VOL. XVIII., No. 34

ITHACA, N. Y., MAY 25, 1916

PRICE 10 CENTS

THE annual exhibition of the Cornell Art Association was opened this week in the auditorium of Goldwin Smith Hall. President Schurman had expressed the wish of many admirers of the work of Professor Olaf Brauner when he asked the association to devote its 1916 exhibition entirely to that artist's works. The association has done so. Professor Brauner has loaned about thirty paintings and three pieces of sculpture. The paintings were already assembled, for most of them had been shown last winter in Indianapolis and Milwaukee. They include some beautiful marines, which Mr. Brauner paints with uncommon enthusiasm and sympathy, and a few portraits, all interesting. One of the latter is the admirable full-length portrait of Christian Midjo. When the collection was shown in Milwaukee, Mr. Dudley Crafts Watson, the director of the Milwaukee Art Society, devoted two columns in one of the newspapers to a warmly appreciative criticism of it. The exhibition in Goldwin Smith Hall will continue until June 30.

J. ANDRE SMITH '02 is now exhibiting in White Hall a large number of drawings. Having mastered the etcher's art, André Smith seems in these drawings either to be seeking a more direct method of expression or to be feeling for color. They are all in one manner. The drawing is made with a soft pencil. In some of them the color is washed in, in some it is rubbed in with pastel, and occasionally a crayon has been lightly used. The collection is interesting as an experiment in the use of mixed mediums and many of the drawings are remarkably successful pictures. The artist has not gone far from his studio in New York City for any of the subjects. The College of Architecture will keep the drawings on exhibition till after Commencement.

LOUIS A. FUERTES '97 has now on exhibition at the Cornell Club, 65 Park Avenue, New York, a collection of paintings and drawings illustrating his studies of birds. The exhibition was opened on May 22 and will continue for two or three weeks. In this collection the artist has brought together

practically all the finished work that he now has in his possession. It is the same collection that was shown recently in Detroit, Elmira, and Binghamton. The present exhibition in New York is for Cornellians in general, and any one interested is welcome to go to the club and see it.

THOMAS J. HEADLEE, Ph.D., '06, state entomologist of New Jersey, addressed the Sigma Xi society last Friday night on "A successful campaign against the New Jersey mosquito." Dr. Headlee is a native of Indiana and a graduate of the University of Indiana. After he received his doctor's degree at Cornell he served in succession as entomologist at the New Hampshire and the Kansas state experiment stations. Since 1912 he has been professor of entomology at Rutgers College and state entomologist of New Jersey. He has done considerable work in economic entomology and of late has been particularly prominent because of his work in connection with mosquito extermination in New Jersey. His lecture here was devoted to an account of that campaign and was illustrated with moving pictures.

HENRY KLAUBER, of West New Brighton, was adjudged the winner of the '86 Memorial Prize in declamation at the annual contest held in the Armory last Friday evening. Klauber is a junior in the College of Law. His speech was entitled "International Arbitration." The other speakers were M. J. Escoll '16, J. B. Flanigan '16, S. E. Smith '16, G. M. Tamblyn '16, R. H. Blanchard '17, C. B. Loudenslager '17, G. A. Newbury '17, B. L. O'Connell '18, and M. C. J. Westphal '18. The judges were Bishop Talbot, of Bethlehem, Pa.; Frank E. Gannett '98, and F. J. Bartlett, principal of the Auburn High School.

CONTRIBUTIONS BY ALUMNI practically fill the May number of *The Cornell Civil Engineer*. The leading article is by N. C. McMath, C.E., '14, engineer with the St. Lawrence Bridge Company, who describes the erection of the new Quebec Bridge. Numerous illustrations accompany the article. Frank W. Skinner, C.E., '79, who spent several months

last year in Europe as a consulting engineer, contributes a valuable article under the title "Engineering in the great European war." He describes the high state to which the science of destruction has been brought and concludes with a practical man's plea for adequate means of defense on this side of the Atlantic. Other contributors are C. N. Pinco, C.E., '03, assistant engineer of the City of New York, who writes about the plaza improvements of the Manhattan Bridge, and R. W. Parkhurst, C.E., '13, assistant engineer of the New York, Chicago & St. Louis Railroad; who tells of plans recently adopted for better co-operation among engineering societies.

NUMBER FOUR of the *Cornell Law Quarterly* completes an initial year of great success. The *Quarterly* set a high standard for itself in its first number and the standard has been maintained. The leading articles in the May number are "Specific performance of contracts for arbitration or valuation," by Professor Alfred Hayes, and "Twilight zones in newspaper libel," by Harold L. Cross, of the New York bar, who is a graduate of the college. There are seventy pages of notes and comment. The book reviews include some articles for which the editors went to experts in other departments of the University. A frontispiece portrait and biographical sketch of Judge Irvine are included. Next year Professor George G. Bogert will retain the office of faculty editor. The student editor-in-chief will be Frank B. Ingersoll '17, of Pittsburgh, and the business manager will be George A. Newbury '17, of Ripley, N. Y.

TWO LECTURERS in the course on citizenship have been unable to keep their appointments in the last two weeks. They were the Rev. F. M. Crouch '00, of New York, who was to have spoken on "The Church and citizenship," and Edward A. Moree '04, whose topic was "The citizen and the press."

AN ANONYMOUS GIFT of \$200 has been received by the University for the establishment of a graduate scholarship in experimental psychology for the year 1916-17.

Birthday Dinner in Honor of Professor Gage

THE sixty-fifth birthday anniversary of Professor S. H. Gage, emeritus professor of histology and embryology, May 20, 1916, was celebrated by more than a hundred of his colleagues and friends assembled at a dinner given in his honor. The dinner was made the occasion of presenting to the University a sum of money given by former students, friends, and colleagues of Professor Gage to endow a Simon Henry Gage Fellowship in Animal Biology.

