

Many wildflowers are now in bloom in the Cornell Plantations' Wildflower Garden dedicated to Muriel B. Mundy and her husband, Floyd W. Mundy Jr. in a ceremony last Saturday.

## Plantations Wildflower Garden Is Dedicated

Cornell University Plantations dedicated a wildflower garden to Muriel B. Mundy and her husband, Floyd W. Mundy Jr. of Scarsdale, N.Y. last Saturday afternoon. The six-and-a-half acre garden, located in the Cornell Plantations, was named The Mundy Wildflower Garden. President Dale R. Corson accepted the gift of the garden from the Mundys on behalf of Cornell. An open house on Sunday followed the official dedication ceremony.

"The garden is an outdoor laboratory in which students can examine the native flora of the region while enjoying a less formal, more recreational natural setting," according to Richard M. Lewis, director, Cornell Plantations. "Plants of the Cayuga Lake Basin are emphasized. Many species occur naturally and others have been introduced for wider variety," he said.

Development of the area, a project of the Plantations since 1964, was made possible by the establishment of the Cornell Plantations Wildflower Garden Fund, a gift from Mrs. Mundy. The fund also provides for the maintenance and operation of the garden.

R. Stephen Shauger, educational coordinator for the Plantations, is in charge of the garden. As part of his master's

degree thesis, Shauger prepared a guide to the garden which lists plants in order of bloom and by color to aid in identification, said Lewis. The Mundy Wildflower Garden is located near the central Cornell campus between Forest Home Drive, the Rockwell Field Laboratory and Judd Falls Rd.

### Cornell A Co-sponsor

## Acid Rainfall Problem Triggers Conference

"What have they done to the rain?" asks a folk song made popular in the late 1960s by Joan Baez.

"They've mixed it with sulfur dioxide and nitrogen oxides — products of fossil fuel combustion — and in some places made it as acid as weak vinegar," was the reply of many participants at a recent conference on acid precipitation.

The increased acidity in rain and snow documented in the northeastern United States, in Canada and in Scandinavia over the past 25 years or so was linked to changes in lake chemistry and fish populations, and to adverse effects on buildings, soils and vegetation.

For the first time in three decades Cornell University's Commencement exercises, Monday, June 2, will be conducted in an outdoor ceremony at Schoellkopf Field. It will be the University's 107th Commencement. More than 10,000 students and friends are expected to attend as 3,200 students receive degrees.

In case of bad weather, the ceremonies will move inside for an abbreviated ceremony in Barton Hall, scene of Commencement since the early 1940s. The change was made this year to accommodate better the larger numbers taking part in and attending the exercises.

In case of inclement weather, the decision to move Commencement inside will be made by 9 a.m. and announced over local radio stations. In this case, the procession will start in Lynah Rink instead of the Arts Quadrangle. If the weather should change for the better, the procession will proceed from Lynah Rink to Schoellkopf Field instead of Barton Hall.

At 9:30 a.m. the faculty will march as a body behind the students from the respective schools and colleges, with each degree group led by student marshals. The cap and gown will be optional attire for students again this year. Approximately 90 per cent of last year's graduates chose to wear the traditional academic garb.

At 9:55 a.m. the procession, led by Blanchard L. Rideout, University marshal, will begin moving to Schoellkopf for the 11 a.m. Commencement. As it passes the Olin Library terrace, the procession will be reviewed by University President

Dale R. Corson, the Board of Trustees, other officials and guests.

All members of the faculty will sit in a designated area of the Crescent. Trustees, deans and administrators will sit on the center platform in Schoellkopf field, facing the Crescent.

After a musical prelude, President Corson will deliver the Commencement address. After another musical number, he will confer 3,200 degrees — 2,507 bachelor's and 693 master's and doctoral degrees.

In accordance with Cornell tradition, no honorary degrees will be awarded. Cornell has awarded only two honorary degrees in its history, both in 1886. They went to Andrew Dickson White, Cornell's first president, and David Starr Jordan, an alumnus who became the first president of Stanford University.

Bachelor's degrees will be awarded in the same manner they were last year. The deans will present their degree candidates to the president and as each group is presented, it will rise and remain standing until all undergraduates have been presented. At that time, the president will award all of the

bachelor's degrees simultaneously by the formal language provided.

Master's degrees will be conferred in the same manner.

Doctoral candidates will wear their hoods in the procession and will be called to the platform by name and greeted by the dean and the president.

Music for Commencement will be provided by the Cornell Wind Ensemble, directed by Marice W. Stith, and the Cornell Glee Club, directed by Thomas A. Sokol.

In addition to Commencement ceremonies on June 2, commissioning exercises for about 51 graduating members of the Cornell Reserve Officers Training Corps (ROTC) will be held in Alice Statler Auditorium at 8:15 a.m. The commissioning speech will be given by Major General Laddie L. Stahl, Commander of U.S. Army Reserve Division, New York.

On May 28, Corson will confer 225 degrees in New York City at Commencement exercises for graduates of the Cornell Medical College, the Cornell Graduate School of Medical Sciences and the Cornell University-New York Hospital School of Nursing.

## Black Students Plan Freshman Preparatory Summer Program

Black Americans, long excluded from the medical and veterinary professions, will potentially have their numbers increased in these fields through the efforts of Cornell University's student Black Bio-Medical and Technical Association (BBMTA).

Specifically, the efforts of Robert Cooper and Dennis O'Brien, currently president and president-elect of the association, have made it possible for 20 black pre-freshmen students to spend the summer on campus in an intensive six-week program to strengthen their backgrounds in biology, chemistry, mathematics and English language. The selected pre-freshmen were among those indicating an interest in the bio-medical and technical fields on their application forms.

Cooper, a College Scholar, and O'Brien, an independent major, conceived the Summer Enrichment Program idea in January and have implemented it within the past four months in conjunction with University faculty, students

and administrators. Cooper is a senior in the College of Arts and Sciences; O'Brien is a sophomore in the New York State College of Agriculture and Life Sciences.

Cooper said, "It is our belief that black students do not lack the ability to conceptualize the material placed before them. The difficulties lie in their inadequate preparation in note-taking and study skills, as well as their lack of previous exposure to the basic concepts and terminologies used in many introductory and advanced biological and physical science courses."

"It was with this in mind, that the BBMTA developed the Summer Enrichment Program."

The summer program will consist of an academic and a clinical science component, Cooper said. Pre-freshmen will participate in lectures on the subject matter, and then apply this knowledge immediately afterwards under supervision. The pre-freshmen will also work in clinical settings such as

## American Academy of Arts and Sciences

## Three Cornellians Elected

The American Academy of Arts and Sciences has elected three Cornell professors as fellows. They are among 121 scholars, scientists, public figures and writers elected by the Academy.

