

McKersie Appointed New Dean of ILR

Robert B. McKersie, an authority on labor negotiations, has been named dean of the New York State School of Industrial and Labor Relations (ILR) at Cornell. His appointment was effective July 1.

McKersie's appointment as dean was appointed by the Cornell Board of Trustees in April and ratified in May by the Board of Trustees of the State University of New York. Cornell's ILR School is a statutory unit of the State of New York and as a consequence has a dual affiliation, one with Cornell and the other with the State University.

Cornell President Dale R. Corson said, "Dr. McKersie brings to Cornell a cohesive background of education and experience in industrial relations. We feel confident that under his leadership the ILR School, one of Cornell's most significant educational innovations, will continue to distinguish itself in dealing with society's problems."

McKersie succeeds David G. Moore who resigned January 1 to become senior vice-president-research of The Conference Board, a non-profit, independent institution for business and economic research located in New York City. He was dean since 1963.

McKersie was professor of industrial relations at the University of Chicago's Graduate School of Business before coming to Cornell. His numerous publications include some 30 articles and the book "A Behavioral Theory of Labor Negotiations." Co-authored with Richard Walton, the book was published in 1965 by McGraw-Hill, and is now considered a classic in its field.

In addition to his appointment as dean for a five-year term, McKersie has been named a professor of industrial and labor relations.

During the interim between Moore's resignation January 1 and McKersie's arrival July 1, Robert F. Risley served as acting dean of the ILR School.

Born in Paterson, N.J. in 1929, McKersie attended the University of Pennsylvania where he received a bachelor of science degree in engineering in 1951. After serving for three years as an officer in the Navy, he entered Harvard Business School, where he earned a master's degree in business administration in 1956 and a doctorate in business administration in 1959. That same year he joined the faculty of the University of Chicago's Graduate School of Business as an assistant professor of industrial and labor relations. He was named associate professor in 1964 and professor in 1968.

He is a member of President Nixon's Advisory Council on Minority Enterprise and chairman of its Business Opportunities Task Force. He is director of the Chicago Economic Development Corporation.

Synchrotron Receives NSF Grant To Double Its Experimental Area

Cornell's 10 billion electron volt synchrotron laboratory will be expanded to allow more experiments to be conducted and the instrument's energy will be increased 25 per cent to enable physicists to conduct experiments not now possible.

The experimental area of the Wilson Synchrotron Laboratory will be almost doubled at a cost of \$975,000 with funds granted by the National Science Foundation (NSF).

Construction of the 120 by 70-foot addition will be started in the fall and completion is expected in about a year. The present experimental hall is 100 by 100 feet in size. The addition, which will be 30 feet high, will include facilities for a huge crane. The added space will be used by Cornell and visiting scientists to run experiments and analyze data. The addition will be constructed to fit in with the present architectural design.

The energy of the synchrotron will be increased this fall to 12.5 billion electron volts from 10 billion by installation of a new radio frequency accelerating system. This system includes four devices, called radiofrequency cavities, stationed at various points along the half-mile path of the electrons in the synchrotron. These radiofrequency cavities

impart added energy to the electrons as they circle around the synchrotron at speeds nearing that of light — 186,000 miles per second.

Boyce D. McDaniel, director of Cornell's Laboratory of Nuclear Studies and the Wilson Synchrotron Laboratory, said plans to increase the synchrotron's energy even more — to 18 or 20 billion electron volts — are being considered.

"These changes will enhance the status of the accelerator as one of the nation's important resources for high energy physics," McDaniel said. "It's a measure of the importance with which the facility is regarded, that in a time of generally diminishing support over the nation for high energy physics laboratories, the Cornell synchrotron is going through an important expansion."

The Cornell synchrotron is unique in the world since it produces photon and electron beams of up to 10 billion electron volts of energy which are spread sufficiently uniformly in time to enable scientists to make detailed studies of interactions in which several sub-nuclear particles are detected simultaneously.

The property of the accelerator gives scientists using the facility the capability of studying many fundamental processes.

JULY 1971

Trustees, at Special Meeting, Act To Provide for Student Membership

**Risley Is Named
New Vice Provost**

Robert F. Risley

Robert F. Risley was named a vice provost at Cornell University July 21 by the University's Board of Trustees, effective immediately.

A member of the Cornell faculty since 1949, Risley assumes part-time duties in the newly created vice provost position, charged with supervising all personnel matters for University employees, both academic and nonacademic. Risley also will continue in his current position as associate dean of the New York State School of Industrial

(Continued on Page 7)

**Kane Appointed
Athletics Dean**

Robert J. Kane

Robert J. Kane, director of physical education and athletics at Cornell for 27 years, has been named to the new position of dean of physical education and athletics.

The announcement was made by Robert A. Plame, acting president at Cornell, following confirmation of the appointment by the University Board of Trustees at a meeting July 21 in New York City.