Although sixty-five years is the retiring age under the present rules of the University and the Carnegie Foundation, Professor Gage retired in 1908 with a service pension in order to devote his whole time to investigation in embryology and histology. Recognizing the pecuniary sacrifice which he was making, the Trustees of the University voted a subsidy to augment his retiring allowance and provided him laboratory rooms, equipment and a small allowance for assistance. He had been a

teacher since his graduation from the University in 1877, when he was appointed instructor in microscopy and practical physiology.

The dinner was served in the large dining room of Risley Hall. Professor Gage's sister, Dr. Mary Gage Day, and his son, Dr. Henry Phelps Gage, were present. At the table with the guest of honor were President Schurman and a number of members of the Faculty most of whom had been students and afterward colleagues of Professor Gage. They were Dr. P. A. Fish, who presided; Dr. B. F. Kingsbury, who spoke of Professor Gage, the scientist; Professor J. H. Comstock, who related many reminiscences of Gage the student; Dr. A. T. Kerr, who paid a warm tribute to Professor Gage as colleague; Dr. G. S. Hopkins, whose theme was Professor Gage the teacher, and Dr. V. A. Moore, who presented the Gage Fellowship Fund to the University. The fund was accepted by President Schurman. Dr. Fish read from letters

which had come in honor of the occasion from Dr. Theobald Smith '81, director of the department of animal pathology, Rockefeller Institute for Medical Research; Dr. William A. White '89, of Washington; Dr. Edward L. Mark, of Harvard; Dr. Edwin G. Conklin, of Princeton; Dr. C. E. McClung of the University of Pennsylvania; Dr. William C. Thro of New York City, and Dr. James Ewing of the Cornell University Medical College in New York. When he accepted the endowment fund, President Schurman, in the course of his speech, suggested that a dinner like this seemed to be a happy way in which to mark the occasion of a professor's retirement from teaching.

Professor Gage's response to the remarks of his colleagues reflected the warm personal feeling which all of them had put into what they said. Dr. Kerr had struck this key when he said: "He has continued as a colleague to inspire us with his own enthusiasm and with a deep loyalty to the highest ideals of

scientific truth, and by his industry has stimulated us to greater efforts. More valued even that his example as the ideal teacher and devoted investigator is his service to his colleagues as a counselor. For by his kindness and sympathy he has continued to draw us all to him for counsel and advice."

The breadth of Professor Gage's scientific work was referred to by Dr. Kingsbury: "Clearly he early appreciated, perhaps partly by circumstances was compelled to appreciate, the fact that science can advance only through the perfection of instruments and methods of precision, and he directed his efforts toward the betterment of the situation. The majority of his early papers dealt with methods of microscopical or anatomical work, and centered in his book on *The Microscope and Microscopic Methods*, which first appeared in 1881 and is now in its twelfth edition—the only adequate textbook in English on the microscope as an instrument of biological research. * * Of the one hundred and sixty or so titles of papers, books, reviews, and biographic sketches from his pen, fifty-two are devoted to the microscope and microscopic or other methods; of the remainder the majority deal with biological problems. Some of them are contributions in the fields of physiology, histology or embryology; a number we may style zoological or general biological, others anatomical."

When he presented the scholarship fund to the University Dr. Moore said in part:

"It seemed fitting that the former students and friends of Professor Gage should give some tangible expression of their appreciation of his life and work. To that end it was agreed that the most appropriate token of respect, and a memorial that would embody the ideals that have so beautifully characterized his life, would be to establish in his honor a dual purpose fund, first to enable worthy students to continue their researches, and, secondly, to enhance the progress of the sciences he loves so much. It was believed that a fellowship in animal biology, which includes the field of science in which he has been a tireless worker, would best accomplish this purpose.

"It is well known, and in this case it proved too true, that those who specialize in the fields of science in which Professor Gage has specially trained men have become engaged in lines of work interesting in themselves, generally useful to mankind, but not productive

PROFESSOR S. H. GAGE

of great wealth. Those who follow these subjects know that they must submit to a life of honorable poverty, so that, willing as the hearts have been to give, the storehouses were not always filled. However, the responses to the plan of endowing a fellowship were numerous, generous and always happy. The contributions to date amount to \$2,667.94—a sum much smaller than that necessary to found the fellowship. However, the money was given for that purpose. Influenced by the patience and perseverance of him whom we would honor, it was decided to carry out the original plan and eventually secure the object of our desires. It was determined that the money now in hand, and which may hereafter be added to, should be held in trust by the University until it shall accumulate at compound interest a sum sufficient to yield an annual income of \$500. When that time arrives this income shall be awarded annually as the Simon Henry Gage Fellowship in Animal Biology. It will be some years, measured by the span of human life, before this fellowship will be awarded, but, measured by the life of the University, it will be but the passing of a day."

THE FINAL MEETING of Sigma Xi at Cornell this year will take place tonight, May 25, in Stimson Hall. The members belonging to the Medical College have arranged a series of experimental demonstrations. Afterward a meeting will be held for the election of officers for next year.

Dr. Marchal's Impressions

What a Distinguished French Visitor Saw at Cornell

Dr. Paul Marchal, the head of the entomological service of France, made a tour of this country in the summer of 1913 in company with Dr. L. O. Howard '77, chief of the bureau of entomology at Washington. They visited many universities between Boston and San Francisco and spent three or four days at Cornell. Dr. Marchal has written a book about his tour. What he says about Cornell is printed below, together with a free translation:

"L'Université de Cornell

"L'Université de Cornell peut être prise comme type idéal de l'Université américaine, tant au point de vue de l'organisation de ses études que de la beauté de ses installations. Elle nous intéresse en outre d'une façon toute spéciale; car, en aucun point du monde, il n'existe pour les sciences biologiques appliquées à l'agriculture, et en particulier pour l'entomologie, un enseignement qui approche par son étendue et par son organisation de celui que l'on donne dans ce centre universitaire.

