THE UNIVERSITY TELEPHONE EXCHANGE

3331 is the dial signal which calls the operator of the University Switchboard, and the number to be found immediately after it in this Directory is the extension number to be given to the University operator.

Toll Calls.—To make a toll call, lift the receiver from the hook, and when the University operator answers, say "Long Distance." Wait for the connection to be made with the Long Distance operator. When Long Distance answers give her your name and your University extension number, and then the information necessary concerning the telephone or person that you wish to reach at the distant point.

Local Calls Outside.—To make a local call outside the University exchange, lift the receiver, say "Outside," and as soon as you hear the dial tone, dial the number of the party that is wanted.

Within the Exchange.—To make a call within the University exchange, lift the receiver, and when the operator answers give her the extension number of the party that is wanted.

Other Exchanges are 3451 (serving East Roberts, Plant Science, Agricultural Economics, Caldwell, and Comstock Halls) and 2785 (serving Martha Van Rensselaer Hall). A number in parenthesis is an alternative dial signal to be used only outside of regular office hours.