Kane announced that the position of director of physical education and athletics will be filled by Jon T. Anderson, assistant to the vice president for administration at Cornell.

Both the Kane and Anderson appointments are effective immediately.

In his new assignment, Kane will be primarily responsible for short and long range planning concerning physical education and athletics. This will include identification of problems concerning athletic facilities as well as determining and responding to needs for new approaches to recreational, intramural and intercollegiate sports.

Kane will also serve as special assistant to University President Dale R. Corson, working in the public affairs area.

Kane will continue to represent Cornell in the Ivy League, the National Collegiate Athletic Association (NCAA) and the Eastern College Athletic Conference (ECAC), as well as with other leading national and international organizations concerned with amateur athletics.

Bob Kane's wide experience in Ithaca, at

(Continued on Page 7)

**Also Add More
Faculty to Board**

The Cornell Board of Trustees took action July 21 to implement New York State legislation providing for student membership on the Board for the first time in the history of Cornell, as well as expanding faculty representation on the University's governing body. The action came at a special meeting in New York City.

The new legislation requested earlier by the University was signed into law last month by Governor Nelson A. Rockefeller and amends the Cornell Charter, first adopted by the State of New York 106 years ago. Cornell was established as a privately endowed as well as a land-grant institution.

With the new legislation, the Board's membership has been expanded from 49 members to 62 members, an increase of 13. The increase includes two additional faculty, five students and six

(Continued from Page 6)

Gifts Total \$25.3 Million

Another exceptional record in fund-raising has been achieved by Cornell, according to the tentative figures released for the 1970-71 year.

Funds totaling \$25.3 million were received by the University through June 30. Last year, gifts from all private sources were slightly in excess of \$24 million.

"This increase of approximately \$1 million is evidence that most individuals and agencies supporting higher education retain their faith in Cornell and its educational mission," according to Trustee Jansen Noyes Jr. '39, chairman of the Development Advisory Committee.

Alumni continued their outstanding support of their University through the Cornell Fund. Nearly \$3.6 million came to the University through gifts to the Fund.

"This was a fine year for the Cornell Fund since we were trying to match last year's record total of \$4 million which was made possible by the \$1 million challenge gift from Nicholas Noyes '06,"

Cornellians and Cornelliana

Appointments

Stanley J. O'Connor has been elected professor of art history and named chairman of the Department of History of Art in the College of Arts and Sciences at Cornell.

A specialist in Asian art, O'Connor joined the Cornell faculty in 1964. He is a member of the University's Southeast Asia Program and he served as chairman of the Department of Asian Studies from 1966 to 1970.

O'Connor's research has been focused on the art and culture contacts of the early centers of civilization in Southeast Asia. During 1963 he studied the development of Hindu sculpture on the Malay Peninsula. In 1966 he joined a Sarawak Museum team excavating early trade centers in coastal Sarawak. During 1970 he served as a consultant to the Ford Foundation on the problems of the traditional arts in Southeast Asia.

He is the co-author of several volumes on the archaeology of Sarawak and his articles have appeared in a number of professional journals.

N. Arnold Tolles has been elected professor of industrial and labor relations, emeritus, by the Cornell Board of Trustees.

A member of the faculty of the New York State School of Industrial and Labor Relations (ILR) since 1947, Tolles is an authority on economics and statistics in the field of industrial relations. His career has included positions at several universities and service as an economist for the federal government.

He is the author of numerous publications, including "Origins of Modern Wage Theory," (1964), "Sources of Wage Information: Employer Associations," (1952) with R.R. Raimon, and "Facts and Figures for Collective Bargaining," (1951) with Earl Brooks. He is also the author of two studies for the American Economic Association, published in 1964 and 1968 respectively, on the structure of economists' salaries.

He was chairman of the New York State Minimum Wage Board for the Dry Cleaning and Dyeing Industries, 1956-57. He is a member of the Board of Directors of the New York State Council on Economic Education and a founding member of the New York State Economics Association. He also holds membership in the Industrial Relations Research Association, the American Economics Association, and the Cornell Chapter of the American Association of University Professors (AAUP).

A Democrat, Tolles has been active in Ithaca politics for some time. He was appointed a member of the City of Ithaca Charter Revision Committee in 1958-59, served as seventh ward alderman from 1965 to 1969, was chairman of the Finance Committee of Ithaca City Council in 1968-69, and is currently serving as seventh ward representative on the County Board to complete the

N. Arnold Tolles

unexpired term of office of Frederick Stutz. He ran for mayor of Ithaca in 1969 against the current incumbent.

Tolles lives at 115 Orchard Place with his wife, **Martha Morrow Tolles**. He has two daughters, **Patricia** and **Harriet**, and seven grandchildren. Last year, in honor of his first wife, **Marion Donahue Tolles**, who died in

December, 1969, he established a grant-in-aid fund for students at the ILR School.

Paul W. Gates, an authority on the history of the American West and United States public land policies, has been named John Stambaugh Professor of American History, Emeritus, at Cornell effective upon his retirement July 1.

