the senior year. History 402 is a four-credit course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the two faculty members who administered the preliminary oral interview in December.

The text of the honors essay may not exceed 60 pages except by permission of the chair of the honors committee and the student's supervisor. Two copies are due during the third or fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, seventeenth-century science, nineteenth-century American politics).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.

**Cornell-in-Washington Program.** History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

## Course Numbering System

100-level courses are very general introductory courses (like 151–152, 190–191) and freshman writing seminars.

200-level courses come in two kinds: seminars or lecture courses. Neither kind has prerequisites and both admit freshmen.

200-level seminars (which are identified by the name "seminar" in the title) are similar to first-year writing seminars, except that there is greater emphasis on subject matter and less on writing.

200-level lecture courses cover a relatively broad geographical area, period of time, or subject.

300–399-level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250–299. Admission of freshmen varies from course to course and is indicated in the course descriptions.

400–499 are upper level undergraduate courses.

600–699 and 700–799 are graduate level courses.

## Comparative History

### HIST 274 Foodways: A Social History of Food and Eating #

Fall. 4 credits. S. L. Kaplan.

An interdisciplinary examination of the validity of the adage "man is what he eats." Among the topics: food and nutrition, food and social structure, the politics of food control, food and modernization, taste making, and food in religion and literature. Cases will be drawn widely across space and time, from Pharaoh's Egypt to the 1990s.

### HIST 360 Early Warfare, East and West #

Spring. 4 credits. C. Peterson.

A study of the principal modes of warfare found both in the East and the West from ancient times up to the eighteenth century. Tactical evolution and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.

### [HIST 380 Social History of Western Technology #

4 credits. Not offered 2000–2001. J. Weiss.  
For description, see History of Science.]

### [HIST 393 Images of Humanity in Medieval China (also ASIAN 393) @ #

Fall. 4 credits. Prerequisite: any course on premodern China or Chinese religions, or permission. Not offered 2000–2001. C. Peterson.]

### [HIST 405 Population and History #

4 credits. Open to sophomores. Not offered 2000–2001. S. L. Kaplan.]

### [HIST 409 Seminar on Work in Europe and America #

Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. S. L. Kaplan.

A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis on the "representations" of work of the actors themselves who worked, as well as of those, who for various critical reasons, did not work. The seminar will examine not only ideology but also the organization, practice, and physical place of work. It will explore theory as well as "cases," and draw on anthropological and sociological as well as historical materials.]

### [HIST 432 The City in History: Europe and America #

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. S. Blumin.

Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe and in modern Europe and America. Individual research projects.]

### [HIST 451 Lord and Peasant in Europe: A Seminar in Social History #

4 credits. Prerequisite: permission of instructor. Not offered 2000–2001. S. L. Kaplan.]

### [HIST 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also GOVT 454) #

Spring. 4 credits. Limited to 20 students. Prerequisite: permission of instructor. Not offered 2000–2001. J. Najemy, M. Bernal.]

## History of Science

### [HIST 250 Technology in Society (also ENGRG 250, ELE E 250, and S&TS 250)

Fall. 3 credits. Not offered 2000–2001. R. Kline.

For description, see ENGRG 250.]

### HIST 280 The Sciences in the Twentieth Century (also S&TS 283)

Spring. 4 credits. M. A. Dennis.

Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciences—physical and biomedical—during the twentieth century, students will learn about the reciprocal relations between science and society. Topics covered may include the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union, Nazi Germany, and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the changing character of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-Western cultures.

### [HIST 281 Science in Western Civilization (also S&TS 281) #

Fall. 4 credits. History 281 is not a prerequisite to 282. Not offered 2000–2001. P. R. Dear.

This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. 281 runs chronologically up to the death of Isaac Newton and focuses on the cultural traditions of Christian Europe and its selective appropriation of a Greek heritage.]

### HIST 282 Science in Western Civilization (also S&TS 282) #

Spring. 4 credits. History 281 is not a prerequisite to 282. M. A. Dennis.

This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show sciences as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. This course covers the eighteenth, nineteenth, and early twentieth centuries.

**HIST 287 Evolution (also BIO G 207, S&TS 287)**

Fall or summer. 3 credits. W. Provine.  
For description, see BIO G 207.

**[HIST 292 Inventing an Information Society (also ENGRG 298, ELE E 298, and S&TS 292)]**

Spring. 3 credits. May be offered in spring 2001. R. Kline.  
For description, see ENGRG 298.]