The Cornell professors are Raymond Bowers, professor of physics and director of the Program on Science, Technology and Society; Norman Malcolm, the Susan Linn Sage Professor of Philosophy; and Kenneth G. Wilson, the James A. Weeks Professor of Physical Sciences.

Also elected as a fellow of the Academy was Octavio Paz, a Mexican writer and diplomat who was a Cornell professor at large from July, 1972 to March, 1974.

The Academy also presented at the meeting its Emerson-Thoreau Award for distinguished achievement in the broad field of literature to Robert Penn Warren, professor of English emeritus at Yale University. Chairman of the committee recommending him for the award was Meyer H. Abrams, the Class of 1916 Professor of English at Cornell.

Bowers, a member of the

Cornell faculty since 1960, has published many papers in the field of solid state physics. He has also been concerned with national science and technology policy for many years and in 1966-67, while on leave from Cornell, was a member of the Office of the Science Adviser to the President in Washington, D.C.

He has continued to work in the area of science and technology policy both through the interdisciplinary Science, Technology and Society Program at Cornell, which he helped found, and through work with the National Academy of Sciences, the National Academy of Engineering and other organizations.

Bowers was born in London, England, and was educated at the University of London and Oxford. Before coming to Cornell he was a research fellow at the University of Chicago and a research physicist for Westinghouse Electric Corp. In 1972, he was a visiting fellow at Clare College, Cambridge University, England.

Malcolm, who has been a faculty member at Cornell

since 1947, specializes in the philosophy of mind. He is the author of "Ludwig Wittgenstein: A Memoir" (1958); "Dreaming" (1959); "Knowledge and Certainty" (1963); and "Problems of Mind" (1971) and has contributed to numerous journals and volumes of essays.

Malcolm was chairman of Cornell's Department of Philosophy from 1965 to 1970 and was a member of the Educational Policy Committee of the College of Arts and Sciences in 1970-71. He was also a member of the first University Senate.

He came to Cornell from Princeton University where he was an instructor in philosophy from 1940 to 1942 and again in 1946. In 1952 he returned to Princeton as a Hibben Research Fellow.

He has also been a Guggenheim Fellow at the University of Cambridge (1946), a Fulbright Research Fellow at the University of Helsinki (1960-61), the Visiting Flint Professor of Philosophy at the University of California at Los Angeles (1964), and a fellow of the Center for Advanced Study in the Behavioral Sciences at Stanford University (1968-69). In 1972 he was elected president of the Eastern Division of the American Philosophical Association.

Malcolm received his undergraduate degree at the University of Nebraska and his master's degree and doctorate from Harvard University.

Kenneth G. Wilson, elected to the National Academy of Sciences last month, is a theoretical physicist who has worked most recently in the field of high energy particle physics. He has also done research on phase transition in liquids and solids and on impurities in metals.

Wilson received his bachelor's degree from Harvard and his Ph.D. from the California Institute of Technology. He was a junior fellow at Harvard from 1959 to 1962.

Wilson joined the Laboratory of Nuclear Studies in Cornell's Department of Physics in 1963 and became a full professor in 1973. He was the 1973 recipient of the Dannie Heinemann Prize for Mathematical Physics awarded by the American Physical Society and the American Institute of Physics. In his spare time, he is an ardent folkdancer.

The American Academy of Arts and Sciences is a national honorary society with 2,300 members including representatives from the fields of mathematics, physical and biological sciences, law, administration, public affairs, theology, fine arts and the humanities. It carries out an active program of study and publication on major national and international problems which require the expertise of several disciplines.

## Tulips Serve as Models

## Black Students Create Pre-Freshman Course

Continued from Page 1

medical or veterinary laboratories in order to implement the basic techniques already learned and practiced, he said. Field trips to urban health centers are also planned.

The program's curriculum was designed by Cornell students, Cooper said, rather than being "given" to students. He felt this cooperative approach with faculty toward curriculum development at Cornell was innovative.

Cooper said the Summer Enrichment Program idea evolved after the BBMTA decided it could "benefit more

students by concentrating on education during the summer months, and placing development of the BBMTA program secondary to that." Cooper's own experience last summer as biology instructor for black high school students in a preparatory program at the University of Pennsylvania School of Medicine served as a catalyst for the idea of implementing a program for Cornell's pre-freshmen.

Cooper investigated two similar high school programs offered by medical schools in the Philadelphia area before seeking Arts College and New

Job Opportunities  
At Cornell University

The following are regular continuing full-time positions unless otherwise specified. For information about these positions, contact the Personnel Department B-12 Ives Hall. Please do not inquire at individual departments until you have contacted Personnel. An equal opportunity employer.

## POSITION (DEPARTMENT)

Administrative Aide I (Human Development and Family Studies)  
Administrative Aide I, A-18 (Secretary of the Corp.)  
Administrative Aide II, NP-14 (Diagnostic Laboratory)  
Administrative Aide I, NP-11 (Finance and Business)  
Sr. Administrative Secretary, A-17 (STS Program)  
Administrative Secretary, A-15 (STS Program)  
Administrative Secretary, A-15 (University Unions)  
Administrative Secretary, A-15 (Personnel)  
Administrative Secretary, A-15 (Architecture (nine months))  
Administrative Secretary, A-15 (Anthropology)  
Secretary, A-15 (Health Services)  
Department Secretary, A-13 (History)  
Department Secretary, A-13 (Johnson Museum)  
Department Secretary, A-13 (Mechanical & Aerospace Eng.)  
Department Secretary, A-13 (B&P)  
Department Secretary, A-13 (Chemical Engineering)  
Department Secretary, A-13 (Student Housing)  
Department Secretary, A-13 (University Press)  
Receptionist, A-13 (Arts & Sciences-Admissions)  
Steno III, NP-9 (Div. of Large Animal and Services)  
Steno III, NP-9 (NYSSILR)  
Steno II, NP-6 (Entomology)  
Steno II, NP-6 (Agronomy (Div. Atoms. Sci.))  
Steno I, NP-5 (Agricultural Economics)  
Steno I, NP-5 (Media Services)  
Trans. Clerk I, NP-6 (Small Animal Clinic)  
Principal Clerk, A-14 (Registrar)  
Account Clerk I, NP-6 (Entomology)  
Clerk III, NP-7 (LAMOS)  
Typist/Receptionist, A-11 (University Unions (9 months))  
Cashier, A-11 (Dining Services)  
Sr. Editorial Assistant, A-17 (CRSR)  
Library Assistant III, A-15 (University Libraries-Music)  
Library Assistant II, A-12 (University Libraries-Catalog)  
Record Clerk, A-11 (Personnel Services)  
Director of Regional Offices, CP07 (Public Affairs)  
Administrative Manager II, CP05 (Campus Store)  
Cooperative Extension Spec. NS (Cooperative Extension - Voorheesville)  
Cooperative Extension Spec. NS (Cooperative Extension-Oswego)  
Cooperative Extension Spec. NS (Cooperative Extension - Chazy)  
Director, Engr. Minority Pro. & Asst. Div., Engr. Admissions, CP05 (Engineering Dean's Office)  
Manager-Financial Operations CP05 (B&P)  
Resident Director CP02 (2) (Dean of Students Office)  
Director of Admin. Operations (College of Agric. & Life Sciences)  
Graphic Designer Visual Spec., CP05 (University Publications)  
Associate Admin. (Area Manager), CP06 (Dining Services)  
Extension Aide (Community Service Education)  
Dining Manager, CP05 (Dining Services (July 31, '75))  
Dining Supervisor, CP02 (Dining Services)  
Manager, Personnel Operations (Personnel)  
Extension Associate (NYSSILR)  
Associate Administrator, CP06 (Physical Education & Athletics)  
Student Development Specialist, CP08 (College of Engineering)  
Extension Associate (4) (Human Development and Family Studies)  
Extension Aide (Agricultural Engineering (1 yr.))  
Sr. Lab Technician (Biochemistry (1 yr.))  
Extension Associate (3) (Div. of Nutritional Sci. (1 yr.))  
Research Support Specialist (Ornithology (1 yr.))  
Research Associate (Food Science and Technology (Geneva))  
Research Associate (Poultry Science (2 yrs.))  
Research Associate (Geological Sciences)  
Research Aide II, A-16 (Psychology)  
Lab. Tech. II, NP-11 (2) (LAMOS)  
Lab Technician I, NP-8 (Avian Diseases)  
Lab Technician I, NP-8 (Vet Pathology)  
Postdoctoral Research Associate (STS (1 yr.))  
Postdoctoral Associate (2) (Genetics, Dev. & Phys. (1 yr.))  
Postdoctoral Associate (7) (LASSP (1-2 yrs.))  
Instructor - Modern Dance (Women's Physical Education)  
Cook I, A-15 (2) (Sept.) (Dining)  
Mason (B&P)