A member of the Cornell faculty since 1936, Gates has held two endowed chairs in history at Cornell. He was the Goldwin Smith Professor of American History from 1950 to 1959 when he was named to the Stambaugh Professorship. In addition to his scholarly and teaching activities, Gates served 10 years (1946-56) as chairman of the Department of History in the College of Arts and Sciences. He also served a term as secretary of the University Faculty.

In addition to continuing research on several current projects, he will be a visiting professor at the University of Kansas during the 1971-72 academic year.

Widely published in his field, Gates is the author of the following books: "The Illinois Central Railroad and its Colonization Work," 1934; "The Wisconsin Pine Lands of Cornell University," 1943, second edition 1965; "Fifty Million Acres: Conflicts Over Kansas Land Policy, 1854-1890," 1954; "The Farmers' Age, Agriculture, 1815-1860," 1960; "Agriculture and the Civil War," 1965; "California Ranchos and Farms," 1967, and "History of Public Land Law Development," 1937.

He is currently working on a study of the disposal of the public lands in California.

David B. Lyons has been elected professor of philosophy in the College of Arts and Sciences at Cornell.

A specialist in the field of moral philosophy, Lyons has served as editor of Cornell's "The Philosophical Review." He was on leave during the 1970-71 academic year in London working on a book on the philosophy of Jeremy Bentham.

After engineering training and work as a machinist and engineering draftsman, Lyons was graduated from Brooklyn College in 1960. He earned his doctorate from Harvard University in 1963. He joined the Cornell faculty as an assistant professor in 1964 and was named an associate professor in 1967.

The Rev. **David B. Callan** has been named Roman Catholic chaplain at Cornell. The appointment was announced by W. Jack Lewis, coordinator of religious affairs.

Father Callan succeeds the Rev. David W. Connor, who has been Roman Catholic chaplain here since 1966. Father Connor plans to do research in alternate life styles under a grant from the newly

established Centre for Religion, Ethics and Social Policy at Cornell.

A native of Rochester, Father Callan received his bachelor of arts degree from St. Bernard's Seminary and College in that city. He continued his studies in theology there for four years until he was ordained in June, 1966.

J. Murray Elliot has been promoted from associate professor to professor in the Department of Animal Science at the New York State College of Agriculture and Life Sciences at Cornell.

Elliot, who joined the Cornell faculty in 1960, teaches introductory courses in animal science and livestock production and conducts research on animal nutrition. He is adviser, also, to about 40 undergraduate students.

Olan D. Forker, an economist specializing in marketing has been promoted to professor in the Department of Agricultural Economics at the New York State College of Agriculture and Life Sciences at Cornell.

Professor Forker's academic work focuses on market organization and performance. He has been concerned with the development and execution of state and federal market orders, the bargaining process between farmers and buyers of agricultural products and market price determination for eggs, milk and other products.

He and Associate Professor George Casler took leadership for the recently completed study, "Toward the Year 1985," which resulted in a series of 14 publications concerned with the future of New York's agricultural industry, recreation and urbanization.

Louis N. Hand, an associate professor in Cornell's Department of Physics and Laboratory of Nuclear Studies since 1965, has been promoted to professor.

Hand earned a bachelor of arts degree at Swarthmore College in 1955 and a doctor of philosophy degree at Stanford University in 1961. He was an instructor at Harvard University from 1961 to 1964. He was promoted to assistant professor at Harvard in 1964 and served in that capacity until 1965 when he came to Cornell as associate professor.

Hand's research efforts are primarily in the fields of experimental high energy physics and he has participated frequently on national and international panels and advisory committees.

Dan E. McCall has been named associate professor of English in the College of Arts and Sciences at Cornell. McCall joined the Cornell faculty as an instructor in 1966 and was named an assistant professor the following year.

He went on leave July 1 to work on a critical study of James Agee, American author and critic. He has written numerous articles and reviews and among his current projects is a novel and an article on F. Scott Fitzgerald's use of Keats

writings.

McCall received two prestigious fellowships this year, one from the American Council of Learned Societies and the other from the Guggenheim Foundation, which has been deferred to the 1972-73 academic year.

McCall and his wife, **Dorothy**, a lecturer in the Department of Romance Studies, will live in Paris during the 1971-72 academic year.

Honors

Urie Bronfenbrenner, professor of human development and family studies, and of psychology at Cornell was awarded Merrill-Palmer's 1971 Citation June 8 at the Institute's "Annual" meeting of the Board and Corporation in Detroit.

Following a luncheon of the trustees and faculty during which the award was presented, Bronfenbrenner discussed his work, conviction, and thinking about the future as it affects young children and the provisions to be made for them.

A professor in the New York State College of Human Ecology since 1948, Bronfenbrenner was elected a Cornell University faculty trustee in 1970.