**[HIST 380 Social History of Western Technology #]**

Spring. 4 credits. Not offered 2000-2001.  
J. Weiss.

Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures will deal both with instances of social transformation that accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.]

**HIST 415 Seminar in the History of Biology (also BIO G 467, B&SOC 447, S&TS 447)**

Summer (6-week session). 4 credits.  
W. Provine.  
Specific topic changes each year.

**HIST 525 Seminar in the History of Technology (also S&TS 525)**

Fall. 4 credits. R. Kline.  
For description, see S&TS 525.

**[HIST 616 Enlightened Science (also S&TS 416)]**

Fall. 4 credits. Not offered 2000-2001.  
P. R. Dear and M. A. Dennis.  
"Science" is a term that is often associated with "rationality." The idea that "reason," rather than "faith" or "tradition" should be the pre-eminent guide to practical action has deep roots in the thought of eighteenth-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment shows how this ideal was developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course will investigate our current scholarly understanding of many themes and issues relating to "enlightened science," as well as studying writings of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in several national contexts including Scotland, France, and Germany. We will attempt to view these materials from the perspective both of developments from earlier periods and in relation to the later consequences of this ideology.]

**[HIST 680 Seminar in Historiographical Approaches to Science (also S&TS 680)]**

Fall. 4 credits. Not offered 2000-2001.  
P. R. Dear.  
Examines philosophical, sociological, and methodological dimensions of recent historiography of science.]

**[HIST 682 Topics in the Scientific Revolution (also S&TS 682)]**

Fall. 4 credits. Not offered 2000-2001.  
P. R. Dear.  
This is a graduate seminar devoted to investigation of recent scholarship and issues

in sixteenth- and seventeenth-century European knowledge of nature. Students will be expected to produce a substantial paper focused on the study of primary source documents. The seminar will focus alternately on the study of recent historiography in selected areas, and an examination of primary source materials intended to critique and test those historiographical approaches. Topics will include: credibility and social status; the academic environment; philosophy and court culture; and the situated meaning of experiment.]

**[HIST 711 Introduction to Science and Technology Studies (also S&TS 711)]**

Fall. 4 credits. Not offered 2000-2001.  
S. Hilgartner.  
For description, see S&TS 711.]

**American History****HIST 101 Introduction to American History (also AM ST 103) #**

Summer and fall. 4 credits. 101 is not a prerequisite to 102. S. Blumin.

A survey of American history from the beginnings through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

**HIST 102 Introduction to American History (also AM ST 104)**

Summer and spring. 4 credits. 101 is not a prerequisite to 102. T. Borstelmann.  
An introductory survey of the development of the United States since the Civil War.

**[HIST 201 Seminar: Immigration and Ethnicity in Twentieth-Century U.S.]**

Spring. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students.  
Prerequisite: permission of instructor. Not offered 2000-2001. M. C. Garcia.

This seminar will look at immigration to the United States in the twentieth century, highlighting the experiences of several groups as case studies. We will analyze the "push/pull" historical-structural factors that compelled people to come to the United States; the nature of cultural and structural assimilation; nativist movements; the evolution of U.S. immigration policy; the formation of ethnic identity in U.S. society. Attention will be given to current issues such as immigration reform, bilingual education; and the multiculturalism debate.]

**HIST 202 Comparative Migration in the Americas (also AM ST 204 and LSP 203)**

Spring. 4 credits. Letter grade only.  
M. C. Garcia.  
A seminar examining migration both within and to the Americas in the nineteenth and twentieth centuries. Topics to be discussed are the reasons for population movements; immigration policies; social, economic, and political accommodation; nativist and restrictionist responses; women and migration; remittances and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.

**[HIST 208 Seminar: The Era of Franklin D. Roosevelt (also AM ST 208)]**

Fall. 4 credits. Seminar designed for underclass students but open to all students. Enrollment limited to 15 students.  
Prerequisite: permission of instructor. Not offered 2000-2001. R. Polenber.  
The impact of the Great Depression and World War II on American politics, law, and culture.]

**[HIST 209 Seminar: Political History of Indians in the United States (also AIS 209) #]**

Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students.  
Prerequisite: permission of instructor. Not offered 2000-2001. D. Usner.

An investigation of political organization and change among Native American societies. Discussions and assignments examine forms of tribal government, diplomacy, and warfare, as well as political relations with European colonies and the United States. Specific topics include pan-Indian confederacies, Indian policy, struggles over sovereignty, and Indian strategies of autonomy and resistance.]