"L'Université de Cornell est située dans l'Etat de New-York, près de la petite ville d'Ithaca, dans une des régions les plus pittoresques des Etats-Unis. Son territoire s'étend sur un large plateau boisé bordé d'escarpements qui dominent la ville et le joli lac Cayuga. Isolé par des gorges rocheuses au fond desquelles des torrents étroitement encaissés se précipitent en cascades, il n'est accessible que par des ponts suspendus jetés d'une paroi à l'autre et passant audessus des cimes gigantesques de Tsugas centenaires.

"Ce territoire, que les Américains designent sous le nom de 'campus', et qui, avec les champs affermés ('farms') le prolongeant à l'est, ne mesure pas moins de 1,200 acres, est une immense étendue de verdure, formée de bois et de prairies, dont la continuité n'est interrompue que par les avenues et les allées permettant d'aborder les divers édifices universitaires. La se dresse toute une cité dont les constructions, isolées les unes des autres, émergent au milieu de luxuriantes frondaisons; c'est d'abord la longue série des édifices ou sont installés somptueusement les services des huit Collèges et de l'Ecole des Etudes supérieures (Graduate School) qui composent l'Université. De types architecturaux très divers, souvent à demi-voilés sous un manteau

de plantes grimpantes, ils déploient la perspective de leurs pignons et de leurs portiques le long des avenues ombrées, ou se rangent en de gigantesques quadrilatères autour de tapis de verdure plantés d'arbres en quinconces. Plus loin, dans le ravissant décor d'un parc anglais, se groupent à flanc de coteau et sous les cimes des grands arbres les luxueuses résidences appartenant aux différents clubs ou aux associations universitaires ('fraternities'). Enfin, l'extrémité nord-est du 'campus' est occupée par les habitations du Président et des Professeurs de l'Université: leur groupement constitue un hameau charmant qui se compose de cottages dispersés parmi les arbres et les plates-bandes fleuries. Dominant tout cet ensemble, se détache sur le ciel la haute silhouette du Campanile qui, trois fois par jour, en une douce ou joyeuse mélodie, lance l'appel de son carillon.

"Il faut avoir vécu quelques jours dans l'atmosphère de cette idéale cité des sciences et des arts pour en goûter pleinement le charme et pour en comprendre l'harmonie qui évoque en l'esprit de la Cité future d'Henrik Andersen. On se rend compte alors de quelle erreur profonde sont victimes les voyageurs Européens qui jugent la vie et la civilisation américaine en prenant pour base les écrasantes impressions qu'ils ont ressenties dans le tourbillonnement des grandes voies commerçantes de New-York ou en visitant le fameux quartier des abattoirs de Chicago!"

Translation

"Cornell may be taken as a typical American university, with respect both to its academic organization and the beauty of its setting. Moreover, it is of special interest for us because in the biological sciences applied to agriculture and particularly in entomology it gives instruction which is unapproached in scope or organization anywhere else in the world.

"Cornell University is situated in the State of New York, near the little city of Ithaca, in one of the most picturesque regions of the United States. Its domain spreads over a broad wooded plateau, bounded by steep slopes which dominate the city and the beautiful lake Cayuga. Cut off by rocky gorges at the bottom of which straitened torrents fall in cascades, it can be reached only by suspension bridges thrown from one wall to the other and passing above the giant tops of ancient hemlocks.

"This domain, which the Americans call 'campus,' and which, with farm lands extending eastward, measures no

less than 1,200 acres, is a vast area of green, of woods and meadows, broken only by the avenues and paths leading to the various university buildings. There a whole city stands whose structures, separate from one another, are surrounded by luxuriant foliage; first the long series of halls devoted to the eight colleges and graduate school of which the University is composed. Of very different architectural styles, often half covered by a mantle of creepers, they unfold a perspective of gables and porticos along the shady avenues, or are grouped in great quadrangles around lawns set with rows of trees. Beyond, amid delightful scenery like an English park, grouped on a hillside under the great trees, are the rich homes belonging to the different clubs or 'fraternities.' Finally, the northeast end of the 'campus' is occupied by the dwellings of the president and the professors of the University: a charming group of cottages scattered among the trees and the flower beds. Dominating all this picture, against the sky stands the tall outline of the bell tower which, three times a day, in a sweet or joyous melody, sends out the call of its chimes.

"One must have lived several days in the atmosphere of this ideal city of the sciences and the arts in order fully to appreciate its charm and to feel its harmony, which call up the spirit of the future city of which Henrik Andersen dreamed. Then one can see what a blunder those European travelers make who judge American life and civilization by the crushing impressions they have received in the bustle of New York's business streets or in the famous stockyard-quarter of Chicago."

INTERESTING LECTURES were given last week by Dr. H. M. Payne, a mining expert, on "Mining the frozen gravels of the Arctic." Dr. Payne has spent a great deal of time in both Alaska and Siberia, where there are enormous supplies of gold-bearing gravels. These gravels are frozen solid from the surface down all the year round. It has been found necessary to thaw them in order to get at the gold. Dr. Payne described methods which had been devised for the thawing, and he related various difficulties, some political, which are encountered by mine operators and engineers in Siberia.

THE GRADUATE PRIZE IN PHILOSOPHY has been awarded to Miss Ellen B. Armstrong for her essay "St. Bernard of Clairvaux."

H. A. HITCHCOCK
Photograph by the Robinson Studio

THE NEW SECRETARY

H. A. Hitchcock '00 began his work as Secretary of the University this month. His predecessor, H. W. Peters '14, who in two years did much to establish and develop the usefulness of the office, is now working for the Packard Motor Car Company in Detroit. Mr. Hitchcock has had an experience of fifteen years in editing and publishing. A large part of his present work therefore is familiar duty for him. He has expressed an ambition to bring all departments of the office to their fullest possible usefulness, particularly with respect to the service of Cornellians everywhere. He has confessed to an ambition to help in the establishing of a Cornell University Press, and he is considering means of creating a central appointment office to assist employers to find among Cornell graduates the kind of men they are looking for. Various means of University publicity are also receiving Mr. Hitchcock's attention.