At the 1970 White House Conference on Children and Youth, he served as chairman of the Forum on "Parents and Children Together in the World." He also was the author of a book, "Two Worlds of Childhood: U.S. and U.S.S.R.," published in 1970 by the Russell Sage Foundation.

David B. Williams, director of the International Student Office at Cornell, is presently visiting Taiwan at the invitation of the Republic of China.

The invitation was issued by James C.H. Shen, ambassador of China, Washington, D.C.

In the invitation, Shen said he felt a visit to Taiwan would help Williams learn more about the educational, economic and social conditions present in the native country of Chinese students.

Williams will also visit Cornell alumni groups in Hong Kong, Bagkok, Los Banos and Manila in the Philippines and Tokyo. He will return to Ithaca on August 27.

Richard L. Livoff, professor of electrical engineering and applied physics has been awarded a scholarship by the Free University of Bruxelles in support of his appointment as Visiting Professor at the same University. This appointment in the Faculty of Science will be assumed during his forthcoming sabbatic leave.

CORNELL REPORTS

Cornell Reports Vol. 5, No. 8, July, 1971

Cornell's Ag College Gets A New Name

A 106-year-old college, the only one of its kind in the Empire State, has a new name.

The legislature has approved a bill, signed by Governor Rockefeller, to change the name of the New York State College of Agriculture to the New York State College of Agriculture and Life Sciences. The change became effective July 1.

Dean Charles E. Palm said that the new name reflects more accurately the teaching, research, and extension programs underway at the College. "The fast moving pace of scientific achievements, coupled with the expanded demands made on modern agriculture, have broadened our mission," he said.

"Recently, concern has been widespread about the interactions of agriculture, biological mechanisms, and the environment. The College's unique strengths in both agriculture and the life sciences have spurred the environmental dialogue and stimulated a cooperative approach between the disciplines.

"Alleviation of rural poverty through improved education and economic development is allied closely with the College's work in rural sociology, agricultural economics, agronomy, animal science, and other fields. Land use, recreation, conservation, and full use of our natural resources fit into the broad concerns about the environment," Palm said.

Agriculture has been an integral part of Cornell University, the land-grant university for New York, since 1865. In 1904, the state accepted responsibility for its support and it has since been known as the New York State College of Agriculture at Cornell University.

In 1948, the College became a statutory college of the State University of New York while still administered by Cornell. It ranks second in total undergraduate and graduate student enrollment among Cornell's 15 schools and colleges.

The New York State College of Agriculture and Life Sciences provides the educational matrix for the sweep of modern agriculture in the Empire State. It trains young men and women for useful and rewarding careers in all parts of modern agriculture.

Broken Field, But No Runners

PASS THE POLYTURF — The field is broken but there are no runners in sight; indeed, even Ed Marinaro would be hard pressed to gain yardage on Schoellkopf Field in its present condition. The field's natural turf has been stripped off in preparation for the installation of new drainage facilities and artificial polyturf. The project which is expected to be completed sometime this summer, was made possible by a \$350,000 donation from an anonymous alumnus.

Corson Among 20 College Execs Awarded Danforth Travel Grants

Cornell President Dale R. Corson is among 20 college and university presidents who have been awarded 1971 short-term leave grants by the Danforth Foundation to enable them to "enlarge their perspectives of current and future educational issues and to renew their inner resources for continued leadership in higher education."

Corson has been on leave from the University since June 13 to participate in the Danforth program. He will return to campus September 1 after travelling to Kenya, Uganda, Tanzania, Switzerland and England.

During Corson's absence, University Provost Robert A. Plane will be acting president and will have all the authority normally exercised by the University president.

In announcing the recipients, William C. Nelsen, director of the Short-Term Leave Grants for Danforth, stated: "Our experience with this Program, now in its fourth year, has confirmed the value of short-term leaves for academic administrators. Such leaves are valuable to the individual administrator, his academic institution, and to higher education in general. Through this Program the Foundation hopes to assist a number of individuals who, while having past accomplishments, hold promise for continued significant leadership in higher education. At the same time the Foundation also hopes to demonstrate the value of such leaves so that institutions will establish their own leave

programs for administrators just as they now provide sabbaticals for faculty members."

The grants are intended for presidents and principal academic officers of junior colleges, four-year colleges and universities. In selection, preference is given to individuals who have served at

least five years in their present position, or in a similar position, but who are not yet within five years of retirement. Selection is by invitation rather than application, Nelsen said.

The grant enables each recipient to take a leave from his institution of two to four months in length.

Robert Haley Is Appointed New Development Director

Robert J. (Rip) Haley '51, associate director of development at Cornell and director of the Cornell Fund, the University's annual giving program, has been appointed director of development at the University.

Haley's appointment was announced by Richard M. Ramin, vice president for public affairs. Haley, who joined the University staff in 1963 and was named director of the Cornell Fund in 1967, succeeds Ramin as director of development.