**[HIST 210 The Atlantic World from Columbus to Equiano]**

Spring. 4 credits. Not offered 2000-2001.  
R. J. Weil and M. B. Norton.  
After Europeans first crossed the Atlantic in the late fifteenth century, the ocean became a vast highway linking the European powers—Spain, France, Britain, and the Netherlands—with their colonial outposts in America. This seminar will explore the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of the slave trade and other aspects of the Atlantic economy. Intended primarily for sophomore prospective history majors; open to others by permission of instructors.]

**HIST 212 African-American Women in the Twentieth Century (also AM ST 212 and WOMNS 212)**

Spring. 4 credits. Sophomore seminar.  
M. Washington.  
An examination of twentieth-century themes significant in the historical experience of Black women. Major emphasis will be on race, gender, community, art, and politics in post World War II America. Specific topics include African-American women's involvement in such areas as political activism at the electoral and grass root levels; socio-economic issues affecting women and the community; religion; representation and participation of Black women in art and entertainment; and issues specific to gender cross-racially as well as intra-racially.

**HIST 213 Asian American History (also AAS 213)**

Fall. 4 credits. V. Jew.  
Comparative introductory history of Asian Indians, Chinese, Filipino, Japanese, and Koreans in the U.S. from about 1850 to World War II. Themes include U.S. expansionism in the Pacific, Asian migrant labor in Hawaii and the American West, the anti-Asian movement, and Asian resistance.

**[HIST 214 Seminar on American Foreign Policy (also AM ST 214)]**

Fall. 3 credits. Prerequisite: permission of instructor. Not offered 2000-2001. Next offered fall 2001. W. LaFeber.]

**[HIST 238 History of Women in the Professions, 1800 to the Present (also AM ST 258, WOMNS 238, and HD 258)]**

Spring. 3 credits. Not offered 2000–2001.  
J. Brumberg.  
For description, see HD 258.]

**[HIST 251 Black Religious Traditions from Slavery to Freedom (also AM ST 251, RELST 251)]**

Fall. 4 credits. Sophomore seminar. Letter only. M. Washington.

A survey on the black religious and spiritual traditions during bondage and the early years of freedom. The course will examine slave religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the churches' role in social protest.

**[HIST 260 Introduction to U. S. Latino History, Part I (also LSP 260 and AM ST 259)]**

Spring. 4 credits. Not offered 2000–2001.  
M. C. Garcia.

This course introduces students to the history of Latinos in the United States. We will focus specifically on the history of Chicanos (Mexican Americans) and Central Americans. Part II of this course, History 261, focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. (students are not required to take both courses). Among the topics that will be addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the United States; the social and political events that shaped the evolution of these Latino communities; the role of cultural identity, race, class, and gender in shaping experience; the role of foreign policy in formulating immigration policy.]

**[HIST 261 Introduction to U.S. Latino History, Part II (also LSP 261 and AM ST 261)]**

Fall. 4 credits. Not offered 2000–2001.  
M. C. Garcia.

This survey will discuss the history of Latinos from the Caribbean: the Puerto Ricans, Cubans, and Dominicans. Students will be introduced to some of the most important historical and theoretical works in this field. Topics to be discussed include the push-pull/historical-structural factors that influenced migration to the United States; the historical evolution of these communities; the role of cultural identity, as well as race, class, and gender in shaping experience; the intersection of foreign policy and immigration policy.]

**[HIST 273 Women in American Society, Past and Present (also WOMNS 273)] #**

Spring. 4 credits. Not offered 2000–2001; next offered 2002–2003. M. B. Norton.  
A survey of women's experiences in America from the seventeenth century to the present. Among the topics to be discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.]

**HIST 276 American Indian History, 1500–1850 (also AIS 276 and AM ST 272) #**

Fall. 4 credits. D. Usner.  
A survey of North American Indian history from the sixteenth century to the mid-nineteenth century. Relations between Indian Nations and with European colonies will be explored. Different cultural groups and cross-cultural encounters will be compared, with emphasis on resistance and adaptation to European colonialism. The formative years of U.S. Indian policy and the experiences of Indian people through the removal era will receive close attention.

**HIST 277 American Indian History Since 1850 (also AIS 277 and AM ST 277)**

Spring. 4 credits. D. Usner.  
A historical study of American Indians in the United States and Canada from the mid-nineteenth century to the present. The active and complex role played by Indian people in their responses to government policies and to socioeconomic changes will be emphasized. Challenges faced and initiatives taken by Indians will be traced from the early reservation years to the current era of self-determination. Cultural change and continuity within Indian communities will be closely examined.