First Term Rushing Adopted

Fraternities Unanimous in Voting to Revert—A Single Association Now

The fraternity rushing problem was settled, until next fall at least, at a meeting of delegates from forty-five fraternities on May 18. At that time a constitution was adopted and signed by all the delegates present. The rules provide for a return to first term rushing, as has been expected ever since the failure of the second term plan, and the two factions are again united in one

organization. The constitution adopted is substantially the same as that which has governed the first term rushing in recent years. The "first period" will begin on October 11, two weeks after registration day, and will continue until October 26. The second period, during which the fraternities are allowed to bid freshmen, will begin two days later, on the 28th. The proposal to prohibit the pledging of sub-freshmen was unanimously rejected.

The only change of any importance was the election of an alumni advisory board which will be asked to co-operate with the executive committee of the association in determining infractions of the rules and penalties. The men elected to this committee were: David F. Hoy '91, Professor D. S. Kimball, Professor W. A. Hammond, H. G. Carpenter '90, and Woodford Patterson '95.

The following juniors were elected officers of the association: President, F. K. Foss, Chicago, Alpha Delta Phi; secretary-treasurer, P. Wyman, New York, Zeta Psi; executive committee, A. I. Culbertson, Mount Vernon, O., Alpha Tau Omega; C. S. Cooper, Philadelphia, Sigma Phi Epsilon; P. W. Eckley, New Kensington, Pa., Kappa Sigma; G. B. Howell, Ithaca, Delta Kappa Epsilon; H. G. Place, New York, Psi Upsilon.

The *Sun* criticised the fraternities in no uncertain terms for their retrenchment. The second term rushing, the undergraduate daily said, was a step in advance which was not fairly tried. The fraternities had shown a lack of courage and a lack of faith in one another by reverting to the old unsatisfactory system, the *Sun* asserted. For several days after the editorial was published the paper printed correspondence from undergraduates and alumni, condemning or praising the opinion expressed.

AN EXHIBIT under the general head of "training and keeping fit" is to be held in Portland by the Oregon Social Hygiene Association, of which Dr. George Norman Pease '04 (M.D., '07) is secretary. Dr. Pease has written to the Secretary of the University and obtained a photograph of Charles E. Courtney for the exhibit. The "Old Man's" picture is intended to illustrate the value of a temperate and physically active life.

FRESHMEN have begun to cut holes in their caps. The caps will be burned on the night of Spring Day.

THE LUNCHEON TABLE AT THE CORNELL CLUB OF PHILADELPHIA

A Sketch by R. E. Bishop '09

THE CORNELL CLUB OF PHILADELPHIA

(Contributed by the Secretary)

Since the Cornell Club in the Quaker City is unique in many respects among all the Cornell organizations, it may interest many alumni to know something about it. We occupy quarters at 1519 Sansom Street, a half-block from the Union League, a block from Chestnut Street, and three blocks from Broad Street Station and the City Hall. Although in the heart of the city our surroundings are quiet and secluded.

There are approximately 400 Cornell men in Philadelphia and the immediate vicinity. The club has a membership of about 160, which shows a fairly good batting average. This number is divided into the following classes of membership: Active, 89; junior, 23; non-resident, 37; contributing, 8. The dues for active members are \$15 a year; for the other classes, \$5 a year. There is no entrance fee. A man is eligible to junior membership if he has been out of college three years or less.

One of the strongest features of the club is the table. William, the chef, is one of the best in the business, and a very modest charge buys a meal than which there is no better to be found anywhere, with the possible exception of Mr. Boldt's modest little tavern over on Broad Street. If William's bill of fare does not happen to suit he is quite willing to run over to Dinty Moore's place and get anything the appetite craves. Attesting to the popu-

larity of the club is the fact that several of the neighborhood cats have adopted us, showing that the club is not without a domestic touch.

When you are in the city drop in and see us. It is a first-class place to get lunch and dinner and you will be apt to meet friends. A number of alumni will locate in Philadelphia during the next few months. We extend to them a hearty invitation to affiliate with the club on their arrival.

The accompanying drawing was used on the announcement of the last club dinner. It was drawn by Dick Bishop '09 and is an accurate representation of the round table at lunch or dinner time.

IN WASHINGTON SCHOOLS

The Cornell Club of Washington, D. C., has on exhibition at its quarters 1504 H Street, a collection of views of the University, copies of University and student publications, etc., for the benefit particularly of students of the Washington schools. On the tables of the ten local preparatory schools the club has placed copies of the University's book of views, and it has called the attention of the schools to the larger exhibition. The club intends this to be the beginning of a movement to make Washington a Cornell town.

THE RESIGNATION of Edward R. Stapley '14, instructor in the College of Civil Engineering, has been accepted by the Trustees. Mr. Stapley resigns to go into practice.

SUBSCRIPTION PER YEAR—\$3.00

Published by the Cornell Alumni News Publishing Company. John L. Senior, President; Woodford Patterson, Secretary and Treasurer. Office 110 North Tioga Street, Ithaca, N. Y.

Published weekly during the college year and monthly in July and August; forty issues annually. Issue No. 1 is published the first Thursday of the college year in September and weekly publication (numbered consecutively) continues through Commencement Week. Issue No. 40, the final one of the year, is published the last Thursday in August and contains a complete index of the entire volume.

Single copies ten cents each. Foreign postage 40 cents per year. Subscriptions payable in advance.

Should a subscriber desire to discontinue his subscription, notice to that effect should be sent in before its expiration. Otherwise it is assumed that a continuance of the subscription is desired.

Checks, drafts and orders should be made payable to Cornell Alumni News.

Correspondence should be addressed—

CORNELL ALUMNI NEWS,
Ithaca, N. Y.

WOODFORD PATTERSON
Editor

R. A. B. GOODMAN
Assistant Editor

Printed at the shop of the Cayuga Press

Entered as Second Class Matter at Ithaca, N. Y.