"Under 'Rip' Haley's direction, Cornell has had outstanding success in the vital area of alumni annual giving," Ramin said. "No other major private university in the United States has had such an outstanding record of growth in alumni annual giving as Cornell has had. Gifts to the Cornell Fund have increased from some \$1.4 million in 1965-66 to more than \$4 million in 1969-70."

As director of development, Haley, 42, will be responsible for the University's total fund

Robert J. Haley

raising operation, which includes the Cornell Fund, Estate Affairs, Corporate Relations and Foundation Relations. This year Cornell will receive approximately \$25 million through these programs.

Prior to joining the University staff, Haley was district manager for the Frick-Gallagher Manufacturing Company in Pittsburgh, Pa.

Dinner Honors Johnson

CONVERSATION — H.F. Johnson '22 (at left), Samuel C. Johnson '50, former Wisconsin Gov. Warren P. Knowles and Cornell President Dale R. Corson chat informally at a dinner held recently in Racine, Wisc., to honor the elder Johnson for his years of service to the University.

*Reunion '71:
Good Times and Good Weather*

Well Over 2,000 Return

Some 1,522 officially-registered Cornell alumni were back on the Ithaca campus June 9-13 for Reunion '71 and they were greeted by good times, good fellowship and good weather. The official attendance figure represented the first increase in eight years. Total attendance was well over 2,000.

Frank Clifford '51, director of alumni affairs, said he was extremely pleased with the attendance and said he felt that alumni had turned out so well because of "renewed interest in their University and their classes, plus the drawing power of an enjoyable and enlightening Reunion program."

As usual, alumni engaged in such traditional activities as campus tours, breakfasts, luncheons and dinners for classes and organizations, the Savage Club show and Cornelliana Night. They also took advantage of two other Reunion events, the Barton Hall Faculty Forum and the Reunions Forums.

Barton Hall was arranged as an exhibit center for 32 departments of the University. More than 100 faculty members were present

at various booths to meet alumni for informal discussion on various aspects of the University. "This innovation, which has been well-received by all, is intended as a faculty welcome to alumni as well as an opportunity to gain information," Clifford said.

Alumni shared the platform with members of the faculty in the four Reunion Forums. The topics were ornithology at Cornell, estate planning, problems of alienation of children, and the morality of the mass media.

Speaking at the Alumni Association meeting, University President Dale R. Corson said the biggest problem facing higher education is the loss of public confidence, but he lauded Cornell's alumni for their support during difficult times. He said stability is returning to college campuses and "we can now discuss our problems rationally." Corson said that with the kind of encouragement that has come from Cornell alumni, everyone at the University is able to work harder to maintain Cornell's high rank.

Trustee Dean Donates Rare Books to Cornell

BOOKING IT — Admiring an extremely rare 17th-century atlas donated along with another set of rare books to Cornell by Trustee Arthur H. Dean '21 are (from left) David Kaser, director of University libraries; Trustee Dean; Robert Vosper, director of libraries at UCLA; and University President Dale Corson.

Two sets of extremely rare books containing late sixteenth and early seventeenth century engravings have been donated to Cornell by Arthur H. Dean '21, former chairman and current member of the Cornell Board of Trustees.

Dean presented the books during the annual meeting in June of the Cornell Library Associates, of which he was re-elected president. The meeting and dinner, attended by more than 100 members and guests, took place at the Statler Inn.

The books will be housed in the Rare Book Department of Cornell's Olin Library. They include a travel series published between 1595 and 1628 by Theodore De Bry in Frankfurt and Oppenheim, Germany. The series contains more than 300 maps, plans and views.

Twelve parts of the so-called Major Voyages in the series deal with the discovery and exploration of America. Twelve others, the Minor Voyages, relate to Africa, India and Asia.

The second set of books donated by Dean is a two-volume folio atlas of Dutch and Belgian cities. The works, entitled "Tooneel der Steden van de Vereenighde Nederlanden," were published in 1649 by Joannes Blaeu, who drew the maps, engraved the plates and printed and colored the atlas. This set, with brilliant, hand-colored illustrations, was formerly the property of the King of the Belgians.

Dean was first named to the Board of Trustees in 1945 and served as chairman of the board from 1959 until he

announced his retirement as chairman in 1968. His current trustee term runs through 1975.

A 1923 graduate of the Cornell Law School, Dean has long been interested in the Cornell University Libraries.

He arranged through former Ambassador Hu Shih '14, while in Formosa in 1960, for the Cornell Library to receive a set of the Codex Sinica.

Study Urges Cornell to Facilitate Growth of National Library System

The future growth of Cornell Libraries should follow a course that will facilitate the inevitable development of a national library system while still responding to the specific

needs of the Cornell academic community, according to a comprehensive study released recently.

The report by a 15-member faculty-administration

committee makes a number of recommendations, hopefully in conjunction with several other upstate New York universities.