**HIST 303 African-American Women in Slavery and Freedom (also WOMNS 307 and AM ST 303) #**

Spring. 4 credits. Letter only.  
M. Washington.  
Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, sexuality, labor, the family, gender crossracially that begins with the African background and ends at 1900.

**HIST 304 American Culture in Historical Perspective, 1880–1980 (also AM ST 304)**

Spring. 4 credits. M. Kammen.  
An introduction to the study of modern American culture. Emphasis on the role of culture in the quest for national identity; the function of cultural myths and myth making; the advent of modernism; relationships between mass culture, popular culture, and high culture; and on the question of American exceptionalism (distinctiveness). Special attention also to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), the decorative and popular arts.

**HIST 311 The Structure of American Political History (also AM ST 311) #**

Fall. 4 credits. J. Silbey.  
Examines the course of American politics from the eighteenth century to the Gilded Age, focusing on the development of American political culture, the nature of decision making, and the role of social conflict, mass behavior, political parties, and political elites in shaping our political history.

**HIST 312 The Structure of American Political History (also AM ST 312)**

Spring. 4 credits. J. Silbey.  
A continuation of History 311 but can be taken independently. Examines the course of American politics from the 1890s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression, and the international crises from the 1930s to the 1990s.

**HIST 313 U.S. Foreign Relations, 1750–1912 #**

Fall. 4 credits. W. LaFeber.  
Examines the development of the U.S. continental and global empires by analyzing policy and policymakers from Benjamin Franklin to Woodrow Wilson. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with HIST 313, a special course, 301, for discussion and guided research will be offered.

**HIST 314 History of American Foreign Policy, 1912 to the Present**

Summer and spring. 4 credits.  
T. Borstelmann.  
Students examine the emergence of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the role of American racial views in the making of foreign policy, and the increasingly dominant role of the president in the making of U. S. foreign policy.

**HIST 316 American Political Thought: From Madison to Malcolm X (also GOVT 366) #**

Fall. 4 credits. I. Kramnick.  
For description, see GOVT 366.

**HIST 318 American Constitutional Development**

Fall. 4 credits. Not open to freshmen.  
R. Polenberg.  
Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "revolution"; civil liberties and civil rights in modern America; the right of privacy; the contemporary Supreme Court.

**[HIST 321 Colonial North America to 1763 #**

Fall. 4 credits. Not offered 2000–2001; next offered 2001–2002. M. B. Norton.  
A survey of European settlement in North America and the Caribbean, emphasizing the interactions of Europeans, Indians, and Africans; economic development; gender relations; religious and political change; and the impact on the colonies of internal and external conflicts.]

**[HIST 324 Varieties of American Dissent, 1880–1900 (also AM ST 324)]**

Fall. 4 credits. Not offered 2000–2001.  
N. Salvatore.  
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course will explore the varieties of economic, political, and cultural dissent in America between 1880 and 1990, and will examine how understanding dissent in its specific historical context illuminates major aspects of American life and culture.]

**[HIST 325 Age of the American Revolution, 1754–1815 #**

Spring. 4 credits. Not offered 2000–2001.  
M. B. Norton.

An examination of the process by which the 13 English colonies became an independent and united nation, with emphasis on political thought and practice, social and economic change, and cultural development. Attention will be paid to the impact of the American Revolution on women, Blacks, and Indians as well as on white males.]

**[HIST 327 American Frontier History before 1850 #**

Spring. 4 credits. Not offered 2000-2001. D. Usner.

An overview of European exploration and colonization in North America, life on different colonial-Indian frontiers, and territorial expansion by the United States. Topics include the ideological and material frameworks of expansionism, the political and social dimensions of interethnic and imperial rivalry, and the formation of U.S. Indian and land policies. Themes of human migration, commercial development, and environmental change are emphasized.]

**[HIST 329 Indians, Settlers, and Slaves in the Early South (also AIS 329) #**

Fall. 4 credits. Not offered 2000-2001; next offered 2001-2002. D. H. Usner.

History of the American South from the sixteenth century to the early nineteenth century with an emphasis on intercultural relations. Topics include colonization of the region by Spain, England, France, and the United States, American Indian adaptation and resistance, the evolution of slavery, African American relations with European and Indians, and the role of racial ideology and ethnic identity in the formation of the South as a distinct section of the United States.]