## Cornellian One of 15 Luce Scholars Named

Steven A. Wartman, M.D., Class of '66 and formerly a staff physician and medical ombudsman for University Health Services, was recently named a Luce Scholar by the Henry Luce Foundation, Inc.

Another Cornellian, Jody Boltz Phibbs, a poet, was named an alternate and will participate if a Luce Scholar from the western region of the United States is unable to participate.

Wartman is one of 15 recipients between the ages of 21 and 30 who will spend a year in an Asian country pursuing their areas of interest with Asian counterparts. Wartman's project will be "to gain some understanding of the cultural context and people with whom I am living, and to then analyze the health

care system within this perspective."

He is currently a first-year resident in internal medicine at Yale-New Haven Hospital, New Haven, Conn. He will be accompanied to Asia by his wife, Margaret Stott Wartman, who will be doing educational work with Planned Parenthood in the host country, which has yet to be determined.

Phibbs, a Cornell College Scholar in the College of Arts and Sciences earned her bachelor of arts degree in 1971 and her master of fine arts degree in English, majoring in creative writing and poetry, in 1973. She is a member of Phi Beta Kappa and has been published in numerous small poetry magazines. Phibbs currently lives in Wilson, Wyo.

## 'Pilgrimage' in Brazil Is Convocation Topic

Sister Loreta Jordan will describe the "Stepping Stones on a Pilgrim's Journey" at the Sage Chapel Convocation at 11 a.m. Sunday, May 25.

Jordan has been a member of the Congregation of Sisters of Notre Dame de Namur since 1955. She is now serving as an associate staff member on the United Ministries' Committee on U.S.-Latin America Relations (CUSLAR)

at Cornell and as an interim associate at the First Baptist Church in Ithaca.

Jordan came to Cornell this September after more than four year's work in community development with peasants of villages in the northeast section of Brazil. Her talk on Sunday will be based on personal reflections on her "pilgrimage" in Brazil.

## Freshman Applications Reach All-Time High

More than 2,735 prospective freshmen have indicated their intention of attending Cornell next fall, according to Walter A. Snickenberger, dean of admissions.

"We are aiming for a freshman enrollment figure of 2,679" Snickenberger said, "and our figures as of May 15, plus the few more that will be accepted from waiting lists, should give us the necessary cushion to shake down to the target figure."

Snickenberger explained that the freshman figure at this date is purposely higher than the target figure to offset

the number who will fail to matriculate for the fall term. He cited family moves, financial considerations, deferred entrance and change of academic objectives as among the reasons for the shrinkage.

"All of the divisions of the University appear to be in good shape in terms of freshman admissions," Snickenberger added. "Some are slightly over their target figures and some are slightly under, but the overall picture is very good."

The number of applications for fall admission to Cornell from prospective freshmen reached an all time high this year, totaling 15,270. Last year the total was 14,906.

## Chimes Engineer-Historian Is Seeking A Successor

Larry Kerecman, engineer and historian for the Cornell Chimes, is looking for a successor.

"I've been worrying about the condition of the bell tower and chimes for ten years now, and I want to make sure that we're not going to lapse back to the previous 30 years of neglect," he said.

Kerecman's position as research support specialist for the Department of Modern Languages and Linguistics is being phased out, so he won't be in Ithaca next year to continue caring for the bell tower. He originally became involved with the chimes while an engineering undergraduate student in the mid-1960s. Although his engineering curriculum didn't allow him enough time to be a chimesmaster, he became concerned about the poor condition of the bell tower.

"The problems ranged from hundreds of alive and dead pigeons residing in the tower to the almost daily breakdowns of the chimes' playing mechanism," he said. "The lack of physical maintenance produced a low morale among the chimesmasters."

In 1968, the repair and cleanup of the tower began, and plans to renovate the chimes mechanism were drafted. A new floor was built to house the playing console and to accommodate the steadily increasing number of visitors to the top of the tower. Since 1968, more than \$70,000 has been spent in renovating and restoring the tower and chimes.

Kerecman secured some of these funds for renovation from the University, but much has been raised from outside donors. The Class of 1949 recently donated \$1,000 to restore the 1875 Seth Thomas clock which was originally located in the McGraw Hall Tower.

Current renovations include the rebuilding and relighting of the clock faces on the tower. "The lighting system is incredibly ancient and falling apart," says Kerecman. "The glass of the clock faces leaks and inundates the chimesmasters with water when they play on rainy days. We also want to replace the garbage can lids used as light reflectors with something

Larry Kerecman makes adjustment on McGraw Tower Bells.

more effective."

Garbage can lid reflectors? "That's right," he said. "It was considered a major technological breakthrough in tower clock face lighting in the 'teens."

Kerecman's duties as the chimes historian and engineer have included everything from the janitorial to the fund raising. But he is quick to point out that his successor won't have to be as involved in the chimes as he himself is.