The committee, charged by University President Dale R. Corson in late 1969 to take a long range view of the University Libraries' needs in space, new acquisitions and services, also states:

"The Libraries top priority should be to maintain if at all possible the current rate of acquisition of books and periodicals..." and "The Administration should make every effort to avoid cutting budget for the library for acquisitions and services."

The committee points out, however, that with the inflation in the amount of printed matter and the inflation in its cost, "it is becoming increasingly evident that no one library system can meet all the research needs of a university community."

The committee, headed by Francis E. Mineka, The Class of 1916 Professor of English, concluded its recommendations with: "Wherever possible, the Administration (Cornell) should exert its influence in favor of the development of state and national library systems."

Trustees Act on State Bill

(Continued from Page 1)

trustees-at-large. One ex-officio member of the Board, the temporary President of the State Senate, currently Earl W. Brydges, replaces the librarian of the Cornell Library in the City of Ithaca.

In related action the Board elected two faculty, five students and three trustees-at-large. This special election served to authenticate the prior action of the faculty, the University Senate, and the student body in electing persons to these positions last spring before legislative action on the Charter amendment was complete.

Those new trustees whose membership was authenticated by the special action are:

—Paul Olum, professor of mathematics in the College of Arts and Sciences, elected by the student body for a term ending March 1, 1973;

—Paul F. Feeny, assistant professor of entomology in the College of Agriculture and Life Sciences, elected by non-tenured faculty for a term ending June 30, 1973;

—Gordon G. Chang, a

junior in the College of Arts and Sciences, elected by the student body for a term ending March 1, 1973;

—Louise I. Shelley, a senior in the College of Arts and Sciences elected by the student body for a term ending March 1, 1972;

—Robert C. Gottlieb, a senior in the New York State School of Industrial and Labor Relations (ILR) at Cornell, elected by the University Senate for a term ending March 1, 1972;

—Stephanie V. Seremetis, a member of Cornell's six-year Ph.D. program, elected by the University Senate for a term ending March 1, 1972;

—Gerard V. LaSalle, a third year student at Cornell Medical College, elected by students in the Cornell Medical Center for a term ending March 1, 1973;

—Desdemona P. Jacobs, a resident of Ithaca, elected by the University Senate for a term ending March 1, 1975.

In addition, the Board elected Robert G. Engel of Ridgewood, N.J. and Nelson Schaenen Jr. of Basking Ridge, N.J. to two newly-created five-year terms as trustees-at-large.

Humanities Center Makes Alumni Friends

NEW FRIENDS FOR AN OLD HOUSE — A distinguished list of Cornell Alumni have formed the initial list of sponsors of "The Friends of the Andrew D. White House, a Center for the Humanities." The group will see that the newly-created Center is suitably furnished and properly maintained.

A distinguished list of Cornell alumni, including some of the nation's outstanding humanists, form the initial list of sponsors of the newly formed "The Friends of the Andrew D. White House, a Center of the Humanities."

Henry Guerlac '32, director of Cornell's Society for the Humanities, announced the establishment of the new organization in June. Guerlac is serving as secretary of the new group.

The list of initial sponsors includes: Morris Bishop '14, Harry Caplan '16, C. Michael Curtis '56, Jeremiah S. Finch '31, Louis Gottschalk, a doctorate in 1921, George Healey, a doctorate in 1947, Keith Johnson '56, Austin Kiplinger '39, John S. Knight '18, Frederick G. Marcham, a doctorate in 1926, Herbert J. Muller '25, Helen North '42, Harriet Barton O'Leary '24, Henry Reuss '33, Martin Sampson '39, Richard Schaap '55, Frank Sullivan '14 and E. B. White '21.

Guerlac said, "The house of Andrew D. White... long the official residence of Cornell's presidents... will soon assume a new role, appropriate to its central location and its place in Cornell history. When the art collections which it has housed in recent years move to the new Johnson Art Museum (late 1972) that fine old building, properly restored, will become Cornell's Center for the Humanities. In this capacity it will serve as a conference center, be the new home of the Society for the Humanities, provide much-needed seminar rooms for the humanities departments of the College of Arts and Sciences and a guest suite for visiting lecturers in the Humanities."

"A group of interested alumni, aware of Cornell's distinguished tradition in humanistic teaching and scholarship, and concerned to see the Andrew D. White House appropriately adapted to its new role, suitably furnished and, together with its gardens, properly maintained, have formed themselves into the Friends of the Andrew D. White House."

Ground Broken for Herb Garden

A bit of old time rural New York, complete with a stone watering trough, a split rail fence and a straw bees hive, will come to Cornell with the development of the Robison York State Herb Garden. The ground breaking ceremony for the proposed garden was held June 10.

The ceremony was at the site of the garden adjacent to the Cornell Plantations headquarters at 100 Judd Falls Rd. The 13th annual luncheon for sponsors of the Plantations followed the ceremony.