**[HIST 330 The Age of Jackson, 1815-1850 (also AM ST 330) #**

4 credits. Not offered 2000-2001. J. Silbey.]

**[HIST 331 The American Civil War and Reconstruction 1850-1877 (also AM ST 331) #**

4 credits. Not offered 2000-2001. J. Silbey. An analysis of the factors leading up to the breakup of the Union, the impact of the war in North and South, and the problems of restoration and reconstruction of the seceded states.]

**[HIST 332 The Urbanization of American Society: 1600-1860 (also AM ST 332) #**

Fall. 4 credits. Not offered 2000-2001. S. Blumin.

America was born in the country and moved to the city. This course examines the transformation of America from a rural to a rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, as a human community, and as a crucible of cultural contact and change.]

**[HIST 333 The Urbanization of American Society: 1860-2000 (also AM ST 333) #**

Spring. 4 credits. 332 is not a prerequisite to 333. Not offered 2000-2001. S. Blumin. America was born in the country and moved to the city. This course examines the transformation of America from the urbanizing society and culture of the mid-nineteenth century to the thoroughly metropolitan nation of the present (and near future). It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.]

**[HIST 335 African-American History from Slavery to Freedom #**

Fall. 4 credits. Letter only. Not offered 2000-2001; next offered 2001-2002. M. Washington.

Introductory course on African-Americans from 1619 to 1865. Emphasis will be on life in bondage, the free black communities, and racism. Other topics include African cultural heritage, the slave trade, religion, the family, and the black freedom struggle.]

**[HIST 336 Capitalism and Society in Developing America, 1607-1877 (also AM ST 336) #**

Fall. 4 credits. Not offered 2000-2001. S. Blumin.

An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of free enterprise.]

**[HIST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840-2000 (also AM ST 337) #**

Spring. 4 credits. S. Blumin.

An examination of American society in the context of capitalist development and of capitalism as a social phenomenon. The rise of corporate capitalism; class, "mass", and the ethos of enterprise in twentieth-century American society.]

**[HIST 340 Recent American History, 1925-1960 (also AM ST 340) #**

Spring. 4 credits. Not open to freshmen. R. Polenberg.

Topics include the Sacco-Vanzetti case; radicalism and reform in the New Deal; Franklin Roosevelt and World War II; the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.

**[HIST 341 Recent American History, 1960 to the Present #**

Summer and fall. 4 credits. Not open to freshmen. Not offered 2000-2001. R. Polenberg.

Topics include the Supreme Court and civil rights; Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton; and class, race, and ethnicity in modern America.]

**[HIST 345 The Intellectual and Cultural Life of Nineteenth-Century Americans (also AM ST 345 and RELST 345) #**

Spring. 4 credits. R. L. Moore.

An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis will be placed on religious pluralism.

**[HIST 346 The Modernization of the American Mind (also AM ST 346) #**

Fall. 4 credits. Not offered 2000-2001. R. L. Moore.

American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.]

**[HIST 359 American Families in Historical Perspective (also AM ST 359, HD 359, and WOMNS 357) #**

Spring. 3 credits. Prerequisite: HD 150 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HD 359. Not offered 2000-2001. J. Brumberg. For description, see HD 359.]

**[HIST 375 The African-American Workers, 1865-1910: The Rural and Urban Experience (also ILRCB 385) #**

Fall. 3 credits. Prerequisite: juniors and seniors, or permission of instructor. Not offered 2000-2001. N. Salvatore. For description, see ILRCB 385.]

**[HIST 376 The African-American Workers, 1910-the present: Race, Work, and the City #**

Not offered 2000-2001. N. Salvatore. For description, see ILRCB 386.]

**[HIST 378 Topics in U.S. Women's History (also AM ST 378 and WOMNS 378) #**

Fall. 4 credits. Preference given to students who have taken HIST/WOMNS 273, HIST/WOMNS 303, or HIST/WOMNS 238. Others: by permission of instructor only. Not offered 2000-2001; next offered 2002-2003. M. B. Norton.

Topic for 2002: Gender and Sexuality in America. A colloquium course, limited to 20 students. Students will read and discuss some of the new scholarly work on gender and sexuality in American history. They will also prepare several written and oral presentations based on their analyses of primary sources in the Cornell Human Sexuality collection and elsewhere.]

**[HIST 411 Undergraduate Seminar in American Political History (also AM ST 411) #**