ITHACA, NEW YORK, MAY 25, 1916

ALUMNI Associations will applaud a plan which Secretary Hitchcock is working out for supplying motion pictures of Cornell events. The University has begun, under the Secretary's direction, a collection of films which are to be owned by the University and to be loaned to alumni and student gatherings without charge. The first of the series, a fifteen-minute reel of the annual inspection of the cadet corps and the Harvard-Cornell dual meet, is ready for distribution. The second is to be taken on Spring Day and will include views of the Yale-Princeton-Cornell boat race and perhaps other athletic contests of that day. Arrangements have been made for filming important Campus events in the future. Not only the play, but also the work of the University is to be recorded on the films. All the films will be edited by the Secretary, and his aim will be to make them both concise and comprehensive. For schools and for places where no motion picture projector is to be had, the University will continue to arrange new lantern

slide talks. A plan which the Secretary has in mind for one of these is to show pictures illustrating how the student trains for his vocation at Cornell and how he may carry his training into effect after he leaves college, for example, the student surveyor in the field and the graduate building a big bridge. Lantern slides illustrating the material development of the University will be kept up to date for use at alumni gatherings.

OPINION AND COMMENT

Women Students' Need of a Sympathetic and Authoritative Guide

Editor, Cornell Alumni News:

Many members of the Cornell Women's Club of New York have noted with appreciation the article in the NEWS upon the petition of the Alumnae Clubs that an office, similar to that of Dean of Women at a number of universities, be created at Cornell.

All the women graduates are united in making the request, and have been impelled to make it because they are convinced that a woman in this position will be among the greatest educational factors in the lives of the women undergraduates, and that the loss to these caused by lack of the assistance and influence of a woman of broad sympathies and understanding and high attainments, during four years of intense effort and adjustment, and of desire to find the field of activity in which their lives shall be expressed, can not well be estimated.

It has sometimes been urged that the creation of such an office would be creating a distinction in the treatment of women and men. Our reply is that we believe in the equal value of such an officer for the men. Similar positions exist at Yale and Wisconsin, and the need is met in Princeton by the Preceptorial System.

There are many questions in the minds of young people that cannot be answered by the wisest arrangement of a course of studies, but to which a friendly interview may bring a solution. We are working to attain this assistance for the women, for we believe that a conclusion reached by the experience and observation of so large a body of women of varied interests and ages ought to be considered of value where other women are concerned. We cannot urge it with equal force in the case of the men.

To those who believe that such guidance is unnecessary for young men, we would reply that equal opportunity for development and education do not

predicate that exactly the same thing shall be done in exactly the same way for women as for men. It implies that there shall be an aim to attain equally good results when estimated by the fitness developed in the individual. Co-education means education of equal value to men and women, not like education; it means education side by side, with the advantage gained by a sane, wholesome knowledge one of the other.

The specific duties for an Adviser of Women have been mentioned in the petitions. May I add this further reason for making our request, and for our hope that it may be granted?

ALICE H. BRUERE, '95.

New York Cornell Women's Club.
New York, May 21st, 1916.

EIGHTY-SIX REUNION

A roster and a letter have gone out to every Eighty-Six man and woman. The result is a promise of attendance from Norton, Thurber, Baker, Beardsley, Hull, Merritt, Harris, French, Harrison, Riley, McCann, Towl, Perkins, Eltinge, Grant, Vischer, Gadsby, Hoffeld, Schaaf, Doud, Story, Dunham, Hawley, Hill, Coville, Raichle, Sprague, Sackett, Cadwallader, and Chapman. Mesdames Snyder, Milmoie, Seeley, Cahill, and Runner are expected. Many others will undoubtedly increase the attendance.

The arrangements include a headquarters reunion-house at 526 Stewart Avenue as at the 25-year reunion. A class banquet will be held on Saturday evening.

The ball game and the meeting of the Federation of Women's Clubs will occupy Friday afternoon. The annual meeting of the Associate Alumni on Saturday morning, the alumni luncheon, the Class Dinner, and the Alumni Rally in the evening leave little time for other than casual chats. Many will remain throughout Sunday, and a few through senior week.

The inclusion of wives and families in this reunion has brought a pretty general response.

THE 1901 REUNION

The reunion committee of the Class of 1901 announces these events of its program: Friday, June 16, 6:30 p. m., an informal dinner for the men of the class at the Ithaca Hotel; Saturday, June 17, at 6:30 p. m., a dinner for the men and women of the class jointly at the Ithaca Conservatory of Music.

THE REV. WARREN D. MORE, D.D., of Santa Barbara, Cal., will preach in Sage Chapel on May 28.

MORE 1906

Little Old New York, you're there!
With thirty Good and Trues.
You'll whoop 'er up for 1906
And drive away the blues.

Which is a very worthy thing,
A splendid showing, too.
Our hats come off, but stop right there;
We have the smokes on you.

Who's coming eastward forty strong
From "Cincy" and Cleve-land?
We have the choicest bunch of scouts,
So let us lead the Band.

We don't intend to mention names
('Twould be too long a list),
But should you doubt our right to lead
Just hist!
Kouyoumdjian is coming!
SOME POET, '06.

ST. LOUIS BOAT RIDE

The Spring Boat Ride of the St. Louis alumni association will be held on the afternoon of June 3. The party will take the steamer Kabekona, leaving the foot of Lucas Street at 1:15 p. m. There will be a baseball game on a sandbar at the mouth of the Missouri River, and supper will be served on board the boat. All Cornell men are cordially invited to attend.

BOAT RIDE COMMITTEE,
St. Louis Alumni Association.

THE CHICAGO LUNCHEONS

Beginning May 25, 1916, the weekly luncheons of the Cornell University Association of Chicago will be held at the Grand Pacific Hotel, Thursdays, at 12:30.

**1916 MILITARY TRAINING CAMP,
FORT BENJAMIN HARRISON**

We are asked to publish the announcement that three military training camps will be held this summer at Fort Benjamin Harrison, Indianapolis.