Audrey H. O'Connor, editor of The Cornell Plantation, described the proposed garden. Allan H. Treman '21, chairman of the Plantations sponsors, welcomed the group.

The donor of funds for the garden, Ellis H. Robison '18, of Troy, New York, was present at the events. University Provost Robert A. Plane acknowledged Robison's gift to the University.

Robison funded the garden as a tribute to his wife, Doris, who attended the ground-breaking ceremony and luncheon. He is president and treasurer of John L. Thompson Sons and Co., in Troy, a wholesale drug firm.

Robison received his bachelor of science degree from Cornell. He is a past president of the Capital District Cornell Club and is a member of the Cornell Council.

The herb garden, which is part of a major expansion plan for the Cornell Plantations arboretum, fulfills a historic Cornell interest in

herbs that was originally fostered by the late Walter C. Muenscher, besides being open to visitors.

Muenscher, who taught botany at Cornell for 38 years, was an authority on herbs. His book, "Garden Spice and Wild Pot Herbs," was published at Cornell. He also was an early supporter of the Plantations.

Included in the garden will be many plants important in the history of botany and medicine. And the surroundings of the garden will be reminiscent of farms in New York's history.

The garden, which will be 80 feet by 140 feet, will be bordered by a split rail fence on two sides, a laid stone fence and a stone dry wall on the other two sides. Stone curbing from Ezra Cornell's farmhouse and a set of early 19th century wrought iron gates will be incorporated in the design.

The garden will contain culinary, fragrant and medicinal herbs of current and historical interest. One bed will contain herbs used by early New York settlers; another will contain herbs used by the Indians of the state. A straw bees skep, which houses bees, will be located near some herbs that attract bees.

Adjacent to the central portion of the garden will be woody plants with mythological and historical herbal and medicinal significance.

Kane Appointed Dean of Athletics

(Continued from Page 1)

Cornell, and in the world of amateur sports makes him uniquely qualified for his new assignment and the broader responsibility it entails," Plane said. "His many talents will be put to full use by the University."

Anderson, as principal executive officer of the Department of Physical Education and Athletics under Kane, will have responsibility for the day-to-day management of the department's activities.

He is charged with the supervision and management

Cornell Fund

(Continued from Page 1)

Harold Uris '25, national chairman, said. "If we view this year's total against last year's minus that extraordinary gift, the Cornell Fund had a great year. Our alumni should be very proud indeed."

Uris said he was particularly gratified by the significant increase in the number of donors to the Cornell Fund. This year there were approximately 28,600 donors, an increase of about 1,200 over last year's total. In addition to the increased number of donors, many of whom were from recent classes, a substantial number of alumni increased the amount of their gift.

"All of this bodes well for the future of alumni giving to Cornell," Noyes said. "Gifts to the Cornell Fund began to show a steady annual increase after the University's Centennial Campaign closed in 1965 and continued generosity is required if Cornell is to remain in the forefront of our nation's educational institutions."

of finances, facilities, intercollegiate and intramural programs, and personnel in physical education and athletics. One of his primary duties will be expanding intramural opportunities, increasing the recreational availability of the facilities, and scheduling activities to insure maximum use of facilities.

A former two-sport athlete at Dartmouth College, Anderson has been Cornell's representative on the Ivy League Eligibility Committee for a number of years. He came to Cornell in 1960 as assistant director of financial aid. He was named director in 1961 and became director of scholarships and financial aid in 1962, a position he held for five years until being named director of the office of information systems. He was named assistant to the vice president for administration in 1970.

"Jon has had a lifelong involvement in athletics and has always been active as either a player, coach, or official. This background, coupled with his experience in University administration, provides him with excellent credentials at a time when athletic interest and managerial skills are crucial to the success of a university's athletic program," Kane said.

Kane, a native of Ithaca, starred in football, basketball and track at Ithaca High School. He enrolled at Cornell where he set a University record in the 200-meter dash (21.2) which still stands. He earned a bachelor of science degree from Cornell in 1934.

In 1937 Kane was named assistant track coach at Cornell. He was appointed

assistant director of athletics in 1939 and was acting director from 1940 to 1944.

Kane is vice president of the U.S. Olympic Committee, serving a four-year term through 1973. He was secretary of the U.S. Olympic Committee from 1965 to 1969. He has played a major administrative role at the Olympic Games for the last 20 years.

Kane was a member of the NCAA Television Committee from 1951 to 1966, serving as chairman in 1953 and 1957. He was president of the ECAC in 1950 and 1959 and served as president of the IC4A three times.

He and his wife, the former Ruth Brosmer of Norwich, live at 109 Cayuga Heights Road. They have two children, Christopher, a 1965 Cornell graduate, and Mrs. James Radzik of Ithaca.

Anderson, a native of Troy, is a 1955 graduate of Dartmouth where he played football and lacrosse. After spending five years in the U.S. Navy, Anderson earned a master's degree from the University of Virginia.