"Our fund-raising is being handled now by the Development Office," he said, "and I have hopes that a new endowment may cover the cost of hiring a janitor to look after things. I have taken an interest in the history of the chimes and have set up a museum about it, but that wouldn't have to be continued by my successor. I have become expert in dealing with some of the mechanical problems of the chimes, but that wouldn't be absolutely necessary either."

What is necessary? "I am looking for a faculty or staff member who will be concerned enough about the welfare of the chimes,

chimesmasters and tower to climb up at least once a week and see how things are going. I think this direct contact is essential," he said. Kerecman also feels that an important aspect of the job is to provide a liaison between the interests of the tower, the administration and the Department of Buildings and Properties.

And the remuneration? "I have never received any money for the work I've done on the tower," Kerecman said. "I look upon it as my contribution to the University as an alumnus. And of course, it's been a tremendous personal source of satisfaction to me to be involved in the perpetuation of Cornell's symbol and its oldest tradition — the chimes rang on the day that the University opened."

Kerecman also speaks of the satisfaction he gets from meeting some of the more than 15,000 visitors who climb the bell tower every year. "You certainly gain respect for the physical condition of Cornell alumni," he said.

"This job has also helped me keep my weight down," he added. "I must have climbed those tower steps more than 2,000 times."

Kerecman has invested from five to 30 hours a week in keeping the tower and the chimes going, but he says the amount of time necessary to do the job could be considerably less, depending on the interests of the person who takes over.

Anyone interested in becoming the new chimes engineer and historian (the title can be changed to reflect the abilities and interests of the person who holds it) should call Larry Kerecman at 256-2322 or stop in at Room 9 Morrill Hall.

## U2 Parking Situation Reviewed

*The following is the text of a letter of response from William H. Richards, manager of the Traffic Bureau, to the 21 signers of a letter regarding U2 parking which appeared in last week's Chronicle:*

My first reaction to your petition regarding the U2 parking area on Tower Road is one of appreciation. Only when a community of people are interested can changes and improvements be made.

Let me briefly review the history of U2 parking at Cornell University. In 1973-74 the Senate Subcommittee on Parking and Traffic sought some way to better utilize the parking spaces on the south side of Tower Road between the synchrotron entrance and Wing Drive. These spaces continually went unused because more convenient and desirable spaces were available farther up Tower Road. To my knowledge, there was never any intention of extending the U2 parking farther west than the synchrotron entrance. This entire problem has come to a head because of inadequate

signing.

It is not widely known that the Traffic Bureau employs only one individual to oversee all parking and traffic signs on the campus. It is his responsibility to replace, install, reclaim, and generally maintain the one-thousand-plus signs on the Cornell Campus. The fact is that there have been other areas on the campus with more urgent signing needs. These have been handled first. We were scheduled to re-sign the U2 area this summer. However, during the last two months, we have received many complaints from U permit holders that vehicles displaying U2 permits were 'spilling over' into their parking spaces. Due to the nature and frequency of these complaints, we were forced to take action immediately.

Prior to actually changing the signs designating the U2 area, I sent a memorandum to all U2 permit holders informing them of our plans to change the signs. There was no intention to deliberately wait until after March 1 to effect this change. I

hope by this time you have received my second memorandum which states that U2 parking is also valid in the paid visitor parking area. This additional space provides more than adequate parking for all U2 permit holders.

I have considered your requests for extending the U2 area west and for authorizing refunds for those who want them. Regretfully I can do neither. As I stated earlier, the U2 area was never intended to extend farther west than the synchrotron entrance, and I had no control over the time at which this problem surfaced. If these measures are not acceptable to you, you may wish to pursue this matter with the Special Request Appeals Board (the arm of the University Senate which has authority to grant variances to the rules and regulations). If so, please let me know and I will see that your correspondence is forwarded to that committee.

I sincerely regret the inconveniences this has caused you. Please accept my apologies. If I can be of further help to you, please contact me.

## Article on Physics 101 Protested

*Editor:*

It is unfortunate that the writer of the May 15, 1975 Chronicle article on Physics 101 chose to make a case for self-paced instruction by the expedient of saying nasty things about "typical introductory science courses at Cornell." These statements, implying that it is only such courses that are causing emotional distress, discouragement, demoralization to the students, not only have no basis in fact, but are an insult to the tremendous human effort that I have seen my colleagues, both professors and teaching assistants, apply in these courses.

Realization that "...students are individuals who learn at different rates and have different intellectual skills, study habits and aspirations" is not a revelation reserved for the teachers of self-paced courses. All of us who are truly concerned with education are aware of these things. It does not matter whether we transmit knowledge in a conventional lecture or laboratory, or in a self-paced course. Sensitivity to student needs, an intellectual love of the discipline taught, and a real effort, whatever the mode of teaching, will be rewarded by understanding on the part of the student.

*Roald Hoffmann  
Professor, Chemistry*

*Editor's Note: The comparison of Physics 101 with large science courses which use a more traditional format was not intended as a criticism of the time and effort that professors and teaching assistants*

*devote to their work. Rather it is a comment on the logistical problems involved in providing individual attention to several hundred students in traditional courses. Student comments in the past have indicated that*

*problems do exist in large lecture-recitation-laboratory courses. The self-paced format, judging from student reactions, is one effective way of improving the situation.*

## Barton Blotter

### Student Robbed at Knife Point

An undergraduate reported he was robbed of \$15 at knife point by two white males shortly after midnight Tuesday. The incident took place, he said, on the pathway between Clara Dickson Hall and the stairway to Wait Ave.

In an incident described as arson last week, a can of lighter fluid was ignited outside the entrance door to Room 3103, University Halls No. 3. The door was scorched and a small area of the rug damaged before the fire was put out.

Two cases of grand larceny were reported earlier this week. A \$250 camera was reported stolen from Sibley Hall where it had been left unattended. A \$338 calculator was taken from the study lounge on the third floor of Noyes Center. It was recovered later but its owner refused to press charges.

In a series of petit larcenies reported during the past week, a plant was stolen from Room 101, 726 University Avenue. Five bikes were reported taken. One was recovered a few hours later and identified by its license registration kept by the Campus Safety Division. Other larcenies included several wallets containing cash totaling more than \$200. Most were left unattended on desks or in clothing left during participation in softball and tennis.

A citizens band radio worth more than \$200 was stolen from a car in parking lot B. A pair of sun glasses was taken from a car which was broken into at the Kite Hill parking lot. A graduate student reported two snow tires taken from the trunk of his car parked in the Hasbrouck apartments' parking lot.

All items for publication in Cornell Chronicle must be submitted to the Chronicle office, 110 Day Hall, by noon on the Monday preceding publication. Only typewritten information will be ac-

cepted. Please note the separate procedure and deadline for Calendar entries, as explained at the end of the Chronicle Calendar on the back page.

## Kenyon to Be Director, Student Employment

Larry Kenyon has been named director of student employment at Cornell, according to Philip M. Bisselle, acting director of the Office of Scholarships and Financial Aid.