The officers in charge are very anxious to have a good representation of college men among the recruits. Already a large number of university graduates have signified their intention of attending, and all Cornell men who can do so are urged to join them. No liability for service is attached. Full particulars regarding the camp, together with instruction sheets and application blanks, can be obtained from the U. S. Army Headquarters, Room 582, Federal Building, Chicago.

OPENING OF WHITE PARK

To Alumni intending sometime to locate in Ithaca; and to others seeking home sites near the Cornell Campus:

In October last, the following advance notice appeared in the ALUMNI NEWS:

"For many years I have held in reserve the finest section of my lands, the elevated level plateau north of the Country Club grounds, overlooking the campus, the southwest valley and the lake, hoping that it might become the site of a Cayuga Heights Inn, which should be the home either temporary or permanent of many cultured families.

"I have reluctantly abandoned that idea, and decided to open the section next June for sale in lots. With that end in view, I am now having the road and park scheme prepared by Mr. Warren H. Manning of Boston, and hope to get the streets in this fall, so that the sidewalk and planting may be done next spring.

"The choicest portion of this section has been divided into ten plots. There are isolated lots in Ithaca equally fine; but as a community of residence sites, uniformly good, I think I am within bounds when I say there is nothing to equal it in Ithaca; and I cannot recall that I have ever seen anything anywhere that seems to me quite as attractive as a place for homes.

"I do not desire to sell any of the lots until next June. In the meantime correspondence is solicited from those who may be interested. A descriptive circular with map will be prepared for distribution in the near future."

Sixteen plots, fronting on White Park road and on East White Park, including the ten choice plots above referred to, will be ready for occupancy in June. The road plan and general lot scheme have been laid out by Mr. Warren H. Manning of Boston, and the planting scheme by Mr. H. A. Caparn of New York. Nothing has been spared in the effort to make this the finest residential section in Ithaca. The streets above mentioned have been graded. Gas and water pipes are being laid. Sidewalks and cement gutters are being constructed; and the slopes are being planted, and the parkings seeded, as rapidly as the construction permits. The streets are to be gravelled and oiled, and ornamental street trees planted before the end of the year; and it is hoped that something may be done in laying out paths through and around the beautiful wooded knolls adjoining the Country Club grounds.

The descriptive circulars are delayed because of the burning of Morse Hall which destroyed Mr. Troy's negatives, necessitating the taking of new photographs. They will be ready soon. Copies will then be forwarded to all inquirers. In the meantime, it might be well to take advantage of Spring Day (May 27th) to visit the Park. Kindly let me know in advance when and where to meet you.

J. T. NEWMAN.

Yale 7, Cornell 1

Two bad innings for Russell enabled Yale to win Saturday's game on Percy Field by the score of 7 to 1. A base on balls, two errors, and a hit scored three runs for Yale in the sixth inning, and in the ninth the game was clinched when Russell passed two batters and allowed four hits for a total of four runs.

Cornell started off with a bang when Budd knocked the first ball pitched for a three base hit to deep center field. Mellen was out on a pop fly to first base, and Clary hit to third base. Budd was out on the play at home, but Clary scored on O'Connell's two-bagger to center. O'Connell went to third when Bush missed Valentine's grounder, but Valentine was out stealing second and the inning ended.

Neither team came very near scoring again until the sixth. Johnson walked and reached second when Russell tossed Snell's bunt over Sutterby's head. Both men advanced a base on Vaughn's infield out, and both scored when Shepley singled. Bush flied out, but Shepley came in when Sauters let Munson's grounder roll through his legs. Mudge ended the inning by flying out to Budd. In the sixth, seventh, and eighth innings Cornell failed to get a man past first base. In the first half of the ninth Yale started another scoring session. With one out Munson singled and stole second. Russell walked Mudge, and Kinney singled, scoring Munson. Garfield then hit safely, filling the bases. Russell walked Johnson, forcing in a run, and Snell singled, scoring Kinney and Garfield. Vaughn hit to Russell, who forced Johnson out at third base, and Shepley ended the inning by flying out to Valentine.

Cornell had men on first and third in the latter half of the ninth, but they were left there. The score:

Cornell 13, Michigan 6

Cornell took the series with Michigan by winning the first of the two games played in Ithaca on May 17 and 18. The game was full of free hitting and loose fielding by both teams, but the Cornell hits were usually made with men on the bases. Cornell scored at least one run in every inning but the eighth, and made a total of eighteen hits. Four Michigan pitchers were used, but all of them were easy for the Cornell batters. One run was scored in the first and another in the second inning by the successful use of the squeeze play. Miller gave way to Robbins after two innings in the box for Michigan, but Robbins lasted only two-thirds of one inning. During that time he allowed six hits, two of them three-baggers, and Cornell scored five runs. Ohlmacher, who relieved him, was not much better. Cornell made one run in each of the fourth, fifth, and sixth innings, and Ohlmacher was taken out after Cornell had scored three more runs in the seventh. Andrus allowed no runs for the last one and one-third innings.

Michigan also had a batting rally in the fifth. Newell hit for two bases and scored when Sauters overthrew first base after fielding Ohlmacher's grounder. Niemann reached first on Eckley's poor throw, and Russell hit Walterhouse, filling the bases. Brandell hit for two bases, scoring three runs. Michigan scored in the eighth and again

in the ninth, largely due to ragged fielding by Cornell. Eckley made five errors during the game. The score:

Cornell	AB	R	H	PO	A	E

*Batted for Newell in third inning.

Michigan..... 0 0 0 4 0 0 1 1—6
 Cornell..... 1 1 5 1 1 1 3 0—13

Three base hits—O'Connell, Eckley. Two base hits—Mellen, Brandell, Newell. Sacrifice hits—Mellen, 3; Sauters, Sutterby, Newell. Stolen bases—Clary, O'Connell, Sauters. Left on bases—Michigan, 11; Cornell, 5. Double play—Brandell to Walterhouse. Hit by pitched ball—Eckley (by Ohlmacher), Ohlmacher and Andrus (by Russell). Bases on balls—off Russell, 2; off Ohlmacher, 4; off Andrus, 1. Struck out—by Russell, 5; by Miller, 1. Balk—Ohlmacher. Wild pitch—Ohlmacher, Andrus. Passed ball—Dunne. Umpire—Flynn.