Since coming to Cornell he has served as an assistant coach with the 150-pound football team for two years and has coached in the local youth hockey program. He was a member of the Central New York Lacrosse Officials Association for many years.

Anderson is a member of the board of directors of the local United Fund and the Boynton Central Project and is former alumni president of Dartmouth's Class of 1955. He was a campaign chairman of the 1970 Tompkins County United Fund.

New Vice Provost

(Continued from Page 1)

and Labor Relations (ILR) at Cornell.

Risley's new appointment was recommended by Acting President Robert A. Plane, at a special meeting of the Board of Trustees in New York City. "Dean Risley is an authority on personnel and labor relations. This background, combined with his more than 20 years association with Cornell, makes him eminently qualified to carry out his duties as vice provost," Plane said.

In his new post, Risley reports to Plane in his capacity as Provost. Plane is serving as acting president during the absence of President Dale R. Corson, on leave from the University this summer.

Plane explained the new vice provost position was one of the recommendations of a study of the University's administrative organization last year. The study by an outside professional group and one of several task force studies by members of the Cornell community recommended that a single executive officer be placed in charge of all personnel matters for the University.

Plane added that among his new duties Risley will assume responsibility for academic personnel matters currently being handled by Vice Provost W. Keith Kennedy. He also will assume responsibility for the University's Affirmative Action Program.

Risley was named associate dean for Extension and Public Service at the ILR School in November, 1970. He also has been serving as acting dean of the School since January 1 until the arrival this summer of the School's new dean, Robert B. McKersie.

Risley has served as acting dean twice before, for a six-month period in 1963, and for another six months in 1959. His long association with the administration of the ILR school dates back to 1949 when he was named administrative aide to the school's second dean, Martin P. Catherwood, now industrial commissioner of the State of New York.

He served in this post until 1952 when he became a consultant on administrative organization and personnel policy to President William S. Carlson of the State University of New York. He was appointed assistant professor of industrial and labor relations in 1953 and associate professor in 1954 at the ILR School.

From 1954 through 1958 he was coordinator of Special Programs and director of the Summer School Program. In July of 1959 he was named assistant dean and professor of industrial and labor relations.

He was deputy industrial commissioner, New York State

Department of Labor, in 1962-63 before returning to Cornell as acting dean of the ILR School. In September 1963 he was appointed assistant dean and director of Extension, and in 1965 was named assistant dean for Extension and Public Service. He was a member of the New York State Board of Mediation in 1966-69.

Risley received a bachelor of arts degree in social science in 1948 from Union College and a masters degree in industrial and labor relations in 1949 from the ILR School. He earned his doctorate in personnel administration from Cornell in 1953.

Graduated from Horseheads (N.Y.) High School in 1940, Risley served as an officer in the U.S. Army Air Corps during World War II. He is married to the former Helen Hennessey of Pittsford, Vt. They live in Canor and have two sons, Robert Jr., 15, and Thomas, 11.

Cornell, EDP Void Contract To Sell CAL

Cornell and EDP Technology, Inc. jointly announced July 13 that the contract for the sale to EDP of the Cornell Aeronautical Laboratory (CAL) at Buffalo expired July 12 and, by mutual consent of the parties, was not extended.

Robert W. Purcell, chairman of Cornell's Board of Trustees, and Sanford D. Greenberg, chairman of EDP, pointed out that since agreement for the sale was reached in September, 1968, nearly three years had elapsed, during which period there have been many changes of circumstances which have made it impractical to carry out the contract in its original terms. Accordingly, termination of all obligations of both parties under the contract was accomplished by mutual consent.

Purcell recommended to the Board of Trustees that Cornell discontinue discussions for the sale of the laboratory for a period of at least 90 days while the entire matter can be studied with a view to determining Cornell's future relationship to the laboratory and any possible future disposition of it. The Board confirmed Purcell's recommendation at its meeting July 21.

Purcell further stated that, in view of the continuing interest strongly expressed by EDP in renewing negotiations for acquisition of the laboratory, he looked forward to having further discussions with representatives of EDP in the event the laboratory is again offered for sale.

Big Red Oarsmen Capture IRA Crown

It's been eight years since the Big Red varsity crew won the Intercollegiate Rowing Association (IRA) championship, but Todd Jesdale, in his first season as coach of the Cornell oarsmen, wasn't looking back as the Big Red made it look easy at the IRA finals June 19. Not only did they cop the IRA title, besting Washington, Penn, Brown, Rutgers and Navy in the finals, but they also took home the Ten Eyck Memorial Trophy for

over-all proficiency in rowing.

It was Cornell's nineteenth IRA title and the seventh time the Big Red was awarded the Ten Eyck Trophy. The victorious varsity crew consisted of Dave Wetherill '72, John Swanson '71, Alan Danser '73, Zygmunt Malowicki '72, Kevin Flanigan '73, Michael Staines '71, John Dunn '73, Dan Fisher '73, and Jeff Cornett '72.