Kenyon, a 1970 graduate of the College of Agriculture and Life Sciences, will be responsible for the administration of the University's work-study program and other student employment functions of the financial aid office.

More than 2,300 work-study jobs will be made available to students in 1975-76, Kenyon said. Summer work-study employment can produce up to \$1,000 income for a student,

and jobs for the academic year contribute about \$700 to a student's financial aid package.

Kenyon will also supervise the casual labor program and the "odd job listing" maintained by the financial aid office.

Kenyon has been employed as an assistant director of the freshman program of the financial aid office. He is a native of Ovid. As an undergraduate, he was captain of the 150 football team and a member of Sigma Alpha Epsilon fraternity. He continues to be a sports enthusiast and works with youngsters in the South Seneca basketball program.

## Schlesinger to Speak At Law Convocation

The final convocation of the Cornell Law School's Class of 1975 will be held at 3:30 p.m. Saturday, May 24, in Alice Statler Auditorium on the Cornell campus.

About 1,000 parents and friends are expected to attend the ceremony and reception following, in the Myron Taylor courtyard.

President Dale R. Corson

will greet the group which will then be addressed by Rudolf B. Schlesinger, the William Nelson Cromwell Professor of International and Comparative Law. Roger C. Cramton, dean of the Law School, will preside.

There are 153 students in the Class of 1975. They will be graduated at the University Commencement June 2.

Custodian, A-13 (Sept.) (Dining Services)  
Custodian, A-13 (Campus Store)  
Food Science Worker, A-11 (Sept.) (Dining Services)  
Dishmachine Operator, A-13 (Sept.) (Dining Services)  
Building Maintenance Mech. I, NP-7 (Civil & Environmental Eng'g)  
Experimental Machinist, A-19 (Civil & Environmental Eng'g)  
Broadcast Engineer II, Chief Engineer (Media Services, ETV Center)  
These are all permanent full-time positions unless otherwise specified.

### PART-TIME AND TEMPORARY POSITIONS

*(All Temporary and Part-time positions are also listed with Student Employment)*

Administrative Clerk, A-16 (Regional Science Center for Urban Development (temp. f/t))  
Typist (B&PA (perm. p/t))  
Service Clerk (Office of University Counsel (temp. f/t))  
Extension Sec. - Steno, NP-10 (NYSSILR (NYC) (temp. p/t))  
Extension Specialist (NYSSILR (temp. f/t))  
Statistics Clerk (Agricultural Economics (temp. p/t))  
Research Associate (Agronomy (1 yr.))  
Research Technician II, NP-10 (Plant Breeding & Biometry (temp. f/t))  
Lab Technician - Hourly (Biochemistry (temp. f/t or p/t))  
Research Technician (Natural Resources (temp. f/t))  
Technical Aide, NP-9 (2) (Natural Resources (temp. f/t))  
Technician (Sociology (temp. p/t))  
Keypunch Operator (SASS (temp. p/t))  
Field Assistant NS (Plant Pathology (temp. f/t) (Geneva))  
Field Assistant (Entomology (temp. f/t))  
Coding/Clerical (SASS (temp. f/t))  
Bus Drivers, A-16 (Campus Bus (perm. p/t))  
Switchboard Relief (University Health Services (perm. p/t))  
Research Technician II, NP-10 (Entomology (temp. f/t) (Geneva))

## *The Sting*

It was so quiet you could hear a thought drop. Approximately three hundred students taking a final exam in Barton were at the moment of truth. Some used a two handed grip on the forehead as if trying to support the thinking machine from premature collapse. Some used chin-on-fist techniques, while others played it straight, sitting straight up. One played it very cool, feet on table, body in full slouch, ball point in mouth. No matter how they took it, you could see it was, "The Sting," a final exam, en mass, at Barton, in the year 1975.

Pictured above is one of the photographs from the "Margin of Life" photographic exhibit by Cornell Capa at the Herbert F. Johnson Museum.

## 'Margin of Life' Photos On Exhibit at Museum

Eighty black and white photographs by photo-journalist Cornell Capa, focusing on problems of hunger, population and poverty in Honduras and El Salvador are on exhibit through June 29 at the Herbert F. Johnson Museum of Art.

The photos are from the book "Margin of Life" created by Capa in collaboration with J. Mayone Stycos, director of Cornell's International Population Program. Stycos wrote the text.

Funded by a grant from the Rockefeller Foundation, the

book was published last year in English and Spanish. (See Chronicle, page 9, May 16, 1974.)

Known for his photo-essays during his long association with Life magazine, Capa is currently executive director of the International Center of Photography in New York. "The show," Capa said, "attempts to demonstrate how poverty and population growth comprise an ever tightening circle around the lower income resident of the less developed countries."

## Museum to Be Stage For Dance Program

A group of local dancers and choreographers are planning "Spring Takeover #3" in the Herbert F. Johnson Museum today and tomorrow from 1 to 5 p.m.

"The One Shot Dance Theater," organized for the occasion by dancers Sam Costa and Stephen Goldbas, will present a program of 20-25 dances in various spaces of the museum.

"This is definitely not a pro-scenium concert," Goldbas said. Dances will take place inside and outside the museum, and the audience will be free to move from dance to dance, according to whim or to a published schedule. The choreographers will be exploring the possibilities and limitations of various museum spaces, as well as the relationship of their dance to the art works

that may be found in the space.

Dancers from all segments of the community will be participating in the event. Saga Ambegaokar, Janice Kovar and Barbara Dickinson of the Ithaca Dancemakers, Gwen Reid from the Ithaca Ballet Guild, and Cornell dance majors Carol Carnes and Margaret Coghill are among the choreographers who will be presenting works. Dancers and choreographers from the community will include Maureen Cosgrove, Debby Samuelson, Rosemary Harms and Barbara Quell. Two members of a New York City group, "Among Company" will also be performing their works.

The "Spring Takeover #3" will occur under the auspices of both the Cornell Dance Program and the museum, and is free and open to the public.

# Acid Rain Conference Held

Continued from Page 1

Ogden Reid, commissioner of the New York Department of Environmental Conservation, and Eric Outwater, deputy regional administrator of Region II EPA.

Keynote speaker Svante Oden, professor in the division of ecochemistry in the Agricultural College in Uppsala, Sweden and one of the foremost experts on acid precipitation, outlined how the problem has spread over much of Europe in the past two decades and graphically demonstrated its harmful effects on fish, buildings and sculptures, in his country and elsewhere.

Gene E. Likens, Cornell professor of ecology and systematics and one of the first American ecologists to document the intensification of acid precipitation over the northeastern United States, explained the chemistry behind the increasing acidity and the results of his studies on a forest ecosystem at Hubbard Brook, N.H.