Michigan 4, Cornell 2

The Wolverines took the last game of the series by the score of 4 to 2. Michigan made nine hits off Sutterby's delivery, and the Cornell infield contributed seven errors which counted in the scoring. Eckley had another bad day; he made four errors. Michigan scored one run at a time in each of the third, fifth, sixth, and ninth innings. With one out in the third, Roehm hit to right field for three bases, and scored when Niemann hit a hot grounder through Sutterby. Labadie was safe on Sauters's error, but Sutterby tightened and struck out the next two batters. In the fifth, Roehm walked, went to second on a sacrifice, and scored on Sutterby's poor throw to first. A hit, a balk by Sutterby, and a wild throw by Eckley scored another run in the sixth.

Cornell looked dangerous in the seventh. Eckley was hit by a pitched ball, reached second on Valentine's single, and scored on Sauters's single through the pitcher's box. Valentine went to third, and scored on Burpee's infield out.

Michigan scored again in the ninth when Labadie hit for two bases, stole third, and came home on Brandell's single. The score:

Cornell.... 0 0 0 0 0 0 2 0—2 8 7
 Michigan . 0 0 1 0 1 1 0 0—4 9 1

Harvard Crews Both Win

Cornell Varsity Loses by Two Lengths— The Freshman Race Very Close

Harvard swept the Charles last Saturday, and the Cornell varsity and freshman crews went down to defeat. It was the second successive race that the Harvard varsity eight has won from Cornell. The Crimson finished the mile and seven-eighths approximately two lengths ahead of Cornell.

Harvard led from the start and kept the advantage throughout. Both crews caught the water together but Harvard struck at once into a faster stroke, about 38 to the minute, with Cornell a stroke or two slower. Slowly but surely the Crimson oars flashed ahead. Harvard soon settled down to 33 and Cornell held to 32, but the Courtney shell did not run smoothly until the stroke had been lowered to 30. The power exhibited at that speed was impressive, but Harvard, sticking to 33, slowly increased the lead. At the bridge, a mile from the finish, Harvard led by half a length. A quarter of a mile farther on open water began to show between the shells. At the sprint Harvard went up to 36 and Cornell to 34 and the Crimson continued to gain. At the finish there was at least three-quarters of a length of open water between Harvard's stern and Cornell's bow.

Cowles Andrus '16, who rowed number four at Poughkeepsie last June and has held that seat all spring, was kept out of the race because of an infected hand. His place was taken by Frank Nelms, jr., '18, a member of last year's freshman eight who has been rowing six in the third boat this spring.

The time of the varsity race was: Harvard, 9 minutes 47 seconds; Cornell, 9 minutes 54 seconds.

The freshman race was much closer, although it started out very much like the varsity race. Harvard gradually drew away, hitting a faster stroke, and led by three-quarters of a length at the bridge. This lead was retained until the shells were nearing the finish. The Cornell youngsters then started a beautiful sprint which drove their shell up almost to even terms. The finish was so close that the spectators were doubtful of the result until the judges announced that Harvard had won by about six feet. The time announced was: Harvard, 9 minutes 59 seconds; Cornell, 10 minutes 1 second.

The Cornell crews were boated as follows:

Varsity.—Bow, K. H. Fernow '16,

THE FIRST VARSITY CREW COMBINATION

Left to right: Collyer, stroke; Brower, three; Cushing, six; Worn, five; Chandler, cox.; Andrus, four; Lund, seven; Bird, two; Fernow, bow.
Photograph by E. L. Conlon

Waterport; two, R. G. Bird '16, New York; three, L. G. Brower '18, Mamaroneck; four, F. Nelms, jr., '18, Philadelphia; five, G. A. Worn '17, Reno, Nev.; six, A. A. Cushing, Ithaca; seven, G. E. Lund '17, Christiania, Norway; stroke, J. L. Collyer '17, Chelsea-on-Hudson; cox., D. H. Chandler, jr., '17, Vineland, N. J.

Freshman.—Bow, J. K. Aimer, Brooklyn; two, F. H. Pincoffs, Chicago; three, W. L. Webster, East Aurora; four, C. W. Jefferson, Schenectady; five, P. B. Chase, Chicago; six, H. A. Short, Baltimore; seven, F. E. Quick, Newton Centre, Mass.; stroke, A. Aloe, Philadelphia; cox., C. F. Hendrie, Brooklyn.

Last Monday afternoon, at the first practice after the race, Mr. Courtney began a reorganization. The three varsity combinations were shifted about considerably. When the shells went out it was impossible to tell which one actually was the varsity eight. Further changes were to be made on Tuesday, but as the NEWS goes to press no definite combinations can be announced.

Golf Team Does Well

Wins Three Out of Four Matches With Other Colleges

The university golf team has had a successful season. It has won matches played with Amherst, Williams, and Pennsylvania, and has lost to Harvard. On the basis of comparative results the team is about on a par with the Harvard golfers among the eastern college teams, since Williams has defeated Yale, Yale beat Harvard at Cambridge, and Pennsylvania held Princeton to a 5—4 score.

The team defeated Pennsylvania by a score of 7 to 2 in a match played on the links of the Ithaca Country Club

last Saturday. Six two-ball and three four-ball matches were played, and Cornell won four of the two-ball matches and all three of the foursomes.

The team won two of the three matches played on a New England trip. Amherst was defeated on May 18 by a score of 5 to 1, but the Cornell team lost its match with Harvard on the next day. The match was played at the Oakley Country Club, Boston, and was won by Harvard, 5 to 1. Several of the matches were close, however, that between DeWitt, Cornell, and Hubbell, Harvard, going three extra holes before the Harvard player won. D. D. Cooke '16 was the only member of the Cornell team to defeat his opponent. On May 20 the team defeated Williams at Williamstown in a one-sided match by the score of 5 to 1. The men who took the trip were Captain C. T. Lansing '16; D. D. Cooke '16, E. B. Cooke '16, H. Wyman, 2nd, '16; J. DeWitt '17, and H. J. Bradley '18.

