Sondermann elected AAAS fellow for biochemistry and structural biology research

🐾 Tuesday, November 27, 2018 - 2:58pm

Holger Sondermann, professor of molecular medicine in the College of Veterinary Medicine, is one of nine Cornell faculty members who have been elected fellows of the American Association for the Advancement of Science (AAAS), the world's largest general scientific society.

Sondermann is honored for distinguished contributions to the field of biochemistry and structural biology, particularly using molecular approaches to study bacterial signaling and membrane biology.

The association elected 417 new fellows for 2018, honoring their efforts to advance research and its applications in scientifically or socially distinguished ways. New fellows will receive a certificate and a gold and blue (representing science and engineering, respectively) rosette pin at the 2019 AAAS annual meeting, Feb. 16 in Washington, D.C.