His research has shown a 36 percent increase in the hydrogen ion input (a measure of acidity) into the ecosystem from precipitation over the last 10 years while the rain and snow has lost some 57 percent of its ability to neutralize the acids.

While sulfuric acid is still the dominant acid in rain, Likens said, most of the increase in acidity at Hubbard Brook has been caused by nitric acid — a strong acid formed by the interaction of nitrogen oxides and water.

Likens also pointed out that while acid rain has been known for a long time near cities and smelters, it is now a regional problem affecting most of the eastern U.S. — perhaps an effect of high smoke stacks which seem to send pollutants out of sight and out of mind.

To that cliché, Likens responded with another, "What goes up must come

down...somewhere."

Carl Schofield, senior research associate in Cornell's Department of Natural Resources, has documented the effects of acid precipitation on fish populations in several Adirondack lakes.

He explained that lakes over 2,000 feet elevation in the western Adirondacks, where the surrounding crystalline rocks resist weathering, have little capacity to neutralize the incoming acid precipitation, and are very sensitive to changes in acid input. The acid waters of some Adirondack lakes which were known to support fish in the 1930s are sterile today, he added.

Because the Adirondacks receives much of its precipitation as snow, Schofield said, lakes and streams become more acid during the spring thaw than during other times of the year. This spring increase in acidity, he said, may not kill adult fish, but it can interfere with reproduction and take its toll of fish larvae and fry.

Jean French, an epidemiologist with the Environmental Protection Agency's National Environmental Research Center in North Carolina, pointed out that the pollutants sulfur dioxide and nitrogen oxides, which react with water to form the acids responsible for acid precipita-

tion, are known to aggravate asthma and cardio-pulmonary disorders.

Little research has been done on the effects of ingesting acid water, but she suggested that the water might contain increased amounts of heavy metals which could be potentially toxic.

In workshop sessions, conference participants outlined areas where further research is needed:

—on the natural "background levels" of acidity in precipitation;

—on correlating the chemical analyses of rain and snow with analyses of the ambient air;

—on identifying potentially sensitive land areas and monitoring the ecological effects of acid precipitation there;

—on developing a nationwide precipitation sampling network to monitor the quality of rain and snow;

—on identifying the levels of acid and particulate sulfates in the atmosphere that cause adverse health affects so that air quality criteria may be developed.

## AB Express Bus Service Discontinued for Summer

Express campus bus service to and from Cornell University's A and B parking lots will be discontinued for the summer months starting Tuesday May 27, according to David Brown, director of the Office of Transportation Services.

Brown said express service will be resumed in the fall when classes begin. The policy of running express bus service only while classes are in session was announced in January, Brown said.

The hiatus in express runs should not effect service to the A and B lots, he said.

In addition, no University bus service will be provided on the Memorial Day Holiday, May 26, or on the 4th of July holiday. Employees with A, B, or A/B permits may park on campus those two days.

## Cornell Libraries Summer Schedule May 26-August 31, 1975

THE FOLLOWING LIBRARIES ARE ADHERING TO THE SAME SCHEDULE:

Library	Dates	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
BPA	May 26-Aug 31							
Engineering	May 26-Aug 30							
•Fine Arts	May 26-Aug 31	8A-5P	8A-5P	8A-5P	8A-5P	8A-5P	Closed	Closed
ILR	May 26-Aug 31							
•Veterinary	May 27-Aug 31							

ALL OTHER LIBRARIES:

Africana	May 26-May 28	9A-9P	9A-9P	9A-9P				
	May 29-Aug 31	9A-5P	9A-5P	9A-5P	9A-5P	9A-5P	Closed	Closed

	Aug 30-Aug 31						9A-5P	7P-10P

•Fine Arts Library schedule is subject to revision due to construction during the summer months.

All libraries except Physical Sciences will be closed July 4. •Closed May 26.

Olin Library will be open Saturday, June 14 and Sunday, June 15 from 2 - 5 pm for visitors only. No service will be provided. Rare Books Dept. will be open during these hours. In addition to regular hours, Uris Library will be open Sunday, June 15 from 2-5 pm for visitors only. No service will be provided.

## Golf Captains Elected; Vane Award Given

Tom Johnson of Canby, Minn., and Bob Wight of Bemus Point, N.Y. have been elected co-captains of the 1975-76 Cornell golf team and Bob Reed of Ithaca has been named recipient of the Thomas Vane Memorial Award, according to Coach Jim Fenner.

Reed, a senior who served as captain this past season, earned the Vane Award for his

"devotion to golf, the team and Cornell University in the image of Tom Vane." Vane, who played golf for Cornell prior to earning his degree in industrial engineering in June, 1971, died in August, 1971.

Other award winners have been Danny DeAngelus, a 1971 graduate; Lewis Stone, a 1973 graduate, and Harry Briggs, who graduated last year.

## S.E. Asia Expert Fills Goldwin Smith Chair

Oliver W. Wolters has been named Goldwin Smith Professor of Southeast Asian History in the College of Arts and Sciences at Cornell, effective July 1.

A member of the Department of History and of the Southeast Asian Program since 1963, Wolters is a specialist in the early history of Southeast Asia. His book "Early Indonesian Commerce," was published by Cornell University Press in 1967. His "Fall of Srivijaya in Malay History" was published by the Cornell University Press in 1970. He is the author of numerous articles in his field

and has served as chairman of the Department of Asian Studies.

Born in England, he earned his bachelor's degree at Lincoln College, Oxford University in 1937 and his doctorate from the University of London in 1961. He was in the Malayan Civil Service from 1938 to 1957 when he joined the faculty of the School of Oriental and African Studies in the University of London. He was a Guggenheim Fellow in 1972-73 and has been a trustee of the Breezewood Foundation since 1964.

## Sage Notes

The regular meeting of the Graduate Faculty for consideration of the June degree list will be held at 4:30 p.m. Friday, May 23, in Kaufmann Auditorium in Goldwin Smith Hall.

Graduate School non-credit registration for the summer of 1975: All graduate students who do not need residence credit for summer but who plan to continue study toward their degrees during the summer should fill out a non-credit registration form and register in the Graduate School Office, 111 Sage Graduate Center, on or after May 28. There is no tuition charge for this registration. The student copy of the form serves as a summer ID for receipt of scholarship checks and for use of University clinic and libraries.

The Board of Trustees has voted to increase the thesis fee for the Ph.D. degree from \$30 to \$40 effective July 1, 1975. This increase will affect all students paying their thesis fees on or after July 1.

Final commencement information is available in the Graduate Office. Caps and gowns may be ordered through Student Agencies, 409 College Ave.

A reception for all graduate students who participate in commencement exercises and their guests will be held in Sage Graduate Center immediately after the ceremony.

Degrees will not be awarded to students who owe funds to the University. All degree candidates should check their accounts with the Student Account Section of the Bursar's Office, 260 Day Hall, before May 21. Since mistakes can be made in the rush of commencement activities, all candidates should check even if they are sure there are no outstanding charges due the University. All students with loans must set up exit interviews with the Financial Aid Office.