Track

Thirty-Six Cornell Men to Take Part in the Meet at Cambridge

Thirty-six members of the varsity track team will take the trip to Cambridge to participate in the intercollegiate meet on Friday and Saturday of this week. The men, and the events in which they have been entered, are as follows:

100 Yard Dash—VanWinkle, Bartsch, Kelly, Culbertson.

220 Yard Dash—VanWinkle, Crim, Shelton, Kelly.

440 Yard Dash—Crim, Shelton.

Half Mile Run—Windnagle, Irish, Beckwith, Taylor.

Mile Run—Windnagle, Irish, Beckwith.

Two Mile Run—Potter, Hoffmire, Frey, Corwith, Boynton.

High Hurdles—Starr, Gubb, Millard, Watt.

Low Hurdles—Starr, Watt, Acheson, Lyford.

Pole Vault—Foss, Cheney, Gillies.

Shot Put—Richards, Moore, Howell, Gillies.

High Jump—Richards, McLaren, Cady.

Hammer Throw—McCormick, Hagemann, Jewett, Dixon, Miller.

Broad Jump—Richards, Culbertson, Cheney, Benjamin, Harrison.

Champions in Lacrosse

Captain Collins's Team Ends Season with Victories over Harvard and Yale

Victories over Harvard and Yale gave Cornell the championship of the northern division of the intercollegiate lacrosse league. Harvard was beaten at Cambridge last Saturday by the score of 5 to 2, and Yale was defeated on Monday at New Haven 5 to 1.

Cornell had little difficulty in either contest. Against Harvard Cornell took the lead early, scoring three goals to Harvard's one in the first half. Cornell continued on the aggressive throughout the second half but Harvard's excellent defense kept the score down. Goals for Cornell were made by Drescher (2), Taylor, Gargiulo, and Ingalls.

Track.—The freshman track team defeated the Pennsylvania freshmen on Schoellkopf Field last Saturday by the score of 62 1-2 to 54 1-2. Cornell won first place in eight of the thirteen events. The performances were mediocre as a rule. G. A. Bronder, Cornell, showed promise in the shot put with a mark of 42 feet 2 1-2 inches. Dresser, Cornell, won the mile in 4 minutes 31 2-5 seconds.

Tennis.—Harvard defeated Cornell by a perfect score at Cambridge on May 15. The Crimson players took all six matches. Captain Hunter, of Cornell, made Captain R. N. Williams, of Harvard, the former national champion, extend himself to win a well played match, 6-3, 7-5. W. M. Blair '17, the regular number two on the Cornell team, was unable to play.

EXAMINATIONS for promotion to commissioned offices in the cadet corps have been taken this month by one hundred and five non-commissioned officers. The number is much larger than ever before. There were about twenty-five commissions to be given.

ALUMNI NOTES

'92, Ph.B.—*The Daily Texan*, the student daily publication of the University of Texas, said recently: "Upon the culmination of the most successful of the University Interscholastic meets, we wish to congratulate Professor E. D. Shurter, the man who has done most to develop the University Interscholastic League, the man who has for six years worked unceasingly in his efforts to extend its usefulness. Dr. Shurter occupies an enviable position. For few indeed there are who have such an opportunity to exert themselves in a manner so directly serviceable to the State." The interscholastic league conducts statewide competitions not only in athletics but in debating, public speaking, spelling, etc. Fifteen thousand boys and girls took part, the *Texan* says, in the preliminary contests this year.

'93—Henry H. VanCleaf writes from France to a friend in Ithaca: "I am at the front giving what little service is possible to our American ambulance corps. My address is Section Sanitaire Américaine No. 7, Paris, France."

'95, C.E.; '97, LL.B.—Roger Lewis announces the removal of his law offices to the seventh floor of the Mutual Life Building, 32 Nassau Street, New York.

'97, LL.B.—Captain Joseph W. Beacham, jr., 29th Infantry, U. S. A., graduated from the Army Staff School at Fort Leavenworth on May 13.

'97, B.S.—A son, Robert Hendee Smith, was born March 22, 1916, to Dr. and Mrs. Charles Hendee Smith, of 257 West Seventy-fourth Street, New York.

'99, M.E.—S. Wiley Wakeman has left the New York Shipbuilding Company and is now the general superintendent of the Fore River Shipbuilding Corporation at Quincy, Mass.

'02, A.B.—Richardson Webster is taking part in the Friars' Frolic, which gives a performance in New York City on Sunday, May 28, and goes on the road the following day, playing Atlantic City, Philadelphia, Baltimore, Pittsburgh, Cleveland, Cincinnati, St. Louis, Chicago, Detroit, Buffalo, Rochester, Boston and Providence. He will be glad to greet any of his classmates who will look him up or who will stand on the curb and cheer as the parade goes by.

'04, M.E.—R. S. Trott is general manager of the Trott Automobile Company, 723 Chamber of Commerce Build-

ing, Detroit. The company handles a spring suspension for automobiles in which the horizontal as well as the vertical components of the road shocks are cushioned.

'05, M.E.—Walter W. Nowak, who has been in South America as a representative of the Niles-Bement-Pond Company of New York for the last four and a half years, is returning to this country. His address will be in care of the company, 111 Broadway, New York.

'07, A.B.—A son was born on May 19 to Mr. and Mrs. Robert Schurman, of San Francisco. He has been named Jacob Gould Schurman 3d.

'08, M.E.—George N. Brown, of the New York State Railways, has changed his address from Syracuse to Apartment G, The Olbiston, Utica, N. Y. His duties have been somewhat changed. He retains charge of the electrical department of the Syracuse-Utica Lines and has been appointed superintendent of the interurban lines out of Utica.