Registration reminder for fall semester, 1975: Registration forms (including Registration Permit Card) will be available at Lynah Rink Tuesday, August 26 through Thursday, August 28, 8 a.m.-4 p.m., and on Friday, August 29, 8 a.m.-3 p.m. New students registering for the first time at Cornell should register at Barton Hall, Thursday, August 28, 8 a.m.-12 noon. All continuing and rejoining students register at Barton Hall, Friday, August 29, 8 a.m.-12 noon and from 2 p.m. to 4 p.m. All students register at the time indicated on their Registration Permit Card.

Seniors and graduate students contemplating study abroad are encouraged to consider the Fulbright-Hays competition administered by the Institute of International Education. Applicants must be U.S. citizens, hold a bachelor's degree before beginning date of grants, have impressive scholastic achievement, and have good proficiency in the language of the host country. For further information see Eva Poyas, 110 Sage Graduate Center.

## Exam Break... Flying Frisbees

## CU Professor Edits Book On Malpighi

A view of the scientific world of the 17th century is offered in a new work edited by Howard B. Adelman, professor of histology and embryology, emeritus. The five-volume book, "The Correspondence of Marcello Malpighi," published by Cornell University Press, is the latest addition to the Cornell Publications in the History of Science series.

Malpighi (1628-1694), a cardinal figure in the history of biology and medicine, taught most of his life at the University of Bologna, Italy. This collection includes more than 1,000 letters exchanged by Malpighi and some 150 correspondents throughout the Western world.

Adelman is also the author of "The Embryological Treatises of Hieronymus Fabricius of Aquapendente," which won the F.S. Crofts Prize for the most distinguished work by a member of the Cornell faculty when it was published in 1942, and "Marcello Malpighi and the Evolution of Embryology," which appeared in 1966. Both books were published by Cornell University Press.

## Black Students' Summer Course

*Continued from Page 2*

York State College of Life Sciences' funding, academic and administrative support at Cornell. Funds for the Cornell program will also come from the University provost and COSEP, said Cooper.

The student coordinators will be Phyllis Gee, New York State College of Human Ecology '76; Denton Allman, Arts '76; Rose Payne, Arts '77; Pamela Smith, Arts '75, and Patricia Samuels, Arts '75. O'Brien will supervise administrative aspects of the summer program. The academic staff will be supervised by Fred R. Scholer, assistant professor of chemistry.

## Youth Bureau Camps Need Volunteer Help

The Youth Bureau supports a variety of activities designed to provide recreational, educational and social opportunities for people in Tompkins County. Continuing a tradition of diversified programming for the summer, the bureau will be running several day camps geared for special ages and special interests. Among them: Cass Park Camp, Stewart Park Camp, Sports Camp, Camp Iroquois, GIAC Camp, GIAC Pre-Kindergarten Camp, Basketball Camp. Volunteers are vital participants in these programs.

Playground Programs, which include arts and crafts, sports, games, special events, and one swimming day per week, will be run at seven elementary schools, from 9 a.m. to noon every weekday.

Cass Park Pool will be open daily for recreational swimming and roller skating will be available at Cass Park Rink four nights a week.

Special instructional swim programs, Kiwanis baseball, summer basketball, tennis programs, and Children's Theater Workshop will also operate.

Also, a number of special events have been scheduled. A brochure listing all summer activities with pertinent information, as well as application forms to all of them, is available at the Youth Bureau, 1701 N. Cayuga St., or by calling 273-8364.

*Below are some of the current requests for volunteer help. To respond to any of them, or to get information about other volunteer needs in the community, please call CIVITAS, 256-7513, Monday through Friday from 11 a.m. to 4 p.m.; or call Voluntary Action Center, 272-9411, Monday through Saturday from 9 a.m. to 1 p.m.*

*Big Brother/Big Sister* needs volunteers to provide friendly companionship for lonely children. Both summer replacement volunteers, to take over for college students who leave for vacation, and permanent volunteers are needed.

*Voluntary Action Center* needs volunteer friendly visitors for individual residents, volunteers to assist with small group recreational or crafts programs, volunteers to accompany, or to provide transportation for small groups of residents on short field trips, and volunteers to provide musical or slide show entertainment. Times and days can be arranged.

*NURSING HOMES* need volunteer friendly visitors for individual residents, volunteers to assist with small group recreational or crafts programs, volunteers to accompany, or to provide transportation for small groups of residents on short field trips, and volunteers to provide musical or slide show entertainment. Times and days can be arranged.

*Day Care Council* needs volunteers to assist in the office with clerical and program planning duties, and, while there, to be on call as Day Care Mother substitutes in emergency. Choice of days Monday through Friday, 9 a.m. to 12:30 p.m., or 12:30 to 4 p.m.

*A Program for the Elderly* needs a volunteer with case-work experience to help plan services, make needs assessments, counsel, and coordinate program development. Any time or day within the 9 a.m. to 5 p.m., Monday through Friday, work week.

*Camp Iroquois for handicapped Children at BOCES* needs volunteers to assist counselors with small groups of children in camp activities or in swimming program. The camp will run from July 7 until August 1, and volunteers may choose any days, Monday through Friday from 9 a.m. to 2 p.m.

*Drop-in Day Care Center* needs volunteers to assist with their program for pre-school children. Times can be any two-hour shift, from 9:30 a.m. to 3 p.m. on Tuesdays, Wednesdays or Thursdays.

*Tutors* are needed to work with adults in the high school equivalency program in various parts of the county, and to work with adults in basic reading, math or spelling skills. Time and day can be arranged.

# Calendar

May 22-June 2

## Thursday, May 22

6 p.m. The Cornell Christian Science Organization invites students to a Readings and Testimony Meeting in the Founders Room, Anabel Taylor.

8 p.m. \*Cornell Cinema Film: "Room Service". Marx Brothers classic directed by William A. Seiter. Willard Straight Theatre. Attendance limited to Cornell Community.

## Friday, May 23

7 p.m. \*Cornell Cinema Film: Double Feature: "Revolutionists," directed by Vera Stroyeva at 7 p.m., plus "Portrait of Lenin," directed by Sergei Youtkevich at 9 p.m. Uris Auditorium. Attendance limited to Cornell Community.

7 & 9:15 p.m. \*Cornell Cinema Film: "Sleeper," directed by and starring Woody Allen, with Diane Keaton. Statler Auditorium. Attendance limited to Cornell Community.

## Saturday, May 24

1 p.m. Heavyweight Crew - Pennsylvania

5:15 p.m. Catholic Mass. Anabel Taylor Chapel.

7 & 9:15 p.m. \*Cornell Cinema Film: "The Graduate," directed by Mike Nichols, starring Dustin Hoffman, Ann Bancroft and Katharine Ross. Uris Auditorium.

7 & 9:15 p.m. \*Cornell Cinema Film: "Sleeper," directed by and starring Woody Allen with Diane Keaton. Statler Auditorium.

## Sunday, May 25

9:30 and 11 a.m. Catholic Masses. Anabel Taylor Auditorium.

9:30 a.m. Holy Communion Episcopal Church at Cornell. All are welcome, students, faculty and families. Anabel Taylor.

10 a.m. Friends Meeting for Worship. Child care provided for infants. Discussion at 11 a.m. Anabel Taylor Forum.

11 a.m. Sage Chapel Convocation: Loreta Jordan, S.M.D., Associate of the Committee on Latin American Relations and of the First Baptist Church, Ithaca.

## Monday, May 26

## Tuesday, May 27

12 noon. Women in the Work World Series lecture: "International Women's Year." Constance E. Cook, former New York State Assemblywoman. ILR Conference Center 300.

8 p.m. Film: "The Chase," Uris Auditorium. Sponsored by the Senior Class Council.

## Wednesday, May 28

Last day of final examinations.

12 noon. Lecture: "Changes in the Law as They Affect Women." Dean Judith Younger of the Syracuse Law School. ILR Conference Center 300.

2 p.m. University Faculty Meeting. Ives 110.

## 'In Spring A Young Man's Fancy...'

## Thursday, May 29

8 p.m. Film: "Little Rascals." Uris Auditorium. Sponsored by the Senior Class Council.

## Friday, May 30

## Saturday, May 31

8 p.m. Film: "Klute." Uris Auditorium. Sponsored by the Senior Class Council.

## Sunday, June 1

9:30 a.m. Holy Communion Episcopal Church at Cornell. Anabel Taylor Chapel. All are welcome, students, faculty and families.

9:30 a.m. Catholic Mass. Anabel Taylor Auditorium.

10:30 a.m. Friends Meeting for Worship. Hector Meeting House. Rides available from Anabel Taylor parking lot at 10 a.m.

11 a.m. Catholic Mass. Statler Auditorium.

11 a.m. Sage Chapel Convocation: Honoring the Class of 1975 and retiring faculty and staff. Robert McAfee Brown, Professor of Religion, Stanford University.

8:15 p.m. \*The Cornell University Glee Club will present its sixth annual benefit concert in Bailey. This year's beneficiary will be the Ithaca Community School of Music. Advance tickets will cost \$2.50, at the door \$3. Tickets can be purchased at Lincoln or Willard Straight on the campus and at Mayer's Smoke Shop or Hickey's Music Store in downtown Ithaca.

## Sunday, June 2

Commencement.

## EXHIBITS

Herbert F. Johnson Museum: MARGIN OF LIFE: through June 29. An exhibition of 100 photographs by Cornell Capa whose photo essays became famous during his long association with Life magazine.

ED THOMPSON - through July 6. Born in 1941, Ed Thompson attended RISD and completed work on his MFA in painting at Cornell. A ten year retrospect - portraits, landscapes, interiors.

AARON SHATTUCK - through May 25. A member of the second generation of a group of painters known as Hudson River School active during the middle of the 19th c. noted for

serene and charming landscapes.

VISIONS OF AMERICA: 19th c. reactions to changing landscapes. Selected mostly from permanent collection and one from John Reps. Organized by two University students, Gary Bernstein, Kathy Ostrom. Museum hours: Monday closed, Tuesday-Saturday, 10 a.m. - 5 p.m.; Sunday, 11 a.m. - 5 p.m., Wednesday evening till 9 p.m.

Dept. of Manuscripts and Archives, Olin Library: Children's Artwork from Vicos, Peru, 1954.

Olin Library: "Faces of Latin America," Photographs by J. Mayone Stycos, professor of Sociology and Director of the International Population Program at Cornell. Stycos' work has been shown at the Boston Museum of Science, Seattle Art Museum, Wells College, Ithaca College, Auburn Community College and Cornell. The photographs and the books accompanying them were chosen to illustrate the changeless — and changing — face of Latin America. The photographs were taken in Brazil, Guatemala, Honduras, El Salvador and Colombia.

## ANNOUNCEMENTS

Statler Summer Dining ... Breakfast: Rathskeller (Monday-Saturday) - 7:30-10:30; Lunch: Cafeteria (Monday-Friday) - 11:30-1 ... Main Dining Room (Monday-Friday) - 12-2 ... Rathskeller (Saturday) - 11:45-2; Dinner: Rathskeller (Monday-Saturday) - 5:30-7:30 ... Main Dining Room (June 1, 12, 13, 14) - 6-8.

## Cornell University Press

Kelly, Henry Ansgar: LOVE AND MARRIAGE IN THE AGE OF CHAUCER. Publication date was April 25, 1975. \$15.

McKay, Alexander G.: HOUSES, VILLAS AND PALACES IN THE ROMAN WORLD. Publication date was May 12, 1975. \$19.75

\*Admission Charged.

Attendance at all events is limited to the approved seating capacity of the hall in which they are presented.

All items for the Cornell Chronicle Calendar must be submitted to the Office of Central Reservations, 32 Willard Straight Hall (either through the mail or by leaving them at the Straight desk), or call Carol Adams, 6-3513 at least 10 days prior to publication of the Chronicle. The Calendar is prepared for the Chronicle by the Office of Central Reservations

## Bulletin Board

### Memorial Day Campus Parking

The Cornell campus will be open for parking on Memorial Day, May 26, according to Maynard A. Richardson, appeals and program office, at the Traffic Bureau. There will be no campus bus service that day. Normal campus parking restrictions will again be in effect on Tuesday, May 27. The Traffic Bureau and the Office of Transportation Services will be closed on Monday, May 26.

### Talk on TROLL Scheduled

Paul Holland of the National Bureau of Economic Research will present a seminar on the interactive TROLL system at 2 p.m. Friday, May 23 in G-14 Uris Hall.

TROLL is an interactive computer system for quantitative research in economics and other social sciences.

All members of the Cornell computing and research communities are invited and encouraged to attend the seminar sponsored by the Office of Computer Services.

### Former Assemblywoman To Give Talk Tuesday

"International Women's Year" will be the topic of a talk by Constance E. Cook, former member of the New York State Assembly, at 12 noon Tuesday, May 27 in Room 300, Industrial and Labor Relations Conference Center.

The lecture is free and open to the public.

The talk will be part of the "Women in the Work World Series" developed by Virginia K. Rinker, training specialist, Office of Personnel Services.

Persons wishing to attend are requested to inform Personnel Services by telephoning 256-4869. Brown bag lunches may be brought to the lecture.

## New and Old Mix at Cornell

The Campus Bookstore has a new look outside and in. With the courtyard covered, the store has an additional 1,200 square feet of display area. And the lawn has acquired a space-scape look.
